# OFFICE OF THE CHIEF OF NAVAL OPERATIONS 2000 NAVY PENTAGON WASHINGTON, DC 20350-2000

IN REPLY REFER TO

5090 Ser N451/N5U9011245 8 Mar 05

From: Chief of Naval Operations

To: Distribution

Subj: NAVY ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) IMPLEMENTATION POLICY AND SELF-DECLARATION PROTOCOL

Ref: (a) Navy Environmental Management Systems (EMS) Policy, 6 Dec 2001

- (b) Executive Order 13148, Greening the Government through Leadership in Environmental Management, 21 Apr 2000
- (c) Department of Defense memo, Environmental Management System, 5 Apr 2002
- (d) Department of Defense memo, Environmental Management System (EMS) Implementation Criteria and Metrics, 30 January 2003
- (e) DOD Environmental Management System (EMS) Self-Declaration Policy, 16 July 2004
- Encl: (1) List of Navy Appropriate Facilities with Procedure for Updating List
  - (2) DOD EMS Implementation Metrics Criteria
  - (3) Navy EMS Self-Declaration Protocol
  - (4) Sample Verification Memorandum
- 1. This policy memorandum transmits the Navy Environmental Management System (EMS) Self-Declaration Protocol. The protocol highlights the critical elements necessary to have a functioning EMS and guides Navy installations to move forward to a fully conforming EMS.
- 2. In accordance with references (a)-(d), Navy's appropriate facilities within the United States (US) and its territories identified in enclosure (1) shall implement an EMS. Navy installations and regional complexes outside of these areas are encouraged to make best efforts to implement an EMS. Implementation will be incremental. Initially, US Navy Appropriate Facilities shall accomplish the Department of Defense (DOD) EMS Implementation Metrics announced in reference (d) and included in enclosure (2) by 31 December 2005. The six DOD EMS Implementation Metrics replace the requirement for the "EMS description document" described in reference (a).
- 3. Reference (e) requires each DOD Component establish policy on procedures for evaluating, certifying and self-declaring, and reporting full conformance with its EMS Implementation Policy. The

Subj: NAVY ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) IMPLEMENTATION POLICY AND SELF-DECLARATION PROTOCOL

Navy EMS Self-Declaration Protocol is provided in enclosure (3). Each of Navy's appropriate facilities shall use this protocol to validate that its EMS meets all requirements of reference (a). The protocol is designed to be used as part of the Navy's Environmental Quality Assessment (EQA) Program for on-going evaluation and continual improvement. The protocol gives Navy organizations the flexibility to implement the EMS in a manner that supports their overall mission while allowing outside parties to appreciate their EMS accomplishments. This protocol will also be used to verify the continuing conformance of Navy EMSs. Per reference (e), the Navy will review the self-declaration procedures annually for continued suitability to mission requirements. Fully conforming EMS shall be completed by the end of Fiscal Year 2009.

- 4. Navy's appropriate facilities shall complete two distinct events. The first event verifies compliance with the DOD EMS Implementation Metrics (reference (c) and enclosure (2)) and is designed to meet Executive Order 13148 requirements (reference (b)). The second event demonstrates conformance to the Navy EMS Criteria.
  - a. To report the six DOD EMS Implementation Metrics have been met, either the Commanding Officer for an installation EMS or the Regional Commander for a regional EMS is required to sign and submit to his or her claimant via the chain of command a verification memorandum. The DOD EMS Implementation Metrics criteria are provided in enclosure (2) and a sample verification memorandum is provided in enclosure (4).
  - b. Through use of the Navy EMS Self-Declaration Protocol, enclosure (3), Commanding Officer for an installation EMS or the Regional Commander for a regional EMS will self-declare conformance with the Navy EMS.
- 5. It is Navy's policy that third party registration to the ISO 14001:2004 standard is not required for self-declaration. Mission-funded activities will not seek or fund third party certification. A Navy Working Capital Fund activity may pursue third party certification if it can demonstrate that it is a sound business decision.
- 6. Systematic environmental management as an integral part of our day-to-day decision-making and long term planning processes is an important step in supporting mission readiness and effective use of our resources. A robust EMS is essential to sustaining compliance, reducing pollution and avoiding risk.

