

About the Secretary of Defense Environmental Awards

The Department of Defense established the annual Secretary of Defense Environmental Awards in 1962 to honor individuals, teams, and installations for their outstanding achievements and innovative environmental practices and partnerships that promote the quality of life and increase efficiencies without compromising mission success. In doing so, the Department celebrates Military Service members and civilians for their commitments to protect human health and the environment as well as maintain and restore America’s natural resources and cultural heritage for future generations while also addressing complex national security challenges.

Each year, the Office of the Deputy Under Secretary of Defense (Installations & Environment) submits a call for nominations and each Military Service and Defense Agency may submit one nomination for each of the nine categories that cover six subject areas: natural resources conservation; environmental quality; sustainability; environmental restoration; cultural resources management; and environmental excellence in weapon system acquisition. As structured since Fiscal Year (FY) 2009, some of the awards within these categories are on a two-year cycle with large/small and non-industrial/industrial installations competing in alternate years, as shown below. Small installations are installations with 10,000 acres or less, and industrial installations are installations with a primary mission of manufacturing, maintaining, or rehabilitating military equipment. As the 2014 Secretary of Defense Environmental Awards are recognizing achievements in the FY 2012-2013 cycle, they are considered “Odd Fiscal Year” awards.

Odd Fiscal Years	Even Fiscal Years
Natural Resources Conservation, Small Installation	Natural Resources Conservation, Large Installation
Natural Resources Conservation, Individual/Team	
Environmental Quality, Non-industrial Installation	Environmental Quality, Industrial Installation
Environmental Quality, Individual/Team	Environmental Quality, Overseas Installation
Sustainability, Industrial Installation	Sustainability, Non-industrial Installation
	Sustainability, Individual/Team
Environmental Restoration, Installation	Environmental Restoration, Installation
Environmental Restoration, Individual/Team	
Cultural Resources Management, Individual/Team	Cultural Resources Management, Installation
	Cultural Resources Management, Individual/Team
Environmental Excellence in Weapon System Acquisition, Large Program	Environmental Excellence in Weapon System Acquisition, Small Program

Nominees for individual awards must be Department of Defense (DoD) civilian employees or members of the U.S. Armed Forces. Nominees for team awards must include one or more DoD civilian employee or member of the U.S. Armed Forces, other team members may be DoD contractor employees. After the Military Services and Defense Agencies submit their nominations, a panel of judges from Federal and state agencies, academia, and the public with expertise, education, or experience in the specific subject area evaluate and score each of the nominees to select the winners in each category. DoD recognizes each winner with a trophy, a Secretary of Defense certificate of achievement, and an American flag that is flown over the U.S. Capitol by their senior Senator on Earth Day and over the Pentagon on Memorial Day. DoD recognizes honorable mentions with a Secretary of Defense certificate of achievement.

Although only recognized once a year, Military Service members and civilians continue their exceptional efforts in protecting the environment and human health, as well as preserving the resources at our installations to support training and operations. Their efforts exemplify the Department of Defense's environmental leadership, both in the United States and overseas.
