RE: Naval Facilities
Integrated Natural Resources Management Plan
Yorktown, Northwest Annex, Oceana Fentress, Dam Neck
Camp Pendleton
ESSLog#s 19076, 20545, 19789, 19789; respectively

Dear Ms. Huxley:

We have reviewed the Integrated Natural Resources Management Plans (INRMP) for the following Naval Facilities: Yorktown, Northwest Annex, Oceana Fentress, Dam Neck Camp Pendleton. We offer the following comments regarding the INRMPs. The Department of Game and Inland Fisheries (VDGIF), as the Commonwealth's wildlife and freshwater fish management agency, exercises enforcement and regulatory jurisdiction over those resources, inclusive of state or federally endangered or threatened species, but excluding listed insects. We are a consulting agency under the U. S. Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), and we provide environmental analysis of projects or permit applications coordinated through the Virginia Department of Environmental Quality, the Virginia Marine Resources Commission, the Virginia Department of Transportation, the U. S. Army Corps of Engineers, the Federal Energy Regulatory Commission, and other state or federal agencies. Our role in these procedures is to determine likely impacts upon fish and wildlife resources and habitats, and to recommend appropriate measures to avoid, reduce, or compensate for those impacts.

Yorktown

Pg 1-9; 1.7 Partnerships - We recommend expanding on the definition of the partnership between the Navy and the VDGIF. VDGIF provides input and recommendations regarding wildlife and fisheries management as well as the management and protection of rare, threatened and endangered species.

Pg 2-21; 2 6 1 Mammals. Throughout the INRMP, whitetail deer are referred to as "White-tailed deer", which is incorrect. We recommend updating the spelling for this animal throughout the entire document.

Pg 2-22; 2.6.2 Herpetofauna. We recommend making the changes to the text as suggested in the revised paragraph below. Please note that the southern toad is not known from York County and has been removed from the text.

A variety of reptiles and amphibians is known to inhabit the area. The most common snakes include the northern watersnake (*Nerodia sipedon*), eastern (=black) rat snake (*Elaphe alleganiensis*), black racer (*Coluber constrictor*), and rough green snake (*Opheodrys aestivus*). The copperhead (*Agkistrodon contortix*) is the only species of venomous snake known to occur on the Station, though eastern cottonmouth (*Agkistrodon piscivorus piscivorus*) and state-listed timber (canebrake) rattlesnake [(*Crotalus horridus*) Coastal Plain population] have known populations in York County. Common turtles include the eastern snapping turtle (*Chelydra serpentina serpentina*), northern red-bellied cooter (*Pseudemys rubriventris*), eastern mud turtle (*Kinosternon subrubrum subrubrum*), and eastern box turtle (*Terrapene carolina carolina*). Lizards found on the Station include the ground skink (*Scincella lateralis*) and the five-lined skink (*Pleistiodon* (=*Eumeces*) *fasciatus*). Of the amphibians that inhabit the area, frogs and toads comprise the largest group. Common frogs and toads found on the Station include the northern green frog (*Lithobates* (=*Rana*) *clamitans melanota*), southern leopard frog (*Lithobates* (=*Rana*) *sphenocephala utricularia*), spring peeper (*Pseudacris crucifer*), green treefrog (*Hyla cinerea*), southeastern chorus frog (*Pseudacris feriarum)* and American toad (*Anaxyrus* (=*Bufo*) *americanus*). Salamanders include spotted salamander (*Ambystoma maculatum*), marbled salamander (*Ambystoma opacum*), red-spotted newt (*Notophthalmus viridescens*), and the state-listed Mabee's salamander (*Ambystoma mabeei*).

Pg 2-22; 2.6.3 Fish. We recommend adding some text to this section that describes the anadromous fish resources known to occur at the installation and which are described below

> CAX – The York River has been designated a Confirmed Anadromous Fish Use Area. In addition, Queen Creek, King Creek, and Jones Millpond Creek have been designated Potential Anadromous Fish Use Areas. These resources are particularly valuable fisheries resources that should be protected to the greatest extent possible.
>
> WPNSTA – The York River and Indian Field Creek have been designated Confirmed Anadromous Fish Use Areas. Felgates Creek, Black Swamp and its tributaries, and King Creek have been designated Potential Anadromous Fish Use Areas. These resources are particularly valuable fisheries resources that should be protected to the greatest extent possible.

Pg 2-23; 2.6.4 Birds. The common names do not need capitalization unless part of the name is a proper noun.

Pg 2-23; 2.7 Rare, Threatened and Endangered Species and Significant Natural Communities. Throughout the document, including table 2-4, the bald eagle is referred to as federally listed. This species has been de-listed at a federal level, but continues to retain state Threatened status. We recommend updating the document to reflect the change in federal status.

Pg 3-30; 3.5.6 Water Quality and Wetlands Protection. We recommend that at least 100-foot naturally vegetated buffers be maintained on all streams and wetlands on site. In those waters that have been designated anadromous fish use areas, we recommend that all instream work adhere to a time of year restriction from February 15 through June 30 of any year. We recommend conducting any in-stream activities during low or no-flow conditions, using non-erodible cofferdams to isolate the construction area, blocking no more than 50% of the streamflow at any given time, stockpiling excavated material in a manner that prevents reentry into the stream, restoring original streambed and streambank contours, revegetating barren areas with native vegetation, and implementing strict erosion and sediment control measures. Due to future maintenance costs associated with culverts, and the loss of riparian and aquatic habitat, we prefer stream crossings to be constructed via clear-span bridges. However, if this is not possible, we recommend countersinking any culverts below the streambed at least 6 inches, or the use of bottomless culverts, to allow passage of aquatic organisms. We also recommend the installation of floodplain culverts to carry bankfull discharges.

Pg 3-32; 3.6.1 Game Species. We recommend that waterfowl hunting be allowed at the installations. We recommend updating the deer herd and population section with updated data from VDGIF. It has come to our attention that this installation has not met the Deer Management Objectives. We recommend evaluation of this and an increase in the number of hunter hours/days at the installation.

Pg 3-64; 3.11.2 Nuisance Species – Beaver. VDGIF discourages trapping and relocating of beavers because it is unlawful, not because habitats that support beaver already have them. Beaver can lawfully be killed in the event they are damaging crops or property. We recommend clarification in this section.

Pg 3-64; 3.11.2 Nuisance Species – Groundhog (Woodchuck). It is unlawful to trap and relocate this species, or any species of wildlife. As they are defined as a nuisance species, they may lawfully be killed at any time of year. We recommend clarification in this section.

Northwest Annex

Pg 2-15; 2.5.1 Mammals. Throughout the INRMP, whitetail deer are referred to as "White-tailed deer", which is incorrect. We recommend updating the spelling for this animal throughout the entire document.

Pg 2-17; 2.5.3 Birds. The common names do not need capitalization unless part of the name is a proper noun.

Pg 2-18; 2.6 Rare, Threatened and Endangered Species. Timber and canebrake rattlesnakes are listed as occurring on the base. These species are one in the same. However, VDGIF recognizes the Coastal Plain population (canebrake) as a unique geographic variation of the timber rattlesnake. The canebrake rattlesnake should be referred to as: **timber (canebrake) rattlesnake [(*Crotalus horridus*) Coastal Plain population].** This information needs to be updated in the document text as well as in Table 2-5. To further protect this species, we recommend that the mowing of any areas adjacent to forested wetlands be performed only during the winter months (hibernation periods for the species) to avoid striking them with mowers. Other areas should be mowed frequently enough (weekly) so that the grass does not obscure the location of canebrake rattlesnakes which make them more vulnerable to strikes. We further recommend that all mowing contractors be appropriately trained in the identification and status of this species. This could be accomplished via an appropriate information sheet distributed to those working on the project (see attached). Information also can be found on our website, http://www.dgif.virginia.gov/wildlife/species/display.asp?id=030013. If a canebrake rattlesnake is observed, please report this observation to the Base Environmental Manager and avoid harming the animal.

Pg 2-19; 2.6 Rare, Threatened and Endangered Species. We recommend re-writing the paragraph regarding jurisdictional authorities to clearly state that VDGIF is responsible for the protection and management of all of the Commonwealth's wildlife species, including Threatened or Endangered species, excluding listed insects.

Pg 3-4; 3.3 Wetlands and Water Quality Protection. We recommend that at least 100-foot naturally vegetated buffers be maintained on all streams and wetlands on site. We recommend conducting any in-stream activities during low or no-flow conditions, using non-erodible cofferdams to isolate the construction area, blocking no more than 50% of the streamflow at any given time, stockpiling excavated material in a manner that prevents reentry into the stream, restoring original streambed and streambank contours, revegetating barren areas with native vegetation, and implementing strict erosion and sediment control measures. Due to future maintenance costs associated with culverts, and the loss of riparian and aquatic habitat, we prefer stream crossings to be constructed via clear-span bridges. However, if this is not possible, we recommend countersinking any culverts below the streambed at least 6 inches, or the use of bottomless culverts, to allow passage of aquatic organisms. We also recommend the installation of floodplain culverts to carry bankfull discharges.

Oceana Fentress
None of the maps were included with the version of the document we were provided to review. We recommend making sure these are available to all reviewers of the document.

Pg 27; 2.5 Mammals. Throughout the INRMP, whitetail deer are referred to as "White-tailed deer", which is incorrect. We recommend updating the spelling for this animal throughout the entire document.

Pg 27; 2.5 Reptiles and Amphibians. We recommend making the changes to the text as suggested in the revised paragraph below.

A variety of reptiles and amphibians is known to inhabit the area. The most common snakes include the northern watersnake (*Nerodia sipedon*), eastern (=black) rat snake (*Elaphe alleganiensis*), black racer (*Coluber constrictor*), and rough green snake (*Opheodrys aestivus*). The copperhead (*Agkistrodon contortix*) is the only species of venomous snake known to occur on the Station, though eastern cottonmouth (*Agkistrodon piscivorus piscivorus*) and state-listed timber (canebrake) rattlesnake [(*Crotalus horridus*) Coastal Plain population] have known populations in York County. Common turtles include the eastern snapping turtle (*Chelydra serpentina serpentina*), northern red-bellied cooter (*Pseudemys rubriventris*), eastern mud turtle (*Kinosternon subrubrum subrubrum*), and eastern box turtle (*Terrapene carolina carolina*). Lizards found on the Station include the ground skink (*Scincella lateralis*) and the five-lined skink (*Pleistiodon (=Eumeces) fasciatus*). Of the amphibians that inhabit the area, frogs and toads comprise the largest group. Common frogs and toads found on the Station include the northern green frog (*Lithobates (=Rana) clamitans melanota*), southern leopard frog (*Lithobates (=Rana) sphenocephala utricularia*), spring peeper (*Pseudacris crucifer*), green treefrog (*Hyla cinerea*), southeastern chorus frog (*Pseudacris feriarum)*, southern toad (*Anaxyrus (=Bufo) terrestris*), and American toad (*Anaxyrus (=Bufo) americanus*). Salamanders include spotted salamander (*Ambystoma maculatum*), marbled salamander (*Ambystoma opacum*), red-spotted newt (*Notophthalmus viridescens*), and the state-listed Mabee's salamander (*Ambystoma mabeei*).

Pg 30; Rare, Threatened and Endangered Species. We recommend rewriting a section in the first paragraph that says "state-recommended-endangered species, the canebrake rattlesnake" to read "state Endangered species, the canebrake rattlesnake".

Pg 39; 3.3 Wetlands/Water Quality Protection. We recommend that at least 100-foot naturally vegetated buffers be maintained on all streams and wetlands on site. We recommend conducting any in-stream activities during low or no-flow conditions, using non-erodible cofferdams to isolate the construction area, blocking no more than 50% of the streamflow at any given time, stockpiling excavated material in a manner that prevents reentry into the stream, restoring original streambed and streambank contours, revegetating barren areas with native vegetation, and implementing strict erosion and sediment control measures. Due to future maintenance costs associated with culverts, and the loss of riparian and aquatic habitat, we prefer stream crossings to be constructed via clear-span bridges. However, if this is not possible, we recommend countersinking any culverts below the streambed at least 6 inches, or the use of bottomless culverts, to allow passage of aquatic organisms. We also recommend the installation of floodplain culverts to carry bankfull discharges.

Pg 82; 3.10 Habitat Conservation. We recommended including language in this section that states that coordination with VDGIF regarding the protection and management of wildlife including threatened or endangered species, exclusive of listed insects, and their habitats is

performed. We also recommend including reference to VDGIF's online wildlife database, the Virginia Fish and Wildlife Information Service (VAFWIS).

Dam Neck Camp Pendleton

Pg 1-10; 1.6 Partnerships. We recommend including in the pertinent paragraph that VDGIF also provides guidance regarding the management and protection of Threatened or Endangered wildlife, exclusive of listed insects.

Pg 2-19; 2.5.2 Mammals. Throughout the INRMP, whitetail deer are referred to as "White-tailed deer", which is incorrect. We recommend updating the spelling for this animal throughout the entire document.

Pg 2-20; 2.6 Rare, Threatened and Endangered Species and Significant Ecological Communities. The bald eagle has been de-listed federally. It continues to be listed state Threatened. We recommend updating the status of this species throughout the document.

Pg 3-2; 3.2 Wetlands and Water Quality Protection. We recommend that at least 100-foot naturally vegetated buffers be maintained on all streams and wetlands on site. We recommend conducting any in-stream activities during low or no-flow conditions, using non-erodible cofferdams to isolate the construction area, blocking no more than 50% of the streamflow at any given time, stockpiling excavated material in a manner that prevents reentry into the stream, restoring original streambed and streambank contours, revegetating barren areas with native vegetation, and implementing strict erosion and sediment control measures. Due to future maintenance costs associated with culverts, and the loss of riparian and aquatic habitat, we prefer stream crossings to be constructed via clear-span bridges. However, if this is not possible, we recommend countersinking any culverts below the streambed at least 6 inches, or the use of bottomless culverts, to allow passage of aquatic organisms. We also recommend the installation of floodplain culverts to carry bankfull discharges.

Pg 3.36; 3.12.1 Nuisance Wildlife. It is unlawful to trap and relocate wildlife. Any species defined as a nuisance species may lawfully be killed at any time of year. We recommend clarification in this section.

Pg 3-37; Miscellaneous Vertebrates. We recommend clarification on this section. As stated above, the relocation of wildlife is unlawful.

Pg 3-38; 3.12.3 Invasive Species. We recommend adding red-eared slider (*Trachemys scripta elegans*) to the current list of invasive species. We further recommend that a removal plan for this species be developed and reviewed by VDGIF.

Thank you for the opportunity to comment on the INRMPs. We are willing to assist the Navy, when possible, in implementing the actions identified in this plan. Please contact our Region 1 Wildlife, Fisheries, and Wildlife Diversity biologists at 804-829-6580 if we can be of further assistance in this regard. Please contact Amy Ewing at 804-367-2211 with any questions regarding this environmental review.

Sincerely,

Amy Ewing

OFFICIAL WILDLIFE KILL PERMIT

Virginia Department of Game and Inland Fisheries
Ver.2019.3

CASE # GFK20010514

Damage Control Assistance Program (DCAP) Tags Requested: Kill Permit Only
(Authorized in counties with no full antlerless deer season)

To Whom It May Concern
Permission is hereby grant to:

AUSTIN, TAYLOR SCOTT	**taylor.s.austin@navy.mil**
Name (landowner, lessee or airport)	E-Mail

1321 NORTHWEST BLVD	**CHESAPEAKE**	**VA**	**23322**
Address	City	State	Zip

Telephone number(s)

and those persons named below: (State law prohibits persons convicted of wildlife violations from being designated as a shooter or carrying out the authorized activity for the landowner/lessee).

CO authorized kill permit team and/or Navy personnel identified by installation NRM.

To Kill:	**25** (Quantity)	Species: **DEER**	**5** (Quantity)	Species: **BEAR**	**0** (Quantity)	Species: **ELK**
Additional Species:	**Squirrel Rabbit**		*Airport Species:*	**Turkey; Oppussum; Hog; Bobcat; Beaver; Bear; Muskrat; Coyote; and Nutria.**		

damaging the property of **US Navy** in **550 - Chesapeake City** (County or City)

for the period from **1/1/2020** to **12/31/2020**

Time Restrictions: **None**

Damage control is limited to the location described below or on the attachment. No one except those listed on this permit may assist or be present during the damage control activities. Additionally, the landowner/lessee acknowledges that all damage control operations will comply with local firearm ordinances. This permit authorizes the killing of wild animals pursuant to Section 29.1-516, and 29.1-529 of the Code of Virginia. Unless otherwise authorized on this permit, deer killed on this permit must be antlerless. Permit must be carried and available for inspection during damage control activities.

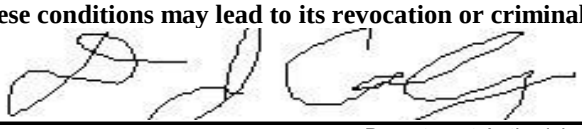
Has the landowner/leasee been issued a kill permit previously on the requested parcel(s) of land? **Yes**

Has the parcel been hunted in the previous hunting season for deer or bear? **Yes**

How does the landowner/lessee plan to dispose of the carcass(es) - *Required within 24 hours after killing a deer or bear*

How Disposed:	**Burial** **Charitable Organization** **Personal Use**	*Describe if Other:*	

Upon request and receipt the landowner/lessee agrees to the conditions of this permit and understands that failure to comply with these conditions may lead to its revocation or criminal prosecution.



Department Authorizing Agent

2. Total acres in property/parcel:	**3400**	US Navy base Northwest Annex, Chesapeake, Va.
3, Total acres of crop/orchard:	**750**	
4. Total number of animals killed under this permit:	**0**	May kill or trap as required. Approved for deer, bear, turkey, squirrel, rabbit, fox, coyote, bobcat, beaver, muskrat, nutria, opossum, hog as needed.
5. Total number of Deer under this permit *(complete applicable):*		
Antlered Bucks: 0 / **Button Bucks: 0** / **Does: 0**		
6. Total number of Bear under this permit:	**0**	
7. Total number of Elk under this permit:	**0**	
List Damage Type and Any Additional Comments		
Disease, Contamination, Predation. May kill or trap as required. Approved for deer, bear, turkey, squirrel, rabbit, fox, coyote, bobcat, beaver, muskrat, nutria, opossum, hog as needed.		

§ 29.1-529. Killing of deer, elk or bear damaging fruit trees, crops, livestock, or personal property; wildlife creating a hazard to aircraft or motor vehicles.

A. Whenever deer, elk or bear are damaging fruit trees, crops, livestock or personal property utilized for commercial agricultural production in the Commonwealth, the owner or lessee of the lands on which such damage is done shall immediately report the damage to the Director or his designee for investigation. If after investigation the Director or his designee finds that deer or bear are responsible for the damage, he shall authorize in writing the owner, lessee or any other person designated by the Director or his designee to kill such deer or bear when they are found upon the land upon which the damages occurred. However, the Director or his designee shall have the option of authorizing nonlethal control measures rather than authorizing the killing of elk or bear, provided that such measures occur within a reasonable period of time; and whenever deer cause damage on parcels of land of five acres or less, except when such acreage is used for commercial agricultural production, the Director or his designee shall have discretion as to whether to issue a written authorization to kill the deer. The Director or his designee may limit such authorization by specifying in writing the number of animals to be killed and duration for which the authorization is effective and may in proximity to residential areas and under other appropriate circumstances limit or prohibit the authorization between 11:00 p.m. and one-half hour before sunrise of the following day. The Director or his designees issuing these authorizations shall specify in writing that only antlerless deer shall be killed, unless the Director or his designee determines that there is clear and convincing evidence that the damage was done by deer with antlers. Any owner or lessee of land who has been issued a written authorization shall not be issued an authorization in subsequent years unless he can demonstrate to the satisfaction of the Director or his designee that during the period following the prior authorization, the owner or his designee has hunted bear or deer on the land for which he received a previous authorization.

B. Subject to the provisions of subsection A, the Director or his designee may issue a written authorization to kill deer causing damage to residential plants, whether ornamental, noncommercial agricultural, or other types of residential plants. The Director may charge a fee not to exceed actual costs. The holder of this written authorization shall be subject to local ordinances, including those regulating the discharge of firearms.

C. Whenever wildlife is creating a hazard to the operation of any aircraft or to the facilities connected with the operation of aircraft, the person or persons responsible for the safe operation of the aircraft or facilities shall report such fact to the Director or his designee for investigation. If after investigation the Director or his designee finds that wildlife is creating a hazard, he shall authorize such person or persons or their representatives to kill wildlife when the wildlife is found to be creating such a hazard. As used in this subsection, the term "wildlife" shall not include any federally protected species.

D. Whenever deer are creating a hazard to the operation of motor vehicle traffic within the corporate limits of any city or town, the operator of a motor vehicle or chief law-enforcement officer of the city or town may report such fact to the Director or his designee for investigation. If after investigation the Director or his designee finds that deer are creating a hazard within such city or town, he may authorize responsible persons, or their representatives, to kill the deer when they are found to be creating such a hazard.

E. Whenever deer are damaging property in a locality in which deer herd population reduction has been recommended in the current Deer Management Plan adopted by the Board, the owner or lessee of the lands on which such damage is being done may report such damage to the Director or his designee for investigation. If after investigation the Director or his designee finds that deer are responsible for the damage, he may authorize in writing the owner, lessee or any other person designated by the Director or his designee to kill such deer when they are found upon the land upon which the damages occurred. The Director or his designee also may limit such authorization by specifying in writing the number of animals to be killed and the period of time for which the authorization is effective. The requirement in subsection A of this section, that an owner or lessee of land demonstrate that during the period following the prior authorization deer or bear have been hunted on his land, shall not apply to any locality that conducts a deer population control program authorized by the Department.

F. The Director or his designee may revoke or refuse to reissue any authorization granted under this section when it has been shown by a preponderance of the evidence that an abuse of the authorization has occurred. Such evidence may include a complaint filed by any person with the Department alleging that an abuse of the written authorization has occurred. Any person aggrieved by the issuance, denial or revocation of a written authorization can appeal the decision to the Department of Game and Inland Fisheries. Any person convicted of violating any provision of the hunting and trapping laws and regulations shall be entitled to receive written authorization to kill deer or bear. However, such person shall not (i) be designated as a shooter nor (ii) carry out the authorized activity for a person who has received such written authorization for a period of at least two years and up to five years following his most recent conviction for violating any provision of the hunting and trapping laws and regulations. In determining the appropriate length of this restriction, the Director shall take into account the nature and severity of the most recent violation and of any past violations of the hunting and trapping laws and regulations by the applicant. No person shall be designated as a shooter under this section during a period when such person's hunting license or privileges to hunt have been suspended or revoked.

G. The Director or his designee may authorize, subject to the provisions of this section, the killing of deer over bait within the political boundaries of any city or town, or any county with a special late antlerless season, in the Commonwealth when requested by a certified letter from the governing body of such locality.

H. The parts of any deer or bear killed pursuant to this section or wildlife killed pursuant to subsection C shall not be used for the purposes of taxidermy, mounts, or any public display unless authorized by the Director or his designee. However, the meat of any such animal may be used for human consumption. The carcass and any unused meat of any such animal shall be disposed of within 24 hours of being killed. Any person who violates any provision of this subsection is guilty of a Class 3 misdemeanor.

I. It is unlawful to willfully and intentionally impede any person who is engaged in the lawful killing of a bear or deer pursuant to written authorization issued under this section. Any person convicted of a violation of this subsection is guilty of a Class 3 misdemeanor.

Kill Permit Reporting Guidelines

Ver. 2019.4

Virginia Kill Permit Recipients:

This letter is in reference to the required reporting of wildlife killed under your permit. Failure to report your required kill information may result in the denial of future or subsequent kill permits under §29.1-529 (F).

Within 30 days of the expiration of your permit, please report the following information:

GENERAL INFORMATION	
Case Number on permit	
Landowner/Lessee/Airport listed on permit	
Reporter's Name	
Reporter's Phone	
Reporter's Email	

HARVEST INFORMATION	TOTAL NUMBER
Total number of animals killed	
Elk	
Bears	
Antlered Bucks	
Button Bucks	
Does	

Reporting Options:

- Visit https://www.dgif.virginia.gov/killpermit and submit information using the form on website

OR

- Direct mail this page with the tables above completed to:

Virginia Department of Game and Inland Fisheries
1132 Thomas Jefferson Rd
Forest, VA 24551
Attention: Deer Management Program

We appreciate your cooperation in this matter and look forward to continuing to serve you.

SEP 2 2 2017

COMNAVREG MIDLANT INSTRUCTION 11011.12B

From: Commander, Navy Region Mid-Atlantic

Subj: OBTAINING WORK PERMITS

Ref: (a) OPNAVINST 11010.20H CH-1
(b) SECNAV M-5210.1 of Jan 2012
(c) OPNAVINST 5215.17A

Encl: (1) Work Permit

1. Purpose

a. Provide guidance for the preparation and processing of work permits for all new construction, repair, maintenance, and alteration of Commander, Navy Region Mid-Atlantic (COMNAVREG MIDLANT) controlled Class I or II property not administered by Naval Facilities Engineering Command, Mid-Atlantic (NAVFAC MIDLANT). This process will help ensure that all project work will be completed in compliance with applicable laws and regulations, within a reasonable time period and cost, and at the level of quality commensurate with the requirement and NAVFAC criteria.

b. Alteration, demolition, construction, installation, maintenance, and repair or replacement to base structures and grounds requires a system to ensure that all concerned parties understand and approve changes per applicable laws, regulations, and standard building practices prior to beginning work. A work permit procedure will minimize the need for costly deficiency correction resulting from non-approved alterations, demolition, construction, installations, repairs, maintenance, or replacements.

c. The following procedures apply to activities constructing new facilities or changing an existing facility footprint on COMNAVREG MIDLANT held Class I property or performing any work on COMNAVREG MIDLANT held Class II property that disturbs the real property asset or its components, including alteration, demolition, construction, installation, maintenance, repair or replacement of any part of the building. Examples include, but are not limited to, the following: door alterations; modifications to building structures and grounds; moving/penetrating walls; altering fire/emergency systems; new additions to buildings; electrical installations; hard-wired equipment installations/modifications; plumbing modifications/installations; installations of items on roofs; painting; carpeting removal/installation; furniture electrical connections; and moving electrical equipment. All non-NAVFAC activities initiating such work shall first obtain a work permit prior to work execution.

d. Definitions: Reference (a) defines the following terms:

(1) Class I Property. Land.

(2) Class II Property. Real property improvements to land such as buildings, structures, ground improvement structures, and utilities.

(3) Alteration. Work and materials required to adjust interior arrangements or other physical characteristics of an existing real property facility so it may be more effectively adapted to, or utilized for its designated purpose.

(4) Construction. Work and materials used to build a new facility or alter an existing facility.

(5) Installation. Work and materials to support incorporation of personal property in an other-than-new real property facility.

(6) Repair. Work and material used to renew or replace deteriorated components of a facility for continued utilization in existing designated purpose.

(7) Maintenance. Work and material used to maintain components of a facility for continued utilization in existing designated purpose.

(8) Substantial Work. Any work that increases the dimension of a facility or feature, adds or removes permanent interior or exterior walls, adds or removes electrical or plumbing fixtures, ties into existing utilities, removes shrubbery or trees, adds windows or interior/exterior access doors, creates additional emissions or waste/storm water, or requires excavation.

2. Cancellation. COMNAVREGMIDLANTINST 11011.12A.

3. Action

a. Requesting activity shall:

(1) Notify the installation Public Works Officer (PWO) that work is being planned that falls under the scope of this instruction. Typically, notification will occur via Maximo service request to be reviewed at a subsequent work induction board.

(2) Obtain concurrence from any additional approval authorities deemed necessary by the PWO. Construction documents that have been prepared by a Professional Engineer (PE) or Registered Architect (RA) may be required at the discretion of the PWO.

(3) Provide funding for all labor required to review the work permit requests (e.g. planning, design, etc.) as well as construction oversight.

(4) Display the work permit at the site, and for complying with all requirements and stipulations as set forth by the reviewers. Failure to comply with the work permitting process will require reimbursement for work or services to correct hazardous or unsafe conditions, improper installations, building system adjustment or corrections, and/or removal of improvement.

(5) Fund the project in its entirety, including unforeseen change orders that are discovered during the design or construction phases. For substantial renovation or repair, activity shall provide funds to NAVFAC for construction oversight.

(6) Provide as applicable: as-built drawings, DD1354, product certifications, environmental impact documentation, updated panel schedules, lists of equipment and warranted items, Operation and Maintenance Support Information (OMSI) manuals, maintenance requirements, and Maximo Computerized Maintenance Management System (CMMS) information to the designated Public Works Department (PWD) approval authority. As-built drawings shall be provided in Autocad native format and PDF format.

b. Work Permit Approval Authorities shall:

(1) Upon receipt of the plans and specifications of the project, review and determine if the proposed project can be accomplished safely, per applicable codes, and does not unduly impact other activities or facilities.

(2) Provide approval by signature on enclosure (1), or list the specific reason(s) for disapproval, making comments and alternative suggestions for acceptable solutions. If funded, provide quality assurance during the construction process to confirm that completed work complies with agreed upon requirements and stipulations.

4. Records Management. Records created as a result of this directive, regardless of media and format, shall be managed per SECNAV Manual 5210.1 of January 2012.

5. Review and Effective Date. Per OPNAVINST 5215.17A, CNRMA will review this instruction annually on the anniversary of its effective date to ensure applicability, currency, and consistency with Federal, DoD, SECNAV, and Navy policy and statutory authority using OPNAV 5215/40 review of instruction. This instruction will automatically expire 5 years after effective date unless reissued or canceled prior to the 5-year anniversary date, or an extension has been granted.

DEC 8 2005

Ms. Ellie Irons
Department of Environmental Quality
Office of Environmental Impact Review
629 East Main Street, Room 631
Richmond, VA 23219

Dear Ms. Irons:

SUBJECT: FEDERAL COASTAL CONSISTENCY DETERMINATION FOR TIMBER HARVESTING AT NAVBAL SUPPORT ACTIVITY (NAVSUPPACT) NORFOLK, NORTHWEST ANNEX

NAVSUPPACT Norfolk, Northwest Annex proposes to harvest timber on approximately 293 acres to support the mission of the Relocatable Over-The-Horizon Radar (ROTHR) facility.

Enclosed is the Federal Coastal Consistency Determination (CCD) for the proposed Timber Harvest at NAVSUPPACT Norfolk, Northwest Annex, Chesapeake, Virginia. This Federal CCD is being submitted in accordance with Section 307(c)(1) of the Federal Coastal Zone Management Act of 1972 as amended.

The Department of the Navy has determined that the proposed action is not reasonably likely to affect a land use, water use, or natural resource of the Commonwealth of Virginia's coastal zone and is therefore consistent, to the maximum extent practicable, with the federally approved enforceable policies of the Virginia Coastal Resource Management Program.

The attached Federal CCD addresses the enforceable policies of the Commonwealth of Virginia's Coastal Resource Management Program. Other issues such as historic/cultural resources, natural resources, wildlife, etc. are addressed in an Environmental Assessment that will be forwarded to your office for review once it is completed.

To aid in your review, an electronic copy of the CCD is included. Our point of contact is Mr. Charles Wilson at (757) 462-8564, extension 389, or E-Mail charles.h.wilson1@navy.mil.

Sincerely,

Cheryl F. Barnett

CHERRYL F. BARNETT
Environmental Director
By direction of the Commander

Enclosure

FEDERAL COASTAL CONSISTENCY DETERMINATION
PROPOSED TIMBER HARVEST
NAVAL SUPPORT ACTIVITY, NORFOLK, NORTHWEST ANNEX

November 23, 2005

Proposed Federal Agency Action

The Navy proposes to harvest approximately 293 acres (118 hectares) of timber in the vicinity of the Relocatable Over-the-Horizon Radar (ROTHR) receiver located at Naval Support Activity (NAVSUPPACT) Norfolk, Northwest Annex. Enclosure (1), figures 1, 2, and 3 indicate the timber harvest site. The purpose of the proposed timber harvest is to restore the operational efficiency of the ROTHR. Trees and other vegetation in three locations within the ROTHR receiver antenna clearance angle zone are currently impeding the antenna's operational capability.

The ROTHR receiver antenna array requires a specific vertical clearance angle to the horizon to operate properly. Any obstruction within this line-of-sight to the horizon will impair the capability of the antenna to receive the high frequency energy radiated by the transmitter site and reflected by the targets, thus adversely impacting the ability of the system to function as designed. At the ROTHR receiver site, trees and other vegetation have increased in height since construction of the antenna and are now within the clearance angle zone. This is drastically impairing the operation of the system.

An Environmental Assessment (EA) is being prepared for this project. This Coastal Consistency Determination (CCD) will be included as an Appendix to the EA. The two viable alternatives addressed in the EA are to harvest the timber and allow it to regenerate naturally and by planting; or to harvest the timber and manage the land for multiple purposes emphasizing both wildlife and forestry objectives such as shrub/scrub vegetation, emergent wetlands, grasslands, and pine and hardwood forests.

Under the preferred alternative, the 293 acres of timber will be sold to the highest bidder and harvested using standard coastal plain logging equipment and methods. This alternative would require an approximate 6-month completion schedule.

Background

The Coastal Zone Management Act (CZMA), enacted in 1972, created the National Coastal Management Program for management and

control of the uses of and impacts on coastal zone resources. The program is implemented through federally approved state coastal management programs (CMPs).

Federal approval of a state CMP triggers the CZMA Section 307 federal consistency determination requirement. Section 307 mandates that federal actions within a state's coastal zone (or outside the coastal zone, if the action affects land or water uses or natural resources within the coastal zone) be consistent to the maximum extent practicable with the enforceable policies of the state CMP. Federal agency actions include direct and indirect federal agency activities, federally approval activities, and federal financial assistance activities. Accordingly, federal agency activities (direct, indirect, or cumulative) reasonably affecting the state's coastal zone must be fully consistent with the enforceable policies of the state's CMP, unless compliance is otherwise prohibited by law. There are no categorical exemptions or exclusions to or from the Section 307 federal consistency requirement.

The Commonwealth of Virginia has developed and implemented a federally approved Coastal Resources Management Program (CRMP). The nine enforceable policies of the Virginia CRMP address: fisheries; subaqueous lands; wetlands; primary sand dunes; point and non-point source pollution; shoreline sanitation; air pollution; and coastal lands management.

Program and Policy Analysis

Fisheries Management: The proposed timber harvest will not affect fish stocks, breeding, or spawning areas. The surface drainage in the proposed impact area flows into Mill Stream and an unnamed tributary of the Northwest River, both of which are channelized streams that have been straightened and deepened to expedite drainage. Implementation of the action will include the use of Forestry Best Management Practices (BMPs) for Water Quality in Virginia, a set of state-approved practices and methods designed to minimize the impacts of timber harvesting and other forest management activities on soil and water resources. Such practices would include minimizing the use of mechanized harvesting equipment near any drainage ditch or stream area and constructing temporary culverts or bridges at any stream or ditch crossing.

Subaqueous Lands Management: The proposed action will have no effect on subaqueous lands. There are no state-owned bottomlands within or adjacent to the proposed project

Wetlands Management: Timber harvesting will occur in three zones, as shown in Enclosure (1), figure 3. Of the three zones; Zone 1 contains no wetlands; Zone 2 contains palustrine forested, palustrine unconsolidated bottom, and palustrine scrub-shrub wetlands; and Zone 3 contains palustrine forested and palustrine unconsolidated bottom wetlands. A silvicultural exemption to Section 404 of the Clean Water Act allows normal and established silvicultural activities in wetlands as long as state BMPs are implemented. Virginia BMPs will be implemented during all timber harvesting associated with this project. Use of BMPs will minimize impacts to wetland areas during timber harvesting operations.

Dunes Management: The proposed action will not affect primary coastal sand dunes, as no such dunes exist on NAVSUPPACT Norfolk, Northwest Annex.

Point Source Pollution Control: The proposed action will not involve point source discharge of pollutants, and does not require a Virginia Pollutant Discharge Elimination System (VPDES) permit.

Non-Point Source Control: The proposed action will not involve dredging or filling of Virginia's navigable waters. Measures to minimize erosion and sedimentation during harvest operations will include BMPs such as avoiding harvesting equipment operation during times of high soil moisture, such as after significant rain events, and using non-mechanized harvest methods such as cabling-out of logs around water surfaces. Under the proposed alternatives discussed in the project EA, replacement of timber removed would occur through natural regeneration and manual planting of softwood and hardwood trees, or with natural regeneration and manual planting of both trees and alternative plant communities (such as shrub/scrub vegetation, herbaceous vegetation, and grasslands) targeted for specific wildlife species. Reestablishment of vegetation is expected to occur rapidly, and progress will be continuously evaluated. Due to the generally flat topography within the harvest area and the use of BMPs, minimal non-point source water pollution should occur.

Shoreline Sanitation Management: The proposed action will involve neither the demolition nor installation of septic tanks.

Air Pollution Control: The proposed action will result in standard emissions related to trucks and mechanized timber harvesting equipment that will be *de minimis*.

Coastal Lands Management: The proposed action will not adversely affect coastal lands subject to the Chesapeake Bay Preservation Act. The entire project lies within the Chowan River-Dismal Swamp watershed.

Conclusion

After careful consideration of the administrative record, we have determined that the proposed action will have minimal effect on a land use, water use, or natural resource of the Commonwealth of Virginia's coastal zone. The Navy's proposed action would be conducted in a manner that would be fully consistent or "consistent to the maximum extent practicable" with the applicable enforceable policies of the Coastal Resources Management Program. The project will not require permits under Section 10 of the River and Harbors Act, or Sections 401 and 404 of the Clean Water Act, and Commonwealth of Virginia law.

Subj: NAVAL SUPPORT ACTIVITY HAMPTON ROADS ENVIRONMENTAL POLICY

1. Naval Support Activity, Hampton Roads is committed to environmental compliance with Local, State and Federal environmental laws, regulations, and policies. We acknowledge that environmental stewardship is essential to the safe, healthful, and compliant execution of our mission and the preservation and protection of our land, air, and water.

2. We are committed to preventing pollution at its source whenever possible. To achieve our goals, we have adopted the following guidelines for our environmental management system:

a. Integrate sound practices into our operational decisions that could impact the environment.

b. Continually improve our environmental performance through the use of effective management and planning.

c. Ensure implementation of pollution prevention measures and waste minimization programs.

d. Develop attainable objectives and targets and implement sustainable practices to reduce environmental impacts.

e. Conduct regular Environmental Management System Audits to continually assess our progress toward our environmental goals.

f. Educate our personnel, tenants and contractors on their responsibilities to the environment.

g. Foster communication throughout Naval Support Activity, Hampton Roads on environmental commitments and performance.

h. Sustain our partnerships with Local, State, and Federal regulatory agencies and maintain continuous environmental compliance with existing and new regulations and guidelines.

Ref: (a) COMNAVREGMIDLANTINST 11015.2
(b) OPNAVINST 5530.14E
(c) OPNAVINST 3591.1F

1. Per references (a) through (c), authorization is granted for Mr. Lawrence McGrogan (GS-9), Mr. Mark Edwards (GS-9), Mr. Wilbur Carawan (GS-12), and Ms. Michael Wright (GS-12) to carry firearms (specifically .22 caliber rifles, .177 and .22 caliber air rifles, 12-gauge shotguns, and 15mm launchers) onboard Naval Support Activity (NAVSUPPACT), Hampton Roads installations to include NAVSUPPACT Hampton Roads, Northwest Annex, and NAVSUPPACT Hampton Roads, Portsmouth Annex in performance of official duties. Additional approval is granted to Mr. Lawrence McGrogan (GS-9) to carry a 9mm pistol. This approval is subject to the following conditions:

a. Use of firearms is restricted to disposal of wounded, nuisance and/or diseased wildlife, or control of invasive species.

b. Personnel listed will be in radio or phone contact with Security Dispatch at all times when performing disposal or control procedures and keep Security Dispatch aware of their location.

c. Weapons will not be used for law enforcement purposes.

d. Per reference (b), all weapons will be government-owned. The use of privately-owned weapons is prohibited, unless additional authorizations/exceptions are obtained. The only ammunition authorized will be government-owned, officially procured and issued for use in the specific weapon carried, unless additional authorizations/exceptions are obtained.

e. Personnel listed will receive documented training in the use of these firearms. Training will be equivalent, or similar to the training and qualification program outlined in reference (c). Specifically, for the 12-gauge shotgun, the course of fire outlined in reference (c) shall be utilized. Additionally, personnel listed

shall be familiar with safety precautions for weapons handling that are detailed in reference (c).

f. Weapons and ammunition will be properly stored, secured and checked at the NAS Oceana, Natural Resources Center, and Building 78.

g. Personnel listed will keep tenant commands informed of disposal or control procedures conducted in restricted areas.

2. Point of contact is Ms. Michael Wright, Natural Resources Team Leader who may be reached at (757) 433-3461, or email: michael.f.wright@navy.mil

DEPARTMENT OF THE NAVY

FINDING OF NO SIGNIFICANT IMPACT FOR ENVIRONMENTAL ASSESSMENT FOR THE IMPLEMENTATION OF AN INTEGRATED NATURAL RESOURCES MANAGEMENT PLAN (INRMP) FOR NAVAL SUPPORT ACTIVITY, NORFOLK, NORTHWEST ANNEX, CHESAPEAKE, VIRGINIA AND CURRITUCK COUNTY, NORTH CAROLINA

Pursuant to the Council on Environmental Quality regulations (40 Code of Federal Regulations § 1500-1508) implementing procedural provisions of the National Environmental Policy Act (NEPA), the Department of the Navy, gives notice that an Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) have been prepared for the development and implementation of an Integrated Natural Resources Management Plan (INRMP) for Naval Support Activity, Norfolk, Northwest Annex, Chesapeake, Virginia and Currituck County, North Carolina and an Environmental Impact Statement (EIS) is not being prepared.

Proposed Action:
The proposed action (Alternative 2) is to develop and implement an INRMP consistent with the military use of the property and the goals and objectives established in the Sikes Act Improvement Act (SAIA). The goal of the INRMP is to implement an ecosystem based natural resources program that provides for conservation of natural resources in a manner that is consistent with the military mission; integrates and coordinates all natural resources management activities; provides for sustainable multipurpose uses of natural resources; and provides for public access for use of natural resources subject to safety and military security considerations. The proposed INRMP would address and implement land management, forest management, fish and wildlife management, outdoor recreation, cultural resources protection, conservation education, and natural resources program administration. A total of 47 ongoing and new management actions and projects are proposed to meet compliance and stewardship objectives for natural resources management at the installations.

Existing Conditions:
Naval Support Activity, Northwest (NSA-NW) lies along the southeastern border of Virginia and the northeastern border of North Carolina. The area surrounding NSA-NW is largely undeveloped and is comprised of agricultural land and forested wetlands. NSA-NW is located within the historic boundaries of

the Great Dismal Swamp; however, much of the Great Dismal Swamp was ditched and drained for agriculture and timber production. Impacts to relevant resources that were evaluated for each alternative included land use, soil resources, wetlands and water quality, coastal zone resources, vegetation, wildlife, threatened and endangered species, cultural resources, air quality, environmental justice and socioeconomics.

Alternatives Analyzed:
The no action alternative (Alternative1) is the continued implementation of the management objectives and practices specified in the natural resources plans for NAVSUPPAXT Norfolk, Northwest Annex (U.S. Navy 1998). The existing management plans provide valuable information on natural resources management; however, the plans do not set time frames for implementation of or provide cost estimates for natural resources projects. Also, many of the project management recommendations provided in the current natural resources plans have been completed, and new projects described in the proposed INRMP would not be implemented under this alternative. In addition, no EA was completed for development of the existing plans, nor were they provided for public review. Consequently, the existing plans do not meet the SAIA requirements for an INRMP. The no action alternative is carried forward as a baseline for comparison to the other alternatives as required by CEQ regulations.

Environmental Effects:
This EA demonstrated that implementation of the proposed action would result in no impact, positive impacts, or minimal negative impacts to environmental resources. The greatest potential negative impact would be from annual prescribed burning, which has the potential to increase air emissions. However, benefits from prescribed burning, including reducing the risk of catastrophic wildfire and managing early successional habitat, which is important to a number of wildlife species on the bases, would also be provided. Additionally, impacts to air quality would be minimized through the use of proper smoke management procedures and optimizing the burning schedule. Because Northwest Annex is in a marginal nonattainment area for ozone, an applicability analysis is required under the General Conformity Rule of the CAA. The applicability analysis provided in the EA demonstrates under both alternatives emissions from prescribed burning would be well below *de minimis* levels for annual criteria pollutant emissions.

FINDING OF NO SIGNIFICANT IMPACT FOR ENVIRONMENTAL ASSESSMENT FOR THE IMPLEMENTATION OF AN INTEGRATED NATURAL RESOURCES MANAGEMENT PLAN (INRMP) FOR NAVAL SUPPORT ACTIVITY NORFOLK NORTHWEST ANNEX, CHESAPEAKE VIRGINIA AND CURRITUCK COUNTY, NORTH CAROLINA

Findings:

Based on information gathered during preparation of the EA, the Department of the Navy finds that implementing the proposed action will not significantly impact the quality of the environment. The EA and FONSI addressing this action may be obtained by interested parties by contacting Commander, Atlantic Division, Naval Facilities Engineering Command, 1510 Gilbert Street, Norfolk, Virginia 23511-2699 (Attn: Mr. Chris Petersen), telephone (757) 322-4560. A limited number of copies of the EA are available to fill single copy requests.

Enclosure 2. List of Operations Management Units

This page intentionally left blank.

Summary of the Operations Management Unit Actions

- Update Installation-wide jurisdictional determinations every five years, or as required by USACE regulatory requirements, and continue to obtain individual determinations for any proposed action with potential to disturb wetlands.
- Coordinate with the appropriate regional Environmental Checklist Coordinator and NRMs to assist project proponents in submitting preconstruction notifications and joint permit applications, and in obtaining all necessary wetlands permits, or other appropriate NR related permits when required.
- Review all plans where tree removal is proposed to ensure compliance with this INRMP and associated instructions. Develop recommendations for tree protection measures or mitigation for lost trees, or assist with the selection of alternate sites.
- Review new and revised landscaping plans and species lists to ensure conformance with EO 13148, EO 13112, and Navy policy on beneficial landscaping.
- Promote the use of beneficial landscaping practices and the importance of using native species, including plants that will attract pollinators.
- Coordinate with MWR personnel on natural resources issues such as tree care, erosion control, reducing nonpoint pollution at recreational facilities on an as-needed basis, wildlife protection, and human/wildlife conflict avoidance.
- Participate in National Arbor Day Foundation's Tree City USA program. Submit a recertification application, forest work plan, and proclamation in support of Arbor Day to the VDOF by 31 December each year.
- Oversee agricultural and ditch maintenance practices to ensure adequate vegetative cover and 3-ft (1-m) buffers are maintained.
- Coordinate with NAVFAC Mid-Atlantic environmental staff on enforcement of conservation measures on agricultural outlease parcels.
- Continued distribution of the Installation snake identification pamphlet to educate residents and employees about the presence of venomous snakes, and the creation of a pamphlet that identifies protection measures for timber (canebrake) rattlesnake Coastal Plain population and other snake species.
- Continue providing educational materials on black bears, poisonous plants, zoonotic diseases, and other NR-related topics to ensure the safety of Installation personnel and recreational users.
- Remove or assist with the removal of miscellaneous nuisance wildlife and invasive species in the Core Management Unit in accordance with this INRMP's identified plans, including implementation of management strategies developed upon results of the nutria and coyote surveys and the nuisance wildlife management plan that is currently being prepared for the Installation.
- Complete the Environmental Checklist (see Appendix X), as needed, for those natural resources management actions that may affect a regulated or other Navy managed

environmental resource. Conduct associated consultations and required mitigations, and acquire associated permits in coordination with the appropriate Navy environmental media manager.

- Maintain nest boxes for birds and bats.
- Consider implementing ditch modifications designed to slow runoff, trap sediment, and reduce erosion in major ditches that drain into Mill Stream.
- Conduct prescribed burns in accordance with the Installation's most current Prescribed Burn and Smoke Management Plan to reduce vegetation and support military operations.
- Update the Installation's Prescribed Burn and Smoke Management Plan annually to reflect accomplishments and goals for each year.
- Maintain the firebreaks and fire lines for each burn unit as needed.
- Treat no more than one-third of the early successional habitat acreage in the Operations Management Unit annually to maintain continuous early successional habitat. Avoid conducting prescribed burning and mowing treatments from mid-April through late July, to avoid impacting bird nesting success and timber (canebrake) rattlesnake Coastal Plain population activity.
- Consider establishing hedgerows by eliminating mowing between select agricultural fields to improve wildlife habitat by increasing cover and roosting habitat.
- Implement invasive plant species management based on the results of the recently completed invasive species inventory survey for NSAHR NWA, using the following two methodologies for control of invasive plant species: early detection and rapid response for new populations that have a high probability for eradication; and a phased removal approach of other species that are more widespread and where removal in a single targeted effort is not feasible (Navy 2018).
- Implement management strategies developed upon results of the nutria and coyote surveys and the nuisance wildlife management plan that is currently being prepared for the Installation.
- Control pine, sweetgum, and other competing species around planted Atlantic white cedar stands.

PRELIMINARY JURISDICTIONAL DETERMINATION

Eastern Virginia Regulatory Section
NAO-2018-1479 (Northwest River)

LCDR John Pergerson, Public Works Officer, NSA Hampton Roads
c/o: Taylor Austin, Natural Resources Manager
1321 Northwest Blvd.
Chesapeake, Virginia 23322

Dear LCDR Pergerson:

This letter is in regard to your request for a preliminary jurisdictional determination for waters of the U.S. (including wetlands) on property known as the Naval Support Activity (NSA), Northwest Annex, located on a 3,661 acre parcel on Ballahack Road, in Chesapeake, Virginia. For that part of NSA Northwest Annex located in North Carolina, a separate jurisdictional determination was done by the Corps of Engineers Wilmington District.

The map entitled "Aquatic Resources Map for NSA Northwest Wetland Delineation, Chesapeake County, VA and Currituck County, NC", prepared by Tetra Tech dated August 2012 and Corps date stamped as received on August 22, 2012 (*copy enclosed)* provides the location(s) of waters and/or wetlands on the property listed above. The basis for this delineation includes application of the Corps' 1987 Wetland Delineation Manual, the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region*, the positive indicators of wetland hydrology, hydric soils, hydrophytic vegetation, and the presence of an ordinary high water mark. This letter is not confirming the Cowardin classifications of these aquatic resources.

Discharges of dredged or fill material, including those associated with mechanized landclearing, into waters and/or wetlands on this site may require a Department of the Army permit and authorization by state and local authorities including a Virginia Water Protection Permit from the Virginia Department of Environmental Quality (DEQ), a permit from the Virginia Marine Resources Commission (VMRC) and/or a permit from your local wetlands board. This letter is a confirmation of the Corps preliminary jurisdiction for the waters and/or wetlands on the subject property and does not authorize any work in these areas. Please obtain all required permits before starting work in the delineated waters/wetland areas.

This is a preliminary jurisdictional determination and is therefore not a legally binding determination regarding whether Corps jurisdiction applies to the waters or wetlands in question. Accordingly, you may either consent to jurisdiction as set out in this

preliminary jurisdictional determination and the attachments hereto if you agree with the determination, or you may request and obtain an approved jurisdictional determination. This preliminary jurisdictional determination and associated wetland delineation map may be submitted with a permit application.

Enclosed is a copy of the “Preliminary Jurisdictional Determination Form”. Please review the document, sign, and return one copy to me either via email (brian.c.denson@usace.army.mil) or via standard mail to US Army Corps of Engineers, Regulatory Office, and ATTN: Brian Denson, 803 Front Street Norfolk, Virginia 23510 within 30 days of receipt and keep one for your records. This delineation of waters and/or wetlands can be relied upon for no more than five years from the date of this letter. New information may warrant revision.

If you have any questions, please contact me, either via telephone at (757) 201-7792 or via email at brian.c.denson@usace.army.mil.

Sincerely,

Brian Denson
Project Manager
Eastern Virginia Regulatory Section

PRELIMINARY JURISDICTIONAL DETERMINATION FORM

BACKGROUND INFORMATION:

A. REPORT COMPLETION DATE FOR PRELIMINARY JURISDICTIONAL DETERMINATION (JD):
Thursday, November 29, 2018

B. NAME AND ADDRESS OF PERSON REQUESTING PRELIMINARY JD:
Requestor Name: LCDR John Pergerson, Public Works Officer, NSA Hampton Roads
Point of Contact: Taylor Austin, Natural Resources Manager
Mailing Address: 1321 Northwest Blvd.
City: State: Zip: Chesapeake, Virginia 23322
Daytime Telephone: 757-421-8240

C. DISTRICT OFFICE: Norfolk District (CENAO-REG)

FILE NAME: Northwest Annex Basewide Delineation Confirmation

FILE NUMBER: NAO-2018-1479

D. PROJECT LOCATION(S) AND BACKGROUND INFORMATION:
(USE THE ATTACHED TABLE TO DOCUMENT MULTIPLE WATERBODIES AT DIFFERENT SITES)

State: **VIRGINIA** County/parish/borough: City:

Center coordinates of site (lat/long in degree decimal format):

Latitude: 36.5614 ° N Longitude: -76.2572 ° W

Universal Transverse Mercator: WGS 84

Name of nearest waterbody: Northwest River

Identify (estimate) amount of waters in the review area:

Non-wetland waters: 64,246.5 linear feet; width (ft); and/or acres.

Cowardin Class:

Stream Flow:

Wetlands: 2,075.77 acres

Cowardin Class:

Name of any water bodies on the site that have been identified as Section 10 waters:

Tidal:

Non-Tidal:

E. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):
☒ Office (Desk) Determination. Date: November 29, 2018
☒ Field Determination. Date(s): July 31, 2012

1. The Corps of Engineers believes that there may be jurisdictional waters of the United States on the subject site, and the permit applicant or other affected party who requested this preliminary JD is hereby advised of his or her option to request and obtain an approved jurisdictional determination (JD) for that site. Nevertheless, the permit applicant or other person who requested this preliminary JD has declined to exercise the option to obtain an approved JD in this instance and at this time.

2. In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "pre-construction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an approved JD for the activity, the permit applicant is hereby made aware of the following: (1) the permit applicant has elected to seek a permit authorization based on a preliminary JD, which does not make an official determination of jurisdictional waters; (2) that the applicant has the option to request an approved JD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an approved JD could possibly result in less compensatory mitigation being required or different special conditions; (3) that the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) that the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) that undertaking any activity in reliance upon the subject permit authorization without requesting an approved JD constitutes the applicant's acceptance of the use of the preliminary JD, but that either form of JD will be processed as soon as is practicable; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a preliminary JD constitutes agreement that all wetlands and other water bodies on the site affected in any way by that activity are jurisdictional waters of the United States, and precludes any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an approved JD or a preliminary JD, that JD will be processed as soon as is practicable. Further, an approved JD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331, and that in any administrative appeal, jurisdictional issues can be raised (see 33 C.F.R. 331.5(a)(2)). If, during that administrative appeal, it becomes necessary to make an official determination whether CWA jurisdiction exists over a site, or to provide an official delineation of jurisdictional waters on the site, the Corps will provide an approved JD to accomplish that result, as soon as is practicable.

3. This preliminary JD finds that there *"may be"* waters of the United States on the subject project site, and identifies all aquatic features on the site that could be affected by the proposed activity, based on the following information:

SUPPORTING DATA:

Data reviewed for preliminary JD (check all that apply) - checked items should be included in case file and, where checked and requested, appropriately reference sources below.

Table 1. Wetland Summary for NSA Northwest

State	Wetland ID	NC-WAM Category[1]	USFWS Cowardin Classification[2]	Wetland Area (acre)	Comments
Virginia	W1a	N/A	PFO	10.60	Mill Stream channel with wetland fringe, about 15 feet wide.
	W2a	N/A	PFO	0.19	Open water feature at head of wetland.
	W3a	N/A	PFO	0.01	Forested depression.
	W4a	N/A	PFO	0.82	Perennial stream channel with wetland fringe.
	W5a	N/A	POW	0.05	Man-made pond, used for storm water.
	W5b	N/A	PFO/PSS	111.55	Continues into VA, previously cut over wetland area.
	W6a	N/A	PFO	1.93	Wetland with intermittent channel along center line.
	W6b	N/A	PFO	53.90	Forested wetland dominated by *Acer rubrum* and *Liquidambar styraciflua.*
	W7a	N/A	PFO	2.59	Wetland with ephemeral channel along center line.
	W7b	N/A	PFO	4.77	Forested wetland dominated by *L. stunaiflua* and *Osmunda regalis.*
	W8a	N/A	PFO	49.16	Wetland with intermittent channel and small trees and ground cover.
	W8b	N/A	PEM/PFO	1624.60	Mostly forested wetland behind Iams Range and west end of ROTHR
	W9a	N/A	PFO	4.53	Disturbed area with connection to S3a.
	W9b	N/A	PFO	1.32	Narrow forested wetland with roadside ditches on northwest and northeast sides.
	W10a	N/A	PFO	7.55	Wetland channel with dry edge and secondary growth.
	W11a	N/A	PFO	1.78	Isolated wetland with groundwater hydrology.
	W12a	N/A	PFO	0.30	Small forested headwater wetland that connects to W1a.
	W12b	N/A	PFO	9.43	Forested wetland dominated by *Lonicera sp., L. Styraciflua.*
	W13a	N/A	PFO/PEM	0.04	Culverted wetland system, with aquatic vegetation.

State	Wetland ID	NC-WAM Category[1]	USFWS Cowardin Classification[2]	Wetland Area (acre)	Comments
Virginia (cont.)	W13b	N/A	PFO	0.55	Forested wetland across from W12b.
	W14a	N/A	POW/PFO	1.43	Lunker Lake open water system with southern forested fringing area.
	W14b	N/A	PSS	12.42	Contour area between ROTHRs and firing range.
	W15a	N/A		0.02	Depressional wetland with stained leaves.
	W15b	N/A	PFO	1.43	Small forested wetland with ditch running north and south of it.
	W16a	N/A	PFO	0.07	Floodplain for Mill Stream, separated by berm. Connects to W1a.
	W16b	N/A	PSS/PEM	1.13	Small wetland by roadside ditch.
	W17a	N/A	PFO	4.31	Narrow drainage way with ditch under Ballahack Road.
	W17b	N/A	Farmed wetland	0.11	Small area of standing water in currently farmed ag fields.
	W18a	N/A	PFO	163.39	Mostly old timber or ag lands, with multiple ditches transecting area. Includes W3b and covers forested areas in western portion of property.
	W18b	N/A	Farmed wetland	0.32	Small area of standing water in currently farmed ag fields.
	W19b	N/A	Farmed wetland	0.07	Small area of standing water in currently farmed ag fields.
	W20a	N/A	PFO	0.55	Wetland that drains into S5a and a culvert connects it to W21a.
	W21a	N/A	PFO/PSS	0.97	Open water with fringing wetland.
	W22a	N/A	POW/PSS	0.21	Forested wetland, hydrological connection between S6a and W7a.
	W23a	N/A	PFO/PSS	0.34	Open water with strong fringing wetland vegetation.
	W24a	N/A	POW/PSS	0.34	Forested wetland connects to S13a.
	W25a	N/A	PFO/PSS	0.39	Roadside ditch with wetland and herbaceous emergent vegetation.

State	Wetland ID	NC-WAM Category[1]	USFWS Cowardin Classification[2]	Wetland Area (acre)	Comments
Virginia (cont.)	W26a	N/A	PEM/PSS	1.54	Roadside ditch with wetland and herbaceous emergent vegetation.
	W27a	N/A	PFO/PEM/PSS	0.14	Forested wetland with lower landscape and pine dominant.
	W28a	N/A	Farmed Wetland	0.17	Standing water and algae mat with wetland vegetation.
	W29a	N/A	Farmed Wetland	0.15	Standing water and algae mat with wetland vegetation.
	W30a	N/A	Farmed Wetland	0.06	Emergent wetland connects S35a and S32a.
	W31a	N/A	Farmed Wetland	0.46	Emergent wetland connects S33a and S32a.
	W32a	N/A	Farmed Wetland	0.08	Small area of standing water in currently farmed ag fields.
North Carolina	W1b	Headwater Forest	PFO	23.36	Forested wetland with relict ditches through the area.
	W2b	Headwater Forest	PFO/PSS	8.89	Forested wetland with relict ditches through the area.
	W11b	Headwater Forest	PFO	95.57	Forested wetland connected to W4b and continues into Virginia, includes area west of Iams Range.
			Total	2203.58	

Table 2. Waterbodies Summary for NSA Northwest

State	Waterbody #	Segment Classification[1]	Length (ft)	Mapping Method[2]	Comments
Virginia	S1a	Intermittent Ditch	11.9	GPS Survey	Roadside ditch along Ballahack Rd., draining NW off property
	S2a	Perennial Ditch	1157.0	Digital Orthophoto/ GPS Survey	Drains into W7a, approximately 5 ft wide.
	S3a	Perennial ditch	2539.6	GPS Survey	Intermittent flow connects W8a to W9a.
	S3b	Perennial Ditch	2799.6	GPS Survey	Six foot wide ditch.
	S4a	Perennial ditch	2747.7	Digital Orthophoto/ GPS Survey	Enters from NC and travels across site to NE property boundary.
	S4b	Perennial Ditch	2170.0	Digital Orthophoto/ GPS Survey	Channel has been widened and dredged, with beaver dam at corner of Red Range.
	S5a	Perennial Ditch	264.3	GPS Survey	Flows south towards open water pond.
	S5b	Perennial Ditch	1787.1	GPS Survey	Agriculture ditch, from corner of Red Range to beaver dam.
	S6a	Perennial Ditch	99.5	GPS Survey	Hydrological connects to W22a.
	S6b	Perennial Ditch	716.5	Digital Orthophoto/ GPS Survey	Agriculture ditch connecting to S5b, about six feet wide.
	S7a	Intermittent Ditch	159.7	Digital Orthophoto/ GPS Survey	Underground culvert feeds ditch, with a hydrological connection to W22a.
	S7b	Intermittent Ditch	16.5	GPS Survey	Short ditch between roadside and W12b.
	S8a	Perennial Ditch	793.6	Digital Orthophoto/ GPS Survey	Open water ditch with vegetation in channel.
	S8b	Intermittent Ditch	1082.3	GPS Survey	Ditch from Crosscut Rd to Relay Rd, receives run off from agriculture and parking lot.
	S9a	Perennial Ditch	705.2	Digital Orthophoto/ GPS Survey	Open water ditch, channel ends before reaching woods.
	S9b	Perennial Ditch	1594.6	GPS Survey	Long roadside ditch, along north edge of Relay Road.
	S10a	Perennial Ditch	700.2	Digital Orthophoto/ GPS Survey	Flows into S9a, with herbaceous vegetation.
	S10b	Perennial Ditch	65.0	GPS Survey	Culvert separates this ditch from S9b.

State	Waterbody #	Segment Classification[1]	Length (ft)	Mapping Method[2]	Comments
Virginia (cont.)	S11a	Perennial Stream	2844.4	Digital Orthophoto/ GPS Survey	Large, 10ft wide channel, with herbaceous vegetation.
	S11b	Perennial Ditch	172.4	GPS Survey	Culvert separates this ditch from S9b and S10b.
	S12a	Perennial ditch	371.8	Digital Orthophoto/ GPS Survey	Herbaceous and woody vegetation in channel, roadside ditch.
	S12b	Intermittent Ditch	748.1	GPS Survey	Roadside channel that widens as it turns east into agricultural ditch.
	S13a	Perennial stream	960.8	Digital Orthophoto/ GPS Survey	Average of 4 ft. wide stream with sedges and algae.
	S13b	Intermittent Ditch	699.7	GPS Survey	Ag ditch north of upland strip along Relay Road.
	S14a	Perennial Ditch	886.0	Digital Orthophoto/ GPS Survey	Agriculture ditch with a defined bed and bank.
	S15a	Perennial Ditch	875.1	Digital Orthophoto/ GPS Survey	Agriculture ditch with a defined bed and bank.
	S15b	Perennial Ditch	1241.2	Digital Orthophoto/ GPS Survey	Ag ditch from forested area through field, average 8 foot width.
	S16a	Perennial Ditch	243.8	GPS Survey	Agriculture ditch with a defined bed and bank, approximately 10 ft wide. Continuation of stream within W1a.
	S16b	Intermittent Ditch	420.3	Digital Orthophoto/ GPS Survey	Agriculture ditch, average 3 ft wide.
	S17a	Perennial Ditch	221.6	Digital Orthophoto/ GPS Survey	Agriculture ditch with a defined bed and bank.
	S17b	Perennial Ditch	392.8	Digital Orthophoto/ GPS Survey	USGS, roadside ditch, average 5 ft wide.
	S18a	Perennial Ditch	178.7	Digital Orthophoto/ GPS Survey	Agriculture ditch with a defined bed and bank.
	S18b	Perennial Ditch	574.5	Digital Orthophoto/ GPS Survey	Ag ditch connected to W5b, average width of 7 feet.
	S19a	Perennial Ditch	308.6	GPS Survey	Agriculture ditch with herbaceous vegetation.
	S19b	Perennial Ditch	11.9	Digital Orthophoto/ GPS Survey	Ag ditch, separated from S18b by culvert.

State	Waterbody #	Segment Classification[1]	Length (ft)	Mapping Method[2]	Comments
Virginia (cont.)	S20a	Perennial ditch	200.8	GPS Survey	Agriculture ditch with a defined bed and bank, flows through culvert into W7b.
	S20b	Perennial Ditch	247.7	Digital Orthophoto/ GPS Survey	Ag ditch, approximately 6 feet wide.
	S21a	Perennial ditch	1672.3	Digital Orthophoto/ GPS Survey	Highly culverted ditch with hydrophytic vegetation.
	S21b	Perennial Ditch	1557.5	Digital Orthophoto/ GPS Survey	Ag ditch, approximately 6 feet wide.
	S22a	Perennial Ditch	967.8	Digital Orthophoto/ GPS Survey	Highly culverted ditch with hydrophytic vegetation.
	S22b	Perennial Ditch	429.6	Digital Orthophoto/ GPS Survey	Ag ditch, connects to W5b.
	S23a	Perennial Ditch	1319.9	Digital Orthophoto/ GPS Survey	Herbaceous and woody vegetation in channel, roadside ditch.
	S24a	Perennial Ditch	419.9	Digital Orthophoto/ GPS Survey	Herbaceous and woody vegetation in channel, roadside ditch.
	S24b	Perennial Ditch	12.4	Digital Orthophoto/ GPS Survey	Ditch between culverts, approximately 4 feet wide.
	S25a	Intermittent Ditch	820.6	Digital Orthophoto/ GPS Survey	Herbaceous and woody vegetation in channel, roadside ditch.
	S25b	Intermittent Ditch	953.6	Digital Orthophoto/ GPS Survey	Ag ditch, not maintained.
	S26a	Intermittent Ditch	1042.5	Digital Orthophoto/ GPS Survey	Agriculture ditch with a defined bed and bank and herbaceous vegetation.
	S26b	Perennial Ditch	1827.9	Digital Orthophoto/ GPS Survey	Maintained ditch across ag field, approximately 8 feet wide.
	S27a	Intermittent Ditch	1950.4	Digital Orthophoto/ GPS Survey	Herbaceous and woody vegetation in channel, roadside ditch.
	S27b	Perennial Ditch	690.9	Digital Orthophoto/ GPS Survey	Ag ditch, with a deep channel.
	S28a	Intermittent ditch	1079.8	Digital Orthophoto/ GPS Survey	Defined bed and bank, connects to W6b.
	S28b	Intermittent Ditch	611.7	Digital Orthophoto/ GPS Survey	Four foot wide ditch, between culverts.

State	Waterbody #	Segment Classification[1]	Length (ft)	Mapping Method[2]	Comments
Virginia (cont.)	S29a	Perennial ditch	538.8	Digital Orthophoto/ GPS Survey	Hydrophytic vegetation along bank, connects to W5b.
	S29b	Intermittent Ditch	32.4	Digital Orthophoto/ GPS Survey	Four foot wide ditch, between culverts.
	S30a	Perennial Ditch	558.2	Digital Orthophoto/ GPS Survey	Defined bed and bank, some woody vegetation.
	S30b	Perennial Ditch	1293.4	Digital Orthophoto/ GPS Survey	Ag ditch, east to west across the field, ends before reaching the road edge.
	S31a	Intermittent Ditch	751.8	Digital Orthophoto/ GPS Survey	Defined bed and bank, some woody vegetation.
	S31b	Perennial Ditch	1668.3	Digital Orthophoto/ GPS Survey	Ag ditch, cuts through deep spoil by S4b.
	S32a	Perennial Ditch	1419.8	GPS Survey	Defined bed and bank, connects to W27a.
	S32b	Perennial Ditch	1061.1	Digital Orthophoto/ GPS Survey	Ditch through field, passes under wastewater treatment facility, and into W12b.
	S33a	Perennial Ditch	259.4	Digital Orthophoto/ GPS Survey	Connects S32a to W26a, minimal vegetation.
	S33b	Perennial Ditch	424.6	Digital Orthophoto/ GPS Survey	Ditch flows east and receives water from ag field.
	S34a	Perennial Ditch	264.8	Digital Orthophoto/ GPS Survey	Connects to W26a, with minimal hydrophytic vegetation.
	S34b	Perennial Ditch	51.5	Digital Orthophoto/ GPS Survey	Short segment separated from S32b by culvert, flows into W12b.
	S35a	Perennial Ditch	318.7	Digital Orthophoto/ GPS Survey	Connects to W30a, with minimal hydrophytic vegetation.
	S35b	Perennial Ditch	501.1	Digital Orthophoto/ GPS Survey	Ag ditch, separated from S36b by culvert.
	S36a	Perennial ditch	1465.4	GPS Survey	Six foot wide channel with minimal hydrophytic vegetation.
	S36b	Perennial Ditch	846.3	Digital Orthophoto/ GPS Survey	Ag ditch, flows into S16a through a spoil pile.
	S37a	Perennial ditch	2495.5	GPS Survey	Four foot wide channel with minimal hydrophytic vegetation

State	Waterbody #	Segment Classification[1]	Length (ft)	Mapping Method[2]	Comments
Virginia (cont.)	S37b	Intermittent Ditch	456.9	Digital Orthophoto/ GPS Survey	Flows during storm events through a culvert under the antenna/communications building.
	S38b	Intermittent Ditch	265.4	GPS Survey	Separated from S37b by culvert
	S40b	Perennial Ditch	1356.1	Digital Orthophoto/ GPS Survey	Ag ditch, flows into S26b.
	S42b	Perennial Ditch	1767.8	Digital Orthophoto/ GPS Survey	Modified USGS stream, connects to W6b and W7b.
North Carolina	S1b	Intermittent Ditch	1148.7	Digital Orthophoto/ GPS Survey	Roadside ditch at the end of Shotgun Road, average 8 feet wide.
	S2b	Perennial Ditch	1548.5	Digital Orthophoto/ GPS Survey	Modified USGS stream, flows between W6b and W7b, continues into VA.
	S23b	Perennial Ditch	4360.3	Digital Orthophoto/ GPS Survey	Circular ditch around training facility, break at south center, flows into S21b and S25b, continues into VA.
	S39b	Perennial Ditch	250.2	Digital Orthophoto/ GPS Survey	Separated from S1b by culvert, continues into VA.
	S41b	Perennial Ditch	3900.6	Digital Orthophoto/ GPS Survey	Agriculture ditch, flows through W1b, approximately 4ft wide.

US ARMY CORPS OF ENGINEERS
NORFOLK DISTRICT
FORT NORFOLK
803 FRONT STREET
NORFOLK VA 23510-1011

November 29, 2018

Supplemental Preapplication Information

Project Number: NAO-2018-1479
Applicant: US NAVY
Project Location: Northwsest Annex

1. A search of the Virginia Department of Historic Resources data revealed the following:

   ☐ No known historic properties are located on the property.

   ☒ The following known architectural resources are located on the property: See Attached List

   ☒ The following known archaeological resources are located on the property: See Attached List

   ☐ The following known historic resources are located in the vicinity of the property (potential for effects to these resources from future development):

NOTE:

1) The information above is for planning purposes only. In most cases, the property has not been surveyed for historic resources. Undiscovered historic resources may be located on the subject property or adjacent properties and this supplemental information is not intended to satisfy the Corps' requirements under Section 106 of the National Historic Preservation Act (NHPA).

2) Prospective permittees should be aware that Section 110k of the NHPA (16 U.S.C. 470h-2(k)) prevents the Corps from granting a permit or other assistance to an applicant who, with intent to avoid the requirements of Section 106 of the NHPA, has intentionally significantly adversely affected a historic property to which the permit would relate, or having legal power to prevent it, allowed such significant adverse effect to occur, unless the Corps, after consultation with the Advisory Council on Historic Preservation (ACHP), determines that circumstances justify granting such assistance despite the adverse effect created or permitted by the applicant.

2. A search of the data supplied by the U.S. Fish & Wildlife Service, the Virginia Department of Conservation and Recreation and the Virginia Department of Game and Inland Fisheries revealed the following:

   ☐ No known populations of threatened or endangered species are located on or within the vicinity of the subject property.

   ☒ The following federally-listed species may occur within the vicinity of the subject property: Northern Long Eared Bat

   ☒ The following state-listed (or other) species may occur within the vicinity of the subject property: canebrake rattlesnake (state endangered) and Dismal Swamp southeastern shrew (state threatened).

Please note this information is being provided to you based on the preliminary data you submitted to the Corps relative to project boundaries and project plans. Consequently, these findings and recommendations are subject to change if the project scope changes or new information becomes available and the accuracy of the data.

Endangered Species and Historic Locations

Generated: 9/14/2012
Center: (-76.2648, 36.5656)
Buffer Radius: 1 mi.