Subj: NAVY ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) IMPLEMENTATION POLICY AND SELF-DECLARATION PROTOCOL

7. The point of contact for the Navy EMS Implementation Policy and EMS Self-Declaration Process is Ms. Tami McVey, (202) 433-4959 or DSN 288-4959 or Mr. Sean Smith, (202) 433-5314.

David G. Price

PROCEDURE TO UPDATE LIST OF NAVY APPROPRIATE FACILITIES: Contact Tami McVey @ 202-433-4959, tami.mcvey@navy.mil or Sean Smith @ 202-433-5314. sean.m.smith@navy.mil and describe necessary changes and reasons for changes.

#### **Department of Defense EMS Implementation Metrics Criteria**

- 1) **Environmental Policy Statement.** The organization's environmental policy is a documented statement of the organization's fundamental environmental goals and direction. The environmental policy must be made available to the organization's personnel. The commanding officer or regional commander's signature on the environmental policy indicates command support for the EMS and for improvements in environmental performance.
- 2) **EMS Self-assessment.** In an EMS self-assessment, an organization determines where gaps exist between current systems and the Navy EMS criteria that are based on the ISO 14001 specification.
- 3) Written EMS Implementation Plans with defined dates, identified resources, and organizational responsibilities for implementing EMS. This plan, which identifies actions necessary to implement the EMS, is based on the results of the EMS Self-assessment. The plan should describe in detail what key actions are needed and who will be responsible for implementing them, identify resources needed for EMS implementation, and specify when the work will be completed.
- 4) **Prioritized list of aspects.** A prioritized list of aspects means that an organization has inventoried and assigned significance ratings to the aspects of its operations, processes and practices that cause, in normal operation or upset mode, an impact to an environment. Each operation, process or practice may have several aspects. Typical aspects of operations, processes or practices operated on Navy installations or regional complexes include: spill/release, air release, hazardous material use, hazardous waste generation, solid waste generation, medical waste generation, noise, electricity use, fuel use, and physical presence in environmentally sensitive locations.
- 5) Appropriate personnel have received awareness-level EMS training. Answer yes if senior management AND the EMS implementation team AND the environmental staff AND those owners of practices with significant aspects and impacts have received awareness-level EMS training. Training may be accomplished through a number of means including the EMS Awareness Interactive Multimedia Instruction available through CECOS, standup meetings, and other staff-led training. Completion of training must be documented.
- 6) Completed at least one management review in accordance with the organization's documented procedure. During the management review, senior management determines whether or not the EMS is working (suitable, adequate, and effective), where additional resources need to be allocated, and if the environmental policy is appropriate or needs to be changed. The management review should be documented in a record that includes who was present, when the review was conducted, and the decisions or outcomes of the management review. Indicate yes if both a management review has been conducted and there is a documented procedure for conducting management reviews.

## Navy Environmental Management System (EMS) Self-Declaration Protocol

#### **Introduction and Purpose**

This protocol provides Navy organizations with a process for self-declaring the conformance of their Environmental Management System (EMS) to meet Navy, Department of Defense (DoD), and federal requirements. This process ensures that Navy EMSs are operating as described, and using on-going assessment and continual improvement to support overall mission performance.

This protocol is part of the Navy's Environmental Quality Assessment Program and meets requirements of the "EMS Agency Self-Declaration Protocol for Appropriate Facilities," signed by Mr. John Howard, Federal Environmental Executive, on January 27, 2004 and endorsed by Mr. Alex A. Beehler, Assistant Deputy Under Secretary of Defense (Environment, Safety, and Occupational Health), on July 16, 2004. This protocol is designed for on-going evaluation and continual improvement and to give Navy organizations the flexibility to implement an EMS in ways that support their overall mission while allowing outside parties to appreciate their EMS accomplishments.

