19th January 1996

Dear Sirs,

I have received a packet of information about the Kirtland's Warbler from the Michigan Dept of Natural Resources, Houghton Lake, through a friend, Ms Mary Richards. This is extremely interesting to us here in The Bahamas.

The Ornithology Group under the umbrella of the Wildlife Committee of the Bahamas National Trust is less than two years old but we are very active and enthusiastic. We already have partnership with the North Carolina State Museum of Natural Sciences under the Partners-in-Flight program.

We would like to set up a dialog and exchange of information with appropriate agencies in Michigan on the Kirtland's Warbler and look forward to your response in due course.

Yours sincerely,

Carolyn Wardle
Group Coordinator