Endangered Species (VA DCR)

- **NHR ID (Legal Status, Type): Site Name - Site Description**
- S_528 (SL, Conservation Site): NORTHWEST RIVER: HEADWATERS - This site supports many rare plants, animals and vegetative communities. It also serves as a direct link with the Great Dismal Swamp - protection of this corridor is crucial for long-term health of the Northwest River. 11/02
- S_1577 (SL, Conservation Site): GREAT DISMAL SWAMP: SMITH RIDGE - In addition to supporting rare animals and characteristic vegetation of the original Great Dismal Swamp, this site serves as a vital link/corridor for swamp and riverine flora and fauna. 11/02
- S_1744 (SL, Conservation Site): GREAT DISMAL SWAMP: NSGA NORTHWEST - This site supports many rare plant and animal species, and adds to long-term viability of the remaining Great Dismal Swamp. Protection of this area is critical. 11/02
- S_146 (SL, Conservation Site): NORTHWEST RIVER: MIDDLE SECTION - In addition to supporting many rare plants, animals and significant natural communities, this site is part of a large, relatively unfragmented riparian system. Protection is critical. 11/02
- E_3425 (NL, General Location): no name - Vascular Plant

Architectural Resources

U.S. ARMY CORPS OF ENGINEERS
WILMINGTON DISTRICT

Action Id. **SAW-2012-01913** County: **Camden County** U.S.G.S. Quad: **Moyock**

NOTIFICATION OF JURISDICTIONAL DETERMINATION

Property Owner/Applicant: **LCDR John K. Pergerson**
Public Works Officer, Northwest Annex

Telephone Number: **757-421-8240**

Size (acres)	**835.9**	Nearest Town	**Moyock**
Nearest Waterway	**Shingle Landing Creek**	River Basin	**Albemarle-Chowan**
USGS HUC	**03010205**	Coordinates	Latitude: **36.5384181525511**
			Longitude: **-76.2705344714199**

Location description: **The review area for this jurisdictional determination (JD) is comprised of the North Carolina portion of the Naval Support Activity (NSA), Northwest Annex located in Currituck County, North Carolina. The portion of the installation in Virginia will be covered under a separate JD issued by the Norfolk District.**

Indicate Which of the Following Apply:

A. Preliminary Determination

X **There are waters, including wetlands, on the above described project area, that may be subject to Section 404 of the Clean Water Act (CWA)(33 USC § 1344) and/or Section 10 of the Rivers and Harbors Act (RHA) (33 USC § 403). The waters, including wetlands, have been delineated, and the delineation has been verified by the Corps to be sufficiently accurate and reliable. Therefore this preliminary jurisdiction determination may be used in the permit evaluation process, including determining compensatory mitigation. For purposes of computation of impacts, compensatory mitigation requirements, and other resource protection measures, a permit decision made on the basis of a preliminary JD will treat all waters and wetlands that would be affected in any way by the permitted activity on the site as if they are jurisdictional waters of the U.S. This preliminary determination is not an appealable action under the Regulatory Program Administrative Appeal Process (Reference 33 CFR Part 331). However, you may request an approved JD, which is an appealable action, by contacting the Corps district for further instruction.**

_ There are wetlands on the above described property, that may be subject to Section 404 of the Clean Water Act (CWA)(33 USC § 1344) and/or Section 10 of the Rivers and Harbors Act (RHA) (33 USC § 403). However, since the waters, including wetlands, have not been properly delineated, this preliminary jurisdiction determination may not be used in the permit evaluation process. Without a verified wetland delineation, this preliminary determination is merely an effective presumption of CWA/RHA jurisdiction over all of the waters, including wetlands, at the project area, which is not sufficiently accurate and reliable to support an enforceable permit decision. We recommend that you have the waters of the U.S. on your property delineated. As the Corps may not be able to accomplish this wetland delineation in a timely manner, you may wish to obtain a consultant to conduct a delineation that can be verified by the Corps.

B. Approved Determination

_ There are Navigable Waters of the United States within the above described property subject to the permit requirements of Section 10 of the Rivers and Harbors Act (RHA) (33 USC § 403) and Section 404 of the Clean Water Act (CWA)(33 USC § 1344). Unless there is a change in law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.

_ There are waters of the U.S., including wetlands, on the above described project area subject to the permit requirements of Section 404 of the Clean Water Act (CWA) (33 USC § 1344). Unless there is a change in the law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.

_ We recommend you have the waters of the U.S. on your property delineated. As the Corps may not be able to accomplish this wetland delineation in a timely manner, you may wish to obtain a consultant to conduct a delineation that can be verified by the Corps.

_ The waters of the U.S., including wetlands, on your project area have been delineated and the delineation has been verified by the Corps. We strongly suggest you have this delineation surveyed. Upon completion, this survey should be reviewed and

verified by the Corps. Once verified, this survey will provide an accurate depiction of all areas subject to CWA jurisdiction on your property which, provided there is no change in the law or our published regulations, may be relied upon for a period not to exceed five years.

_ The waters of the U.S., including wetlands, have been delineated and surveyed and are accurately depicted on the plat signed by the Corps Regulatory Official identified below on _____. Unless there is a change in the law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.

_ There are no waters of the U.S., to include wetlands, present on the above described project area which are subject to the permit requirements of Section 404 of the Clean Water Act (33 USC 1344). Unless there is a change in the law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.

X The property is located in one of the 20 Coastal Counties subject to regulation under the Coastal Area Management Act (CAMA). You should contact the Division of Coastal Management in Elizabeth City, NC, at (252) 264-3901 to determine their requirements.

Placement of dredged or fill material within waters of the US, including wetlands, without a Department of the Army permit may constitute a violation of Section 301 of the Clean Water Act (33 USC § 1311). Placement of dredged or fill material, construction or placement of structures, or work within navigable waters of the United States without a Department of the Army permit may constitute a violation of Sections 9 and/or 10 of the Rivers and Harbors Act (33 USC § 401 and/or 403). If you have any questions regarding this determination and/or the Corps regulatory program, please contact **Billy Standridge at (910) 251-4595 or Billy.W.Standridge@usace.army.mil**.

C. Basis For Determination: N/A. An Approved JD has not been completed.

D. Remarks: This is a reissuance of a PJD that was originally issued on November 28, 2012. See attached Aquatic Resources Map prepared by Tetra Tech dated 08/2012.

E. Attention USDA Program Participants

This delineation/determination has been conducted to identify the limits of Corps' Clean Water Act jurisdiction for the particular site identified in this request. The delineation/determination may not be valid for the wetland conservation provisions of the Food Security Act of 1985. If you or your tenant are USDA Program participants, or anticipate participation in USDA programs, you should request a certified wetland determination from the local office of the Natural Resources Conservation Service, prior to starting work.

F. Appeals Information for Approved Jurisdiction Determinations (as indicated in Section B. above)

If you object to this determination, you may request an administrative appeal under Corps regulations at 33 CFR Part 331. Enclosed you will find a Notification of Appeal Process (NAP) fact sheet and Request for Appeal (RFA) form. If you request to appeal this determination you must submit a completed RFA form to the following address:

US Army Corps of Engineers
South Atlantic Division
Attn: Jason Steele, Review Officer
60 Forsyth Street SW, Room 10M15
Atlanta, Georgia 30303-8801

In order for an RFA to be accepted by the Corps, the Corps must determine that it is complete, that it meets the criteria for appeal under 33 CFR part 331.5, and that it has been received by the Division Office within 60 days of the date of the NAP. Should you decide to submit an RFA form, it must be received at the above address by **N/A**.
It is not necessary to submit an RFA form to the Division Office if you do not object to the determination in this correspondence.

NOTIFICATION OF ADMINISTRATIVE APPEAL OPTIONS AND PROCESS AND REQUEST FOR APPEAL

Applicant: **NAVFAC MIDLANT**	File Number: **SAW-2012-01913**	Date: **July 24, 2018**

Attached is:	See Section below
☐ INITIAL PROFFERED PERMIT (Standard Permit or Letter of permission)	A
☐ PROFFERED PERMIT (Standard Permit or Letter of permission)	B
☐ PERMIT DENIAL	C
☐ APPROVED JURISDICTIONAL DETERMINATION	D
☒ PRELIMINARY JURISDICTIONAL DETERMINATION	E

SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits.aspx or Corps regulations at 33 CFR Part 331.

A: INITIAL PROFFERED PERMIT: You may accept or object to the permit.

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- OBJECT: If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

B: PROFFERED PERMIT: You may accept or appeal the permit

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- APPEAL: If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

C: PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

D: APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.

- ACCEPT: You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.
- APPEAL: If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

E: PRELIMINARY JURISDICTIONAL DETERMINATION: You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.

SECTION II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT

REASONS FOR APPEAL OR OBJECTIONS: (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

ADDITIONAL INFORMATION: The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

POINT OF CONTACT FOR QUESTIONS OR INFORMATION:

If you have questions regarding this decision and/or the appeal process you may contact:	If you only have questions regarding the appeal process you may also contact:
District Engineer, Wilmington Regulatory Division, Attn: Billy Standridge	Mr. Jason Steele, Administrative Appeal Review Officer CESAD-PDO U.S. Army Corps of Engineers, South Atlantic Division 60 Forsyth Street, Room 10M15 Atlanta, Georgia 30303-8801 Phone: (404) 562-5137

RIGHT OF ENTRY: Your signature below grants the right of entry to Corps of Engineers personnel, and any government consultants, to conduct investigations of the project site during the course of the appeal process. You will be provided a 15 day notice of any site investigation, and will have the opportunity to participate in all site investigations.

_____ Signature of appellant or agent.	Date:	Telephone number:

For appeals on Initial Proffered Permits send this form to:

District Engineer, Wilmington Regulatory Division, Attn: Billy Standridge, 69 Darlington Avenue, Wilmington, North Carolina 28403

For Permit denials, Proffered Permits and approved Jurisdictional Determinations send this form to:

Division Engineer, Commander, U.S. Army Engineer Division, South Atlantic, Attn: Mr. Jason Steele, Administrative Appeal Officer, CESAD-PDO, 60 Forsyth Street, Room 10M15, Atlanta, Georgia 30303-8801 Phone: (404) 562-5137

This page intentionally left blank.

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S1B/S2N		SR	S1B, S3N	Bird	American bittern	*Botaurus lentiginosus*	NSA	Year round in coastal Virginia	breed mainly in freshwater marshes with tall vegetation. In winter they move to areas where water bodies don't freeze, especially near the coast, where they occasionally use brackish marshes. Wintering birds may also forage in dry grasslands and other terrestrial habitats.	Yes
		S1BS5N				Bird	American Coot	*Fulica americana*	NSA	Common in VA during winter and non-breeding times.	Ponds, lakes, marshes; in winter, also fields, park ponds, salt bays. For breeding season requires fairly shallow fresh water with much marsh vegetation. At other seasons may be in almost any aquatic habitat, including ponds or reservoirs with bare shorelines, open ground near lakes, on salt marshes or protected coastal bays. Migrants sometimes are seen out at sea some distance from land.	Yes
				SR	S2B,S5N	Bird	American Kestrel	*Falco sparverius*	NSA	Common year-round	Open country, farmland, cities, wood edges. Inhabits any kind of open or semi-open situation, from forest clearings to farmland to desert, wherever it can find adequate prey and some raised perches. In breeding season, may be limited to habitats that also provide appropriate nesting sites. In winter, females may tend to be found in more open habitats than males.	yes
		S3B/S3N / WL	II	SC	S2S3B,S3N	Bird	American oystercatcher	*Haematopus palliatus*	NSA	Common to abundant permanent resident on immediate coast of Eastern Shore; locally common in Tangier area of Chesapeake Bay. Uncommon to rare transient in lower Chesapeake Bay. Record from York River (Sarah Creek)	In the winter, oystercatchers can be found roosting on wave-tossed shell mounds and elevated sections of dredge spoil islands. During feeding, wintering oystercatchers were found on old oysterbeds, intertidal mudflats, and along intertidal creeks and rivers. In general, oystercatchers are found on beaches, mudflats and borders of salt marshes; rarely found inland but may venture to tilled grounds.	yes
	ST	S1B	I	SC	S3B,S2N	Bird	Bachman's Sparrow	*Peucaea aestivalis*	NSA	a few counties in central VA	mature pine forest or savanna with the open grassy understory	Yes
BGEPA		S3S4B/S3S4N / WL		NC ST	S3B,S3N	Bird	Bald eagle	*Haliaeetus leucophalus*	NSA	breeding, all seasons	Tree nests are usually in very tall tree, standing above surrounding forest, up to 180' or more above ground.	yes
		S3B/S3N / WL	III	SC	S2S3B,S3N	Bird	Barn owl	*Tyto alba*	NSA	Common year round on the coastal plain of VA and NC.	Woodlands, groves, farms, barns, towns, cliffs. Typically in open or semi-open country in lowlands. May nest in forest or city if nearby area has good open foraging territory, such as farmland, marsh, prairie, desert.	yes
		S2B/S1N	II	SC	S2B,S3N	Bird	Black skimmer	*Rynchops niger*	NSA	Breeds along the coastline of Va and NC, Year-round resident on NC coast.	Mostly ocean beaches, tidewater. Favors coastal waters protected from open surf, such as lagoons, estuaries, inlets, sheltered bays. Nest site on ground on open sandy beach, shell bank, sandbar; sometimes on gravel roof. Nest is shallow scrape in sand.	No
			II	SR	S2B	Bird	Black-billed cuckoo	*Coccyzus erythropthalmus*	NSA	Breeding resident in VA and NC	Forest edge and open woodland, both deciduous and coniferous, with dense deciduous thickets. Found in extensive tracts of dry upland woods where it uses the midstory canopy and the overstory canopy for most activities. Nests in groves of trees, forest edges, moist thickets, overgrown pastures; in deciduous or evergreen tree or shrub. Is a low or ground nesting species.	yes
		S3B/S4N / WL	III	W1	S3B,S3N	Bird	Black-crowned Night-Heron	*Nycticorax nycticorax*	NSA	NC - Tidewater, [nesting sites only] Year-round resident	Maritime thickets or forests, almost always on small islands. Most wetland habitats across North America, including estuaries, marshes, streams, lakes, and reservoirs.	Yes
		S1B		SR	S1B	Bird	Black-necked Stilt	*Himantopus mexicanus*	NSA	NC - Tidewater [breeding evidence] It seldom shows up away from its few favored sites in the state; most birders see the species only in the Pea/Bodie islands area. Unlike most other shorebird species, which may straggle into late fall or early winter, stilts are quite cold intolerant, and depart the state promptly by mid-fall. This is one of the rarest shorebirds found away from the coast, with just a handful of far inland records.	For nesting and foraging, it is restricted to fresh to brackish, still waters -- mainly impoundments, dredge spoil ponds, and sewage treatment ponds, along and close to the coast. Nearly all sites in the state are man-made bodies of water. Grassy marshes, mudflats, pools, shallow lakes (fresh and alkaline). Found at all seasons at the margins of shallow water in very open country, especially where there is much marsh growth. For nesting, requires bare open ground near water, with little vegetation.	No
		S3B / WL		SR	S2B	Bird	Blue-winged warbler	*Vermivora pinus*	NSA	Uncommon summer passage migrant at NSA. Occurs mid to eastern North America and the eastern coast of South America.	Breeds inn brushy hillsides, second growth, partly open situations with saplings, bogs, woodland edge and clearings, stream edges, overgrown pastures, swamps. Nests close to or on ground, in bushes, weeds, or grasses, or under bushes, or between exposed roots of stump. Migration and winter habitats include brushy areas, scrub, and open woodland.	yes
		S3B/S5N / WL		SC	S3B,S5N	Bird	Brown creeper	*Certhia americana*	NSA (N)	Uncommon winter resident at NSA.	Forest, woodlands, forested floodplains and swamps. Scrub and parks are also used in winter and during migration. Most often found in coniferous and mixed forests. Found in Standing snag/hollow tree,	yes
		S2B/S3N		SR	S3B,S4N	Bird	Brown Pelican	*Pelecanus occidentalis*	NSA	year round	estuaries and coastal marine habitats	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S3S4B / WL	IV			Bird	Canada Warbler	*Cardellina canadensis*	NSA	Migratory though the western portions of VA and NC	Forest undergrowth, shady thickets. Breeds in mature mixed hardwoods of extensive forests and streamside thickets. Prefers to nest in moist habitat: in luxuriant undergrowth, near swamps, on stream banks, in rhododendron thickets, in deep, rocky ravines and in moist deciduous second-growth.	No
		S3/S4B / WL	II	SC	S2B	Bird	Cerulean Warbler	*Setophaga cerulea*	NSA (N)	Rare spring transient, in the coastal plain.	Deciduous forests, especially in river valleys. Breeds in mature hardwoods either in uplands or along streams. Prefers elm, soft maple, oak, birch, hickory, beech, basswood, linden, sycamore, or black ash. Nests only in tall forest with clear understory. In winter in tropics, found mostly in forest and woodland borders in foothills and lower slopes.	Yes
			IV	W1	S4B	Bird	Chimney swift	*Chaetura pelagica*	NSA	NC - Coastal Plain. Breeds throughout most of North America, winters in South America	Nest in chimneys and on other vertical surfaces in dim, enclosed areas, including air vents, wells, hollow trees, and caves. They forage over urban and suburban areas, rivers, lakes, forests, and fields. Not on Currituck Co listing	Yes
				W1	S4B	Bird	Chuck-will's-widow	*Antrostomus carolinensis*	NSA	Breeds in most of VA and NC (except western mountainous regions)	Dry woodlands in the southeast, from pine barrens to oak-hickory and mixed deciduous woodlands. Not on Currituck Co listing	Yes
		S1B/S1N		W2	S3B,S2N	Bird	Common Gallinule	*Gallinula galeata*	NSA	NC - Tidewater and Coastal Plain, [breeding season only] Year-round resident in coastal NC.	Marshes, ponds, canals, ditches, and rice fields where pools with submerged or floating vegetation are interspersed with emergent or shoreline vegetation, this species forages for plant materials and macroinvertebrates on the water surface, among submerged plants, and in shoreline and upland vegetation.	No
				W1	S2S3B	Bird	Common nighthawk	*Chordeiles minor*	NSA	NC - Tidewater and Coastal Plain. Breeding evidence only. Breeds throughout most of North America, winters in South America	Forage over open areas near woods or wetlands. They nest on the ground in open areas such as gravel bars, forest clearings, coastal sand dunes, or sparsely vegetated grasslands. Not on Currituck Co listing	Yes
		S3B / WL	II	E	S2B	Bird	Common Tern	*Sterna hirundo*	NSA	Breeds commonly on the coast of the Eastern Shore. Common transient and summer resident on coast and in the Bay. Less common transient inland, rare winter visitor	Nest site is on bare ground or surrounded by low vegetation; sometimes on floating mat of dead vegetation	no
		S3B/S3N				Bird	Cooper's hawk	*Accipiter cooperii*	NSA	Non breeding individuals in eastern US my occur from New England south to Middle America. Species observed but uncommon at NASO and NSA.	Nesting - Mixed deciduous-coniferous dense forest with eastern hemlock as the dominant coniferous species. Prefer large basal area and canopy cover. Commonly near wetland openings or source of water, on level ground or lower slopes, typically several hundred meters from paved roads. Speces avoid southern exposures. Also found in pine plantation with deformed tree canopy tree tops. **Non breeding** - Ridges and coastlines,. Similar to nesting habitat except open woodlands and fields may be utilized to a greater extent.	yes
PT	SE	S1B/S1N	I	SC	S1	Bird	Eastern Black Rail	*Laterallus jamaicensis jamaicensis*	NSA	B - Spring/Summer; Uncommon to rare transient and local summer resident and rare winter visitor in the Coastal Plain. Peak counts occur along the coast in late spring and early summer. According to the Breeding Bird Atlas, there is no record of breeding in Virginia	This is a very secretive species. It shows more of a tendency toward dry fields than other species in this family. Its nest is usually found in tussocks of grass in drier locations up from water. Favor brackish marshes and the drier parts of the salt marsh, found the least in fresh water marshes; they use a wide range of vegetation heights, varying from 6in. of matted grass to 3ft. of sedges. Prefer salt marshes but also found along inland tidal creeks and marshes. Along the seacoast occurs above and in bank of beaches along edges of Salicornia flats and in salt meadow cordgrass. It is occasionally found in wet savannahs	yes
			III	W1	S3B	Bird	Eastern Whip-poor-will	*Antrostomus vociferus*	NSA	Breeds throughout VA and NC	Eastern forests with open understories. They can be found in both purely deciduous and mixed deciduous-pine forests, often in areas with sandy soil. Not on Currituck Co listing	Yes
		S3B/S3N / WL	III	W2	S3B,S5N	Bird	Forster's tern	*Sterna forsteri*	NSA	Commonly breeds in coastal NC, Uncommon in the winter in the VA and NC coastal plain	Marshes (fresh or salt), lakes, bays, beaches. During summer is mostly around marshes, either coastal salt marsh or large marshy lakes in the interior. May visit any waters during migration. Winters mostly along coast, especially around estuaries, inlets, coastal lagoons, sheltered bays.	Possible
		S2B/S1N	I	SC	S1, S2B	Bird	Glossy Ibis	*Plegadis falcinellus*	NSA	NC - Tidewater, [breeding evidence only] Breeds in coastal VA and NC; Rare in the Tidewater zone in the warmer months, and very rare in winter	Nests with other waders on small coastal islands. Forests or thickets on maritime islands. Inland wetland habitats such as shallow lakes, swamps and marshes, ponds, rivers, floodplains, wet meadows and irrigated agricultural fields, as well as occasionally using coastal lagoons, mudflats and estuaries	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		SHB/S1N	I	SR	S1B, S1N	Bird	Golden Eagle	*Aquila chrysaetos*	NSA	Found mostly in the western half of the U.S., they are rare in eastern states.	They avoid developed areas and uninterrupted stretches of forest. They are found primarily in mountains up to 12,000 feet, canyonlands, rimrock terrain, and riverside cliffs and bluffs. Partially or completely open country, especially around mountains, hills, and cliffs. They use a variety of habitats ranging from arctic to desert, including tundra, shrublands, grasslands, coniferous forests, farmland, and areas along rivers and streams.	no
		S2B/S5N		W2,W5	S3S4B,S5N	Bird	Golden-crowned Kinglet	*Regulus satrapa*	NSA (N)	nonbreeding	trees and shrubs in winter	Yes
			IV	W1,W5	S3B, S1N	Bird	Grasshopper sparrow	*Ammodramus savannarum*	NSA	Uncommon breeder in SE VA and NE NC.	Grassland, hayfields, prairies. Breeds in rather dry fields and prairies, especially those with fairly tall grass and weeds and a few scattered shrubs. Also nests in overgrown pastures and hayfields, and sometimes in fields of other crops.	yes
		S3B/S5N WL				Bird	Great blue heron	*Ardea herodias*	NSA	Resident at NASO. In the east US region - southern New England south to northern South America. Oserved at	Freshwater and brackish marshes, along lakes, rivers, bays, lagoons, ocean beaches, mangroves, fields, and meadows. Nests commonly high in trees in swamps and forested areas, less commonly in bushes, or on ground, rock ledges, and coastal cliffs.	yes
		S2S3B/S3N				Bird	Great egret	*Ardea alba*	NSA	Summer resident at NASO. Breeds Maine south through the Gulf states. During non-breeding saso,n occurs regularly north to North Carolina, southern U.S, and CA	Marshes, swampy woods, tidal estuaries, lagoons, mangroves, streams, lakes, and ponds; also fields and meadows.	yes
	ST	S2B	I	T	S1S2B	Bird	Gull-billed Tern	*Gelochelidon (Sterna) nilotica*	NSA	Coastal summer breeding - not likely to be found inland or along rivers. Uncommon summer resident along coast of Eastern Shore; uncommon transient on coast south of Cape Henry, rare in lower Chesapeake Bay. Only three records away from coast. Breeds along coast of Eastern Shore	All known breeding colonies are located on the barrier islands of the Eastern Shore (FIPS 001,131) ; unusual nesting record away from coast at Craney Island--nest with 2 eggs, 05 July 1964. Breeds on gravelly or sandy beaches. Winters in salt marshes, estuaries, lagoons and plowed fields, less frequently along rivers, around lakes and in fresh-water marshes.	no
	ST	S1B	I	E	S1B,S1N	Bird	Henslow's Sparrow	*Ammodramus henslowii*	NSA	Rare transient, summer resident and winter visitor in the coastal plain with the only known summer occurrences now in Accomack County. Also recorded in New Kent County and Sussex County during the breeding season.	Breeds in grasslands, previously in grassy marshes.	yes
		S1B/S5N		SR	S2B,S5N	Bird	Hermit thrush	*Catharus guttatus*	NSA (N)	A rare non-breeding resident at NSA. Observed in Grayson, Highland, Russell, Smyth, and Washington counties in VA.	Open humid coniferous and mixed forest and forest edge, dry sandy and sparse jackpine, less frequently in deciduous forest and thickets; in migration and winter also chaparral, riparian woodland, arid pine-oak, desert scrub.	yes
		S2B/S3N	II	W1,W3	S3B,S3N	Bird	King Rail	*Rallus elegans*	NSA	Locally common transient and summer resident (mainly in fresh and brackish marshes), in Coastal Plain, rare winter resident and rare elsewhere in state. Peak counts occur along the coast during winter.	Occurs in freshwater or brackish marshes, in emergent vegetation of extensive marshes along streams, ponds, and rivers Also occasionally uses rice fields and wet meadows, freshwater swamps dominated by shrubs, sloughs, edges of sluggish streamsand sometimes seen foraging in roadside ditches. It is found breeding in shallow water rice fields, fresh to brackish marshes, roadside ditches, low bushes, and occasionally in oat and wheat fields. It is not know to breed in coastal salt marshes	yes
		S3B/S3N / WL	III	SC	S2S3B	Bird	Least Bittern	*Ixobrychus exilis*	NSA	Common transient and uncommon summer resident of Coastal Plain (30 April - 20 Sept.), rare and local transient and summer resident. inland. Peak counts occur along the coast during Spring and summer. Only four winter records.	Prefers marshes with fresh or brackish water with tall vegetation. Often in cattails or areas where vegetation is at least 3ft. tall . All seasons generally in freshwater marshes, especially where the vegetation is at least 3ft.(1m) high; commonly in cattails (typha spp.). Common in brackish marshes but infrequent in salt marshes	yes
		S2B	III	SC	S3B	Bird	Least Tern	*Sternula antillarum*	NSA	NC - Tidewater [breeding evidence] Somewhat less numerous in the Tidewater zone (around brackish water, mainly). Very rare to rare non-breeder farther inland, where it is mostly a post-breeding visitor or early fall migrant (including some storm-carried records). Along the coast, mainly present from early Apr to mid-Sep; departs early, with very few remaining into Oct; exceptionally from mid-Mar to mid-Nov, but no conclusive winter records (Dec thru Feb).	The species forages over the inshore ocean and in sounds/estuaries, rarely at fresh or brackish water. Nests on beaches, sand flats, open dunes, gravel rooftops.	No
		S2B/S3N	II	SC	S3B,S3N	Bird	Little blue heron	*Egretta caerulea*	NSA	Common transient and summer resident and uncommon winter resident along the coast. It is an irregularly uncommon transient and summer visitor farther inland. Breeding and peak counts all occur on the Eastern Shore and in Virginia Beach. This species is believed to breed between 20 May and 20 June	Nest in variety of trees along edge of water, usually hardwood . Forage on mudflats and shallow water areas, prefering fresh water. In Virginia Beach, this species can be found year-round just along the areas of the coastal spit/Back Bay and False Cape	yes
	ST	S1B/S2N	I	SC, W2	S2S3B,S3N	Bird	Loggerhead Shrike	*Lanius ludovicianus*	NSA	year round	Only this subspecies breeds in the Piedmont and Coastal Plain Provinces, but both this subspecies and the other subspecies resident in Virginia. Species is a permanent resident near the Fall Line but rare farther east.	yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
	ST	S1B/S2N				Bird	Loggerhead Shrike, migrant	*Lanius ludovicianus migrans*	NSA	Winters in Hampton, Newport News, Norfolk, Suffolk, and Virginia Beach.	Prefers open grassland that is grazed or mowed to keep grass short. An abundance of perching sites such as fences, woody vegetation or hedgerows is also important. This species usually nests in easern redcedar or hawthorne. During periods of cold weather or snow cover, shrikes sometimes move from hedgerow habitats to woodlots.	yes
		S2B		SR	S2B	Bird	Magnolia Warbler	*Setophaga magnolia*	NSA	migration	Low conifers; in migration, other trees. Breeds most commonly in areas of short young spruce; also in young hemlocks and pines, and in dense understory of taller coniferous forest. During migration may be in any kind of deciduous shrubs or low trees. In winter in tropics, often in second-growth and scrub as well as edges of taller forest.	Yes
		S1S2B/S3N	III	SR	S2B	Bird	Northern harrier	*Circus cyaneus*	NSA	Commonly winters in the southeast. An uncommon year-round resident in coastal VA and NC	Marshes, fields, prairies. Found in many kinds of open terrain, both wet and dry habitats, where there is good ground cover. Often found in marshes, especially in nesting season, but sometimes will nest in dry open fields.	yes
		S1B/S2N	I	ST	S2B,S2N	Bird	Northern Saw-whet owl	*Aegolius acadicus*	NSA	Winter non breedingin SE VA and NE NC	They winter in dense forests across the central and southern U.S.	yes
		S1B				Bird	Northern waterthrush	*Parkesia noveboracensis*	NSA	Common during migration	Swampy or wet woods, streamsides, lake shores; in migration, also thickets. Breeds mostly in coniferous forests with standing or sluggish water, as found in shrubby bogs and edges of northern lakes, less often along swift streams. In migration, may appear in any habitat; more frequent in thickets along edges of water. In winter in tropics, often in coastal mangrove swamps.	Yes
	ST	S1B/S2N	I	SE	S1B,S2N	Bird	Peregrine Falcon	*Falco peregrinus*	NSA	B - Spring/Summer; This is an uncommon transient and rare winter resident along the coast, and rare inland. It was formerly a rare summer resident in the Mountains and Valleys. After extensive reintroduction efforts, the peregrine falcon now breeds at several coastal sites.	Perches or nests on skyscrapers, water towers, cliffs, power pylons, and other tall structures	yes
		S1S2B/S4N		W2	S3B,S5N	Bird	Pied-billed Grebe	*Podilymbus podiceps*	NSA (N)	Year-round	Ponds, lakes, marshes; in winter, also salt bays. In breeding season, chooses sites with heavy marsh vegetation but with some open water also. In migration and winter, still most likely on marshy freshwater ponds, but also on more open waters, including estuaries and coastal bays.	Yes
FT	ST	S2B/S1N	II	ST	S1B,S1N	Bird	Piping Plover	*Charadrius melodus*	NSA	Uncommon breeding in SE Virginia and NE North Carolina.	Sandy beaches, tidal flats. Nests in open sandy situations near water, in a variety of settings: beaches along Atlantic Coast.	no
		S1B/S5N				Bird	Purple finch	*Haemorhous purpureus (Carpodacus purpureus)*	NSA	Nonbreeding in most of Virginia	In summer, Purple Finches are primarily birds of moist, cool evergreen forests. Also in mixed forests, along wooded streams, and in tree-lined suburbs. In winter they're more widespread, using forests, shrubby areas, weedy fields, hedgerows, and backyards.	Yes
FT	ST	S2N	I	ST	S2N	Bird	Red Knot -- Rufa subspecies	*Calidris canutus rufa*	NSA	Nonbreeder, locally common to abundant transient (10 May-5 Jun, 20 Jul-25 Sep) along coast, uncommon to rare winter and summer visitor. NC - Tidewater. Transient and winter resident, essentially only along the coast. Only fairly common in spring, and uncommon to fairly common in fall, along the entire coast. Small numbers can be seen in early summer. In the Tidewater zone, very rare migrant, and rare to absent in winter.	Outside of breeding season, it is found primarily in intertidal, marine habitats, especially near coastal inlets, estuaries, and bays. Knots favor tidal water for foraging, such as ocean and inlet beaches, or other sand flats; they are not as numerous on the extensive wet mud of tidal flats. They also forage in shallow water of coastal impoundments and pools.	Possible
		S2B/S4N		W2,W5	S3B,S4N	Bird	Red-breasted nuthatch	*Sitta canadensis*	NSA (N)	Ucommon winter resident at NSA. A nonbreeding resident of Va documented in the following counties in VA: Grayson, Highland, Madison, Montgomery, Rockingham, Russell, Smyth, and Washington	Coniferous and mixed forest, aspen woodland; in migration and winter also in deciduous forest, open woodland, parks, scrub, and riparian woodland. Nests in excavated cavity in tree stub or branch of dead tree, or dead top of live tree, also in abandoned woodpecker hole, natural cavity, or bird box; average of 4-5 m above ground.	Yes
FE	SE	SHB		SE	SHB	Bird	Roseate Tern	*Sterna dougallii dougallii*	NSA	Winter/fall migration; It is a rare transient and summer visitor near the coast. It formerly nested irregularly on Virginia's Eastern Shore, but there is no definite breeding record since 1927; Currently seen only during migration	The roseate tern nests on higher parts of sandy islands (including ridges or sand dunes) amidst vegetation which serves to conceal the nest. This species usually feeds over open water, often in tidal channels, tide rips, or over sandbanks where currents bring fish into relatively shallow water.	yes
		S2B	IV			Bird	Royal tern	*Thalasseus maximus*	NSA	Commonly breeds along the coastline from New Jersey south to NE NC.	Coasts, sandy beaches, salt bays. Favors warm coastal waters, especially those that are shallow and somewhat protected, as in bays, lagoons, estuaries. Common along tropical and subtropical shores, it is almost never found inland except after hurricanes.	Possible
			IV	W1	S3N	Bird	Rusty Blackbird	*Euphagus carolinus*	NSA	NC - Coastal Plain, [wintering habitat only] (most counties in the Coastal Plain	Swamps and other moist hardwood forests, usually near fields, wet areas, including flooded woods, swamps, marshes and the edges of ponds. These moist habitats are their favorite foraging areas in winter and during migration. Not on Currituck Co listing	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S2B/S3N	III	W3	SUB, S4N	Bird	Saltmarsh Sparrow	*Ammodramus caudacutus*	NSA	NC - Tidewater. Winters in coastal VA and NC.	Salt marshes where smooth cordgrass, saltmeadow grass, and blackgrass are bordered by cattail, read and marsh elder. During migration, sparrows found in a variety of habitats ranging from grassy marshes to agricultural fields. Not on Currituck Co listing.	yes
		S3S4B/S4N WL		SR	S2B,S5N	Bird	Savannah sparrow	*Passerculus sandwichensis*	NSA (N)	Common during winter, nonbreeding	Open fields, meadows, salt marshes, prairies, dunes, shores. Over most of range, found in open meadows, pastures, edges of marshes, alfalfa fields, pastures; also tundra in summer, shores and weedy vacant lots in winter. Northeastern "Ipswich" Savannah Sparrow lives on grassy coastal dunes; southwestern "Belding's" and "Large-billed" races inhabit salt marshes.	Yes
		S1B/S2N		W3	SUB, S3N	Bird	Short-eared Owl	*Asio flammeus*	NSA	Winter - uncommon. Tidewater and Coastal Plain. Winters from New England south to Florida and west to mid to southern California	Coastal marshes, grasslands and open areas, where they perch in low trees or on the ground.	yes
		S2B/S3N	II	SC	S2S3B,S3N	Bird	Snowy egret	*Egretta thula*	NSA	Abundant transient and summer resident (30 March-10 October) on coast, uncommon transient inland; usually uncommon winter resident on coast. This species is believed to breed approximately between 20 May and 1 July	Snowy egrets occur in fresh, brackish, and saltwater areas preferring sheltered areas such as salt marshes, rice fields and shallow coastal bays. Nests in shrubs and trees on islands, lake margins, or in swamps; usually with other waders and usually near tidal waters. Nests will also be located in cedar swamps, willow and other bottomwood ponds, and mangrove islands. This species forages in shallow water of ponds, lakes, marshes, bays, and other bodies of water. It has been shown to prefer fresh water to forage but will often be found in brackish and salt water	yes
		S1B		SR	S1B,S5N	Bird	Swainson's thrush	*Catharus ustulatus*	NSA (N)	Migratory and common during that time. Not a year-round resident as they breed into Canada, and winter in Central America.	Spruce forests and dense streamside woods; in migration, other woods. Breeds in far north and in mountains in coniferous forest with extensive leafy undergrowth; on Pacific Coast, also breeds in deciduous trees and thickets growing along streams. Occurs in many kinds of woodlands in migration. Winters in tropical forest.	Yes
		S2B	II		S3/S4B	Bird	Swainson's warbler	*Limnothlypis swainsonii*	NSA	Breeding resident in SE VA and the entire coastal plain of NC.	Rich, damp, deciduous floodplain and swamp forests; requires areas with deep shade from both canopy and understory cover (Meanley 1971, Bushman and Therres 1988). On the coastal plain, occurs in the shadiest parts of the forest, with dense upper canopy, lower canopy and shrubs, and little herbaceous cover. The shrub stratum is often nearly monospecific stands of giant cane (ARUNDINARIA GIGANTEA) in floodplain forest; sweet pepperbush or fetterbush in swamps at the northern end of range such as the Great Dismal Swamp in Virginia and Pocomoke Swamp in Maryland and Virginia and headwater swamps of the Atlantic Coastal Plain; or scrub palmetto in bottomlands.	Yes
		S2B/S3N		SC	S3B, S3N	Bird	Tricolored Heron	*Egretta tricolor*	NSA	NC - Tidewater. It breeds only coastally; it has never been found nesting in the state at sites away from brackish or salt waters. Not surprisingly, most post-breeding birds tend to stay along the coast, and thus it is a good find at inland lakes and ponds. Permanent resident along the coast, being migratory and thus more numerous in spring, late summer, and fall. In the Tidewater zone, generally rare at all seasons, and does not breed; very rare in winter. Farther inland, a rare post-breeding visitor, late Jun to early Sep; casual in spring.	Forests or thickets on maritime islands, salt and brackish waters, though it does occur with the others on fresh water pools and impoundments.	No
	ST	SHB	I			Bird	Upland Sandpiper	*Bartramia longicauda*	NSA	uncommon duirng migration	Native prairie and other dry grasslands, including airports and some croplands.	no
		S2B/S3N	IV	W3	S3B,S5N	Bird	Virginia Rail	*Rallus limicola*	NSA	NC - Tidewater [breeding season only] Typically only winters in lower Mid-Atlantic states; Permanent resident near the coast, with migratory movements; mostly a transient farther inland. Locally fairly common along the northern coast.	Brackish to nearly fresh marshes near coast; in lower elevations, mostly in freshwater marshlands with an adequate concentration of emergent vegetation (between 40 cm and 100 cm), such as cattails (Typha) and bulrush (Scirpus).	yes
		S1B?	I	E	S2	Bird	Wayne's black-throated green warbler	*Setophaga virens waynei syn Dendroica virens*	NSA	Breeds along the coast of VA and NC, migratory	associated with conifers across most of its breeding range, nesting in spruce, pine, fir, cedar, or cypress stands, depending on the location, from sea level to mountaintops. It also occurs in mixed and broadleaf forests in the southern parts of the breeding range. It shows no particular affinity for conifers or any other specific vegetation type during migration, when it can be found in virtually any vegetated habitat, even scrub and adjacent herbaceous growth and grasses.	Yes
		S1B		W2	S3B, S3N	Bird	White Ibis	*Eudocimus albus*	NSA	NC - Tidewater and Coastal Plain, [breeding sites only] Year-round resident along coastal NC and coastal SE VA, non-breeding farther inland.	Forests or thickets on maritime islands, freshwater marshes, coastal estuaries, mangroves, flooded pastures, mudflats, and swamps. They usually forage in shallow areas with less than 8 inches of water, but they also use lawns and parks	No
				W2	S3B	Bird	Willow flycatcher	*Empidonax traillii*	NSA	Breeding season or migration	wet thickets in open country, often along streams in broad valleys	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
	SE	S1B	I	SC	S2B	Bird	Wilson's Plover	*Charadrius wilsonia*	NSA	It is an uncommon summer resident (25 Apr - 5 Sep) on the Eastern Shore, rare transient and summer visitor in the lower Chesapeake Bay and coast south of Cape Henry	Ocean beaches, lagoons, and salt flats.	no
		S2B/S4N		W2,W5	S3B,S5N	Bird	Winter wren	*Troglodytes hiemalis*	NSA (N)	nonbreeding - winter	Woodland underbrush; conifer forests (summer). Breeds mostly in moist coniferous forest with an understory of dense thickets, often close to water. Winters in very dense low growth in woods, especially along streambanks or among tangles, brushpiles, and fallen logs.	Possible
				W5	S3B	Bird	Worm-eating Warbler - Coastal Plain Population	*Helmitheros vermivorum*	NSA	NC - Coastal Plain, [breeding season only] Breeds along SE VA and NC coastline.	Nonriverine wet hardwoods, pocosins. Large tracts of deciduous and mixed forest overlap with moderate to steep slopes and patches of dense understory shrubs, although breeding populations are also found in low-elevation, coastal forests.	Yes
		S1B				Bird	Yellow-bellied flycatcher	*Empidonax flaviventris*	NSA	Uncommon winter resident, may see during migration. More towards the western parts of VA.	Woods; in summer, boreal forests, muskegs, bogs. Breeds in wet northern forest, especially in spruce bogs with ground cover of sphagnum moss, also in tamarack-white cedar swamps, and in willow-alder thickets along streams in dense coniferous forest. In winter, lives in undergrowth of tropical forest.	Yes
		S1B/S4N		SR	S2S3B,S5N	Bird	Yellow-bellied sapsucker	*Sphyrapicus varius*	NSA (N)	Common winter, nonbreeding	Woodlands, aspen groves; in winter, also orchards, other trees. In summer mostly in mixed coniferous and deciduous woods, especially around aspens. May be found in any kind of woods or even dry brush in migration. Winters mostly in deciduous trees.	Yes
		S2S3B/S3N	II	SR	S2B	Bird	Yellow-crowned Night-heron	*Nyctanassa violacea*	NSA	Common breeding in SE VA and NE NC.	Cypress swamps, mangroves, bayous, streams. Commonly occurs in shallow tidal waters, also along lowland rivers, where trees or other heavy cover nearby. Seldom in open marshes. Nests in mangrove or cypress swamps, riverside groves, thickets near water. Sometimes nests in trees within suburbs or cities.	yes
		S3	IV	SR	S3	Fish	Banded sunfish	*Enneacanthus obesus*	NSA	Distribution in VA: James, York, and Chowan drainages and the Dismal Swamp ·Occurs only in the USA in Atlantic and Gulf Slope drainages from southern New Hampshire to Perdido River in Florida, and south to central Florida.	Inhabits heavily vegetated lakes, ponds, sluggish sand or mud-bottomed pools and backwaters of creeks and small to large rivers. Not identified in past fish surveys	Yes
		S2	IV			Fish	Lake chubsucker	*Erimyzon sucetta*	NSA	Atlantic Slope from southern Virginia to southern Florida	Freshwater. Occurs in lakes, swamps, ponds, sloughs and impoundments over silt, sand or debris. Rarely found in streams. Habitat includes ponds, lakes, oxbows, sloughs, swamps, impoundments, quiet pools of creeks and small rivers, and similar waters of little or no flow that are clear and have bottoms of sand or silt mixed with organic debris; aquatic vegetation usually is present. It is intolerant of increased turbidity and siltation, which are responsible for the loss of several populations.	Possible
T(S/A)				T	S3	Herp	American alligator	*Alligator mississippiensis*	NSA	North Carolina south to Florida. BEHAVIOR: generally active when temperatures are warm from early spring through early fall. During winter they burrow into embankments, use dens created by trees along river banks or submerge into 'gator' holes for the winter.	bay lakes, rivers, creeks, marshes, swamps and ponds, with local populations distributed in patches along the entire coast.	Possible
				NC SC	S3	Herp	Carolina Watersnake	*Nerodia sipedon williamengelsi*	NSA	NC - Tidewater	Salt or brackish marshes. Found on the North Carolina Outer Banks and along the mainland perimeter of the Pamlico Sound and associated estuaries.	No
		S3 / WL	III			Herp	Carpenter frog	*Lithobates virgatipes (Rana viirgatipes)*	NSA	Large populations have been located in Seashore State Park Virginia Beach, Chesapeake, Sussex and Caroline counties. Common in NC. VA: caroline, Hanover, Sussex, Chesapeake, Suffolk, Virginia Beach.	It occupies habitats with still water and an abundance of aquatic or emergent vegetation. This species has been observed in cypress ponds, interdunal swales, tupelo swamps, acid swamps, and canals and is associated with sphagnum mats and other vegetation in coffee-colored waters of pine savanna bogs or ponds. This species is very closely associated with water and is rarely found on land.	yes
		S3 / WL	IV	W3	S3	Herp	Greater siren	*Siren lacertina*	NSA	Atlantic and Gulf Coastal Plains from Virginia south through Florida and west to parts of eastern Alabama.	Found in shallow, muddy bottomed, ponds, swamps, and ditches. Shallow roadside ditches, under rocks in swift flowing streams, weedy ponds and pools, muddy swamps, and weed-choked and mud-bottomed lakes	yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S3 / WL	IV			Herp	Little grass frog	*Pseudacris ocularis*	NSA	Northern portion of its range is southeastern Virginia.	This species prefers grassy areas near bogs or ponds in pine savannas and pools or streams in hardwood forests and swamps. Breeding occurs in association with spring and summer rains. Eggs are laid singly on the bottom of shallow ponds and in vegetation. This species is most often found in moist grassy areas around ponds and cypress ponds. Breeding sites are largely restricted to flooded grassy areas including roadside ditches, logged areas, meadows, emergent shrub wetlands, flooded pastures.	yes
	ST	S1	II			Herp	Lizard, eastern glass	*Ophisaurus ventralis*	NSA	Coastal Plain of the southeastern United states from southeastern Virginia to southern Florida. Locally common in North Carolina.	Lays clutch in spring or summer. In Virginia, hatching has been observed in mid- to late August. Riparian, Grassland/herbaceous, Shrubland/chaparral, Woodland - Conifer, Woodland - Hardwood, Woodland - Mixed. damp grassy areas, maritime forests, open and scrubby woods (mesic hammock, pine flatwoods), vacant lots in coastal towns. can be found under debris in fields and vacant lots near ponds, marshes, and estuaries. It favors areas with sandy friable soils and abundant shelter on ground. Eggs are laid under or at base of grass clumps or under debris on ground.	yes
		S2B	II	SR	S3	Herp	Oak Toad	*Anaxyrus quercicus*	NSA	SE Virginia and NE NC	Much of the preferred habitat of this species has been altered. Natural stands of pine and pine-oak have been replaced with dense loblolly pine monoculture which seems to exclude this and other amphibian species.	yes
		S3 / WL	IV	SR	S3	Herp	Rainbow snake	*Farancia erytrogramma*	NSA	Coastal Plain of Va. The northern distributional limit of this species is in Charles Co., Maryland. This species is confined entirely to the N.A. Coastal Plain from Maryland south through peninsula Florida and eastern Louisiana.	These snakes are both aquatic and burrowers. They are exellent swimmers but usually prowl along stream or swamp bottoms. At times they burrow into muck or mud. They have been found in dry sand at depths of up to 10 feet. The young have been found beneath boards logs and other debris. Adults and juveniles are terrestrial for unknown periods of time and have been found in pine woods, mixed hardwood and pine woods, and open fields. Rainbow snakes are active on the surface during rains. Found in swamps, marshes (fresh and brackish), or slow moving streams and adjacent sandy soils generally under 100 feet in elevation. The habitat includes suitable muck and sand for burrowing and eels for food.	yes
	SE	S1	II	SC	S3	Herp	Rattlesnake, canebrake / timber	*Crotalus horridus*	NSA	Distributional data accumulated in the middle 1900's showed that this subspecies was restricted to southeastern Virginia. Most of those localities were in the lower York-James peninsula and in the southeastern corner east of the Dismal Swamp area.	Canebrakes occupy hardwood and mixed hardwood-pine forests, cane fields, and the ridges and glades of swampy areas. The prefered habitat is mature hardwood forests containing numerous logs and a layer of leaves and humus. They overwinter in the base of hollow trees or in stumps. Unique habitat associations include downed logs and bottomland hardwoods. They also occupy natural and anthropogenic open habitats adjacent to forests (e.g. clearcuts, agricultural fields) *11623*.	yes
	ST	S1S2	II	SR	S2?	Herp	Salamander, Mabee's	*Ambystoma mabeei*	NSA	Lower elevations of the Coastal Plain of the Carolinas and Virginia. NC: Bladen, Brunswick, Columbus, Hoke, Pender, Robeson, Sampson, Scotland. VA: Gloucester, Hampton, Isle of Wight, James City, Mathews, Southampton, Suffolk, Sussex, York. BEHAVIOR: Moves to breeding sites in fall and winter.	In Virginia, primary habitat includes fish-free ephemeral ponds or other waterbodies with significant amounts of surrounding hardwood or mixed forests. Adults and larvae have been observed depression ponds in the southeast corner of NWSY. Bog/fen, FORESTED WETLAND, Riparian, TEMPORARY POOL. Forest - Conifer, Forest - Hardwood, Forest - Mixed, Savanna, Woodland - Conifer, Woodland - Hardwood, Woodland - Mixed	Yes
		S3 / WL	IV			Herp	Salamander, many-lined	*Stereochilus marginatus*	NSA	Common and abundant in the Coastal Plain south of the James River.	Inhabits swamps and shallow cypress or gum ponds in savannahs. It is aquatic and in dry weather the adult hides under leaf litter, sphagnum mats, or rotten logs. They are most abundant in pools, slow streams, and swampy woods. They nest in logs near water, and prefer plant and stone laying sites. The female deposits the eggs on aquatic moss, twigs, or under the surface of submerged logs.	Possible
		S2S4	III		S3; W1,W5	Herp	Scarlet Kingsnake	*Lampropeltis elapsoides*	NSA	NC - Coastal Plain	Pine flatwoods, mesic pine-hardwood forests. Not on Currituck Co listing	Yes
		S3 / WL	II	SC	S3	Herp	Terrapin, northern diamond-backed	*Malaclemys terrapin terrapin*	NSA	Found in the Chesapeake Bay and ocean side of Eastern shore and southeast Virginia. Maybe found in coastal rivers as far as tidal influence. Activity season is April through October, and usually overwinter in the mud in channels and tidal flats.	This species breeds and lays eggs in the spring and summer. Females nest in the dunes from May through July. It is mostly on the ocean side of the eastern shore. They overwinter in the mud in channels and tidal flats. Shallow tidal creeks and tidal mud flats are the most important feeding areas for terrapins. Nests are typically built in sand above the high tide line or sometimes in other fine soils.	yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
	ST	S2	II			Herp	Treefrog, barking	*Hyla gratiosa*	NSA	Coastal Plain and some upland areas from North Carolina to southern Florida, disjunct populations occur in Delaware and adjacent Maryland, southwestern Kentucky and adjacent Tennessee, and in southeastern Virginia.	FORESTED WETLAND, Riparian, SCRUB-SHRUB WETLAND, TEMPORARY POOL. Forest - Conifer, Forest - Hardwood, Forest - Mixed, Savanna, Woodland - Conifer, Woodland - Hardwood, Woodland - Mixed. Benthic, Burrowing in or using soil, Fallen log/debris, Standing snag/hollow tree. Sandy areas in pine savannas and in low wet woods and swamps (e.g., willow oak-blackgum, cypress swamps). When inactive during cold or dry season, burrows under tree roots, vegetation, or in soil; otherwise mostly arboreal and thus dependent on trees near water.	yes
	CC		III			Herp	Turtle, spotted	*Clemmys guttata*	NSA	Distributed primarily east of the Blue Ridge Mountains, with the exception of certain parts of Augusta Co. VA	They are most active March through May and they are mainly diurnal during this time. They can be seen basking on logs, stumps and grass mats. They are not normally active past June. They spend much of their time in the water but a good deal of terrestrial activity occurs during the breeding season. They overwinter in the mud, or in muskrat burrows underwater. Preferred habitats of this species include shallow freshwater wetlands such as: vernal pools, sinkhole pools, ponds, ditches, flooded fields, streams, floodplains, bogs, marshy pastures, and forested wetlands. They may also occur in upper marshes of tidal creeks.	yes
	SE	S1	I	SR	S3	Herp	Turtle, eastern chicken	*Deirochelys reticularia reticularia*	NSA	Chicken turtles are known only from Seashore State Park, City of Virginia Beach. Also confirmed at Cape Henry, Va. One sighting in the Northwest River, City of Chesapeake, remains unconfirmed	shallow, still waters, particularly ephemeral and seasonal wetlands with abundant vegetation	yes
		S3 / WL		SR	S1S2	Invertebrate	Aaron's skipper	*Poanes aaroni*	NSA	Accomack, Essex, Henrico, King William, New Kent, Surry, Westmoreland, York, Chesapeake, Hampton, Norfolk, Poquoson, Portsmouth, Richmond, Suffolk, Virginia Beach. Currituck County south to the mainland of Hyde County North Carolina. Two broods; mid-May to mid-June (probably), and perhaps late August to early October	Primary habitat is brackish marshes, but the species moves well away from marshes to find suitable nectar sources. Thus, they can be seen in fields, wood margins, and marsh edges, as long as these habitats are within several hundred yards (?) of a brackish marsh. Some references say that smooth cordgrass (Spartina alterniflora) is the major foodplant, but Glassberg (1993) says that) may be a foodplant. The skipper nectars on many flowers in the marshes and adjacent fields. I have seen them nectaring on yellow thistle (Cirsium horridulum) in May; and on mistflower (Eupatorium coelestinum), camphorweed (Pluchea sp.), and various goldenrods (Solidago spp.) in September-October.	Yes
		S2S3		W3	S2S4	Invertebrate	Aralia Shoot Borer Moth	*Papaipema araliae*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Key habitat feature is a lot of Aralia spinosa over a substantial area. Habitats are generally forested, often swamps but sometimes more mesic.	Yes
		SH				Invertebrate	Black Dash	*Euphyes conspicua*	NSA	Giles County and the cities of Suffolk and Chesapeake, VA	In Bog/fens, and shrubby or partially wooded (red maple) wetland areas associated with *carex stricta* . Does not occur in deep shade.	yes
		SU		W3	S2S3	Invertebrate	Buchholz's Zale	*Zale sp. 3 nr. Buchholzi*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Longleaf Pine habitats. While Pond Pine (P. serotina) is also probably present at many of these sites -- associated with peatlands that usually closely adjoin Longleaf communities -- we do not have any records from Pond Pine Woodlands or other purely peatland habitats. Host - Probably stenophagous, feeding on a narrow range of hard pines. Wagner et al. (2011) report it feeding on Pitch Pine and Pond Pine in New Jersey but associated with Longleaf and Loblolly southward.	Yes
		S3 / WL				Invertebrate	Butterfly, creole pearly-eye	*Enodia creola*	NSA	North Carolina	Found in Coastal Plain bottomland forests near stands of cane (Arundinaria spp.). The butterflies do not nectar; they feed on sap, decaying fruit, mud or moist ground, etc.	yes
		S3 / WL				Invertebrate	Butterfly, great purple hairstreak	*Atlides halesus*	NSA	Montgomery, Chesapeake, Norfolk, Portsmouth, Radford, Suffolk, Virginia Beach.	In North Carolina, Great Purples are found throughout the state but far more common in the Coastal Plain. Feeds on American mistletoe, an evergreen parasitic subshrub, especially common in swamp forests, that usually grows high in mature hardwood trees.	yes
		S2	IV	W2	S3S4	Invertebrate	Butterfly, King's hairstreak	*Satyrium kingi*	NSA	Chesapeake, New Kent, Norfolk, Suffolk, Virginia Beach, Chesapeake. One brood with a very short flight season from early May to the end of June	Part of the conservation concern with this species surrounds the limited availability of its host plant, the Sweetleaf (Symplocos tinctoria). This plant can only live in the well-developed understory of stream-side forests.	Yes
		S3 / WL				Invertebrate	Butterfly, lace-winged road-skipper	*Amblyscirtes aesculapius*	NSA	Southampton, Chesapeake, Emporia, Franklin, Norfolk, Portsmouth, Suffolk, Virginia Beach. it occurs from southeast Virginia, south along Atlantic coastline to north Florida; thence, westward to eastern Texas and eastern Oklahoma.	The Lace-winged Roadside-Skipper prefers to live in moist areas with stands of giant cane (Arundinaria gigantea) growing nearby. These areas include moist deciduous woodlands, dirt roads that traverse swampy and boggy wetlands, wet areas along bottomland stream corridors, and moist areas along utility right-of-ways. Most often found where swampy wetlands occur.	yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		SH / WL	III	SR	S2	Invertebrate	Butterfly, little metal mark	*Calephelis virginiensis*	NSA	Chesapeake, Suffolk, Virginia Beach. Three broods in Virginia, from March through October. May be extirpated north of Craven CO, NC	The Little Metalmark prefers open areas with its host plants, usually pine flatwoods, savannas and roadsides. Yellow Thistle (Cirsium horridulum) was considered the sole host plant, but others have more recently been cited.	yes
		S3S4/WL			S3S4	Invertebrate	Carolina roadside skipper	Amblyscirtes carolina	NSA	Southeast Virginia south to South Carolina; west to northern Mississippi.	Near streams and swamps in wet woods. Three broods from April-September	yes
		S3S4 / WL		W2	S3S4	Invertebrate	Carolina Roadside-Skipper	*Amblyscirtes carolina*	NSA	NC - Coastal Plain. Closet record - Camden Co and Pasquotank, NC and Southhampton, Co. VA	Moist woods (mainly hardwoods) near cane; host plant -- cane (Arundinaria). Habitats are edges and openings in swamps and bottomlands, borders of pocosins, and canals or ditches near cane. It is usually associated with cane in hardwoods, as opposed to pinewoods.	Yes
		S1S3				Invertebrate	Combneck Assassin Bug	*Ctenotrachelus shermani*	NSA	City of Virginia Beach at the First Landing/Seashore State Park and also reported at the city of Cheasepeake at the Northwest River Park	Species not thought to inhabit soil litter biotopes (light trapping advised)	Possible
		S3 / WL				Invertebrate	Comet darner	*Anax longipes*	NSA	Statewid in VA and NC but uncommon, Coastal Plain. Closet records - Camden Co and Virginia Beach, VA	Temporary and semi-permanent grassy ponds and pools. They lay their eggs among submerged vegetation. The comet darner is often seen flying back and forth over a pond.	Yes
				W3	SU	Invertebrate	Cypress Pinion	*Lithophane abita*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Cypress swamp	Possible
				W3	S3?	Invertebrate	Dubious Tiger Moth	*Spilosoma dubia*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Acidic wetlands. Longleaf Pine habitats, primarily savannas and flatwoods but with a significant number from dry-to-xeric sandhills. It also makes at least some use of pure peatlands and maritime forests. Probably polyphagous, feeding on many species of herbaceous and woody plants (Wagner, 2005); Forbes (1960) stated that one did well on Plantain (Plantago sp.). The habitat restrictions -- in North Carolina at least -- suggest there may be some association with heaths or hollies, which are among the few plants that are found in Longleaf Pine communities, peatlands, and maritime forests.	Yes
	SH			SR	S2	Invertebrate	Dusky Roadside Skipper	*Amblyscirtes alternata*	NSA	Chesapeake and Suffolk cities in Viriginia	The larval foodplant is the grass Gymnopogon ambiguus and possibly other grasses. Found in open grassy moist to dry, pine woods, including moist flatwoods, savannas, and sandhill ridges	Yes
		--		W3	S2S3	Invertebrate	Frosted Tan Wave Moth	*Scopula cacuminaria*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Sandhills and other dry forests. Lettuce, dandelion and probably other Asteraceae	No
		SU		W3	SU	Invertebrate	Gray-banded Zale	*Zale sp. 2 nr. squamularis*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Wetter or more mesic sites. In the Coastal Plain, we have records from Pond Pine Woodlands and other peatland habitats where Pond Pine is present; blackwater floodplain forests and Non-riverine Swamp Forests; and Wet Longleaf Pine Savannas and Flatwoods (but none from more xeric sandhill habitats). Host - Stenophagous, apparently feeding on just a few species of pine. Wagner et al. (2011) specifically mention Pitch Pine (Pinus rigida), Pond Pine (Pinus serotina), and state that perhaps other species of hard pine.	Yes
			III	SR	S3	Invertebrate	Hessel's hairstreak	*Callophrys hesseli*	NSA	Southern Maine south along the Atlantic coastal plain to northern Florida on the Gulf Coast.	Caterpillar Hosts: Atlantic white-cedar (Chamaecyparis thyoides) in the family Cupressaceae. Adult Food: Nectar from flowers including swamp milkweed, shadbush, sand myrtle, sweet pepperbush, highbush blueberry, buttonbush, and dogbane. Habitat: Coastal plains swamps and stream banks, associated barrens.	Yes
		--		W3	S2S3	Invertebrate	Live Oak Tussock Moth	*Orgyia detrita*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Occurs in riparian forests where Bald Cypress may be the host, but is particularly abundant in peatland habitats, including Pond Pine Woodlands, High Pocosins, and stands of Peatland Atlantic White Cedar, where neither oaks nor cypress occur.	Yes
				W3	S3	Invertebrate	Louisiana Owlet Moth	*Macrochilo louisiana*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Sedgy wetlands, wet meadows, fens, wetland edges; adults are nocturnal and come to light.	Yes
		--		W3	S1S2	Invertebrate	Masked Parahypenodes Moth	*Parahypenodes quadralis*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Moist and sandy places; adults are nocturnal and come to light and bait. The host is unknown.	No
				W3	SU	Invertebrate	Modest Quaker Moth	*Ulolonche modesta*	NSA	NC - Coastal Plain. Closest record - Dare Co.	No data	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
FP		SU / WL	III			Invertebrate	Monarch (eastern population)	*Danaus plexippus plexippus*	NSA	During the spring and summer breeding season, D. p. plexippus disperses throughout the United States and southern Canada when successive generations migrate and expand north with the availability of suitable milkweeds as summer progresses.	Milkweed and other nectar producing plants. Monarchs lay their eggs only on plants in the Apocynaceae (dogbane family) in the milkweed subfamily Asclepiadoideae, genus Asclepias (L.) and related genera. The eastern range of D. p. plexippus during breeding is mainly coincident with the distribution of the most abundant and widely dispersed milkweeds. Common milkweed inhabits places that have experienced soil disturbance, such as some cultivated fields, crop fields that have been abandoned or are fallow, pastures, logged land, riparian zones, suburban and urban vacant lots and waste areas, and along trails, railroad tracks, and roadways. Monarchs in northern states primarily roost in conifers and maples, while monarchs in the south commonly roost in pecan and oak trees.	yes
			III	SR	S2	Invertebrate	Mottled duskywing	*Erynnis martialis*	NSA	Massachusetts and southern Ontario west across the Great Lake states to Minnesota; south to South Carolina, the Gulf Coast, and central Texas.	Caterpillar Hosts: Wild lilacs including New Jersey tea (Ceanothus americanus) and redroot (Ceanothus herbaceus var. pubescens) in the buckthorn family (Rhamnaceae). Adult Food: Nectar from flowers of bush houstonia, gromwell, hoary vervain, and other plants. Habitat: Open woodland, barrens, prairie hills, open brushy fields, chaparral.	No
		--		W3	SU	Invertebrate	Noctuid Moth	*Rivula stepheni*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Mesic mixed pine and hardwood forests near streams. Host plant - various grasses and sedges.	Yes
		S3 / WL		SR	S2S3	Invertebrate	Northern Oak Hairstreak	*Satyrium favonius ontario*	NSA	NC - Tidewater and Coastal Plain	This species is most numerous in or near stands of evergreen oaks, such as live oaks (Quercus virginiana) or laurel oaks (Q. laurifolia) in maritime "sandhill" scrub forests. Farther inland, it is found in dry forests dominated by deciduous oak species. The foodplants are oaks; live oak is probably favored over others in NC. Nectar plants are typical for most hairstreaks, though chinquapin (Castanea pumila) has been reported as a favorite. Along the southern coast, sparkleberry (Vaccinium arboreum) is the chief nectar source.	Yes
		SH	II	W3	S2S3	Invertebrate	Precious Underwing	*Catocala pretiosa*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Forests with shadbush or chokeberry. Restricted to mature swamp forests, forest edges, bog edges, coastal thickets and other habitats with thickets or very large bushes of foodplant exceeding 1.5 meters in height, usually taller. The caterpillar feeds Amelanchier arborea (Serviceberry) and Malus angusticfolia (Crabapple).	No
		S2S3		W3	S3?	Invertebrate	Relict Cane Moth	*Acrapex relicta*	NSA	NC - Coastal Plain. Closest record - Dare and Northhampton Co. North Carolina, and the Great Dismal Swamp, near the North Carolina border in southeastern Virginia.	The Cane-boring Moth is found only in patches of cane, or occasionally exotic bamboo stands. It is suspected to be a grass feeder.	Yes
		S3 / WL		SR	S3	Invertebrate	Reversed roadside-skipper	*Amblyscirtes reversa*	NSA	Isle of Wight, Surry, Chesapeake, Norfolk, Portsmouth, Suffolk, Virginia Beach. Spotty distribution from southeast Virginia south to northern Georgia; also in southern Mississippi and southern Illinois. This species has three broods from April to September	The foodplant is cane, perhaps exclusively. Found in the sandhills and coastal plain in open pine woods, pine savannas, powerlines. Swampy or wet woods near slow streams, with cane undergrowth.	yes
		S3 / WL	IV	W3	S3?	Invertebrate	Robust Baskettail	*Epitheca spinosa*	NSA	NC - Coastal Plain	Still waters of swamps and ponds/pools in or near forests; probably scarce in open water of lakes and ponds.	Yes
		S1S3	IV	W3	S2S3	Invertebrate	Silver Fork Cane Moth	*Argillophora furcilla*	NSA	NC - Coastal Plain. Closest record - Dare and Northhampton Co.	Substantial cane is present, such as in conifer, hardwood, mixed forests and woodlands, and savanna. Canes are the food plant for this species.	Yes
		S2 / WL	III	SR	S1S2	Invertebrate	Skipper, Duke's (or scarce swamp	*Euphyes dukesi*	NSA	Chesapeake, Suffolk, Virginia Beach, Chesapeake. 2 broods from June to September, BEHAVIOR: adults fly in June and in August-September	Ecotones of brackish or fresh marshes with swamps; host plants -- sedges (Carex) (NCNHP 2018). Wet, marshy areas. They are found in swamps, open marshes, and wet roadside ditches, while expansive estuarine or coastal marshes are preferred. Dukes' Skippers prefer broad-leaved sedges such as Shoreline Sedge (Carex hyalinolepis). These plants are found in the favored swamp-like habitats of Dukes' Skipper. The species nectars on pickerelweed, blue mistflower (Eupatorium coelestinum), tall verbenas, and others.	yes
				W3	S3S4	Invertebrate	Southern Pine Looper	*Caripeta aretaria*	NSA	NC - Coastal Plain. Closest record - Camden Co.	Wet-to-mesic habitats in the Coastal Plain, including Pond Pine Woodlands and other peatlands; wet pine savannas; and bottomland forests. Pond Pine appears to be the most likely host plant, and is the only species of pine occurring in some of the large expanses of peatlands where the moth has been recorded. Some use of Loblolly may also be made, since the moth has been recorded in some bottomland stands where that species is the only pine present.	Yes

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S2S4	IV			Invertebrate	Stripe-winged Baskettail (dragonfly)	*Epitheca costalis*	NSA	Fairfax, Suffolk, Virginia Beach, Charles City, Chesterfield. BEHAVIOR: flight season for the Stripe-winged Baskettail in Virginia ranges from 21 May - 2 June.	Prefers ponds, lakes, and slow streams.	yes
		S2	IV	W3	S3?: W3	Invertebrate	Treetop Emerald	*Somatochlora provocans*	NSA	NC - Coastal Plain. Closest record - Chowan Co. Strictly in the western and central Coastal Plain,	Small forested seeps and pools, perhaps very small streams	Yes
		S2	IV			Invertebrate	Two-striped Forceptail (dragonfly)	*Aphylla williamsoni*	NSA	This is the best known of the three species in the region. It regularly forages in tree tops. Males perch near the water on vegetation, occasionally making patrols along the shoreline. Females lay eggs late in the evening.	Ponds, lakes, borrow pits and sluggish streams	yes
		S1S3 / WL		W3	S3?	Invertebrate	Watson's Arugisa Moth	*Arugisa latiorella*	NSA	NC - Coastal Plain. Closest record - Dare Co.	Sedgy glades	Yes
		--		NC SR	S1?	Invertebrate	Weedpatch Ambersnail	*Catinella pugilator*	NSA	NC - Coastal Plain	Marsh ecotones, near the margins of brackish or freshwater marshes in weedy places	Yes
		S3 / WL				Mammal	Dismal Swamp short-tailed shrew	*Blarina brevicauda telmalestes*	NSA	It is known only in the dismal swamp and it does not stray far from this swampy habitat. BEHAVIOR: Home ranges varied from 280-637 square meters, and were smaller as prey density increased. They are active mostly in hours of darkness and make brief foraging trips, totalling about 94 minutes per day.	It is probably more abundant than southern short-tailed shrews (Blarina carolinensis) in hardwood forests and less abundant in other habitat types. Preference for dark, damp localities. Old logs, leaf- covered forest floors, and mossy banks provide shelter and food	yes
		S3		SR	S2S3	Mammal	Lemming, southern bog	*Synaptomys cooperi helaletes*	NSA	VA Beach, Chesapeake, Suffolk, not Currituck Co	low pocosins, early succession wetlands	yes
					S3S4; W3	Mammal	Long-tailed Weasel	*Mustela frenata*	NSA	NC - Coastal Plain. Breeding - April - May (July - August).	Forests, brushy areas. Crop fields to small wooded areas to suburban areas. They are not found in deserts or thick, dense forests. Their burrows and nests are in hollow logs, rock piles, and under barns. Near wetsites such as swamps, marshes and water courses, especially where brushy thickets reach the waterline (Whitaker and Hamilton 1998). Other haunts include most woodland habitats, sparsely wooded second-growth forests, brushy areas, stream banks, and the borders of forests and fields (Lowman 1975, Lee et al. 1982, Webster et al. 1985, Whitaker and Hamilton 1998). Nests can be located in hollow trees or stumps, downed rotting logs, underground burrows, stone walls and mole runs (Lowman 1975, Webster et al. 1985).	Yes
		S3 / WL	IV			Mammal	Marsh Rabbit	*Sylvilagus palustris*	NSA	Bath, Greensville, Isle of Wight, Powhatan, Southampton, Surry, Sussex, Chesapeake, Emporia, Franklin, Hampton, Norfolk, Portsmouth, Suffolk, Virginia Beach. BEHAVIOR: This species is primarily nocturnal being most active between 1900 and 0400 hours.	They do not live in burrows but instead build a nest which is about 36 cm across and about 20 cm deep. They are constructed from soft grasses and rabbit fur and have a floor about 2.5 cm thick. The nest is normally placed among burnt sedges approximately 9 meters from the edge of the water. Favors areas of undisturbed marsh.	yes
		S3 / WL	IV			Mammal	Mouse, cotton	*Peromyscus gossypinus*	NSA	In Virginia, the cotton mouse is found in southeastern corner in the Dismal Swamp region. BEHAVIOR: The breeding season is from March-Spetember. It is strongly nocturnal and is active all year round.	Nest in trees or under logs. It will disperse to dry sites during wet seasons. They will also nest in and under logs, in stumps and under brush piles. Nest materials include plant fibers e.g., cotton. They are most often associated with wet bottomland forest areas.	yes
		S4 / WL				Mammal	Northern river otter	*Lontra canadensis*	NSA	Range throughout Virginia and North Carolina. BEHAVIOR: They are active any hour (peak feeding dawn-midmorning, evening) and season.	Semi-aquatic or almost entirely aquatic and they are most abundant in food-rich coastal areas and the lower parts of streams and rivers. They use drift piles and logjams, and are found among tree roots. They occasionally use duck blinds and abandoned boat houses. A litter of 1-6 kits is born from March to April in natal dens (overhanging banks, tree knots and abandoned stream bank burrows).	yes
		S1? / WL	III	SC	S1	Mammal	Pungo mouse	*Peromyscus leucopus easti*	NSA	Probably occurs from the region of Cape Henry, Virginia south along the barrier beach to Oregon Inlet, North Carolina BEHAVIOR: breeding season is probably from March to November with peaks in the spring and fall.	They build nests of leaves, grass, shredded bark, and moss on the ground and in trees. They prefer nests above ground.	yes
		S3 / WL				Mammal	Shrew, Dismal Swamp southeastern	*Sorex longirostris fisheri*	NSA	As of April 1, 2016, this species has been completely delisted/completely removed from the state/DGIF regulations, which previously listed this species as State Threatened. http://vafwis.org/fwis/booklet.html?Menu=_.Status&bova=050008&version=17259	Habitat generalist. Found in habitats of Great Dismal Swamp that are not permanently flooded. Highest densities occur in areas with ground litter and moist organic soils in early to mid-successional forest, old clearcuts, and areas with thick undergrowth, particularly canebrake thickets. Low densities have been noted in mature forests, though these may be important during periods of drought or fire. Habitats used by this subspecies do not appear to be discrete units, but seem to consist of a diversity of regenerative stages of vegetative growth. Recent studies indicate use of a broad range of habitats (USFWS 1998). Nests may be placed under logs or hollow stumps.	yes
				SC	S2	Mammal	Star-nosed Mole - Coastal Plain population	*Condylura cristata pop. 1*	NSA	Currituck County, Historical	moist meadows, bogs, swamps, bottomlands	yes
				W7	S2?	Plant	American Witch Grass	*Dichanthelium columbianum*	NSA	Currituck County	thin woods and open ground, usually in sandy soil	Possible

		S2				Plant	Slender Marsh Pink	*Sabatia campanulata*	NSA	York Co, VA Beach, Chesapeake	Bogs, seeps, fens, depression ponds, and wet power-line clearings.	yes
		S1		W7	S1?	Plant	Slender sand sedge	*Cyperus odoratus var. engelmannii*	NSA	VA Beach	Interdune pond and impoundment shores	yes
				W1	S3	Plant	Southern twayblade	*Listera australis*	NSA	Currituck Co.	moist hardwood forest, swamps, wet woods with acidic soils	yes
		S1S2				Plant	Spanish moss	*Tillandsia usneoides*	NSA	VA Beach, Chesapeake, York Co (!) - locally common at a few sites in Virginia Beach	Alluvial, tidal, and maritime swamp forests, wet flatwoods, maritime upland forests, and on Baldcypresses in Lake Drummond	yes
		S2				Plant	Ten-angled pipewort	*Eriocaulon decangulare var. decangulare*	NSA	Chesapeake	Bogs, boggy sphagnous clearings, sea-level fens, mafic fens and seeps; a number of somewhat anomalous populations occur in low-statured freshwater to oligohaline wind-tidal marshes	no
				SC-H	SH	Plant	Toothed flatsedge	*Cyperus dentatus*	NSA	Currituck County, Historical	marshes	no
		S1S2		W6	S3	Plant	Tuberous grass pink	*Calopogon tuberosus*	NSA	Virginia Beach, Chesapeake	Bogs, fens, and seeps on both basic and acidic substrates in the mountains; pocosin openings and boggy powerline clearings in se. Virginia. Rare in mountains, s. Coastal Plain, and outer s. Piedmont.	Possible
		S1		NC SE	S1	Plant	Twisted leaf goldenrod	*Solidago tortifolia*	NSA	Chesapeake, Virginia Beach,	Dry, open oak and pine forests, clearings, and roadsides. Rare; known historically from Chesapeake and Virginia Beach cities in far se. Virginia and Northampton County on the Eastern Shore; known to be extant at only two sites.	yes
				W7	S2	Plant	Upland Red Bay	*Persea borbonia*	NSA	Currituck County	sandy upland soils in maritime forests	no
		S2		NC SE		Plant	Virginia Least Trillium	*Trillium pusillum var. virginianum*	NSA	York Co, James City, Hampton, Norfolk, VA Beach, Chesapeake, not in Currituck Co.	Most frequent on hummocks in braided seepage along small streams in southeastern Virginia, where the canopy oftens includes Liriodendron, Magnolia virginiana, and Acer rubrum; also in low mesic forests, wet flatwoods, bottomland forests, alluvial swamp hummocks, and non-riverine swamp "islands" of this region.	yes
		S1		NC SE	S1	Plant	Viviparous Spikerush	*Eleocharis vivipara*	NSA	Virginia Beach, Nat Heritage documented at Oceana Ponds 2001. Not mentioned in Currituck Co.	Sandy or peaty interdune ponds and borrow pit ponds; usually submerged	yes
		S2		NC SE	S2	Plant	Walter's paspalum	*Paspalum dissectum*	NSA	VA beach, Chesapeake, not in Currituck Co	Seasonally exposed sandy or gravelly river shores and bars, interdune swales and ponds, impoundment edges, depressions and ruts in bottomland or upland clearings	yes
		S2		NC SR-P	S2	Plant	White beaksedge	*Rhynchospora alba*	NSA	VA Beach, Currituck Co.	fens, bogs, pocosin openings, limesink ponds	Possible
		S2				Plant	White-top fleabane	*Erigeron vernus*	NSA	Virginian SE Coastal Plain and Eastern Shore.	Sea-level fens, interdune swales, seasonally wet maritime forests, boggy clearings, and ditches	Possible

Federal Status	VA Status*	VA Rank	VA Tier	NC Status	NC Rank	Species Type	Common Name	*Scientific Name*	NSA	Occurrence	Habitat Association	Possible Habitat
		S1				Plant	Wild olive	*Cartrema american syn. Osmanthus americanus var. americanus*	NSA	Virginia Beach, Chesapeake	Rich woods; swamps with rich, moist, well-drained soil.	yes
		S1		SR-P	S2	Plant	Winged seedbox	*Ludwigia alata*	NSA	Known only from wind-tidal marshes of the Embayed Region of se. Virginia (Back Bay, North Landing River, Northwest River)-Chesapeake and Virginia Beach; frequent in these limited habitats. Currituck Co in NC.	A broad spectrum of wetland habitats, but mostly near-coastal types, including wet to ponded dune swales, brackish marshes, fresh tidal marshes (including "wind tide marshes" in Virginia), wet pockets in maritime forests, pond cypress depressons, shores of freshwater lakes, margins of spring-fed rivers, margins of blackwater rivers, and wet hammock woodlands on oolite. Ludwigia alata also occurs in roadside ditches and borrow pits.	yes
		S1		SR-P	S2	Plant	Winged Seedbox	*Ludwigia alata*	NSA	Embayed Region of se. Virginia (Back Bay, North Landing River, Northwest River)	Freshwater to oligohaline tidal marshes. Rare, Coastal Plain; wind-tidal marshes	no

USFWS ESA Staus
FE=Federal Endangered
FT=Federal Threatened
FP=Federal Proposed
FC=Federal Candidate

Virginia Status Status
SE=State Endangered
ST=State Threatened
CC=Collection Concern

From Roble 2016 Natural Heritage Resources of Virginia
Virginia state rank definitions are as follows:
S1 = Critically Imperiled - At very high risk of extirpation from the state due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
S2 = Imperiled - At high risk of extirpation from the state due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.
S3 = Vulnerable - At moderate risk of extirpation from the state due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.
S4 = Apparently Secure - Uncommon but not rare; some cause for long-term concern due to declines or other factors.
S5 = Secure – Common, widespread and abundant.
SH = Possibly Extirpated - Known only from historical occurrences but still some hope of rediscovery.
SU = Unrankable - Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.
S_? = Inexact Numeric Rank - Denotes inexact numeric rank (e.g., S3?).
S_B = Breeding status of an animal (primarily used for birds) in Virginia; these species typically inhabit Virginia only during the breeding season.
S_B/S_N = Breeding and nonbreeding status of an animal (primarily used for birds) in Virginia, when they differ.
WL = Watch List - Decidedly uncommon in Virginia, but not scarce enough to merit inclusion on the Rare Vascular Plant List.

