Final Report

Approved for public release; distribution is unlimited.

Prepared for US Army Garrison, Fort Gordon
Directorate of Public Works and
Logistics
Fort Gordon, GA 30905

ABSTRACT: This volume of the Fort Gordon Cold War Architectural Survey Volume 4: Family Housing Survey Forms contains the historic inventory forms for the buildings in the four family housing areas at Fort Gordon, Georgia. This volume satisfies Section 110 of the National Historic Preservation Act of 1966 as amended, and was used to determine the eligibility of these buildings and landscapes for exceptional significance for inclusion on the NRHP for the Cold War period.

No buildings, structures, or landscapes were recommended for nomination to the NRHP under Criteria consideration G for exceptional significance. Further, the 305 family housing buildings, originally constructed between 1966 and 1975, were found to have little integrity remaining and it is the recommendation of this survey that none of the family housing constructed during this time period will become eligible for the NRHP when they reach 50 years of age.

Preface

This study was conducted for the U.S. Army Garrison, Fort Gordon, Directorate of Public Works and Logistics, Fort Gordon, GA under project number CNC-QA53, "Conduct Architectural Inventory for Historic Properties-Ft. Gordon." Funding was provided by Military Interdepartmental Purchase Request (MIPR) 21/2020/220/A/W31XNJ32384200/PO, dated 3 SEP 2003. The Fort Gordon technical monitor was Mr. Robert Drumm, Cultural Resources Manager.

The work was performed by the Land and Heritage Conservation Branch (CN-C) of the Installations Division (CN), Construction Engineering Research Laboratory (CERL). The CERL Project Manager was Mr. Adam Smith. Dr. Lucy A. Whalley is Chief, CEERD-CN-C, and Dr. John T. Bandy is Chief, CEERD-CN. The Director of CERL is Dr. Alan W. Moore.

CERL is an element of the U.S. Army Engineer Research and Development Center (ERDC), U.S. Army Corps of Engineers. The Commander and Executive Director of ERDC is COL James R. Rowan and the Director of ERDC is Dr. James R. Houston.

1 Survey Results

Three hundred and five family housing buildings at Fort Gordon were surveyed for eligibility to the National Register under Criterion G: Exceptional Significance. Table 1 contains the list of these housing units, year built, and description. Most of the family housing buildings are in duplex, quad, or multiple unit configurations. There are three types of Army building construction: permanent (P), semi-permanent (S), and temporary (T). All of Fort Gordon's family housing is considered permanent construction.

DESCRIPTION

These are one story family housing units. These four buildings are single-family units. The housing has a large carport in the front of the structure. The front door and large sidelight are recessed into the structure providing a modicum of protection from the elements. The windows are six-over-six vinyl replacement windows. The siding is horizontal vinyl replacement siding.

HISTORY

These four buildings were constructed in 1967.

INTEGRITY

The integrity of the housing is very low. The original building had horizontal wood siding. The original windows have been replaced with six-over-six vinyl windows. The front door does not appear to be original, although the large sidelight does appear to be original. The wood fence enclosures in the front and rear of the housing units have been replaced with vinyl fencing.

DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS

It is the determination of this report that Buildings 31, 32, 33, and 34 do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.

It is the recommendation of this report that Buildings 31, 32, 33, and 34 also will not become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.

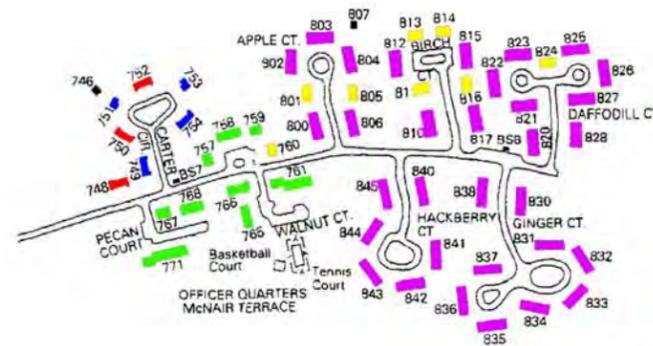

Type 1 housing (red)--1966

Type 4 housing (yellow)--1975

Type 2 housing (blue)--1966

Type 5 housing (purple)--1975

Type 3 housing (green)--1966

Note: Buldings 746 and 807 are sewage lift stations and are not part of this survey.

DESCRIPTION

These are two story family housing units. These units are in different configurations from duplexes to quad to multi. The housing has a storage unit in the front of the structure, which also protects the front door. The windows are one-over-one. The first floor has vertical vinyl siding, while the second floor has horizontal siding.

HISTORY

Wise, Simpson, Aiken & Assoc. of Atlanta, GA designed these units through a contract from the Corps of Engineers Savannah District in 1966 here at Fort Gordon and at Fort Jackson, South Carolina. The first phase of McNair Terrace including these houses was built in 1966, with the second phase of McNair Terrace constructed in 1975.

INTEGRITY

The integrity of the housing is very low. The original building had vertical wood siding on the first floor, and wide horizontal wood siding on the second. The original two-over-two windows have been replaced with one-over-one. The front door with square light has been replaced with a solid door.

DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS

It is the determination of this report that Buildings 757, 758, 759, 761, 765, 766, 767, 768, and 771 do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.

It is the recommendation of this report that Buildings 757, 758, 759, 761, 765, 766, 767, 768, and 771 also will not become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.

<p><u>PRELIMINARY NATIONAL REGISTER DETERMINATION OF ELIGIBILITY</u></p> <p>ELIGIBLE/CONTRIBUTING NOT ELIGIBLE</p> <p><input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p><u>FORM PREPARED BY:</u> Adam Smith and Sunny Stone Engineer Research and Development Center Construction Engineering Research Laboratory 2902 Farber Drive Champaign, IL 61822</p> <p><u>DATE: SEPTEMBER 2004</u></p>
<p><u>DESCRIPTION</u> These are one story family housing units that are duplexed. The windows are one-over-one; however, there are tall vertical fixed windows as well. The housing has horizontal vinyl siding.</p>	
<p><u>HISTORY</u> The Corps of Engineers Mobile District contracted out for the design and construction of these housing units in 1973 to be built at Fort Gordon. The first phase of McNair Terrace was built in 1966, with the second phase of McNair Terrace in 1975. It was the second phase that included these housing units.</p>	
<p><u>INTEGRITY</u> The integrity of the housing is very low. The original building had wood shakes on the walls and large reveal siding in the gable, which has been replaced by small reveal vinyl siding. The same large reveal siding seen in the gable ends also make up a portion of the exterior siding (Storage area and inner facing offset gables and wall portion). The original slider windows have been replaced with one-over-one. The vertical fixed windows have also been replaced with vertical vinyl fixed-pane windows. The original slider windows were set into the shingled wall, and sat above a hardboard panel.</p>	
<p><u>DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS</u> It is the determination of this report that all of the McNair Type #5 housing listed above do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.</p> <p>It is the recommendation of this report that none of the McNair Type #5 housing will become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.</p>

DESCRIPTION

These are two story family housing units; however, main floor is in a partially exposed basement level and the rear of the second floor accesses out at grade level. These units are in different configurations from quads to multi. The housing has a storage unit in the front of the structure. The windows are one-over-one. The first floor has vertical vinyl siding, while the second floor has horizontal siding. A vinyl fence encloses the front patio. The door is a solid slab.

HISTORY

Reid Hearn & Assoc. and Cummings & McCrady, Architects and Engineers designed these units through a contract from the Corps of Engineers Savannah District in 1966 here at Fort Gordon and at Fort Jackson, South Carolina. Gordon Terrace was built in two phases, the first in 1966, and the second in 1970.

INTEGRITY

The integrity of the housing is very low. The original building had horizontal wood siding and exposed concrete block on the first floor, and vertical wood siding on the second. The original large plate glass windows and small sliders for ventilation have been replaced with one-over-one. The original large slider windows on the second floor also have been replaced with one-over-one. A storage unit has been added for each unit between the units.

DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS

It is the determination of this report that Buildings 1725, 1726, 1727, 1748, 1749, and 1750 do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.

It is the recommendation of this report that Buildings 1725, 1726, 1727, 1748, 1749, and 1750 also will not become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.

<p><u>PRELIMINARY NATIONAL REGISTER DETERMINATION OF ELIGIBILITY</u></p> <p>ELIGIBLE/CONTRIBUTING NOT ELIGIBLE</p> <p><input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p><u>FORM PREPARED BY:</u> Adam Smith and Sunny Stone Engineer Research and Development Center Construction Engineering Research Laboratory 2902 Farber Drive Champaign, IL 61822</p> <p><u>DATE: SEPTEMBER 2004</u></p>
<p><u>DESCRIPTION</u></p> <p>These are one story family housing units. These 66 units are in a duplex configuration. There are two versions to this type: the first has an entrance to the kitchen on the side of the house with storage at the end off the driveway; the second has an entrance to the kitchen on the front of the house with storage at the back of the unit. The windows are one-over-one, and the doors are solid slabs. The units have horizontal vinyl siding. Vinyl fencing encloses the front and back patios.</p>	
<p><u>HISTORY</u></p> <p>Wise, Simpson, Aiken & Assoc. of Atlanta, GA designed these units through a contract from the Corps of Engineers Savannah District in 1970 here at Fort Gordon. Gordon Terrace was built in two phases, the first in 1966, and the second in 1970.</p>	
<p><u>INTEGRITY</u></p> <p>The integrity of the housing is very low. The original building had horizontal wood siding on the first floor between the windows. Below the windows was different siding with stucco below the siding. The original windows were two-over-two aluminum windows. The front doors had two panels with a third housing a small window.</p>	
<p><u>DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS</u></p> <p>It is the determination of this report that all of the Gordon Type 4 housing does not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.</p> <p>It is the recommendation of this report that none of the Gordon Type 4 housing will become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.</p>

DESCRIPTION

These are split-level family housing units. These four units are in quad configurations. The windows are one-over-one. The doors are wood slabs with one sidelight. There is a glass sliding door on the entrance level on the front facade; the area in front of the sliding glass doors is protected by a vinyl fence. The back door is located on the split halfway between the first and second floors. The front doors are slightly inset into the first floor. The units have horizontal vinyl siding on the second floor, with vertical vinyl siding on the first floor. Vinyl fencing encloses the back patios.

