Challenging IRP Sites: Open Discussion Topics

- **What does adaptive site management (ASM) mean to you?**
- **How has ASM or sequential remedial technologies benefited your project or program?**
- **What are the primary challenges related to complex GW sites you have encountered at your site/program**
- **What solutions do you see to those challenges?**
- **What are challenges & keys to success for implementing ASM?**
- **How have positive relationships among stakeholders been fostered to promote progress or how do you think a path to these positive relationships can be developed?**
- **How have exit or closure strategies been developed and reviewed for your project or program?**
- **How has the individual State/EPA GW classification has factored in remedial decisions?**