Virginia WAP Tiers:
Tier I - Critical Conservation Need
Tier II - Very High Conservation Need
Tier III - High Conservation Need
Tier IV - Moderate Conservation Need

North Carolina Status
E=State Endangered
T=State Threatened
SR=NC Significantly rare
SC=Any species of wild animal native or once-native to North Carolina which is determined by the NCWRC to require monitoring but which may be taken under regulations adopted under the provisions of the Article. (G.S.113-25]
S_?=Uncertain, denotes inexact or uncertain numeric rank
SR-T=The species is rare throughout its range
SR-D=The species is disjunct to North Carolina from a main range in a different part of the country or world.
SR-P=The species is at the periphery of its range in North Carolina
SR-O=The range of the species is sporadic or cannot be described by the other Significantly Rare categories
SR-H=Any species or higher taxon of plant that occurred in North Carolina at one time, but for which all known populations are currently considered to be either historical or extirpated." "(NCAC 02 NCAC 48F .0401).

NC Watch Categories
W1 Rare but Relatively Secure
W2 Rare to uncommon in North Carolina, but are not necessarily considered to be declining or otherwise in trouble
W3 Poorly Known in NC
W4 Known to occur in North Carolina which current data suggest are not native to North Carolina
W5 Declined sharply in North Carolina, but which do not appear yet to warrant site-specific monitoring
W6 Rare in one region of North Carolina, while uncommon to abundant in another
W7 Plants with inadequate information about their distribution and rarity in North Carolina

NC Ranks
S1=Critically imperiled in North Carolina due to extreme rarity or some factor(s) making it especially vulnerable to extirpation (local extinction) from the state.
S2=Imperiled in North Carolina due to rarity or some factor(s) making it very vulnerable to extirpation from the state.
S3=Vulnerable to extinction in North Carolina either because rare or uncommon, or found only in a restricted range (even if abundant at some locations), or due to other factors making it vulnerable to extirpation
S4=Apparently secure and widespread in North Carolina
S5=Secure, common, widespread, and abundant
SH=Occurred in North Carolina historically
SU=Currently cannot be assigned a rank in North Carolina due to lack of information
S_N=Rank of non-breeding population
S_B=Rank of breeding population
S_?=Indicates an inexact or uncertain numeric rank

NATURAL HERITAGE RESOURCES
OF VIRGINIA: RARE ANIMALS

FEBRUARY 2016

INTRODUCTION

The Virginia Department of Conservation and Recreation's Division of Natural Heritage (DCR-DNH) was established in 1986 to protect Virginia's biological diversity. DCR-DNH is the state's first comprehensive program for conservation of our natural heritage, and includes an intensive statewide biological inventory, field surveys, electronic and manual database management, environmental review capabilities, and natural area protection and stewardship. Through its actions the Division identifies Natural Heritage Resources that are in need of conservation attention while creating an efficient means of evaluating the impacts of balanced economic growth. Natural Heritage Resources are defined in the Virginia Natural Area Preserves Act of 1989 (Section 10.1-209 through 217, Code of Virginia), as the habitat of rare, threatened, and endangered plant and animal species; exemplary natural communities, habitats, and ecosystems; and other natural features of the Commonwealth.

To achieve this protection, DCR-DNH maintains lists of the most significant elements of our natural diversity. These lists focus the Division's inventory on the Natural Heritage Resources most likely to be lost without conservation action in the near future. Most importantly, these lists are useful not only for DCR-DNH, but can be used by other agencies, organizations, and individuals to assist in the determination of actions in protection and development decision-making. In formulating these lists, the Division uses information from previous studies, museum records, observations and opinions of experts, DCR-DNH staff scientists, and field inventories.

The first list included in this report is the Rare Animal List. This list contains information on the legal and biological status of Virginia's rarest known native animals, including vertebrates, insects, and selected other invertebrate groups, **793** in total (189 vertebrates, 604 invertebrates). This list includes those species that are believed to be sufficiently rare or threatened to merit an inventory of their status and locations. Certain marine species that are listed as federally endangered or threatened are only included in the appendices. Only those species that use discrete habitat patches or can directly benefit from habitat protection are included in the main taxonomic lists.

The second list included in this report is the Animal Watchlist. This list contains information on the legal and biological status of **347** additional taxa (74 vertebrates, 273 invertebrates) that are decidedly uncommon in Virginia but not scarce enough to merit inclusion on the Rare Animal List. Species on this list are monitored to determine general population trends, and if a particular species is found to be rare or threatened, it is placed on the Rare Animal List. Some species included on the Animal Watchlist were formerly on the Rare Animal List but have been determined to be more common than previously believed. Other species on the Watchlist are declining and may warrant placement on the Rare Animal List in the future if their populations continue to decline.

The third list included in this report is the Animal Review List (Taxa of Uncertain Status). Many of these species lack numerical ranks, indicating that they are poorly known from a distributional and/or taxonomic standpoint. Although some of these species may prove to be conservation targets, more field and museum data are needed to assess their degree of rarity in Virginia and/or taxonomic status. There are **273** species (5 vertebrates, 268 invertebrates) in this category.

Natural Heritage Resource lists are necessarily dynamic, with updates occurring as new data become available. Such revisions assure the most current knowledge of the status of Virginia's animals. Animals are added to the list when it is determined that they have become rare or threatened to such an extent that their continued existence in the Commonwealth is in jeopardy. Animals are deleted from the list when additional field surveys or other new data indicate they are more common than previously believed and do not warrant priority conservation efforts.

All animals that are officially protected by federal or state endangered species acts are included in this list (except as noted above). Federally listed species are protected by the Endangered Species Act of 1973, as amended. The U.S. Department of the Interior's Fish and Wildlife Service administers the Act, listing and protecting federally endangered and threatened species. The Virginia Department of Game and Inland Fisheries has the regulatory responsibility for the listing and protection of the state's endangered and threatened animals (excluding the Class Insecta) under the Virginia Endangered Species Act (Section 29.1-564 through 570, Code of Virginia). The Office of Plant Protection within the Virginia Department of Agriculture and Consumer Services has regulatory

responsibility for the listing and protection of the state's insects (and plants) under the Virginia Endangered Plant and Insect Act (Section 3.1-1020 through 1030, Code of Virginia). DCR-DNH is a primary source of recommendations to each of the regulatory agencies for species that are in need of listing as endangered or threatened.

The Virginia Department of Conservation and Recreation, the U.S. Fish and Wildlife Service, the Virginia Department of Game and Inland Fisheries, and the Virginia Department of Agriculture and Consumer Services work cooperatively to insure the continued survival of Virginia's diverse fauna and other elements of natural diversity. The Division of Natural Heritage also works closely with many other state and federal agencies, local governments, conservation organizations, and many other organizations and individuals to seek adequate protection of Virginia's natural heritage.

LIST FORMAT

The lists are sorted by broad taxonomic groups and then ordered alphabetically by scientific name within each group. The format of each list consists of six fields: scientific name, common name, global rank, state rank, federal status, and state status. These fields are also used in the lists appearing in Appendices 1-3. To aid in the interpretation of the lists, a brief explanation of each field and a summary of abbreviations follow.

Column 1. Scientific name:

Nomenclature of animals is not contained in any single source. The most recent taxonomic sources are examined by the staff zoologist and, when necessary, direct consultations with experts are used to maintain the most scientifically accepted names for all animal groups. Divergences from these opinions are rare and generally occur only while an ongoing taxonomic study is being conducted. Contact the staff zoologist if you have questions or comments regarding the scientific names used herein.

Column 2. Common name:

A common name is provided for the convenience of the user. Standard common names have been developed and universally adopted for only a few animal groups; therefore, the user is cautioned to use scientific names whenever possible. The common names for most vertebrates and a few selected aquatic invertebrate groups (e.g., mussels) are recognized as stable. Most invertebrate species lack common names and it may not be practical to provide such names. They are usually indicated in the list as "a caddisfly", "a millipede", etc. The primary sources of common names applied to species in selected groups included in this list can be found on page 7. Many other common names that appear in the list, especially those of invertebrates, are not widely used or universally accepted.

Column 3. Global rank:

Global ranks are assigned by a consensus of the network of natural heritage programs, scientific experts, and NatureServe (a non-profit conservation organization) to designate the rangewide rarity of a species or subspecies. This system was originally developed by The Nature Conservancy and is widely used by other agencies (e.g., U.S. Fish and Wildlife Service, U.S. Forest Service) and organizations as the best available scientific and objective assessment of an animal's rarity and the level of threat to its existence. The ranks are assigned after considering a suite of factors including the number of occurrences (populations), number of individuals, and severity of threats to the species and its habitats. Global ranks found in the Rare Animal List are explained below:

G1 Extremely rare and critically imperiled with 5 or fewer occurrences or very few remaining individuals; or because of some factor(s) making it especially vulnerable to extinction.

G2 Very rare and imperiled with 6 to 20 occurrences or few remaining individuals; or because of some factor(s) making it vulnerable to extinction.

G3 Either very rare and local throughout its range or found locally (even abundantly at some of its locations) in a restricted range; or vulnerable to extinction because of other factors. Usually fewer than 100 occurrences are documented.

G4 Common and apparently secure globally, although it may be rare in parts of its range, especially at the periphery.

G5 Very common and demonstrably secure globally, although it may be rare in parts of its range, especially at the periphery.

GH Formerly part of the world's fauna with some expectation that it may be rediscovered; generally applies to species that have not been verified for an extended period (usually >15 years) and for which some inventory has been attempted recently.

GX Believed to be extinct throughout its range with virtually no likelihood of rediscovery.

GU Possibly rare, but status uncertain and more data needed.

G? Unranked, or, if following a numerical ranking, rank uncertain (e.g., G3?).

G_G_ The rank is uncertain, but considered to be within the indicated range (e.g., G2G4) of ranks (also, T_T_).

G_Q Taxon has a questionable taxonomic assignment (e.g., G3Q) and may prove to be invalid upon further study.

G_T_ Signifies the rank of a subspecies (e.g., G5T1 would apply to a subspecies if the species is demonstrably secure globally (G5) but the subspecies warrants a rank of T1, critically imperiled.)

GNR A global conservation status rank has not been assigned to the species.

Column 4. State rank:

State ranks are assigned in a manner similar to that described for global ranks, with values that generally range from S1-S5, but consider only factors within the political boundaries of Virginia. For example, an animal that is endemic to Virginia (found nowhere else in the world) will have the same global and state ranks, whereas a species that may be common in the northeastern United States but only known from a few occurrences in Virginia will have global and state ranks that differ. State ranks found in the Rare Animal List are explained below:

S1 Extremely rare and critically imperiled with 5 or fewer occurrences or very few remaining individuals in Virginia; or because of some factor(s) making it especially vulnerable to extirpation in Virginia.

S2 Very rare and imperiled with 6 to 20 occurrences or few remaining individuals in Virginia; or because of some factor(s) making it vulnerable to extirpation in Virginia.

S3 Rare to uncommon in Virginia with between 20 and 100 occurrences; may have fewer occurrences if found to be common or abundant at some of these locations; may be somewhat vulnerable to extirpation in Virginia.

S4 Common and apparently secure in Virginia, although it may be rare in parts of its range.

SH Formerly part of Virginia's fauna with some expectation that it may be rediscovered; generally applies to species that have not been verified in the state for an extended period (usually >15 years) and for which some inventory has been attempted recently.

SX Believed to be extirpated from Virginia with virtually no likelihood of rediscovery.

SU Possibly rare, but status uncertain and more data needed.

S_? Rank uncertain. For example the rank S2? denotes a species that may range from S1 to S3.

S_S_ Rank is uncertain, but considered to be within the indicated range of ranks (e.g., S2S4).

S_B Breeding status of an animal (primarily used for birds) in Virginia; these species typically inhabit Virginia only during the breeding season.

S_B/S_N Breeding and nonbreeding status of an animal (primarily used for birds) in Virginia, when they differ.

SNA A conservation status rank is not applicable because the species is not a suitable target for conservation activities in Virginia (includes accidental species, transients, exotics, etc.).

SNR A state conservation status rank has not been assigned to the species.

Column 5. Federal status:

Federal status is determined by the U.S. Fish and Wildlife Service and the National Marine Fisheries Service. This status is used for all animals listed as endangered or threatened by the U.S. government and receiving protection under the federal Endangered Species Act. The list also notes those species that have been formally proposed for listing or are currently candidates under consideration for listing. The federal status formerly known as "Category 2, candidate species" was abolished on February 28, 1996; species formerly designated as "Category 1, candidate species" are now referred to simply as "candidate species."

LE Listed Endangered. A species threatened with extinction throughout all or a significant portion of its range.

LT Listed Threatened. A species likely to become endangered in the foreseeable future.

LE/PT Currently listed as endangered but proposed for downlisting to threatened.

LT/SA Listed as Threatened due to Similarity of Appearance. The species so closely resembles an endangered or threatened species or population that enforcement personnel of the U.S. Fish and Wildlife Service cannot readily distinguish between the taxa (e.g., the northern population of the bog turtle is federally listed as endangered, but turtles from the southern population, which includes Virginia, are not readily distinguishable from them).

PE Proposed Endangered. A species proposed for listing as endangered.

PT Proposed Threatened. A species proposed for listing as threatened.

C Candidate. There is enough available information to propose the species for listing, but listing is "precluded by other pending proposals of higher priority". (Formerly Candidate, Category 1)

Column 6. State status:

State status is determined by the Virginia Department of Game and Inland Fisheries (all animals except insects) and the Virginia Department of Agriculture and Consumer Services (insects only). The informal category of "Special Concern" species that was previously maintained by the Virginia Department of Game and Inland Fisheries was abolished by that agency on January 1, 2011.

LE Listed Endangered; defined as a species that is in danger of extinction throughout all or a significant portion of its range.

LT Listed Threatened; defined as a species that is likely to become endangered within the foreseeable future.

LT/PDL Listed as Threatened but proposed for delisting (removal from the state list of Endangered and Threatened wildlife). However, at the present time, the species is still listed as Threatened pending further action and is thus protected under Virginia's Endangered Species Act.

PE Proposed Endangered. A species proposed for listing as endangered.

PT Proposed Threatened. A species proposed for listing as threatened.

The following table summarizes the ranks and legal status of the rarest animals tracked by the Virginia Department of Conservation and Recreation, Division of Natural Heritage (pages 10-30 of this list).

Rank[a]	Fish	Amphibians	Reptiles	Birds[b]	Mammals	Invertebrates
GH	0	0	0	0	1	5
G1	7	1	1	0	0	170
G2	10	3	0	2	6	118
G3	15	4	4	6	9	117
SX	3	0	0	0	1	5
SH	2	0	1	6	0	54
S1	30	4	8	38	11	323
S2	36	15	5	23	6	217
Totals	71	19	14	67	18	604
Legal Status[c]						
FE	4	1	1	2	5	31
FT	4	0	2	2	1	2
PFE	0	0	0	0	0	1
SE	8	2	4	5	11	50
PSE	0	0	0	0	2	0
ST	14	2	3	7	0	14
PST	0	0	0	1	1	0

[a] Rounded ranks (e.g., G1G2 is combined with G1, S2S3 with S2, G2G4 is treated as G3, S1S3 is treated as S2, etc.); also T ranks are treated as equivalent to G ranks for the purposes of this table.

[b] Breeding ranks of birds were used as the S ranks for the purposes of this table (except for Red Knot).

[c] FE = Federally Endangered; FT = Federally Threatened; PFE = Proposed Federally Endangered; SE = State Endangered; PSE = Proposed State Endangered; ST = State Threatened; PST = Proposed State Threatened.

Changes in legal status since the March 2013 DCR rare animal list

New Listings:

Fluted Kidneyshell and Slabside Pearlymussel – listed as endangered by the U.S. Fish and Wildlife Service in September 2013.

Thomas' cave beetle – listed as endangered by the Virginia Department of Agriculture and Consumer Services in December 2013.

Red Knot – listed as threatened by the U.S. Fish and Wildlife Service in January 2015.

Northern Long-eared Myotis (bat) – listed as threatened by the U.S. Fish and Wildlife Service in May 2015.

Delistings:

Virginia Northern Flying Squirrel – delisted by the U.S. Fish and Wildlife Service in March 2013.

Delmarva Fox Squirrel – delisted by the U.S. Fish and Wildlife Service in December 2015.

Ptichodis bistrigata	Southern Ptichodis moth	G3	S1S3		
Pygarctia abdominalis	Yellow-edged Pygarctia moth	G3	S1S2		
Pyrrhia aurantiago	Aureolaria seed borer moth	G3G4	S1S3		
= Rhodoecia aurantiago					
Rheumaptera hastata	Spear-marked black moth	G5	S2		
Schinia siren	A flower moth	GNR	S1S2		
= Schinia inclara					
Schizura apicalis	Plain Schizura moth	G3G4	S1S3		
Speranza exonerata	Barrens Speranza moth	G3G4	S1S3		
Speranza ribearia	Currant spanworm moth	G4	S2S3		
= Itame ribearia					
Sphinx franckii	Franck's sphinx	G4	S2S3		
Sympistis perscripta	Scribbled sallow moth	G4	S1S3		
= Lepipolys perscripta					
Synanthedon castaneae	Chestnut clearwing moth	G3G5	SH		
Syngrapha alias	Hooked silver Y moth	G5	S1S2		
Syngrapha rectangula	Salt-and-pepper looper moth	G5	S2		
Tricholita notata	Marked Tricholita moth	G5	SH		
Xanthorhoe iduata	A geometrid moth	G4	S1S3		
Zale curema	A noctuid moth	G4	S1S3		
Zale lunifera	Pine barrens Zale moth	G3G4	S2

NATURAL HERITAGE ANIMAL WATCH LIST

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
VERTEBRATES					
FISH					
Ambloplites cavifrons	Roanoke bass	G3	S3		
Chologaster cornuta	Swampfish	G5	S3		
Enneacanthus obesus	Banded sunfish	G5	S3		
Erimystax dissimilis = *Hybopsis dissimilis*	Streamline chub	G4	S3		
Erimystax insignis = *Hybopsis insignis*	Blotched chub	G4	S3		
Etheostoma kanawhae	Kanawha darter	G4	S3		
Etheostoma simoterum	Snubnose darter	G3G4	S3		
Etheostoma tennesseense	Tennessee darter	G5	S3		
Etheostoma zonale	Banded darter	G5	S3		
Fundulus catenatus	Northern studfish	G5	S3		
Fundulus lineolatus	Lined topminnow	G5	S3		
Lampetra aepyptera	Least brook lamprey	G5	S3		
Lampetra appendix	American brook lamprey	G4	S3		
Margariscus margarita = *Semotilus margarita*	Pearl dace	G4	S3		
Moxostoma ariommum = *Scartomyzon ariommus*	Bigeye jumprock	G4	S3		
Moxostoma duquesnei	Black redhorse	G5	S3		
Notropis chalybaeus	Ironcolor shiner	G4	S3		
Notropis chiliticus	Redlip shiner	G4	S3		
Notropis sp. 4	Sawfin shiner	G4	S3		
Percina caprodes	Logperch	G5	S3		
Percina gymnocephala	Appalachia darter	G4	S3		
Percina oxyrhynchus	Sharpnose darter	G4	S3		
Phenacobius uranops	Stargazing minnow	G4	S3		
Uranidea kanawhae = *Cottus kanawhae*	Kanawha sculpin	G4	S3		
AMPHIBIANS					
Aneides aeneus	Green salamander	G3G4	S3		
Desmognathus orestes	Blue Ridge dusky salamander	G4	S3		
Lithobates virgatipes = *Rana virgatipes*	Carpenter frog	G4	S3		
Plethodon kentucki	Cumberland Plateau salamander	G4	S3		
Plethodon montanus	Northern Gray-cheeked salamander	G4	S3		
Plethodon yonahlossee	Yonahlossee salamander	G4	S3		
Pseudacris nigrita	Southern chorus frog	G5	S3		
Pseudacris ocularis = *Limnaoedus ocularis*	Little grass frog	G5	S3		
Siren lacertina	Greater siren	G5	S3		
Stereochilus marginatus	Many-lined salamander	G5	S3		
REPTILES					
Farancia erytrogramma	Rainbow snake	G4	S3		
Graptemys geographica	Northern map turtle	G5	S3		
Malaclemys terrapin	Diamond-backed terrapin	G4	S3		
Opheodrys vernalis = *Liochlorophis vernalis*	Smooth greensnake	G5	S3		
Plestiodon anthracinus = *Eumeces anthracinus*	Coal skink	G5	S3		
Tantilla coronata	Southeastern crowned snake	G5	S3

BIRDS					
Accipiter cooperii	Cooper's Hawk	G5	S3B/S3N		
Ardea herodias	Great Blue Heron	G5	S3B/S5N		
Cardellina canadensis = *Wilsonia canadensis*	Canada Warbler	G5	S3S4B		
Certhia americana	Brown Creeper	G5	S3B/S5N		
Empidonax minimus	Least Flycatcher	G5	S3S4B		
Haematopus palliatus	American Oystercatcher	G5	S3B/S3N		
Haliaeetus leucocephalus	Bald Eagle	G5	S3S4B/S3S4N		
Ictinia mississippiensis	Mississippi Kite	G5	S2B		
Ixobrychus exilis	Least Bittern	G5	S3B/S3N		
Nycticorax nycticorax	Black-crowned Night-heron	G5	S3B/S4N		
Passerculus sandwichensis	Savannah Sparrow	G5	S3S4B/S4N		
Petrochelidon pyrrhonota	Cliff Swallow	G5	S3S4B		
Riparia riparia	Bank Swallow	G5	S3B		
Setophaga cerulea = *Dendroica cerulea*	Cerulean Warbler	G4	S3S4B		
Spiza americana	Dickcissel	G5	S2S3B		
Sterna forsteri	Forster's Tern	G5	S3B/S3N		
Sterna hirundo	Common Tern	G5	S3B		
Tyto alba	Barn Owl	G5	S3B/S3N		
Vermivora chrysoptera	Golden-winged Warbler	G4	S3B		
Vermivora cyanoptera = *Vermivora pinus*	Blue-winged Warbler	G5	S3B		
MAMMALS					
Blarina brevicauda telmalestes	Dismal Swamp short-tailed shrew	G5T3	S3		
Lasionycteris noctivagans	Silver-haired bat	G5	SUB/S4N		
Lasiurus cinereus	Hoary bat	G5	SUB/S3N		
Lontra canadensis = *Lutra canadensis*	Northern river otter	G5	S4		
Mustela nivalis	Least weasel	G5	S3		
Neotoma magister	Allegheny (or Appalachian) woodrat	G3G4	S3		
Peromyscus gossypinus	Cotton mouse	G5	S3		
Sciurus niger niger	Southeastern fox squirrel	G5T5	S3		
Sorex dispar	Long-tailed or rock shrew	G4	S3		
Sorex longirostris fisheri	Dismal Swamp southeastern shrew	G5T4	S3		LT/PDL
Spilogale putorius	Eastern spotted skunk	G4	S3S4		
Sylvilagus obscurus = *Sylvilagus transitionalis* ?	Appalachian cottontail (New England cottontail)	G4	S4?		
Sylvilagus palustris	Marsh rabbit	G5	S3		
Synaptomys cooperi helaletes	Dismal Swamp bog lemming	G5T3	S3

GASTROPODA (SNAILS)					
Elimia catenaria	Gravel Elimia	G4	S3		
= Pleurocera catenaria					
Fontigens orolibas	Blue Ridge springsnail	G3	S3		
Glyphyalinia picea	Rust glyph	G3	S1S3		
Glyphyalinia virginica	Depressed glyph	G3	S3		
Hendersonia occulta	Cherrystone Drop	G4	S3		
Leptoxis praerosa	Onyx rocksnail	G5	S3		
= Anculosa subglobosa					
Megapallifera wetherbyi	Blotchy mantleslug	G2G3	S1S3		
Mesodon elevatus	Proud globe	G5	S2?		
Mesomphix rugeli	Wrinkled button	G4	S3		
Patera panselenus	Virginia bladetooth	G3	S2?		
= Mesodon panselenus					
Philomycus virginicus	Virginia mantleslug	G3	S3		
Promenetus exacuous	Sharp Sprite	G5	S3		
Triodopsis burchi	Pittsylvania three-tooth	G3	S3		
Triodopsis fraudulenta	Baffled three-tooth	G4	S3		
Triodopsis tennesseensis	Budded three-tooth	G4	S3		
Ventridens arcellus	Golden dome	G4	S3		
Ventridens lasmodon	Hollow dome	G4	S3		
Ventridens pilsbryi	Yellow dome	G4	S3		
BIVALVIA (MUSSELS & CLAMS)					
Alasmidonta undulata	Triangle floater	G4	S3S4		
Anodonta implicata	Alewife floater	G5	S3?		
Fusconaia subrotunda	Longsolid	G3	S3		
Leptodea ochracea	Tidewater mucket	G3G4	S3		
= Ligumia ochracea					
Ligumia nasuta	Eastern pondmussel	G4	S3		
Medionidus conradicus	Cumberland moccasinshell	G3G4	S3S4		
Strophitus undulatus	Creeper	G5	S3S4		
Villosa constricta	Notched rainbow	G3	S3		
Villosa vanuxemensis	Mountain creekshell	G4	S3S4		
ARACHNIDA (SPIDERS, PSEUDOSCORPIONS & RELATIVES)					
Spiders					
Antrodiaetus robustus	Robust trapdoor spider	G3?	S2?		
Hypochilus gertschi	Gertsch's lampshade-web spider	G3	S3		
Hypochilus pococki	Pocock's lampshade-web spider	G4G5	S2S3		
Nesticus holsingeri	Holsinger's cave spider	G3G4	S3		
Nesticus tennesseensis	A cave spider	G3G4	S3S4		
Sphodros atlanticus	Atlantic purse-web spider	G4	S3		
Sphodros coylei	Coyle's purse-web spider	G4?	S3		
Sphodros niger	Black purse-web spider	G4G5	S3		
Pseudoscorpions					
Chitrella cavicola	A cave pseudoscorpion	G3	S3		

NATURAL HERITAGE ANIMAL WATCH LIST

CRUSTACEA (AMPHIPODS, ISOPODS & DECAPODS)					
Amphipods					
Crangonyx antennatus	Appalachian Valley cave amphipod	G5	S3		
Gammarus pseudolimnaeus	Northern spring amphipod	G5	S3		
Stygobromus araeus	Tidewater interstitial amphipod	G3	S3		
Stygobromus abditus	James Cave amphipod	G3	S3		
Stygobromus estesi	Craig County cave amphipod	G4	S3		
Stygobromus gracilipes	Shenandoah Valley cave amphipod	G3G4	S3		
Stygobromus indentatus	Tidewater amphipod	G3	S3		
Stygobromus spinosus	Blue Ridge spring amphipod	G3	S3		
Isopods					
Caecidotea holsingeri	Greenbrier Valley cave isopod	G5	S3		
Caecidotea pricei	Price's cave isopod	G5	S3		
Caecidotea recurvata	Southwestern Virginia cave isopod	G5	S3		
Caecidotea richardsonae	Tennessee Valley cave isopod	G5	S3		
Caecidotea vandeli	Vandel's cave isopod	G3G4	S3		
Decapods					
Cambarus angularis	Angled crayfish	G3	S3		
Cambarus chasmodactylus	New River crayfish	G4	S3		
Cambarus diogenes	Devil crawfish	G5	S3		
Cambarus longirostris	Longnose crayfish	G5Q	S3		
Cambarus sciotensis	Teays River crayfish	G5	S3		
Fallicambarus fodiens = *Fallicambarus uhleri*	Digger crayfish	G5	S3		
Orconectes cristavarius	Spiny stream crayfish	G5	S3		
Orconectes forceps	Surgeon crayfish	G5	S3		
Orconectes obscurus	Allegheny crayfish	G5	S3		
DIPLOPODA (MILLIPEDES)					
Abacion tesselatum	A millipede	G5	S3		
Andrognathus corticarius	A millipede	G5	S3		
Apheloria montana	A millipede	G5	S3		
Apheloria tigana	A millipede	G5	S3		
Brachycybe lecontii	A millipede	G5	S3		
Buotus carolinus	A millipede	G3	S3		
Cambala hubrichti	A millipede	G5	S3		
Cambala minor	A millipede	G5	S3		
Conotyla melinda	Melinda millipede	G3	S3		
Gyalostethus monticolens	A millipede	G4	S3		
Nannaria ericacea	McGraw Gap xystodesmid millipede	G3	S3		
Nannaria morrisoni	A millipede	G3	S3		
Nannaria wilsoni	A millipede	G3	S3		
Rudiloria kleinpeteri	A millipede	G3	S3		
Rudiloria trimaculata tortua	A millipede	G5T2	S2?		
Semionellus placidus	A millipede	G3	S3		
Zygonopus packardi = *Trichopetalum packardi*	Packard's blind cave millipede	G4	S3

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
INSECTS					
COLLEMBOLA (SPRINGTAILS)					
Pseudosinella granda	A cave springtail	G3	S3		
Pygmarrhopalites carolynae	A cave springtail	G4	S3		
Pygmarrhopalites clarus	A cave springtail	G4	S3		
Pygmarrhopalites marshalli	A cave springtail	G3	S3		
Pygmarrhopalites pavo	A cave springtail	G3?	S3		
Schaefferia hubbardi	A cave springtail	G3	S3		
Sinella barri	Barr's cave springtail	G5	S3		
DIPLURA (DIPLURANS)					
Litocampa cookei	Cooke's cave dipluran	G5	S3		
ODONATA (DAMSELFLIES & DRAGONFLIES)					
Damselflies					
Argia bipunctulata	Seepage dancer	G4	S3		
Calopteryx angustipennis	Appalachian jewelwing	G4	S3		
Enallagma daeckii	Attenuated bluet	G4	S3		
Enallagma doubledayi	Atlantic bluet	G5	S3		
Enallagma dubium	Burgundy bluet	G5	S3		
Enallagma hageni	Hagen's bluet	G5	S3		
Enallagma weewa	Blackwater bluet	G5	S3		
Ischnura prognata	Furtive forktail	G4	S3		
Lestes forcipatus	Sweetflag spreadwing	G5	S3		
Nehalennia integricollis	Southern sprite	G5	S3		
Telebasis byersi	Duckweed firetail	G5	S3		
Dragonflies					
Anax longipes	Comet darner	G5	S3		
Cordulegaster erronea	Tiger spiketail	G4	S3		
Cordulia shurtleffii	American emerald	G5	S3		
Epitheca spinosa = *Tetragoneuria spinosa*	Robust baskettail	G4	S3		
Gomphaeschna antilope	Taper-tailed darner	G4	S3		
Gomphus abbreviatus	Spine-crowned clubtail	G4	S3		
Gomphus dilatatus	Blackwater clubtail	G5	S3		
Gomphus quadricolor	Rapids clubtail	G3G4	S3		
Gomphus rogersi	Sable clubtail	G4	S3		
Helocordulia selysii	Selys' sundragon	G4	S3		
Leucorrhinia intacta	Dot-tailed whiteface	G5	S3		
Libellula flavida	Yellow-sided skimmer	G5	S3		
ORTHOPTERA (GRASSHOPPERS, KATYDIDS, CRICKETS & RELATIVES)					
Scudderia septentrionalis	Northern bush katydid	G3?	S3		
COLEOPTERA (BEETLES)					
Cicindela dorsalis media = *Habroscelimorpha dorsalis media*	White tiger beetle	G3G4T3T4	S3		
Cicindela purpurea	Purple tiger beetle	G5	S3		
Cicindela splendida	Splendid tiger beetle	G5	S3

Beetles (continued)					
Megacephala carolina = *Tetracha carolina*	Carolina big-headed tiger beetle	G5	S3		
Nicrophorus defodiens	A burying beetle	G4	S3		
Phloeoxena signata	A ground beetle	G3?	S3		
TRICHOPTERA (CADDISFLIES)					
Adicrophleps hitchcocki	A brachycentrid caddisfly	G4G5	S1S3		
Agapetus tomus	A glossosomatid caddisfly	G5	S1S3		
Agarodes libalis	Spring-loving psiloneuran caddisfly	G3	S1S3		
Ceraclea neffi	A leptocerid caddisfly	G5	S1S3		
Ceraclea punctata	A leptocerid caddisfly	G5	S1S3		
Ceraclea spongillovorax	A leptocerid caddisfly	G3G4	S1S3		
Ceraclea uvalo	A leptocerid caddisfly	G2G4	S1S3		
Cheumatopsyche parentum	A hydropsychid caddisfly	G3	S3		
Chimarra augusta	A philopotamid caddisfly	G3G4	S3		
Culoptila cantha	A glossosomatid caddisfly	G5	S1S3		
Heteroplectron americanum	A caddisfly	G5	S2		
Homoplectra monticola	A hydropsychid caddisfly	G2G3	S2S3		
Hydropsyche brunneipennis	A hydropsychid caddisfly	G3G4	S1S3		
Hydropsyche catawba	A hydropsychid caddisfly	G3	S3		
Hydropsyche frisoni	A hydropsychid caddisfly	G5	S1S3		
Hydropsyche hoffmani	A hydropsychid caddisfly	G3G4	S3		
Hydropsyche opthalmica	A hydropsychid caddisfly	G3	S3		
Hydropsyche potomacensis	A hydropsychid caddisfly	G2G3	S2S3		
Hydropsyche rotosa	A hydropsychid caddisfly	G2G3	S2S3		
Ironoquia lyrata	A limnephilid caddisfly	G5	S1S3		
Lepidostoma bryanti	A lepidostomatid caddisfly	G5	S1S3		
Lepidostoma carrolli	A lepidostomatid caddisfly	G5	S1S3		
Lepidostoma ontario	A lepidostomatid caddisfly	G5	S1S3		
Lepidostoma serratum	A lepidostomatid caddisfly	G4	S1S3		
Micrasema scotti	A brachycentrid caddisfly	G3G4	S3		
Micrasema sprulesi	A brachycentrid caddisfly	G5	S1S3		
Molanna tryphena	A molannid caddisfly	G5	S1S2		
Molanna uniophila	A molannid caddisfly	G5	S1S2		
Neophylax stolus	A uenoid caddisfly	G3	S3		
Ochrotrichia denningi	A microcaddisfly	G2G4	S1S3		
Ochrotrichia graysoni	A microcaddisfly	G3G4	S1S3		
Oxyethira pescadori	Pescador's bottle-cased caddisfly	G3G4	S1S2		
Parapsyche cardis	A hydropsychid caddisfly	G4	S2		
Phylocentropus auriceps	A caddisfly	G3G4	S2		
Phylocentropus carolinus	A caddisfly	G5	S2		
Polycentropus centralis	A polycentropodid caddisfly	G5	S1S2		
Polycentropus pixi	A polycentropodid caddisfly	G4	S1S2		
Pycnopsyche virginica	A limnephilid caddisfly	G3G4	S3		
Rhyacophila atrata	A rhyacophilid caddisfly	G5	S2		
Rhyacophila shenandoahensis	Shenandoah rhyacophilid caddisfly	G3	S3		
Setodes guttatus	A leptocerid caddisfly	G5	S1S3		
Theliopsyche grisea	A lepidostomatid caddisfly	G4	S1S3		
Theliopsyche melas	A lepidostomatid caddisfly	G4G5	S1S3		
Triaenodes dipsius	A leptocerid caddisfly	G5	S1S3		
Triaenodes taenia	A leptocerid caddisfly	G3G4	S1S3		

NATURAL HERITAGE INVERTEBRATE WATCH LIST

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
LEPIDOPTERA (BUTTERFLIES, SKIPPERS & MOTHS)					
Butterflies					
Atlides halesus	Great purple hairstreak	G4G5	S3		
Calephelis borealis	Northern metalmark	G3G4	S3		
Celastrina nigra = *Celastrina ebenina*	Dusky azure	G4	S3S4		
Danaus plexippus plexippus	Monarch (eastern population)	G4T1	SU		
Enodia creola	Creole pearly eye	G3G4	S3S4		
Pieris virginiensis	West Virginia white	G3?	S3		
Satyrium edwardsii	Edwards' hairstreak	G4	S3		
Satyrium favonius ontario = *Fixsenia favonius ontario*	Northern oak hairstreak	G4T4	S3		
Speyeria diana	Diana fritillary	G3G4	S3		
Skippers					
Amblyscirtes aesculapias	Lace-winged roadside skipper	G3G4	S3		
Amblyscirtes carolina	Carolina roadside skipper	G3G4	S3S4		
Amblyscirtes reversa	Reversed roadside skipper	G3G4	S3		
Hesperia leonardus	Leonard's skipper	G4	S3?		
Poanes aaroni	Aaron's skipper	G4	S3		
Poanes yehl	Yehl skipper	G4	S3		
Polites mystic	Long dash	G5	S3		
Thorybes confusis	Confused cloudywing	G4	S2S4		
Moths					
Abrostola ovalis	A noctuid moth	G4	S2S4		
Acronicta haesitata	Hesitant dagger moth	G5	S2S4		
Acronicta radcliffei	Radcliffe's dagger moth	G5	S2S4		
Acronicta tristis	A dagger moth	GNR	S1S3		
Anaplectoides prasina	Green arches	G5	S1S3		
Apamea cariosa	A noctuid moth	G4	S1S3		
Apamea lignicolora	Wood-colored Apamea moth	G5	S2S4		
Apamea plutonia	A noctuid moth	G4	S2S4		
Apamea sordens = *Apamea finitima*	Bordered Apamea moth	GNR	S1S3		
Argyrostrotis quadrifilaris	Four-lined chocolate moth	G4	S1S3		
Arugisa latiorella = *Arugisa watsoni*	A noctuid moth	G4	S1S3		
Autographa ampla	Large looper moth	G5	S1S3		
Bellura brehmei	A wetland borer moth	GNR	S2S4		
Cabera quadrifasciaria	Four-lined Cabera moth	GNR	S1S3		
Callopistria granitosa	Granitosa fern moth	G4	S1S3		
Capsula subflava = *Archanara subflava*	A sedge borer moth	G4	S1S3		
Catocala angusi	Angus' underwing	G4	S2S4		
Catocala concumbens	Sleepy underwing	G5	S1S3		
Catocala crataegi	Hawthorn underwing	G5	S2S4		
Catocala insolabilis	Inconsolable underwing	G5	S1S3		
Catocala miranda	Miranda underwing	G3G4	S2S4		
Catocala parta	Mother underwing	G5	S2S4		
Catocala robinsoni	Robinson's underwing	G4	S3		
Catocala sappho	Sappho underwing	G4	S1S3		
Catocala serena	Serene underwing	G5	S2S4		
Crambidia pura	Pure lichen moth	G4	S1S3		
Cucullia florea	A noctuid moth	GNR	S2S4

NATURAL HERITAGE ANIMAL REVIEW LIST

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
VERTEBRATES					
FISH					
Lepomis marginatus	Dollar sunfish	G5	SNR		
AMPHIBIANS					
Lithobates kauffeldi = *Rana kauffeldi*	Atlantic Coast leopard frog	GNR	SU		
REPTILES					
Lampropeltis elapsoides = *Lampropeltis triangulum elapsoides*	Scarlet kingsnake	G5	S2S4		
MAMMALS					
Peromyscus leucopus easti	Pungo mouse	G5T1	S1?		
Sylvilagus floridanus hitchensi	Smith Island cottontail	G5THQ	SH		
INVERTEBRATES					
GASTROPODA (SNAILS)					
Catinella hubrichti	Snowhill ambersnail	G3	SU		
Discus nigrimontanus	Black Mountain disc	G4	SU		
Euchemotrema leai = *Stenotrema leai aliciae*	Lowland pillsnail	G5	SU		
Fumonelix christyi = *Mesodon christyi*	Glossy covert	G3	SU		
Gastrocopta clappi = *Gastrocopta armifera clappi*	Bluegrass snaggletooth	G4G5	SU		
Gastrocopta pellucida	Slim snaggletooth	G5	SU		
Gastrodonta fonticula = *Gastrocopta interna fonticula*	Appalachia bellytooth	G3G4	SU		
Glyphyalinia praecox	Brilliant glyph	G4	SU		
Glyphyalinia sculptilis	Suborb glyph	G4	SU		
Helicodiscus shimeki	Temperate coil	G4G5	SU		
Holsingeria sp. 1	Skyline Caverns snail	G1Q	S1		
Inflectarius kalmianus = *Mesodon kalmianus*	Brown globelet	G3	SU		
Lobosculum pustuloides = *Polygyra pustuloides*	Tiny Liptooth	G4	SU		
Mesomphix subplanus	Flat button	G3G4	SU		
Oxyloma subeffusum	Chesapeake ambersnail	G3	SU		
Pallifera varia	Variable mantleslug	G2G4	SU		
Paravitrea grimmi	Buff Supercoil	G1G3Q	SU		
Paravitrea placentula	Glossy supercoil	G3	SU		
Paravitrea pontis	Natural Bridge supercoil	G3	SU		
Paravitrea reesei	Round supercoil	G3	SU		
Patera laevior	Smooth Bladetooth	G4	SU		
Pomatiopsis cincinnatiensis	Brown walker	G4	SU		
Pupilla muscorum	Widespread column	G5	SU		
Somatogyrus pennsylvanicus	Shale pebblesnail	G3	SU		
Stenotrema pilula	Pygmy slitmouth	G3G4	SU		
Stenotrema spinosum	Carinate slitmouth	G4	SU		
Striatura exigua	Ribbed striate	G5	SU		
Striatura milium	Fine-ribbed striate	G5	SU		
Triodopsis anteridon	Carter threetooth	G3	SU		
Triodopsis pendula	Hanging Rock threetooth	G3	SU		

NATURAL HERITAGE ANIMAL REVIEW LIST

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
Snails (continued)					
Vallonia parvula	Trumpet vallonia	G4	SU		
Ventridens decussatus	Crossed dome	G3	SU		
Ventridens lawae	Rounded dome	G4	SU		
Vertigo bollesiana	Delicate vertigo	G4	SU		
Vertigo clappi	Cupped vertigo	G1G2	SU		
Vertigo oralis	Palmetto vertigo	G5	SU		
Vertigo parvula	Smallmouth Vertigo	G3	SU		
Vertigo teskeyae	Swamp vertigo	G5	SU		
Vertigo ventricosa	Five-tooth vertigo	G5	SU		
Vitrinizonites latissimus	Glassy grapeskin	G4	SU		
BIVALVIA (MUSSELS & CLAMS)					
Clams					
Pisidium equilaterale	Round peaclam	G4G5	SU		
ARACHNIDA (SPIDERS, PSEUDOSCORPIONS & RELATIVES)					
Spiders					
Amaurobius borealis	An amaurobiid spider	G5	SU		
Barronopsis jeffersi	A funnel-web spider	G3	SU		
Castianeira trilineata	A two-clawed hunting spider	G4?	SU		
Clubiona spiralis	A two-clawed hunting spider	G4	SU		
Drassyllus louisianus	A gnaphosid spider	G4?	SU		
Drassyllus sp. 1	A gnaphosid spider	GU	SU		
Pisaurina dubia	A nursery-web spider	G4	SU		
Xysticus emertoni	Emerton's crab spider	G5	SU		
Sphodros rufipes	Red-legged purse-web spider	G4	SU		
Harvestmen					
Leiobunum hoffmani	A harvestman	GNR	S2?		
Pseudoscorpions					
Kleptochthonius polychaetus	Shenandoah pseudoscorpion	GU	SU		
CRUSTACEA (AMPHIPODS, ISOPODS & DECAPODS)					
Amphipods					
Crangonyx acicularis	A freshwater amphipod	G1G3	SU		
Crangonyx gracilis	A freshwater amphipod	G4	SU		
Stygobromus sp. 10	A cave amphipod (Botetourt Co.)	G1	S1		
Stygobromus sp. 11	A cave amphipod (Nelson Co.)	G1	S1		
Stygobromus sp. 12	A cave amphipod (Rockbridge Co.)	G1	S1		
Stygobromus sp. 19	A cave amphipod (Scott Co.)	G1	S1		
Stygobromus sp. 20	A cave amphipod (Bath, Highland Co.)	G1	S1		
Isopods					
Caecidotea sp. nov.	A groundwater isopod (Caroline Co.)	GNR	SNR		
Branchiopods					
Eulimnadia sp. 1	A clam shrimp	GNR	SU		
Decapods					
Cambarus buntingi	Longclaw crayfish	G4Q	S2

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
DIPLOPODA (MILLIPEDES)					
Auturus erythropygos	A millipede	G3	SU		
Chaetaspis albus	A millipede	G4	SU		
Euryurus leachii fraternus	A millipede	G4T?	SU		
Okeanobates americanus	A millipede	G4	SU		
Onomeris underwoodi	A millipede	G5	SU		
Orinisobates nigrior	A millipede	G4	SU		
Petaserpes rosalbus = *Polyzonium rosalbum*	A millipede	G5	SU		
Pseudopolydesmus paludicolus	A millipede	GU	SU		
Striaria columbiana	A millipede	G2	SU		
Striaria sp. 1	A millipede	G1	S1		
CHILOPODA (CENTIPEDES)					
Escaryus ethopus	A centipede	GNR	SU		
INSECTS					
DIPLURA (DIPLURANS)					
Litocampa sp. 10	A cave dipluran (Smyth)	G1	S1		
Litocampa sp. 11 (near *cookei*)	A cave dipluran (Lee/Scott/Wise)	G2	S2		
EPHEMEROPTERA (MAYFLIES)					
Ameletus cryptostimulus	Allegheny mayfly	G4	S2S4		
Ameletus tarteri	Tarter's Ameletus mayfly	G2G4	SU		
Isonychia arida	A mayfly	G5	SU		
Isonychia georgiae	Georgia Isonychia mayfly	G4	SU		
Isonychia tusculanensis	A mayfly	G4	SU		
Iswaeon anoka = *Heterocloeon anoka*	A mayfly	G5	SU		
Paraleptophlebia assimilis	A mayfly	G4	SU		
Paraleptophlebia jeanae	A mayfly	G3G4	SU		
Rhithrogena anomala	A mayfly	G3G4	SU		
Waynokiops dentatogriphus	A mayfly	GNR	SNR		
ODONATA (DAMSELFLIES & DRAGONFLIES)					
Epitheca costalis = *Tetragoneuria costalis*	Stripe-winged baskettail	G5	S2S4		
Gomphus hybridus	Cocoa clubtail	G4	SU		
Lestes dryas	Emerald spreadwing	G5	SNR		
Lestes vidua	Carolina spreadwing	G5	SNA		
Sympetrum internum = *Sympetrum janeae*	Cherry-faced meadowhawk	G5	SU		
PLECOPTERA (STONEFLIES)					
Allocapnia harperi	Stonyfork snowfly	G4	SU		
Alloperla banksi	Tufted sallfly	G4	SU		
Alloperla biserrata	Dusky sallfly	G3	SU		
Alloperla idei	*Vernal sallfly	G3	SU		
Alloperla nanina	Swannanoa sallfly	G4	SU		
Alloperla neglecta	Tennessee sallfly	G3	SU		
Bolotoperla rossi	Smoky willowfly	G4	SU		
Hansonoperla appalachia	Appalachian stonefly	G3	SU		
Isogenoides varians	Rock Island springfly	G3G4	SU		

NATURAL HERITAGE ANIMAL REVIEW LIST

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
Stoneflies (continued)					
Isoperla nelsoni	Nelson stripetail stonefly	GNR	SNR		
Isoperla powhatan	Powhatan stripetail stonefly	GNR	SNR		
Isoperla reesi	Elk Garden stripetail stonefly	GNR	SNR		
Isoperla stewarti	Stewart stripetail stonefly	GNR	SNR		
Isoperla yuchi	Yuchi stripetail stonefly	GNR	SNR		
Ostrocerca complexa	Notched forestfly	G4	S1S3		
Ostrocerca prolongata	Bent forestfly	G3	S1S3		
Paragnetina ichusa	Widecollar stonefly	G3	S1S3		
Perlesta roblei	Dragon Run stonefly	G3	SU		
Perlesta shawnee	Shawnee stonefly	G3	SU		
Perlesta teaysia	Teays stonefly	G4	SU		
Pteronarcys comstocki	Spiny salmonfly	G3	SU		
Pteronarcys scotti	Carolina salmonfly	G4	SU		
Shipsa rotunda	Intrepid forestfly	G5	SU		
Tallaperla cornelia	Southeastern roachfly	G4	SU		
ORTHOPTERA (GRASSHOPPERS, KATYDIDS, CRICKETS & RELATIVES)					
Melanoplus celatus	A spur-throat grasshopper	GU	SU		
Melanoplus devius	A spur-throat grasshopper	GU	SU		
Melanoplus impudicus	Immodest spur-throat grasshopper	G4G5	SU		
Melanoplus pachycercus	A spur-throat grasshopper	G2G3	SNR		
HEMIPTERA (TRUE BUGS, CICADAS, LEAFHOPPERS & RELATIVES)					
Acantholomidea denticulata	A shield bug	GNR	SU		
Allopodops mississippiensis	Mississippi turtle bug	G2G3	SU		
Botocudo modestus	A seed bug	G5	SU		
Corixidea major	A true bug	GU	SU		
Elasmostethus atricornis	Hercules club stink bug	G3?	SU		
Eurygaster alternata	A shield bug	G5	SU		
Galgupha denudata	A shield bug	G3	SU		
Glyptocombus saltator	A true bug	GNR	SU		
Isocytus chapmani	Chapman’s shore bug	GNR	SU		
Isthmocorius piceus	Black stalk-eyed bug	G5	SU		
Ligyrocoris depictus	A seed bug	G4?	SU		
Nannocoris arenarius	A true bug	GU	SU		
Neolygus crataegi	Hawthorn plant bug	GNR	SU		
Nepa apiculata	A water scorpion	GNR	SU		
Oncozygia clavicornis	A turtle bug	G3	SU		
Plagiognathus repetitus	Pine barrens plant bug	GNR	SU		
Pnirontis languida	An assassin bug	G4	SU		
Ranatra australis	Southern water scorpion	G5	SU		
Ranatra drakei	Drake’s water scorpion	G4	SU		
Stachyocnemus apicalis	Sandpit alydid bug	G4	SU		
Tominotus communis	A burrower bug	G5	SU		
Trialeurodes phlogis	Phlox whitefly	GU	SU		
COLEOPTERA (BEETLES)					
Anthophylax hoffmani	A longhorned beetle	GNR	S1S3		
Calligrapha pnirsa	A leaf beetle	G3	S1S3		
Cyclotrachelus incisus	A ground beetle	G4	SU		
Diabrotica cristata	A leaf beetle	GNR	SU		
Eucaerus varicornis	A ground beetle	G4?	SU		
Helops sulcipennis	A flightless darkling beetle	G3?	S1S3

Corynorhinus townsendii virginianus = *Plecotus townsendii virginianus*	Virginia big-eared bat	G3G4T2	S1	LE	LE
Eubalaena glacialis = *Balaena glacialis*	Northern right whale	G1	SNA	LE	LE
Glaucomys sabrinus coloratus	Carolina northern flying squirrel	G5T2	S1	LE	LE
Megaptera novaeangliae	Humpback whale	G4	S1N	LE	LE
Myotis grisescens	Gray myotis (bat)	G3	S1	LE	LE
Myotis sodalis	Indiana bat (= social myotis)	G2	S1	LE	LE
Myotis septentrionalis	Northern long-eared Myotis (bat)	G1G3	S1S3	LT	
Physeter macrocephalus = *Physeter catodon*	Sperm whale	G3G4	SNA	LE	LE
Trichechus manatus	West Indian manatee	G2	SNA	LE/PT	LE

APPENDIX 2. FEDERALLY ENDANGERED AND THREATENED INVERTEBRATE ANIMALS OF VIRGINIA

(exclusive of extirpated species, see Appendix 3)

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
INVERTEBRATES					
GASTROPODA (SNAILS)					
Polygyriscus virginianus	Virginia coil (= Virginia fringed mountain snail)	G1	S1	LE	LE
BIVALVIA (MUSSELS)					
Alasmidonta heterodon	Dwarf wedgemussel	G1G2	S1	LE	LE
Cumberlandia monodonta	Spectaclecase	G3	S1	LE	LE
Cyprogenia stegaria	Fanshell	G1Q	S1	LE	LE
Dromus dromas	Dromedary pearlymussel	G1	S1	LE	LE
Epioblasma brevidens	Cumberland combshell	G1	S1	LE	LE
Epioblasma capsaeformis	Oyster mussel	G1	S1	LE	LE
*Epioblasma florentina walkeri**	Tan riffleshell	G1T1	S1	LE	LE
Epioblasma triquetra	Snuffbox	G3	S1	LE	LE
Fusconaia cor	Shiny pigtoe	G1	S1	LE	LE
Fusconaia cuneolus	Fine-rayed pigtoe	G1	S1	LE	LE
Hemistena lata	Cracking pearlymussel	G1	S1	LE	LE
Lemiox rimosus	Birdwing pearlymussel	G1	S1	LE	LE
Pegias fabula	Little-winged pearlymussel	G1	S1	LE	LE
Plethobasus cyphyus	Sheepnose	G3	S1	LE	LE
Pleurobema collina	James spinymussel	G1	S1	LE	LE
Pleurobema plenum	Rough pigtoe	G1	SH	LE	LE
Pleuronaia dolabelloides	Slabside pearlymussel	G2	S2	LE	LE
Ptychobranchus subtentum	Fluted Kidneyshell	G2	S2	LE	LE
Quadrula cylindrica strigillata	Rough rabbits foot	G3G4T2	S2	LE	LE
Quadrula intermedia	Cumberland monkeyface	G1	S1	LE	LE
Quadrula sparsa	Appalachian monkeyface	G1	S1	LE	LE
Villosa perpurpurea	Purple bean	G1	S1	LE	LE
CRUSTRACEA (AMPHIPODS, ISOPODS & DECAPODS)					
Antrolana lira	Madison Cave isopod	G2G4	S2	LT	LT
Lirceus usdagalun	Lee County cave isopod	G2G3	S1	LE	LE
ARACHNIDA (SPIDERS, PSEUDOSCORPIONS & RELATIVES)					
Microhexura montivaga	Spruce-fir moss spider	G1	S1	LE	LE
INSECTA (INSECTS)					
Beetles					
Cicindela dorsalis dorsalis = *Habroscelimorpha dorsalis dorsalis*	Northeastern beach tiger beetle	G4T2	S2	LT	LT
Nicrophorus americanus	American burying beetle	G2G3	SH	LE	
Butterflies					
Neonympha mitchellii	Mitchell's satyr	G2	S1	LE	LE

*Virginia populations were recently described as a new subspecies, *Epioblasma florentina aureola* (golden riffleshell).

APPENDIX 3. EXTINCT AND EXTIRPATED ANIMALS OF VIRGINIA

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	STATE RANK	FEDERAL STATUS	STATE STATUS
VERTEBRATES					
FISH					
Moxostoma lacerum = *Lagochila lacera*	Harelip sucker	GX	SX		
Percina bimaculata	Chesapeake darter	G1G2	SX		
Percina maculata	Blackside darter	G5	SX		
Percopsis omiscomaycus	Trout-perch	G5	SX		
BIRDS					
Conuropsis carolinensis	Carolina parakeet	GX	SX		
Ectopistes migratorius	Passenger pigeon	GX	SX		
Vermivora bachmanii	Bachman's warbler	GH	SX	LE	LE
MAMMALS					
Bos bison = *Bison bison*	American bison	G4	SX		
Canis lupus = *Canis lycaon*	Gray (= eastern timber) wolf	G4G5	SX	LE	LE
Canis rufus	Red wolf	G1Q	SX	LE	
Cervus elaphus = *Cervus canadensis*	Wapiti or elk	G5	SX*		
Puma concolor couguar = *Felis concolor couguar*	Eastern cougar (= mountain lion, puma)	G5THQ	SX	LE	LE
INVERTEBRATES					
BIVALVIA (MUSSELS)					
Epioblasma haysiana	Acornshell	GX	SX		
Epioblasma lenior	Narrow catspaw	GX	SX		
Epioblasma torulosa gubernaculum	Green-blossom pearlymussel	G2TX	SX	LE	LE
Lampsilis abrupta	Pink mucket	G2	SX	LE	LE
Villosa fabalis	Rayed bean	G2	SX	LE	LE
Villosa trabalis	Cumberland bean	G1	SX	LE	LE
INSECTS					
Phyciodes batesii batesii	Tawny crescent	G4T1	SX		

*The last record of a native elk in Virginia was from 1855. Small numbers of reintroduced elk from eastern Kentucky have moved into far southwestern Virginia in recent years and are currently considered a game species by the Virginia Department of Game and Inland Fisheries, which has initiated a reintroduction program in that portion of the state.

APPENDIX 4. LIST OF SYNONYMS

Synonym	Name used in lists above	Common name	Page
Acipenser oxyrhynchus	*Acipenser oxyrinchus*	Atlantic sturgeon	10
Acontia delecta	*Tarache delecta*	Delightful Bird-dropping moth	48
Aeshna mutata	*Rhionaeschna mutata*	Spatterdock darner	23
Aimophila aestivalis	*Peucaea aestivalis*	Bachman's Sparrow	14
Alasmidonta minor	*Alasmidonta viridis*	Slippershell mussel	17
Anacamptodes pergracilis	*Iridopsis pergracilis*	A geometrid moth	39
Anculosa subglobosa	*Leptoxis praerosa*	Onyx rocksnail	34
Anguispira alternata jessica	*Anguispira jessica*	Mountain disc	16
Anthrobia mammouthia	*Anthrobia monmouthia*	A cave spider	18
Apamea finitima	*Apamea sordens*	Bordered Apamea moth	38
Archanara subflava	*Capsula subflava*	A sedge borer moth	38
Arugisa watsoni	*Arugisa latiorella*	A noctuid moth	38
Balaena glacialis	*Eubalaena glacialis*	Northern right whale	49
Bellura melanopyga	*Bellura vulnifica*	A wetland borer moth	48
Bison bison	*Bos bison*	Bison	51
Bombus ashtoni	*Bombus bohemicus*	Ashton cuckoo bumble bee	48
Bomolocha sordidula	*Hypena sordidula*	Sordid Hypena moth	39
Brachoria falcifera	*Appalachioria falcifera*	Big Cedar Creek millipede	20
Brachoria separanda hamata	*Appalachioria separanda hamata*	A millipede	20
Brachoria separanda versicolor	*Appalachioria separanda versicolor*	A millipede	20
Brachoria turneri	*Appalachioria turneri*	Turner's millipede	20
Bufo quercicus	*Anaxyrus quercicus*	Oak toad	12
Cambarus veteranus (in part)	*Cambarus callainus*	Big Sandy Crayfish	20
Canis lycaon	*Canis lupus*	Gray wolf	51
Carpodacus purpureus	*Haemorhous purpureus*	Purple Finch	13
Carunculina glans	*Toxolasma lividus*	Purple liliput	18
Carunculina lividus	*Toxolasma lividus*	Purple liliput	18
Casmerodius albus	*Ardea alba*	Great Egret	13
Celastrina ebenina	*Celastrina nigra*	Dusky azure	38
Celastrina ladon lucia	*Celastrina lucia*	Northern spring azure	47
Cervus canadensis	*Cervus elaphus*	Wapiti or elk	51
Clemmys insculpta	*Glyptemys insculpta*	Wood turtle	12
Clemmys muhlenbergii	*Glyptemys muhlenbergii*	Bog turtle	12
Conradilla caelata	*Lemiox rimosus*	Birdwing pearlymussel	17
Cottus baileyi	*Uranidea baileyi*	Black sculpin	11
Cottus cognatus	*Uranidea cognata*	Slimy sculpin	11
Cottus kanawhae	*Uranidea kanawhae*	Kanawha sculpin	32
Cottus sp. 1	*Uranidea* sp. 1	Bluestone sculpin	11
Cottus sp. 4	*Uranidea* sp. 4	Clinch sculpin	11
Cottus sp. 5	*Uranidea* sp. 5	Holston sculpin	11
Cyprinella monacha	*Erimonax monachus*	Spotfin chub (= turquoise shiner)	10
Cyprogenia irrorata	*Cyprogenia stegaria*	Fanshell	17
Deciduphagus irus	*Callophrys irus*	Frosted elfin	27
Deciduphagus polios	*Callophyrs polios*	Hoary elfin	27
Dendroica cerulea	*Setophaga cerulea*	Cerulean Warbler	33
Dendroica fusca	*Setophaga fusca*	Blackburnian Warbler	14
Dendroica kirtlandii	*Setophaga kirtlandii*	Kirtland's Warbler	49
Dendroica magnolia	*Setophaga magnolia*	Magnolia Warbler	14
Dendroica virens waynei	*Setophaga virens waynei*	Wayne's Black-throated Green Warbler	14
Dixioria coronata	*Dixioria pela coronata*	A millipede	19
Ellipsoptera gratiosa	*Cicindela gratiosa*	Whitish tiger beetle	25
Ellipsoptera lepida	*Cicindela lepida*	Ghost tiger beetle	25
Enallagma cyathigerum (in part)	*Enallagma annexum*	Northern bluet	22
Ephemerella berneri	*Tsalia berneri*	Berner's Ephemerella mayfly	22
Epioblasma florentina walkeri (in part)	*Epioblasma florentina aureola*	Golden riffleshell	17
Erythroecia hebardi	*Psectrotarsia hebardi*	Hebard's noctuid moth	29
Etheostoma clarum	*Ammocrypta clara*	Western sand darter	10

APPENDIX 4 (continued)

Synonym	Name used in lists above	Common name	Page
Etheostoma stigmaeum jessiae	*Etheostoma jessiae*	Blueside darter	10
Etheostoma stigmaeum meadiae	*Etheostoma meadiae*	Bluespar darter	10
Etheostoma tippecanoe (in part)	*Etheostoma denoncourti*	Golden darter	10
Eumeces anthracinus	*Plestiodon anthracinus*	Coal skink	32
Eutolype grandis	*Psaphida grandis*	Gray sallow	43
Fallicambarus uhleri	*Fallicambarus fodiens*	A crayfish	35
Faronta rubripennis	*Dargida rubripennis*	Pink-streak moth	28
Felis concolor couguar	*Puma concolor couguar*	Eastern cougar	15
Fixsenia favonius ontario	*Satyrium favonius ontario*	Northern oak hairstreak	38
Foveacheles paralleloseta	*Traegaardia paralleloseta*	A cave mite	18
Fusconaia barnesiana	*Pleuronaia barnesiana*	Tennessee pigtoe	17
Fusconaia edgariana	*Fusconaia cor*	Shiny pigtoe	17
Gallinula chloropus (in part)	*Gallinula galeata*	Common Gallinule	13
Gastrocopta armifera clappi	*Gastrocopta clappi*	Bluegrass snaggletooth	42
Gastrocopta interna fonticula	*Gastrodonta fonticula*	Appalachia bellytooth	42
Gomphus brevis	*Gomphus adelphus*	Moustached clubtail	23
Goniobasis arachnoidea	*Elimia arachnoidea*	Spider Elimia	16
Graphisurus triangulifer	*Urographis triangulifer*	A longhorned beetle	46
Habroscelimorpha dorsalis dorsalis	*Cicindela dorsalis dorsalis*	Northeastern beach tiger beetle	25
Habroscelimorpha dorsalis media	*Cicindela dorsalis media*	White tiger beetle	36
Heterocloeon anoka	*Iswaeon anoka*	A mayfly	44
Heterocloeon rubrolaterale	*Iswaeon rubrolaterale*	A mayfly	22
Holomelina ferruginosa	*Virbia ferruginosa*	Rusty tiger moth	48
Holomelina immaculata	*Virbia immaculata*	Immaculate tiger moth	48
Homohadena badistriga	*Sympistis badistriga*	Brown-lined sallow moth	48
Hybopsis cahni	*Erimystax cahni*	Slender chub	10
Hybopsis dissimilis	*Erimystax dissimilis*	Streamline chub	32
Hybopsis insignis	*Erimystax insignis*	Blotched chub	32
Hybopsis labrosa	*Cyprinella labrosa*	Thicklip chub	10
Hybopsis monacha	*Erimonax monachus*	Spotfin chub (= turquoise shiner)	10
Incisalia irus	*Callophrys irus*	Frosted elfin	27
Incisalia polios	*Callophyrs polios*	Hoary elfin	27
Itame abruptata	*Speranza abruptata*	A geometrid moth	40
Itame evagaria	*Speranza evagaria*	A geometrid moth	40
Itame exauspicata	*Speranza exauspicata*	A geometrid moth	40
Itame ribearia	*Speranza ribearia*	Currant spanworm moth	29
Itame subcessaria	*Speranza subcessaria*	Barred Itame moth	40
Lagochila lacera	*Moxostoma lacerum*	Harelip sucker	51
Lampropeltis getula nigra	*Lampropeltis nigra*	Eastern black kingsnake	12
Lampropeltis triangulum elapsoides	*Lampropeltis elapsoides*	Scarlet kingsnake	42
Lampsilis orbiculata	*Lampsilis abrupta*	Pink mucket	17
Lastena lata	*Hemistena lata*	Cracking pearlymussel	17
Lepipolys perscripta	*Sympistis perscripta*	Scribbled sallow moth	29
Leurognathus marmoratus	*Desmognathus marmoratus*	Shovel-nosed salamander	12
Lexingtonia dolabelloides	*Pleuronaia dolabelloides*	Slabside pearlymussel	17
Lexingtonia subplana	*Fusconaia masoni*	Atlantic pigtoe	17
Libellula exusta	*Ladona exusta*	White corporal skimmer	23
Libellula julia	*Ladona julia*	Chalk-fronted corporal skimmer	23
Ligumia ochracea	*Leptodea ochracea*	Tidewater mucket	34
Ligumia recta latissima	*Ligumia recta*	Black sandshell	17
Limnaoedus ocularis	*Pseudacris ocularis*	Little grass frog	32
Liochlorophis vernalis	*Opheodrys vernalis*	Smooth greensnake	32
Lithacodia albidula	*Protodeltote albidula*	A noctuid moth	40
Lithobates virgatipes	*Rana virgatipes*	Carpenter frog	34
Lithophane lepida adipel	*Lithophane adipel*	A pinion moth	29
Loxagrotis apicalis	*Dichagyris grotei*	A noctuid moth	28
Lutra canadensis	*Lontra canadensis*	River otter	33
Merolonche dolli	*Acronicta dolli*	Doll's dagger moth	28

APPENDIX 4 (continued)

Synonym	Name used in lists above	Common name	Page
Mesodon christyi	*Fumonelix christyi*	Glossy covert	42
Mesodon clingmanicus	*Fumonelix wheatleyi clingmanicus*	Clingman covert	16
Mesodon kalmianus	*Inflectarius kalmianus*	Brown globelet	42
Mesodon panselenus	*Patera panselenus*	Virginia bladetooth	34
Microcreagris valentinei	*Lissocreagris valentinei*	Valentine's cave pseudoscorpion	18
Mitoura hesseli	*Callophrys hesseli*	Hessel's hairstreak	27
Moxostoma ariommum	*Scartomyzon ariommus*	Bigeye jumprock	34
Moxostoma hamiltoni	*Thoburnia hamiltoni*	Rustyside sucker	11
Neadysgonia telma	*Gondysia telma*	Telma darkwing moth	28
Neonympha areolatus septentrionalis	*Neonympha helicta*	Helicta satyr	27
Notropis hypsinotus	*Hybopsis hypsinotus*	Highback chub	10
Notropis lirus	*Lythrurus lirus*	Mountain shiner	10
Notropis whipplei	*Cyprinella whipplei*	Steelcolor shiner	10
Nuttallornis borealis	*Contopus cooperi*	Olive-sided Flycatcher	13
Nycticorax violaceus	*Nyctanassa violacea*	Yellow-crowned Night-heron	14
Odontonyx trivittis	*Paralichas trivittis*	A beetle	46
Oligia crytora	*Neoligia crytora*	A noctuid moth	39
Oligia exhausta	*Neoligia exhausta*	A noctuid moth	39
Ophiogomphus alleghaniensis	*Ophiogomphus incurvatus alleghaniensis*	Allegheny snaketail	23
Oporornis philadelphia	*Geothlypis philadelphia*	Mourning Warbler	13
Percina macrocephala	*Percina williamsi*	Sickle darter	11
Phoxinus cumberlandensis	*Chrosomus cumberlandensis*	Blackside dace	10
Phoxinus tennesseensis	*Chrosomus tennesseensis*	Tennessee dace	10
Phyciodes pascoensis	*Phyciodes cocyta*	Northern crescent	27
Phyciodes selenis	*Phyciodes cocyta*	Northern crescent	27
Physeter catodon	*Physeter macrocephalus*	Sperm whale	49
Pipistrellus subflavus	*Perimyotis subflavus*	Tricolored bat	15
Plauditus rubrolateralis	*Iswaeon rubrolaterale*	A mayfly	22
Plecotus rafinesquii macrotis	*Corynorhinus rafinesquii macrotis*	Eastern big-eared bat	15
Plecotus townsendii virginianus	*Corynorhinus townsendii virginianus*	Virginia big-eared bat	15
Pleurobema maculatum	*Pleurobema oviforme*	Tennessee clubshell	17
Pleurobema pyramidatum	*Pleurobema rubrum*	Pyramid pigtoe	17
Pleurocera catenaria	*Elimia catenaria*	Gravel Elimia	35
Polygyra plicata	*Millerelix plicata*	Cumberland liptooth	16
Polygyra pustuloides	*Lobosculum pustuloides*	Tiny Liptooth	42
Polyzonium rosalbum	*Petaserpes rosalbus*	A millipede	44
Pterourus appalachiensis	*Papilio appalachiensis*	Appalachian tiger swallowtail	47
Pyrgus wyandot	*Pyrgus centaureae wyandot*	Appalachian grizzled skipper	27
Rana kauffeldi	*Lithobates kauffeldi*	Atlantic Coast leopard frog	42
Rana virgatipes	*Lithobates virgatipes*	Carpenter frog	32
Rhodoecia aurantiago	*Pyrrhia aurantiago*	Aureolaria seed borer moth	29
Richia grotei	*Dichagyris grotei*	A noctuid moth	28
Scartomyzon ariommus	*Moxostoma ariommum*	Bigeye jumprock	32
Schinia inclara	*Schinia siren*	A flower moth	29
Seiurus noveboracensis	*Parkesia noveboracensis*	Northern Waterthrush	14
Semiothisa distribuaria	*Macaria distribuaria*	A geometrid moth	29
Semotilus margarita	*Margariscus margarita*	Pearl dace	32
Sphaeroderus nitidicollis schaumii	*Sphaeroderus schaumii*	Schaum's false snail-eating beetle	26
Sphinx eremitus	*Lintneria eremitus*	Hermit sphinx	39
Stenotrema leai alicia	*Euchemotrema leai*	Lowland pillsnail	42
Sterna antillarum	*Sternula antillarum*	Least Tern	14
Sterna caspia	*Hydroprogne caspia*	Caspian Tern	13
Sterna maxima	*Thalasseus maximus*	Royal Tern	14
Sterna nilotica	*Gelochelidon nilotica*	Gull-billed Tern	13
Sterna sandvicensis	*Thalasseus sandvicensis*	Sandwich Tern	14
Stizostedion canadense	*Sander canadensis*	Sauger	11
Sylvilagus transitionalis	*Sylvilagus obscurus*	Appalachian cottontail	33

APPENDIX 4 (continued)

Synonym	Name used in lists above	Common name	Page
Sympetrum janeae	*Sympetrum internum*	Cherry-faced meadowhawk	44
Tetracha carolina	*Megacephala carolina*	Carolina big-headed tiger beetle	37
Tetragoneuria canis	*Epitheca canis*	Beaverpond baskettail	23
Tetragoneuria costalis	*Epitheca costalis*	Stripe-winged baskettail	44
Tetragoneuria semiaquea	*Epitheca semiaquea*	Mantled baskettail	23
Tetragoneuria spinosa	*Epitheca spinosa*	Robust baskettail	36
Thalpius pygmaeus	*Pseudaptinus pygmaeus*	A ground beetle	46
Tischeria perplexa	*Coptotriche perplexa*	Chestnut leaf-mining moth	28
Trichopetalum packardi	*Zygonopus packardi*	Packard's blind cave millipede	35
Trichopetalum weyeriensis	*Zygonopus weyeriensis*	Grand Caverns blind cave millipede	21
Trichopetalum whitei	*Zygonopus whitei*	Luray Caverns blind cave millipede	21
Trionyx spiniferus	*Apalone spinifera*	Spiny softshell	12
Tritogonia verrucosa	*Quadrula verrucosa*	Pistolgrip	18
Troglodytes troglodytes (in part)	*Troglodytes hiemalis*	Winter Wren	14
Vermivora pinus	*Vermivora cyanoptera*	Blue-winged Warbler	33
Vermivora ruficapilla	*Oreothlypis ruficapilla*	Nashville Warbler	14
Wilsonia canadensis	*Cardellina canadensis*	Canada Warbler	33
Wyeomyia haynei	*Wyeomyia smythii*	Pitcher plant mosquito	30
Xestia tenuicula	*Pseudohermonassa tenuicula*	A dart moth	40
Zanclognatha gypsalis	*Zanclognatha theralis*	A noctuid moth	48

APPENDIX 5. RARE SPECIES SIGHTING FORM

Virginia Department of Conservation and Recreation, Division of Natural Heritage
600 E. Main Street, Richmond, Virginia 23219
(804) 786-7951

An important component of the natural heritage inventory and protection process involves gathering information from state experts, professionals, and avocational naturalists throughout the state. To facilitate this, the Division of Natural Heritage has developed this rare species sighting form. If you would like to participate in our inventory and protection activities, please take a few moments to complete the attached form for any species from our rare species list. These data will be evaluated for incorporation into the natural heritage database and used exclusively for the protection of the rare species and its habitat. Please send the form to the staff zoologist at the address above. Thank you for your support. The Division of Natural Heritage can only realize the protection of the Commonwealth's natural diversity by working through a network of knowledgeable and concerned individuals.