#### **Protocol**

#### **Initial EMS Self-Declaration Audit**

EMS Self-Declaration by Navy organizations will include an initial EMS audit conducted by reviewers from outside the scope of the EMS in question. This EMS self-declaration audit will be conducted by Navy Qualified Reviewers against pre-established audit criteria and will reflect objective observation against those criteria. This meets criteria for 2<sup>nd</sup> party recognition of an EMS and requirements of the Office of Federal Environmental Executive (OFEE) directive. The audit criteria are provided in Table 1, Navy EMS Components, Elements, Criteria. A Navy Qualified Reviewer is an EMS Auditor who has successfully completed an ANSI-RAB accredited EMS Lead Auditor training course or the Navy's Civil Engineer Corps Officer School's (CECOS) "Conducting EMS Reviews" training course. Navy Qualified Reviewers may be staff, other DOD components, other Federal Agencies (outside of DOD), and/or private consultants.

#### Scope of the Audit

The respective Commanding Officer for an Installation EMS or the Regional Commander for a Regional EMS and the EMS Management Representative shall identify the scope of the audit for the EMS self-declaration audit team. The respective Commanding Officer/Regional Commander shall ensure that pertinent records, procedures, and documentation are available for the EMS self-declaration audit team, with necessary documentation to verify completion of corrective actions.

#### **Audit Report and Follow-up**

Upon the completion of the independent EMS self-declaration audit, the EMS self- declaration audit team shall prepare a report on the subject EMS's conformance. The report shall declare the Navy organization's EMS conformant or document those areas of nonconformance in the EMS that must be corrected prior to the Navy organization being able to declare the subject EMS as

conformant. Copies of the report shall be provided to the respective Commanding Officer/Regional Commander and EMS Management Representative. For any findings of nonconformance identified by the EMS self-declaration audit team, the Commanding Officer/Regional Commander/EMS Management Representative shall propose appropriate corrective actions to the audit team. Typically proposed corrective actions should be submitted to the EMS self-declaration audit team within 30 days after receipt of the audit report. The EMS Management Representative must also follow up with the necessary documentation to verify the implementation/completion of the corrective actions.

#### Memorandum of EMS Self-Declaration

Upon documented resolution of all findings of nonconformance (and subsequent determination of EMS conformance by the EMS self-declaration audit team), the Commanding Officer/Regional Commander shall prepare a Memorandum of EMS Self-Declaration and provide copies to the EMS Management Representative, the EMS self-declaration audit team leader, the organization's Major Claimant, and other interested parties. The Major Claimant shall provide a copy to OPNAV N45. Once Self-Declaration has been achieved, it should be maintained through the continuous improvement element of the EMS.

#### **Continuing Conformance**

Following initial self-declaration, Navy organizations shall self-declare EMS conformance on a periodic basis using a cycle of one-year internal and three-year external evaluations.

#### **Annual Internal EMS Review**

Navy organizations shall conduct an internal review of their EMS at least once per year and brief findings of that review in a management review.

#### **External EMS Review**

Each Major Claimant shall prepare a schedule for independent EMS reviews of its installation/regional EMSs at intervals not longer than three years. Independent EMS reviews may be conducted in combination with compliance reviews but it is optional. Organizations with externally registered EMS may use registration documents to meet this requirement.

#### **Certificate of Navy EMS Conformance**

Upon initial EMS self-declaration, the major claimant will provide the organization with a signed certificate of "Navy Environmental Management System Conformance." Following each self-declaration based on an external EMS review, the Major Claimant will provide an updated certificate. The Major Claimant shall maintain a roster of conforming Activities and update it quarterly.

#### **Reporting Progress**

Each Major Claimant's EMS POC, in collaboration with its Navy Appropriate Facilities, shall highlight EMS achievements for reports to the Department of Defense, and to other organizations within and outside of the Navy.

