## **“SIMPLY WONDERFUL” ERGONOMIC INTERVENTION**

**Congratulations to Lawrence Mullen**, an electronics mechanic at NAVAIR Depot Jacksonville, the winner of the 2005 DoD Workplace Safety and Health Forum’s Success Story Competition. Mr. Mullen presented his winning ergonomic intervention at the Orlando Forum on 20 September.

The competition judges were impressed with Mr. Mullen's excellent presentation of his Command's problem and successful solution. With a clear presentation and effective photographs, Mr. Mullen described a problem that caused concern for mission success and operator health. The subsequent effective solution was reached through the support of top management, consultation with an ergonomics expert and contributions of the operator.

**Curious to see just what the intervention involved? Go to the Forum Web site: <http://www.dodforums.org/Presentations/Mullen.ppt> to see the full presentation.**

### **Successful Ergonomic Programs require command support.**

#### **Kudos to:**

Supervisor - Robert Bradshaw  
Division Director - Roy Luke  
Ergo Program Manager - Barbara Wright  
Safety Director - Chris Williamson  
Commanding Officer - CAPT David Beck