SPECIES OBSERVED:

DATE OBSERVED:

COUNTY:

USGS QUADRANGLE MAP NAME (if known; mark location on a photocopy of the appropriate map and submit with this form):

LOCATION (Provide a detailed description, including directions from nearest town, road intersection, etc.):

HABITAT DESCRIPTION (Include associated species, elevation, natural features, natural community type, etc.):

POPULATION DATA (Number of individuals observed, age, size, evidence of reproduction,etc.):

LANDOWNER (If know, provide name, address, and phone number):

INTRODUCTION

The Virginia Department of Conservation and Recreation's Division of Natural Heritage (DCR-DNH) was established to protect Virginia's Natural Heritage Resources. These Resources are defined in the Virginia Natural Area Preserves Act of 1989 (Section 10.1-209 through 217, *Code of Virginia*), as the habitat of rare, threatened, and endangered plant and animal species; exemplary natural communities, habitats, and ecosystems; and other natural features of the Commonwealth. DCR-DNH is the state's only comprehensive program for conservation of our natural heritage and includes an intensive statewide biological inventory, field surveys, electronic and manual database management, environmental review capabilities, and natural area protection and stewardship. Through such a comprehensive operation, the Division identifies Natural Heritage Resources which are in need of conservation attention while creating an efficient means of evaluating the impacts of economic growth.

To achieve this protection, DCR-DNH maintains lists of the most significant elements of our natural diversity. These lists focus the Division's inventory on the Natural Heritage Resources most likely to be lost without conservation action in the near future. Most importantly, these lists are not only useful for DCR-DNH, but can be used by other agencies, organizations, and individuals to guide protection and development decision-making. In formulating these lists, the Division uses information from previous studies, museum records, the observations and opinions of experts, DCR-DNH staff scientists, and field inventories.

The first list included in this report is the Rare Vascular Plant List. This list contains information on the legal and biological status of Virginia's rarest known native vascular plant taxa, **628** in all. This list includes all plants believed to be sufficiently rare or threatened to merit an inventory of their status and locations.

The second list included in this report is the Vascular Plant Watchlist. This list contains information on the legal and biological status of **231** additional taxa that are decidedly uncommon in Virginia but not scarce enough to merit inclusion on the Rare Vascular Plant List. Plants on this list are monitored to determine general population trends. If a species or variety on this list is found to be rare or threatened, it is placed on the Rare Vascular Plant List.

The third list included in this report is the Review List (Taxa of Uncertain Status). These taxa lack numerical ranks, indicating that they are poorly known from a taxonomic and distributional standpoint. Although some of these taxa may prove to be conservation targets, more field and herbarium data are needed to assess their distinctiveness and degree of rarity in Virginia. There are **71** taxa in this category.

The fourth list included in this report is the Rare Non-Vascular Plant List. This list contains information on the legal and biological status of **95** taxa thought to be rare in the state of Virginia. The lichens, liverworts, and mosses listed herein represent an attempt at designating imperiled species within this often-neglected group. The list is currently small compared to the vascular plant lists because the taxonomy and distributions of non-vascular plants are generally poorly known in Virginia at this time (with some exceptions).

Natural Heritage Resource lists are necessarily dynamic and are revised annually, with updates occurring as data become available. Such revisions assure the most current knowledge of the status of Virginia's plants. Taxa are added to the list when it is determined that they have become rare or threatened to such an extent that their continued existence in Virginia is in jeopardy. Plants are deleted from the list when data indicate they are common and do not warrant priority conservation efforts.

If you have information which could refine this list, please contact DCR-DNH staff botanist John Townsend at (804) 225-4855 (email: john.townsend@dcr.virginia.gov) or by mailing the Rare Species Sighting Form found at the end of this document.

All plants which are officially protected by federal or state endangered species acts are included in these lists. The Office of Plant Protection within the Virginia Department of Agriculture and Consumer Services (VDACS) has regulatory responsibility for the listing and protection of Virginia's endangered and threatened plants and insects under the Virginia Endangered Plant and Insect Species Act, as amended (Section 3.1 -1020 through 1030, *Code of Virginia*). The Act provides for the official listing and recovery of endangered and threatened plant and insect species in Virginia. The Act also establishes a permit system for collection of listed species. As of 2013, there were 26 state-listed plant species. A memorandum of agreement between DCR-DNH and VDACS facilitates data transfer between agencies and allows for DCR-DNH to nominate species for listing by VDACS.

Federally listed species are protected by the Endangered Species Act of 1973, as amended. The U.S. Department of the Interior's Fish and Wildlife Service administers the Act, listing and protecting federally endangered and threatened species. As of 2015, there were 16 plant species federally listed as endangered or threatened which occur or formerly occurred in Virginia.

The Virginia Department of Conservation and Recreation, Virginia Department of Agriculture and Consumer Services, and U. S. Fish and Wildlife Service work cooperatively to insure the continued survival of Virginia's diverse flora and other elements of natural diversity. The Division of Natural Heritage also works closely with other state and federal agencies, local governments, conservation organizations, and other organizations and individuals to seek adequate protection of Virginia's natural heritage.

FORMAT OF LISTS

Lists for each category (vascular plant lists, liverwort list, etc.) are alphabetized by scientific name. Each list has an identical format which presents six fields: scientific name, common name, global rank, state rank, federal status, and state status. To help interpret the list, a brief explanation of each field may be found on the following page.

Column 1. Scientific name:
Nomenclature for vascular plants almost exclusively follows Weakley, A.S., J.C. Ludwig, and J.F. Townsend, 2012. *Flora of Virginia*. Bland Crowder, ed. Foundation of the Flora of Virginia Project, Inc., Richmond. Fort Worth: Botanical Research Institute of Texas Press. A line is provided below the scientific name to provide synonyms when other names are used in popular botanical references.

Nomenclature for lichens follows Esslinger, T.L. 2014. A cumulative checklist for the lichen-forming, lichenicolous and allied fungi of the continental United States and Canada. North Dakota State University: http://www.ndsu.edu/pubweb/~esslinge/chcklst/chcklst7.htm (First Posted 1 December 1997, Most Recent Version (#19) 23 March 2014), Fargo, North Dakota.

Nomenclature for liverworts follows the Field Museum taxonomy module, located at:
http://emuweb.fieldmuseum.org/botany/taxonomic.php?_ga=1.125124173.613149090.1423754725

Nomenclature for mosses follows volumes 27 and 28 of Flora of North America, North of Mexico (Bryophytes, Part 1 and Part 2).

Column 2. Common name:
A common name is provided for the convenience of the user. Common names for plants follow the *Flora of Virginia*.

Column 3. Global rank:
Global ranks are assigned by a consensus of the network of natural heritage programs, scientific experts, and The Nature Conservancy to designate a rarity rank based on the range-wide status of a species or variety. This system was developed by The Nature Conservancy and is widely used by other agencies and organizations as the best available scientific and objective assessment of a taxon's rarity and level of threat to its existence. The ranks are assigned after considering a suite of factors, including number of occurrences, number of individuals, and severity of threats.

G1 = **Critically Imperiled** - At very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.

G2 = **Imperiled** - At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.

G3 = **Vulnerable** - At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.

G4 = **Apparently Secure** - Uncommon but not rare; some cause for long-term concern due to declines or other factors.

G5 = **Secure** – Common, widespread and abundant.

GH = **Possibly Extinct** - Missing; known from only historical occurrences but still some hope of rediscovery.

GX = **Presumed Extinct** - Not located despite intensive searches and virtually no likelihood of rediscovery.

GU = **Unrankable** - Currently unrankable due to lack of information or due to substantially conflicting information about status or trends. Whenever possible, the most likely rank is assigned and the question mark qualifier is added (e.g., G2?) to express uncertainty, or a range rank (e.g., G2G3) is used to delineate the range of uncertainty.

G_? = **Inexact Numeric Rank** - Denotes inexact numeric rank (e.g., G3?).

G_Q = **Questionable taxonomy** - Taxonomic distinctiveness of this entity at the current level is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, or the inclusion of this taxon in another taxon, with the resulting taxon having a lower conservation priority (e.g., G3Q).

G_T_ = **Infraspecific Taxa** - Signifies the rank of a subspecies or variety. For example, the rank G5T1 would be assigned to a very rare and localized variety of an otherwise widespread and common taxon.

GNR = **Unranked** – Global rank not yet assessed.

GNA = **Not applicable** – A conservation status rank is not applicable because the species is not a suitable target for conservation activities.

Column 4. State rank:
State ranks are assigned in a manner similar to that described for global ranks, but consider only those factors within the political boundaries of Virginia. For example, whereas a plant which is endemic to Virginia (found nowhere else) will have the same global and state ranks, a plant which may be common in the northeastern United States, but only known from a few occurrences in Virginia will have different global and state ranks. By comparing the global and state ranks, the status, rarity, and the urgency of conservation needs can be ascertained.

S1 = Critically Imperiled - At very high risk of extirpation from the state due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.

S2 = Imperiled - At high risk of extirpation from the state due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.

S3 = **Vulnerable** - At moderate risk of extirpation from the state due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.

S4 = Apparently Secure - Uncommon but not rare; some cause for long-term concern due to declines or other factors.

S5 = Secure – Common, widespread and abundant.

SH = Possibly Extirpated - Known only from historical occurrences but still some hope of rediscovery.

SX = **Presumed Extirpated** - Not located despite intensive searches and virtually no likelihood of rediscovery.

SU = **Unrankable** - Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

S_? = **Inexact Numeric Rank** - Denotes inexact numeric rank (e.g., S3?).

SNR = **Unranked** – State conservation status not yet assessed.

SNA = **Not Applicable** - A conservation status rank is not applicable because the species is not a suitable target for conservation activities.

Column 5. Federal Status:
Federal Status is determined by the U. S. Fish and Wildlife Service. This includes all species and varieties which are listed as endangered or threatened by the U. S. government and receive protection under the federal Endangered Species Act. The list also notes those taxa which are proposed for listing or are candidates for listing.

LE = **Listed Endangered** - A taxon is threatened with extinction throughout all or a significant portion of its range.

LT = **Listed Threatened** - A taxon is likely to become endangered in the foreseeable future.

PE = **Proposed Endangered** - A taxon is proposed for listing as endangered.

PT = **Proposed Threatened** - A taxon is proposed for listing as threatened.

C = **Candidate** - There is enough available information to propose the taxon for listing, but listing is "precluded by other pending proposals of higher priority". The U.S. Fish and Wildlife Service is "directed to make prompt use of the emergency listing if the well-being of any such species is at significant risk."

_* = An * following the status denotes that the species or variety is possibly extinct.

Column 6. State Status:
State status indicates those plants which are listed as state endangered or threatened under the authority of the Virginia Department of Agriculture and Consumer Services.

LE = **Listed Endangered**

LT = **Listed Threatened**

PE = **Proposed Endangered**

PT = **Proposed Threatened**

C = **Candidate for listing as threatened or endangered**

ACKNOWLEDGEMENTS

If not for the hard work of many biologists, these plant lists could not accurately reflect our current understanding of the Virginia flora. On the staff of the Division of Natural Heritage, Allen Belden, Gary Fleming, Chris Ludwig, Nancy Van Alstine, Karen Patterson, Kristin Taverna, Irvine Wilson, and Darren Loomis have provided many comments to refine the content of the lists. In addition to Heritage staff, members of the Virginia Botanical Associates have contributed greatly to our understanding of the Virginia flora via the continuously updated Digital Atlas of the Virginia Flora and through numerous personal communications.

Other individuals who have contributed include Rodney Bartgis, Stan Bentley, Jessica Bier, Jay Bolin, George Buchholz, Byron Carmean, Chris Clampitt, Jane Collins, Virginia Crouch, Steve Croy, Allison Cusick, Doug DeBerry,Tom Dierauf, Mike Donahue, Cris Fleming, Cecil Frost, Chris Frye, Charles Garratt, Mary Geil, Holly Grubbs, P.J. Harmon, Jessie Harris, Elaine Haug, John Hayden, Mike Hayslett, Frank Hirst, Hal Horwitz, Charles Horn, Fred Huber, Miles Johnson, Larry Klotz, John Knox, Ron Lance, Mike Lane, Chris Lea, Richard LeBlond, Mike Lipford, Greg Lipscomb, Marion Blois Lobstein, Steve Martin, Bill McAvoy, Bob McCartney, Robert McComb, Kent Minichiello, Marcia Minichiello, Bill Moorhead, Larry Morse, Lytton Musselman, Alan Neumann, Jesse Overcash, Jim Perry, Jeremy Poirier, Tom Rawinski, Garrie Rouse, Ernie Schuyler, Cindy Schulz, Perry Scott, Phil Sheridan, Rod Simmons, Rob Simpson, Bruce Sorrie, Nicky Staunton, Mark Strong, John Tate, Barry Truitt, Craig Tumer, Leonard J. Uttal, Brian van Eerden, Dick Weigand, Troy Weldy, Tom Wieboldt, Meegan Wallace, Alan Weakley, Chuck Williams, and Joan Wright.

GENERA INDEX

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Abies balsamea* (L.) P. Mill**	**Balsam fir**	**G5**	**S1**		
***Abies fraseri* (Pursh) Poir.**	**Fraser fir**	**G2**	**S1**		
***Acmispon helleri* (Britt.) A.A. Heller**	**Carolina Prairie-trefoil**	**G3**	**S1**		
syn: *Lotus helleri* Britton					
***Actaea rubifolia* (Kearney) Kartesz**	**Appalachian Black Cohosh**	**G3**	**S1**		
syn: *Cimicifuga rubifolia* Kearney					
***Adiantum capillus-veneris* L.**	**Venus'-hair Fern**	**G5**	**SH**		
***Aeschynomene virginica* (L.) B.S.P.**	**Sensitive Joint-vetch**	**G2**	**S2**	**LT**	**LT**
***Agalinis auriculata* (Michx.) Blake**	**Earleaf False Foxglove**	**G3**	**S1**		
syn: *Tomanthera auriculata* (Michx.) Raf.					
***Aletris aurea* Walt.**	**Golden Colicroot**	**G5**	**S1**		
***Allium allegheniense* Small**	**Allegheny Onion**	**G3?**	**S1**		
Under *A. cernuum* Roth in Fernald (1950) and Radford *et al.* (1968)					
***Allium oxyphilum* Wherry**	**Shale Barren Nodding Onion**	**G2**	**S1**		
***Alnus incana* (L.) Moench ssp. *rugosa* (Du Roi) Clausen**	**Speckled Alder**	**G5T5**	**S2**		
syn: *A. rugosa* (Du Roi) Spreng.					
***Amaranthus pumilus* Raf.**	**Sea-beach Amaranth**	**G2**	**S1**	**LT**	**LT**
***Amelanchier nantucketensis* Bickn.**	**Nantucket Shadbush**	**G3Q**	**S1**		
***Amphicarpum amphicarpon* (Pursh) Nash**	**Pine-barrens Peanut Grass**	**G4**	**S1**		
***Anagallis minima* (L.) Krause**	**Chaffweed**	**G5**	**SH**		
syn: *Centunculus minimus L.*					
***Anaphalis margaritacea* (L.) Benth. & Hook. f.**	**Pearly Everlasting**	**G5**	**S1**		
***Andropogon mohrii* (Hack.) Hack. ex Vasey**	**Mohr's Bluestem**	**G4?**	**SH**		
***Anemone berlandieri* Pritz.**	**Eastern Prairie Anemone**	**G4?**	**S1**		
***Anemone canadensis* L.**	**Canada Anemone**	**G5**	**SH**		
***Anthoxanthum hirtum* (Shrank) Y. Schouten & Veldkamp**	**Holy Grass**	**G5**	**S1**		
syn: *Hierochloe odorata* (L.) Beauv. ssp. *odorata*					
***Arabis patens* Sullivant**	**Spreading Rock Cress**	**G3**	**S1**		
***Arabis pycnocarpa* M. Hopkins var. *adpressipilis* M. Hopkins**	**Hairy Rock Cress**	**G5T4Q**	**S1S2**		
syn: *Arabis hirsuta* (L.) Scop. var. *adpressipilis* (M. Hopkins) Rollins					
***Aralia hispida* Vent.**	**Bristly Sarsaparilla**	**G5**	**S2**		
***Arctostaphylos uva-ursi* (L.) Spreng.**	**Bearberry**	**G5**	**S1**		
Arenaria lanuginosa* (Michx.) Rohrb. var. *lanuginosa	**Spreading Sandwort**	**G5T5**	**SH**		
***Arethusa bulbosa* L.**	**Dragon's-mouth**	**G5**	**SH**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Arnoglossum reniforme* (Hooker) H.E. Robins.** syn: *Arnoglossum muhlenbergii* (Schultz-Bip.) H.E. Robinson	**Great Indian-plantain**	**G4**	**S2**		
***Asclepias longifolia* Michx.**	**Long-leaf Milkweed**	**G4G5**	**S1**		
***Asclepias purpurascens* L.**	**Purple Milkweed**	**G5?**	**S2**		
***Asclepias rubra* L.**	**Red Milkweed**	**G4G5**	**S2**		
***Asclepias tuberosa* L. var. *rolfsii* (Britt. ex Vail) Woods.**	**Sandhills Butterfly-weed**	**G5TNR**	**S1**		
***Asplenium bradleyi* D.C. Eaton**	**Bradley's Spleenwort**	**G4**	**S2**		
Astragalus distortus* Torr. & Gray var. *distortus	**Ozark Milkvetch**	**G5T5?**	**SH**		
***Astragalus neglectus* (Torr. & Gray) Sheldon**	**Cooper's Milkvetch**	**G4**	**S2**		
***Atriplex glabriuscula* Edmondston**	**Maritime Orach**	**G5**	**SH**		
***Bacopa caroliniana* (Walt.) B.L. Robins.**	**Blue Water-hyssop**	**G4G5**	**SH**		
***Bacopa innominata* (G.Maza) Alain** Virginia material formerly named *B. stragula* Fern.	**Tropical Water-hyssop**	**G3G5**	**S2**		
***Bacopa rotundifolia* (Michx.) Wettst.** Virginia material formerly named *B. simulans* Fern.	**Round-leaf Water-hyssop**	**G5**	**SH**		
***Baptisia albescens* Small** Treated as *B. alba* (L.) R. Brown in Fernald (1950)	**Narrow-pod White Wild Indigo**	**G4**	**S1**		
***Baptisia cinerea* (Raf.) Fern. & Schub.**	**Gray-hairy Wild Indigo**	**G3G4**	**SH**		
***Bartonia verna* (Michx.) Raf. Ex Bart.**	**Spring Bartonia**	**G5?**	**S1**		
***Betula lenta* L. var. *uber* Ashe** *syn: Betula uber* (Ashe) Fern.	**Virginia Roundleaf Birch**	**G5T1Q**	**S1**	**LT**	
***Betula papyrifera* Marshall** Virginia material has traditionally been treated as *Betula cordifolia* but most populations closely resemble *B. papyrifera.* They are under study.	**Paper Birch**	**G5**	**S2**		
***Betula populifolia* Marsh.**	**Gray Birch**	**G5**	**S1**		
***Boechera dentata* (Raf.) Al-Shehbaz & Zarruchi** syn: *Arabis shortii* (Fern.) Gleason	**Short's Rock Cress**	**G5**	**S1**		
***Boechera serotina* (Steele) Windham & Al-Shehbaz** syn: *Arabis serotina* Steele	**Shale Barren Rock Cress**	**G2**	**S2**	**LE**	**LT**
***Bolboschoenus fluviatilis* (Torr.) J. Sojak** syn: *Schoenoplectus fluviatilis* (Torr.) M.T. Strong	**River Bulrush**	**G5**	**S2**		
***Boltonia asteroides* (L.) L'Her var. *glastifolia* (Hill) Fern.**	**Eastern Doll's-daisy**	**G5TNR**	**S2**		
***Boltonia montana* J.F. Townsend & V. Karaman-Castro**	**Valley Doll's-daisy**	**G1G2**	**S1**		**LE**

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Botrychium lanceolatum* (Gmel.) Angstr. var. *angustisegmentum* Pease & Moore**	**Triangle Grape Fern**	**G5T4**	**SH**		
Botrychium simplex* E. Hitchc. var. *simplex	**Dwarf Gape Fern**	**G5T5**	**S1**		
***Bromus ciliatus* L.**	**Fringed Brome Grass**	**G5**	**S1**		
***Bromus kalmii* Gray**	**Arctic Brome**	**G5**	**S1**		
***Buchnera americana* L.**	**American Bluehearts**	**G5?**	**S1S2**		
***Buckleya distichophylla* (Nutt.) Torr.**	**Piratebush**	**G3**	**S2**

***Cypripedium reginae* Walt.**	**Showy Lady's-slipper**	**G4G5**	**S1**		
***Cystopteris tennesseensis* Shaver**	**Tennessee Bladder Fern**	**G5**	**S1**		
***Dasistoma macrophyllum* (Nutt.) Raf.**	**Mullein Foxglove**	**G4**	**S1**		
***Deschampsia cespitosa* (L.) Beauv.**	**Tufted Hairgrass**	**G5**	**S1**		
***Desmodium canadense* (L.) DC.**	**Showy Tick-trefoil**	**G5**	**S1**		
Desmodium cuspidatum* (Muhl. *ex* Willd.) DC. ex Loud. var. *cuspidatum	**Toothed Tick-trefoil**	**G5T5?**	**S2**		
***Desmodium ochroleucum* M.A. Curtis ex Canby**	**Cream-flowered Tick-trefoil**	**G2**	**S1**		
***Desmodium sessilifolium* (Torr.) Torr. & Gray**	**Sessile-leaf Tick-trefoil**	**G5**	**S2**		
***Desmodium strictum* (Pursh) DC.**	**Pineland Tick-trefoil**	**G4**	**S2**		
***Desmodium tenuifolium* Torr. & Gray**	**Slim-leaf Tick-trefoil**	**G4**	**S1**		
***Diamorpha smallii* Britt. ex Small**	**Small's Stonecrop**	**G4**	**S1**		
syn: *Sedum smallii* (Britton ex Small) Ahles					
***Dichanthelium caerulescens* (Hack. ex Hitchc.) Correll**	**Blue Panic Grass**	**G2G3**	**S1**		
syn: *Panicum caerulescens* Hack ex A.S. Hitchc.					
Under *D. dichotomum* (L.) Gould var. *dichotomum* in Kartesz (1999)					
***Dichanthelium consanguineum* (Kunth) Gould & C. A. Clark**	**Blood Panic Grass**	**G5**	**S1S2**		
syn: *Panicum consanguineum* Kunth					

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Dichanthelium cryptanthum* (Ashe) LeBlond** syn: *Panicum scabriusculum* (Ell.) Gould & Clark var. *cryptanthum* (Ashe) Gleason	**Hidden-flowered Panic Grass**	**G3G4Q**	**S1**		
***Dichanthelium curtifolium* (Nash) LeBlond** syn: *Dichanthelium ensifolium* (Baldw. ex Ell.) Gould ssp. *curtifolium* (Nash) Freckmann & LeLong	**Short-leaved Witchgrass**	**G3?**	**S1**		
Dichanthelium ovale* (Ell.) Gould & C. A. Clark var. *ovale syn: *Panicum ovale* Ell. var. *ovale*	**Oval-flowered Panic Grass**	**G5T5**	**S1?**		
***Dichanthelium sp.* 12** Undescribed taxon known from shale woodlands in Bath County	**A Panic Grass**	**GNR**	**S1**		
***Dichanthelium sp.* 13** Undescribed taxon known from mafic woodlands in Halifax County	**A Panic Grass**	**GNR**	**S1**		
Dichanthelium strigosum* (Muhl. ex Ell.) Freckmann var. *strigosum syn: *Panicum strigosum* Muhl. ex Ell. var. *strigosum*	**Rough-hair Panic Grass**	**G5T5**	**SH**		
***Didiplis diandra* (Nutt. ex DC.) Wood** syn: *Peplis diandra* Nutt. ex DC.	**Water-purslane**	**G5**	**S1**		
***Digitaria cognata* (J.A. Schultes) Pilger** syn: *Leptoloma cognata* (J.A. Schultes) Chase	**Fall Witch Grass**	**G5**	**S1**		
***Digitaria serotina* (Walt.) Michx.**	**Dwarf Crabgrass**	**G5?**	**S1**		
***Drymocallis arguta* (Pursh) Rydberg** syn: *Potentilla arguta* Pursh	**Tall Cinquefoil**	**G5**	**S1**		
Dryopteris clintoniana (D.C. Eaton) Dowell	**Clinton's Wood Fern**	**G5**	**SH**		
***Echinacea laevigata* (C.L. Boynt. & Beadle) Blake**	**Smooth Coneflower**	**G2G3**	**S2**	**LE**	**LT**
***Echinocystis lobata* (Michx.) Torr. & Gray**	**Wild Cucumber**	**G5**	**SH**		
***Echinodorus tenellus* (Mart.) Buch.** syn: *Echinodorus parvulus* Engelm.	**Dwarf Burhead**	**G5?**	**S1**		
***Elatine minima* (Nutt.) Fisch. & C.A. Mey.**	**Small Waterwort**	**G5**	**S1**		
***Eleocharis baldwinii* (Torr.) Chapman**	**Baldwin's Spikerush**	**G4G5**	**S1**		
***Eleocharis bifida* S.G. Smith**	**Glades Spikerush**	**G3G4**	**S1**		
Eleocharis compressa* Sullivant var. *compressa	**Flattened Spikerush**	**G4TNR**	**S2**		
***Eleocharis elliptica* Kunth**	**Elliptic Spikerush**	**G5**	**S1**		
***Eleocharis equisetoides* (Ell.) Torr.**	**Horsetail Spikerush**	**G4**	**S1**		
***Eleocharis intermedia* J.A. Schultes**	**Matted Spikerush**	**G5**	**S1**		
***Eleocharis melanocarpa* Torr.**	**Black-fruited Spikerush**	**G4**	**S2**		
***Eleocharis radicans* (A. Dietr.) Kunth**	**Rooted Spikerush**	**G5**	**SH**		
***Eleocharis robbinsii* Oakes**	**Robbins' Spikerush**	**G4G5**	**S1**		
***Eleocharis tricostata* Torr.**	**Three-angled Spikerush**	**G4**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Eleocharis uniglumis* (Link) Schultes** formerly listed as *Eleocharis halophila*	**One-scale Spikerush**	**G5**	**S1**		
***Eleocharis vivipara* Link**	**Viviparous Spikerush**	**G5**	**S1**		
***Eleocharis wolfii* (Gray) Gray ex Britt.**	**Wolf's Spikerush**	**G3G5**	**S1**		
Elymus canadensis* L. var. *canadensis	**Nodding Wild Rye**	**G5TNR**	**S1**		
Elymus trachycaulus* (Link) Gould ex Shinners ssp. *trachycaulus syn: *Agropyron trachycaulum* (Link) Malte ex H.F. Lewis	**Slender Wheatgrass**	**G5T5**	**S1**		
***Enemion biternatum* Raf.** syn: *Isopyrum biternatum* (Raf.) Torr. & Gray	**False Rue-anemone**	**G5**	**S1**		
Epilobium ciliatum* Raf. ssp. *ciliatum	**American Willow-herb**	**G5T5**	**S1**		
***Epilobium leptophyllum* Raf.**	**Bog Willow-herb**	**G5**	**S2S3**		
***Equisetum fluviatile* L.**	**Water Horsetail**	**G5**	**S1**		
***Equisetum sylvaticum* L.**	**Woodland Horsetail**	**G5**	**S1**		
***Erigeron vernus* (L.) Torr. & Gray**	**White-top Fleabane**	**G5**	**S2**		
***Eriocaulon aquaticum* (Hill) Druce**	**Seven-angled Pipewort**	**G5**	**S1**		
Eriocaulon decangulare* L. var. *decangulare	**Ten-angled Pipewort**	**G5T5?**	**S2**		
***Eriocaulon parkeri* B.L. Robins.**	**Parker's Pipewort**	**G3**	**S2**		
***Eryngium integrifolium* Walt.**	**Blue-flower Eryngo**	**G5**	**S1**		
Eryngium yuccifolium* Michx. var. *yuccifolium	**Northern Rattlesnake-master**	**G5T5**	**S2**		
Erysimum capitatum* (Dougl. ex Hook.) Greene var. *capitatum All Virginia *E. capitatum* is var. *capitatum*	**Western Wallflower**	**G5T5**	**S2**		
***Erythronium albidum* Nutt.**	**White Trout Lily**	**G5**	**S2**		
***Eupatorium linearifolium* Walter**	**Narrow-leaf Bushy Thoroughwort**	**G5**	**SH**		
***Eupatorium maritimum* E.E. Schilling** Newly named taxon, formerly lumped with *Eupatorium anomalum* Nash	**A Eupatorium**	**G2?**	**S1**		
***Euphorbia bombensis* Jacquin** syn: *Chamaesyce bombensis* (Jacquin) Dugand	**Southern Seaside Spurge**	**G4G5**	**S2**		
***Euphorbia exserta* (Small) Coker**	**Maroon Sandhills Spurge**	**G4?**	**S1**		
***Euphorbia purpurea* (Raf.) Fern.**	**Glade Spurge**	**G3**	**S2**		
***Eurybia radula* (Ait.) Nesom** syn: *Aster radula Ait.*	**Low Rough Aster**	**G5**	**S1**		
***Eurybia surculosa* (Michx) Nesom** syn: *Aster surculosus Michx.*	**Creeping Aster**	**G4G5**	**S1S2**		
Eutrochium maculatum* (L.) E.E. Lamont var. *maculatum syn: *Eupatorium maculatum* L. var. *maculatum*	**Spotted Joe-pye-weed**	**G5T5**	**S1**		
***Filipendula rubra* (Hill) B.L. Robins.**	**Queen-of-the-Prairie**	**G4G5**	**S2**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Fimbristylis perpusilla* Harper *ex* Small & Britt.**	**Harper's Fimbry**	**G2**	**S1**		**LE**
Fimbristylis puberula* (Michx.) Vahl var. *puberula	**Hairy Fimbry**	**G5T5**	**S1**		
Under *F. spadicea* (L.) Vahl. in Radford et al. (1968)					
Under *F. caroliniana* (Lam.) Fern. in Fernald (1950)					
All Virginia *F. puberula* is var. *puberula*					
***Fleischmannia incarnata* (Walt.) King & H.E. Robins.**	**Pink Thoroughwort**	**G5**	**S2**		
syn: *Eupatorium incarnatum* Walter					
***Fragaria vesca* L. var. *americana* (Porter) Staudt**	**Woodland Strawberry**	**G5T5**	**S1**		
All native *F. vesca* is var. *americana*					
***Fuirena breviseta* (Coville) Coville**	**Short-bristled Umbrella-sedge**	**G5**	**SH**		
Under *F. squarrosa* Michx. in Radford et al. (1968)					
***Gaylussacia brachycera* (Michx.) Gray**	**Box Huckleberry**	**G3**	**S1**		
***Gentiana autumnalis* L.**	**Pine Barren Gentian**	**G3**	**S1**		
***Gentianella quinquefolia* (L.) Small var. *occidentalis* Gray**	**Western Stiff Gentian**	**G5T4T5**	**S1**		
***Gentianopsis crinita* (Froel.) Ma**	**Greater Fringed Gentian**	**G5**	**S1**		
***Geum aleppicum* Jacq.**	**Yellow Avens**	**G5**	**SH**		
***Geum laciniatum* Murr.**	**Rough Avens**	**G5**	**S1**		
***Gillenia stipulata* (Muhl. ex Willd.) Nutt.**	**American ipecac**	**G5**	**S1**		
syn: *Porteranthus stipulatus* (Muhl. ex Willd.) Britt.					
Glyceria grandis* S. Wats. var. *grandis	**American Mannagrass**	**G5T5**	**S1**		
***Glyceria laxa* (Scribn.) Scribn.**	**Northern Mannagrass**	**G5**	**S1**		
***Gnaphalium uliginosum* L.**	**Low Cudweed**	**G5**	**S1**		
***Goodyera repens* (L.) R. Br. ex Ait. f.**	**Dwarf Rattlesnake-plantain**	**G5**	**S1**		
***Gratiola ramosa* Walt.**	**Branched Hedge-hyssop**	**G4G5**	**S1**		
***Harperella nodosa* Rose**	**Harperella**	**G2**	**S1**	**LE**	**LE**
syn: *Ptilimnium nodosum* (Rose) Mathias					
***Helenium brevifolium* (Nutt.) Wood**	**Short-leaf Sneezeweed**	**G4**	**S2**		
***Helenium virginicum* Blake**	**Virginia Sneezeweed**	**G3**	**S2**	**LT**	**LE**
Helianthus occidentalis* Riddell ssp. *occidentalis	**Western Sunflower**	**G5T5**	**S1**		
Heliotropium curassavicum* L. var. *curassivicum	**Seaside Heliotrope**	**G5T5**	**S1**		
***Helonias bullata* L.**	**Swamp-pink**	**G3**	**S2S3**	**LT**	**LE**
***Heteranthera multiflora* (Griseb.) Horn**	**Mud Plantain**	**G4**	**S1**		
***Heuchera alba* Rydb.**	**White Alumroot**	**G2Q**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Heuchera caroliniana* (Rosendahl, Butters & Lakela) E. Wells**	**Carolina Alumroot**	**G3**	**S1**		
***Hexastylis contracta* Blomquist**	**Mountain Heartleaf**	**G3**	**S1**		
***Honckenya peploides* (L.) Ehrh. ssp. *robusta* (Fern.) Hulten** syn: *Honkenya peploides* (L.) Ehrh. syn: *Arenaria peploides* L. var. *robusta* Fern.	**Sea-beach Sandwort**	**G5T5**	**SH**		
Hordeum jubatum* L. ssp. *jubatum Only native Virginia occurrences are monitored	**Foxtail Barley**	**G5T5**	**S1**		
***Houstonia canadensis* Willd. ex Roemer & J.A. Schultes** syn: *Hedyotis canadensis* (Willd. ex Roemer & J.A. Schultes) Fosberg	**Canada Bluets**	**G4G5**	**S2**		
***Houstonia montana* Small** syn: *Houstonia purpurea* L. var. *montana* (Small) Terrell	**Roan Mountain Bluet**	**G2**	**S1**	**LE**	
Houstonia nigricans* (Lam.) Fernald var. *nigricans syn: *Hedyotis nigricans* (Lam.) Fosberg	**Glade Bluets**	**G5T5**	**S1**		
***Huperzia appressa* (Desvaux) A. Löve & D. Löve** syn: *Huperzia appalachiana* Beitel & Mickel Includes apparent hybrids between *H. appressa* and *H. lucidula*	**Appalachian Fir Clubmoss**	**G5**	**S2**		
***Huperzia porophila* (Lloyd & Underwood) Holub** syn: *Lycopodium porophilum* Lloyd & Underwood	**Rock Clubmoss**	**G4**	**S1**		
***Hydrocotyle bonariensis* Comm. ex Lam.**	**Coastal Water-pennywort**	**G5**	**S2**		
***Hypericum adpressum* Raf. ex W. Bart.**	**Bog St. John's-wort**	**G3**	**S1**		
***Hypericum boreale* (Britt.) Bickn.**	**Northern St. John's-wort**	**G5**	**S2**		
***Hypericum densiflorum* Pursh var. *interior* (Small) Sorrie & Weakley**	**Interior Bushy St. John's-wort**	**G5TNR**	**S1**		
***Hypericum denticulatum* Walt.** Does not include *H. virgatum* (=*H. denticulatum var. acutifolium* Ell.)	**Coppery St. John's-wort**	**G5**	**S1**		
***Hypericum ellipticum* Hook.**	**Pale St. John's-wort**	**G5**	**S1**		
***Hypericum fraseri* Spach** syn: *Triadenum fraseri* (Spach) Gleason	**Fraser's Marsh St. John's-wort**	**G5**	**S2**		
***Hypericum lloydii* (Svenson) P. Adams**	**Sandhill St.-John's-wort**	**G4?**	**SH**		
***Hypericum setosum* L.**	**Hairy St. John's-wort**	**G4G5**	**S1S2**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Hypericum tubulosum* Walt.**	**Lesser Marsh St. John's-wort**	**G4?**	**S2**		
syn: *Triadenum tubulosum* (Walt.) Gleason					
***Hypoxis sessilis* L.**	**Glossy-seed Yellow Stargrass**	**G4**	**SH**		
Includes *H. longii* Fern.					
***Ilex collina* Alexander**	**Long-stalked Holly**	**G3**	**S1**		**LE**
syn: *Nemopanthus collinus* (Alexander) R. Clark					
***Ilex coriacea* (Pursh) Chapman**	**Big Gallberry**	**G5**	**S1**		
***Iliamna corei* Sherff**	**Peters Mountain Mallow**	**G1**	**S1**	**LE**	**LE**
***Iliamna remota* Greene**	**Kankakee Mallow**	**G1Q**	**S1**		
***Isoetes appalachiana* Brunton & Britton**	**Appalachian Quillwort**	**G4**	**S1**		
***Isoetes hyemalis* Brunton**	**Winter Quillwort**	**G2G3**	**S2**		
***Isoetes lacustris* L.**	**Lake Quillwort**	**G5**	**SH**		
***Isoetes mattaponica* L.J. Musselman & W.C. Taylor**	**Mattaponi Quillwort**	**GNR**	**S2**		
***Isoetes melanopoda* Gay & Durieu *ex* Durieu**	**Black-footed Quillwort**	**G5**	**S1**		
***Isoetes piedmontana* (N.E. Pfeiffer) C.F. Reed**	**Piedmont Quillwort**	**G4**	**S1**		
***Isoetes virginica* N.E. Pfeiffer**	**Virginia Quillwort**	**G1**	**S1**		**LE**
***Isotria medeoloides* (Pursh) Raf.**	**Small Whorled Pogonia**	**G2?**	**S2**	**LT**	**LE**
***Iva imbricata* Walt.**	**Dune Marsh-elder**	**G5?**	**S1**		
***Juncus articulatus* L.**	**Jointed Rush**	**G5**	**S1**		
***Juncus balticus* Willd. var. *littoralis* Engelm.**	**Baltic Rush**	**G5T5**	**S1**		
***Juncus brachycephalus* (Engelm.) Buch.**	**Small-headed Rush**	**G5**	**S2**		
***Juncus brevicaudatus* (Engelm.) Fern.**	**Narrow-panicled Rush**	**G5**	**S2**		
***Juncus caesariensis* Coville**	**New Jersey Rush**	**G2G3**	**S2**		**LT**
***Juncus elliottii* Chapman**	**Bog Rush**	**G4G5**	**S1**		
***Juncus megacephalus* M.A. Curtis**	**Big-headed Rush**	**G4G5**	**S2**		
***Juncus nodosus* L.**	**Knotted Rush**	**G5**	**S1**		
***Juncus pelocarpus* E. Mey.**	**Brown-fruited Rush**	**G5**	**S2**		
***Juncus torreyi* Coville**	**Torrey's Rush**	**G5**	**S1**		
***Juncus trifidus* L.**	**Highland Rush**	**G5**	**S1**		
***Juniperus communis* L. var. *depressa* Pursh**	**Ground Juniper**	**G5T5**	**S1**		
At least one Virginia population thought to be var. *depressa* has been redetermined as the introduced var. *communis*. Other populations should be re-examined.					
***Kalmia angustifolia* L.**	**Sheep Laurel**	**G5**	**S2**		
***Kalmia carolina* Small**	**Carolina Laurel**	**G4**	**S2**		
syn: *Kalmia anugustifolia* L. var. *caroliniana* (Small) Fernald					
***Lachnanthes caroliniana* (Lam.) Dandy**	**Redroot**	**G4**	**SH**		
***Lachnocaulon anceps* (Walt.) Morong**	**Common Bog-buttons**	**G5**	**S1**		
***Lathyrus palustris* L.**	**Marsh Pea**	**G5**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
Lechea intermedia* Leggett ex Britt. var. *intermedia	**Round-fruit Pinweed**	**G5T4T5**		**SH**	
***Leersia hexandra* Sw.**	**Southern Cutgrass**	**G5**		**SH**	
***Lemna trisulca* L.**	**Star Duckweed**	**G5**		**S1**	
***Leucothoe fontanesiana* (Steud.) Sleumer** syn: *L. axillaris* (Lam.) D. Don var. *editorum* (Fern. & Shub.) Ahles	**Highland Dog-hobble**	**G5**		**S1S2**	
***Lilaeopsis carolinensis* Coult. & Rose**	**Carolina Lilaeopsis**	**G3G5**		**S1**	
***Lilium catesbaei* Walt.**	**Pine Lily**	**G4**		**S1**	
***Lilium grayi* S. Wats.** Includes low-elevation (< 1200 m.) occurrences, which are likely intergrades between *L. grayi* and *L. canadense*	**Gray's Lily**	**G3**		**S2**	
***Lilium pyrophilum* M.W. Skinner & Sorrie** Virginia occurrences alleged to be closer genetically to *Lilium superbum* than typical L. pyrophilum of the Carolinas	**Sandhills Bog Lily**	**G2**		**S1**	
***Limosella australis* R. Br.** syn: *L. subulata* Ives	**Mudwort**	**G4G5**		**SH**

***Spiranthes lucida* (H.H. Eat.) Ames**	**Shining Ladies'-tresses**	**G4**	**S1S2**		
***Spiranthes magnicamporum* Sheviak**	**Great Plains Ladies'-tresses**	**G3G4**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
Sporobolus compositus* (Poir.) Merr. var. *compositus	**Tall Dropseed**	**G5T5**	**S2**		
syn: *S. asper* (Beauv.) Kunth, All Virginia *S. compositus* is var. *compositus*					
***Sporobolus heterolepis* (Gray) Gray**	**Prairie Dropseed**	**G5**	**S1**		
***Sporobolus junceus* (Beauv.) Kunth**	**Purple Dropseed**	**G5**	**S1**		
***Sporobolus neglectus* Nash**	**Small Dropseed**	**G5**	**S1**		
***Sporobolus ozarkanus* Fernald**	**Ozark Dropseed**	**G5?**	**S1**		
***Stachys appalachiana* D.B. Poindexter & J.B. Nelson**	**Appalachian Hedge-Nettle**	**GNR**	**S1**		
***Stachys arenicola* Britt.**	**Hairy Hedge-nettle**	**G4?**	**S1**		
Given as *S. palustris* L. in Harvill et al. (1992)					
***Stachys aspera* Michx.**	**Rough Hedge-nettle**	**G4?**	**S2**		
syn: *S. hyssopifolia* Michx. var. *ambigua* Gray					
***Stachys eplingii* J. Nelson**	**Epling's Hedge-nettle**	**G1G2**	**S1**		
***Stachys matthewsii* G.P. Fleming, J.B. Nelson, & J.F. Townsend**	**Yadkin Hedge-nettle**	**G1G2**	**S1**		
		G5	**S1**		
***Steinchisma hians* (Ell.) Nash**	**Gaping Panic Grass**				
syn: *Panicum hians* Ell.					
Stellaria alsine Grimm	**Bog Chickweed**	**G5**	**S1**		
***Stenanthium densum* (Desr.) Zomlefer & Judd**	**Dense-flowered Camas**	**G5**	**S1**		
***Stenanthium leimanthoides* (A. Gray) Zomlefer & Judd**	**Pinebarrens Death-camas**	**G4Q**	**S1**		
***Stewartia ovata* (Cav.) Weatherby**	**Mountain Camellia**	**G4**	**S2**		
Stillingia sylvatica* Garden ex L. ssp. *sylvatica	**Queen's-delight**	**G5T5**	**S1**		
Stipulicida setacea* Michx. var. *setacea	**Pineland Scalypink**	**G4G5T4T5**	**S1**		
***Streptopus amplexifolius* (L.) DC.**	**White Mandarin**	**G5**	**S1**		
***Stylophorum diphyllum* (Michx.) Nutt.**	**Celandine Poppy**	**G5**	**S2**		
***Sullivantia sullivantii* (Torr. & Gray) Britt.**	**Sullivantia**	**G4**	**S1**		
Symphoricarpos albus* (L.) Blake var. *albus	**Common Snowberry**	**G5T5**	**S1**		
All native Virginia *S. albus* is var. *albus*, non-native material is *S. albus* var. *laevigatus* (Fern.) Blake					
***Symphyotrichum elliottii* (Torr. & Gray) Nesom**	**Elliott's Aster**	**G4**	**S1**		
syn: *Aster puniceus* L. var. *elliottii* (Torr. & Gray) A.G. Jones					
syn: *A. elliottii* Torr. & Gray					
***Symphyotrichum praealtum* (Poiret) Nesom var. *angustior* (Wiegand) Nesom**	**Willow-leaf Aster**	**G5T4**	**S1**		
syn: *Aster praealtus* Poir. var. *angustior* Wieg.					
***Symphyotrichum pratense* (Raf.) Nesom**	**Western Silvery Aster**	**G4?**	**S1**		
syn: *Aster pratensis* Raf.					
syn: *A. sericeus* Vent. var. *microphyllus* DC.					

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Symphyotrichum shortii* (Lindl.) Nesom** syn: *Aster shortii* Lindl.	**Short's Aster**	**G5**	**S1**		
Symphyotrichum schistosum (Steele) Nesom syn: Aster schistosus Steele syn: A. x schistosus (Steele) Nesom in Kartesz (1999)	**Millboro Aster**	**GNA**	**S1**		
***Synandra hispidula* (Michx.) Baill.**	**Gyandotte Beauty**	**G4**	**S2**		
***Taxodium ascendens* Brongn.** Largest population contains trees transitional to *T. distichum*	**Pondcypress**	**G5**	**S1**		
***Tetragonotheca helianthoides* L.**	**Squarehead**	**G5**	**S1**		
***Thalictrum macrostylum* Small & Heller**	**Small-leaved Meadow-rue**	**G3G4**	**S1**		
***Tillandsia usneoides* (L.) L.**	**Spanish-moss**	**G5**	**S1S2**		
***Toxicodendron rydbergii* (Small ex Rydb.) Greene**	**Western Poison Ivy**	**G5**	**S1**		
***Triantha glutinosa* (Michx.) Pers.** syn: *Tofieldia glutinosa* (Michx.) Pers.	**Sticky False Asphodel**	**G5**	**S1**		
***Triantha racemosa* (Walt.) B.S.P.** syn: *Tofieldia racemosa* (Walt.) B.S.P.	**Coastal False Asphodel**	**G5**	**SH**		
***Trichostema setaceum* Houtt.**	**Narrow-leaf Blue Curls**	**G5**	**S2**		
***Tridens chapmanii* (Small) Chase** syn: *T. flavus* (L.) A.S. Hitchc. var. *chapmanii* (Small) Shinners	**Chapman's Purpletop**	**G3**	**S1**		
***Trifolium calcaricum* Collins and Wieboldt**	**Running Glade Clover**	**G1**	**S1**		**LE**
***Trifolium reflexum* L.**	**Buffalo Clover**	**G3G4**	**S1**		
***Trillium cernuum* L.**	**Nodding Trillium**	**G5**	**S2**		
***Trillium flexipes* Raf.**	**Drooping Trillium**	**G5**	**SH**		
***Trillium nivale* Riddell**	**Snow Trillium**	**G4**	**S1**		
***Trillium pusillum* Michx. var. *virginianum* Fern.** Includes var. *moniticulum* Bodkin & Reveal	**Virginia Least Trillium**	**G3T2**	**S2**		
Triphora trianthophora* (Sw.) Rydb. ssp. *trianthophora	**Three Birds Orchid**	**G3G4T3T4**	**S1**		
***Trisetum spicatum* (L.) Richter**	**Narrow False Oats**	**G5**	**S1**		
***Turritis glabra* L.** syn: *Arabis glabra* (L.) Bernh.	**Tower Mustard**	**G5**	**S1**		
***Utricularia juncea* Vahl**	**Southern Bladderwort**	**G5**	**S1**		
***Utricularia olivacea* C. Wright ex Griseb.**	**Dwarf Bladderwort**	**G4**	**SH**		
***Utricularia purpurea* Walt.**	**Purple Bladderwort**	**G5**	**S2**		
***Utricularia striata* Le Conte ex Torr.** syn: *U. fibrosa* Walt.	**Fibrous Bladderwort**	**G4G5**	**S1**		
***Vaccinium crassifolium* Andr.**	**Creeping Blueberry**	**G4G5**	**S1**		
***Vaccinium macrocarpon* Ait.**	**Cranberry**	**G5**	**S2**		
***Vaccinium myrtilloides* Michx.**	**Velvetleaf Blueberry**	**G5**	**S1**		
***Valeriana pauciflora* Michx.**	**Pink Valerian**	**G4**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Valerianella chenopodiifolia* (Pursh) A.P. de Candolle**	**Goosefoot Corn-salad**	**G4**	**SH**		
***Vandenboschia boschiana* (Sturm) Ebihara & K. Iwatsuki** syn: *Trichomanes boscianum* Sturm	**Appalachian Filmy Fern**	**G4**	**S1**		
***Verbena scabra* Vahl**	**Rough Vervain**	**G5**	**S1**		
***Veronica scutellata* L.**	**Marsh Speedwell**	**G5**	**S1**		
***Viburnum lentago* L.**	**Nannyberry**	**G5**	**S1**		
Vicia americana* Muhl. ex Willd. var. *americana	**American Vetch**	**G5T5**	**S1**		
***Viola* sp. 1** Unnamed taxon of shale barrens and woodlands, similar in appearance to *Viola pedatifida* G. Don	**A Violet**	**GNR**	**S1**		
***Viola tripartita* Ell. var. *glaberrima* (DC.) R.M. Harper**	**Three-parted Violet**	**G5T3?**	**S1**		
Viola walteri* House var. *walteri	**Prostrate Blue Violet**	**G4G5TNR**	**S2**		
***Vitis rupestris* Scheele**	**Sand Grape**	**G3**	**S1**		
***Wisteria frutescens* (L.) Poir.**	**American Wisteria**	**G5**	**S1**		
***Wolffia columbiana* Karst.**	**Columbian Watermeal**	**G5**	**S1**		
***Xyris caroliniana* Walt.**	**Carolina Yellow-eyed Grass**	**G4G5**	**S1**		
***Xyris curtissii* Malme** syn: *X. difformis* Chapman var. *curtisii* (Malme) Kral	**Curtiss' Yellow-eyed Grass**	**G5**	**S1**		
***Xyris fimbriata* Ell.**	**Fringed Yellow-eyed Grass**	**G5**	**S1**		
***Xyris iridifolia* Chapman** syn: *Xyris laxifolia* Mart. var. *iridifolia* (Chapman) Kral	**Iris-leaf Yellow-eyed Grass**	**G4G5**	**S1**		
***Xyris platylepis* Chapman**	**Tall Yellow-eyed Grass**	**G5**	**S2**		
***Yucca aloifolia* L.**	**Spanish Dagger**	**G5**	**S1**		
***Yucca flaccida* Haworth**	**Weakleaf Yucca**	**G5**	**S1**		
***Zenobia pulverulenta* (Bartr. ex Willd.) Pollard**	**Dusty Zenobia**	**G4?**	**S1**		
***Zigadenus glaberrimus* Michx.**	**Large Death-camas**	**G5**	**S1**		
***Zornia bracteata* J.F. Gmel.**	**Viperina**	**G5?**	**S1**

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Acalypha deamii* (Weatherby) Ahles**	**Deam's Copperleaf**	**G4?**	**S3**		
***Aconitum reclinatum* Gray**	**White Monkshood**	**G3**	**S3**		
***Adlumia fungosa* (Ait.) Greene ex B.S.P.**	**Climbing Fumitory**	**G4**	**S3**		
***Agrostis scabra* Willd.**	**Rough Bentgrass**	**G5**	**S3?**		
***Amelanchier sanguinea* (Pursh) DC.**	**Roundleaf Serviceberry**	**G5**	**S3**		
Amsonia tabernaemontana* Walt. var. *tabernaemontana	**Eastern Blue-star**	**G5T5**	**S3**		
***Andropogon perangustatus* Nash**	**Narrow-leaved Bluestem**	**G4**	**S3**		
syn: A. *gyrans* Ashe var. *stenophyllus* (Hack.) C. Cambell					
***Andropogon virginicus* L. var. *decipiens* C. Campbell**	**Deceptive Bluestem**	**G5T4**	**S3**		
Under *A. virginicus* L. in Radford *et al.* (1968)					
Under *A. virginicus* L. var. *virginicus* in Fernald (1950)					
***Anemone quinquefolia* L. var. *minima* (DC.) Frodin**	**Dwarf Anemone**	**G5T3**	**S3**		
***Anticlea glauca* Kunth**	**White Death-camas**	**G4G5**	**S3**		
syn: *Zigadenus elegans* Pursh ssp. *glaucus* (Nutt.) Hulten					
***Aristida lanosa* Muhl. ex Ell.**	**Woolly Three-awn Grass**	**G5**	**S3**		
***Aristida tuberculosa* Nutt.**	**Sea-beach Needlegrass**	**G5**	**S3**		
Asclepias incarnata* L. var. *incarnata	**Swamp Milkweed**	**G5T5**	**S3**		
***Asclepias lanceolata* Walt.**	**Few-flower Milkweed**	**G5**	**S3**		
***Asimina parviflora* (Michx.) Dunal**	**Dwarf Pawpaw**	**G5**	**S3**		
***Bacopa monnieri* (L.) Pennell**	**Coastal Water-hyssop**	**G5?**	**S3**		
Baptisia australis* (L.) R. Br. ex Ait. f. var. *australis	**Blue Wild Indigo**	**G5T3T4**	**S3**		
Bartonia paniculata* (Michx.) Muhl. ssp. *paniculata	**Twining Bartonia**	**G5T5**	**S3**		
***Blephilia hirsuta* (Pursh) Benth.**	**Hairy Wood Mint**	**G5?**	**S3**		
***Bolboschoenus novae-angliae* (Britt.) S.G. Sm.**	**New England Bulrush**	**G5**	**S3**		
syn: *Schoenoplectus novae-angliae* (Britt.) M.T. Strong					
***Bulbostylis ciliatifolia* (Ell.) Fern.**	**Savanna Hairsedge**	**G3G5**	**S3?**		
***Bulbostylis coarctata* (Ell.) Fern.**	**Elliott's Hairsedge**	**G3G5**	**S3**		
syn: *Bulbostylis ciliatifolia* (Ell.) Fern. var. *coarctata* (Ell.) Kral					
***Callitriche palustris* L.**	**Vernal Water-starwort**	**G5**	**S3**		
syn: *C. verna* L.					
***Cardamine douglassii* Britt.**	**Purple Cress**	**G5**	**S3**		
***Carex austrodeflexa* P.D. McMillan, Sorrie, & van Eerden**	**Canebrake Sedge**	**G3G4**	**S3S4**		
***Carex canescens* L. var. *disjuncta* (Fern.) Toivonen**	**Silvery Sedge**	**G5T5**	**S3**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Carex careyana* Torr. ex Dewey**	**Carey's Sedge**	**G4G5**	**S3**		
***Carex collinsii* Nutt.**	**Collins's Sedge**	**G4**	**S3**		
***Carex conjuncta* Boott**	**Soft Fox Sedge**	**G4G5**	**S3**		
***Carex floridana* Schwein.**	**Florida Sedge**	**G5?**	**S3**		
syn: *Carex nigromarginata* Schwein. var. *floridana* (Schwein.) Kukenth.					
***Carex fraseriana* Ker-Gawl.**	**Fraser's Sedge**	**G4**	**S3**		
syn: *Cymophyllus fraserianus* (Ker-Gawl.) Kartesz & Ghandi					
***Carex leptonervia* (Fern.) Fern.**	**Finely-nerved Sedge**	**G5**	**S3**		
***Carex lucorum* Willd. ex Link var. *austrolucorum* J. Rettig**	**Appalachian Woodland Sedge**	**G4T3T4**	**S3**		
syn: *C. pensylvanica* Lam. var. *distans* Peck					
***Carex meadii* Dewey**	**Mead's Sedge**	**G4G5**	**S3**		
Carex pedunculata* Muhl. ex Willd. var. *pedunculata	**Long-stalk Sedge**	**G5TNR**	**S3**		
***Carex pellita* Muhl. ex Willd.**	**Woolly Sedge**	**G5**	**S3S4**		
***Carex purpurifera* Mackenzie**	**Limestone Purple Sedge**	**G4?**	**S3**		
***Carex ruthii* Mackenzie**	**Ruth's Sedge**	**G3**	**S3**		
***Carex shortiana* Dewey**	**Short's Sedge**	**G5**	**S3**		
***Carex striata* Michx. var. *brevis* Bailey**	**Walter's Sedge**	**G4G5T4?**	**S3**		
syn: *C. walteriana* Bailey var. *brevis* (Bailey) Bailey					
***Carex suberecta* (Olney) Britt.**	**Prairie Straw Sedge**	**G4**	**S3**		
***Carex superata* Naczi, Reznicek, & B.A. Ford**	**Limestone Forest Sedge**	**G4?**	**S3**		
***Carex tetanica* Schkuhr**	**Rigid Sedge**	**G4G5**	**S3**		
Carex trisperma* Dewey var. *trisperma	**Three-seeded Sedge**	**G5T5**	**S3**		
***Carex venusta* Dewey**	**Dark Green Sedge**	**G4**	**S3?**		
***Castilleja coccinea* (L.) Spreng.**	**Eastern Indian Paintbrush**	**G5**	**S3**		
***Cenchrus incertus* M.A. Curtis**	**Coastal Sandbur**	**G5**	**S3**		
syn: *C. spinifex* Cav.					
***Chaerophyllum procumbens* (L.) Crantz var. *shortii* Torr. & Gray**	**Short's Spreading Chervil**	**G5T3T4Q**	**S3?**		
***Chamaecrista fasciculata* (Michx.) Greene var. *macrosperma* (Fern.) C.F. Reed**	**Marsh Senna**	**G5T3**	**S3**		
***Chamaecyparis thyoides* (L.) B.S.P.**	**Atlantic White-cedar**	**G4**	**S3**		
***Chenopodium simplex* (Torr.) Raf.**	**Maple-leaf Goosefoot**	**G5**	**S3**		
Under *C. hybridum* L. in Fernald (1950), syn: *C. gigantospermum* Aellen					
***Chrysogonum virginianum* L. var. *brevistolon* Nesom**	**Carolina Green-and-gold**	**G5TNR**	**S3**		
***Cinna latifolia* (Trev. ex Goepp.) Griseb.**	**Slender Wood Reedgrass**	**G5**	**S3**

***Polygala cruciata* L.**	**Cross-leaved Milkwort**	**G5**	**S3?**		
***Polygonella articulata* (L.) Meisn.**	**Coastal Jointweed**	**G5**	**S3**		
***Polygonum ramosissimum* Michx.**	**Bushy Knotweed**	**G5**	**S3**		
***Ponthieva racemosa* (Walt.) C. Mohr**	**Shadow Witch Orchid**	**G4G5**	**S3**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Potamogeton perfoliatus* L.** Treated as *P. perfoliatus* L. var. *bupleuroides* (Fern.) Farw. in Radford et al. (1968), and Fernald (1950)	**Perfoliate Pondweed**	**G5**	**S3**		
***Prosartes maculata* (Buckl.) Gray** syn: *Disporum maculatum* (Buckl.) Britt.	**Spotted Mandarin**	**G3G4**	**S3**		
Prunus alleghaniensis* Porter var. *alleghaniensis	**Allegheny Plum**	**G4T4**	**S3**		
***Quercus laevis* Walt.**	**Turkey Oak**	**G5**	**S3**		
***Quercus margarettiae* Ashe ex Small** syn: Q. *stellata* Wangenh. var. *margaretta* (Ashe ex Small) Sarg.	**Sand Post Oak**	**G5**	**S3**		
***Quercus virginiana* P. Mill.**	**Live Oak**	**G5**	**S3**		
Rhamnus lanceolata* Pursh var. *lanceolata	**Lance-leaf Buckthorn**	**G5T4T5**	**S3**		
***Rhododendron cumberlandense* E.L. Braun**	**Cumberland Azalea**	**G4?**	**S3**		
***Rhynchospora caduca* Ell.**	**Angle-stem Beaksedge**	**G5**	**S3**		
Rhynchospora cephalantha* Gray var. *cephalantha	**Common Bunched Beaksedge**	**G5T4T5**	**S3**		
***Rhynchospora macrostachya* Torr. ex Gray**	**Horned Beaksedge**	**G4**	**S3**		
***Rhynchospora perplexa* Britt.**	**Pineland Beaksedge**	**G5**	**S3**		
***Rhynchospora rariflora* (Michx.) Ell.**	**Few-flowered Beaksedge**	**G5**	**S3**		
***Ribes glandulosum* Grauer**	**Skunk Currant**	**G5**	**S3**		
***Ruellia humilis* Nutt.**	**Low Wild-petunia**	**G5**	**S3**		
***Ruellia purshiana* Fern.**	**Pursh's Wild-petunia**	**G3**	**S3**		
***Sabatia brachiata* Ell.**	**Narrow-leaf Rose-pink**	**G5?**	**S3**		
***Sabatia calycina* (Lam.) Heller**	**Long-lobed Arrowhead**	**G5?**	**S3**		
***Sabatia dodecandra* (L.) B.S.P.**	**Large Marsh-pink**	**G5?**	**S3**		
***Scirpus divaricatus* Ell.**	**Spreading Bulrush**	**G5**	**S3**		
***Scirpus hattorianus* Makino**	**Northern Bulrush**	**G5**	**S3**		
***Scirpus lineatus* Michx.** syn: S. *fontinalis* Harper	**Drooping Bulrush**	**G4**	**S3**		
Scutellaria saxatilis Riddell	**Rock Skullcap**	**G3**	**S3**		
***Sesuvium maritimum* (Walt.) B.S.P.**	**Small Sea-purslane**	**G5**	**S3**		
***Sideroxylon lycioides* L.** syn: *Bumelia lycioides* (L.) Pers.	**Buckthorn Bumelia**	**G5**	**S3**		
***Sisyrinchium fuscatum* Bickn.** syn: S. *arenicola* Bickn.	**Coastal Plain Blue-eyed-grass**	**G5?**	**S3**		
***Solidago faucibus* Wieboldt**	**Gorge Goldenrod**	**G2G4**	**S3**		
***Solidago flaccidifolia* Small** syn*: S. curtisii* Torr. & Gray var. *flaccidifolia* (Small) Cook & Semple	**Mountain Goldenrod**	**G5**	**S3?**		
***Solidago hispida* Muhl. ex Willd.**	**Hairy Goldenrod**	**G5**	**S3**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Solidago tarda* Mackenzie** Under *S. arguta* in Radford et al. (1968) Under *S. arguta* var. *arguta* in Kartesz (1999) syn: S. *ludoviciana* (Gray) Small	**Sandhill Goldenrod**	**G4?Q**	**S3?**		
***Sparganium eurycarpum* Engelm. ex Gray**	**Giant Bur-reed**	**G5**	**S3**		
***Spinulum annotinum* (L.) A. Haines** syn: *Lycopodium annotinum L.*	**Stiff Clubmoss**	**G5**	**S3?**		
***Spiranthes ochroleuca* (Rydb.) Rydb.**	**Yellow Nodding Ladies'-tresses**	**G4**	**S3**		
***Spiranthes odorata* (Nutt.) Lindl.** syn: S. *cernua* (L.) L.C. Rich var. *odorata* (Nutt.) Correll	**Fragrant Ladies'-tresses**	**G5**	**S3**		
***Stachys hyssopifolia* Michx.**	**Hyssop-leaf Hedge-nettle**	**G4G5**	**S3**		
***Stachys latidens* Small ex Britt.**	**Broad-tooth Hedge-nettle**	**G4G5**	**S3**		
***Stellaria corei* Shinners** syn: *Stellaria pubera* Michx. var. *sylvatica* (Beguinot) Weath.	**Tennessee Starwort**	**G4**	**S3**		
***Stewartia malacodendron* L.**	**Silky Camellia**	**G4**	**S3**		
Styrax americanus* Lam. var. *americanus	**American Snowbell**	**G5TNR**	**S3**		
***Styrax grandifolius* Ait.**	**Bigleaf Snowbell**	**G5**	**S3**		
***Suaeda linearis* (Ell.) Moq.**	**Tall Sea-blite**	**G5**	**S3**		
Symphyotrichum ericoides* (L.) Nesom var. *ericoides syn: *Aster ericoides L.*	**White Heath Aster**	**G5T5**	**S3**		
***Symphyotrichum urophyllum* (Lindl.) G.L. Nesom**	**Arrow-leaved Aster**	**G4G5**	**S3**		
***Taenidia montana* (Mackenzie) Cronq.**	**Mountain Pimpernel**	**G3**	**S3**		
***Taxus canadensis* Marshall**	**Canada Yew**	**G5**	**S3**		
***Thermopsis mollis* (Michx.) M.A. Curtis ex Gray**	**Appalachian Golden-banner**	**G3G4**	**S3**		
***Tradescantia subaspera* Ker-Gawl.**	**Zigzag Spiderwort**	**G5**	**S3**		
***Tragia urticifolia* Michx.**	**Nettle-leaf Noseburn**	**G5**	**S3**		
***Trifolium virginicum* Small ex Small & Vail**	**Kates Mountain Clover**	**G3**	**S3**		
***Triglochin striata* Ruiz & Pavon**	**Southern Arrowgrass**	**G5**	**S3**		
Triosteum aurantiacum* Bickn. var. *aurantiacum	**Orange-fruited Horse-gentian**	**G5T5**	**S3**		
***Tsuga caroliniana* Engelmann**	**Carolina Hemlock**	**G3**	**S3**		
***Typha domingensis* Pers.**	**Southern Cattail**	**G4G5**	**S3?**		
***Uniola paniculata* L.**	**Sea Oats**	**G5**	**S3**		
***Utricularia geminiscapa* Benj.**	**Two-flowered Bladderwort**	**G4G5**	**S3**		
***Utricularia macrorhiza* Le Conte** syn: *U. vulgaris* L.	**Common Bladderwort**	**G5**	**S3**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Utricularia radiata* Small** syn: *U. inflata* Walt. var. *minor* Chapman	**Floating Bladderwort**	**G4**	**S3**		
Verbesina virginica* L. var. *virginica All Virginia *V. virginica* is var. *virginica*	**White Crownbeard**	**G5?T5?**	**S3**		
***Viola brittoniana* Pollard**	**Coast Violet**	**G4G5**	**S3?**		
***Viola esculenta* Ell.** syn: *Viola ×esculenta* Ell. (pro sp.) Under *V. septemloba* Le Conte in Radford et al. (1968)	**Salad Violet**	**G4G5**	**S3**		
***Viola macloskeyi* F. Lloyd var. *pallens* (Banks ex A.P. de Candolle) C.L. Hitchcock**	**Smooth White Violet**	**G5T5**	**S3**		
***Viola septentrionalis* Greene**	**Northern Blue Violet**	**G5**	**S3**		
***Wolffiella gladiata* (Hegelm.) Hegelm.** syn: *W. floridana* (J.D. Sm.) J.D. Sm. ex Hegelm.	**Sword Bogmat**	**G5**	**S3**		
***Zanthoxylum americanum* P. Mill.**	**Toothache Tree**	**G5**	**S3**		
***Zanthoxylum clava-herculis* L.**	**Hercules'-club**	**G4**	**S3**

VASCULAR PLANT REVIEW LIST
(Taxa of Uncertain Status)

This page intentionally left blank.

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Agalinis fasciculata* (Ell.) Raf.**	**Tall False Foxglove**	**G5**	**SU**		
syn: *Gerardia fasciculata* (Ell.) Raf.					
***Agrostis altissima* (Walt.) Tuckerman**	**Coastal Bog Bentgrass**	**G4**	**SNR**		
***Allium burdickii* (Hanes) A.G. Jones**	**Narrow-leaved ramps**	**G4G5**	**SU**		
Alopecurus aequalis* Sobol. var. *aequalis	**Short-awn Foxtail Grass**	**G5T5**	**SNA**		
***Ampelopsis cordata* Michx.**	**Heart-leaf Peppervine**	**G5**	**SNR**		
***Andropogon glaucopsis* Ell.**	**Chalky Bluestem**	**G3G5**	**SNR**		
syn: *A. virginicus* L. var. *glaucopsis* (Ell.) A.S. Hitchc.					
syn: A. *glomeratus* (Walt.) Britt. var. *glaucopsis* (Ell.) A.S. Hitchc.,					
Under *A. virginicus* L. in Radford *et al.* (1968)					
***Andropogon tenuispatheus* (Nash) Nash**	**Maritime Bushy Bluestem**	**G5**	**SU**		
syn: *A. glomeratus* (Walt.) Britt. var. *pumilus* Vasey ex Dewey					
***Antennaria howellii* Greene ssp. *petaloidea* (Fern.) Bayer**	**Small Pussytoes**	**G5T4T5**	**SU**		
syn: *A. petaloidea* (Fern.) Fern.					
***Arisaema triphyllum* (L.) Schott ssp. *stewardsonii* (Britt.) Huttleston**	**Bog Jack-in-the-pulpit**	**G5T4T5**	**SU**		
syn: *A. stewardsonii* Britt.					
***Asarum canadense* L. var. *acuminatum* Ashe**	**Wild ginger**	**G5TNR**	**SU**		
***Asplenium trichomanes* L. ssp. *quadrivalens* D.E. Meyer emend. Lovis**	**Limestone maidenhair**	**G5TNR**	**SU**		
***Boechera burkii* (Porter) Windham & Al-Shehbaz**	**Burk's Smooth Rock Cress**	**G3G5**	**SU**		
***Calystegia silvatica* (Kit.) Griseb. ssp. *fraterniflora* (Mackenzie & Bush) Brummitt**	**Large Bindweed**	**G5T5**	**SU**		
syn: *Convolvulus sepium* L. var. *fraterniflorus* Mackenzie & Bush					
***Carex cherokeensis* Schweinitz**	**Cherokee Sedge**	**G4G5**	**SNA**		
***Carex molesta* Mackenzie ex Bright**	**Troublesome Sedge**	**G4**	**SNR**		
***Carex muehlenbergii* Schkuhr ex Willd. var. *enervis* Boott**	**Small-fruited Muehlenberg's Sedge**	**G5T5**	**SNR**		
***Carex tribuloides* Wahlenberg var. *sangamonensis* Clokey**	**Midwestern Blunt Broom Sedge**	**G5T4T5**	**SNR**		
***Coleataenia anceps* (Michx.) Soreng ssp. *rhizomata* (A.S. Hitchc. & Chase) Soreng**	**Small Beaked Panic Grass**	**G5TNR**	**SU**		
syn: *Panicum anceps* Michx. var. *rhizomatum* (A.S. Hitchc. & Chase) Fern.					