	Table 1.		
		Components, Elements, Criteria	
Component	Element	Criteria	
Policy	1. Environmental Policy	<ul> <li>The organization has an environmental policy statement that:         <ul> <li>is documented and signed by the organization's commanding officer;</li> <li>commits to compliance with relevant environmental legislation, regulations, and policy; to prevention of pollution; and to continual improvement in performance of the EMS; and</li> <li>is communicated to organization personnel and made available to the public.</li> </ul> </li> <li>The environmental policy is implemented and maintained.</li> </ul>	
Planning	2. Environmental Aspects	<ul> <li>The organization has established and maintains a documented procedure to identify the environmental aspects of its activities, products, services or practices that it can control and over which it can be expected to have an influence. The procedure provides for incorporating new or changed missions, operations, activities, services or practices into the EMS.</li> <li>The organization has documented its environmental aspects, which have or can have significant impact on the environment based on a risk analysis.</li> <li>The organization ensures that the aspects related to these significant impacts are considered in setting its environmental objectives.</li> <li>The organization keeps this information up-to-date.</li> </ul>	
	3. Legal and Other Requirements	<ul> <li>The organization has established and maintains a documented procedure to identify Federal, state, local, DoD, DoN, and organization-level environmental requirements that are applicable to the environmental aspects of its activities, products and services.</li> <li>The organization translates regulatory and policy requirements into procedures that appropriate personnel (e.g., practice owners) can use.</li> <li>The organization disseminates information on requirements in procedures and checklists as appropriate to all levels and functions.</li> </ul>	

	Table 1.			
	Navy EMS Components, Elements, Criteria			
Component	Element	Criteria		
	4. Environmental Objectives and Targets	<ul> <li>The organization has established and maintains documented environmental objectives and targets, at each relevant function and level within the organization.</li> <li>The organization's objectives and targets:         <ul> <li>reflect risks to mission determined through ranking of environmental aspects.</li> <li>are consistent with and supportive of the organization's environmental policy statement and environmental requirements, and</li> <li>are achievable within economic and technological restraints.</li> </ul> </li> </ul>		
	5. Management Actions to Support Objectives and Targets	<ul> <li>The organization identifies actions, responsible party(ies), and timeframes by which actions are to be achieved within the means of the organization's commanding officer (those actions accomplished through in-house resources/manpower) in order to achieve objectives and targets.</li> <li>The organization identifies projects necessary to achieve objectives and targets and requiring funding and uses PPBS tools and procedures to request funding, and where appropriate, uses risk assessment results and documentation to support PPBS funding requests and execution of funds.</li> </ul>		
Implementa - tion	6. Structure and Responsibility	<ul> <li>The organization has defined, documented, and communicated EMS roles, responsibilities, and authorities for:         <ul> <li>implementation and sustainment of the EMS</li> <li>management of environmental programs</li> <li>procedures for control of activities, products and services.</li> </ul> </li> </ul>		
	7. Training, Awareness and Competence	<ul> <li>The organization has identified, provided, and documented training and instruction needed to:         <ul> <li>comply with regulations</li> <li>ensure that appropriate personnel understand their responsibilities for implementing the EMS</li> <li>ensure practice owners understand specific procedures to control environmental impacts of their activities, products and services.</li> </ul> </li> </ul>		
	8. Communication	The organization has established and maintains documented procedures for internal and external communication relative to the EMS.		

Table 1.			
	Navy EMS Components, Elements, Criteria		
Component	9. EMS Documentation	<ul> <li>Criteria</li> <li>The organization has established and maintains, and the organization's leadership has approved, a written</li> </ul>	
		<ul> <li>EMS description document that describes:</li> <li>EMS elements, including Environmental Management Procedures (EMPs) to implement them;</li> <li>how elements relate to each other; and</li> <li>where related documents and records are maintained.</li> </ul>	
	10. Document Control	<ul> <li>The organization has established and maintains documented procedures for controlling all documents applicable to its EMS to ensure that         <ul> <li>they can be located</li> <li>the are periodically reviewed and revised as necessary</li> <li>the current versions of relevant documents are available when and where needed</li> <li>obsolete documents are promptly removed from all points of issue and points of use, or otherwise assured against unintended use</li> </ul> </li> </ul>	
		<ul> <li>Any obsolete documents retained for legal and/or knowledge preservation purposes are suitably identified.</li> </ul>	
	11. Operational Control	<ul> <li>The organization has identified those operations and activities that are associated with the identified significant environmental aspects in line with its policy, objectives and targets.</li> <li>The organization has planned these activities, including maintenance, in order to ensure that they are carried out under specified conditions by:         <ul> <li>establishing and maintaining documented procedures to cover situations where their absence could lead to deviations from the environmental policy and the objectives and targets;             <ul></ul></li></ul></li></ul>	