HISTORY

Wise, Simpson, Aiken & Assoc. of Atlanta, GA designed these units through a contract from the Corps of Engineers Jacksonville District in 1970 here at Fort Gordon. Gordon Terrace was built in two phases, the first in 1966, and the second in 1970.

INTEGRITY

The integrity of the housing is very low. The original building had a horizontal wood siding on the first floor with exposed concrete block on the sides. The second floor had vertical wood siding. The original windows were two-over-two aluminum windows. The front doors had two panels with a third housing a small window. The sliding glass door was aluminum. The wood fencing has been replaced with vinyl fencing.

DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS

It is the determination of this report that Buildings 1645, 1952, 1953, and 1954 do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.

It is the recommendation of this report that Buildings 1645, 1952, 1953, and 1954 also will not become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.

<p><u>PRELIMINARY NATIONAL REGISTER DETERMINATION OF ELIGIBILITY</u></p> <p>ELIGIBLE/CONTRIBUTING NOT ELIGIBLE</p> <p><input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p><u>FORM PREPARED BY:</u> Adam Smith and Sunny Stone Engineer Research and Development Center Construction Engineering Research Laboratory 2902 Farber Drive Champaign, IL 61822</p> <p>DATE: SEPTEMBER 2004</p>
<p><u>DESCRIPTION</u> These are two story family housing units that are duplexed. The housing has a shared carport in the front of the structure. The windows are one-over-one; however, there are tall vertical fixed windows as well. The housing has horizontal vinyl siding.</p>	
<p><u>HISTORY</u> The Corps of Engineers Mobile District contracted out for the design and construction of these housing units in 1973 here at Fort Gordon and at Fort Jackson, South Carolina. The housing at Olive Terrace was constructed in 1974 and 1975.</p>	
<p><u>INTEGRITY</u> The integrity of the housing is very low. The original building had large reveal horizontal siding, which has been replaced by small reveal vinyl siding. The original slider windows have been replaced with one-over-one.</p>	
<p><u>DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS</u> It is the determination of this report that all of the buildings listed above do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.</p> <p>It is the recommendation of this report that none of the buildings listed above will become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.</p>

<p><u>PRELIMINARY NATIONAL REGISTER DETERMINATION OF ELIGIBILITY</u></p> <p>ELIGIBLE/CONTRIBUTING NOT ELIGIBLE</p> <p><input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p><u>FORM PREPARED BY:</u> Adam Smith and Sunny Stone Engineer Research and Development Center Construction Engineering Research Laboratory 2902 Farber Drive Champaign, IL 61822</p> <p>DATE: SEPTEMBER 2004</p>
<p><u>DESCRIPTION</u> These are one story family housing units that are duplexed. The housing has a shared carport in the front of the structure. The windows are one-over-one; however, there are tall vertical fixed windows as well. The housing has horizontal vinyl siding.</p>	
<p><u>HISTORY</u> The Corps of Engineers Mobile District contracted out for the design and construction of these housing units in 1973 here at Fort Gordon. The housing at Olive Terrace was constructed in 1974 and 1975.</p>	
<p><u>INTEGRITY</u> The integrity of the housing is very low. The original building had wood shakes on the walls and large reveal siding in the gable, which has been replaced by small reveal vinyl siding. The same large reveal siding seen in the gable ends also make up a portion of the exterior siding (Storage area and inner facing offset gables and wall portion). The original slider windows have been replaced with one-over-one. The vertical fixed windows have also been replaced with vertical vinyl fixed-pane windows. The original slider windows were set into the shingled wall, and sat above a hardboard panel.</p>	
<p><u>DETERMINATION OF CONTRIBUTING/NONCONTRIBUTING STATUS</u> It is the determination of this report that all of the housing units listed above do not fit Criteria G or the criteria for the Cold War and are not exceptionally significant for eligibility to the National Register.</p> <p>It is the recommendation of this report that none of the housing units listed above will become eligible for the National Register when they reach 50 years of age due to a severe lack of integrity.</p>

14. ABSTRACT <p>This volume of the Fort Gordon Cold War Architectural Survey Volume 4: Family Housing Survey Forms contains the historic inventory forms for the buildings in the four family housing areas at Fort Gordon, Georgia. This volume satisfies Section 110 of the National Historic Preservation Act of 1966 as amended, and was used to determine the eligibility of these buildings and landscapes for exceptional significance for inclusion on the NRHP for the Cold War period.</p> <p>No buildings, structures, or landscapes were recommended for nomination to the NRHP under Criteria consideration G for exceptional significance. Further, the 305 family housing buildings, originally constructed between 1966 and 1975, were found to have little integrity remaining and it is the recommendation of this survey that none of the family housing constructed during this time period will become eligible for the NRHP when they reach 50 years of age.</p>