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Crataegus disperma* Ashe**	**Two-seed Hawthorn**	**G4G5**	**SU**		
***Crataegus iracunda* Beadle**	**Forest Hawthorn**	**G5**	**SU**		
Included in *C. flabellata* (Bosc.) K. Koch. in Radford *et al*. (1968)					
***Crataegus vailiae* Britt.**	**Vail's Hawthorn**	**G4?Q**	**SU**		
***Crepidomanes intricatum* (Farrar) Ebihara & Weakley**	**Grotto-felt**	**G4G5**	**SU**		
syn: *Trichomanes intricatum* Farrar					
Cypripedium parviflorum* Salisb. var. *parviflorum	**Small Yellow Lady's-slipper**	**G5T3T5**	**SNR**		
***Desmodium paniculatum* (L.) DC. var. *epetiolatum* Schub.**	**Narrow-leaf Tick-trefoil**	**G5T1Q**	**SNR**		
***Diarrhena obovata* (Gleason) Brandenburg**	**Western Beakgrain**	**G4G5**	**SNA**		
syn: *D. americana* Beauv. var. *obovata* Gleason					
***Dichanthelium spretum* (J.A. Schultes) Freckmann**	**Eaton's Panic Grass**	**G5**	**SNR**		
syn: *Panicum spretum* J.A. Schultes					
***Digitaria villosa* (Walt.) Pers.**	**Shaggy Crabgrass**	**G5**	**SU**		
syn: D. *filiformis* (L.) Koeler var. *villosa* (Walt.) Fern.					
Eragrostis pectinacea* (Michx.) Nees ex Steud. var. *pectinacea	**Tufted Lovegrass**	**G5T5**	**SNR**		
***Eupatorium cordigerum* (Fern.) Fern.**	**Clasping Round-leaf Thoroughwort**	**GNR**	**SU**		
syn: *Eupatorium rotundifolium* L. var. *cordigerum* Fern.					
***Eupatorium vaseyi* Porter**	**Vasey's Thoroughwort**	**G3G5**	**SU**		
syn: *Eupatorium sessilifolium* L. var. *vaseyi* (Porter) Fern. & Grisc.					
syn: E. *album* L. var. *monardifolia* Fern.					
***Euphorbia pubentissima* Michx.**	**False Flowering Spurge**	**G5**	**SU**		
***Euphorbia spathulata* Lam.**	**Woodland Spurge**	**G5**	**SU**		
Included with *E. obtusata* Pursh in Harvill *et al*. (1992).					
***Euthamia hirtipes* (Fern.) Sieren**	**Marsh Flat-top Goldenrod**	**GNR**	**SNR**		
syn: E. *graminifolia* (L.) Nutt. var. *hirtipes* (Fern.) C.&J. Taylor					
***Galium orizabense* Hemsl. ssp. *laevicaule* (Weatherby & Blake) Dempster**	**Bald Bedstraw**	**G5?T4?**	**SU**		
syn: G. *pilosum* Ait. var. *laevicaule* Weatherby & Blake					

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***Glandularia canadensis* (L.) Nutt.** syn: *Verbena canadensis* (L.) Britt.	**Rose Vervain**	**G5**	**SNA**		
***Gratiola virginiana* L. var. *aestuariorum* Pennell**	**Roundfruit hedge-hyssop**	**G5T2T4**	**SU**		
***Isolepis carinata* Hooker & Arnott ex Torr.** syn: *Isolepis koilolepis Steud.* syn: *Scirpus koilolepis* (Steud.) Gleason	**Keeled Bulrush**	**G5**	**SNA**		
Juncus validus* Coville var. *validus syn: J. *crassifolius* Buch.	**Round-headed Rush**	**G5T3T5**	**SNA**		
***Lathyrus pusillus* Ell.**	**Tiny Pea**	**G5?**	**SNA**		
***Lemna minuta* Kunth**	**Pale duckweed**	**G4**	**SU**		
***Leptochloa panicea* (Retz) Ohwi ssp. *brachiata*(Steudel) N. Snow**	**Red Sprangletop**	**GNRTNR**	**SNA**		
***Leptochloa panicoides* (J. Presl) A.S. Hitchc.** *syn: Diplachne panicoides* (J. Presl) McNeill	**Amazon Sprangletop**	**G5**	**SNA**		
***Liatris squarrulosa* Michx.** Under *L. aspera* Michx. in Harvill et al. (1992) syn: *L. earlei (Greene) K. Schum.*	**Appalachian Blazing Star**	**G4G5**	**SU**		
***Ludwigia polycarpa* Short & Peter**	**A seedbox**	**G4**	**SU**		
***Lycopus angustifolius* Ell.** Under *M. unifolia* Michx. in Radford et al. (1968)	**Narrow-leaf Bugleweed**	**G4?Q**	**SU**		
***Melampyrum lineare* Desr. var. *pectinatum* (Pennell) Fern.**	**Pine Barren Cow-wheat**	**G5T5**	**SU**

RARE LICHEN AND BRYOPHYTE LISTS

This page intentionally left blank.

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
LICHENS					
***Alectoria fallacina* Motyka**	**Witch's-hair lichen**	**G2**	**SH**		
***Arctoparmelia centrifuga* (L.) Hale**	**Concentric ring lichen**	**G5**	**S1**		
***Buellia stellulata* (Taylor) Mudd**	**Button lichen**	**GNR**	**S1**		
***Calvitmela talayana* (Haugen & Timdal) Andreev**	**A lichen**	**GNR**	**S1**		
***Cetradonia linearis* (Evans) J.-C. Wei & Ahti** syn: *Gymnoderma lineare* (A.Evans) Yoshim. & Sharp	**Rock-gnome lichen**	**G3**	**S1**	**LE**	
***Cetrelia monachorum* (Zahlbr.) Culb. & C. Culb.**	**Sea-storm lichen**	**G2G4**	**SH**		
***Cladonia coccifera* (L.) Willd.**	**A Cladonia**	**G5**	**S1?**		
***Heterodermia appalachensis* (Kurok.) Culb.**	**Appalachian fringe lichen**	**G2?**	**S1**		
***Heterodermia erecta* Lendemer**	**A fringe lichen**	**G1?**	S1		
***Hypogymnia krogiae* Ohlsson**	**Freckled tube lichen**	**G3G4**	**S1**		
***Hypotrachyna lividescens* (Kurok.) Hale**	**A loop lichen**	**GNR**	S1		
***Hypotrachyna oostingii* (J.P. Dey) Hale**	**Oosting's loop lichen**	**G2?**	**SH**		
***Hypotrachyna prolongata* (Kurok.) Hale**	**A loop lichen**	**G3G4**	**SH**		
***Hypotrachyna virginica* (Hale) Hale** syn: *Parmelia virginica* Hale	**A loop lichen**	**G1G2**	**SH**		
***Melanelia culbersonii* (Hale) Thell**	**Appalachian camouflage lichen**	**G2G4**	**S2**		
***Parmelia omphalodes* (L.) Ach.**	**Smoky crottle**	**G5**	**S2?**		
***Parmotrema louisianae* (Hale) Hale**	**A ruffle lichen**	**G3G5**	**S1**		
***Peltigera hydrothyria* Miadikowski & Lutzona** syn: *Hydrothyria venosa* J.L. Russell	**Waterfan**	**G4**	**S1**		
***Porpidia lowiana* Gowan**	**A boulder lichen**	**G2G3**	**S1**		
***Porpidia tuberculosa* (Sm.) Hertel & Knoph**	**A boulder lichen**	**G2G4**	**S1**		
***Psilolechea clavulifera* (Nyl.) Coppins**	**A lichen**	**GNR**	**S1**		
***Punctelia graminicola* (B. de Lesd.) Egan**	**Speckled shield lichen**	**GNR**	**S1**		
***Stereocaulon glaucescens* Tuck.**	**Bony foam lichen**	**G3**	**S2?**		
***Teloschistes flavicans* (Sw.) Norman**	**Powdered orange bush lichen**	**G4G5**	**SH**		
***Usnea angulata* Ach.**	**A beard lichen**	**G3G5**	**S1**		
LIVERWORTS					
***Anastrophyllum minutum* (Schreb.) R.M. Schust.**	**Comb Notchwort**	**G5**	**S1**		
***Aneura sharpii* Inoue & N.G. Mill.**	**A liverwort**	**G1G2**	**S1**		
***Barbilophozia attenuata* (Nees) Loeske**	**A liverwort**	**G5**	**S1**		
***Bazzania nudicaulis* A. Evans**	**A liverwort**	**G2G3**	**S1**		
***Bazzania tricrenata* (Wahlenb.) Trevis.**	**Three-toothed Whip Liverwort**	**G4**	**S1**		
***Cephaloziella spinicaulis* Douin**	**A liverwort**	**G3G4**	**S1**		

Scientific Name	Common Name	Global Rank	State Rank	Federal Status	State Status
***LIVERWORTS*, continued**					
***Diplophyllum andrewsii* A. Evans**	**A moss**	**G3**	**SH**		
***Diplophyllum taxifolium* (Wahlenb.) Dumort.**	**Yew-leaved Earwort**	**G5**	**SH**		
***Drepanolejeunea appalachiana* R. M. Schuster**	**Appalachian threadwort**	**G2?**	**S1**		
***Frullania caulisequa* (Nees) Nees**	**A liverwort**	**G4G5**	**SH**		
***Lejeunea blomquistii* (Evans) Schust.**	**Blomquist's Leafy Liverwort**	**G1G2**	**S1**		
***Lejeunea ruthii* (Evans) Schust.**	**A liverwort**	**G3G4**	**S1**		
***Leptoscyphus cuneifolius* (Hook.) Mitt.**	**Wedge Flapwort**	**G4G5**	**SH**		
***Marsupella paroica* R. M. Schust.**	**A liverwort**	**G3**	**SH**		
***Metzgeria temperata* Kuwahara**	**Whiskered Veilwort**	**G4**	**S1**		
***Pellia endiviifolia* (Dicks.) Dumort.**	**Endive Pellia**	**G5**	**SH**		
***Plagiochasma rupestre* (Forst.) Steph.**	**A flapwort**	**G5**	**S1**		
***Plagiochila exigua* (Taylor) Taylor**	**A liverwort**	**G4?**	**SH**		
***Plagiochila sullivantii* Gottsche ex A. Evans**	**Sullivant's leafy liverwort**	**G2**	**SH**		
***Schistochilopsis incisa* (Schrad.) Konstant.**	**Jagged notchwort**	**G5**	**S1**		
***Solenostoma pyrifolium* Steph.**	**A liverwort**	**G4**	**SH**		
***Sphenolobopsis pearsonii* (Spruce) R.M. Schust**	**Horsehair threadwort**	**G2?**	**S1**		
***Tritomaria exsecta* (Schmidel ex Schrad.) Schiffn. ex Loeske**	**Cut Notchwort**	**G5**	**SH**		
***Tritomaria exsectiformis* (Breidl.) Schiffn. ex Loeske**	**Large cut notchwort**	**G5**	**SH**		
MOSSES					
***Bryoerythrophyllum ferruginascens* (Stirt.) Giacom.**	**Bryoerythrophyllum moss**	**G3G4**	**SH**

APPENDIX 2. RARE SPECIES SIGHTING FORM

An important component of the natural heritage inventory and protection process involves gathering information from state experts, professionals, and avocational naturalists throughout the state. To facilitate this, the Division of Natural Heritage has developed a rare species sighting form. If you would like to participate in ourinventory and protection activities, please take a few moments to complete the attached form for any taxon from our lists. This data will be incorporated into thenatural heritage data base and used exclusively for the protection of the rare taxon and its habitat. Please send the form or pertinent electronic files (including GIS data) to staff botanist John Townsend at: Department of Conservation and Recreation, Division of Natural Heritage, 600 East Main Street, 24th Floor, Richmond, VA 23219.

Thank you for your support. The Division of Natural Heritage can only realize the protection of the Commonwealth's natural diversity by working through a network of knowledgeable and concerned individuals.

TAXON NAME:

DATE SEEN:

CITY/COUNTY:

COLLECTION INFORMATION: (Include your personal collection number, if any, and the Herbarium where the specimen has been/will be deposited)

LOCATION: (Please provide as detailed a description as possible. (**Please include a topographic map or GIS file** showing the location.)

HABITAT DESCRIPTION: (Include associated species, natural features, vegetation, and other applicable habitat information).

POPULATION DATA: (Include number of individuals, age, size, spatial distribution, evidence of reproduction and other applicable population data.)

THREATS OR EVIDENCE OF DISTURBANCE TO SITE:

LAND OWNER(S):

REPORTED BY: (Please include name, address, telephone number, and email address.)

DATE OF THIS REPORT:

Natural Heritage Program

List of Rare Animal Species of North Carolina

2018

Compiled by
Judith Ratcliffe, Zoologist

North Carolina Natural Heritage Program
N.C. Department of Natural and Cultural Resources
Raleigh, NC 27699-1651

www.ncnhp.org

This list is dynamic and is revised frequently as new data become available. New species are added to the list, and others are dropped from the list as appropriate. The list is published periodically, generally every two years. Further information may be obtained by contacting the North Carolina Natural Heritage Program, Department of Natural and Cultural Resources, 1651 MSC, Raleigh, NC 27699-1651 and the North Carolina Wildlife Resources Commission, 1701 MSC, Raleigh, NC 27699-1701. Additional information on rare species, as well as a digital version of this list, can be obtained from the Natural Heritage Program's website at www.ncnhp.org.

TABLE OF CONTENTS

NORTH CAROLINA ANIMAL LIST – RARE 1

ACKNOWLEDGEMENTS

Biologists who graciously provided review of species statuses and ranks in this 2018 version, listed alphabetically, are Jeff Beane, Steven Beaty, Tyler Black, Art Bogan, Alvin Braswell, Kathrine Caldwell, Ed Corey, Eric Fleek, Mary Frazer, Jeff Hall, Steve Hall, Victor Holland, Harry LeGrand, Brena Jones, Gabriela Hogue, Chris Kelly, Sarah McRae, T.R. Russ, Curtis Smalling, Bryn Tracy, David Webster, and Lori Williams.

Many staff members of the N.C. Natural Heritage Program (NCNHP) were involved in the preparation and creation of this document. Dr. Harry LeGrand, former NCNHP Vertebrate Zoologist, developed the foundation of the Rare Animal List during his tenure with our program - his efforts are carried forward with greatest appreciation. Jame Amoroso, Suzanne Mason, and Meredith Wojcik entered numerous animal records into the database over the past two years and Linda Rudd contributed her editorial and document processing expertise to the preparation of the final document. Misty Buchanan, our Director, provided invaluable guidance throughout the list preparation and review of the final draft.

The Endangered, Threatened, and Special Concern species lists of the North Carolina Wildlife Resources Commission make up the majority of vertebrate and mollusk species on the Rare Animal List. Scientific Councils compile recommendations for consideration by the Commission and upon approval these become legally protected species in North Carolina – the efforts of the Councils are very much appreciated.

The invertebrate lists have been developed with the assistance of taxa experts: Steve Hall (various groups including land snails, dragonflies and damselflies, moths, and grasshoppers and katydids), John Cooper (crayfishes), Trish MacPherson, Kathy Herring, Dave Lenat, Dave Penrose, Eric Fleek, Steven Beatty and Victor Holland (mayflies, stoneflies, caddisflies, and beetles), Dale Schweitzer (various groups but especially moths), Bo Sullivan (butterflies and moths), and Amy VanDevender (land snails). The dragonfly and damselfly lists were developed through collection records of Duncan Cuyler, with his data provided to NCNHP by Steve Roble and Bill Mauffray.

NORTH CAROLINA ANIMAL LIST – RARE

INTRODUCTION

The North Carolina Natural Heritage Program (NCNHP) conducts and maintains an inventory of known locations of rare animals and plants in the state as part of its mission to support conservation of natural areas. The primary functions of this inventory list are its use 1) in determining priorities for protection of the state's most important natural areas and the animals and plants contained therein, 2) in determining priorities for inventory, and 3) by public agencies and private persons for environmental assessment and land management planning.

The NCNHP is charged under the Nature Preserves Act (G.S. 143B-135.250 to -135.272) with compiling and maintaining information relevant to the protection of North Carolina's most important natural areas. NCNHP takes the lead role in North Carolina in the inventory of the state's natural diversity and the identification of important natural areas and rare species habitats. The list incorporates the most recent federal status designations determined by the U.S. Fish and Wildlife Service (USFWS) for all animal taxa native to North Carolina. Prior to 2018, NCNHP included Federal Species of Concern (FSC) as a federal status. The FSC list was collectively maintained by the North Carolina offices of the USFWS but FSC is not an official federal status. Under the guidance of the USFWS Region 4 office, the Raleigh Ecological Services office has revised their focus toward At-Risk Species and as such the NCNHP will no longer report FSC as a federal status. The At-Risk Species list is a dynamic list which includes species proposed for listing under the ESA, Candidate species, and species that have been petitioned for listing. Please refer to the At-Risk Species Finder at https://www.fws.gov/southeast/finder/#/species/list for more information.

This list also includes North Carolina legal status information from the N.C. Wildlife Resources Commission (NCWRC). NCWRC is responsible for the listing and protection of the state's nongame species of mammals, birds, reptiles, amphibians, freshwater fishes, mollusks, and crustaceans, under N.C. General Statutes - Chapter 113 Article 25. The NCNHP, NCWRC, and USFWS work cooperatively to ensure the continued survival of all of North Carolina's rich fauna. Over the past 25 years and continuing in the future, the advice and protection designations (for example, Endangered, Threatened, and Special Concern) of scientific councils and committees have been considered in the creation of the list.

Many species that lack formal legal protection are nonetheless imperiled in North Carolina. Therefore, NCNHP collects data on these species in addition to those classified under the three protection designations above and places them in two categories: Significantly Rare (SR) and Watch List (W). These species receive no special legal protection status; rather, the designation is used to convey information about the species' rarity within the state. The tracking of SR species, along with Endangered, Threatened, and Special Concern species, plays a critical role in how NCNHP evaluates natural areas for their importance in conservation of the state's native biodiversity. These status categories are defined in this list under "N.C. Status."

Because of the difficulty in gathering data for marine and estuarine fishes, marine invertebrates, millipedes, scorpionflies, most beetles, ants, and annelids, these animals are no longer tracked or included on the Rare or Watch lists. NCNHP requests locality and population data on the species listed in this publication. Survey forms can be downloaded from our website. For the most current information about the range of tracked species in North Carolina, visit www.ncnhp.org. Information, including maps and datasets, on animals, plants, and communities nationwide may be found on NatureServe Explorer (www.natureserve.org).

EXPLANATION OF STATUS AND RANK CODES FOR ANIMALS

Status Codes

In North Carolina, all state status (Endangered, Threatened, and Special Concern) changes must be approved by the N.C. Wildlife Resources Commission and published in the State Register for public comment. These taxa are given state protection under the State Endangered Species Act (G.S. 113-331 to 113-337). Significantly Rare and Watch List are NCNHP designations only, not affording official state protection.

United States Status is designated by the U.S. Fish and Wildlife Service (USFWS) and the U.S. National Marine Fisheries Service (USNMFS) in accordance with the U.S. Endangered Species Act of 1973 (USESA), as amended.

N.C. STATUS – ANIMALS

N.C. STATUS CODE	STATUS	DEFINITION
E	Endangered	Any native or once-native species of wild animal whose continued existence as a viable component of the state's fauna is determined to be in jeopardy or any species of wild animal determined to be an Endangered species pursuant to the Endangered Species Act. (G.S. 113-25.)
T	Threatened	Any native or once-native species of wild animal which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range, or one that is designated as a Threatened species pursuant to the Endangered Species Act. (G.S. 113-25.)
SC	Special Concern	Any species of wild animal native or once-native to North Carolina which is determined by the NCWRC to require monitoring but which may be taken under regulations adopted under the provisions of the Article. (G.S.113-25)
SR	Significantly Rare	Any species which has not been listed as an Endangered, Threatened, or Special Concern species, but which exists in the state (or recently occurred in the state) in small numbers (generally fewer than 100 statewide populations) and has been determined by the NCNHP to need monitoring. Significantly Rare species include species of historical occurrence with some likelihood of rediscovery in the state and species substantially reduced in numbers by habitat destruction, direct exploitation, or disease.
SR-G	Significantly Rare-Game	Species is a game animal or a furbearer, and therefore (by law) cannot be listed for state protection as E, T, or SC.
WL	Watch List	Any other species believed to be rare and of conservation concern in the state but not warranting active monitoring at this time.

U.S. STATUS – ANIMALS

U.S. STATUS CODE	STATUS	DEFINITION
E	Endangered	A taxon that is in danger of extinction throughout all or a significant portion of its range (Public Law 93-205 87 Stat. 884).
T	Threatened	A taxon that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range (Public Law 93-205 87 Stat. 884).
C	Candidate	Taxa for which the USFWS has on file enough substantial information on biological vulnerability and threat(s) to support proposals to list them as endangered or threatened. Proposed rules have not yet been issued because this action is precluded at present by other listing activity. Development and publication of proposed rules on these taxa are anticipated. The USFWS encourages state and other federal agencies as well as other affected parties to give consideration to these taxa in environmental planning (Federal Register, 28 February 1996). Taxa formerly considered "Category 1" are now considered "Candidate."
BGPA	Bald and Golden Eagle Protection Act	The Bald and Golden Eagle Protection Act (Eagle Act)(16U.S.C. 668-668d) prohibits take of bald and golden eagles and provides a statutory definition of "take" that includes "disturb." The USFWS has developed National Bald Eagle Management Guidelines to provide guidance to land managers, landowners, and others as to how to avoid disturbing bald eagles. For additional information please see http://www.fws.gov/migratorybirds/baldeagle.htm.
EXP	Experimental Population	A taxon listed as experimental (either essential or nonessential). Experimental, nonessential populations of endangered species (e.g., red wolf) are treated as threatened species on public land, for consultation purposes, and a species proposed for listing on private land.
P_	Proposed	Species proposed in the Federal Register as a status different from its current federal status.
T (S/A)	Threatened due to Similarity of Appearance	Section 4 (e) of the USESA authorizes the treatment of a species (subspecies or population segment) as endangered or threatened even though it is not otherwise listed as endangered or threatened if (a) the species so closely resembles in appearance an endangered or threatened species that enforcement personnel would have substantial difficulty in differentiating between the listed and unlisted species, (b) the effect of this substantial difficulty is an additional threat to an endangered or threatened species, and (c) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of the USESA [Federal Register 4 November 1997, Volume 62(213):59605-59623].
T-4(d)	Threatened with a 4(d) Rule	Section 4(d) of the ESA allows special regulations for threatened species that modify normal ESA protections when it is determined that such a modification is necessary and advisable to provide for the conservation of that species. A 4d rule is specific to the particular plant or animal for which it was created. For additional information, see links at http://www.fws.gov/midwest/endangered/mammals/nlba/.

Ranking System

Natural Heritage Programs and the NatureServe Network have developed a consistent method for evaluating the relative imperilment of both species and ecological communities. These assessments lead to the designation of a conservation rank. These ranks provide an estimate of extinction risk. Conservation rank values have been assigned over the past 30 years by the NCNHP, NatureServe, and a large number of collaborators in government agencies, universities, natural history museums, botanical gardens, and other conservation organizations. This information has been developed primarily to help in guiding conservation and informing environmental planning and management.

Conservation ranks are either state (S) or global (G) and are based on a one-to-five scale, ranging from critically imperiled (S1 or G1) to demonstrably secure (S5 or G5). These assessments are based on the best available information, considering a variety of factors such as abundance, distribution, population trends, and threats. Global ranks apply to the species throughout its range. The system is widely used by nationwide agencies and organizations as the best available scientific and objective assessment of a species' imperilment throughout its range.

A rank involving two numbers indicates uncertainty. For example, an S2S3 or a G2G3 rank indicates that the species may be S2 or S3 (or G2 or G3), but that existing data do not allow that determination to be made.

N.C. RANK – ANIMALS

N.C. RANK	NUMBER OF EXTANT OCCURRENCES	DESIGNATION	DESCRIPTION
S1	1-5	Critically Imperiled	Critically imperiled due to extreme rarity or some factor(s) making it especially vulnerable to extirpation (local extinction) from the state. Typically 5 or fewer occurrences or very few remaining individuals (<1,000).
S2	6-20	Imperiled	Imperiled due to rarity or some factor(s) making it very vulnerable to extirpation from the state. Typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000).
S3	21-100	Vulnerable	Vulnerable to extinction either because rare or uncommon, found only in a restricted range (even if abundant at some locations), or due to other factors making it vulnerable to extirpation. Typically 21 to 100 occurrences or between 3,000 to 10,000 individuals.
S4	101-1,000	Apparently Secure	Apparently secure and widespread, usually with more than 100 occurrences and more than 10,000 individuals.
S5	1,001+	Secure	Common, widespread, and abundant. Essentially ineradicable under present conditions. Typically with considerably more than 100 occurrences and more than 10,000 individuals.

N.C. RANK	NUMBER OF EXTANT OCCURRENCES	DESIGNATION	DESCRIPTION
SH	0?	Historical	Of historical occurrence, with some expectation that it may be rediscovered. Its presence may not have been verified in the past 20 years. Upon verification of an extant occurrence, SH-ranked elements would typically receive an S1 rank. Note: an element is not automatically assigned an SH (or SX) rank if it has not been verified in the past 20 years; some effort must have been made to locate or relocate occurrences.
SX	0	Presumed Extirpated	Believed to be extirpated. Has not been located despite intensive searches of historical sites and other appropriate habitat, and virtually no likelihood that it will be rediscovered.
SU	Unknown	Unrankable	Currently unrankable due to lack of information or substantially conflicting information about status or trends. More information is needed.
SNR	Unknown	Not Ranked	Statewide rank not yet assessed.
SNA	N/A	Not Applicable	A conservation status rank is not applicable because the element is not a suitable target for conservation for one of these reasons: • Hybrid – an interspecific hybrid without conservation value; • Exotic Origin – not native to North Carolina; • Accidental/Nonregular – outside usual range and not regularly found in North Carolina; • Not Confidently Present – never documented as present in NC; • Synonym – the taxon is not recognized by the NCNHP.
S_B	1-?	Breeding	Rank of the breeding population in the state. Used for migratory species only. Ex: Bachman's sparrow (*Peucaea aestivalis*) is S3B,S2N).
S_N	1-?	Nonbreeding	Rank of the nonbreeding population in the state. Used for migratory species only. Ex: Bachman's sparrow.
S_?	---	Uncertain	Denotes inexact or uncertain numeric rank.

GLOBAL RANK – ANIMALS

GLOBAL RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
G1	1-5	Critically Imperiled	Critically imperiled globally because of extreme rarity or because of some factor(s) making it especially vulnerable to extinction. Typically 5 or fewer occurrences or very few remaining individuals (<1,000) or acres (<2,000) or linear miles (<10).
G2	6-20	Imperiled	Imperiled globally because of rarity or because of some factor(s) making it very vulnerable to extinction. Typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000) or acres (2,000 to 10,000) or linear miles (10 to 50).
G3	21-100	Vulnerable	Vulnerable globally either because very rare throughout its range, found only in a restricted range (even if abundant at some locations), or other factors making it vulnerable to extinction. Typically 21 to 100 occurrences or between 3,000 and 10,000 individuals.
G4	101-1,000	Apparently Secure	Uncommon but not rare (although it may be rare in parts of its range, particularly on the periphery) and usually widespread. Apparently not vulnerable in most of its range, but possibly cause for long-term concern. Typically more than 100 occurrences and more than 10,000 individuals.
G5	1,001+	Secure	Common, widespread, and abundant (although it may be rare in parts of its range, particularly on the periphery). Not vulnerable in most of its range. Typically with considerably more than 100 occurrences and more than 10,000 individuals.
GH	0?	Historical	Known only from historical occurrences, but with some expectation that it may be rediscovered. May still be extant; further searching is needed.
GX	0	Presumed Extinct	Believed to be extinct throughout its range (e.g., passenger pigeon) with virtually no likelihood that it will be rediscovered. Not located despite intensive searches of historical sites and other appropriate habitat.

GLOBAL RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
GU	Unknown	Unrankable	Currently unrankable due to lack of information or due to substantially conflicting information about status or trends; need more information.
GNR	Unknown	Not Ranked	Global rank not yet assessed.
G_T_	---	Subspecies or Variety Rank	As an example, G4T1 would apply to a subspecies of a species with an overall rank of G4, but the subspecies warranting a rank of G1.
G_?	---	Uncertain	Denotes inexact or uncertain numeric rank.
G_Q	---	Questionable Taxonomy	Taxonomic classification that may reduce conservation priority. Distinctiveness of this entity as a taxon at the current level is questionable. Resolution of this uncertainty may result in change from a species to a subspecies or inclusion of this taxon in another taxon, with the resulting element having a lower-priority conservation status rank.

Physiographic Province/Region. The provinces/regions in which the species is known to occur are indicated. This should not be regarded as the only province(s) or regions(s) of the state in which the species could occur; our knowledge of the fauna of North Carolina is still very imperfect. The provinces are abbreviated as follows:

ABBREVIATION	PROVINCE/REGION	DESCRIPTION
M	Mountains (Blue Ridge)	All parts of North Carolina west of the foot of the Blue Ridge Escarpment.
P	Piedmont	All parts of North Carolina east of the foot of the Blue Ridge Escarpment and west of the Fall Line, including outlying "foothill" ranges, such as the Brushy, Uwharrie, Sauratown, and South mountains. This province is shallowly underlain by crystalline metamorphic, igneous, or (rarely) consolidated sedimentary rocks.
C	Coastal Plain	All parts of North Carolina east of the Fall Line, but excluding the Sandhills region and those portions associated with Tidewater. Generally consisting of unconsolidated sands, silts, clays, and peats, though rarely shallowly underlain by consolidated coquina limestone ("marl").

S	Sandhills	Portions of Cumberland, Harnett, Hoke, Lee, Moore, Richmond, Scotland, and Montgomery counties consisting mostly of deep aeolian sands of the Middendorf and Pinehurst formations (Cretaceous to Tertiary age). The Sandhills are really part of the coastal plain but are here distinguished because of their distinctive geomorphology and vegetation. Areas somewhat resembling the Sandhills region but occurring in other parts of the state (such as Carolina bay rims and aeolian or beach ridge deposits in the outer Coastal Plain) are considered part of the Coastal Plain Province.
T	Tidewater	Areas associated with tidal water, such as the ocean and barrier islands, sounds, estuaries, and mainland brackish or salt marshes.

Habitat. The known habitats are described; as with provinces, these should not be regarded as the only possible habitats of the species in the state.

Counties of Known Occurrence. Following the description of habitats is a listing of the known counties of occurrence in the NCNHP database. We request information about any new occurrences in the state. County names are followed by symbols (defined below) if the species has not been recently verified within the county.

*	All recorded occurrences in the county are either extirpated, have not been found in recent surveys, or have not been surveyed recently enough to be confident they are still present. Unsurveyed occurrences are regarded as historical after 20-40 years, the number of years depending on the species and the amount of habitat alteration in the area. An asterisk should not be regarded as a definitive statement that the species is gone from the county but indicates that its continued existence is uncertain.

The zoological exploration of North Carolina is far from complete, and many additional county records will be found, generally (but not always) in proximity to counties listed. Visit the Natural Heritage Program website for the most up-to-date county occurrence information: www.ncnhp.org.

LIST FORMAT

Species are grouped by major taxa. Vertebrate animals are arranged by class, beginning with the most phylogenetically advanced (mammals). Within a given taxon, species are listed alphabetically by scientific name. The following information is presented for each species on the list: N.C. Status, U.S. Status, N.C. Rank, Global Rank, Physiographic Province/Region, Habitat, and Counties of Occurrence.

NUMBER OF ANIMAL TAXA BY STATUS

Numbers in the table indicate number of taxa – generally species as well as valid unique varieties and subspecies – for each group and status. Because many taxa have both an N.C. and a U.S. status, totals cannot be added across a complete line. The total number of species in North Carolina is an estimate of the species that do occur or have occurred at one time in the state.

GROUP	COUNT *	N.C. STATUS				U.S. STATUS

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Mammals				
Canis rufus	**T**	**EXP**	**S1**	**G1Q**
Red Wolf				
C: swamps, pocosins, extensive forests (Beaufort, Bertie, Craven, Dare, Hyde, Martin, Pamlico, Pitt, Tyrrell, Washington)				
Condylura cristata pop. 1	**SC**		**S2**	**G5T2Q**
Star-nosed Mole - Coastal Plain population				
SC: moist meadows, bogs, swamps, bottomlands [mountain population not of concern] (Bladen, Brunswick, Columbus, Craven, Cumberland, Currituck*, Dare, Hoke, Mecklenburg*, Moore, New Hanover*, Pender, Pitt, Randolph, Richmond*, Robeson*, Sampson, Scotland*, Wake, Washington*)				
Corynorhinus rafinesquii macrotis	**SC**		**S3**	**G3G4T3**
Eastern Big-eared Bat				
SC: roosts in hollow trees, old buildings, and beneath bridges, usually near water (Beaufort, Bertie, Bladen, Brunswick, Camden, Chowan, Columbus*, Craven, Currituck, Dare, Duplin, Gates, Hertford, Hoke, Johnston, Martin, Moore, Nash, New Hanover, Northampton, Pender, Perquimans, Richmond, Robeson, Sampson, Scotland, Tyrrell, Washington, Wayne*)				
Corynorhinus rafinesquii rafinesquii	**T**		**S2**	**G3G4T3**
Rafinesque's Big-eared Bat				
M: roosts in caves, mines, and hollow trees, usually near water (Alexander*, Buncombe*, Burke, Cherokee*, Graham, Haywood, Jackson, Macon, Madison*, Swain, Transylvania, Washington)				
Corynorhinus townsendii virginianus	**E**	**E**	**S1**	**G4T2**
Virginia Big-eared Bat				
M: roosts in caves (and rarely in mines), especially in limestone areas (Avery, Watauga, Yancey)				
Glaucomys sabrinus coloratus	**E**	**E**	**S2**	**G5T2**
Carolina Northern Flying Squirrel				
M: high elevation forests, mainly spruce-fir (Ashe, Avery, Buncombe, Caldwell, Graham, Haywood, Jackson, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Lasiurus intermedius floridanus	**SC**		**S1**	**G5T4**
Florida Yellow Bat				
PC: roosts in Spanish moss and other thick vegetation near water, often in longleaf pine habitats (Brunswick, Mecklenburg, New Hanover)				
Microtus chrotorrhinus carolinensis	**SC**		**S3**	**G5T3**
Southern Rock Vole				
M: rocky areas at high elevations, forests or fields (Avery*, Haywood, Jackson*, Macon*, Swain, Transylvania, Yancey)				
Mustela nivalis	**SR-G**		**S2**	**G5**
Least Weasel				
M: fields and forests, mostly at high elevations (Avery, Buncombe, Haywood, Henderson*, Jackson*, Madison, Swain, Watauga, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Myotis austroriparius	**SC**		**S2**	**G4**
Southeastern Bat				
MPSC: roosts in buildings, hollow trees; forages near water; mainly in the Coastal Plain (Bertie, Bladen, Camden, Chowan, Clay, Columbus, Craven, Currituck, Gates, Halifax, Hertford, Hoke, Johnston, Jones, Martin, Moore, New Hanover, Onslow, Pender, Robeson, Scotland, Wake*)				
Myotis grisescens	**E**	**E**	**S1**	**G4**
Gray Bat				
M: roosts in caves; forages mainly over open water (Buncombe, Haywood, Madison, Swain, Transylvania, Yancey)				
Myotis leibii	**SC**		**S2**	**G4**
Eastern Small-footed Bat				
M: roosts in hollow trees and in rock crevices (warmer months), in caves and mines (winter) (Alleghany, Avery, Buncombe, Burke, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Rutherford, Swain, Transylvania, Watauga, Wilkes, Yancey)				
Myotis lucifugus	**SR**		**S2**	**G3**
Little Brown Bat				
MPC: roosts in buildings (summer), in caves and mines (winter) (Avery, Buncombe, Burke, Cherokee, Clay, Cleveland, Craven, Graham, Halifax, Haywood, Henderson*, Jackson, Jones, Macon, Madison, McDowell, Mecklenburg, Mitchell, Richmond, Rutherford, Stokes, Swain, Transylvania, Watauga, Wilkes, Yancey)				
Myotis septentrionalis	**T**	**T-4(d)**	**S2**	**G1G2**
Northern Long-eared Bat				
MPC: roosts in hollow trees and buildings (warmer months), in caves and mines (winter); mainly in the mountains (Ashe, Avery, Bertie, Bladen, Buncombe, Burke, Camden, Cherokee, Clay, Craven, Currituck, Dare, Gates, Graham, Haywood, Henderson, Jackson, Macon, Madison, Martin, McDowell, Mitchell, New Hanover, Pasquotank, Pender, Polk, Rutherford, Swain, Transylvania, Wake*, Washington, Watauga, Wilkes, Yancey)				
Myotis sodalis	**E**	**E**	**S1S2**	**G2**
Indiana Bat				
M: roosts in hollow trees or under loose bark and snags (warmer months), in caves (winter) (Cherokee, Graham, Haywood, Jackson*, Mitchell, Rutherford, Swain)				
Neotoma floridana floridana	**T**		**S1**	**G5T5**
Eastern Woodrat				
C: forests, mainly in moist areas (Brunswick*, Carteret*, Jones, New Hanover, Onslow, Pender)				
Neotoma magister	**SC**		**S2S3**	**G3G4**
Allegheny Woodrat				
MP: rocky places and abandoned buildings in deciduous or mixed forests in the northern mountains and adjacent Piedmont (Ashe, Avery, Buncombe, Burke, Caldwell, Iredell*, McDowell, Mitchell, Watauga, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Perimyotis subflavus	**SR**		**S3**	**G2G3**
Tricolored Bat				
MPSC: roosts in clumps of leaves (mainly in summer), caves, rock crevices, and other dark and sheltered places (Alleghany*, Anson, Avery, Beaufort, Bertie, Bladen, Buncombe, Burke, Cabarrus, Camden, Carteret, Chatham, Cherokee, Clay, Cleveland, Craven, Cumberland, Currituck, Davidson, Gates, Graham, Harnett, Haywood, Henderson, Hoke, Jackson, Jones, Lenoir, Macon, Madison, Martin, McDowell, Mitchell, Montgomery, Moore, Onslow, Orange, Pender, Polk, Randolph, Robeson, Rutherford, Scotland, Stanly, Stokes, Swain, Transylvania, Tyrrell, Wake, Washington, Watauga, Wilkes, Yancey)				
Peromyscus leucopus buxtoni	**SC**		**S1**	**G5T1**
Buxton Woods White-footed Deermouse				
T: maritime forests in Cape Hatteras vicinity (endemic to this area) (Dare)				
Peromyscus leucopus easti	**SC**		**S1**	**G5T1**
Pungo White-footed Deermouse				
T: dunes and maritime thickets along coast south to Corolla (Currituck, Dare)				
Peromyscus polionotus	**SC**		**S1**	**G5**
Oldfield Deermouse				
P: sandy, fallow fields near South Carolina line (Cleveland*, Mecklenburg, Rutherford)				
Sorex dispar blitchi	**SR**		**S3**	**G4T3T4**
Southern Rock Shrew				
M: high elevation forests with talus or rocky slopes (Avery, Buncombe, Haywood, Henderson, Jackson, Macon, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Sorex palustris punctulatus	**SR**		**S3**	**G5T3**
Southern Water Shrew				
M: stream banks in montane forests (Avery*, Buncombe, Clay, Graham, Haywood, Jackson, Macon, Polk, Swain, Watauga)				
Spilogale putorius	**SR-G**		**S2**	**G4**
Eastern Spotted Skunk				
MP: forests with rocks, cliffs, and other den sites (Alleghany, Ashe*, Avery, Buncombe, Burke, Caldwell, Cherokee*, Graham, Haywood, Henderson*, Jackson, Macon*, Madison*, McDowell, Mitchell, Rutherford, Swain*, Transylvania, Wilkes, Yancey)				
Sylvilagus obscurus	**SR-G**		**S3**	**G4**
Appalachian Cottontail				
M: dense cover of montane woods and thickets (Alleghany, Ashe, Avery, Buncombe, Cherokee, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell, Swain*, Transylvania, Yancey)				
Synaptomys cooperi helaletes	**SR**		**S2S3**	**G5T3**
Dismal Swamp Southern Bog Lemming				
C: low pocosins, early succession wetlands (Beaufort, Craven, Gates, Jones, Pasquotank*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Trichechus manatus	**T**	**T**	**S1N**	**G2**
West Indian Manatee				
T: warm waters of estuaries and river mouths (Beaufort, Brunswick, Carteret, Craven, Currituck, Dare, Hyde, Jones, Lenoir, New Hanover, Onslow, Pamlico, Pender, Pitt)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Birds				
Accipiter striatus	**SR**		**S1B,S4N**	**G5**
Sharp-shinned Hawk				
MPS: forests and woodlands (for nesting) [breeding evidence only] (Avery, Caldwell, Durham, Jackson, Mitchell*, Orange, Watauga, Yancey)				
Aegolius acadicus	**T**		**S2B,S2N**	**G5**
Northern Saw-whet Owl				
M: spruce-fir forests or mixed hardwood/spruce forests (for nesting) [breeding season only] (Avery, Buncombe, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Ammodramus henslowii	**E**		**S1B,S1N**	**G4**
Henslow's Sparrow				
C: clearcut pocosins and other damp weedy fields [breeding season only] (Beaufort, Bertie*, Brunswick*, Carteret*, Edgecombe*, Gates*, Martin*, Onslow, Orange*, Pender*, Pitt, Wake*, Wilson*)				
Aquila chrysaetos	**SR**	**BGPA**	**SXB,S1N**	**G5**
Golden Eagle				
MC: grass balds or fields amid remote and extensive forests in higher mountains, near waterfowl impoundments or large lakes in coastal areas [regular wintering sites] (Alleghany, Hyde, Mitchell, Wilkes, Yancey)				
Botaurus lentiginosus	**SR**		**S1B,S3N**	**G5**
American Bittern				
CT: fresh or brackish marshes [breeding evidence only] (Beaufort, Carteret, Hyde, Pamlico)				
Calidris canutus rufa	**T**	**T**	**S2N**	**G4T2**
Red Knot - rufa subspecies				
T: beaches and sand flats [wintering habitat only] (New Hanover, Onslow)				
Catharus guttatus	**SR**		**S2B,S5N**	**G5**
Hermit Thrush				
M: spruce-fir forests; sparingly in northern hardwood forests [breeding evidence only] (Ashe, Avery, Buncombe, Graham, Haywood, Jackson, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Catharus ustulatus	**SR**		**S1B,S5N**	**G5**
Swainson's Thrush				
M: spruce-fir forests [breeding evidence only] (Buncombe, Mitchell, Yancey)				
Certhia americana	**SC**		**S3B,S5N**	**G5**
Brown Creeper				
M: high elevation forests, favoring spruce-fir mixed with hardwoods [breeding evidence only] (Avery, Buncombe, Burke, Caldwell, Clay, Graham, Haywood, Jackson, Macon, Madison, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Charadrius melodus circumcinctus	**E**	**E**	**S1N**	**G3T3**
Piping Plover - Interior subspecies T: ocean beaches and island-end flats [wintering only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)				
Charadrius melodus melodus	**T**	**T**	**S1B,S1N**	**G3T3**
Piping Plover - Atlantic Coast subspecies T: ocean beaches and island-end flats [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)				
Charadrius wilsonia	**SC**		**S2B**	**G5**
Wilson's Plover T: beaches, island-end flats, estuarine islands [breeding evidence only] (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)				
Chondestes grammacus	**SR**		**S1B**	**G5**
Lark Sparrow S: barren, sandy fields with scattered saplings in the sandhills region[breeding evidence only] (Cumberland, Hoke, Montgomery, Moore, Richmond, Scotland)				
Circus hudsonius	**SR**		**S1B,S4N**	**G5**
Northern Harrier T: extensive brackish marshes (for nesting) [breeding evidence only] (Carteret, Dare, Hyde)				
Coccyzus erythropthalmus	**SR**		**S2B**	**G5**
Black-billed Cuckoo M: deciduous forests, mainly at higher elevations [breeding evidence only] (Ashe, Avery, Buncombe, Burke, Caldwell, Haywood, Henderson, Jackson, Macon, McDowell, Mitchell, Transylvania, Watauga, Yancey)				
Columbina passerina	**SR**		**SXB**	**G5**
Common Ground-Dove T: dunes, sandy fields, margins of maritime woods and thickets [breeding evidence only] (Brunswick*, New Hanover*, Pender*)				
Dolichonyx oryzivorus	**SR**		**S1B**	**G5**
Bobolink M: meadows and other grasslands [breeding evidence only] (Ashe, Haywood, Henderson, Transylvania, Watauga)				
Egretta caerulea	**SC**		**S3B,S3N**	**G5**
Little Blue Heron CT: forests or thickets on maritime islands, rarely in swamps or at ponds [breeding evidence only] (Brunswick, Carteret, Columbus, Cumberland, Currituck, Dare, Hyde, Jones, New Hanover, Pender, Robeson)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Egretta thula	**SC**		**S2S3B,S3N**	**G5**
Snowy Egret				
CT: forests or thickets on maritime islands, rarely in swamps or at ponds [breeding evidence only] (Brunswick, Carteret, Columbus, Currituck, Dare, Hyde, New Hanover, Robeson)				
Egretta tricolor	**SC**		**S3B,S3N**	**G5**
Tricolored Heron				
T: forests or thickets on maritime islands [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover)				
Elanoides forficatus	**SR**		**S1B**	**G5**
Swallow-tailed Kite				
C: swamps and bottomlands near lower Cape Fear River, often forages over nearby fields or marshes [breeding evidence only] (Bladen, Pender)				
Empidonax alnorum	**SR**		**S2B**	**G5**
Alder Flycatcher				
M: high elevation shrub/sapling thickets [breeding evidence only] (Alleghany, Ashe, Avery, Buncombe, Haywood, Jackson, Mitchell, Watauga, Yancey)				
Falco peregrinus anatum	**E**		**S1B,S2N**	**G4T4**
American Peregrine Falcon				
MT: cliffs (nesting); coastal ponds and mudflats (foraging in winter) [breeding evidence; regular wintering sites] (Avery, Brunswick, Buncombe, Burke, Carteret*, Dare, Haywood, Henderson, Hyde, Jackson, Macon, Madison, Mecklenburg, Rutherford, Stokes*, Surry, Swain, Transylvania, Wilkes*, Yancey)				
Falco sparverius	**SR**		**S2B,S5N**	**G5**
American Kestrel				
MPSC: open country, such as extensive farmland; nests in cavities [breeding evidence only] (records not yet entered)				
Gelochelidon nilotica	**T**		**S1S2B**	**G5**
Gull-billed Tern				
T: sand flats on maritime islands [breeding evidence only] (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow)				
Haematopus palliatus	**SC**		**S2S3B,S3N**	**G5**
American Oystercatcher				
T: estuaries, oyster beds, mudflats [breeding evidence only] (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Haliaeetus leucocephalus	**T**	**BGPA**	**S3B,S3N**	**G5**
Bald Eagle				
MPCT: mature forests near large bodies of water (nesting); rivers, lakes, and sounds (foraging) [breeding evidence only] (Anson, Beaufort, Bertie, Bladen, Brunswick, Buncombe, Burke, Cabarrus, Camden, Carteret, Catawba, Chatham, Cherokee, Chowan, Clay, Cleveland, Columbus, Craven, Currituck, Dare, Davidson, Durham, Edgecombe, Franklin, Gaston, Gates, Graham, Granville, Guilford, Halifax, Harnett*, Haywood, Hyde, Iredell, Johnston, Jones, Lee*, Lenoir, Macon, Martin, Mecklenburg, Montgomery, Nash, New Hanover, Northampton, Onslow, Orange, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Rowan, Rutherford, Stanly, Surry, Swain, Tyrrell, Union, Vance, Wake, Warren, Washington, Watauga, Wayne, Wilkes, Yadkin)				
Himantopus mexicanus	**SR**		**S1B**	**G5**
Black-necked Stilt				
T: fresh or brackish ponds and impoundments [breeding evidence only] (Beaufort, Brunswick, Carteret, Currituck, Dare, New Hanover, Onslow, Pamlico)				
Hydroprogne caspia	**T**		**S1B,SZN**	**G5**
Caspian Tern				
T: sand flats on maritime islands [breeding evidence only] (Dare, Hyde)				
Ixobrychus exilis	**SC**		**S2S3B**	**G4G5**
Least Bittern				
PCT: fresh or brackish marshes [breeding evidence only] (Beaufort, Brunswick, Carteret, Craven*, Currituck, Dare, Hyde, Moore*, New Hanover, Onslow, Pamlico, Pender, Tyrrell*, Washington, Wayne)				
Laterallus jamaicensis	**SC**	**PT**	**S1**	**G3G4**
Black Rail				
PCT: brackish marshes, rarely fresh marshes [breeding evidence only] (Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pamlico)				
Loxia curvirostra	**SC**		**S2**	**G5**
Red Crossbill				
M: coniferous forests, preferably spruce-fir (Ashe*, Avery, Buncombe, Burke*, Graham, Haywood, Jackson, Macon, Madison, McDowell, Mitchell, Swain, Transylvania, Wake*, Watauga, Yancey)				
Mycteria americana	**T**	**T**	**S1B,S1N**	**G4**
Wood Stork				
CT: swamps, fresh or brackish ponds (foraging) [breeding evidence and regular non-breeding sites] (Bladen, Brunswick, Columbus, Robeson, Sampson)				
Nyctanassa violacea	**SR**		**S2B**	**G5**
Yellow-crowned Night-Heron				
PCT: inland swamps; woods or thickets on maritime islands [breeding evidence only] (Carteret, Dare, Durham, Forsyth, Guilford, Mecklenburg)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Passerculus sandwichensis	**SR**		**S2B,S5N**	**G5**
Savannah Sparrow				
M: grassy fields and pastures [breeding evidence only] (Alleghany, Ashe, Watauga)				
Passerina ciris	**SC**		**S2B**	**G5**
Painted Bunting				
T: maritime shrub thickets and forest edges [breeding evidence only] (Brunswick, Carteret, New Hanover, Onslow, Pender)				
Pelecanus occidentalis	**SR**		**S3B,S4N**	**G4**
Brown Pelican				
T: maritime islands [breeding evidence only] (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow)				
Peucaea aestivalis	**SC**		**S3B,S2N**	**G3**
Bachman's Sparrow				
PSC: open longleaf pine forests, old fields [breeding evidence only] (Bladen, Brunswick, Buncombe*, Carteret, Chatham, Columbus*, Craven, Cumberland, Guilford*, Halifax, Harnett, Hoke, Jones, Macon*, Moore, New Hanover, Onslow, Orange*, Pender, Richmond, Robeson*, Sampson, Scotland, Wake*, Warren*)				
Phalacrocorax auritus	**SR**		**S1B,S5N**	**G5**
Double-crested Cormorant				
PCT: lakes with scattered trees, coastal sand bars (nesting) [breeding evidence only] (Carteret, Chatham, Craven, Onslow)				
Picoides borealis	**E**	**E**	**S2**	**G3**
Red-cockaded Woodpecker				
SC: mature open pine forests, mainly in longleaf pine [breeding evidence only] (Anson*, Beaufort*, Bertie*, Bladen, Brunswick, Camden, Carteret, Chatham*, Columbus, Craven, Cumberland, Currituck, Dare, Duplin*, Edgecombe*, Gates, Greene*, Halifax*, Harnett, Hertford, Hoke, Hyde, Johnston, Jones, Lee*, Lenoir*, Montgomery*, Moore, Nash*, New Hanover, Northampton*, Onslow, Pamlico*, Pender, Pitt*, Richmond, Robeson, Sampson, Scotland, Tyrrell, Wake*, Washington, Wayne*, Wilson*)				
Plegadis falcinellus	**SC**		**S1S2B**	**G5**
Glossy Ibis				
T: forests or thickets on maritime islands [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover)				
Poecile atricapillus	**SC**		**S3**	**G5**
Black-capped Chickadee				
M: high elevation forests, mainly spruce-fir [breeding evidence only] (Avery, Buncombe*, Caldwell, Haywood, Jackson, Swain, Transylvania, Watauga, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Pooecetes gramineus	**SC**		**S2B,S2N**	**G5**
Vesper Sparrow				
M: high elevation pastures and grassy fields [breeding evidence only] (Ashe, Avery, Haywood, Mitchell, Watauga)				
Porphyrio martinicus	**SR**		**SHB**	**G5**
Purple Gallinule				
C: freshwater ponds with floating vegetation [breeding evidence only] (Brunswick*, Carteret*, Onslow*, Robeson*)				
Riparia riparia	**SR**		**S1B**	**G5**
Bank Swallow				
MP: high, vertical banks for nesting [breeding evidence only] (Avery, Wilkes*)				
Rynchops niger	**SC**		**S2B,S3N**	**G5**
Black Skimmer				
T: sand flats on maritime islands [breeding evidence only] (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)				
Setophaga cerulea	**SC**		**S2B**	**G4**
Cerulean Warbler				
MC: mature hardwood forests; steep slopes and coves in mountains, natural levees in Coastal Plain [breeding evidence only] (Alleghany*, Ashe, Bertie, Buncombe, Caldwell, Clay, Graham, Halifax, Haywood, Henderson, Johnston*, Macon, Madison, Martin, McDowell, Mitchell, Northampton, Polk, Rutherford, Swain, Transylvania, Watauga, Wilkes, Yancey)				
Setophaga coronata	**SR**		**S1B,S5N**	**G5**
Yellow-rumped Warbler				
M: spruce-fir forests, especially in immature stands [breeding evidence only] (Avery, Haywood, Jackson, Mitchell, Swain, Yancey)				
Setophaga magnolia	**SR**		**S2B**	**G5**
Magnolia Warbler				
M: spruce-fir forests, especially in immature stands [breeding evidence only] (Avery, Buncombe, Caldwell, Graham, Haywood, Jackson, McDowell, Mitchell, Watauga, Yancey)				
Setophaga virens waynei	**E**		**S2B**	**G5T1**
Wayne's Black-throated Green Warbler				
C: nonriverine wetland forests, especially where white cedar or cypress are mixed with hardwoods [breeding evidence only] (Beaufort, Bladen, Brunswick*, Camden, Carteret, Columbus*, Craven, Cumberland, Currituck, Dare, Gates, Hyde, Jones, Onslow, Pamlico, Pasquotank, Tyrrell, Washington)				
Sphyrapicus varius	**SR**		**S2S3B,S5N**	**G5**
Yellow-bellied Sapsucker				
M: mature, open hardwoods with scattered dead trees [breeding evidence only] (Ashe, Avery, Buncombe, Clay*, Graham, Haywood, Jackson, Macon, Madison, Mitchell*, Swain, Transylvania, Watauga*, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Spiza americana	**SR**		**S2B,SZN**	**G5**
Dickcissel				
PC: fallow fields and pastures with tall forbs [breeding evidence for consistent year-to-year sites only] (Carteret)				
Sterna dougallii dougallii	**E**	**E**	**SHB**	**G4T3**
Roseate Tern				
T: sand flats on maritime islands [breeding evidence only] (Carteret*, Dare*)				
Sterna hirundo	**E**		**S2B**	**G5**
Common Tern				
T: sand flats on maritime islands [breeding evidence only] (Brunswick*, Carteret, Dare, Hyde, New Hanover, Onslow, Pamlico*, Pender)				
Sternula antillarum	**SC**		**S3B**	**G4**
Least Tern				
T: beaches, sand flats, open dunes, gravel rooftops [breeding evidence only] (Brunswick, Carteret, Craven, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)				
Thryomanes bewickii	**E**		**SXB**	**G5**
Bewick's Wren				
M: woodland borders or openings, farmlands or brushy fields, at high elevations [breeding evidence only] (Ashe*, Avery*, Buncombe*, Haywood*, Henderson*, Jackson*, Macon*, Transylvania*, Watauga*)				
Tyto alba	**SC**		**S2S3B,S3N**	**G5**
Barn Owl				
MPCT: extensive open country, nesting in old buildings, silos, large tree cavities [breeding evidence only] (Madison)				
Vermivora chrysoptera	**SC**		**S2S3B**	**G4**
Golden-winged Warbler				
M: old fields and successional hardwoods [breeding evidence only] (Alleghany, Ashe, Avery, Buncombe, Clay, Graham, Haywood, Iredell*, Jackson, Macon, Madison, Polk*, Swain, Watauga, Yancey)				
Vermivora cyanoptera	**SR**		**S2B**	**G5**
Blue-winged Warbler				
M: low elevation brushy fields and thickets [breeding evidence only] (Alleghany, Ashe, Buncombe, Cherokee, Clay, Graham*, Haywood, Jackson, Macon, Rutherford, Transylvania)				
Vireo gilvus	**SR**		**S2B**	**G5**
Warbling Vireo				
MP: groves of hardwoods along rivers and streams [breeding evidence only] (Alleghany, Ashe, Avery, Bertie, Buncombe, Caldwell, Cleveland, Forsyth, Halifax, Henderson, Macon*, Orange, Wake, Watauga)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Reptiles

Alligator mississippiensis **T** **T(S/A)** **S3** **G5**

American Alligator

CT: fresh to slightly brackish lakes, ponds, rivers, and marshes (Beaufort, Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Currituck, Dare, Duplin, Gates, Hertford, Hoke*, Hyde, Jones, Lenoir*, New Hanover, Onslow, Pamlico, Pender, Pitt*, Robeson, Sampson, Scotland, Tyrrell, Washington)

Apalone spinifera spinifera **SC** **S1** **G5T5**

Eastern Spiny Softshell

M: large streams in the French Broad system (Buncombe, Henderson*, Madison)

Caretta caretta **T** **T** **S3B,S3N** **G3**

Loggerhead Seaturtle

T: nests on beaches; forages in ocean and sounds [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)

Chelonia mydas **T** **T** **S1B,SUN** **G3**

Green Seaturtle

T: nests on beaches; forages in ocean and sounds [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)

Crotalus adamanteus **E** **S1** **G4**

Eastern Diamondback Rattlesnake

C: pine flatwoods, savannas, pine-oak sandhills (Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland*, Duplin*, Jones*, New Hanover*, Northampton*, Onslow, Pender, Robeson*, Sampson*)

Crotalus horridus **SC** **S3** **G4**

Timber Rattlesnake

MPC: wetland forests in the Coastal Plain; rocky, upland forests elsewhere [NHP tracking only den/hibernacula sites and selected isolated populations] (Alexander, Alleghany, Anson, Ashe, Avery*, Beaufort, Bertie, Bladen, Brunswick, Buncombe, Burke, Cabarrus, Camden, Carteret, Catawba, Cherokee, Chowan, Clay*, Cleveland, Columbus, Craven, Cumberland, Currituck, Dare, Davidson, Duplin, Durham, Gaston, Graham, Granville, Haywood, Henderson, Hoke, Hyde, Jackson, Jones, Lenoir, Lincoln, Macon, Madison, McDowell, Mecklenburg, Mitchell*, Montgomery, Moore, New Hanover, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Polk, Randolph, Richmond, Robeson, Rutherford, Sampson, Scotland, Stanly, Stokes, Surry, Swain, Transylvania, Tyrrell, Union, Wake, Washington, Watauga, Wayne, Wilkes, Yadkin, Yancey*)

Deirochelys reticularia reticularia **SC** **S3** **G5T5**

Eastern Chicken Turtle

SC: quiet waters of ponds, ditches, and sluggish streams (Bladen, Brunswick, Carteret, Columbus, Craven*, Cumberland, Dare, Duplin*, Hoke, New Hanover, Onslow, Pender, Richmond, Robeson, Sampson, Scotland, Wayne*)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Dermochelys coriacea	**E**	**E**	**S1B,SUN**	**G2**
Leatherback Seaturtle				
T: nests on beaches; forages in oceans, rarely in sounds [breeding evidence only] (Brunswick, Carteret, Craven*, Currituck, Dare, Hyde, New Hanover)				
Farancia erytrogramma	**SR**		**S3**	**G4**
Rainbow Snake				
SC: swamps, lakes, rivers, and other sluggish water (Beaufort, Bertie, Bladen, Brunswick, Camden*, Carteret*, Chowan, Columbus, Craven, Cumberland*, Currituck, Dare, Duplin*, Gates, Harnett, Hertford*, Hoke*, Hyde, Johnston*, Jones*, Lenoir*, Moore*, New Hanover, Onslow*, Pamlico*, Pasquotank*, Pender, Perquimans*, Pitt*, Robeson, Sampson, Tyrrell, Washington)				
Glyptemys muhlenbergii	**T**	**T(S/A)**	**S2**	**G3**
Bog Turtle				
MP: bogs, wet pastures, wet thickets (Alexander, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Catawba, Cherokee*, Clay, Forsyth, Gaston, Graham, Henderson, Iredell*, Macon, McDowell, Mitchell, Rutherford, Surry, Transylvania, Watauga, Wilkes, Yancey)				
Graptemys geographica	**SR**		**S1**	**G5**
Common Map Turtle				
M: rivers in the Hiwassee system (Cherokee)				
Heterodon simus	**T**		**S2**	**G2**
Southern Hognose Snake				
SC: sandy woods, particularly pine-oak sandhills (Bladen, Brunswick, Carteret*, Craven*, Cumberland, Duplin, Edgecombe*, Hoke, Jones*, Moore, New Hanover, Onslow, Pender, Pitt*, Richmond, Robeson, Sampson, Scotland, Wake*, Wayne*)				
Lampropeltis getula sticticeps	**SC**		**S2**	**G5T2Q**
Outer Banks Kingsnake				
T: maritime forests, thickets, and grasslands on the Outer Banks (endemic to North Carolina) (Carteret*, Currituck*, Dare*, Hyde)				
Lepidochelys kempii	**E**	**E**	**S1B,SUN**	**G1**
Kemp's Ridley Seaturtle				
T: nests on beaches, forages in ocean and sounds [breeding evidence only] (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)				
Liodytes rigida	**SR**		**S2S3**	**G5**
Glossy Crayfish Snake				
C: marshes, cypress ponds, other wetlands (Bladen, Brunswick, Carteret*, Columbus, Craven, Dare, Hoke*, Hyde*, Jones*, New Hanover*, Onslow, Robeson, Tyrrell)				
Malaclemys terrapin	**SC**		**S3**	**G4**
Diamondback Terrapin				
T: salt or brackish marshes, estuaries (Beaufort, Bertie, Brunswick, Carteret, Craven*, Dare, Hyde, Jones, New Hanover, Onslow, Pamlico, Pender, Perquimans)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Masticophis flagellum	**SR**		**S3**	**G5**
Coachwhip				
PSCT: dry and sandy woods, mainly in pine/oak sandhills (Anson*, Bladen, Brunswick, Carteret*, Columbus, Craven*, Cumberland, Duplin*, Harnett, Hoke, Lenoir*, Montgomery, Moore, New Hanover, Onslow, Pender, Richmond, Robeson*, Sampson, Scotland, Stanly*, Union*, Wayne*)				
Micrurus fulvius fulvius	**E**		**S1**	**G5**
Eastern Coralsnake				
SC: pine-oak sandhills, sandy flatwoods, maritime forests (Bladen, Brunswick*, Cumberland*, Harnett*, Hoke*, Moore*, New Hanover, Onslow*, Pender, Robeson, Sampson, Scotland*)				
Nerodia sipedon williamengelsi	**SC**		**S3**	**G5T3**
Carolina Watersnake				
T: salt or brackish marshes (endemic to North Carolina) (Beaufort, Carteret, Currituck, Dare, Hyde, Pamlico)				
Ophisaurus attenuatus	**SR**		**S2**	**G5**
Slender Glass Lizard				
MPSC: old fields, wooded edges, open woods (Beaufort*, Bertie*, Bladen*, Brunswick*, Carteret*, Chatham*, Cherokee*, Chowan*, Columbus*, Durham*, Gates, Granville*, Harnett*, Iredell*, Johnston*, Lenoir*, Pender, Pitt, Stanly*, Vance*, Wake, Warren*)				
Ophisaurus mimicus	**SC**		**S1**	**G3**
Mimic Glass Lizard				
C: pine flatwoods, savannas, pine/oak sandhills (Bladen*, Brunswick, Carteret, Cherokee*, Columbus*, New Hanover*, Onslow*, Pender, Sampson*)				
Pituophis melanoleucus melanoleucus	**T**		**S2**	**G4T4**
Northern Pinesnake				
MSC: dry and sandy woods, mainly in pine/oak sandhills (Brunswick, Cherokee, Clay, Cumberland, Graham*, Harnett, Hoke, Montgomery, Moore, New Hanover*, Richmond, Rutherford, Scotland, Swain*)				
Plestiodon anthracinus	**SR**		**S2S3**	**G5**
Coal Skink				
M: rocky slopes, wooded hillsides, roadbanks (Avery, Buncombe*, Caldwell, Clay*, Graham*, Haywood, Henderson*, Jackson, Macon, Polk, Rutherford, Swain*, Transylvania, Wilkes*)				
Seminatrix pygaea paludis	**SC**		**S2**	**G5T4**
Carolina Swamp Snake				
C: in lush vegetation of ponds, ditches, or sluggish streams (Brunswick*, Carteret*, Craven, Dare, Hyde, New Hanover*, Onslow, Pender, Tyrrell*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Sistrurus miliarius miliarius	**SC**		**S3**	**G5T4T5**
Carolina Pigmy Rattlesnake				
PSC: pine flatwoods, pine/oak sandhills, other pine/oak forests (Beaufort, Bladen, Brunswick*, Carteret, Cleveland*, Craven*, Cumberland*, Dare*, Gaston*, Harnett*, Hoke, Hyde, Montgomery*, Moore, New Hanover, Onslow, Pamlico, Pender, Pitt, Richmond*, Sampson, Scotland, Tyrrell, Washington)				
Sternotherus minor	**SC**		**S1**	**G5**
Loggerhead Musk Turtle				
M: streams and rivers in Mississippi drainage (Cherokee, Madison)				
Trachemys scripta troostii	**SC**		**S1**	**G5T4**
Cumberland Slider				
M: rivers in French Broad drainage (Madison)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Amphibians

Ambystoma mabeei **T** **S2?** **G4**

Mabee's Salamander

SC: shallow ephemeral wetlands, such as Carolina bays, vernal pools, and sinkholes (Bladen, Brunswick, Carteret*, Columbus, Cumberland, Dare*, Duplin, Hoke, Jones, New Hanover*, Onslow, Pender*, Perquimans*, Robeson, Sampson, Scotland)

Ambystoma talpoideum **SC** **S2S3** **G5**

Mole Salamander

MP: breeds in fish-free semipermanent woodland ponds; forages in adjacent woodlands (Alleghany*, Buncombe, Cherokee, Davidson, Granville, Guilford, Henderson, Macon, McDowell, Montgomery*, Orange, Person, Pitt*, Polk, Richmond*, Rockingham, Rowan, Stanly, Surry, Transylvania, Union, Wake*, Yadkin)

Ambystoma tigrinum **T** **S2** **G5**

Eastern Tiger Salamander

SC: breeds in fish-free semipermanent ponds; forages in adjacent woods, usually sandy pinewoods (Cumberland, Hoke, Moore, Richmond, Robeson, Scotland, Wake)

Anaxyrus quercicus **SR** **S2** **G5**

Oak Toad

SC: pine flatwoods and savannas, pine sandhills where near water (Beaufort, Bladen, Brunswick*, Carteret, Columbus*, Craven, Cumberland, Dare, Duplin*, Gates, Harnett, Hoke*, Hyde*, Johnston*, Jones*, Lee*, Moore*, New Hanover, Onslow, Pamlico*, Pender, Perquimans*, Pitt, Richmond, Robeson*, Sampson, Scotland, Tyrrell*, Washington*, Wayne*, Wilson*)

Aneides aeneus **T** **S2S3** **G3G4**

Green Salamander

M: damp, shaded crevices of cliffs or rock outcrops in deciduous forests (southern mountains) (Buncombe, Henderson, Jackson, Macon, Madison, Polk, Rutherford, Transylvania)

Cryptobranchus alleganiensis alleganiensis **SC** **S3** **G3G4T2**

Eastern Hellbender

M: large and clear fast-flowing streams (Alleghany, Ashe, Avery, Buncombe, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Watauga, Yancey)

Desmognathus folkertsi **SC** **S1** **G2**

Dwarf Black-bellied Salamander

M: small streams and seeps in forests (Clay)

Desmognathus organi **SR** **S2S3** **G3**

Northern Pygmy Salamander

M: spruce-fir and other high elevation forests; northeast of the French Broad River (Ashe, Avery, Buncombe, Caldwell, Madison*, McDowell, Mitchell, Watauga, Yancey)