	Table 1.		
	Navy EMS Components, Elements, Criteria		
Component	Element	Criteria	
	12. Emergency Preparedness and Response	<ul> <li>The organization has established and maintains documented procedures for identifying and responding to accidents and emergencies and for mitigating the environmental impacts that might result.</li> <li>The organization reviews and revises its emergency preparedness and response procedures when new practices are initiated and after the occurrence of accidents or emergencies.</li> <li>Procedures are communicated to practice owners in scope and detail appropriate to their responsibilities in the event of an accident or emergency.</li> </ul>	
Checking and Corrective Action	13. Monitoring and Measurement	<ul> <li>The organization has established and maintains documented procedures to monitor and measure, on a regular basis, the key characteristics of its operations and activities that can have a significant impact on the environment.</li> <li>The organization has assigned roles and responsibilities and established procedures or mechanisms to track progress in meeting Objectives and Targets.</li> <li>The organization has established performance indicators or metrics to measure progress in accomplishing Objectives and Targets.</li> <li>Monitoring equipment is calibrated and maintained and records of this process shall be retained according to the organization's procedures.</li> <li>The organization has established and implemented a comprehensive internal assessment plan (IAP), in accordance with Navy EQA program guidance, to periodically evaluate compliance with relevant environmental legislation and regulations.</li> </ul>	
	14. Nonconformance, Noncompliance and Corrective and Preventive Action	<ul> <li>The organization has established and maintains documented procedures defining responsibilities and authority for handling and investigating nonconformances and noncompliances, taking action to mitigate any impacts caused, and for initiating and completing corrective and preventive action. The organization has implemented and recorded any changes in the documented procedures resulting from corrective and preventive action.</li> <li>The organization has documented its nonconformance and noncompliance deficiencies,</li> </ul>	

Table 1.				
	Navy EMS Components, Elements, Criteria			
Component	Element	recommended corrective actions, problem solving efforts, and plan of actions and milestones for recommended corrective actions.  The organization annually develops and forwards to the Major Claimant an EQA Report that contains a summary of their problem solving efforts and corrective actions, issues and concerns critical to the Major Claimant, a program area status summary, and an updated internal assessment plan.		
	15. Records	<ul> <li>The organization has established and maintains documented procedures for identification, maintenance and disposition of environmental records. These records include training records and the results of audits and reviews.</li> <li>Environmental records are:         <ul> <li>legible, identifiable and traceable to the activity, product or service involved.</li> <li>stored and maintained in such a way that they are readily retrievable and protected against damage, deterioration or loss.</li> </ul> </li> </ul>		
	16. EMS Review	<ul> <li>The organization has established and maintains documented procedures for periodic EMS reviews to be carried out in order to:         <ul> <li>determine whether or not the EMS conforms to Navy EMS policy and has been properly implemented and maintained.</li> <li>provide information on the results of reviews to management.</li> </ul> </li> </ul>		
Management Review	17. Management Review	<ul> <li>The organization's senior management, at intervals it determines, reviews the EMS to ensure its continuing suitability, adequacy and effectiveness.</li> <li>The management review process ensures that the necessary information is collected to allow management to carry out this evaluation.</li> <li>The management review is documented.</li> <li>The management review addresses the possible need for changes to policy, objectives and other elements of the EMS, in light of EMS review results, changing circumstances and the commitment to continual improvement.</li> </ul>