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Desmognathus wrighti	**SR**		**S2S3**	**G3**
Southern Pygmy Salamander				
M: mid to high elevation forests, often in spruce-fir; west of the French Broad River (Buncombe*, Clay, Graham*, Haywood, Henderson, Jackson, Macon, Madison*, Swain, Transylvania)				
Eurycea junaluska	**T**		**S1S2**	**G3**
Junaluska Salamander				
M: forests near seeps and streams in the Cheoah River system [records from Cherokee and Clay represent specimens of uncertain taxonomy] (Cherokee, Clay, Graham)				
Eurycea longicauda longicauda	**SC**		**S1S2**	**G5T5**
Longtail Salamander				
M: moist woods and floodplains; small ponds for breeding (Alleghany*, Ashe*, Avery, Buncombe*, Burke*, Cherokee*, Clay, Graham, Haywood, Henderson*, Jackson*, Macon, Transylvania*, Watauga)				
Eurycea quadridigitata	**SC**		**S2**	**G5**
Dwarf Salamander				
C: pocosins, Carolina bays, pine flatwoods, savannas, and other wetland habitats (Avery*, Bladen*, Brunswick, Columbus, Craven, Cumberland, Duplin*, Edgecombe, Gaston*, Greene*, Halifax*, Harnett*, Hoke, Johnston*, Jones*, Lenoir*, Martin*, Moore*, Nash, Pamlico, Pender, Pitt*, Richmond*, Robeson, Sampson*, Scotland, Stanly*, Wake)				
Hemidactylium scutatum	**SC**		**S3**	**G5**
Four-toed Salamander				
MPC: pools, bogs, and other wetlands in hardwood forests (Alamance*, Avery, Bladen, Buncombe, Chatham, Cherokee, Cumberland*, Duplin*, Durham, Franklin, Gates, Graham, Granville, Guilford, Henderson*, Macon, McDowell, Montgomery, Moore, Nash, Orange, Pender, Person, Polk*, Randolph, Rockingham, Stanly, Stokes, Surry, Wake, Wilkes)				
Hyla andersonii	**SR**		**S3**	**G4**
Pine Barrens Treefrog				
SC: pocosins, bay forests, boggy areas (Bladen, Cumberland, Harnett, Hoke, Johnston*, Jones, Lee*, Moore, Onslow, Pender, Richmond, Robeson, Sampson, Scotland, Wayne)				
Hyla versicolor	**SC**		**S2S3**	**G5**
Gray Treefrog				
P: deciduous or mixed forests, often near water; primarily near VA border (Caswell, Person, Warren*)				
Necturus lewisi	**SC**		**S2**	**G2**
Neuse River Waterdog				
PC: rivers and large streams in Neuse and Tar drainages (endemic to North Carolina) (Beaufort*, Craven, Durham, Edgecombe, Franklin, Granville, Greene, Halifax, Johnston, Jones, Lenoir, Nash, Orange, Person, Pitt, Vance, Wake, Warren, Wayne, Wilson)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Necturus maculosus	**SC**		**S1**	**G5**
Mudpuppy				
M: rivers and large streams in New, French Broad, and Little Tennessee drainages (Alleghany, Ashe, Buncombe*, Henderson, Macon, Madison, Transylvania)				
Plethodon amplus	**SR**		**S2**	**G2**
Blue Ridge Gray-cheeked Salamander				
M: mesic forests in the Hickorynut Gorge vicinity (endemic to this area) (Buncombe, Henderson, Rutherford)				
Plethodon aureolus	**SR**		**S2?**	**G2G3**
Tellico Salamander				
M: forests in the Unicoi Mountains (Cherokee, Graham)				
Plethodon chattahoochee	**SR**		**S1**	**G3**
Chattahoochee Slimy Salamander				
M: moist forests in the southwestern counties, close to the Georgia border (Cherokee, Clay)				
Plethodon cheoah	**SR**		**S1S2**	**G1G2**
Cheoah Bald Salamander				
M: mesic forests on Cheoah Bald (endemic to this area) (Graham, Swain)				
Plethodon meridianus	**SR**		**S2**	**G2**
South Mountain Gray-cheeked Salamander				
P: mesic forests of the South Mountains (endemic to this area) (Burke, Cleveland, McDowell, Rutherford)				
Plethodon ventralis	**SC**		**S1**	**G4**
Southern Zigzag Salamander				
M: moist areas of talus slopes or rock outcrops in hardwood forests (Buncombe, Haywood, Henderson*, Madison, Yancey)				
Plethodon wehrlei	**T**		**S1S2**	**G4**
Wehrle's Salamander				
P: upland forests (low mountains near Virginia border) (Alleghany, Stokes, Surry, Wilkes)				
Plethodon welleri	**SC**		**S2**	**G3**
Weller's Salamander				
M: high elevation forests in northern mountains, mainly in spruce-fir and to a lesser degree, northern hardwood forests (Ashe, Avery, Caldwell, Mitchell, Watauga, Yancey)				
Plethodon yonahlossee pop. 1	**SC**		**S2**	**G4T1T2Q**
Crevice Salamander				
M: Hickorynut Gorge area (endemic to this area); crevices in moist shaded rocks (Buncombe, Henderson, McDowell, Rutherford)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Pseudacris brachyphona	**SC**		**S2**	**G5**
Mountain Chorus Frog				
M: ditches, pools, and other small wet areas near forests, in extreme southwestern mountains (Cherokee, Clay)				
Pseudacris nigrita	**SR**		**S2**	**G5**
Southern Chorus Frog				
SC: ditches, Carolina bays, and other temporary shallow pools and ponds (Beaufort*, Brunswick*, Carteret*, Columbus*, Cumberland, Hoke, Onslow*, Pender, Pitt*, Robeson, Sampson*, Scotland)				
Pseudacris ornata	**E**		**S2**	**G4**
Ornate Chorus Frog				
SC: swamps, savannas, wooded ponds and pools (Beaufort*, Bladen, Brunswick*, Carteret, Craven, Cumberland, Hoke, New Hanover*, Onslow, Robeson, Sampson, Scotland)				
Rana capito	**E**		**S2**	**G3**
Carolina Gopher Frog				
SC: breeds in temporary fish-free pools; forages in sandy woods, especially pine-oak sandhills (Beaufort*, Bladen*, Brunswick, Carteret, Cumberland, Hoke, Jones*, New Hanover*, Onslow, Pender, Robeson, Sampson, Scotland)				
Rana heckscheri	**E**		**SH**	**G5**
River Frog				
SC: river floodplains, floodplain pools or borrow pit ponds (Cumberland*, Moore*, Robeson*, Sampson*, Scotland*)				
Rana sylvatica pop. 3	**SR**		**S1**	**G5TNR**
Wood Frog - Coastal Plain population				
C: mesic to moist hardwood forests (Hyde, Tyrrell)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Freshwater Fishes				
Acipenser brevirostrum	**E**	**E**	**S1**	**G3**
Shortnose Sturgeon				
CT: brackish water of large rivers and estuaries; spawns in freshwater areas (Anson*, Beaufort*, Bertie, Bladen, Brunswick, Camden, Carteret, Chowan, Columbus, Craven*, Currituck, Dare, Hyde, New Hanover, Onslow*, Pamlico*, Pasquotank, Pender, Perquimans, Pitt*, Richmond*, Tyrrell, Washington)				
Acipenser fulvescens	**SC**		**S1**	**G3G4**
Lake Sturgeon				
M: large rivers of Tennessee drainages (Madison)				
Acipenser oxyrinchus oxyrinchus	**E**	**E**	**S2**	**G3T3**
Atlantic Sturgeon				
CT: coastal waters, estuaries, large rivers (Beaufort, Bertie, Brunswick, Camden, Carteret, Chowan, Craven, Currituck, Dare, Gates, Halifax, Hertford, Hyde, Martin, New Hanover, Northampton, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Tyrrell, Washington)				
Ambloplites cavifrons	**SR**		**S2**	**G3**
Roanoke Bass				
PC: streams in Neuse and Tar systems (Chatham, Durham, Edgecombe*, Franklin, Granville, Halifax, Johnston*, Lee, Montgomery, Moore, Nash, Orange, Person, Pitt*, Randolph, Richmond, Rockingham, Vance, Warren, Wilson)				
Aplodinotus grunniens	**SC**		**S1**	**G5**
Freshwater Drum				
M: French Broad River (Madison)				
Carpiodes carpio	**SC**		**S1**	**G5**
River Carpsucker				
M: French Broad and Cane rivers (Madison, Mitchell, Yancey)				
Carpiodes cyprinus	**SR**		**S2**	**G5**
Quillback				
M: native to French Broad and Roanoke drainages (Halifax, Madison, Mitchell, Northampton, Rockingham, Stokes, Yancey)				
Carpiodes sp. cf. cyprinus	**SR**		**S2**	**GNR**
"Carolina" Quillback				
P: Yadkin-Pee Dee, Catawba, and Broad drainages (Anson, Burke, Catawba*, Cleveland, Davidson, Davie, Forsyth, Iredell*, McDowell, Mecklenburg*, Montgomery, Polk, Richmond, Rowan, Rutherford, Stanly, Yadkin)				
Carpiodes sp. cf. velifer	**SC**		**S1**	**GNR**
Atlantic Highfin Carpsucker				
PC: Catawba, Pee Dee, and Cape Fear rivers (Anson*, Bladen, Catawba*, Gaston*, Iredell*, Mecklenburg*, Richmond*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Clinostomus sp. 1	**SC**		**S2**	**G5T3Q**
Smoky Dace				
M: Little Tennessee and Hiwassee drainages (Cherokee, Clay, Graham, Jackson, Macon, Swain)				
Cottus caeruleomentum	**SC**		**S1**	**G4**
Blue Ridge Sculpin				
P: Dan drainage (Stokes)				
Cottus carolinae	**SC**		**S1**	**G5**
Banded Sculpin				
M: French Broad and Pigeon drainages (Cherokee, Clay, Haywood, Madison)				
Cyprinella sp. 1	**SC**		**S2**	**G2Q**
Thinlip Chub				
SC: Cape Fear, Lumber, and Pee Dee drainages (Anson, Bladen, Columbus, Cumberland, Hoke, Moore, Richmond, Robeson, Sampson, Scotland)				
Elassoma boehlkei	**T**		**S2**	**G2**
Carolina Pygmy Sunfish				
C: streams and canals in Waccamaw drainage (Brunswick, Columbus)				
Enneacanthus chaetodon	**SR**		**S3**	**G3G4**
Blackbanded Sunfish				
SC: many drainages, particularly Lumber and Waccamaw (Bertie*, Bladen, Brunswick, Columbus, Craven*, Cumberland, Duplin*, Gates, Harnett*, Hoke, Johnston*, Lenoir*, Martin*, Montgomery*, Moore, Nash*, New Hanover, Pender, Richmond, Robeson, Sampson, Scotland, Wayne*)				
Enneacanthus obesus	**SR**		**S3**	**G5**
Banded Sunfish				
C: most Atlantic drainages (Beaufort, Bertie, Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Dare*, Duplin*, Gates, Harnett*, Hertford, Hyde*, Johnston, Jones, New Hanover, Northampton, Onslow, Pender, Pitt, Robeson, Sampson*, Tyrrell*, Washington)				
Erimonax monachus	**T**	**T**	**S1**	**G2**
Spotfin Chub				
M: Little Tennessee River; formerly in French Broad drainage (Buncombe*, Graham, Macon, Madison*, Swain)				
Erimystax insignis	**SR**		**S2**	**G4**
Blotched Chub				
M: primarily French Broad drainage (Buncombe, Cherokee, Clay, Henderson, Madison, Mitchell, Transylvania, Yancey)				
Etheostoma acuticeps	**T**		**S1**	**G3**
Sharphead Darter				
M: Toe and Cane drainages (Mitchell, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Etheostoma collis	**SC**		**S3**	**G3**
Carolina Darter				
P: Roanoke, Tar, Neuse, Cape Fear, Yadkin-Pee Dee, and Catawba drainages (Alamance, Anson, Cabarrus, Chatham, Davidson, Durham*, Granville, Guilford, Mecklenburg, Montgomery, Moore, Orange*, Person, Randolph, Richmond, Stanly, Union, Vance)				
Etheostoma inscriptum	**T**		**S1**	**G4**
Turquoise Darter				
M: streams of Savannah drainage (Jackson, Macon, Transylvania)				
Etheostoma jessiae	**SC**		**SX**	**G4**
Blueside Darter				
M: streams in Mills River system (Henderson*)				
Etheostoma kanawhae	**SR**		**S3**	**G4**
Kanawha Darter				
M: New drainage (Alleghany, Ashe, Watauga)				
Etheostoma mariae	**SC**		**S2**	**G3**
Pinewoods Darter				
SC: streams of Lumber drainage, mainly in the sandhills; and Little Pee Dee drainage (Bladen, Hoke, Montgomery, Moore, Richmond, Robeson*, Scotland)				
Etheostoma perlongum	**T**		**S1**	**G1Q**
Waccamaw Darter				
C: Lake Waccamaw, and sparingly in the Waccamaw River (endemic to North Carolina) (Columbus)				
Etheostoma podostemone	**SR**		**S2**	**G4**
Riverweed Darter				
P: large streams in Dan River system (Caswell, Rockingham, Stokes)				
Etheostoma simoterum	**SC**		**S1**	**G3G4**
Tennessee Snubnose Darter				
M: streams of French Broad drainage (Madison)				
Etheostoma thalassinum	**SR**		**S3**	**G4**
Seagreen Darter				
MP: Catawba and Broad drainages (Alexander, Avery, Buncombe*, Burke, Caldwell, Catawba, Cleveland, Gaston, Lincoln, McDowell, Polk, Rutherford)				
Etheostoma vulneratum	**SC**		**S2**	**G3**
Wounded Darter				
M: streams of Little Tennessee and French Broad drainages (Graham, Jackson, Macon, Madison*, Swain, Transylvania)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Exoglossum laurae	**SR**		**S2**	**G4**
Tonguetied Minnow				
M: New drainage (Alleghany, Ashe, Watauga)				
Exoglossum maxillingua	**SC**		**S1**	**G5**
Cutlip Minnow				
P: streams of Dan River system (Rockingham, Stokes)				
Fundulus cf. diaphanus	**SR**		**S1**	**G1Q**
Lake Phelps Killifish				
C: Lake Phelps (endemic to this lake) (Tyrrell, Washington)				
Fundulus waccamensis	**SC**		**S1**	**G1**
Waccamaw Killifish				
C: Lake Waccamaw (endemic to North Carolina) (Columbus)				
Heterandria formosa	**SC**		**S2**	**G5**
Least Killifish				
C: streams and lakes near Wilmington (Brunswick, New Hanover, Pender)				
Hiodon tergisus	**SC**		**S1**	**G5**
Mooneye				
M: French Broad River (Henderson*, Madison)				
Hybopsis rubrifrons	**T**		**S1**	**G4**
Rosyface Chub				
M: Savannah drainage (Transylvania)				
Ichthyomyzon bdellium	**SC**		**S1**	**G3G4**
Ohio Lamprey				
M: French Broad and Cane drainages (Henderson, Madison, Mitchell, Yancey)				
Ictiobus bubalus	**SR**		**S1**	**G5**
Smallmouth Buffalo				
M: French Broad drainage [populations in Atlantic Slope are not tracked] (Anson, Davidson, Davie, Madison, Mitchell, Montgomery, Richmond, Stanly, Yancey)				
Ictiobus niger	**SR**		**S1**	**G5**
Black Buffalo				
M: French Broad River (Madison)				
Lampetra aepyptera	**T**		**S2**	**G5**
Least Brook Lamprey				
PC: Tar and Neuse drainages (Edgecombe, Franklin, Halifax, Johnston, Jones*, Lenoir, Pitt*, Wake, Warren)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Lethenteron appendix	**SC**		**S1**	**G4**
American Brook Lamprey				
M: French Broad drainage (Madison)				
Luxilus chrysocephalus	**SC**		**S1**	**G5**
Striped Shiner				
M: French Broad and Hiwassee drainages (Buncombe, Cherokee, Macon, Mitchell, Yancey)				
Menidia extensa	**T**	**T**	**S1**	**G1**
Waccamaw Silverside				
C: Lake Waccamaw (endemic to North Carolina) (Columbus)				
Micropterus coosae	**SR**		**S1**	**G5**
Redeye Bass				
M: Savannah and Broad drainages (Burke*, Henderson, Transylvania)				
Moxostoma ariommum	**T**		**S2**	**G4**
Bigeye Jumprock				
P: Dan drainage (Caswell, Forsyth, Rockingham, Stokes)				
Moxostoma breviceps	**SR**		**S2**	**G5**
Smallmouth Redhorse				
M: Tennessee drainages (Cherokee, Jackson, Macon, Madison, Mitchell, Swain, Yancey)				
Moxostoma robustum	**E**		**S1**	**G1**
Robust Redhorse				
P: Pee Dee River; formerly in tributaries of this river (Anson, Burke*, Davidson*, Davie*, Iredell*, Richmond, Stanly*, Union*)				
Moxostoma sp. 2	**T**		**S2**	**G1G2**
Sicklefin Redhorse				
M: Hiwassee and Little Tennessee drainages (Cherokee, Clay, Graham, Jackson, Macon, Swain)				
Moxostoma sp. 3	**T**		**S2**	**G1G2Q**
Carolina Redhorse				
P: Cape Fear and Pee Dee drainages (Anson, Chatham, Harnett*, Lee, Montgomery, Moore, Randolph, Richmond, Stanly)				
Notropis bifrenatus	**E**		**S1**	**G3**
Bridle Shiner				
C: streams in lower Neuse and Chowan drainages (Craven, Hertford, Jones)				
Notropis chalybaeus	**SR**		**S2S3**	**G4**
Ironcolor Shiner				
C: coastal plain rivers and creeks (Bertie*, Bladen, Brunswick, Carteret, Columbus, Craven*, Cumberland*, Duplin, Edgecombe*, Greene*, Halifax*, Harnett, Hertford, Hoke, Johnston, Jones, Lenoir, Martin, Nash*, New Hanover*, Northampton, Onslow, Pender*, Perquimans*, Pitt*, Richmond, Robeson, Sampson, Scotland, Wake, Wayne*, Wilson*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Notropis lutipinnis	**SC**		**S2**	**G4Q**
Yellowfin Shiner				
MP: Savannah, Little Tennessee, and Broad drainages [only the Savannah drainage is listed as SC] (Cleveland, Jackson, Macon, Transylvania)				
Notropis mekistocholas	**E**	**E**	**S1**	**G1**
Cape Fear Shiner				
P: Cape Fear drainage (endemic to North Carolina) (Chatham, Harnett, Lee, Moore, Randolph)				
Notropis micropteryx	**SR**		**S2**	**G5**
Highland Shiner				
M: French Broad, Little Tennessee, and Hiwassee drainages (Buncombe, Cherokee, Clay, Haywood, Jackson, Macon, Madison, Mitchell, Swain, Transylvania*, Yancey)				
Notropis sp. 1	**SR**		**S2**	**GNR**
Kanawha Rosyface Shiner				
M: New drainage (Alleghany, Ashe, Watauga)				
Notropis volucellus	**T**		**S2**	**G5**
Mimic Shiner				
MPC: New, French Broad, Little Tennessee, Tar, and Neuse drainages (Alleghany, Ashe, Avery, Durham*, Franklin, Granville, Greene*, Halifax, Johnston*, Jones, Lenoir, Madison, Mitchell, Nash*, Orange*, Person, Pitt*, Swain, Vance, Wake*, Warren, Yancey)				
Noturus eleutherus	**SC**		**S1**	**G4**
Mountain Madtom				
M: French Broad drainage (Madison)				
Noturus flavus	**E**		**S1**	**G5**
Stonecat				
M: Nolichucky, French Broad, and Little Tennessee drainages (Macon, Madison, Swain, Yancey)				
Noturus furiosus	**T**		**S2**	**G2**
Carolina Madtom				
PC: Tar and Neuse drainages (endemic to North Carolina) (Craven*, Durham*, Edgecombe, Franklin, Granville, Greene*, Halifax, Johnston, Jones*, Lenoir*, Nash, Pitt*, Vance, Wake*, Warren, Wayne*, Wilson)				
Noturus gilberti	**E**		**S1**	**G2**
Orangefin Madtom				
P: Dan drainage (Stokes)				
Noturus sp. 2	**SC**		**S1**	**G2**
Broadtail Madtom				
C: Cape Fear, Waccamaw, and Lumber drainages (Bladen, Brunswick*, Columbus, Cumberland, Duplin*, Hoke, Moore*, Pender*, Richmond*, Robeson, Sampson, Scotland)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Percina burtoni	**E**		**S1**	**G2G3**
Blotchside Logperch				
M: South Toe drainage; formerly in French Broad drainage (Buncombe*, Yancey)				
Percina caprodes	**T**		**S1**	**G5**
Logperch				
M: Tennessee drainages (Alleghany, Ashe, Haywood, Madison)				
Percina gymnocephala	**SR**		**S2**	**G4**
Appalachia Darter				
M: New drainage (Alleghany, Ashe, Watauga)				
Percina nigrofasciata	**SC**		**S1**	**G5**
Blackbanded Darter				
M: Savannah drainage (Transylvania)				
Percina oxyrhynchus	**E**		**S1**	**G4**
Sharpnose Darter				
M: New drainage (Alleghany, Ashe)				
Percina rex	**E**	**E**	**S1**	**G1G2**
Roanoke Logperch				
P: Dan drainage (Caswell, Rockingham)				
Percina squamata	**SC**		**S2**	**G3**
Olive Darter				
M: Tennessee drainages (Cherokee, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Swain, Yancey)				
Percina williamsi	**SC**		**SX**	**G2**
Sickle Darter				
M: formerly in French Broad River (Buncombe*)				
Phenacobius teretulus	**SC**		**S3**	**G3G4**
Kanawha Minnow				
M: New drainage (Alleghany, Ashe, Watauga)				
Polyodon spathula	**E**		**SH**	**G4**
Paddlefish				
M: French Broad River (Buncombe*, Henderson*, Madison*, Transylvania*)				
Sander canadensis	**SR**		**S1**	**G5**
Sauger				
M: French Broad and Hiwassee drainages (Cherokee*, Haywood*, Madison)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Semotilus lumbee	**SC**		**S2**	**G3G4**
Sandhills Chub				
S: Sandhills streams in the Cape Fear, Lumber, and Yadkin-Pee Dee drainages (Cumberland, Harnett, Hoke, Lee, Montgomery, Moore, Richmond, Scotland)				
Thoburnia hamiltoni	**E**		**S1**	**G3**
Rustyside Sucker				
P: Dan drainage (Stokes)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Mollusks: Freshwater Bivalves				
Alasmidonta heterodon **Dwarf Wedgemussel** PC: Tar and Neuse drainages, mainly near Fall Line (Franklin, Granville, Halifax, Johnston, Nash, Orange*, Pitt*, Vance, Wake, Warren, Wilson)	**E**	**E**	**S1**	**G1G2**
Alasmidonta raveneliana **Appalachian Elktoe** M: Tennessee drainages (Buncombe, Graham, Haywood, Henderson, Jackson, Macon, Mitchell, Swain, Transylvania, Yancey)	**E**	**E**	**S1**	**G1**
Alasmidonta undulata **Triangle Floater** PC: Roanoke, Chowan, Tar, Neuse, Cape Fear drainages (Caswell, Chatham, Durham, Edgecombe, Franklin, Gates, Granville, Guilford, Halifax, Harnett, Hertford, Johnston, Jones, Lee, Montgomery, Moore, Nash, Northampton, Orange, Person, Pitt, Randolph, Vance, Wake, Warren, Wayne, Wilson)	**T**		**S3**	**G4**
Alasmidonta varicosa **Brook Floater** MP: Cape Fear drainage, also along Blue Ridge escarpment of Catawba and Yadkin-Pee Dee drainages (Anson*, Burke, Caldwell, Chatham, Forsyth, Granville, McDowell, Montgomery, Moore, Orange, Randolph, Surry, Wilkes, Yadkin)	**E**		**S3**	**G3**
Alasmidonta viridis **Slippershell Mussel** M: Little Tennessee and French Broad drainages (Henderson, Macon, Swain, Transylvania)	**E**		**S1**	**G4G5**
Anodonta couperiana **Barrel Floater** C: Cape Fear drainage (Bladen, New Hanover*)	**E**		**S1**	**G4**
Anodonta implicata **Alewife Floater** C: Chowan, Roanoke, Cape Fear, and Pee Dee drainages (Anson, Bertie, Chowan*, Gates, Halifax, Hertford, Montgomery, Northampton, Richmond, Sampson, Stanly, Washington)	**T**		**S2**	**G5**
Cyclonaias tuberculata **Purple Wartyback** M: New River (Alleghany)	**E**		**S1**	**G5**
Elliptio dilatata **Spike** M: New, Little Tennessee, and Hiwassee drainages (Alleghany, Ashe, Cherokee, Clay, Jackson, Macon, Swain, Watauga)	**SC**		**S2**	**G5**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Elliptio fisheriana	**SR**		**S3**	**G4**
Northern Lance				
PC: Atlantic Slope drainages (Columbus, Edgecombe, Franklin, Gates, Granville, Halifax, Harnett, Hertford, Johnston, Martin, Nash, Northampton, Pitt, Stokes, Wake, Warren, Wayne, Wilson)				
Elliptio folliculata	**SC**		**S2**	**G2G3Q**
Pod Lance				
C: Cape Fear, Lumber, and Yadkin-Pee Dee drainages (Anson, Bladen, Brunswick, Columbus, Cumberland, Duplin*, Harnett, Montgomery, Pender*, Richmond, Sampson, Stanly)				
Elliptio lanceolata	**E**	**T**	**S2**	**G2G3**
Yellow Lance				
PC: Tar and Neuse drainages (Edgecombe, Franklin, Granville, Halifax, Johnston, Nash, Vance, Wake, Warren, Wayne)				
Elliptio marsupiobesa	**SC**		**S2**	**G3Q**
Cape Fear Spike				
C: Cape Fear and Neuse drainages (endemic to North Carolina) (Bladen, Craven, Cumberland, Duplin, Johnston, New Hanover, Pender, Pitt, Robeson, Sampson, Wayne)				
Elliptio roanokensis	**SC**		**S3**	**G3**
Roanoke Slabshell				
PC: Roanoke, Tar, Neuse, White Oak, Cape Fear, Lumber, and Yadkin-Pee Dee drainages (Anson, Bladen, Chatham, Craven, Cumberland, Durham, Edgecombe, Franklin, Granville, Halifax, Harnett, Johnston, Jones, Lee, Lenoir, Montgomery, Moore, Nash, Northampton, Onslow, Pitt, Randolph, Richmond, Stanly, Wake, Warren, Wayne, Wilkes, Wilson)				
Elliptio steinstansana	**E**	**E**	**S1**	**G1**
Tar River Spinymussel				
PC: Tar drainage, very rare in Neuse drainage (endemic to North Carolina) (Edgecombe, Franklin, Halifax, Johnston, Nash, Pitt*, Warren, Wayne*)				
Elliptio waccamawensis	**T**		**S1**	**G2G3Q**
Waccamaw Spike				
C: Lake Waccamaw and vicinity (endemic to North Carolina; possibly in adjacent South Carolina) (Brunswick, Columbus)				
Fusconaia masoni	**E**	**PT**	**S3**	**G2**
Atlantic Pigtoe				
PC: Roanoke, Tar, Neuse, Cape Fear, Yadkin-Pee Dee drainages (Beaufort*, Bladen, Caswell, Chatham, Cumberland*, Durham, Edgecombe, Franklin, Granville, Halifax, Harnett*, Johnston, Montgomery, Moore, Nash, Northampton*, Orange, Pender, Person, Pitt, Randolph, Sampson, Union, Vance, Wake, Warren, Wayne*, Wilson)				
Fusconaia subrotunda	**E**		**S1**	**G3**
Longsolid				
M: Hiwassee and French Broad drainages (Buncombe, Cherokee, Clay, Transylvania)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Lampsilis cariosa	**E**		**S3**	**G3G4**
Yellow Lampmussel				
PC: Chowan, Roanoke, Neuse, Tar, Cape Fear, Lumber, Yadkin-Pee Dee drainages (Alamance, Anson, Bladen*, Chatham, Columbus, Cumberland, Davie, Durham, Edgecombe, Franklin, Gates, Granville, Halifax, Harnett, Hertford, Johnston, Lee, Montgomery, Moore, Nash, Northampton, Orange, Pender*, Person, Pitt, Randolph, Richmond, Rockingham, Rowan, Sampson*, Stanly, Vance)				
Lampsilis fasciola	**SC**		**S2**	**G5**
Wavyrayed Lampmussel				
M: French Broad, Pigeon, Hiwassee, and Little Tennessee drainages (Cherokee, Clay, Graham, Haywood, Jackson, Macon, Mitchell, Swain, Yancey)				
Lampsilis fullerkati	**T**		**S1**	**G1Q**
Waccamaw Fatmucket				
C: Lake Waccamaw and vicinity (endemic to North Carolina and adjacent South Carolina) (Columbus)				
Lampsilis radiata	**T**		**S3**	**G5**
Eastern Lampmussel				
PC: Chowan, Roanoke, Tar, Neuse, Cape Fear, Yadkin-Pee Dee drainages (Alamance, Anson, Bertie, Bladen, Cabarrus, Chatham, Chowan*, Columbus, Craven, Davidson, Durham, Edgecombe, Franklin, Gates, Granville, Halifax, Hertford, Johnston, Jones, Lee, Martin, Montgomery, Nash, Northampton, Orange, Pender, Person, Pitt, Randolph, Richmond, Rowan, Sampson*, Stanly, Union, Wake, Warren, Wayne, Wilson)				
Lampsilis sp. 2	**SR**		**S2**	**G1**
Chameleon Lampmussel				
PC: Tar, Neuse, Cape Fear, and Yadkin-Pee Dee drainages (Anson, Chatham, Cumberland, Durham, Franklin, Granville, Nash, Orange, Person, Vance, Warren)				
Lampsilis splendida	**SR**		**S1**	**G3**
Rayed Pink Fatmucket				
PC: Lake Waccamaw and Waccamaw River, Yadkin-Pee Dee River (Anson, Burke, Caldwell, Catawba, Chatham, Columbus, Richmond)				
Lasmigona decorata	**E**	**E**	**S1**	**G1**
Carolina Heelsplitter				
P: Catawba and Pee Dee drainages (endemic to this area in North Carolina and adjacent South Carolina) (Cabarrus*, Mecklenburg, Union)				
Lasmigona holstonia	**E**		**SH**	**G3**
Tennessee Heelsplitter				
M: formerly in Valley Creek in Cherokee County (Cherokee*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Lasmigona subviridis	**E**		**S2**	**G3**
Green Floater				
MPC: New, Watauga, Roanoke, Tar, Neuse and Yadkin-Pee Dee drainages (Alleghany, Ashe, Durham, Edgecombe, Franklin, Granville, Halifax, Johnston, Montgomery, Nash, Northampton, Orange, Person, Pitt, Randolph, Rockingham, Stokes, Wake, Watauga)				
Leptodea ochracea	**T**		**S2**	**G3G4**
Tidewater Mucket				
PC: Chowan, Roanoke, and Tar drainages, and abundant in Lake Waccamaw (Bertie, Chowan, Columbus, Edgecombe, Gates, Halifax, Hertford, Martin, Northampton, Pitt, Vance, Warren, Washington)				
Ligumia nasuta	**T**		**S2**	**G4**
Eastern Pondmussel				
C: Chowan, Roanoke, Neuse, Tar, Cape Fear, and Yadkin-Pee Dee drainages (Anson, Bertie, Brunswick*, Chatham, Chowan, Columbus, Gates, Halifax, Hertford, Martin, Montgomery, Nash*, Northampton, Pitt, Richmond, Stanly, Washington)				
Pegias fabula	**E**	**E**	**S1**	**G1**
Littlewing Pearlymussel				
M: Little Tennessee River; formerly in Valley River in Cherokee County (Cherokee*, Macon, Swain)				
Pleurobema collina	**E**	**E**	**S1**	**G1**
James Spinymussel				
P: Dan and Mayo rivers (Rockingham, Stokes)				
Pleurobema oviforme	**E**		**S1**	**G2G3**
Tennessee Clubshell				
M: French Broad, Little Tennessee, and Hiwassee drainages (Cherokee, Clay, Macon, Swain, Transylvania)				
Pleuronaia barnesiana	**E**		**S1**	**G2G3**
Tennessee Pigtoe				
M: Little Tennessee and Hiwassee rivers (Cherokee, Macon)				
Potamilus alatus	**SR**		**S1**	**G5**
Pink Heelsplitter				
M: French Broad River (Madison)				
Strophitus undulatus	**T**		**S3**	**G5**
Creeper				
MPC: Roanoke, Tar, Neuse, Cape Fear, Yadkin-Pee Dee, Catawba, Broad, and French Broad drainages (Alamance, Alexander, Anson, Buncombe, Burke, Cabarrus, Caldwell, Caswell, Catawba, Chatham, Davidson*, Durham, Edgecombe, Forsyth, Franklin, Gaston, Granville, Halifax, Harnett*, Henderson, Johnston, Jones, Lee, Mecklenburg, Montgomery, Moore, Nash, Orange, Person, Pitt, Polk*, Randolph, Richmond, Rockingham, Stanly, Surry, Transylvania, Union, Vance, Wake, Warren, Wilkes, Wilson, Yadkin)

Rainbow				
M: Hiwassee and Little Tennessee drainages; formerly in French Broad drainage (Cherokee, Clay, Jackson, Macon, Swain)				
Villosa trabalis	**SR**	**E**	**SH**	**G1**
Cumberland Bean				
M: Hiwassee River (Cherokee)				
Villosa vanuxemensis	**T**		**S1?**	**G4**
Mountain Creekshell				
M: Hiwassee River; documented from Hiwassee and French Broad drainages in Tennessee (Cherokee, Clay)				
Villosa vaughaniana	**E**		**S3**	**G2**
Carolina Creekshell				
P: Cape Fear, Yadkin-Pee Dee, and Catawba drainages (endemic to North Carolina and adjacent South Carolina) (Alamance, Anson, Cabarrus, Chatham, Guilford, Lee, Mecklenburg, Montgomery, Moore, Orange, Randolph, Richmond, Rowan, Stanly, Union)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Mollusks: Freshwater and Terrestrial Gastropods				
Allogona profunda **Broad-banded Forestsnail** M: mixed hardwood forests (Avery, Mitchell)	**SR**		**S2S3**	**G5**
Amnicola sp. 1 **Waccamaw Amnicola** C: Lake Waccamaw and adjacent Big Creek (endemic to North Carolina) (Columbus)	**SC**		**S1**	**G1**
Anguispira knoxensis **Rustic Tigersnail** M: around large rotting logs near limestone outcrops (Swain*)	**SR**		**SH**	**G1G2**
Anguispira strongylodes **Southeastern Tigersnail** MP: forested areas with high pH soils (Clay, Graham, McDowell, Rutherford, Swain)	**SR**		**S2S3**	**G5**
Appalachina chilhoweensis **Queen Crater** M: cove hardwoods (Graham, Haywood, Madison, Swain)	**SC**		**S2**	**G4**
Appalachina sayana **Spike-lip Crater** M: rich upland hardwood forests (Ashe, Avery, Madison, Watauga, Yancey*)	**SR**		**S2S3**	**G5T5**
Carychium arboreum **Tree Thorn** M: mixed hardwood forests just north of Fontana Lake (endemic to this area) (Swain)	**SR**		**S1?**	**G1**
Catinella pugilator **Weedpatch Ambersnail** C: marsh ecotones (Currituck)	**SR**		**S1?**	**G1G2**
Catinella waccamawensis **Waccamaw Ambersnail** C: shoreline of Lake Waccamaw (endemic to this area) (Columbus*)	**T**		**SH**	**G1Q**
Cincinnatia sp. 1 **Waccamaw Siltsnail** C: Lake Waccamaw and adjacent Big Creek (endemic to North Carolina) (Columbus)	**SC**		**S1**	**G1**
Daedalochila sp. 1 nr. auriformis **a Liptooth** C: very wet clay savannas? (Brunswick)	**SR**		**S1S2**	**GNR**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Discus bryanti	**SC**		**S2**	**G3**
Sawtooth Disc				
M: cove hardwoods (Avery, Buncombe, Madison, Mitchell, Watauga)				
Discus nigrimontanus	**SR**		**S2S3**	**G4**
Black Mountain Disc				
M: talus slopes in hardwood forests (Ashe, Graham, Swain, Watauga, Yancey)				
Discus whitneyi	**SR**		**S1S2**	**G5**
Forest Disc				
M?: Mesic to slightly drier forests, no specific locality information available				
Elimia christyi	**E**		**S1**	**G2**
Christy's Elimia				
M: Hiwassee River and tributaries (Cherokee)				
Euchemotrema fraternum	**SR**		**S2S3**	**G5**
Upland Pillsnail				
M: under forest litter in upland hardwood forests (Swain)				
Fumonelix cherohalaensis	**SR**		**S1**	**G1**
Rock-loving Covert				
M: undersides of rock ledges in northern hardwood forests (endemic to Huckleberry Knob area) (Graham)				
Fumonelix jonesiana	**T**		**S1?**	**G1**
Big-tooth Covert				
M: spruce-fir and northern hardwood forests; Newfound Gap area of Great Smoky Mountains National Park (endemic to this area) (Swain)				
Fumonelix langdoni	**SR**		**S1**	**GNR**
Talus Covert				
M: in talus and under leaf litter in high elevation hardwood forests (endemic to the NC-TN state line in Great Smoky Mountains National Park) (Swain)				
Fumonelix orestes	**T**		**S1**	**G1**
Engraved Covert				
M: spruce-fir and northern hardwood forests; Plott Balsam mountains (endemic to this area) (Haywood, Jackson)				
Fumonelix roanensis	**SR**		**S1**	**G1**
Roan Mountain Covert				
M: high elevation hardwood and coniferous forests (endemic to Roan Mountain along the NC-TN state line) (Mitchell)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Fumonelix wheatleyi clingmanicus	**SC**		**S1**	**G4T2T3**
Clingman Covert				
M: highest summits with spruce-fir and northern hardwood forests in Great Smoky Mountains National Park (endemic to the park) (Swain)				
Gastrocopta corticaria	**SR**		**S2S3**	**G5**
Bark Snaggletooth				
MC: rich cove forests and other forests over high pH soils (Swain)				
Glyphyalinia clingmani	**E**		**S1**	**G1**
Fragile Glyph				
M: wet leaf litter associated with seepage runs; Black Mountains (endemic to North Carolina) (Buncombe, Yancey)				
Glyphyalinia cryptomphala	**SR**		**S1S2**	**G5**
Thin Glyph				
MP: hardwood forests, mainly along river bluffs or in ravines (Haywood)				
Glyphyalinia junaluskana	**SC**		**S2**	**G2**
Dark Glyph				
M: cove hardwoods; southwestern mountains (Cherokee*, Graham, Macon, Swain)				
Glyphyalinia pentadelphia	**SC**		**S2**	**G2G3**
Pink Glyph				
M: cove hardwoods; southwestern mountains (Cherokee, Clay, Graham, Macon, Swain)				
Glyphyalinia vanattai	**SC**		**S1**	**G2G3**
Honey Glyph				
M: wet leaf litter next to seeps or streams (Avery*, Mitchell*, Yancey*)				
Haplotrema kendeighi	**SC**		**S1S2**	**G2**
Blue-footed Lancetooth				
M: southwestern mountains (Graham, Macon, Swain)				
Helicodiscus bonamicus	**SC**		**S1**	**G1**
Spiral Coil				
M: Nantahala Gorge vicinity (endemic to this area) (Graham, Macon, Swain)				
Helicodiscus fimbriatus	**SC**		**S2**	**G4**
Fringed Coil				
M: rocky soils; extreme southwestern corner of the state (Caldwell, Cherokee, Graham)				
Helicodiscus inermis	**SR**		**S1?**	**G4**
Oldfield Coil				
M: open, grassy areas (Haywood, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Helicodiscus multidens	**SR**		**S1**	**G3**
Twilight Coil				
M: river bluffs or caves, in calcium-rich soils (Macon, Madison)				
Helicodiscus saludensis	**SR**		**S1?**	**G1**
Corncob Snail				
P: no habitat information; apparently restricted to NC and SC, known in the state only from South Mountains State Park (Burke)				
Helisoma eucosmium	**E**		**S1**	**G1Q**
Greenfield Rams-horn				
C: Greenfield Lake (formerly), Town Creek in Brunswick County (endemic to North Carolina) (Brunswick*, New Hanover*)				
Hendersonia occulta	**SR**		**S2S3**	**G4**
Cherrystone Drop				
M: river bluffs, talus slopes, and other forested areas with high pH soils (Caldwell, Madison, Swain, Watauga, Yancey)				
Inflectarius downieanus	**SR**		**S1S2**	**G3**
Dwarf Globelet				
M: montane forests, but habitats not well known; reported also from Graham and Cherokee counties (Watauga)				
Inflectarius ferrissi	**T**		**S2**	**G2**
Smokey Mountain Covert				
M: spruce-fir and northern hardwood forests; Great Smoky Mountains and Plott Balsams (endemic to these ranges) (Haywood, Jackson, Swain)				
Inflectarius subpalliatus	**SC**		**S2S3**	**G2**
Velvet Covert				
M: central mountains (Watauga to Haywood counties) (Avery, Haywood, Madison, Mitchell, Watauga)				
Inflectarius verus	**SR**		**S1?**	**G1**
Fuzzy Covert				
M: rich forests, known only from both the NC and TN sides of Great Smoky Mountains National Park (Haywood, Swain)				
Leptoxis dilatata	**SC**		**S3**	**G3**
Seep Mudalia				
M: New drainage (Alleghany, Ashe, Watauga)				
Lioplax subcarinata	**SC**		**S3**	**G4G5**
Ridged Lioplax				
PC: streams and rivers, well documented in Lake Waccamaw, possibly in decline there (Columbus, Duplin*, Edgecombe, Franklin*, Gates, Granville, Halifax, Hertford, Johnston*, Nash, Pender*, Surry, Warren)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Mesodon altivagus	**SR**		**S1?**	**G2G3**
Wandering Globe				
M: spruce-fir and northern hardwood forests, known only from both the NC and TN sides of Great Smoky Mountains National Park (Haywood, Swain)				
Mesodon andrewsae	**SR**		**S2S3**	**G3**
Balsam Globe				
M: high elevation forests, from Madison County to southwestern Virginia (Avery, Caldwell, Jackson, Swain*, Transylvania, Watauga, Yancey)				
Mesomphix latior	**SR**		**S2S3**	**G3G4**
Broad Button				
M: low elevation hardwood forests (Haywood, Swain)				
Mesomphix pilsbryi	**SR**		**S2S3**	**G4**
Striate Button				
PC: no habitat information (Bladen, Brunswick, Craven, Gaston, Harnett, Sampson, Stanly, Union)				
Mesomphix vulgatus	**SR**		**S2?**	**G4**
Common Button				
M: a variety of forested slopes, often where steep or in ravines (Henderson, McDowell, Swain*, Watauga*)				
Novisuccinea ovalis	**SR**		**S2S3**	**G5**
Oval Ambersnail				
M: a variety of montane forests, at all elevations (Avery, Madison, Mitchell, Swain, Watauga, Yancey)				
Pallifera hemphilli	**SC**		**S2S3**	**G4**
Black Mantleslug				
M: high elevation forests, mainly spruce-fir (Avery, Jackson, Mitchell, Swain, Watauga, Yancey*)				
Pallifera ohioensis	**SR**		**S1**	**G5**
Redfoot Mantleslug				
M: under bark, logs, or leaf litter in spruce-fir forests, known from Roan Mountain (Mitchell)				
Paravitrea andrewsae	**SC**		**S2**	**G2**
High Mountain Supercoil				
M: cove forests with rocky slopes; northern half of the mountains (Avery, Buncombe, Madison, Mitchell, Watauga, Yancey)				
Paravitrea clappi	**SC**		**S1S2**	**G2G3**
Mirey Ridge Supercoil				
M: high elevations in Great Smoky Mountains National Park (endemic to this park) (Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Paravitrea lacteodens	**SC**		**SH**	**G1**
Ramp Cove Supercoil				
M: Graham County, possibly Cherokee County (endemic to this area) (Graham*)				
Paravitrea lamellidens	**SC**		**S2S3**	**G2**
Lamellate Supercoil				
M: forested hillsides, especially near talus slopes (Cherokee, Graham, Haywood, Macon, Swain, Watauga, Yancey)				
Paravitrea multidentata	**SR**		**S2S3**	**G5**
Dentate Supercoil				
MP: hillsides, especially near seeps, in hardwood forests (Avery, Burke, Haywood)				
Paravitrea petrophila	**SR**		**S1**	**G4**
Cherokee Supercoil				
M: a variety of hardwood forests (Macon)				
Paravitrea placentula	**SC**		**S2S3**	**G3**
Glossy Supercoil				
MP: a variety of mesic to rich hardwood forests (Avery, Madison, Mitchell, Swain)				
Paravitrea reesei	**SR**		**S2?**	**G3**
Round Supercoil				
M: hillsides and ravines in hardwood forests (Madison, Watauga, Wilkes)				
Paravitrea ternaria	**T**		**S1**	**G1G2**
Sculpted Supercoil				
M: under moist leaf litter on wooded hillsides and slopes (endemic to Madison County and Unicoi County, Tennessee) (Madison)				
Paravitrea umbilicaris	**SC**		**S2**	**G2**
Open Supercoil				
M: cove forests with rocky slopes (Avery, Cherokee, Graham, Macon, Swain)				
Paravitrea varidens	**T**		**S1S2**	**G1G2**
Roan Supercoil				
M: high elevation forests (endemic to northwestern North Carolina and adjacent Tennessee) (Mitchell, Yancey)				
Patera clarki clarki	**SC**		**S3**	**G3T3**
Dwarf Proud Globe				
M: forested mountainsides (Cherokee, Clay, Graham, Haywood, Jackson, Macon, Swain)				
Patera clarki nantahala	**T**	**T**	**S1**	**G3T1**
Noonday Globe				
M: Nantahala Gorge (endemic to this site) (Graham*, Macon*, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Philomycus virginicus	**SR**		**S1S2**	**G3**
Virginia Mantleslug				
M: wooded hillsides at high elevations in the northern mountains (Ashe, Avery)				
Pilsbryna nodopalma	**SR**		**S1**	**G1G2**
Oar Tooth Bud				
M: rock outcrops and rocky hillsides (Buncombe, Haywood, Madison)				
Planorbella magnifica	**E**	**C**	**S1**	**G1**
Magnificent Rams-horn				
C: Orton Pond and pond on Sand Hill Creek; formerly Greenfield Lake (endemic to North Carolina) (Brunswick, New Hanover*)				
Praticolella lawae	**SR**		**S1**	**G3**
Appalachian Scrubsnail				
M: mainly in sandy soil of dry pine woods and glades (Clay)				
Somatogyrus virginicus	**SR**		**S2S3**	**G2G3**
Panhandle Pebblesnail				
P: Eno River (Chatham, Durham)				
Stenotrema depilatum	**SC**		**S2**	**G2**
Great Smoky Slitmouth				
M: Great Smoky Mountains National Park (essentially endemic to this area) (Graham, Haywood, Swain)				
Stenotrema sp. 1	**SR**		**S1?**	**GNR**
Cove Slitmouth				
M: cove hardwoods at lower elevations (endemic to the Great Smoky Mountains National Park and immediate vicinity) (Haywood, Swain)				
Striatura exigua	**SR**		**S1**	**G5**
Ribbed Striate				
M: swampy woods and bog margins; disjunct south from West Virginia (Swain)				
Succinea unicolor	**SR**		**S1S2**	**G3G4**
Squatty Ambersnail				
C: marshy areas near streams and lakes (Bertie)				
Triodopsis fulciden	**SC**		**S2S3**	**G1G2**
Dwarf Threetooth				
P: southwestern Piedmont (endemic to North Carolina) (Burke, Catawba, Cleveland, Lincoln)				
Triodopsis soelneri	**T**		**S2S3**	**G2**
Cape Fear Threetooth				
C: swampy habitats in the southeastern portion of the state (endemic to North Carolina) (Brunswick, Columbus, New Hanover, Onslow)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Triodopsis tennesseensis	**SR**		**S1**	**G4**
Budded Threetooth				
M: mixed hardwoods on hillsides (Madison)				
Vallonia pulchella	**SR**		**S1S2**	**G5**
Lovely Vallonia				
no locality or habitat information; at southern edge of species' range				
Ventridens coelaxis	**SC**		**S3?**	**G3**
Bidentate Dome				
M: cove forests and northern hardwood forests (Alleghany, Avery, Caldwell, Madison, McDowell, Watauga)				
Ventridens collisella	**SR**		**S2?**	**G4**
Sculptured Dome				
M: wooded hilllsides in hardwood forests, on high pH soils (Alleghany, Ashe, Avery, Caldwell, Mitchell, Watauga)				
Ventridens decussatus	**SR**		**S3?**	**G3**
Crossed Dome				
MP: montane oak-hickory forests (Avery, Graham, Haywood)				
Ventridens lasmodon	**SR**		**S1?**	**G4**
Hollow Dome				
M: wooded hillsides and ravines (Madison)				
Ventridens lawae	**SR**		**S2S3**	**G4**
Rounded Dome				
MP: hillsides and ravines in hardwood forests (Avery, Burke, Caldwell, Catawba, Clay, Haywood, Henderson, Macon, Madison*, Swain, Transylvania)				
Ventridens suppressus	**SR**		**S1S2**	**G5**
Flat Dome				
no locality or habitat information; at southern edge of species' range (Avery)				
Vertigo alabamensis	**SR**		**S2S3**	**G3**
Alabama Vertigo				
C: pocosins (Bladen, Brunswick, Carteret, Craven, Greene, Moore, Pamlico, Pender, Scotland, Tyrrell)				
Vertigo bollesiana	**SR**		**S1S2**	**G4G5**
Delicate Vertigo				
M: wooded hillsides and marshes; however, records south of PA are suspected of being *Vertigo gouldii* (Haywood)				
Vertigo oralis	**SR**		**S2S3**	**G5**
Palmetto Vertigo				
C: swamps and other wetland forests in the lower Coastal Plain (Beaufort, Pender)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Vertigo parvula	**SR**		**S1**	**G3**
Smallmouth Vertigo				
M: cove forests and rich slopes, at low elevations (Burke)				
Vertigo sp. 3	**SR**		**S2S3**	**GNR**
a new Vertigo				
C: pocosins (Bladen, Brunswick, Craven, Jones, Pamlico, Pender, Tyrrell)				
Vertigo tridentata	**SR**		**S1S2**	**G5**
Honey Vertigo				
PM: often around species of mints close to rock outcrops or talus slopes (Ashe, Burke, Gaston)				
Viviparus intertextus	**SR**		**S2?**	**G4**
Rotund Mysterysnail				
C: swamps in Lumber and Waccamaw drainages (Bladen, Columbus, Robeson)				
Zonitoides patuloides	**SC**		**S2**	**G3**
Appalachian Gloss				
M: cove hardwoods in deep leaf litter; southwestern mountains (Haywood, Macon, Swain, Wilkes)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Arachnids

Hypochilus coylei **SR** **S3?** **G3?**

a Lampshade Weaver

M: rock outcrops (endemic to southern mountains of North Carolina) (Buncombe, Henderson, McDowell, Polk, Rutherford)

Hypochilus sheari **SR** **S2S3** **G2G3**

a Lampshade Weaver

M: rock outcrops (endemic to North Carolina) (Buncombe, McDowell, Yancey)

Microhexura montivaga **SR** **E** **S1** **G1**

Spruce-fir Moss Spider

M: in moss of spruce-fir forests (endemic to North Carolina and adjacent Tennessee) (Avery, Buncombe, Caldwell, Haywood, Jackson, Mitchell, Swain, Watauga, Yancey)

Nesticus brimleyi **SR** **S1?** **G1G2**

a Cave Cobweb Spider

M: caves (endemic to the vicinity of Bat Cave) (Polk)

Nesticus carolinensis **SR** **S1** **G1?**

Linville Caverns Spider

M: caves (endemic to Linville Caverns) (McDowell)

Nesticus cooperi **SR** **S1** **G1**

Lost Nantahala Cave Spider

M: caves and along Nantahala River (endemic to this area) (Macon, Swain)

Nesticus crosbyi **SR** **S1?** **G1?**

a Cave Cobweb Spider

M: spruce-fir forests (endemic to Mount Mitchell) (Yancey)

Nesticus gertschi **SR** **S1?** **G1G2**

a Cave Cobweb Spider

M: caves (Buncombe*)

Nesticus mimus **SR** **S2?** **G2**

a Cave Cobweb Spider

M: rocky areas; known from Grandfather Mountain and Table Rock; also in Virginia (Avery, Burke)

Nesticus sheari **SR** **S2?** **G2?**

a Cave Cobweb Spider

M: on ground in moist or rich forests (apparently endemic to Graham County) (Graham)

Nesticus silvanus **SR** **S2?** **G2?**

a Cave Cobweb Spider

M: habitat not indicated (apparently endemic to southern mountains of North Carolina)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Nesticus sp. 1	**SR**		**S2?**	**G2?**
a Cave Cobweb Spider				
M: habitat not indicated (Jackson, Transylvania)				
Nesticus sp. 2	**SR**		**S1S3**	**G1G3**
a Cave Cobweb Spider				
M: on ground in forests (Clay)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Crustaceans				
Caecidotea carolinensis **Bennett's Mill Cave Water Slater** P: caves (endemic to North Carolina) (McDowell*)	**E**		**SH**	**G2G3**
Cambarus acanthura **Thornytail Crayfish** M: pools and small creeks in the Hiwassee drainage (Cherokee)	**SR**		**S1**	**G4G5**
Cambarus brimleyorum **Valley River Crayfish** M: streams in the Hiwassee drainage (endemic to North Carolina) (Cherokee, Clay)	**SR**		**S2**	**G3G4**
Cambarus catagius **Greensboro Burrowing Crayfish** P: Cape Fear and Yadkin-Pee Dee drainages; Greensboro area to the Uwharries (endemic to North Carolina) (Davidson, Guilford, Montgomery, Randolph)	**SC**		**S1**	**G2**
Cambarus chaugaensis **Chauga Crayfish** M: streams in Savannah drainage (endemic to northwest South Carolina and adjacent North Carolina and Georgia) (Jackson, Macon, Transylvania)	**SC**		**S2**	**G2**
Cambarus davidi **Carolina Ladle Crayfish** P: Neuse and Cape Fear drainages (endemic to North Carolina) (Alamance, Caswell, Chatham, Durham, Granville, Guilford, Harnett*, Orange, Person, Rockingham, Stokes, Wake)	**SR**		**S3**	**G3**
Cambarus eeseeohensis **Grandfather Mountain Crayfish** M: Linville River above Linville Falls (endemic to this area) (Avery, Burke)	**SR**		**S2S3**	**G1**
Cambarus georgiae **Little Tennessee Crayfish** M: streams in Little Tennessee drainage (Jackson, Macon, Swain)	**SC**		**S2**	**G2G3**
Cambarus hystricosus **Sandhills Spiny Crayfish** S: streams in the Sandhills portion of the Cape Fear drainage (endemic to North Carolina) (Cumberland, Hoke, Moore)	**SR**		**S2**	**G2**
Cambarus johni **Carolina Foothills Crayfish** MP: headwater streams in the Yadkin-Pee Dee, Catawba, and Broad drainages (Alexander, Burke, Caldwell, Cleveland, Henderson, Iredell, Lincoln, McDowell, Polk, Rutherford, Wilkes)	**SR**		**S3**	**G3**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Cambarus lenati	**SR**		**S2**	**G2**
Broad River Stream Crayfish				
P: streams in the Broad River drainage (endemic to North Carolina) (Buncombe, Cleveland, Polk, Rutherford)				
Cambarus nodosus	**SR**		**S1**	**G4**
Knotty Burrowing Crayfish				
M: seepages and other mucky areas in the Hiwassee drainage (Cherokee, Clay)				
Cambarus parrishi	**SC**		**S1**	**G2**
Hiwassee Headwaters Crayfish				
M: streams in Hiwassee drainage (Clay)				
Cambarus reburrus	**SR**		**S2**	**G3**
French Broad River Crayfish				
M: streams in the French Broad, Little Tennessee, and Savannah drainages (endemic to North Carolina) (Buncombe, Henderson, Jackson, Madison, Transylvania)				
Cambarus spicatus	**SC**		**S2**	**G3**
Broad River Spiny Crayfish				
P: streams in Broad River drainage (Cleveland, Polk, Rutherford)				
Cambarus tuckasegee	**SR**		**S1S2**	**G1G2**
Tuckasegee Stream Crayfish				
M: streams in the Tuckasegee subdrainage of the Little Tennessee drainage (endemic to North Carolina) (Jackson, Macon, Swain)				
Diacyclops jeanneli putei	**SC**		**SH**	**G3G4T1T2**
Carolina Well Diacyclops				
P: well in Orange County (endemic to North Carolina) (Orange*)				
Lynceus gracilicornis	**SC**		**S2**	**G5**
Graceful Clam Shrimp				
C: temporary ponds, pools, and ditches (Craven, New Hanover*, Scotland)				
Orconectes carolinensis	**SC**		**S3**	**G3**
North Carolina Spiny Crayfish				
PC: rivers and streams in the Chowan, Roanoke, Neuse, and Tar drainages (Craven*, Edgecombe, Franklin, Gates, Granville, Greene*, Halifax, Hertford, Johnston, Jones, Lenoir*, Nash, Northampton, Pitt, Stokes, Vance, Wake, Warren, Wayne, Wilson)				
Orconectes virginiensis	**SC**		**S3**	**G3**
Chowanoke Crayfish				
C: streams and rivers in the Chowan and Roanoke drainages (Bertie, Chowan, Gates, Granville, Halifax, Hertford, Martin, Northampton, Washington)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Procambarus braswelli	**SC**		**S2**	**G3**
Waccamaw Crayfish				
C: Waccamaw and Lumber drainages (endemic to North Carolina and adjacent South Carolina) (Brunswick, Columbus, Robeson, Scotland)				
Skistodiaptomus carolinensis	**SC**		**SH**	**GNR**
Carolina Skistodiaptomus				
M: Lake Ravenel in Macon County (endemic to North Carolina) (Macon*)				
Stygobromus carolinensis	**SR**		**SH**	**G1**
Yancey Sideswimmer				
M: seeps at Mount Mitchell (endemic to North Carolina) (Yancey*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Mayflies

Ameletus tertius **SR** **S2** **G4**

a mayfly

M: Wilson Creek, Panthertown Creek; also in Great Smoky Mountains National Park (Swain)

Amercaenis cusabo **SR** **S1** **G3**

a mayfly

C: Black River, Pee Dee River (Anson, Bladen, Pender, Richmond)

Asioplax dolani **SR** **S2** **G4**

a mayfly

P: Neuse River (Edgecombe, Johnston, Montgomery, Polk, Union)

Attenella margarita **SR** **S1** **G5**

a mayfly

M: Eagle Creek (Swain)

Baetisca becki **SR** **S1** **G2G3**

a mayfly

PC: sand-bottomed streams (Catawba, Edgecombe*, Halifax*, Nash)

Baetisca obesa **SR** **S1** **G5**

a mayfly

C: rivers and streams in the Tar drainage (Edgecombe*, Pitt*)

Baetopus trishae **SR** **S1** **G1G2**

a mayfly

M: Panthertown Creek (Jackson)

Barbaetis benfieldi **SR** **S1** **G2G4**

Benfield's Bearded Small Minnow Mayfly

M: Jacob Fork, French Broad River, Caney Fork (Buncombe, Burke*, Jackson, Transylvania)

Cercobrachys etowah **SR** **S2** **G4**

a caenid mayfly

P: Yadkin, Broad, Hiwassee, and Tar River basins (Cherokee, Cleveland, Polk, Rowan)

Choroterpes basalis **SR** **S2** **G5**

a mayfly

PSC: Waccamaw River, Drowning Creek, Bear Creek, Lanes Creek, UT Laurens Creek, Dutchmans Creek (Brunswick*, Chatham*, Columbus, Moore*, Richmond*, Union*)

Dolania americana **SR** **SH** **G4**

American Sand Burrowing Mayfly

C: only known NC occurrence is from the Black River (Sampson*)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Epeorus punctatus	**SR**		**S1**	**G2G3**
Dotted Flatheaded Mayfly				
M: Wilson Creek, Johns River, and South Fork New River (Ashe, Burke, Caldwell)				
Ephemerella floripara	**SR**		**S2**	**G3Q**
a mayfly				
M: Wilson Creek, Linville River, and North and South Forks of New River (Alleghany, Ashe, Burke*, Caldwell, Watauga*)				
Heterocloeon berneri	**SR**		**S1**	**G2G3**
Berner's Two-winged Mayfly				
M: French Broad River and West Fork French Broad River (Transylvania)				
Homoeoneuria cahabensis	**SR**		**S2**	**G2G3**
Cahaba Sand-filtering Mayfly				
P: South Fork Yadkin River (Davie), South Fork Catawba River, Hunting Creek, Third Creek, Second Broad River (Catawba, Iredell*, Rowan*, Rutherford)				
Maccaffertium wudigeum	**SR**		**S1**	**G1**
Wilson Creek "Stenonema"				
M: Wilson Creek vicinity (endemic to this area) (Burke, Caldwell)				
Macdunnoa brunnea	**SR**		**S2**	**G3G4**
a mayfly				
MP: French Broad River, Mills River, Hunting Creek, Leepers Creek, Yadkin River, Swift Creek (Buncombe, Davie*, Gaston, Henderson, Iredell*, Nash*, Wilkes)				
Neoephemera eatoni	**SR**		**S1**	**GNR**
a mayfly				
P: Dan and Mayo River basins				
Pseudiron centralis	**SR**		**S2**	**G5**
White Sand-river Mayfly				
P: Iredell County (Iredell*)				
Tortopsis puella	**SR**		**S1**	**G5**
a mayfly				
P: only one NC specimen known, from Tar River (Franklin*)				
Tsalia berneri	**SR**		**S3**	**G4**
a mayfly				
MP: probably widespread in clean streams and rivers with riverweed (*Podostemum*) (Ashe*, Buncombe*, Burke*, Caldwell, Durham, Haywood, Henderson, Iredell, McDowell*, Rockingham)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Stoneflies				
Alloperla lenati **Sandhill Sallfly** SC: Lumber River at Wagram and Upper Rockfish Creek (Scotland)	**SR**		**S1**	**G2G3**
Attaneuria ruralis **Giant Stone** MSC: Cataloochee Creek, West Fork Pigeon River, South Fork New River; Naked Creek (Ashe, Haywood, Richmond*)	**SR**		**S2S3**	**G4**
Bolotoperla rossi **Smoky Willowfly** M: known from eight streams and rivers in the mountains, from Ashe County to Transylvania County (Alleghany*, Ashe*, Caldwell*, McDowell, Transylvania, Watauga*)	**SR**		**S3**	**G4**
Haploperla fleeki **Piedmont Sallfly** S: Little River (Moore) (endemic to this area) (Moore)	**SR**		**S1**	**G1**
Hydroperla phormidia **Brownwater Springfly** PSC: Lumber River drainage (Columbus, Robeson)	**SR**		**S2**	**G3**
Megaleuctra williamsae **Williams' Rare Winter Stonefly** M: UT Cullasaja River, Cove Creek, Mull Creek (Swain)	**SR**		**S1**	**G2**
Nemocapnia carolina **Southern Snowfly** M: Whitewater River, Jackson Creek, and Silver Creek (Burke, Jackson, Moore*, Transylvania)	**SR**		**S1**	**G5**
Pteronarcys comstocki **Spiny Salmonfly** M: medium to large cold streams in French Broad and Catawba drainages (Buncombe, Madison)	**SR**		**S2**	**G3**
Rasvena terna **Vermont Sallfly** M: small streams in the French Broad drainage (Cherokee, Transylvania)	**SR**		**S2**	**G4**
Remenus daniellae **Danielle's Stripetail** M: Yellowstone Prong of East Fork Pigeon River, Right Fork Cove Creek, Ball Branch, Gunna Creek, Collins Creek (Haywood, Swain)	**SR**		**S2**	**GNR**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Remenus duffieldi	**SR**		**S2**	**G2**
Georgia Springfly				
M: Yellowstone Prong of East Fork Pigeon River, Pigeon Branch of South Fork Mills River, Tellico Creek, Collins Creek, Kanatai Fork (Haywood, Macon, Swain, Transylvania*)				
Remenus kirchneri	**SR**		**S1**	**G2**
Blueridge Springfly				
M: Jones Creek in the Little Tennessee basin and Garden Creek in the Yadkin basin (Avery, Wilkes)				
Zapada chila	**SR**		**S1S2**	**G2**
Smokies Forestfly				
M: small streams in Little Tennessee and New drainages (Ashe*, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Caddisflies				
Brachycentrus etowahensis	**SR**		**SH**	**G3**
a caddisfly				
M: Hiwassee River (Cherokee*)				
Ceraclea cancellata	**SR**		**S2**	**G5**
a longhorned caddisfly				
PSC: Naked Creek, Roanoke River, Eliis Creek, Turnbull Creek (Bertie, Richmond*)				
Ceraclea joannae	**SR**		**S1**	**G1**
Lenat's Ceraclea				
P: Little River (Montgomery) (endemic to this area) (Montgomery)				
Ceraclea slossonae	**SR**		**S2**	**G4**
a caddisfly				
M: larger stream and rivers in New and Catawba drainages (Ashe, Burke*)				
Dibusa angata	**SR**		**S2**	**G5**
a caddisfly				
P: larger streams and rivers in Tar, Neuse, and Yadkin-Pee Dee drainages (Davie*, Durham, Rowan*, Wake*)				
Diplectrona metaqui	**SR**		**S3**	**G4G5**
a diplectronan caddisfly				
P: very small streams (Harnett, Stokes)				
Goerita flinti	**SR**		**S1**	**G2G3**
a caddisfly				
M: known only from Great Smoky Mountains National Park (Swain)				
Homoplectra monticola	**SR**		**S1**	**G2G3**
a caddisfly				
M: scattered sites in central and southern mountains (Buncombe, Jackson, Macon)				
Hydropsyche carolina	**SR**		**S1**	**G2G3**
a caddisfly				
M: rivers and streams in Savannah, French Broad, and New drainages (Jackson, Macon*, Swain*, Transylvania)				
Hydropsyche walkeri	**SR**		**S2**	**G5**
a caddisfly				
M: Beech Creek (Watauga)				
Manophylax altus	**SR**		**S1**	**G2G3**
Mount Mitchell Caddisfly				
M: moist vertical rockfaces (Buncombe, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Nectopsyche waccamawensis	**SR**		**S1**	**G1**
Waccamaw White Miller				
C: Lake Waccamaw (endemic to this area) (Columbus)				
Oecetis sp. D	**SR**		**S1**	**G1**
a caddisfly				
C: Lake Waccamaw and additional sites (endemic to North Carolina) (Brunswick, Columbus)				
Oropsyche howellae	**SR**		**S2**	**G2**
a caddisfly				
M: streams (Jackson*, Macon*)				
Palaeagapetus celsus	**SR**		**S2**	**G5**
a caddisfly				
M: small streams in headwaters of Watauga and Catawba drainages (Avery*, Watauga)				
Polycentropus colei	**SR**		**S1**	**G3G4**
a caddisfly				
M: high elevation streams in Great Smoky Mountains National Park (Haywood, Swain)				
Rhyacophila accola	**SR**		**S1S2**	**G1G2**
a caddisfly				
M: small streams and springs (endemic to North Carolina) (Haywood, Swain)				
Rhyacophila appalachia	**SR**		**S2**	**G3**
a rhyacophilan caddisfly				
M: mountain streams (Cherokee, Macon, Transylvania)				
Rhyacophila celadon	**SR**		**S2**	**G2G3**
Celadon Caddisfly				
M: seeps and streams (Avery, Haywood, Swain, Watauga)				
Rhyacophila sp. 1	**SR**		**S2**	**G2G3**
a caddisfly				
C: streams and swamps (Columbus, Moore, Pender, Robeson)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Insects: Dragonflies and Damselflies				
Aeshna tuberculifera	**SR**		**S1**	**G5**
Black-tipped Darner				
M: boggy or marshy ponds (Avery, Burke, Wilkes*)				
Aeshna verticalis	**SR**		**S1**	**G5**
Green-striped Darner				
M: marshy ponds (Burke, Henderson)				
Arigomphus pallidus	**SR**		**S1**	**G5**
Gray-green Clubtail				
C: ponds, lakes, and streams (Pender)				
Boyeria grafiana	**SR**		**S2?**	**G5**
Ocellated Darner				
M: rocky forest streams (Avery*, Burke, Macon, McDowell, Swain*, Watauga, Wilkes)				
Calopteryx amata	**SR**		**S1S2**	**G5**
Superb Jewelwing				
M: cold, shallow, rocky rivers (Buncombe*, Graham, Haywood, Henderson*, Jackson, Macon*, Mitchell*, Swain, Transylvania*, Yancey)				
Cordulia shurtleffii	**SR**		**S1**	**G5**
American Emerald				
M: ponds, lakes, bogs (Burke)				
Coryphaeschna ingens	**SR**		**S2?**	**G5**
Regal Darner				
C: lakes and ponds (Bladen, Carteret*, Columbus, Craven*, Durham, Gates, Granville, Jones, Martin*, Onslow, Pamlico*, Pender, Tyrrell, Wake*)				
Dromogomphus spoliatus	**SR**		**S1**	**G4G5**
Flag-tailed Spinyleg				
M: slow-moving rivers, or sometimes ponds, often in sunny places (Graham)				
Gomphurus fraternus	**SR**		**S1**	**G5**
Midland Clubtail				
P: rocky rivers (Anson, Stanly)				
Gomphurus lineatifrons	**SR**		**S2**	**G4**
Splendid Clubtail				
MP: rocky rivers (Alleghany, Ashe, Avery, Durham, Haywood, Orange, Watauga)				
Gomphurus septima	**SR**		**S3**	**G2**
Septima's Clubtail				
PC: rocky rivers (Alamance, Anson, Chatham, Cumberland, Durham, Halifax, Harnett, Lee, Montgomery, Moore, Nash, Northampton, Orange, Richmond, Stanly, Union, Wake)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Gomphurus ventricosus	**SR**		**S1S2**	**G3**
Skillet Clubtail				
P: rivers (Caswell, Franklin, Vance, Wake)				
Hylogomphus adelphus	**SR**		**S1S2**	**G5**
Mustached Clubtail				
M: small rivers with rapids (Ashe, Avery, Buncombe, Haywood, Madison, Watauga, Yancey*)				
Hylogomphus viridifrons	**SR**		**S1**	**G3G4**
Green-faced Clubtail				
M: rivers (Alleghany*, Ashe, Macon, Madison)				
Ladona julia	**SR**		**S1**	**G5**
Chalk-fronted Corporal				
M: bogs, marshes (Jackson)				
Lestes congener	**SR**		**S1**	**G5**
Spotted Spreadwing				
M: ponds and small lakes with emergent vegetation along the margins (Alleghany, Watauga)				
Macromia margarita	**SR**		**S2?**	**G3**
Mountain River Cruiser				
MP: rivers (Burke, Caldwell, Cleveland, Davie, Franklin, Granville*, Iredell, Macon, Rockingham, Transylvania*, Watauga)				
Neurocordulia yamaskanensis	**SR**		**S1?**	**G5**
Stygian Shadowdragon				
M: rivers (Alleghany*, Macon, Madison)				
Ophiogomphus aspersus	**SR**		**S1**	**G4**
Brook Snaketail				
M: rapids of rivers and streams (Alleghany, Ashe, Haywood*)				
Ophiogomphus edmundo	**SR**		**S1**	**G2**
Edmund's Snaketail				
P: rocky rivers and streams in the upper Piedmont and foothills (Burke, Caldwell, Rockingham, Stokes)				
Ophiogomphus howei	**SR**		**S1**	**G3**
Pygmy Snaketail				
M: rivers (Alleghany, Ashe, Burke)				
Ophiogomphus rupinsulensis	**SR**		**S1**	**G5**
Rusty Snaketail				
M: rivers (Alleghany)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Phanogomphus australis	**SR**		**S2**	**G4**
Clearlake Clubtail				
C: lakes and ponds (Bladen, Brunswick, New Hanover*, Richmond, Scotland)				
Phanogomphus borealis	**SR**		**SH**	**G5**
Beaverpond Clubtail				
M: lakes, ponds, streams (Mitchell*)				
Phanogomphus cavillaris	**SR**		**S1**	**G4**
Sandhill Clubtail				
SC: sand-bottomed lakes and streams (Bladen, Brunswick)				
Phanogomphus descriptus	**SR**		**S1**	**G4G5**
Harpoon Clubtail				
M: large streams and rivers (Avery*, Haywood*, Madison)				
Phanogomphus quadricolor	**SR**		**S1S2**	**G3G4**
Rapids Clubtail				
MP: rocky rivers (Buncombe, Chatham, Madison, Moore)				
Progomphus bellei	**SR**		**S1**	**G3**
Belle's Sanddragon				
C: sand-bottomed lakes (Bladen)				
Somatochlora elongata	**SR**		**S2S3**	**G5**
Ski-tipped Emerald				
M: bogs, marshes, and other open wetlands with slow-moving water (Ashe, Avery, Burke, Clay*, Jackson*, Macon, Watauga)				
Somatochlora georgiana	**SR**		**S2?**	**G3G4**
Coppery Emerald				
PSC: creeks and other slow-moving acidic streams, in forested areas (Anson*, Beaufort*, Bladen*, Brunswick*, Chatham, Columbus*, Cumberland*, Duplin*, Durham, Edgecombe, Franklin*, Greene*, Harnett*, Hoke, Johnston*, Lee*, Martin*, Moore, Nash, Northampton*, Orange*, Pender*, Pitt*, Richmond*, Robeson*, Rockingham*, Sampson*, Scotland*)				
Stenogomphurus consanguis	**SR**		**S1?**	**G3**
Cherokee Clubtail				
MP: small spring-fed streams (Burke*, Davie)				
Stylogomphus sigmastylus	**SR**		**SH**	**G5**
Interior Least Clubtail				
S: small, clear streams in wooded areas (Moore*)				
Stylurus ivae	**SR**		**S2S3**	**G4**
Shining Clubtail				
SC: sandy creeks or small rivers, where waters are clean (Bladen*, Columbus*, Cumberland*, Duplin, Jones, Moore*, Pender*, Robeson, Sampson*, Scotland)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Stylurus scudderi	**SR**		**S2?**	**G5**
Zebra Clubtail				
M: streams and rivers (Ashe, Avery*, Jackson*, Macon*, Swain*, Watauga, Wilkes)				
Stylurus townesi	**SR**		**SH**	**G3**
Townes' Clubtail				
C: sand-bottomed small streams and rivers (Columbus*, Robeson*)				
Sympetrum obtrusum	**SR**		**S1**	**G5**
White-faced Meadowhawk				
M: boggy or marshy ponds and lakes (Ashe, Avery, Watauga)				
Triacanthagyna trifida	**SR**		**S1?**	**G5**
Phantom Darner				
C: slow-flowing streams (Carteret*, Craven*, Pender, Robeson*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Butterflies

Amblyscirtes alternata **SR** **S2** **G2G3**

Dusky Roadside-Skipper

SC: open pine woods, savannas; host plants -- unknown, but presumably grasses (Brunswick, Craven, Cumberland, Hoke, Jones, Moore, New Hanover, Onslow, Pender, Richmond, Scotland)

Amblyscirtes reversa **SR** **S3** **G3G4**

Reversed Roadside-Skipper

MPSC: flatwoods, savannas, pocosin borders, near cane; host plant -- cane (*Arundinaria*) (Beaufort, Bertie, Brunswick, Carteret, Craven, Cumberland, Dare, Franklin, Gaston, Hoke, Macon, Martin, Moore, Onslow, Pender, Pitt, Polk, Richmond, Robeson*, Scotland, Swain, Washington)

Atrytone arogos arogos **SR** **SH** **G3T1T2**

Eastern Arogos Skipper

SC: savannas, open pinewoods, and other relatively undisturbed grasslands; host plants -- grasses, mainly pinebarrens sandreed (*Calamovilfa brevipilis*) (Brunswick*, Carteret, Moore*, New Hanover*, Richmond*)

Atrytonopsis loammi **SR** **SH** **G1**

Loammi Skipper

CT: grassy areas near the coast; host plants presumed to be *Andropogon* grasses (Brunswick*, New Hanover*)

Atrytonopsis quinteri **SR** **S1** **G1**

Crystal Skipper

T: dunes and sandy flats; host plant -- seaside little bluestem (*Schizachyrium littorale*) (endemic to North Carolina) (Carteret, Onslow)

Autochton cellus **SR** **S2** **G4**

Golden Banded-Skipper

MP: moist woods near streams; host plant -- wild bean (*Phaseolus polystachios*) (Alleghany, Buncombe, Burke, Caldwell, Caswell, Cherokee, Cleveland, Gaston, Graham, Haywood, Henderson, Macon, Madison, Mitchell, Orange*, Pitt*, Polk, Rutherford, Swain)

Calephelis virginiensis **SR** **S2** **G4**

Little Metalmark

C: savannas and pine flatwoods; host plants -- vanilla-plant (*Trilisa odoratissima*), thistles (*Cirsium*) (Brunswick, Carteret, Craven, Cumberland, Dare, Moore, New Hanover, Onslow, Pender)

Callophrys hesseli **SR** **S3** **G3G4**

Hessel's Hairstreak

SC: Atlantic white cedar swamps; host plant -- white cedar (*Chamaecyparis thyoides*) (Bladen, Brunswick, Camden, Columbus, Craven, Cumberland, Dare, Gates, Harnett*, Hoke*, Moore, Pender, Richmond, Sampson, Scotland, Tyrrell, Washington)

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Callophrys irus	**SR**		**S2**	**G3**
Frosted Elfin				
MPSC: open woods and borders, usually in dry situations; host plants -- lupines (*Lupinus*) and wild indigos (*Baptisia*) (Brunswick, Buncombe*, Cherokee*, Craven*, Cumberland, Franklin, Gates, Harnett, Hoke, Jones, Moore, Pender, Polk*, Richmond*, Scotland, Transylvania*)				
Celastrina nigra	**SR**		**S2**	**G4**
Dusky Azure				
M: rich, moist deciduous forests; host plant -- goat's-beard (*Aruncus dioicus*) (Buncombe, Clay, Graham, Haywood, Jackson, Macon, Mitchell, Polk, Swain*, Transylvania)				
Chlosyne gorgone	**SR**		**S1?**	**G5**
Gorgone Checkerspot				
M: woodland openings and borders; host plants -- sunflowers, rosinweeds, and other tall composites (Clay, Macon)				
Erora laeta	**SR**		**S2S3**	**GU**
Early Hairstreak				
M: deciduous forests, especially along edges of rich forests; host plants -- mainly American beech (*Fagus grandifolia*) (Alleghany, Ashe, Avery, Buncombe, Burke, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Watauga, Wilkes)				
Erynnis martialis	**SR**		**S2**	**G3**
Mottled Duskywing				
MPSC: upland woods and wooded edges; host plant -- New Jersey tea (*Ceanothus americanus*) (Alleghany, Ashe, Brunswick*, Buncombe, Caswell, Clay, Cleveland, Craven*, Cumberland, Durham, Franklin, Gaston*, Graham, Granville, Henderson, Jones*, Macon*, Madison, Montgomery, Moore, Orange*, Polk, Richmond*, Rutherford, Surry, Swain, Wake*, Warren, Wayne, Yadkin)				
Euchloe olympia	**SR**		**S1**	**G5**
Olympia Marble				
M: dry, open wooded slopes, mainly on circumneutral soils; host plants -- cresses (*Arabis*) (Alleghany, Madison, Swain, Wilkes)				
Euphydryas phaeton	**SR**		**S2**	**G5**
Baltimore Checkerspot				
M: bogs, marshes, wet meadows; rarely in upland woods; host plants -- turtlehead (*Chelone*) and false foxglove (*Aureolaria*) (Alleghany, Ashe, Avery, Buncombe, Graham, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Polk, Transylvania*, Watauga)				
Euphyes berryi	**SR**		**S1**	**G2**
Berry's Skipper				
C: wet areas near ponds, canals, or marshes; host plants -- sedges (*Carex*) (Carteret, Columbus, Craven, Dare, Hyde, Washington)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Euphyes bimacula	**SR**		**S2**	**G4**
Two-spotted Skipper				
MPSC: wet savannas, bogs, sedgy areas near wet woods; host plants -- sedges (*Carex*) (Alleghany, Ashe, Brunswick, Carteret, Craven, Gates, Harnett, Johnston, Jones*, Moore*, Northampton, Pender, Pitt, Vance)				
Euphyes dukesi	**SR**		**S1S2**	**G3**
Dukes' Skipper				
CT: ecotones of brackish or fresh marshes with swamps; host plants -- sedges (*Carex*) (Beaufort, Brunswick, Craven, Currituck, Dare, New Hanover)				
Hesperia attalus	**SR**		**S2S3**	**G3G4**
Dotted Skipper				
SC: pine/oak sandhills, flatwoods, mainly in Sandhills; host plants -- grasses (Brunswick*, Craven*, Cumberland, Hoke, Moore, Pender*, Richmond, Scotland)				
Hesperia meskei	**SR**		**S3**	**G3G4**
Meske's Skipper				
SC: open pine woods, especially in Sandhills; host plants -- grasses (Bladen, Brunswick, Cumberland, Hoke, Moore, Onslow*, Richmond, Sampson, Scotland)				
Hesperia metea	**SR**		**S2**	**G4**
Cobweb Skipper				
MPS: dry barren sites, such as powerline clearings and pine/oak sandhills; host plants -- mainly broomsedge (*Andropogon*)				
Megathymus cofaqui	**SR**		**S1**	**G3G4**
Cofaqui Giant-Skipper				
P: monadnocks with yucca; host plant -- *Yucca filamentosa* (Alexander, Polk*)				
Neonympha areolatus	**SR**		**S2**	**G3G4**
Georgia Satyr				
C: savannas, wet powerline clearings, other damp grassy places; host plants -- sedges (Brunswick, Carteret, Columbus, Craven, Durham*, Hoke*, Jones*, Moore*, New Hanover, Onslow, Pender)				
Neonympha helicta	**SR**		**S1?**	**G3G4**
Helicta Satyr				
PSC: sedgy wetlands, including sandhill seeps, pocosin ecotones, and drained beaver ponds in the Sandhills, low pocosins in the northeast Coastal Plain, and wet open swales in the Piedmont; host plants -- sedges (Alamance*, Anson*, Beaufort, Bertie*, Chatham, Cumberland, Dare, Durham*, Gaston*, Gates*, Granville*, Halifax*, Harnett, Hoke, Hyde, Martin*, Moore, Pitt, Richmond*, Scotland, Washington)				
Neonympha mitchellii francisci	**SR**	**E**	**S1**	**G2T1**
Saint Francis' Satyr				
S: boggy areas, overgrown beaver ponds, and pocosin margins with sedges in sandhills; host plants -- sedges (taxon endemic to North Carolina) (Cumberland, Hoke)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Papilio cresphontes	**SR**		**S2S3**	**G5**
Giant Swallowtail				
MPCT: primarily coastal in maritime forests or thickets; also in foothills and mountains near hoptree; host plants -- prickly-ash (*Zanthoxylum*), hoptree (*Ptelea*) (Alexander, Alleghany, Ashe, Brunswick, Buncombe, Caldwell, Carteret, Cherokee*, Currituck, Dare, Hyde, Madison, New Hanover, Onslow, Orange*, Pender, Wake, Yancey)				
Phyciodes batesii maconensis	**SR**		**S2**	**G5T3**
Appalachian Tawny Crescent				
M: woodland openings, glades, and road banks at higher elevations; host plants -- asters, mainly *Symphyotrichum undulatum* (Buncombe*, Clay, Graham, Haywood, Jackson, Macon, Swain)				
Poanes aaroni	**SR**		**S1S2**	**G4**
Aaron's Skipper				
T: brackish marshes along the northern coast and sounds; host plants -- grasses, perhaps saltgrass (*Distichlis spicata*) (Currituck, Dare, Hyde)				
Polites mystic	**SR**		**S1**	**G5**
Long Dash				
M: bogs, wet meadows; host plants -- grasses (Alleghany, Ashe, Watauga)				
Polygonia faunus	**SR**		**S1S2**	**G5**
Green Comma				
M: spruce, fir, or hemlock forests, where mixed with hardwoods; host plants -- mainly birches (*Betula*) (Avery*, Buncombe, Caldwell*, Graham, Haywood, Henderson, Macon, Swain, Transylvania*, Watauga, Yancey)				
Polygonia progne	**SR**		**S1**	**G5**
Gray Comma				
M: rich deciduous forests; host plants -- mainly gooseberries (*Ribes*) (Avery, Buncombe, Clay, Madison*, Mitchell*, Swain*, Watauga)				
Pontia protodice	**SR**		**S1S2**	**G5**
Checkered White				
MPSC: fields, pastures; host plants -- mustard species (Family *Brassicaceae*) (Buncombe, Burke, Cabarrus, Chatham, Durham, Forsyth, Gates, Granville, Harnett, Mecklenburg, Richmond, Wake, Wayne)				
Problema bulenta	**SR**		**S1**	**G2G3**
Rare Skipper				
T: fresh to brackish marshes with tall grasses in Wilmington area; host plant -- wild rice (*Zizania aquatica*), possibly other tall grasses (Brunswick, New Hanover)				
Pyrgus wyandot	**SR**		**S1**	**G1G2Q**
Appalachian Grizzled Skipper				
M: openings and edges near wooded hilltops; host plants -- mainly cinquefoil (*Potentilla*) (Alleghany, Ashe, Polk*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Satyrium caryaevorus	**SR**		**S1**	**G4**
Hickory Hairstreak				
M: mid elevation to high elevation deciduous forests; host plants -- primarily hickories (*Carya*) (Ashe, Buncombe, Macon, Madison, McDowell, Watauga)				
Satyrium edwardsii	**SR**		**S2**	**G5**
Edwards' Hairstreak				
MS: scrubby or xeric oak woods; host plants -- mainly oaks (*Quercus*) (Cumberland, Harnett, Hoke, Macon, Moore, Polk*, Sampson, Scotland, Transylvania*, Watauga*)				
Satyrium favonius favonius	**SR**		**S1**	**G4G5T4**
Southern Oak Hairstreak				
T: maritime forests along southern coast; host plant -- oaks, especially live oak (*Quercus virginiana*) (Brunswick, New Hanover)				
Satyrium favonius ontario	**SR**		**S2S3**	**G4G5T4**
Northern Oak Hairstreak				
MPSCT: oak-dominated woods, usually in dry sites; host plants -- oaks (*Quercus*) (Alleghany, Brunswick, Camden*, Carteret, Caswell, Cleveland, Cumberland*, Currituck, Dare, Durham, Hoke, Hyde*, Iredell, Mecklenburg, Montgomery, Moore, Orange, Pender*, Richmond, Wilkes)				
Speyeria idalia	**SR**		**SX**	**G3**
Regal Fritillary				
M: wet or dry meadows, bogs, open hilltops; host plants -- violets (*Viola*) (Alleghany*, Ashe*, Avery*, Wilkes*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Moths				
Acronicta albarufa **Barrens Dagger Moth** S: oak glades and barrens (Cumberland, Moore, Wake*)	**SR**		**S1S2**	**G3G4**
Acronicta dolli **Doll's Dagger** M: dry oak woodlands (Macon)	**SR**		**S1S2**	**G3G4**
Acronicta perblanda **Cypress Daggermoth** C: cypress swamps (Craven*)	**SR**		**SH**	**G3G4**
Acronicta sinescripta **a Dagger Moth** C: savannas and flatwoods (Brunswick, Pender)	**SR**		**S1S2**	**G3G4**
Agrotis carolina **a Dart Moth** SC: flatwoods with pyxie-moss (*Pyxidanthera*) (endemic to North Carolina) (Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Harnett, Onslow, Pender)	**SR**		**S2S3**	**G2G3Q**
Apamea inebriata **Drunk Apamea** S: sedge meadows (Cumberland, Harnett, Moore)	**SR**		**S1S2**	**G3G4**
Apameine new genus 2 sp. 1 **a Cane Borer** MC: woodland canebrakes (Brunswick, Swain)	**SR**		**S2S3**	**GNR**
Apameine new genus 2 sp. 3 **a Canebrake Moth** SC: woodland canebrakes (Cumberland, Hoke, Martin, Northampton, Washington)	**SR**		**S2S3**	**GNR**
Apameine new genus 2 sp. 4 **a Cane Borer** M: woodland canebrakes (Swain)	**SR**		**S1S2**	**GNR**
Aplectoides condita **A Noctuid Moth** M: high mountain habitats (>4,000'), in association with northern hardwood forests, spruce-fir forests, or rock outcrop communities	**SR**		**S2S3**	**G5**
Arctia caja **Great Tiger Moth** M: high elevation hardwood forests (Watauga, Yancey)	**SR**		**S1**	**G5**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Argyrostrotis quadrifilaris	**SR**		**S3**	**G4**
Four-lined Chocolate Moth				
SC: pocosins and flatwoods (Bladen, Brunswick, Carteret, Columbus, Cumberland, Harnett, Hoke, Moore, New Hanover, Onslow, Pender)				
Bleptina sangamonia	**SR**		**S1S2**	**GU**
a Litter Moth				
MPC: habitats not known (Bladen, Macon, Montgomery, Onslow, Randolph)				
Catocala consors	**SR**		**SH**	**G4**
Consort Underwing				
P: oak-hickory forests (Gaston*)				
Catocala dulciola	**SR**		**S2S3**	**G3**
Sweet Underwing				
M: forests with hawthorns (Alleghany*, Ashe)				
Catocala grisatra	**SR**		**S1S2**	**G1G3**
Grisatra Underwing				
C: sandhills and dry woods with hawthorns (Bladen)				
Catocala herodias	**SR**		**S1**	**G3**
Herodias Underwing				
P: oak forests, particularly with bear oak (*Quercus ilicifolia*) (Stokes)				
Catocala jair	**SR**		**S2**	**G4?**
Jair Underwing				
SC: xeric pine-oak sandhills (Bladen, Moore, New Hanover)				
Catocala lincolnana	**SR**		**S2S3**	**G3G4**
Lincoln Underwing				
C: wooded areas with hawthorns (Brunswick, Martin, Pender)				
Catocala louiseae	**SR**		**S1S2**	**G4**
Louise's Underwing				
C: flatwoods and other habitats with blueberries (Bladen)				
Catocala marmorata	**SR**		**S1S3**	**G3G4**
Marbled Underwing				
MPC: forests with cottonwoods or willows, especially with swamp cottonwood (Alleghany, Ashe, Brunswick, Martin, New Hanover, Wake)				
Catocala messalina	**SR**		**S2?**	**G4?**
Messalina Underwing				
CT: maritime forests and xeric sandhills (Dare*, New Hanover)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Catocala myristica	**SR**		**S1**	**G3G4**
Nutmeg Underwing				
C: Marl outcrop with Nutmeg Hickory (*Carya myristiciformis*) (Pender)				
Catocala orba	**SR**		**S2S3**	**G4**
Orba Underwing				
C: levee forests with hawthorn (Martin, Northampton)				
Cerma cora	**SR**		**S2S3**	**G3G4**
Owl-eyed Bird-dropping Moth				
MC: levee forests with hawthorn (Ashe, Martin, New Hanover)				
Chaetaglaea fergusoni	**SR**		**S1S2**	**G3G4**
Ferguson's Sallow				
SC: sandhills (Brunswick, Moore, New Hanover)				
Cherokeea attakullakulla	**SR**		**S2**	**G2?**
Cherokee Moth				
M: forests with stands of cane (*Arundinaria*) in the southwestern mountains (records not yet entered)				
Cyclophora sp. 1 (culicaria of authors)	**SR**		**S1**	**G3**
Sand-myrtle Geometer				
C: flatwoods with sand-myrtle (*Kalmia buxifolia*) (Brunswick, New Hanover)				
Cycnia inopinatus	**SR**		**S2S3**	**G4**
Unexpected Cycnia Moth				
SC: on milkweeds (*Asclepias*) (Harnett, Onslow, Pender, Stanly)				
Dargida aleada	**SR**		**S1S2**	**GNR**
an Armyworm Moth				
T: maritime grasslands (Carteret)				
Dargida rubripennis	**SR**		**S2S3**	**G3G4**
Pink Streak				
SC: beach grasslands and sandy fields (Carteret, Dare)				
Dasychira leucophaea	**SR**		**S2S3**	**G4**
a Tussock Moth				
SC: habitat not known (Moore, New Hanover)				
Datana ranaeceps	**SR**		**S2S3**	**G3G4**
Post-burn Datana Moth				
SC: recently burned flatwoods and sandhills (Bladen, Brunswick, Columbus, Cumberland, New Hanover, Onslow)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Datana robusta	**SR**		**S1S2**	**G2G4**
a Prominent Moth				
C: savannas, flatwoods, and sandhills (Onslow)				
Derrima stellata	**SR**		**SH**	**G4**
Pink Star Moth				
M: habitat not known (Avery*, Transylvania*)				
Digrammia ordinata	**SR**		**S2S3**	**GNR**
Amorpha Angle				
SC: sandhills, mainly near the coast (Cumberland, Harnett, Mecklenburg, Pender)				
Drasteria graphica	**SR**		**S1S2**	**G4**
Graphic Moth				
T: maritime shrub thickets (Brunswick, New Hanover)				
Dysstroma hersiliata	**SR**		**S2S3**	**G5**
Orange-barred Carpet Moth				
M: high elevation (>3,000 ft) mesic forests, host plant *Ribes spp*. (Ashe, Yancey)				
Eilema bicolor	**SR**		**S1S2**	**G5**
Bicolored Moth				
M: spruce-fir forests (Swain)				
Elaphria cyanympha	**SR**		**S2S3**	**G4**
a Midget Moth				
C: sandhills (Onslow, Pender)				
Entephria separata	**SR**		**SH**	**G4**
a Geometrid Moth				
M: high elevation forests or heath balds (Yancey)				
Erastria coloraria	**SR**		**S2S3**	**G3G4**
Broad-lined Erastria Moth				
PS: open woodlands with New Jersey tea (*Ceanothus americanus*) (Cumberland, Moore, Richmond, Wake)				
Eubaphe meridiana	**SR**		**S2S3**	**G4**
Little Beggar Moth				
SC: savannas (Brunswick, Pender)				
Euchlaena milnei	**SR**		**S1S3**	**G2G4**
Milne's Euchlaena				
M: hardwood forests, perhaps in riparian areas (Swain, Watauga)				
Eucoptocnemis dapsilis	**SR**		**S2S3**	**G4**
a Dart Moth				
SC: habitat not known (Bladen, New Hanover)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Eulithis propulsata	**SR**		**S2S3**	**G5**
Currant Eulithis Moth				
M: high elevation forests (Ashe)				
Euxoa campestris	**SR**		**S1S2**	**G5**
Flat Dart Moth				
M: high elevation forests of spruce-fir and northern hardwoods				
Euxoa declarata	**SR**		**S2?**	**G5**
Clear Dart Moth				
M: habitat not known (Ashe, Avery, Haywood, Watauga)				
Euxoa violaris	**SR**		**S1S2**	**G4**
Violet Dart				
T: beach dunes				
Exyra fax	**SR**		**S2S3**	**G4**
Epauletted Pitcher-plant Moth				
PC: wetlands with purple pitcher-plants (Brunswick, Carteret, Cumberland, Dare, Hoke, Montgomery, Moore, Pender, Richmond)				
Exyra ridingsii	**SR**		**S2**	**G2G4**
a Pitcher-plant Moth				
PC: wetlands with yellow pitcher-plants (Craven, Moore, Pender)				
Exyra semicrocea	**SR**		**S2S3**	**G3G4**
a Pitcher-plant Moth				
C: wetlands with pitcher-plants (Bladen, Brunswick, Moore, Onslow, Pender)				
Franclemontia interrogans	**SR**		**S3?**	**G3G4**
Franclemont's Cane Moth				
C: canebrakes (Camden, Carteret)				
Gabara sp. 1	**SR**		**S1S2**	**G1G3**
a Noctuid Moth				
C: savannas and flatwoods (Brunswick, Onslow, Pender)				
Gazoryctra sciophanes	**SR**		**S1?**	**GU**
a Ghost Moth				
M: spruce-fir forests (Jackson)				
Grammia doris	**SR**		**S1S3**	**G4?**
Doris Tiger Moth				
MP: rich forests? (Wake)				
Grammia placentia	**SR**		**S2S3**	**G3G4**
Placentia Tiger Moth				
PS: sandhills and dry forests (Cumberland, Harnett, Hoke, Moore, Warren)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Hadena ectypa	**SR**		**S1S2**	**G3G4**
Campion Coronet				
M: forests or forest edges with *Silene* (Haywood, Swain)				
Hemaris gracilis	**SR**		**S1S2**	**G3G4**
Slender Clearwing				
C: sandhills, barrens, and other dry heathlands; no locality data (Onslow)				
Hemeroplanis sp. 1 nr. obliqualis	**SR**		**S2S3**	**GNR**
an Owlet Moth				
PS: dry woodlands with dwarf locusts (Cumberland, Hoke, Moore, Stokes)				
Hemipachnobia monochromatea	**SR**		**S1?**	**G4**
Sundew Cutworm Moth				
C: cranberry bogs and northern low pocosins (Dare)				
Hemipachnobia subporphyrea	**SR**		**S1?**	**G1**
Venus Flytrap Cutworm Moth				
C: savannas with Venus flytraps (endemic to North Carolina) (Bladen*, Brunswick, Carteret, Columbus, Pender)				
Heterocampa varia	**SR**		**S1S2**	**G3G4**
a Prominent Moth				
PS: xeric pine-oak sandhills and other dry, scrub oak habitats (Cumberland, Hoke, Moore, Richmond)				
Hydriomena exculpata	**SR**		**SH**	**G5**
a Geometrid Moth				
M: spruce-fir forests (Yancey*)				
Hypagyrtis brendae	**SR**		**S2S3**	**G4**
Brenda's Hypagyrtis Moth				
SC: Atlantic white cedar forests (Brunswick, Dare, Pender, Scotland)				
Hypomecis buchholzaria	**SR**		**S1S2**	**G3G4**
Buchholz's Gray				
SC: fire-maintained glades and barrens (Carteret, Moore)				
Idaea ostentaria	**SR**		**S2S3**	**GNR**
Showy Wave				
SC: sandhills (Carteret, New Hanover, Northampton)				
Idia majoralis	**SR**		**S1S3**	**GNR**
Greater Idia Moth				
P: associated with woodrat nests (Ashe, Cherokee)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Iridopsis cypressaria	**SR**		**S2S3**	**GU**
Small Cypress Looper				
C: cypress swamps (Beaufort, Brunswick, Camden, Dare, Martin, New Hanover, Onslow, Pender)				
Korscheltellus gracilis	**SR**		**S1S2**	**GNR**
Conifer Swift Moth				
M: spruce-fir forests; no locality data				
Lacanobia grandis	**SR**		**S1S2**	**G5**
Grand Arches Moth				
M: documented from high elevation forests and a mountain bog (Ashe, Watauga)				
Lagoa pyxidifera	**SR**		**S2S3**	**G4G5**
Yellow Flannel Moth				
SC: savannas, flatwoods, and sandhills (Brunswick, Cumberland, Harnett, Moore, Pender)				
Lemmeria digitalis	**SR**		**S1S3**	**G4**
Fingered Lemmeria Moth				
S: sedge meadows (Cumberland)				
Leptostales laevitaria	**SR**		**S2S3**	**G4**
Raspberry Wave				
C: habitat not known (Brunswick, Onslow, Pender)				
Leucania calidior	**SR**		**S1S2**	**G2G4**
Cane Wainscot				
C: canebrakes (Halifax, Harnett, Northampton)				
Lithophane georgii	**SR**		**S1S2**	**G5**
Large Grey Pinion				
M: spruce-fir forests (Ashe, Yancey)				
Lithophane oriunda	**SR**		**S1?**	**G4**
Immigrant Pinion				
M: no habitat data (Ashe)				
Loscopia roblei	**SR**		**S2S3**	**G3G4**
Roble's Cane Borer				
SC: woodland canebrakes (Martin)				
Lytrosis permagnaria	**SR**		**S2S3**	**G3G4**
A Geometrid Moth				
M: apparently in mixed forests (Chatham, McDowell, Orange)				
Macrochilo sp. 1 nr. absorptalis	**SR**		**S1**	**G3**
a Noctuid Moth				
S: sedge meadows (Cumberland, Hoke)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Melanapamea mixta	**SR**		**S2S3**	**GU**
a Borer Moth				
MPSC: savannas, wet meadows (Ashe, Transylvania)				
Meropleon cinnamicolor	**SR**		**S1?**	**GU**
a Borer Moth				
T: coastal marshes (Carteret)				
Meropleon diversicolor sullivani	**SR**		**S1S2**	**G5T1T3**
an Owlet Moth				
T: coastal marshes (Brunswick, Craven)				
Metalectra albilinea	**SR**		**S2S3**	**GNR**
White-lined Fungus Moth				
C: no habitat information (New Hanover)				
Nematocampa baggettaria	**SR**		**S1S2**	**G2G4**
Baggett's Nematocampa				
CS: unknown habitat (Brunswick, Onslow, Pender)				
Nemoria tuscarora	**SR**		**S1S3**	**GU**
Tuscarora Emerald				
M: unknown habitat (Alleghany)				
Orgyia antiqua	**SR**		**S1S2**	**G5**
Rusty Tussock Moth				
M: unknown habitat (Haywood)				
Pachypolia atricornis	**SR**		**S2S3**	**G3G4**
Three-horned Sallow				
M: northern hardwoods and rich cove forests? (Ashe)				
Papaipema appassionata	**SR**		**S2S3**	**G4**
Pitcher-plant Borer Moth				
SC: wetlands with pitcher-plants (Brunswick, Pender)				
Papaipema astuta	**SR**		**S1S2**	**G2G4**
Yellow Stoneroot Borer Moth				
M: rich cove forests? (Swain)				
Papaipema cerina	**SR**		**S1S2**	**G2G4**
Golden Borer Moth				
M: northern hardwood forests (Ashe)				
Papaipema eryngii	**SR**	**C**	**SH**	**G1G2**
Rattlesnake-master Borer Moth				
C: savannas with *Eryngium yuccifolium* (known from the entire Atlantic Slope only from a single site) (Pender*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Petrophora subaequaria	**SR**		**SH**	**G5**
Northern Petrophora Moth				
M: unknown habitat (Haywood*)				
Photedes carterae	**SR**		**S2S3**	**G2G3**
Carter's Noctuid Moth				
SC: savannas and sandhills with pinebarrens sandreed (*Calamovilfa brevipilis*) (Bladen, Brunswick, Carteret*, Onslow, Pender)				
Platarctia parthenos	**SR**		**S1S2**	**G5**
St. Lawrence Tiger Moth				
M: northern hardwood forests? (Swain)				
Polychrysia morigera	**SR**		**S2S3**	**G4**
A Looper Moth				
M: documented from Rich Cove Forest, possibly wooded riparian zones, larval host *Delphinium* species (Ashe)				
Protapamea louisae	**SR**		**S1**	**GNR**
Louisa's Cane Borer				
M: canebrakes (Macon*, Madison)				
Pygarctia abdominalis	**SR**		**S2S3**	**G3**
Yellow-edged Pygarctia				
SC: xeric sandhills (Brunswick, Moore, Onslow, Pender)				
Pyreferra ceromatica	**SR**		**S1S2**	**GU**
Annointed Sallow Moth				
C: flatwoods and pocosins, probably with *Fothergilla* (Craven, Jones)				
Pyrrhia aurantiago	**SR**		**S1S3**	**G3G4**
Orange Sallow Moth				
MSC: dry woods with false-foxgloves (*Aureolaria*) (New Hanover)				
Schinia bina	**SR**		**SH**	**G4**
Bina Flower Moth				
SC: sandhills (Brunswick*, Moore*)				
Schinia carolinensis	**SR**		**S2S3**	**G3**
Carolina Schinia Moth				
SC: savannas and sandhill seeps (Pender)				
Schinia jaguarina	**SR**		**S1S3**	**G4**
Jaguar Flower Moth				
SC: savannas and sandhills (Pender)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Schinia septentrionalis	**SR**		**SH**	**G3G4**
Northern Flower Moth				
SC: sandhills (Brunswick*, New Hanover*)				
Schizura apicalis	**SR**		**S1S2**	**G3G4**
Plain Schizura				
MSC: dry woodland and scrub habitats (Ashe, New Hanover)				
Schizura sp. 1	**SR**		**S1S2**	**GU**
a new Prominent Moth				
PC: unknown (Brunswick, Onslow, Wake)				
Speranza subcessaria	**SR**		**S2S3**	**G5**
Barred Angle				
M: high elevation forests with gooseberries (*Ribes*) (Ashe)				
Sphingicampa bisecta	**SR**		**S1?**	**G5**
Bisected Honey Locust Moth				
P: habitats with honey locust (*Gleditsia*) (Chatham)				
Stenoporpia polygrammaria	**SR**		**S1S2**	**GU**
Faded Gray Geometer				
P: Hanging Rock State Park (Stokes)				
Syngrapha alias	**SR**		**S2?**	**G5**
Hooked Silver Y Moth				
M: spruce-fir forests (Avery, Swain)				
Tolype minta	**SR**		**S2S3**	**G4**
Southern Tolype Moth				
SC: longleaf pine stands (Bladen, Columbus)				
Xestia perquiritata	**SR**		**S1**	**G5**
Boomerang Dart				
M: spruce-fir forests (Swain)				
Zale declarans	**SR**		**S2S3**	**G5**
Dixie Zale				
T: maritime forests with live oak (Brunswick, Carteret, Dare, New Hanover, Onslow)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Grasshoppers and Katydids				
Arphia granulata	**SR**		**S2S3**	**G5**
Southern Yellow-winged Grasshopper				
C: flatwoods, sandhills (Bladen, Onslow, Pender)				
Booneacris variegata	**SR**		**S2?**	**G5**
Variegated Wingless Locust				
M: a variety of high elevation habitats (Avery, Transylvania)				
Dendrotettix zimmermanni	**SR**		**S1?**	**GU**
Carolina Oak Grasshopper				
M: oak woodlands (endemic to the southern end of the Appalachian Mountains) (Transylvania)				
Eotettix pusillus	**SR**		**S2?**	**G2G3**
Little Eastern Grasshopper				
SC: sandhill seeps and wet pine savannas (Moore*, Onslow, Pender)				
Melanoplus attenuatus	**SR**		**SH**	**G2G3**
Slender-bodied Short-wing Grasshopper				
C: wet swales in pinewoods (Brunswick*)				
Melanoplus carnegiei	**SR**		**SH**	**GU**
Carnegie Short-wing Grasshopper				
M: open pine and oak forests (Buncombe*)				
Melanoplus cherokee	**SR**		**S2?**	**G1G3**
Cherokee Melanoplus				
M: woodlands, 1800' - 5100' (Buncombe, Haywood, Madison, Swain)				
Melanoplus coreyi	**SR**		**S1**	**GNR**
a Spur-throat Grasshopper				
S: flatwoods, savannas, sandhill seeps (endemic to North Carolina) (Cumberland, Moore, Richmond, Scotland)				
Melanoplus deceptus	**SR**		**S2S3**	**G2G4**
Deceptive Melanoplus				
M: mountain slopes and tops, 4000'-5700' (Haywood, Jackson, Macon, Madison)				
Melanoplus decoratus	**SR**		**S1S2**	**GU**
Decorated Melanoplus				
M: dry woodlands (records not yet entered)				
Melanoplus decorus	**SR**		**S2S3**	**G2G3**
Decorated Spur-throat Grasshopper				
C: savannas, flatwoods, low pocosins (endemic to North Carolina) (Carteret, Dare, Onslow, Pender)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Melanoplus divergens	**SR**		**SH**	**G2G3**
Lobecercus Short-wing Grasshopper				
M: glades and balds, mainly at high elevations (Haywood*, Henderson*, Jackson*, Macon*, Swain*)				
Melanoplus eurycercus	**SR**		**S1**	**G4**
a Spur-throat Grasshopper				
M: no habitat information (Avery, Mitchell)				
Melanoplus mirus	**SR**		**S1?**	**GH**
Weldon Short-wing Grasshopper				
PC: open woodlands (endemic to North Carolina) (Bladen, Halifax*, Surry*)				
Melanoplus nossi	**SR**		**S1S2**	**GNR**
Noss' Short-winged Grasshopper				
C: wet to mesic hardwood forests with rich soils (Martin, Northampton, Pender)				
Melanoplus nubilus	**SR**		**S2**	**G2G3**
Nubile Short-wing Grasshopper				
SC: flatwoods, savannas, sandhill seeps (endemic to North Carolina) (Brunswick, Cumberland, Harnett, Robeson)				
Melanoplus pachycercus	**SR**		**S1S2**	**G2G3**
a Spur-throat Grasshopper				
M: grassy balds and woodland openings and margins (Avery, Macon, Mitchell, Yancey)				
Melanoplus serrulatus	**SR**		**SH**	**G1G3**
Nantahala Short-wing Grasshopper				
M: valleys and lower slopes in the Nantahala Mountains (endemic to North Carolina) (records not yet entered)				
Melanoplus similis	**SR**		**SH**	**G5**
a Spur-throat Grasshopper				
M: open woodlands (Cherokee*, Haywood*)				
Mermiria bivittata	**SR**		**S2S3**	**G5**
Two-striped Mermiria				
CT: dune grasslands and other grassy areas in or near coastal forests (Brunswick, Carteret, Dare, New Hanover)				
Scudderia septentrionalis	**W3**		**S2S3**	**G3?**
Northern Bush Katydid				
M: forests (Alleghany, Ashe)				
Stethophyma celatum	**SR**		**S1S2**	**G4**
Broad-winged Sedge Grasshopper				
SC: wet savannas, seepage bogs (Brunswick, Onslow, Pender)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Trimerotropis saxatilis	**SR**		**S2?**	**G3**
Lichen Grasshopper				
MP: lichen-covered rock outcrops, mainly granitic domes (Alexander, Transylvania, Wilkes)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Beetles

Cicindela ancocisconensis **SR** **S1S2** **G3**

Appalachian Tiger Beetle

M: mainly sand bars or other sandy areas near rocky streams or small rivers (Haywood, Jackson)

Cicindela nigrior **SR** **S1** **G2G3**

Autumn Tiger Beetle

P: hard-packed sandy uplands (Anson, Moore*, Scotland)

Cicindela patruela **SR** **S2?** **G3**

Northern Barrens Tiger Beetle

MP: sandy soil in open pine or pine-oak woods (Avery, Haywood, Macon, Mitchell, Transylvania, Wake, Watauga, Yancey)

Ellipsoptera lepida **SR** **S1?** **G3G4**

Ghost Tiger Beetle

T: sand dunes along northern coast (Dare)

Nicrophorus americanus **SR** **E** **SH** **G2G3**

American Burying Beetle

M: sites with abundance of small vertebrate carrion (Buncombe*, Yancey*)

Stenelmis gammoni **SR** **S2** **G1G3**

Gammon's Stenelmis Riffle Beetle

MP: South Fork New River, upper Yadkin River basin (Alleghany, Ashe, Iredell, Surry, Yancey)

Stenelmis hollandi **SR** **S1** **G1**

a riffle beetle

P: Little River (Cumberland, Harnett)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: True Bugs				
Chlorochroa dismalia **Dismal Swamp Green Stink Bug** C: canebrakes (Craven, Harnett*, Hyde*, Onslow*)	**SR**		**S1?**	**G1G3**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Bees

Bombus affinis	**SR**	**E**	**S1**	**G2**
Rusty-patched Bumble Bee				
MP: nests in abandoned mammal burrows, gathers nectar and pollen from a variety of flowering plants found in or near woodlands (Avery*, Buncombe*, Catawba*, Clay*, Durham*, Graham*, Haywood*, Henderson*, Jackson*, Macon*, McDowell*, Mecklenburg*, Mitchell*, Moore*, Rowan*, Swain, Transylvania*, Wake, Watauga*, Wayne*, Wilkes, Wilson*, Yancey*)

NORTH CAROLINA ANIMAL LIST – WATCH

INTRODUCTION

The North Carolina Animal Watch List includes species that are rare or uncommon, are not well studied, or are otherwise threatened with serious decline but for which current information does not justify placement on the Rare List by the NCNHP. Watch List species can be indicators of significant habitats, and their presence should be considered in planning natural area protection efforts, though obviously with less weight than higher priority rare species and natural communities. The NCNHP maintains digital files on these species but does not include them in its GIS maps or database. Animals placed on this list fall into a number of categories, discussed below. The NCNHP requests additional information about these species in order to clarify their status and reclassify them into other appropriate and more specific categories. Counties of known occurrence are listed for most groups. A few groups, such as birds, are migratory, and thus counties of occurrence will be misleading.

Reasons for the current placement of species on the Watch List rather than at a high rarity status (Endangered, Threatened, Special Concern, or Significantly Rare) vary. The taxonomic validity of some of these species is currently in doubt. For many of them, the NCNHP lacks adequate documentation of their historic or present extent in North Carolina; this is especially true for invertebrates. Others are known to be rare or uncommon in North Carolina but may not be native to the state, and they may or may not be declining. Some others may not necessarily be rare yet, but they are undergoing significant losses of or disturbances to their habitats. For most species, however, their actual rarity is poorly known and we are **requesting more data for every Watch List category** before such species receive a higher, and more formal, rarity status. A field survey form is provided online at www.ncnhp.org. We request that people fill out this survey form and mail it to NCNHP after visiting occurrences of these species.

The Watch List has been divided into categories, which have been devised to indicate the reasons for each species' current placement. These categories and their descriptions have been developed by the NCNHP. A number of species have been placed in two Watch categories because it is believed they may be at risk for at least two reasons.

CATEGORY	DESIGNATION	DESCRIPTION
W1	Population Decline in NC	Species that are known to be **declining in North Carolina**. The distribution or population sizes of such species in the state are fairly well known; loss of habitat is not necessarily a factor.
W2	Rare but Relatively Secure	Species whose status in N.C. is relatively well known and appear to be relatively secure at this time. While still notably rare, these species do not currently require site-specific monitoring and so are not on the Rare List. Many of these species were formerly on the Rare List; they are retained in this category because they require a lower level of monitoring to ensure their long-term security.
W3	Poorly Known in NC	Species with inadequate information about their distribution and rarity in N.C. These are generally species which appear to be rare based on museum records and field experience of NCNHP staff, consultants, and cooperating scientists. Further information is needed to determine the true status of these species in N.C.

CATEGORY	DESIGNATION	DESCRIPTION
W4	Rare but Questionable Documentation	Species that have been reported from N.C. without adequate documentation. These species should be listed at a higher level when their reported occurrence in N.C. is verified. This category includes sight records, old and vague reports for which no documentation has appeared, and, in a few cases, more recent literature reports for which we have not yet received documentation.
W5	Threat to Habitat	Species with increasing amounts of threats to its habitat, whether or not populations are known to be declining. These threats can include loss of habitat (e.g., the dramatic loss of maritime forests), degradation of habitat (e.g., pollution and sedimentation of rivers and streams), and disturbance to the habitat (e.g., humans and vehicles on beaches), among other types of threats. Threats can also include use of pesticides, acid rain, fire suppression, over-collection by zoologists, and other factors.
W6	Rare but Believed Not Native	Species known to occur in N.C. that current data suggest are not native to N.C. but whose native occurrence is plausible. Some of these species were previously listed at a higher level, but field investigations suggest that all known N.C. occurrences are introductions.

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Mammals

Lasiurus cinereus **W2** **S3S4** **G3G4**

Hoary Bat

MP: mostly mid elevation to high elevation forests, sparingly into the Piedmont (breeding season only) (Avery, Buncombe, Burke, Cherokee, Clay, Gates, Graham, Haywood, Hoke, Jackson, Macon, McDowell, Mitchell, Polk, Rutherford, Stanly, Swain, Transylvania, Watauga, Wilkes, Yancey)

Lasiurus seminolus **W2** **S3** **G5**

Seminole Bat

MPSC: forages over open areas, often over water (summer); mainly in southern half of the state (Beaufort, Bladen, Brunswick, Buncombe, Carteret, Cherokee, Columbus, Craven, Gates, Halifax, Hertford, Hoke, Johnston, Jones, Lenoir, Mecklenburg, Montgomery, Moore, New Hanover, Pender, Robeson, Tyrrell, Wake)

Mustela frenata **W3** **S3** **G5**

Long-tailed Weasel

MPSC: forests, brushy areas (Alleghany, Ashe, Avery, Bertie, Bladen, Brunswick, Buncombe, Cabarrus, Catawba, Chatham, Cherokee, Clay, Craven, Currituck, Dare, Duplin, Durham, Forsyth, Gates, Guilford, Haywood, Henderson, Johnston, Jones, Lenoir, Macon, Madison, Martin, Mecklenburg, Mitchell, Montgomery, Moore, Nash, Orange, Pasquotank, Perquimans, Richmond, Robeson, Stanly, Swain, Transylvania, Union, Wake, Washington, Wilkes, Yancey)

Neotoma floridana haematoreia **W2** **S3S4** **G5T4Q**

Southern Appalachian Eastern Woodrat

MP: rocky places in deciduous or mixed forests, in southern mountains and adjacent Piedmont (Buncombe, Burke, Catawba, Cherokee, Graham, Haywood, Henderson, Iredell, Jackson, Macon, Madison, McDowell, Polk, Rutherford, Swain, Transylvania)

Puma concolor couguar **W4,E** **E** **SX** **G5TXQ**

Eastern Cougar

MPC: extensive forests, remote areas (Graham*, Haywood*, Swain*)

Sciurus niger **W2** **S3** **G5**

Eastern Fox Squirrel

MPSC: open forests, mainly longleaf pine/scrub oak (Alleghany, Anson, Ashe, Avery*, Beaufort, Bertie, Bladen, Brunswick, Buncombe*, Catawba, Chatham, Cherokee*, Clay*, Columbus, Craven, Cumberland, Davidson, Davie, Duplin, Edgecombe, Forsyth, Graham*, Halifax, Harnett, Hoke, Johnston, Lee, Macon*, Martin, Mecklenburg, Montgomery, Moore, New Hanover, Onslow, Pender, Pitt, Richmond, Robeson, Sampson, Scotland, Stokes, Surry, Swain*, Tyrrell, Union, Wake, Washington, Watauga, Wayne, Wilkes, Wilson)

Sorex hoyi **W2** **S3** **G5**

American Pygmy Shrew

MC: montane deciduous forests; old fields and forests in northeastern Coastal Plain (Buncombe, Burke, Camden, Cherokee, Clay, Gates, Graham, Haywood, Henderson, Jackson, Macon, Polk, Rutherford, Swain, Transylvania, Wilkes, Yancey)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Sorex sp. 1	**W3**		**S1S2**	**G2Q**
a shrew (Albemarle-Pamlico Peninsula)				
C: early succession fields, possibly low pocosins (endemic to eastern North Carolina) (Dare, Hyde)				
Sylvilagus aquaticus	**W4**		**SNA**	**G5**
Swamp Rabbit				
MP: swamps, floodplain forests close to the Georgia and South Carolina state lines; specimen unidentifiable to species due to poor condition (Clay*)				
Synaptomys cooperi stonei	**W2**		**S3**	**G5TNR**
Stone's Southern Bog Lemming				
M: bogs and wet meadows (Avery, Buncombe, Graham, Haywood, Macon, Madison, Mitchell, Swain, Watauga, Yancey)				
Zapus hudsonius	**W2**		**S3**	**G5**
Meadow Jumping Mouse				
MP: open moist fields and brushy places, usually near water (Alleghany, Buncombe, Clay, Durham, Forsyth, Haywood, Macon, Mecklenburg, Mitchell, Swain, Wake, Watauga)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Birds				
Ammodramus caudacutus	**W3**		**SUB,S4N**	**G4**
Saltmarsh Sparrow				
T: tidal marshes [breeding season only]				
Ammodramus savannarum	**W1,W5**		**S3B,S1N**	**G5**
Grasshopper Sparrow				
MPSC: pastures and other grasslands [breeding season only] (Alamance, Alexander, Alleghany, Anson, Ashe, Beaufort, Brunswick, Buncombe, Cabarrus, Carteret, Caswell, Catawba, Chatham, Cherokee, Cleveland, Cumberland, Davidson, Davie, Durham, Edgecombe, Forsyth, Franklin, Gaston, Granville, Guilford, Halifax, Harnett, Haywood, Henderson, Hoke, Iredell, Johnston, Lee, Lincoln, Macon, Madison, Martin, Mecklenburg, Montgomery, Moore, Nash, New Hanover, Northampton, Onslow, Orange, Person, Pitt, Randolph, Richmond, Robeson, Rockingham, Rowan, Rutherford, Sampson, Scotland, Stanly, Union, Vance, Wake, Warren, Washington, Watauga, Wayne, Wilson, Yadkin)				
Anas discors	**W3**		**SHB,S2N**	**G5**
Blue-winged Teal				
CT: fresh to slightly brackish marshes, usually at impoundments [breeding evidence only] (Dare*)				
Anhinga anhinga	**W2**		**S3B**	**G5**
Anhinga				
C: wooded lakes or ponds, or open swamps (for nesting) [breeding evidence only] (Bertie, Bladen, Brunswick, Carteret, Chatham, Columbus, Craven, Cumberland, Dare, Duplin, Halifax, Hoke, Jones, New Hanover, Robeson, Sampson)				
Antrostomus carolinensis	**W1**		**S4B**	**G5**
Chuck-will's-widow				
PSC: drier forest edges and open woods				
Antrostomus vociferus	**W1**		**S3B**	**G5**
Eastern Whip-poor-will				
MPSC: upland (dry to mesic) woodlands and forests for nesting, usually not far from fields or openings				
Asio flammeus	**W3**		**SUB,S3N**	**G5**
Short-eared Owl				
CT: coastal marshes [breeding season only]				
Chaetura pelagica	**W1**		**S4B**	**G4G5**
Chimney Swift				
MPSC: nest in chimneys or other anthropogenic structures, foraging over all types of habitats, including cities, farm fields, and over forests. After nesting, large groups of swifts may roost communally in tall chimneys				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Chordeiles minor	**W1**		**S2S3B**	**G5**
Common Nighthawk				
MPSCT: dunes, sandy open areas, sandhills, gravel rooftops for nest sites [breeding evidence only] (most counties in the Coastal Plain, and scattered counties in the Piedmont and low mountains)				
Contopus cooperi	**W3**		**SNA**	**G4**
Olive-sided Flycatcher				
M: montane conifer forests (mainly spruce-fir) with openings or dead trees [breeding evidence only]				
Corvus corax	**W2**		**S3**	**G5**
Common Raven				
MP: cliffs or ledges for nesting; forests or fields (mainly at high elevations) for foraging [breeding evidence only] (Ashe, Avery, Forsyth, Guilford, Haywood, Henderson, Jackson, Macon, Mecklenburg, Mitchell, Rutherford, Stokes*, Surry, Watauga, Yancey)				
Empidonax minimus	**W2**		**S3B**	**G5**
Least Flycatcher				
M: open hardwood forests, groves, streamside trees [breeding season only] (Alleghany, Ashe, Avery, Buncombe, Graham, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Empidonax traillii	**W2**		**S3B**	**G5**
Willow Flycatcher				
MP: wet thickets in open country, often along streams in broad valleys [breeding season only] (Alleghany, Ashe, Avery, Buncombe, Burke, Cabarrus, Caldwell, Cherokee, Clay, Forsyth, Graham, Guilford, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Rockingham, Stokes, Surry, Swain, Transylvania, Wake*, Watauga, Wilkes, Yadkin, Yancey)				
Eudocimus albus	**W2**		**S3B,S3N**	**G5**
White Ibis				
CT: forests or thickets on maritime islands, rarely at ponds [breeding evidence only] (Brunswick, Carteret, Columbus, Currituck, Hyde, New Hanover, Onslow, Pender)				
Euphagus carolinus	**W1**		**S3N**	**G4**
Rusty Blackbird				
PSC: swamps and other moist hardwood forests, usually near fields [wintering habitat only] (most counties in the Coastal Plain, and many in the Piedmont)				
Gallinula galeata	**W2**		**S3B,S2N**	**G5**
Common Gallinule				
CT: freshwater ponds and impoundments with much emergent vegetation [breeding evidence only] (Brunswick, Carteret, Craven, Currituck, Dare, Hyde, New Hanover, Onslow, Pamlico, Pender, Robeson, Wayne)				
Geothlypis philadelphia	**W3**		**SUB, SZN**	**G5**
Mourning Warbler				
M: high elevation shrub thickets, especially of blackberries [breeding season only]				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C	Rank Global
Helmitheros vermivorum pop. 1	**W5**		**S3B**	**G5TNR**
Worm-eating Warbler - Coastal Plain Population				
C: nonriverine wet hardwoods, pocosins [breeding evidence only] (Beaufort, Bladen, Brunswick, Camden, Carteret, Columbus, Craven, Currituck, Dare, Gates, Hyde, Jones, New Hanover, Onslow, Pamlico, Pasquotank, Pender, Pitt, Robeson, Tyrrell, Washington)				
Lanius ludovicianus	**SC, W2**		**S2S3B,S3N**	**G4**
Loggerhead Shrike				
PSC: fields and pastures [breeding season only] (Alamance, Alleghany*, Anson, Bladen, Brunswick, Cabarrus, Carteret*, Chatham, Cleveland, Columbus, Cumberland, Davidson, Davie, Duplin, Edgecombe, Forsyth, Franklin, Guilford, Halifax, Harnett, Hoke, Iredell, Johnston, Jones, Lee, Lenoir, Mecklenburg, Montgomery, Moore, Nash, New Hanover, Pitt, Richmond, Robeson, Rockingham*, Rutherford, Sampson, Scotland, Stanly, Transylvania*, Union, Vance*, Wake, Wayne, Wilson)				
Lophodytes cucullatus	**W3**		**S1B,S4N**	**G5**
Hooded Merganser				
MPC: lakes and ponds, with dead trees for nesting [breeding evidence only] (Bladen, Burke, Camden, Chatham, Durham, Edgecombe, Gaston, Granville, Guilford, Halifax, Hertford, Johnston, Jones, Martin, Mecklenburg, Montgomery, Orange, Perquimans, Richmond, Rockingham, Rowan, Sampson, Stanly, Union, Wake)				
Mergus merganser	**W3**		**S1B,S1N**	**G5**
Common Merganser				
M: forested rivers and reservoirs [breeding season only] (Jackson, possibly Swain and Yancey)				
Nycticorax nycticorax	**W1**		**S3B,S3N**	**G5**
Black-crowned Night-Heron				
T: maritime thickets or forests, almost always on small islands [nesting sites only] (Brunswick, Carteret, Columbus, Currituck, Dare, Hyde, New Hanover, Onslow, Pamlico, Pender)				
Onychoprion fuscatus	**W2**		**SHB,S3N**	**G5**
Sooty Tern				
T: sand flats on maritime islands [breeding sites only] (Dare*)				
Podilymbus podiceps	**W2**		**S3B,S5N**	**G5**
Pied-billed Grebe				
CT: fresh to slightly brackish ponds and impoundments, usually with fringing vegetation [breeding evidence only] (Beaufort, Brunswick, Carteret, Craven, Cumberland, Dare, Hyde, New Hanover, Onslow, Pamlico, Pender, Washington, Wayne)				
Rallus elegans	**W1,W3**		**S3B,S3N**	**G4**
King Rail				
PCT: fresh to slightly brackish marshes [breeding evidence only] (Brunswick, Carteret, Chatham, Cumberland, Currituck, Dare, Hyde, New Hanover, Onslow, Pamlico, Pender, Tyrrell, Wake, Washington, Wayne)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Rallus limicola	**W3**		**S3B,S5N**	**G5**
Virginia Rail				
T: brackish to nearly fresh marshes near coast [breeding season only] (Carteret, Currituck, Dare, Hyde, Pamlico)				
Regulus satrapa	**W2,W5**		**S3S4B,S5N**	**G5**
Golden-crowned Kinglet				
M: spruce-fir forests; hardwood forests mixed with spruce or hemlock [breeding season only] (Ashe, Avery, Buncombe, Burke, Caldwell, Graham, Haywood, Henderson, Jackson, Macon, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Sitta canadensis	**W2,W5**		**S3B,S4N**	**G5**
Red-breasted Nuthatch				
M: high-elevation coniferous forests, preferably spruce-fir [breeding season only] (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Graham, Haywood, Henderson, Jackson, Macon, McDowell, Mitchell, Swain, Transylvania, Watauga, Wilkes, Yancey)				
Spinus pinus	**W3**		**SUB,S3N**	**G5**
Pine Siskin				
M: spruce-fir forests [breeding evidence only] (Avery, Buncombe, Caldwell, Haywood, Jackson, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Sterna forsteri	**W2**		**S3B,S5N**	**G5**
Forster's Tern				
T: salt or brackish marshes, nesting on wrack material or matted grasses [breeding sites only] (Carteret, Dare, Hyde, Pamlico)				
Troglodytes hiemalis	**W2,W5**		**S3B,S5N**	**G5**
Winter Wren				
M: cool, moist forests at mid elevations to high elevations [breeding evidence only] (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Tyrannus forficatus	**W3**		**SUB**	**G5**
Scissor-tailed Flycatcher				
PS: extensive pastures and fields with scattered trees [breeding evidence only] (Gaston*, Moore*, Orange*, Union*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Reptiles

Apalone spinifera aspera **W2** **S3** **G5T5**

Gulf Coast Spiny Softshell

PC: large streams, ponds, and lakes with sandy bottoms (Alamance, Anson, Catawba, Cleveland, Gaston, Iredell, Mecklenburg, Montgomery, Randolph, Richmond, Rutherford, Scotland, Union)

Cemophora coccinea **W1,W5** **S3** **G5**

Scarlet Snake

MPSC: sandhills, sandy woods, and other dry woods (Beaufort, Bladen, Brunswick, Burke, Cabarrus, Carteret, Clay, Cumberland, Dare, Duplin, Durham, Forsyth, Guilford, Harnett, Hoke, Iredell, Johnston, Mecklenburg, Montgomery, Nash, New Hanover, Onslow, Orange, Pamlico, Pender, Pitt, Polk, Randolph, Richmond, Robeson, Rockingham, Rowan, Rutherford, Sampson, Scotland, Stanly, Wake, Wayne, Wilson)

Clemmys guttata **W1** **S4** **G5**

Spotted Turtle

PSCT: shallow water of pools, marshes, wet pastures and other smaller wetlands (Anson, Beaufort, Bladen, Brunswick, Camden, Carteret, Chatham, Chowan, Columbus, Craven, Cumberland, Currituck, Dare, Duplin, Durham, Franklin, Gates, Halifax, Harnett, Hertford, Hyde, Johnston, Jones, Lee, Lenoir, Montgomery, Moore, Nash, New Hanover, Northampton, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Richmond, Robeson, Sampson, Scotland, Tyrrell, Wake, Warren, Washington, Wayne, Wilson)

Kinosternon baurii **W3** **S3S4** **G5**

Striped Mud Turtle

C: various shallow wet places; ponds, pools, ditches (Bladen, Brunswick, Chowan, Columbus, Craven, Dare, Duplin, Franklin, Gates, Hertford, Lenoir, New Hanover, Onslow, Pasquotank, Pender, Perquimans, Sampson, Wake)

Lampropeltis elapsoides **W1,W5** **S3** **G5**

Scarlet Kingsnake

MPSC: pine flatwoods, mesic pine-hardwood forests (Alamance, Beaufort, Bertie, Bladen, Brunswick, Carteret, Chowan, Columbus, Craven, Currituck, Dare, Harnett, Hoke, Hyde, Jones, Lenoir, Macon, Mecklenburg, Montgomery, New Hanover, Onslow, Orange, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Polk, Randolph, Richmond, Rutherford, Sampson, Scotland, Stanly, Stokes, Tyrrell, Wake)

Lampropeltis triangulum **W2** **S3** **G5**

Milk Snake

MP: wooded slopes, pastures, meadows, especially in rocky areas (Alexander, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Rutherford, Surry, Swain, Transylvania, Watauga, Wilkes, Yancey)

Rhadinaea flavilata **W2** **S3** **G4**

Pine Woods Snake

C: pine flatwoods and other damp woodlands (Beaufort, Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Dare, Jones, New Hanover, Onslow, Pamlico, Pender, Sampson, Scotland)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Virginia valeriae	**W2**		**S3**	**G5**
Smooth Earthsnake				
MPSC: deciduous or mixed woods, usually in mesic soils (Bladen, Brunswick, Buncombe, Carteret, Chatham, Cherokee, Craven, Duplin, Durham, Franklin, Gaston, Gates, Granville, Guilford, Hoke, Iredell, Jackson, Macon, McDowell, Mecklenburg, Montgomery, Nash, New Hanover, Onslow, Orange, Pender, Pitt, Randolph, Sampson, Stanly, Swain, Union, Vance, Wake)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Amphibians

Desmognathus aeneus **W2** **S3** **G3G4**

Seepage Salamander

M: seeps, springs, or streams in forests in extreme southwestern counties (Cherokee, Clay, Graham, Macon)

Desmognathus imitator **W2** **S3** **G3G4**

Imitator Salamander

M: cool, moist high elevation hardwood or spruce-fir forests; confined to Great Smoky Mountains National Park (Haywood, Swain)

Desmognathus imitator pop. 1 **W3** **S1?** **G3G4TNR**

Imitator Salamander - Waterrock Knob population

M: cool, moist high elevation hardwood or spruce-fir forests; confined to Waterrock Knob vicinity (Haywood, Jackson)

Desmognathus santeetlah **W2** **S3S4** **G3G4Q**

Santeetlah Dusky Salamander

M: stream headwaters and seepage areas; southwestern mountains (Graham, Haywood, Jackson, Swain)

Eurycea bislineata **W4** **SNA** **G5**

Northern Two-lined Salamander

P: edges of creeks in forested areas; reported from Vance County, but no documentation available

Eurycea sp. 9 **W3** **S3** **G3?Q**

Sandhills Salamander

C: small streams in the Sandhills (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)

Plethodon glutinosus **W4** **SU** **G5**

Northern Slimy Salamander

M: moist wooded slopes, ravines, and floodplains; presumed to occur in the northwestern mountains

Plethodon jordani **W3** **S3** **G4**

Red-cheeked Salamander

M: rich forests in the southwestern mountains, essentially restricted to Great Smoky Mountains National Park (Haywood, Swain)

Plethodon richmondi **W2** **S3** **G5**

Southern Ravine Salamander

M: moist, high-elevation forests, usually on slopes; northern mountains (Alleghany, Ashe, Avery, Caldwell, Watauga)

Plethodon shermani **W2** **S3S4** **G3**

Red-legged Salamander

M: moist forests in the southwestern counties (Cherokee, Clay, Graham, Macon)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Pseudacris brimleyi	**W5**		**S4**	**G5**
Brimley's Chorus Frog				
C: swamps, marshes, and other wetlands (Beaufort, Bertie, Carteret, Craven, Cumberland, Currituck, Dare, Duplin, Edgecombe, Gates, Harnett, Hyde, Johnston, Martin, Pender, Pitt, Sampson, Scotland, Washington)				
Rana kauffeldi	**W3**		**S3**	**G3G4**
Atlantic Coast Leopard Frog				
C: freshwater wetlands, such as marshes and pond edges, in the northeastern portion of the province; recently described and range is poorly known (Bertie, Camden, Gates, Hertford, Martin)				
Siren lacertina	**W3**		**S3**	**G5**
Greater Siren				
SC: lakes, ponds, and streams, especially where muddy or with weedy vegetation (Bertie, Brunswick, Chowan, Columbus, Craven, Dare, Hyde, Johnston, New Hanover, Pitt, Richmond, Robeson, Scotland, Tyrrell, Wake, Wilson)				
Stereochilus marginatus	**W5**		**S3S4**	**G5**
Many-lined Salamander				
SC: swamps, shallow wooded ponds in savannas (Beaufort, Bladen, Brunswick, Columbus, Craven, Duplin, Harnett, Hertford, Johnston, New Hanover, Onslow, Pamlico, Pender, Robeson, Tyrrell, Wayne) (Beaufort, Bladen, Brunswick, Columbus, Craven, Duplin, Harnett, Hertford, Johnston, New Hanover, Onslow, Pamlico, Pender, Robeson, Tyrrell, Wayne)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Freshwater Fishes

Cyprinella labrosa **W5** **S3** **G4**

Thicklip Chub

P: Yadkin, Catawba, and Broad drainages (Anson, Burke, Caldwell, Catawba, Cleveland, Davidson, Iredell, Lincoln, McDowell, Polk, Richmond, Rowan, Rutherford, Stokes, Surry, Wilkes, Yadkin)

Cyprinella spiloptera **W5** **S2** **G5**

Spotfin Shiner

M: primarily New and French Broad drainages (Alleghany, Ashe, Buncombe, Cherokee, Haywood, Macon, Madison)

Cyprinella zanema **W5** **S3** **G4**

Santee Chub

P: Catawba and Broad drainages (Burke, Caldwell, Catawba, Cleveland, Gaston, Iredell, Lincoln, McDowell, Mecklenburg, Polk, Rutherford)

Elassoma evergladei **W3** **S3** **G5**

Everglades Pygmy Sunfish

C: southern Coastal Plain, mainly Waccamaw drainage (Bladen, Brunswick, Columbus, Cumberland, New Hanover, Robeson, Scotland)

Etheostoma flabellare **W5** **S3** **G5**

Fantail Darter

MP: Cape Fear, Neuse, and Tar drainage populations have limited distribution; Pee Dee, Roanoke, New, and French Broad populations stable (Alamance, Caswell, Chatham, Durham, Granville, Guilford, Harnett, Nash, Orange, Person, Rockingham, Vance, Wake, Warren)

Etheostoma gutselli **W2** **S3** **G3G4**

Tuckasegee Darter

M: Little Tennessee and Pigeon drainages (Graham, Haywood, Jackson, Macon, Swain)

Etheostoma rufilineatum **W5** **S3** **G5**

Redline Darter

M: French Broad, Little Tennessee, and Hiwassee drainages (Buncombe, Cherokee, Clay, Graham, Haywood, Henderson, Macon, Madison, Swain, Transylvania, Watauga)

Etheostoma vitreum **W5** **S3** **G4G5**

Glassy Darter

PC: Chowan, Roanoke, Tar, and Neuse drainages (Bertie, Durham, Edgecombe, Franklin, Granville, Greene, Halifax, Hertford, Johnston, Lenoir, Martin, Nash, Northampton, Pitt, Rockingham, Stokes, Vance, Wake, Warren, Washington, Wayne, Wilson)

Fundulus chrysotus **SR** **S3** **G5**

Golden Topminnow

C: Waccamaw drainage (Brunswick, Columbus)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Fundulus confluentus	**W2**		**S3**	**G5**
Marsh Killifish				
T: fresh to brackish waters along coast (Carteret, Dare, Hyde, Onslow)				
Fundulus luciae	**W2**		**S3**	**G4**
Spotfin Killifish				
CT: ponds and pools along coast (Brunswick, Carteret, New Hanover, Onslow)				
Hypentelium roanokense	**W2**		**S3**	**G4**
Roanoke Hog Sucker				
P: Dan drainage (Caswell, Forsyth, Rockingham, Stokes, Surry)				
Lepomis marginatus	**W2**		**S3**	**G5**
Dollar Sunfish				
PC: streams and rivers of lower Piedmont and Coastal Plain (Bladen, Brunswick, Columbus, Craven, Duplin, Durham, Gaston, Greene, Hoke, Jones, Lenoir, Mecklenburg, Moore, Pitt, Richmond, Robeson, Sampson, Scotland)				
Lepomis punctatus	**W2**		**S3**	**G5**
Spotted Sunfish				
C: most drainages in southern Coastal Plain (Anson, Bladen, Brunswick, Columbus, Craven, Duplin, Hoke, Moore, New Hanover, Pender, Richmond, Robeson, Sampson, Scotland)				
Lythrurus matutinus	**W2**		**S3**	**G3G4**
Pinewoods Shiner				
PC: Tar and Neuse drainages (endemic to North Carolina) (Alamance, Durham, Edgecombe, Forsyth, Franklin, Granville, Greene, Halifax, Johnston, Nash, Orange, Person, Pitt, Vance, Wake, Warren, Wayne, Wilson)				
Moxostoma carinatum	**W2**		**S2**	**G4**
River Redhorse				
M: French Broad, Little Tennessee, and Hiwassee drainages (Cherokee, Graham, Macon, Madison, Swain)				
Nocomis platyrhynchus	**W2**		**S2**	**G4Q**
Bigmouth Chub				
M: New drainage (Alleghany, Ashe, Watauga)				
Notropis maculatus	**W2**		**S2**	**G5**
Taillight Shiner				
C: southern Coastal Plain drainages (Brunswick, Columbus, Duplin, Pender, Robeson, Sampson)				
Notropis photogenis	**W5**		**S3**	**G5**
Silver Shiner				
M: mountain drainages (except Pigeon) (Alleghany, Ashe, Avery, Buncombe, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Watauga, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Notropis rubricroceus	**W5**		**S3**	**G4G5**
Saffron Shiner				
M: most mountain drainages, but mainly French Broad and Toe (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Haywood, Henderson, Jackson, Madison, McDowell, Mitchell, Polk, Rutherford, Transylvania, Watauga, Yancey)				
Notropis scabriceps	**W2**		**S2**	**G4**
New River Shiner				
M: New drainage (Alleghany, Ashe, Watauga)				
Percina aurantiaca	**W2**		**S3**	**G4**
Tangerine Darter				
M: Tennessee drainages (Buncombe, Cherokee, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell, Swain, Watauga, Yancey)				
Phenacobius crassilabrum	**W2**		**S3**	**G3G4**
Fatlips Minnow				
M: Little Tennessee, French Broad, and Toe drainages (Avery, Buncombe, Henderson, Jackson, Macon, Madison, Mitchell, Swain, Transylvania, Yancey)				
Pimephales notatus	**W3**		**S3**	**G5**
Bluntnose Minnow				
M: clear rocky streams as well as lakes, ponds, and rivers (Alleghany, Ashe, Avery, Cherokee, Watauga, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Mollusks: Freshwater Bivalves

Elliptio cistellaeformis **W3,W5** **SU** **G4**

Box Spike

PC: Neuse, Lumber, Pee Dee drainages; Lake Waccamaw (Bertie, Bladen, Chatham, Duplin, Edgecombe, Franklin, Gates, Granville, Greene, Halifax, Hertford, Johnston, Martin, Nash, Pender, Person, Pitt, Robeson, Sampson, Wake, Warren, Wayne, Wilson)

Elliptio congaraea **W2,W5** **S3** **G3**

Carolina Slabshell

PSC: drainages north to the White Oak drainage (Anson, Bladen, Brunswick, Chatham, Columbus, Cumberland, Davidson, Duplin, Edgecombe, Franklin, Granville, Guilford, Halifax, Harnett, Hertford, Johnston, Lee, Lenoir, Montgomery, Moore, Nash, Onslow, Orange, Pender, Randolph, Richmond, Robeson, Sampson, Stanly, Union, Wake, Warren)

Elliptio producta **W3,W5** **SU** **G3Q**

Atlantic Spike

PSC: many Atlantic drainages; very difficult to identify (Anson, Bladen, Brunswick, Burke, Cabarrus, Caldwell, Chatham, Columbus, Duplin, Gaston, Gates, Granville, Halifax, Johnston, Jones, Lee, Mecklenburg, Montgomery, Moore, Nash, Orange, Richmond, Robeson, Stanly, Wake)

Elliptio raveneli **W3,W5** **SU** **G3G4Q**

Carolina Spike

PC: most rivers in southern part of state; taxonomic problems

Elliptio sp. 2 **W3** **SU** **GUQ**

File Spike

C: lakes and rivers in the southeastern part of state (endemic to North Carolina)

Lampsilis sp. 3 **W3** **S1?** **GU**

a bivalve (Deep River system)

P: Deep River drainage (endemic to North Carolina) (Anson, Montgomery)

Sphaerium simile **W3** **SU** **G5**

Grooved Fingernailclam

C: White Oak River (Franklin, Jones, Onslow, Vance)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Mollusks: Freshwater and Terrestrial Gastropods

Anguispira alternata **W2** **S2S3** **G5**

Flamed Tigersnail

M: moist forested areas (Ashe, Caldwell, Cherokee, Haywood, Jackson, Madison, Watauga, Wilkes, Yancey)

Anguispira mordax **W3** **S3S4** **G4**

Appalachian Tigersnail

M: hardwood forests, especially around limestone outcrops (Avery, Buncombe, Burke, Graham, Henderson, Macon, McDowell, Rutherford, Swain, Yancey)

Carychium exiguum **W3** **S3?** **G5**

Obese Thorn

MC: mesic forests (Brunswick*, Duplin*, Franklin*, Gates*, Johnston*, Swain)

Euglandina rosea **W3** **S3?** **G5**

Rosy Wolfsnail

C: habitats poorly known (Gates, Harnett, New Hanover, Pamlico)

Gastrocopta armifera **W3** **S2S3** **G5**

Armed Snaggletooth

MP: calciphilic; sunny habitats including cedar glades and along railroads (Burke, Catawba, Gaston)

Gastrocopta procera **W3** **S3** **G5**

Wing Snaggletooth

C: calciphilic; dry ground with sparse vegetation

Glyphyalinia umbilicata **W2** **S2S3** **G5**

Texas Glyph

C: no habitat information; occurs in the southeastern part of the state

Glyphyalinia wheatleyi **W2** **S3** **G5**

Bright Glyph

M: a variety of hardwood forests (Avery, Cherokee, Graham, Haywood, Jackson, Macon, Madison, Swain, Yancey)

Gyraulus deflectus **W3** **S2?** **G5**

Flexed Gyro

C: eastern Coastal Plain; no habitat or locality information

Leptoxis virgata **W3** **SU** **G2**

Smooth Mudalia

M: Valley River (Cherokee)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Mesomphix andrewsae	**W2**		**S3S4**	**G3G4**
Mountain Button				
M: acidic upland hardwood forests (Buncombe, Burke, Caldwell, Catawba, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, Rutherford, Swain, Transylvania, Yancey)				
Neohelix dentifera	**W3**		**S3S4**	**G5**
Big-tooth Whitelip				
M: wooded mountainsides, often where acidic (Ashe, Avery, Caldwell, Watauga, Yancey)				
Novisuccinea sp. 1 nr. chittenangoensis	**W4**		**SU**	**GNR**
an Ambersnail				
M: northern hardwoods?; uncertain taxonomy and identification (Graham*)				
Oxyloma effusum	**W3**		**SU**	**G3**
Coastal-plain Ambersnail				
C: wetlands with *Sagittaria*; very little locality information (Gates*, New Hanover*)				
Paravitrea bellona	**W4**		**SNA**	**G1**
Club Supercoil				
M: wooded river bluffs and ravines; of questionable occurrence in the state				
Promenetus exacuous	**W3**		**S2S3**	**G5**
Sharp Sprite				
C: ponds and streams (Craven, Gates, Martin, Perquimans, Washington)				
Stenotrema altispira	**W2**		**S3S4**	**G3**
Highland Slitmouth				
M: cove forests and northern hardwood forests (Alleghany, Ashe, Avery, Buncombe, Caldwell, Haywood, Jackson, Macon, Madison, McDowell, Swain, Transylvania, Watauga, Wilkes, Yancey)				
Stenotrema pilula	**W3**		**S3?**	**G3G4**
Pygmy Slitmouth				
M: rich hardwood forests, mostly at lower elevations (Graham, Haywood, Henderson, Macon, Madison, McDowell, Polk, Swain)				
Striatura ferrea	**W2**		**S3?**	**G5**
Black Striate				
M: ravines and hillsides in higher elevation hardwood forests (Ashe, Graham, Haywood, Macon, McDowell, Mitchell, Swain, Watauga)				
Triodopsis burchi	**W3**		**SU**	**G3**
Pittsylvania Threetooth				
P: forested habitats in the central and western Piedmont; no locality information				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Triodopsis vulgata	**W2**		**S3?**	**G5**
Dished Threetooth				
MP: hardwood forests, usually around high pH soil or rocks (Alexander, Ashe, Avery, Clay, Graham, Haywood, Macon, Madison, Polk, Swain, Watauga, Wilkes)				
Vertigo gouldii	**W3**		**S2S3**	**G5**
Variable Vertigo				
M: upland woods, especially near rock outcrops (Ashe, Haywood, Swain)				
Vertigo oscariana	**W3**		**S3?**	**G4**
Capital Vertigo				
MC: mixed woods in the Coastal Plain; ravines and talus slopes in the mountains (Columbus, Hyde, Jones, Pender, Swain, Tyrrell)				
Vertigo rugosula	**W3**		**S2S3**	**G4**
Striate Vertigo				
C: primarily in thatch of grasses and sedges in open areas (Columbus, New Hanover, Pender)				
Vertigo teskeyae	**W3**		**S3**	**G5**
Swamp Vertigo				
C: margins of swamps and ponds (Beaufort, Chowan, Columbus, Craven, Gates)				
Xolotrema caroliniense	**W3**		**S3?**	**G4**
Blunt Wedge				
PC: wooded floodplains and slopes, mainly near the Fall Line (Anson, Bertie, Bladen, Halifax, Harnett, Mecklenburg, Northampton, Stanly, Union)				
Xolotrema denotatum	**W3**		**SU**	**G5**
Velvet Wedge				
M: wooded hillsides, sometimes in floodplains (Cherokee*, Graham*, Madison*, Mitchell*, Swain, Watauga*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Arachnids

Fumontana deprehendor **W3** **S3?** **G1G2**

a Harvestman

M: rich cove forests (Buncombe, Cherokee, Graham, Haywood, Jackson, Macon, Swain, Transylvania, Yancey)

Nesticus bishopi **W3** **S3?** **G3?**

a Cave Cobweb Spider

M: on ground in forests (endemic to North Carolina); no locality information

Nesticus nasicus **W3** **S3?** **G3?**

a Cave Cobweb Spider

M: boulderfields and cove forests (endemic to North Carolina) (Jackson)

Nesticus reclusus **W3** **S3?** **G3?**

a Cave Cobweb Spider

M: on ground in forests (apparently in Buncombe, McDowell, and Swain counties, NC, and in Tennessee)

Vaejovis carolinianus **W2,W3** **S2?** **G5**

Southern Unstriped Scorpion

MP: under shelter of rocks, leaves, and buildings, along southern border of state; the many records elsewhere in the state are likely accidental or intentional importations (Cherokee, Polk, Transylvania)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Crustaceans

Ascetocythere cosmeta **W3** **S2?** **GNR**

Grayson Crayfish Ostracod

M: symbiotic on crayfish in subsurface waters of burrows (Alleghany, Avery)

Cambarus aldermanorum **W3** **S1?** **GNR**

Carolina Needlenose Crayfish

P: Johns River subbasin of the Catawba drainage (Burke, Caldwell)

Cambarus carolinus **W3** **S2** **G4**

Red Burrowing Crayfish

M: Little Tennessee and Hiwassee drainages (Cherokee, Clay, Graham, Jackson, Macon, Swain)

Cambarus hiwasseensis **W2** **S3S4** **G3G4**

Hiwassee Crayfish

M: streams in Hiwassee drainage (Cherokee, Clay)

Cambarus sp. A **W3** **S2S4** **G2G3**

a crayfish

MP: streams and rivers, species in Hiwassee and New drainages likely distinct from Catawba, Broad, Yadkin-Pee Dee drainages (Alexander, Alleghany, Ashe, Burke, Caldwell, Catawba, Cherokee, Clay, Cleveland, McDowell, Montgomery, Rowan, Rutherford, Surry, Watauga, Wilkes)

Canthocamptus vagus **W2,W3** **S3?** **GNR**

Swamp Canthocamptus

PC: in benthos of lakes and ponds within swampy environments; no locality information

Cymocythere clavata **W3** **S2?** **GNR**

Oconee Crayfish Ostracod

M: symbiotic on crayfish in mountain streams and rivers (Transylvania)

Cytheridella ilosvayi **W3** **S2?** **GNR**

Backwater Ostracod

C: quiet backwaters associated with large coastal rivers (Brunswick, New Hanover)

Dactylocythere chelomata **W2,W3** **S2?** **GNR**

Cherokee Crayfish Ostracod

M: symbiotic on crayfish in streams and rivers in southwestern mountains (Cherokee, Macon)

Dactylocythere isabelae **W3** **S1?** **GNR**

Catawba Crayfish Ostracod

P: symbiotic on crayfish in Lyle Creek in Catawba drainage (endemic to North Carolina) (Catawba)

Dactylocythere peedeensis **W3** **S2?** **GNR**

Pee Dee Crayfish Ostracod

P: symbiotic on crayfish in Pee Dee drainage (endemic to North Carolina, but likely occurs in South Carolina) (Cabarrus, Randolph, Union)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Dactylocythere prinsi	**W3**		**S1**	**GNR**
Whitewater Crayfish Ostracod				
M: cold streams of Savannah drainage (endemic to North Carolina, but possible in adjacent South Carolina and Georgia) (Jackson)				
Dactylocythere susanae	**W2,W3**		**S2?**	**G2G4**
Hiwassee Crayfish Ostracod				
M: symbiotic on crayfish in Hiwassee and Nolichucky drainages; no locality information				
Harpagocythere baileyi	**W3**		**S2?**	**GNR**
Highlands Crayfish Ostracod				
M: symbiotic on crayfish in Little Tennessee and Savannah drainages (endemic to North Carolina, but likely occurs in SC and GA); no locality information				
Hesperodiaptomus augustaensis	**W3**		**SH**	**GNR**
Augusta Hesperodiaptomus				
P: ephemeral ponds, such as floodplain pools; near Chapel Hill (Orange*)				
Lordocythere petersi	**W4**		**SNA**	**GNR**
Cumberland Crayfish Ostracod				
M: symbiotic on crayfish in the Hiwassee drainage (record based on a sketch only)				
Miktoniscus medcofi	**W3**		**S1?**	**GNR**
Small Alabama Sowbug				
M: Linville Caverns (McDowell)				
Procambarus ancylus	**W2**		**S3**	**G4G5**
Coastal Plain Crayfish				
SC: ditches, streams, and lakes in the southeastern portion of the state (Bladen, Brunswick, Columbus, Cumberland, Duplin, Harnett, Hoke, Johnston, Montgomery, Moore, New Hanover, Onslow, Pender, Richmond, Robeson, Sampson, Scotland, Wayne)				
Procambarus blandingii	**W3**		**S3S4**	**G4**
Santee Crayfish				
C: Lumber and Waccamaw drainages (Bladen, Brunswick, Columbus, Cumberland, Hoke, Montgomery, Moore, Richmond, Robeson, Scotland)				
Procambarus medialis	**W3**		**S3**	**G3**
Pamlico Crayfish				
PC: sluggish streams and ditches in the Tar and Neuse drainages (endemic to North Carolina) (Craven, Edgecombe, Halifax, Johnston, Lenoir)				
Procambarus pearsei	**W2**		**S3S4**	**G4**
Carolina Sandhills Crayfish				
SC: still-water habitats and burrows in the Cape Fear, Waccamaw, and Lumber drainages (Bladen, Brunswick, Columbus, Cumberland, Duplin, Harnett, Hoke, Johnston, Montgomery, Moore, New Hanover, Onslow, Pender, Richmond, Robeson, Sampson, Scotland, Wayne)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Stygobromus sp. 4	**W3**		**S1?**	**GNR**
Plott Balsam Sideswimmer				
M: seep below Jones Knob (endemic to North Carolina) (Jackson)				
Waltoncythere acuta	**W3**		**S2?**	**GNR**
Transylvania Crayfish Ostracod				
M: symbiotic on crayfish in high gradient rivers and streams (endemic to North Carolina, but likely occurs in SC) (Transylvania)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Mayflies				
Anthopotamus myops	**W3**		**S3**	**G5**
a mayfly				
M: First Broad River (Cleveland)				
Drunella longicornis	**W3**		**S3**	**G5**
a spiny crawler mayfly				
M: Watauga, French Broad, Little Tennessee, Savannah, Broad, and Catawba drainages				
Ephemerella argo	**W3**		**S3**	**G4**
Argo Ephemerellan Mayfly				
SC: Lower Little River (Hoke), Naked Creek (Richmond), Drowning Creek (Richmond), Lumber River (Robeson, Scotland)				
Eurylophella enoensis	**W5**		**S3**	**G4**
Eno River Spiny Crawler Mayfly				
MPC: wide-ranging but infrequently collected				
Eurylophella minimella	**W2**		**S3**	**G4**
Reduced Spiny Crawler Mayfly				
MPC: a widespread species, but rare in North Carolina				
Isonychia arida	**W3**		**S3**	**G5**
a mayfly				
C: Cape Fear River (Harnett), Tar River (Edgecombe)				
Isonychia sayi	**W3**		**S2**	**G4**
a mayfly				
C: Fishing Creek (Edgecombe)				
Iswaeon davidi	**W3**		**S2**	**G2**
a mayfly				
M: French Broad, Hiwassee, and Little Tennessee basins				
Leptophlebia bradleyi	**W5**		**S2**	**G5**
a mayfly				
no locality data				
Nixe spinosa	**W3**		**S3**	**G5**
a mayfly				
MP: mainly French Broad and Little Tennessee drainages; Deep Creek (Person)				
Paracloeodes fleeki	**W3**		**S3**	**G2G4**
a mayfly				
P: southern Piedmont streams				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Pseudocentroptiloides usa	**W3**		**S2**	**G4**
a mayfly				
PSC: large Piedmont and Coastal Plain rivers, including Lumber River				
Serratella spiculosa	**W2**		**S3**	**G2Q**
Spiculose Serratellan Mayfly				
M: New, Watauga, French Broad, Little Tennessee, Hiwassee, Broad, and Savannah drainages				
Siphloplecton speciosum	**W5**		**S2**	**G4**
a mayfly				
SC: Lumber River (Hoke, Scotland)				
Sparbarus maculatus	**W3**		**S2S3**	**G5**
a mayfly				
C: streams in the Coastal Plain				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Stoneflies				
Acroneuria evoluta **Constricted Stone** P: central slate belt streams (Chatham, Montgomery, Moore, Randolph, Stanly)	**W5**		**S2**	**G5**
Agnetina capitata **Northern Stone** M: upper Tuckasegee River (Jackson, Madison)	**W5**		**S3**	**G5**
Alloperla neglecta **Tennessee Sallfly** M: streams (Haywood, Swain)	**W2**		**S2**	**G3**
Beloneuria georgiana **Georgia Stone** M: high elevation rheocrenes [spring brooks]	**W3**		**S1S3**	**G2**
Haploperla parkeri **Parker Sallfly** M: Right Fork Cove Creek (Haywood), Shot Pouch Creek (Macon) (endemic to North Carolina)	**W3**		**SU**	**G1**
Helopicus bogaloosa **Masked Springfly** PSC: known from eleven streams and rivers in Piedmont, Sandhills, and Inner Coastal Plain	**W3**		**S3**	**G3G4**
Isogenoides varians **Rock Island Springfly** P: Yadkin River (Davie)	**W2**		**S2**	**G3G4**
Isoperla burksi **Banded Stripetail** P: slate belt streams (Chatham, Durham, Orange)	**W3**		**S2**	**G4**
Isoperla frisoni **Wisconsin Stripetail** MP: known from six streams and rivers in the mountains, from the New River (Ashe) to Whiteoak Creek (Macon); also found in the Dan River	**W3**		**S3**	**G5**
Isoperla lata **Dark Stripetail** M: recent state records from Fires Creek (Clay) and Big Creek (Haywood)	**W3**		**S3**	**G5**
Perlesta bjostadi **Anomalus Stone** SC: Little River near Lillington (Harnett), Lumber River (Hoke, Scotland) (endemic to North Carolina)	**W3**		**SU**	**G1**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Perlesta leathermani	**W3**		**SU**	**G1**
Sandhills Stone				
SC: Little River (Hoke, Moore), Lumber River (Hoke, Scotland), Jordan Creek (Scotland) (endemic to North Carolina)				
Perlesta puttmanni	**W3**		**S2?**	**G3G4**
Anna Stone				
SC: Raft Swamp (Robeson), Little River (Cumberland, Harnett)				
Perlesta roblei	**W3**		**S2**	**G3**
Dragon Run Stone				
C: Swift Creek (Edgecombe)				
Perlinella ephyre	**W2**		**S3**	**G5**
Vernal Stone				
PSC: known from eight streams and rivers in the Sandhills and Inner Coastal Plain; also occurs in Flat River (Person) and Terrible Creek (Wake)				
Prostoia hallasi	**W3**		**SU**	**G3**
Swamp Forestfly				
C: recent state record from Great Dismal Swamp (Gates)				
Shipsa rotunda	**W3**		**S2S3**	**G5**
Intrepid Forestfly				
MPC: known from twelve streams in mountains, Piedmont, and Coastal Plain				
Sweltsa holstonensis	**W3**		**SU**	**G1**
Holston Sallfly				
M: Middle Fork Reddies River (Wilkes)				
Tallaperla elisa	**W3**		**SU**	**G3**
Highlands Roachfly				
M: Great Smoky Mountains National Park (Swain)				
Viehoperla ada	**W3**		**S2**	**G3**
Pallid Roachfly				
M: Panthertown Valley seeps (Jackson)				
Yugus arinus	**W3**		**S3**	**G3**
Highlands Springfly				
M: French Broad, Hiwassee, and Little Tennessee basins				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Caddisflies				
Agapetus hessi	**W5**		**S2**	**G4G5**
a glossosomatid caddisfly				
P: Swift Creek (Nash)				
Agapetus jocassee	**W3**		**S2**	**G2G3**
a saddlecase caddisfly				
M: small streams (Burke, Cherokee, Graham)				
Agapetus minutus	**W3**		**S3**	**G4G5**
a saddlecase caddisfly				
M: Big Creek tributary (Haywood)				
Agapetus pinatus	**W3**		**S3**	**G5**
a caddisfly				
M: mountain streams (Cherokee, Graham, Haywood, Transylvania)				
Agapetus tomus	**W3**		**S2**	**G5**
a saddlecase caddisfly				
M: mountain streams (Cherokee)				
Agraylea multipunctata	**W3**		**S3**	**G5**
a caddisfly				
MP: Wilson Creek (Caldwell)				
Beraea gorteba	**W4**		**S1S2**	**G1G2**
a Caddisfly				
M: Twentymile Creek watershed (Swain)				
Ceraclea cama	**W3**		**S1S2**	**G1G2**
a longhorned caddisfly				
C: Lake Waccamaw vicinity (endemic to this area)				
Ceraclea diluta	**W3**		**S2**	**G5**
a caddisfly				
C: several Coastal Plain rivers				
Ceraclea mentiea	**W3**		**S3**	**G5**
a longhorned caddisfly				
MP: Big Horse Creek (Ashe), North and South Forks of New River (Ashe, Alleghany), Mayo River (Rockingham)				
Ceraclea punctata	**W3**		**S3**	**G5**
a ceraclean caddisfly				
C: several Coastal Plain rivers				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Ceraclea sp. 2 nr. excisa	**W2**		**S3**	**GNR**
a caddisfly				
C: many Coastal Plain localities				
Ceraclea tarsipunctata	**W3**		**S3**	**G5**
a caddisfly				
P: Cane Creek, Yadkin River, Long Creek (Mecklenburg, Union)				
Cernotina calcea	**W3**		**S3**	**G5**
a caddisfly				
C: Lake Waccamaw (Columbus)				
Cheumatopsyche enigma	**W3**		**S3**	**G4G5**
a caddisfly				
M: streams in Great Smoky Mountains National Park (Haywood, Swain)				
Cheumatopsyche geora	**W3**		**S3**	**G5**
a caddisfly				
P: Hunting Creek (Wilkes)				
Cheumatopsyche halima	**W3**		**S3**	**G5**
a caddisfly				
M: Deep Creek (Swain)				
Cheumatopsyche helma	**W3**		**S3**	**G3**
Helma's Net-spinning Caddisfly				
MP: Henrys Fork (Burke), Cataloochee Creek (Haywood)				
Cheumatopsyche parentum	**W3**		**S3**	**G3**
a caddisfly				
P: Uwharrie River (Montgomery)				
Cheumatopsyche richardsoni	**W3**		**S1S2**	**G1G2**
Richardson's Cheumatopsyche Caddisfly				
S: Little River (Hoke, Moore)				
Chimarra florida	**W3**		**S3**	**G4**
Floridian Finger-net Caddisfly				
S: several sandhills streams				
Frenesia difficilis	**W3**		**S3**	**G5**
a caddisfly				
M: seeps (Haywood, Surry, Swain)				
Goera stylata	**W3**		**S3**	**G5**
a caddisfly				
M: Commissioners Creek (Macon)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Goerita betteni	**W3**		**S3**	**G4**
a caddisfly				
M: cold spring runs in mountainous areas				
Goerita semata	**W3**		**S3**	**G3**
a caddisfly				
M: cold spring runs in mountainous areas				
Helicopsyche paralimnella	**W5**		**SU**	**G2**
a snailcase caddisfly				
M: Fires Creek (Clay?), Bearwallow Creek (Transylvania) (confined to southwestern mountains in NC)				
Homoplectra flinti	**W3**		**S2**	**G2**
a caddisfly				
M: seeps (Haywood, Macon)				
Hydropsyche bassi	**W3**		**SU**	**G2**
a netspinning caddisfly				
S: Little River (Hoke, Moore)				
Hydropsyche fattigi	**W3**		**S3**	**G5**
a caddisfly				
C: Cape Fear River (Harnett)				
Hydropsyche opthalmica	**W3**		**S3**	**G3**
a caddisfly				
MPC: rivers (no locality data)				
Hydropsyche ventura	**W5**		**S3**	**G5**
a caddisfly				
M: northern and western mountain streams				
Hydroptila armata	**W3**		**S2**	**G5**
a caddisfly				
P: Uwharrie River (Montgomery)				
Hydroptila coweetensis	**W3**		**SU**	**G1G2**
a micro caddisfly				
M: Coweeta Creek (Macon)				
Hydroptila englishi	**W4**		**SNA**	**G2**
a caddisfly				
M: Thompson River, NC/SC border (Transylvania)				
Hydroptila lloganae	**W3**		**SU**	**G3**
Llogan's Vari-colored Microcaddisfly				
S: Lumber River (Hoke, Scotland)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Hydroptila maculata	**W3**		**S3**	**G3G4**
a caddisfly				
C: Lake Waccamaw (Columbus)				
Mayatrichia ayama	**W5**		**S2**	**G5**
a caddisfly				
MPS: mostly in mountain streams; Dan River (Stokes), Lumber River (Scotland)				
Micrasema burksi	**W2**		**S3**	**G4G5**
a caddisfly				
M: known from eleven streams in the mountains, from Avery County to Clay County				
Micrasema sprulesi	**W2**		**S3**	**G5**
a caddisfly				
MP: known from eight streams and rivers, primarily in the mountains but also in the Mayo River				
Molanna uniophila	**W3**		**S3**	**G5**
a caddisfly				
C: found in larger rivers and lakes from Chowan River (Hertford) to Drowning Creek (Richmond) and Lake Waccamaw (Columbus)				
Neophylax virginica	**W3**		**S1**	**GNR**
a Uenoid Casemaker				
P: streams and rivers, Deep River (Moore)				
Neureclipsis melco	**W3**		**S3**	**G4**
a caddisfly				
C: Shoe Heel Creek (Robeson)				
Ochrotrichia confusa	**W3**		**S3**	**G5**
a caddisfly				
M: Blue Ridge Parkway seeps (Watauga)				
Oecetis porteri	**W5**		**S2**	**G3G4**
Porter's Long-horn Sedge				
C: White Lake and Lake Waccamaw (Bladen, Columbus)				
Oecetis sp. B	**W5**		**S1**	**G1**
a caddisfly				
C: Lake Mattamuskeet and Perquimans River (Hyde, Perquimans)				
Oecetis sp. E	**W5**		**S2**	**G2**
a caddisfly				
SC: bay lakes and swamp streams of North and South Carolina				
Oxyethira glasa	**W1**		**S3**	**G5**
a caddisfly				
C: Lake Waccamaw (Columbus)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Oxyethira lumosa	**W3**		**S3**	**G4**
a caddisfly				
S: Little River (Hoke, Moore)				
Oxyethira verna	**W3**		**S3**	**G5**
an oxyethiran microcaddisfly				
C: Lake Waccamaw (Columbus)				
Padunia jeanae	**W2**		**S3**	**G4**
a Caddisfly				
MP: streams and rivers (Buncombe, Burke, Clay, Henderson, Johnston, Macon, Randolph, Transylvania, Watauga, Yancey)				
Phylocentropus auriceps	**W3**		**S3**	**G3G4**
a caddisfly				
M: described from Black Mountain (Buncombe); found in mountains of GA, SC, NC, VA				
Protoptila georgiana	**W3**		**S2**	**G3G4**
a caddisfly				
P: Uwharrie River (Montgomery), Cape Fear River (Harnett)				
Pseudogoera singularis	**W5**		**S2**	**G2G3**
a caddisfly				
M: Coweeta Creek and seep near upper Wilson Creek (Caldwell)				
Pseudostenophylax sparsus uniformis	**W5**		**S3**	**G5T5**
a caddisfly				
M: high elevation seeps along the Blue Ridge Parkway (Buncombe, Haywood, Jackson)				
Psilotreta amera	**W5**		**S2**	**G3G4**
a caddisfly				
M: mountain streams (Haywood, Macon, Swain)				
Psilotreta rossi	**W5**		**S2**	**G3**
a caddisfly				
M: seeps and springs (Macon, Transylvania)				
Psilotreta rufa	**W2**		**S3**	**G5**
a caddisfly				
M: mountain streams (Macon, Transylvania)				
Rhyacophila amicis	**W5**		**S3**	**G2**
a free-living caddisfly				
M: Cullasaja River (Macon), Nantahala River (Macon, Clay), Whiterock Creek (Jackson), Spainhour Creek (Caldwell), North Toe River, Deep Creek, Oconoluftee River (Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Rhyacophila montana	**W5**		**SU**	**G2G3**
a free-living caddisfly				
M: high elevation seeps (Jackson, Swain)				
Rhyacophila mycta	**W5**		**S2S3**	**G3**
a free-living caddisfly				
M: only confirmed from Sweeten Creek (Buncombe)				
Rhyacophila vibox	**W2**		**S3**	**G5**
a rhyacophilan caddisfly				
M: Whiteoak Creek (Macon), Mitchell River (Surry)				
Setodes arenatus	**W5**		**S2**	**G2G3**
a caddisfly				
C: Lumber River (Scotland)				
Setodes stehri	**W5**		**S3**	**G4**
a caddisfly				
M: unknown locality				
Stactobiella delira	**W3**		**S3**	**G5**
a microcaddisfly				
M: reported from the Savannah basin				
Stactobiella martynovi	**W3**		**S3**	**G4**
a microcaddisfly				
M: reported from the Savannah basin				
Triaenodes helo	**W3**		**S3**	**G3**
Marsh Triaenode Caddisfly				
S: Little River (Hoke, Moore)				
Triaenodes marginatus	**W3**		**S3**	**G5**
a longhorned caddisfly				
PSC: Stewart Creek (Mecklenburg), Long Creek (Gaston), Whiteoak Creek (Polk); Lumber River (Robeson), UT Hitchcock Creek (Richmond), Mill Creek (Moore)				
Triaenodes melacus	**W3**		**S3**	**G5**
a caddisfly				
P: small Piedmont streams (Alamance, Caswell, Wake)				
Triaenodes sp. C	**W5**		**S1**	**G1G2**
a caddisfly				
S: Carolina bays (Scotland)				
Wormaldia thyria	**W3**		**S3**	**G3**
a caddisfly				
M: high elevation streams (Henderson, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Dragonflies and Damselflies

Arigomphus villosipes **W3** **S3** **G5**

Unicorn Clubtail

MPC: ponds, lakes, slow-flowing streams (Ashe, Avery, Bertie, Bladen, Buncombe, Chowan, Clay, Gates, Halifax, Haywood, Henderson, Orange, Perquimans, Rockingham, Rutherford, Transylvania, Warren, Washington, Watauga)

Dromogomphus armatus **W3** **S3** **G4**

Southeastern Spinyleg

SC: pools in slow-flowing rivers (Bladen, Columbus, Cumberland, Hoke, Moore, Richmond, Robeson, Scotland)

Enallagma minusculum **W6** **SNA** **G4**

Little Bluet

C: lakes and ponds; known in the state only from White Lake (Bladen), but suspected of being an introduction

Enallagma sulcatum **W4** **SNA** **G4**

Golden Bluet

C: sand-bottomed lakes, with some shoreline vegetation; reported from Columbus County, but documentation is unknown

Gomphurus dilatatus **W3** **S3?** **G5**

Blackwater Clubtail

PC: rivers (Bertie, Caswell, Chatham, Columbus, Cumberland, Durham, Edgecombe, Harnett, Johnston, Lenoir, Martin, Mecklenburg, Montgomery, Pender, Pitt, Robeson, Wilson, Yadkin)

Gomphurus hybridus **W3** **S3** **G4**

Cocoa Clubtail

PSC: large or medium rivers with silty or sandy bottoms (Bladen, Columbus, Cumberland, Davidson, Duplin, Halifax, Johnston, Lenoir, Montgomery, Northampton, Pender, Scotland, Wayne)

Hylogomphus abbreviatus **W2** **S3S4** **G4**

Spine-crowned Clubtail

PC: rivers (Caswell, Chatham, Cumberland, Durham, Lee, Mecklenburg, Montgomery, Moore, Randolph, Union, Wake)

Hylogomphus apomyius **W3** **S3?** **G3G4**

Banner Clubtail

PC: spring-fed streams (Bladen, Cabarrus, Catawba, Chatham, Columbus, Cumberland, Gaston, Greene, Harnett, Lenoir, Moore, Richmond, Robeson, Sampson, Wake, Wayne, Wilson)

Hylogomphus parvidens **W2** **S3?** **G4**

Piedmont Clubtail

MPSC: small woodland streams with sandy bottoms (Bladen, Buncombe, Burke, Caldwell, Cleveland, Davie, Forsyth, Hoke, Macon, Madison, Montgomery, Moore, Richmond, Rutherford, Scotland, Surry, Swain, Transylvania, Wake, Wilkes)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Lanthus parvulus	**W4**		**SNA**	**G4G5**
Northern Pygmy Clubtail				
M: reported from the state (Avery), but no conclusive records				
Lestes eurinus	**W2**		**S3**	**G5**
Amber-winged Spreadwing				
MP: lakes and ponds with emergent vegetation (Alleghany, Ashe, Buncombe, Burke, Caldwell, Durham, Graham, Guilford, Henderson, Jackson, Macon, Madison, Mecklenburg, Orange, Rockingham, Watauga, Yadkin)				
Lestes forcipatus	**W3**		**S1S2**	**G5**
Sweetflag Spreadwing				
MP: vegetated ponds (Ashe, Durham, Forsyth, Granville, Guilford, Orange, Person, Wilson)				
Lestes vidua	**W2**		**S3**	**G5**
Carolina Spreadwing				
C: ponds and pools (Bladen*, Brunswick*, Carteret, Hoke, New Hanover, Onslow, Pender, Sampson, Scotland)				
Macrodiplax balteata	**W3**		**S2S3**	**G5**
Marl Pennant				
CT: ponds and lakes near the coast, usually brackish or near marl (Brunswick, Carteret, Dare, Hyde, New Hanover, Pamlico)				
Nannothemis bella	**W3**		**S3S4**	**G4G5**
Elfin Skimmer				
SC: boggy swales (Anson, Bladen, Cumberland, Harnett, Hoke, Montgomery, Moore, Richmond, Scotland)				
Neurocordulia alabamensis	**W3**		**S3?**	**G5**
Alabama Shadowdragon				
SC: small creeks in forested regions, often where sandy and with low flow (Bladen, Brunswick, Cumberland, Duplin, Harnett, Hoke, Johnston, Jones, Lee, Montgomery, Moore, Pender, Richmond, Robeson, Sampson, Scotland, Wake)				
Neurocordulia molesta	**W3**		**S3?**	**G4**
Smoky Shadowdragon				
C: rivers (Bladen, Cumberland, Edgecombe, Harnett, Lenoir, Moore, Richmond, Sampson, Wake, Wayne)				
Neurocordulia virginiensis	**W3**		**S2?**	**G4**
Cinnamon Shadowdragon				
P: large rivers (Chatham, Durham, Halifax, Harnett, Nash, Northampton, Wake)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Ophiogomphus incurvatus	**W2**		**S3**	**G3**
Appalachian Snaketail				
MP: small to medium streams (Alexander, Buncombe, Burke, Cabarrus, Caldwell, Caswell, Catawba, Cleveland, Davidson, Forsyth, Gaston, Guilford, Iredell, Lincoln, McDowell, Mecklenburg, Richmond, Rockingham, Rutherford, Stokes, Union, Wilkes, Yadkin)				
Ophiogomphus mainensis	**W2**		**S3**	**G4G5**
Maine Snaketail				
M: rapids of rivers and streams (Ashe, Buncombe, Burke, Caldwell, Haywood, Jackson, Madison, Mitchell, Swain*, Watauga, Wilkes, Yancey*)				
Phanogomphus diminutus	**W2**		**S3S4**	**G3G4**
Diminutive Clubtail				
SC: sand bottom streams (Bladen, Brunswick, Cumberland, Harnett, Hoke, Montgomery, Moore, Richmond, Scotland)				
Somatochlora provocans	**W3**		**S3?**	**G4**
Treetop Emerald				
SC: small forested seeps and pools, perhaps very small streams (Beaufort, Bladen, Chowan, Cumberland, Edgecombe, Halifax, Harnett, Hoke, Johnston, Lee, Martin, Moore, Northampton, Pitt, Richmond, Sampson, Scotland, Wake, Washington, Wayne, Wilson)				
Stenogomphurus rogersi	**W2**		**S2S3**	**G4**
Sable Clubtail				
M: small spring-fed streams (Alleghany, Ashe, Avery, Buncombe, Macon, Madison, Polk, Swain, Watauga, Wilkes)				
Stylurus amnicola	**W3**		**S3**	**G4**
Riverine Clubtail				
MPC: rivers (Anson, Bertie, Buncombe, Caswell, Cumberland, Davie, Edgecombe, Greene, Harnett, Johnston, Lincoln, Northampton, Pitt, Rockingham, Transylvania, Wake, Wayne, Yadkin)				
Stylurus notatus	**W4**		**SNA**	**G3**
Elusive Clubtail				
reported from NC, but no conclusive records				
Sympetrum internum	**W4**		**SNA**	**G5**
Cherry-faced Meadowhawk				
M: reported from Macon County, but details not known; outside normal range				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Flies

Eulonchus marialiciae	**W3**		**S3?**	**G1G3**
Mary Alice's Small-headed Fly				
M: high elevation hardwood-hemlock forests (endemic to North Carolina) (Haywood, Jackson, Macon, Swain, Transylvania)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Butterflies

Amblyscirtes carolina **W2** **S3S4** **G3G4**

Carolina Roadside-Skipper

PSC: moist woods (mainly hardwoods) near cane; host plant -- cane (*Arundinaria*) (Beaufort, Bertie*, Bladen, Brunswick, Carteret, Craven, Cumberland, Dare, Franklin, Gaston*, Gates, Halifax, Hoke, Hyde, Johnston, Jones, Lincoln, Martin*, Moore, New Hanover, Onslow, Pasquotank*, Pitt, Richmond, Sampson, Scotland, Wake, Washington, Wayne)

Celastrina neglectamajor **W2** **S3S4** **G4**

Appalachian Azure

M: rich deciduous forests; host plant -- black cohosh (*Cimicifuga*) (Alleghany, Ashe, Avery, Buncombe, Caldwell, Clay, Graham, Haywood, Macon, Madison, McDowell, Rutherford, Swain, Transylvania, Watauga, Yancey)

Glaucopsyche lygdamus **W2** **S2S3** **G5**

Silvery Blue

M: open upland woods, roadbanks, and borders; host plants -- primarily Carolina vetch (*Vicia caroliniana*), but also crown vetch (*Coronilla varia*) (Buncombe, Clay, Graham, Haywood, Macon, Madison, Mitchell, Swain)

Hermeuptychia intricata **W3** **SU** **GNR**

Intricate Satyr

C: mesic to moist hardwood forests; host plants -- grasses; newly described species, very difficult to identify; most NC records based on old specimens (Carteret*, Duplin*, Jones)

Hesperia leonardus **W2** **S3** **G5**

Leonard's Skipper

MP: wooded borders and openings, brushy fields; host plants -- grasses (Ashe, Avery*, Buncombe, Chatham, Clay*, Durham, Guilford*, Harnett, Madison, Montgomery, Moore, Randolph, Richmond*, Rowan, Stanly, Union, Wake, Watauga)

Hesperia sassacus **W2** **S3** **G5**

Indian Skipper

M: old fields, clearings, wood margins, mainly at high elevations; host plants -- grasses (Alleghany, Ashe, Avery, Burke, Clay, Haywood, Macon, Madison, Mitchell, Swain, Watauga, Wilkes, Yancey*)

Megathymus yuccae **W2** **S3S4** **G5**

Yucca Giant-Skipper

MPSC: dunes, flatwoods, old fields, and other places near yuccas; host plants -- *Yucca* species (Alexander, Bladen, Brunswick, Carteret*, Catawba*, Craven*, Cumberland, Dare*, Hoke, Johnston*, Jones, Mecklenburg, Moore, New Hanover, Onslow, Pender, Richmond, Robeson, Rutherford, Sampson, Scotland, Transylvania*)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Phyciodes cocyta	**W3**		**S3?**	**G5**
Northern Crescent				
M: high to medium elevation openings in woodlands, road banks; host plants -- asters (Alleghany, Ashe, Buncombe, Clay, Graham, Haywood, Henderson, Macon, Madison, Swain, Watauga, Yancey)				
Phyciodes phaon	**W5**		**S2S3**	**G5**
Phaon Crescent				
T: open, often dry areas, mainly on barrier islands; host plants -- fogfruit (*Lippia*) (Brunswick*, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)				
Pyrgus albescens	**W3**		**SU**	**G5**
White Checkered-Skipper				
PT: dry, open habitats, often where sandy, in the southern parts of the state; host plants -- mallows (*Sida*) (Brunswick, Carteret, Mecklenburg)				
Satyrium kingi	**W2**		**S3S4**	**G3G4**
King's Hairstreak				
MPSC: forests, often moist, usually near sweetleaf; host plant -- sweetleaf (*Symplocos tinctoria*) (Bladen, Brunswick, Carteret, Craven, Cumberland, Currituck, Dare*, Gaston, Hoke, Moore, Onslow*, Pender*, Pitt, Richmond, Robeson, Sampson, Scotland, Transylvania, Watauga)				
Speyeria diana	**W2**		**S3S4**	**G3G4**
Diana Fritillary				
MP: montane and foothill forest edges and openings; host plants -- violets (*Viola*) (Alexander*, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Catawba, Cherokee, Clay, Cleveland, Gaston, Graham, Haywood, Henderson, Iredell, Jackson, Macon, Madison, McDowell, Mecklenburg, Mitchell, Nash*, Polk, Rutherford, Stokes*, Surry, Swain, Transylvania, Wake*, Watauga, Wilkes, Yancey)				
Thorybes confusis	**W3**		**S3S4**	**G4**
Confused Cloudywing				
MPSC: dry woodland borders and openings, brushy fields; host plants -- legumes (Brunswick, Carteret, Caswell, Chatham, Clay, Columbus, Craven, Cumberland, Dare*, Davie, Durham, Forsyth, Gaston*, Granville, Harnett, Hoke, Montgomery, Moore, New Hanover, Onslow, Orange, Pender, Richmond, Sampson, Scotland, Wake, Warren)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Insects: Moths				
Abrostola ovalis **Oval Abrostola Moth** M: high elevation forests with nettles (Ashe, Haywood, Macon, Swain)	**W3**		**SU**	**G4**
Acrapex relicta **Relict Cane Moth** SC: canebrakes (Beaufort, Brunswick, Cumberland, Dare, Hoke, Martin, Montgomery, Moore, Northampton, Onslow, Richmond, Wake, Washington)	**W3**		**S3**	**G4**
Acronicta lanceolaria **Narrow-winged Dagger Moth** C: flatwoods (Brunswick, Onslow, Pender)	**W3**		**S3?**	**G4**
Afrida ydatodes **Dyar's Lichen Moth** C: maritime forest and scrub? (New Hanover)	**W3**		**S1S3**	**G5**
Anicla lubricans **Slippery Dart** PSC: savannas and flatwoods (Beaufort, Brunswick, Carteret, Cumberland, Granville, Harnett, Hoke, Moore, New Hanover, Onslow, Pender, Wake)	**W3**		**S3?**	**G4G5**
Anicla simplicius **Simplicius Dart** S: unknown habitats (Harnett, Hoke)	**W3**		**SU**	**G4**
Anicla sullivani **Sullivan's Anicla Moth** C: riparian habitats? (Hoke)	**W3**		**SU**	**G3G4**
Apantesis carlotta **Carlotta's Tiger Moth** MP: unknown habitats (Alleghany, Ashe, Haywood, Stokes, Swain, Watauga)	**W3**		**S3**	**G5**
Apoda rectilinea **Rectilinea Slug Moth** S: pine-oak sandhill woodlands (Hoke, Moore)	**W3**		**S1S3**	**GNR**
Argillophora furcilla **Silver Fork Cane Moth** MPC: canebrakes (Halifax, Martin, Northampton, Stokes, Swain, Washington)	**W3**		**S2S3**	**G3G4**
Arugisa latiorella **Watson's Arugisa Moth** PSC: sedgy glades (Dare, Moore, Wake, Washington)	**W3**		**S3?**	**G4**

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Cabera quadrifasciaria	**W3**		**SU**	**GNR**
Four-lined Cabera Moth				
C: unknown habitats (Brunswick, Carteret, New Hanover, Pender)				
Callosamia securifera	**W3**		**SU**	**G4**
Sweetbay Silkmoth				
SC: pocosins and other wetlands with sweetbay (Bladen, Brunswick, Camden, Carteret, Columbus, Gates, Harnett, Hoke, Moore, Pender, Richmond, Scotland, Washington)				
Caripeta aretaria	**W3**		**S3S4**	**G4**
Southern Pine Looper				
MPC: pine forests (Beaufort, Bladen, Brunswick, Carteret, Columbus, Dare, Gaston, Halifax, Macon, Moore, New Hanover, Onslow, Pender, Stokes, Washington)				
Catocala abbreviatella	**W3**		**SH**	**G4**
Abbreviated Underwing Moth				
S: sandhills habitats with host plants - *Amorpha* species. (Richmond*)				
Catocala alabamae	**W3**		**S2S3**	**G4**
Alabama Underwing				
SC: mesic sandhills (Bladen, Cumberland, Richmond)				
Catocala amestris	**W3**		**SU**	**G4**
Three-staff Underwing				
PC: sand ridges and flatwoods with leadplant (*Amorpha*) (New Hanover, Polk)				
Catocala blandula ssp. 1	**W3**		**S1S3**	**G5T3**
Southern Charming Underwing				
C: riparian hawthorns (Martin)				
Catocala illecta	**W3**		**SU**	**G5**
Magdalen Underwing				
P: habitats not known (Chatham)				
Catocala miranda	**W3**		**SU**	**G3G4**
Miranda Underwing				
M: forests with hawthorns (Swain)				
Catocala pretiosa	**W3**		**S2S3**	**G4**
Precious Underwing				
MSC: forests with shadbush or chokeberry (Cumberland, Dare, Hoke, Macon)				
Catocala sappho	**W3**		**SU**	**G4**
Sappho Underwing				
MP: bottomland hardwoods with hickories (Macon, Moore, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Cerastis fishii	**W3**		**SU**	**G4**
a Dart Moth				
MC: heath thickets (Macon, New Hanover)				
Ceratonyx satanaria	**W3**		**S2S4**	**G4**
a Geometrid Moth				
MC: swamps and bottomlands (Brunswick, Macon)				
Chytonix sensilis	**W3**		**S3?**	**G4**
Barrens Marvel				
MPSC: sandhills and flatwoods (Brunswick, Cumberland, Harnett, Hoke, Moore, New Hanover, Onslow, Pender, Stokes, Transylvania)				
Cisthene kentuckiensis	**W3**		**SU**	**G4**
Kentucky Lichen Moth				
SC: wet to mesic forests (Cumberland, Martin, Pender, Richmond, Wake)				
Dasychira atrivenosa	**W3**		**S3?**	**G4**
a Tussock Moth				
PSC: hardwood forests (Brunswick, Hoke, Onslow, Pender, Warren)				
Doryodes bistrialis	**W3**		**SU**	**G4**
Double-lined Doryodes				
SC: marshes (Brunswick, Carteret, Harnett, Hoke, Moore, New Hanover, Onslow, Pender)				
Doryodes sp. 1	**W3**		**S3S4**	**G3G4**
Wiregrass Doryodes				
SC: savannas, flatwoods, and sandhills (Brunswick, Carteret, Hoke, Moore, New Hanover, Onslow, Pender)				
Elaphria fuscimacula	**W3**		**SU**	**GNR**
a Noctuid Moth				
C: no habitat information (Columbus)				
Eulithis molliculata	**W3**		**SU**	**G4**
Dimorphic Eulithis Moth				
M: no habitat information (Ashe)				
Eupithecia absinthiata	**W3**		**SU**	**G5**
a Geometrid Moth				
M: unknown habitats (Ashe, Swain*, Watauga)				
Eupithecia affinata	**W3**		**SU**	**GNR**
a Geometrid Moth				
M: no habitat information (Watauga)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Eupithecia indistincta	**W3**		**SU**	**GNR**
a Pug Moth				
M: no habitat information (Haywood, Swain)				
Eupithecia mutata	**W5**		**SU**	**G5**
Spruce Cone Looper				
M: spruce-fir forests and possibly stands of hemlock (Haywood, Swain)				
Eupithecia peckorum	**W3**		**S3?**	**G4**
Peck's Pug Moth				
MSC: sandhills and flatwoods (Brunswick*, Macon, Montgomery, New Hanover, Onslow, Pender)				
Eupithecia satyrata	**W3**		**SU**	**G5**
Satyr Pug Moth				
M: no habitat information (Ashe, Watauga)				
Eupithecia strattonata	**W3**		**SU**	**GNR**
a Pug Moth				
no habitat or locality information				
Eusarca packardaria	**W3**		**SU**	**GNR**
Packard's Eusarca Moth				
MC: no habitat information (Cumberland, Macon, Martin)				
Feltia manifesta	**W2**		**S3S4**	**G4**
Adobe Dart				
MSC: xeric oak woodlands (Cumberland, Macon)				
Gabara pulverosalis	**W3**		**S3?**	**G4**
an Erebid Moth				
PSC: habitats poorly known (Brunswick, Cumberland, Harnett, Hoke, Montgomery, Moore, New Hanover, Onslow, Pender, Polk, Randolph, Richmond, Scotland)				
Gondysia similis	**W3**		**S2S3**	**G3G4**
Gordonia Darkwing				
C: pocosins and bay forests (Bladen, Brunswick, Carteret, Dare, Onslow, Pender, Washington)				
Gondysia telma	**W3**		**SU**	**GNR**
a Noctuid Moth				
C: swamp forests (Columbus, Craven, Cumberland, Robeson)				
Grammia phyllira	**W2**		**S3**	**G4**
Phyllira Tiger Moth				
PSC: sandhills (Bladen, Cumberland, Gaston, Moore, Onslow, Richmond, Wake)				
Grammia virguncula	**W3**		**SH**	**G5**
Little Virgin Tiger Moth				
M: no habitat information (Watauga*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Heliomata infulata	**W3**		**S2S3**	**G3G4**
Rare Spring Moth				
MPSC: forests or woodlands with shrubby locusts (Bladen, Cumberland, Gates, Harnett, Haywood, Hoke, Moore, Stokes, Surry, Wake)				
Hydrelia condensata	**W3**		**SU**	**G4**
a Carpet Moth				
M: no habitat or locality information				
Hydriomena divisaria	**W3**		**S2S3**	**G5**
Black-dashed Hydriomena Moth				
MP: no habitat information (Haywood, Macon, Madison, Mitchell, Rutherford, Swain, Wake)				
Hypena appalachiensis	**W3**		**S2S3**	**G3G4**
Appalachian Bomolocha Moth				
M: unknown habitats (Ashe, Swain)				
Hyperstrotia aetheria	**W3**		**S3?**	**GNR**
a Graylet Moth				
S: pine-oak sandhill woodlands (Moore)				
Hypocala andremona	**W3**		**SU**	**GNR**
Hypocala Moth				
M: no habitat information (Swain)				
Hypomecis longipectinaria	**W3**		**S3S4**	**G3G4**
Broadly Pectinate Hypomecis Moth				
PC: hardwood stands (Brunswick, Halifax, Martin, Montgomery, Northampton, Onslow, Orange, Pender, Randolph)				
Idaea eremiata	**W3**		**S3S4**	**G4**
Straw Wave				
MSC: sandhills (Brunswick, Cumberland, Macon, Moore, Pender, Richmond)				
Idaea hilliata	**W3**		**SU**	**GNR**
Hill's Wave Moth				
C: no habitat information (Robeson)				
Idaea micropterata	**W3**		**S3?**	**GNR**
a Wave				
C: no habitat information (Dare, Onslow)				
Idaea productata	**W3**		**SU**	**G4**
a Wave				
MC: sandhills (Dare, New Hanover, Onslow, Pender, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Idaea scintillularia	**W3**		**SU**	**GNR**
Diminutive Wave				
PC: unknown habitats (Cabarrus, Martin, Montgomery, Wake)				
Ipimorpha pleonectusa	**W3**		**SU**	**G5**
Even-lined Sallow				
P: no habitat information (Cabarrus, Mecklenburg)				
Leucania incognita	**W3**		**S1S2**	**GNR**
a Wainscot Moth				
MC: habitats poorly known (Alleghany, Brunswick)				
Lithacodia sp. 2	**W3**		**S1S3**	**G1G3**
a Bird-dropping Moth				
C: unknown habitats (Cumberland, Halifax, Hoke, Northampton)				
Lithophane abita	**W3**		**SU**	**G4**
Cypress Pinion				
C: cypress swamps (Camden, Pender)				
Lithophane adipel	**W3**		**SU**	**G4**
a Pinion Moth				
C: unknown habitats (Moore)				
Lithophane joannis	**W3**		**SU**	**G4**
a Noctuid Moth				
M: rich cove forests? (Macon)				
Lithophane laceyi	**W3**		**SU**	**G4**
a Pinion Moth				
PC: sites dominated by xerophytic oaks (Brunswick, Moore, New Hanover, Warren)				
Lithophane lemmeri	**W3**		**S1S3**	**G3G4**
Lemmer's Pinion				
PC: cedar glades and Atlantic white cedar forests (Carteret, Craven, Wake)				
Lithophane scottae	**W3**		**SU**	**G2G4**
a Pinion Moth				
M: lower elevations (Ashe)				
Lithophane tepida	**W3**		**SU**	**G5**
White-eyed Pinion				
M: northern hardwood forests? (Macon)				
Litoprosopus futilis	**W3**		**SU**	**G4**
Palmetto Borer				
C: palmettos (Carteret, New Hanover)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Lytrosis heitzmanorum	**W3**		**SU**	**G5**
a Geometrid Moth				
MP: oak-hickory forests in lower elevation mountains and piedmont (Orange, Rutherford)				
Macrochilo louisiana	**W3**		**S3?**	**G4**
Louisiana Owlet Moth				
MPSC: sedgy wetlands (Alleghany, Brunswick, Cumberland, Hoke, Onslow, Orange, Pender, Richmond)				
Macrochilo santerivalis	**W3**		**SU**	**G3G4**
an Owlet Moth				
C: brackish marshes (Dare, New Hanover, Onslow)				
Metanema determinata	**W3**		**SU**	**G5**
Dark Metanema Moth				
M: northern hardwoods? (Alleghany, Ashe)				
Metarranthis lateritiaria	**W3**		**SU**	**G3G4**
a Geometrid Moth				
SC: flatwoods and pocosins (Brunswick, Cumberland, Dare, Onslow, Pender)				
Metarranthis mollicularia	**W3**		**SU**	**GNR**
a Geometrid Moth				
P: no habitat information (Rutherford)				
Metarranthis sp. 1	**W3**		**S3S4**	**G3G4**
Mid-Atlantic Metarranthis Moth				
C: pocosins (Brunswick, Dare, Moore, New Hanover, Pender, Richmond, Scotland, Washington)				
Nemoria bifilata	**W3**		**S3?**	**G4**
White-barred Emerald				
MPSC: sandhills and sandy forests (Bladen, Brunswick, Dare, Hoke, Moore, New Hanover, Onslow, Pender, Richmond, Swain, Warren)				
Nemoria outina	**W3**		**SU**	**GNR**
an Emerald Moth				
C: no habitat information (Carteret)				
Nemoria rubrifrontaria	**W3**		**SH**	**GNR**
Red-fronted Emerald				
MP: historical records for mountains and piedmont, habitat not known (Haywood*, Jackson*, Moore*, Swain*)				
Neoplynes eudora	**W3**		**S2S3**	**G5**
a Wasp Moth				
C: unknown (Carteret, New Hanover)

Notodontidae Genus 1 species 1	**W3**		**S2S3**	**G3G4**
a new Prominent Moth				
CP: bottomland hardwoods (Brunswick, Cumberland, Hoke, Moore, Pender, Randolph)				
Oligia chlorostigma	**W3**		**SU**	**G4**
a Brocade Moth				
MP: no habitat information (Alleghany, Ashe, Cabarrus, Haywood, Swain)				
Operophtera bruceata	**W3**		**SU**	**G5**
Bruce Spanworm Moth				
M: no habitat information (Watauga)				
Orgyia detrita	**W3**		**S2S3**	**G3G4**
a tussock moth				
MPSC: hardwood forests (Beaufort, Brunswick, Carteret, Dare, Halifax, Hoke, Onslow, Pender, Richmond, Swain, Warren, Washington)				
Paectes nubifera	**W3**		**SU**	**GNR**
Clouded Paectes Moth				
P: no habitat information (Chatham)				
Pangrapta sp. 1	**W3**		**S1S3**	**GU**
Whitish Pangrapta				
SC: pocosins? (Bladen, Columbus, Hoke)				
Papaipema araliae	**W3**		**S2S4**	**G3G4**
Aralia Shoot Borer Moth				
C: forests and woodlands (Halifax, Washington)				
Papaipema duplicatus	**W3**		**SH**	**G2G4**
Dark Stoneroot Borer Moth				
M: rich woods with *Collinsonia canadensis* (Swain)				
Papaipema furcata	**W3**		**SU**	**GU**
Ash Tip Borer Moth				
M: forests with ash (*Fraxinus*) (Ashe)				
Papaipema insulidens	**W3**		**SU**	**GU**
Umbellifer Borer Moth				
M: no habitat information (Ashe, Watauga)				
Papaipema lysimachiae	**W3**		**SU**	**G4G5**
Loosestrife Borer Moth				
M: on loosestrife (Haywood, Macon)				
Papaipema necopina	**W3**		**SU**	**G4?**
Sunflower Borer Moth				
MC: no habitat information (Macon, Northampton)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Papaipema nepheleptena	**W3**		**SU**	**G4**
Turtle Head Borer Moth				
M: wetland habitats with *Chelone glabra* (Watauga)				
Papaipema polymniae	**W3**		**SU**	**G4?**
Cup Plant Borer Moth				
MP: rich cove forests? (Buncombe, Haywood, Randolph, Swain)				
Papaipema sp. 3	**W3**		**S3S4**	**G4**
Southeastern Cane Borer Moth				
C: canebrakes (Beaufort, Cumberland, Dare, Hoke, Martin, Montgomery, Moore, Richmond)				
Parahypenodes quadralis	**W3**		**S1S2**	**G4**
Masked Parahypenodes Moth				
MC: possibly a wetland specialist (Dare, Macon)				
Photedes enervata	**W3**		**SU**	**G4**
a Borer Moth				
C: tidal marshes (Carteret, Onslow)				
Pimaphera percata	**W3**		**S1S2**	**GNR**
an Inchworm Moth				
C: unknown habitats (Brunswick)				
Ponometia parvula	**W3**		**S2S3**	**GNR**
a Bird-dropping Moth				
SC: cypress swamps? (Brunswick, Cumberland, Harnett, New Hanover, Richmond, Scotland)				
Ponometia tortricina	**W3**		**SU**	**GNR**
a Bird-dropping Moth				
M: unknown (Macon)				
Properigea costa	**W3**		**SU**	**G4**
Barrens Moth				
M: rocky outcrops (Rutherford)				
Properigea tapeta	**W3**		**SU**	**GNR**
a Noctuid Moth				
C: bottomlands? (Martin, Pender)				
Protodeltote sp. 1	**W3**		**S1S3**	**G1G3**
a Bird-dropping Moth				
C: pocosins and other wetlands; no locality data				
Psamatodes abydata	**W3**		**SU**	**GNR**
Dot-lined Angle				
MPC: unknown habitats; possibly a migrant (Ashe, Bladen, Brunswick, Macon*, Onslow, Pender, Stokes)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Ptichodis bistrigata	**W2**		**S3S4**	**G3**
Southern Ptichodis				
PSC: xeric sandhills (Hoke, Montgomery)				
Rivula stepheni	**W3**		**SU**	**GNR**
a Noctuid Moth				
C: no habitat information (Camden, Cumberland, Northampton)				
Schinia indiana	**W3**		**SH**	**G2G4**
Phlox Moth				
M: possibly dry ridges or rocky barrens, larval host *Phlox* species (Macon*)				
Schinia obscurata	**W3**		**S2S3**	**G4**
Erigeron Flower Moth				
S: sandhills (Moore)				
Schinia scissoides	**W3**		**S2S3**	**GNR**
Divided Flower Moth				
C: open areas (Brunswick, New Hanover)				
Schinia siren	**W3**		**SU**	**GNR**
Alluring Schinia Moth				
SC: open hardwood forests (Brunswick, Carteret, Hoke, Moore, New Hanover, Pender)				
Schinia sordidus	**W3**		**S2S3**	**G4?**
Sordid Flower Moth				
SC: savannas (Bladen, Brunswick, Carteret, Moore, New Hanover, Pender)				
Scopula aemulata	**W3**		**SU**	**GNR**
Diminutive Wave				
PC: on *Trillium* (Brunswick, New Hanover, Stokes)				
Scopula cacuminaria	**W3**		**S2S3**	**G4**
Frosted Tan Wave Moth				
MC: sandhills and other dry forests (Alleghany, Beaufort, Brunswick, Camden, Dare, Gates, Onslow)				
Scopula ordinata	**W3**		**SU**	**GU**
a Wave Moth				
MC: mesic hardwoods (Brunswick, Haywood, Macon, Swain, Transylvania)				
Scopula purata	**W3**		**S2S3**	**G4**
Chalky Wave				
SC: acidic wetlands (Brunswick, Cumberland, Hoke, Moore, Onslow, Pender, Richmond)				
Selenisa sueroides	**W3**		**SU**	**GNR**
Pale-edged Selenisa Moth				
P: no habitat information (Mecklenburg)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Sphingicampa bicolor	**W3**		**S3?**	**G5**
Honey Locust Moth				
P: on honey locust (*Gleditsia*) (Chatham, Durham*, Gaston, Lee, Wake)				
Sphinx franckii	**W3**		**SU**	**G4G5**
Franck's Sphinx				
PC: basic-mesic hardwoods and other habitats with ash (*Fraxinus*) (Brunswick, Cabarrus, Orange)				
Spilosoma dubia	**W3**		**S3?**	**G5**
Dubious Tiger Moth				
C: acidic wetlands (Bladen, Brunswick, Carteret, Cumberland, Dare, New Hanover, Onslow, Pender, Washington)				
Stiria rugifrons	**W3**		**SU**	**G4**
Yellow Sunflower Moth				
MC: habitat unknown, but often near sunflowers (Cumberland, Transylvania*)				
Sympistis dinalda	**W3**		**SU**	**GNR**
a Sallow				
P: no habitat information (Warren)				
Sympistis perscripta	**W3**		**SU**	**G4**
Scribbled Sallow				
C: on toadflax (Bladen, Brunswick, Cumberland, New Hanover, Onslow)				
Tacparia detersata	**W3**		**SU**	**G5**
Pale Alder Moth				
M: northern hardwoods (Alleghany, Ashe, Avery)				
Tornos abjectarius	**W3**		**S2S3**	**GNR**
a Tornos Moth				
PC: freshwater shorelines, savanna (Brunswick, Cumberland, Halifax, Pender, Richmond, Warren)				
Tornos cinctarius	**W3**		**SU**	**GNR**
a Tornos Moth				
SC: savannas and sandhills (Cumberland, Hoke, Onslow, Pender)				
Tripudia flavofasciata	**W3**		**SU**	**GNR**
a Seed Moth				
C: bottomlands (Cumberland, Halifax, Martin, Northampton, Onslow)				
Ulolonche modesta	**W3**		**SU**	**G5**
Modest Quaker Moth				
MPC: pine-oak-heath communities (Bladen, Cumberland, Dare, Pender, Stokes)				
Xestia youngii	**W3**		**S3S4**	**G5**
Young's Dart Moth				
C: peatlands (Beaufort, Bladen, Brunswick, Carteret, Dare, New Hanover, Pender, Washington)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Zale fictilis	**W3**		**SU**	**G5**
an Owlet Moth				
C: no habitat information; perhaps a stray from farther south (Brunswick)				
Zale sp. 2 nr. squamularis	**W3**		**SU**	**G4Q**
a new Zale				
PC: no habitat information (Brunswick, Cumberland, Stokes)				
Zale sp. 3 nr. buchholzi	**W3**		**S2S3**	**G3G4**
an Owlet Moth				
SC: pine forests (Brunswick, Cumberland, Hoke, Martin, Moore, New Hanover, Pender)				
Zanclognatha atrilineella	**W3**		**S1S3**	**GU**
an Owlet Moth				
C: no habitat information (Halifax, Martin, Onslow)				
Zanclognatha dentata	**W3**		**SU**	**G3G4**
an Owlet Moth				
M: dry pitch pine stands (Haywood, Macon, Swain)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Grasshoppers and Katydids

Amblycorypha arenicola **W3** **S2S3** **GNR**

Sandhill Virtuoso Katydid

S: sandhill habitats; no locality information

Amblycorypha bartrami **W3** **S2S3** **GNR**

Bartram's Round-winged Katydid

S: sandhill habitats; no locality information

Atlanticus gibbosus **W4** **SNA** **GNR**

Gibbous Shield-back Katydid

C: oak and pine forests; ranges north to near the North Carolina border, but uncertain if any state records

Belocephalus subapterus **W3** **S2S3** **GNR**

Half-winged Cone Head Katydid

SC: flatwoods and other shrubby areas; no locality information

Dendrotettix australis **W3** **SU** **GU**

Scrub Pine Grasshopper

MP: dry forests and monadnocks, often in pine stands (Macon*, Rutherford, Stokes)

Encoptolophus sordidus **W4** **SNA** **G5**

Dusky Grasshopper

reported from the state, but no locality or habitat information available (Avery*, Guilford*, Mecklenburg*, Watauga*)

Hesperotettix viridis **W3** **SU** **G5**

Meadow Purple-striped Grasshopper

SC: sandhill seeps and wet pine savannas (Brunswick*, Cumberland*, Harnett*, Moore, New Hanover*, Onslow, Pender*)

Hubbellia marginifera **W3** **S3?** **GNR**

Pine Katydid

SC: pinewoods (Chatham, Durham, Moore*, Sampson*, Wake)

Inscudderia walkeri **W3** **SU** **GNR**

Eastern Cypress Katydid

C: cypress swamps and savannas (Brunswick, Gates)

Melanoplus acrophilus **W3** **S2S3** **G2G3**

a Spur-throat Grasshopper

M: montane forests?; endemic to the southern Appalachians (Buncombe*, Burke*, Mitchell*, Watauga, Yancey*)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Melanoplus angustipennis	**W3**		**S2S3**	**G5**
Narrow-winged Spur-throat Grasshopper				
S: sandy areas in grasslands (Harnett, Moore*,)				
Melanoplus devius	**W3**		**SU**	**GU**
Devious Short-wing Grasshopper				
M?: dry montane forests at middle elevations; no locality information				
Melanoplus hubbelli	**W3**		**SU**	**G4**
Hubbell's Melanoplus				
M: dry woodlands, including second growth (Polk, Swain, Yancey)				
Melanoplus impudicus	**W3**		**SH**	**G4G5**
Immodest Spur-throat Grasshopper				
M: barrens and glades (Cherokee*, Richmond*, Wake*)				
Melanoplus nigrescens	**W3**		**S3?**	**GU**
Black-sided Spur-throat Grasshopper				
PCT: upland forests, dry pinewoods, and maritime forests (Brunswick*, Columbus*, Montgomery)				
Melanoplus strumosus	**W3**		**S2S3**	**G4G5**
Swollen Spur-throat Grasshopper				
SC: sandhills (Bladen*, Cumberland*, Hoke, Moore, Onslow*, Sampson*)				
Melanoplus sylvestris	**W3**		**S3?**	**G1G3**
a Spur-throat Grasshopper				
MP: deciduous forest undergrowth, especially near low-growing ericads (endemic to North Carolina) (Avery*, Buncombe*, Burke*, Stokes, Watauga*)				
Melanoplus tribulus	**W3**		**SU**	**G4G5**
Tribulus Spur-throat Grasshopper				
MPC: glades and open woodlands (Ashe*, Halifax*, Montgomery)				
Melanoplus walshii	**W3**		**SU**	**G4G5**
Walsh's Locust				
M: thickets in and near deciduous woodlands at mid to high elevations; only recent records for Mount Mitchell (Yancey)				
Mermiria intertexta	**W3**		**S3S4**	**G4?**
Intertexta Mermiria				
T: coastal marshes and damp depressions (Brunswick, Dare, New Hanover, Onslow)				
Mermiria picta	**W3**		**S3?**	**G5**
Lively Mermiria				
SC: longleaf pine savannas and flatwoods (Brunswick, Carteret, Columbus*, Cumberland, Moore*, New Hanover*, Onslow, Pender, Scotland)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Montezumina modesta	**W3**		**SU**	**GU**
Modest Katydid				
MPC: pinewoods and other habitats (Beaufort*, Brunswick*, Moore*, Pender*, Wake*)				
Neoconocephalus velox	**W3**		**SU**	**GNR**
Swift-flying Cone Head Katydid				
C: shrubby undergrowth in pinewoods; no locality information				
Orchelimum bradleyi	**W3**		**SU**	**GNR**
Bradley's Meadow Katydid				
CT: maidencane and sawgrass marshes (New Hanover*)				
Orchelimum superbum	**W3**		**SU**	**GNR**
Superb Meadow Katydid				
CT: bogs and tidal marshes; no locality information				
Paratylotropidia beutenmuelleri	**W3**		**SU**	**G4**
Beutenmueller's Grasshopper				
M: no habitat information (Buncombe*, Henderson*, Transylvania*)				
Pardalophora apiculata	**W3**		**SU**	**G5**
Coral-winged Grasshopper				
M: no habitat information (Buncombe*)				
Romalea microptera	**W3**		**SU**	**G5**
Eastern Lubber Grasshopper				
P: open woods and roadsides; no locality information				
Scudderia curvicauda laticauda	**W3**		**SU**	**G5TNR**
Broad-tailed Bush Katydid				
C: savannas, flatwoods, open pinewoods; no locality information				
Stenacris vitreipennis	**W3**		**S1S3**	**G5**
Glassy-winged Toothpick Grasshopper				
C: marshes; no locality information				
Trachyrhachys kiowa	**W3**		**SU**	**G5**
Ash-brown Grasshopper				
Unknown: bare or gravelly ground in dry upland habitats; no locality information				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global

Insects: Beetles

Ellipsoptera blanda **W3** **S2S3** **G3G4**

Sandbar Tiger Beetle

C: sandy floodplains and white sand bars along blackwater rivers and streams (Bladen, Columbus, New Hanover)

Gonielmis dietrichi **W3** **S2** **GNR**

a Water Beetle

S: in and around Fort Bragg (Hoke, Richmond, Scotland)

Lordithon niger **W4** **SU** **GU**

Black Lordithon Rove Beetle

no habitat or locality information

Stenelmis morsei **W5** **S2** **GNR**

a Riffle Beetle

C: Lumber River (Robeson)

Stenelmis sp. 1 **W3** **S1** **GNR**

Harley's Stenelmis Riffle Beetle

S: Lumber River (Hoke, Scotland)

Stenelmis sp. 2 **W2** **S2** **GNR**

William's Stenelmis Riffle Beetle

PS: James Creek, Upper Little River, Deep River (Harnett, Lee, Moore)

Stenelmis sp. 3 **W3** **S2** **GNR**

a Riffle Beetle

PSC: Little River (Cumberland, Harnett, Moore)

Trechus balsamensis **W3** **SU** **GH**

a Ground Beetle

M: Plott Balsam mountains; type locality Water Rock Knob (endemic to North Carolina) (Haywood*, Jackson*)

Trechus carolinae **W3** **SU** **GH**

a Ground Beetle

M: Spruce-Fir forests of the Black Mountains; type locality Mt. Mitchell (endemic to North Carolina) (Yancey*)

Trechus luculentus luculentus **W3** **SU** **GHTH**

Bright Ground Beetle

M: Great Smoky Mountains; type locality Clingmans Dome (Swain*)

Trechus luculentus unicoi **W3** **SU** **GHTH**

Unicoi Mountains Ground Beetle

M: Unicoi Mountains (Graham*)

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C	 Global
Trechus mitchellensis	**W3**		**SU**	**GH**
Mitchell's Ground Beetle				
M: Black Mountains (endemic to North Carolina) (Buncombe*, McDowell*, Yancey*)				
Trechus novaculosus	**W3**		**SU**	**GH**
a Ground Beetle				
M: Spruce-fir forests of Great Smoky Mountains National Park (endemic to the park) (Haywood*, Swain*)				
Trechus roanicus	**W3**		**SU**	**GH**
Roan Mountain Ground Beetle				
M: Roan Mountain (endemic to the mountain) (Mitchell*)				
Trechus rosenbergi	**W3**		**SU**	**GH**
Rosenberg's Ground Beetle				
M: Plott Balsam and Great Balsam mountains; type locality Water Rock Knob (endemic to North Carolina) (Haywood*, Jackson*)				
Trechus satanicus	**W3**		**SU**	**GH**
a Ground Beetle				
M: Great Balsam Mountains, vicinity of Devils Courthouse and Graveyard Fields (endemic to North Carolina) (Haywood*)				
Trechus subtilis	**W3**		**SU**	**GH**
Fine Ground Beetle				
M: Great Smoky and Plott Balsam mountains; type locality Mt. Sterling (endemic to North Carolina) (Haywood*)				

ENDEMIC ANIMALS IN NORTH CAROLINA

This is a list of all taxa (including subspecies) considered to be strictly endemic to North Carolina. The list does not include taxa whose range barely extends into another state, such as taxa endemic to the Roan Mountain area or Great Smoky Mountains National Park. The lists of most of the insect groups (other than butterflies, dragonflies, and damselflies) are incomplete, as are the lists for spiders and other arachnids. There are no endemic taxa of birds.

SCIENTIFIC NAME	COMMON NAME
MAMMALS	
Peromyscus leucopus buxtoni	Buxton Woods White-footed Deermouse
Sorex sp. 1	a shrew (Albemarle-Pamlico Peninsula)
REPTILES	
Lampropeltis getula sticticeps	Outer Banks Kingsnake
Nerodia sipedon williamengelsi	Carolina Watersnake
AMPHIBIANS	
Eurycea sp. 9	Sandhills Salamander
Necturus lewisi	Neuse River Waterdog
Plethodon amplus	Blue Ridge Gray-cheeked Salamander
Plethodon cheoah	Cheoah Bald Salamander
Plethodon meridianus	South Mountain Gray-cheeked Salamander
Plethodon yonahlossee pop. 1	Crevice Salamander
FRESHWATER FISHES	
Etheostoma perlongum	Waccamaw Darter
Fundulus cf. diaphanus	Lake Phelps Killifish
Fundulus waccamensis	Waccamaw Killifish
Lythrurus matutinus	Pinewoods Shiner
Menidia extensa	Waccamaw Silverside
Notropis mekistocholas	Cape Fear Shiner
Noturus furiosus	Carolina Madtom
MOLLUSKS – FRESHWATER BIVALVES	
Alasmidonta sp. 1	a bivalve (Upper Yadkin River system)
Alasmidonta sp. 2	a bivalve (Uwharries region)
Elliptio marsupiobesa	Cape Fear Spike
Elliptio steinstansana	Tar River Spinymussel
Elliptio sp. 2	File Spike
Elliptio sp. 4	a bivalve (Deep River system)
Lampsilis fullerkati	Waccamaw Fatmucket
Lampsilis sp. 2	Chameleon Lampmussel
Lampsilis sp. 3	a bivalve (Deep River system)
MOLLUSKS – FRESHWATER GASTROPODS	
Cincinnatia sp. 1	Waccamaw Siltsnail
Helisoma eucosmium	Greenfield Rams-horn
Planorbella magnifica	Magnificent Rams-horn
MOLLUSKS – TERRESTRIAL GASTROPODS	
Carychium arboreum	Tree Thorn
Catinella waccamawensis	Waccamaw Ambersnail
Fumonelix cherohalaensis	Rock-loving Covert

MOLLUSKS – TERRESTRIAL GASTROPODS	
Fumonelix orestes	Engraved Covert
Glyphyalinia clingmani	Fragile Glyph
Helicodiscus bonamicus	Spiral Coil
Paravitrea lacteodens	Ramp Cove Supercoil
Patera clarki nantahala	Noonday Globe
Triodopsis fulciden	Dwarf Threetooth
Triodopsis soelneri	Cape Fear Threetooth
ARACHNIDS	
Hypochilus coylei	a lampshade weaver
Hypochilus sheari	a lampshade weaver
Nesticus bishopi	a cave cobweb spider
Nesticus brimleyi	a cave cobweb spider
Nesticus carolinensis	Linville Caverns Spider
Nesticus cooperi	Lost Nantahala Cave Spider
Nesticus crosbyi	a cave cobweb spider
Nesticus nasicus	a cave cobweb spider
Nesticus sheari	a cave cobweb spider
Nesticus silvanus	a cave cobweb spider
Nesticus sp. 2	a cave cobweb spider
CRUSTACEANS	
Caecidotea carolinensis	Bennett's Mill Cave Water Slater
Cambarus brimleyorum	Valley River Crayfish
Cambarus catagius	Greensboro Burrowing Crayfish
Cambarus davidi	Carolina Ladle Crayfish
Cambarus eeseeohensis	Grandfather Mountain Crayfish
Cambarus hystricosus	Sandhills Spiny Crayfish
Cambarus johni	Carolina Foothills Crayfish
Cambarus lenati	Broad River Stream Crayfish
Cambarus reburrus	French Broad River Crayfish
Cambarus tuckasegee	Tuckasegee Stream Crayfish
Dactylocythere chelomata	Cherokee Crayfish Ostracod
Dactylocythere isabelae	Catawba Crayfish Octracod
Dactylocythere peedeeensis	Pee Dee Crayfish Ostracod
Dactylocythere prinsi	Whitewater Crayfish Ostracod
Diacyclops jeanneli putei	Carolina Well Diacyclops
Harpagocythere baileyi	Highlands Crayfish Ostracod
Procambarus medialis	Pamlico Crayfish
Procambarus plumimanus	Croatan Crayfish
Skistodiaptomus carolinensis	Carolina Skistodiaptomus
Stygobromus carolinensis	Yancy Sideswimmer
Waltoncythere acuta	Transylvania Crayfish Ostracod
INSECTS – MAYFLIES	
Maccaffertium wudigeum	Wilson Creek "Stenonema"

INSECTS - STONEFLIES	
Haploperla fleeki	Piedmont Sallfly
Haploperla parkeri	Parker Sallfly
Perlesta bjostadi	Anomalus Stone
Perlesta leathermani	Sandhills Stone
INSECTS – CADDISFLIES	
Ceraclea cama	a longhorned caddisfly
Ceraclea joannae	a caddisfly
Nectopsyche waccamawensis	Waccamaw White Miller
Oecetis sp. D	a caddisfly
Rhyacophila accola	a caddisfly
INSECTS – FLIES	
Eulonchus marialiciae	Mary Alice's Small-headed Fly
INSECTS – BUTTERFLIES	
Atrytonopsis quinteri	Crystal Skipper
Neonympha mitchellii francisci	Saint Francis' Satyr
INSECTS - MOTHS	
Agrotis carolina	a dart moth
Hemipachnobia subporphyrea	Venus Flytrap Cutworm Moth
Meropleon diversicolor sullivani	an owlet moth
Schizura sp. 1	a prominent moth
INSECTS – GRASSHOPPERS AND KATYDIDS	
Melanoplus coreyi	a grasshopper
Melanoplus decorus	Decorated Spur-throat Grasshopper
Melanoplus mirus	Weldon Short-wing Grasshopper
Melanoplus nubilus	Nubile Short-wing Grasshopper
Melanoplus serrulatus	Nantahala Short-wing Grasshopper
Melanoplus sylvestris	a spur-throat grasshopper
INSECTS – BEETLES	
Trechus balsamensis	a ground beetle
Trechus carolinae	a ground beetle
Trechus luculentus luculentus	a ground beetle
Trechus luculentus unicoi	a ground beetle
Trechus michellensis	a ground beetle
Trechus novaculosus	a ground beetle
Trechus roanicus	a ground beetle
Trechus rosenbergi	a ground beetle
Trechus satanicus	a ground beetle
Trechus subtilis	a ground beetle
INSECTS – SPRINGTAILS	
Pseudosinella flatua	a cave obligate springtail
Pseudosinella gisini carolina	a cave obligate springtail
Pseudosinella vespera	a cave obligate springtail

This page intentionally left blank.

EXTIRPATED ANIMALS IN NORTH CAROLINA

This is a list of all taxa considered by state biologists and NCNHP to be extirpated (N.C. Rank of SX) in North Carolina. Those species with N.C. Status of E, T, SC, or SR are also included on the Rare List. NOTE: Quite a few species that might be gone from N.C. are included in the Rare and Watch Lists with an SH (=historic) rank, generally indicating that they have not been seen for over 20 years, but because of inadequate survey or other factors they may well still exist in the state or may be absent but expected to be found again in upcoming years.

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	NOTES
MAMMALS			
Bos bison	American Bison	G4	MP:open woodlands
Canis lupus	Gray Wolf	G4	MPS?C?: extensive forests, remote areas
Erethizon dorsatum	North American Porcupine	G5	M:high elevation hardwood forests**
Lepus americanus	Snowshoe Hare	G5	M:spruce-fir, other high elevation forests**
Martes pennanti	Fisher	G5	M:spruce-fir forests**
Puma concolor couguar	Eastern Cougar	G5THQ	MPC:extensive forests,remote areas
BIRDS			
Campephilus principalis	Ivory-billed Woodpecker	GH	C:extensive swamps, bottomlands with old-growth trees (one NC record)
Columbina passerina	Common Ground-dove	G5	T:dunes, sandy fields, margins of maritime woods and thickets
Conuropsis carolinensis	Carolina Parakeet	GX	M?PSC:forests, esp. swamps and bottomlands
Ectopistes migratorius	Passenger Pigeon	GX	MPSC: forests (winter only)
Thryomanes bewickii altus	Appalachian Bewick's Wren	G5T2Q	M:woodland borders or openings, farmlands or brushy fields at high elevations
Vermivora bachmanii	Bachman's Warbler	GH	PC: bottomland forests, swamps

SCIENTIFIC NAME	COMMON NAME	GLOBAL RANK	NOTES
FRESHWATER FISHES			
Etheostoma jessiae	Blueside Darter	G4Q	M:streams in Mills River system (Henderson*)
Lepomis megalotis	Longear Sunfish	G5	M:French Broad drainage (Buncombe,* Haywood*)
Percina williamsi	Sickle Darter	G2	M: French Broad River (Buncombe*)
MOLLUSKS – FRESHWATER BIVALVES			
Alasmidonta robusta	Carolina Elktoe	G1Q	P:Long Creek in Mecklenburg*
Epioblasma florentina walkeri	Tan Riffleshell	G1T1	M:French Broad, other rivers (Buncombe*)
Medionidus conradicus	Cumberland Moccasinshell	G3G4	M:French Broad River (Buncombe*)
Pleuronaia dolabelloides	Slabside Pearlymussel	G2	M:Little Tenn. River (?) (Macon,*Swain*)
Ptychobranchus fasciolaris	Kidneyshell	G4G5	M:Tenn. Drainages
Quadrula pustulosa	Pimpleback	G5	M:Tenn. Drainages
Quadrula verrucosa	Pistolgrip	G4G5	M:New River near Virginia border (Alleghany,* Ashe*)
Toxolasma lividus	Purple Lilliput	G2	M:French Broad River
INSECTS – BUTTERFLIES			
Speyeria idalia	Regal Fritillary	G3	M:wet or dry meadows, bogs, open hilltops

* All recorded occurrences in the county are either extirpated, have not been found in recent surveys, or have not been surveyed recently enough to be confident they are still present. Unsurveyed occurrences are regarded as historical after 20-40 years, the number of years depending on the species and the amount of habitat alteration in the area. An asterisk should not be regarded as a definitive statement that the species is gone from the county but indicates that there is reason to doubt its continued existence.

**No positively documented records.

POTENTIAL NEW TO NORTH CAROLINA ANIMALS

The following list contains species of well-known animal groups that are not currently thought to occur in North Carolina or those animal species not currently known to breed in North Carolina but which are considered to have some possibility of being found here based on their established range, habitat preferences, or breeding behaviors. Most are species that occur in the adjacent states of South Carolina, Georgia, Tennessee, or Virginia in habitats (or drainages) at least relatively similar to habitats known to exist in North Carolina. The purpose of this list is to encourage and challenge field workers to find new state occurrences and new breeding records. This list should give field investigators an idea of some of the species that may be regular components of North Carolina's fauna. Species that might occur as single record accidentals, such as western species of birds or Gulf Coast butterflies, are generally not included. While some of these species may have relatively remote chances of being found in North Carolina, the likelihood of finding new state records is greatly increased by awareness of the possibilities and by species-directed searching. Our knowledge of many of our animal groups is still quite imperfect, especially invertebrate groups. Many natural areas are being destroyed before they can be investigated, and it can be assumed that a number of native species have been extirpated from North Carolina before they were ever documented as occurring in the state. Following each species is the North Carolina province in which the species is considered most likely to be found. Where possible, a description of the typical habitat of the species in the vicinity of North Carolina is also given. Sometimes, the nearest known occurrence(s) to North Carolina are also listed.

MAMMALS

There are very few terrestrial mammals that could be discovered for the first time in North Carolina. Three of them, North American Porcupine, Shoeshoe Hare, and Fisher, may have occurred in the mountains many decades or centuries ago, but reports are fuzzy or second-hand; they are included on the Extirpated List.

Sylvilagus aquaticus – Swamp Rabbit
M: swamps, floodplain forests; SC, GA; questionable specimen from Clay County, NC

BIRDS

The species below are all considered to be potential breeders in North Carolina; some may possibly be breeding already. All have been recorded from the state on numerous occasions; those marked by (+) are known to occur in summer in the state to an extent and probably are nesting, but conclusive evidence is lacking.

Accipiter gentilis – Northern Goshawk
M: extensive forests, mainly at high elevations; MD, WV, VA; a few summer records for the NC mountains

Ammodramus caudacutus – Saltmarsh Sparrow
T: salt or brackish marshes; VA; some references list NC in the breeding range - this is erroneous; there have been a few summer reports, but some may be erroneous or of late migrating individuals

Asio flammeus – Short-eared Owl
T: extensive brackish marshes; MD, VA formerly, and might still nest there; several summer records for the NC coastal marshes, and might have nested once in 2001

BIRDS continued

Asio otus – Long-eared Owl
M: conifers or mixed woods at high elevations in northern mountains; VA; one or two summer reports from the NC mountains, but without visual confirmation

Cistothorus platensis – Sedge Wren
T: brackish marshes; VA (northern portion of Chesapeake Bay); several summer records from NC, mainly in brackish marshes, but these might be of wandering birds or migrants

Contopus cooperi – Olive-sided Flycatcher +
M: [breeding records for TN side of Great Smoky Mountains NP]; no active nest has been found in NC

Empidonax flaviventris – Yellow-bellied Flycatcher
M: high elevation spruce-fir, usually where stunted or young; VA (Mt. Rogers); two summer reports from NC mountains

Geothlypis philadelphia – Mourning Warbler
M: thickets, brushy places, clearings; VA; several males singing on territory have been found in the higher mountains since the mid-1980s, but no strong evidence of nesting has been found in NC

Haemorhous purpureus – Purple Finch
M: spruce-fir forests; VA (Mt. Rogers); one or two summer records for the NC mountains

Melospiza georgiana – Swamp Sparrow
M: bogs at high elevation; VA; no summer reports for NC

Oreothlypis ruficapilla – Nashville Warbler
M: spruce-fir forests, mainly along margins or in young or stunted trees; VA, but also a report from Mt. Rogers; one summer report for NC

Parkesia noveboracensis – Northern Waterthrush
M: bogs where spruce-fir is present; VA, plus two reports from Mt. Rogers; no summer reports NC

REPTILES

Apalone mutica – Smooth Softshell
M: large rivers in the Tennessee drainage; TN

Graptemys pseudogeographica -- False Map Turtle
M: large rivers in the Tennessee drainage; TN

Opheodrys vernalis – Smooth Green Snake
MP: meadows, grassy marshes and fields; VA

AMPHIBIANS

Ambystoma jeffersonianum – Jefferson Salamander
M: low woods, bottomlands; VA

Desmognathus planiceps – Virginia Dusky Salamander
P: springs, seeps, streams; VA

Desmognathus welteri – Black Mountain Salamander
M: along streams in mesic forests; TN

Eurycea bislineata – Northern Two-lined Salamander
MP: springs, seeps, streams; VA; reported from the northern Piedmont of NC, but with no documentation yet available

AMPHIBIANS continued

Eurycea lucifuga – Cave Salamander
M: limestone caves and ledges; TN, VA
Gyrinophilus palleucus – Tennessee Cave Salamander
M: caves, in limestone areas; TN
Plethodon websteri – Webster's Salamander
P: moist forests with steep north-facing slopes; SC
Pseudobranchus striatus – Dwarf Siren
C: swamps, ponds, other sluggish freshwater habitats; SC
Urspelerpes brucei – Patch-nosed Salamander
M: margins of seeps or streams in rich forests; SC, GA

FRESHWATER FISHES

Many fish species are found just beyond the border of North Carolina but have not been found within the state despite significant survey efforts. Higher stream gradients near the northern and western borders partly explain this phenomenon. Reservoirs along the borders have also eliminated riverine habitat and impede migration. Rather than list the many common species that are found in counties adjacent to North Carolina, here we are listing those which, if found, would be included in the Rare Animal List.

Etheostoma cinereum – Ashy Darter
M: Tennessee drainages; TN
Etheostoma hopkinsi – Christmas Darter
M: Savannah drainage; SC
Hemitremia flammea – Flame Chub
M: Tennessee drainages; TN
Notropis ariommus – Popeye Shiner
M: Tennessee drainages; TN
Noturus baileyi – Smoky Madtom
M: Tennessee drainages; TN

INSECTS -- BUTTERFLIES

There are numerous butterfly species which presently known range extends south in the mountains only to Virginia. Some of these might occur in the northern mountain counties of North Carolina, particularly those not restricted to habitats rare or absent in the state (e.g., shale barrens or limestone outcrops).

Amblyscirtes belli – Bell's Roadside-Skipper
MP: wooded edges and openings, wooded creeks; host plant – wild oats (*Chasmanthium latifolium*); SC (Oconee and Pickens counties)
Boloria selene – Silver-bordered Fritillary
M: wet meadows, bogs, marshes; host plant – violets (*Viola*) and other species; VA
Brephidium isophthalma – Eastern Pygmy-Blue
T: tidal flats and marshes; host plant – glassworts (*Salicornia*), possibly saltwort (*Batis maritima*); SC

INSECTS – BUTTERFLIES continued

Calephelis borealis – Northern Metalmark

M: rocky areas near shale, serpentine, or limestone, usually near streams; host plant – round-leaved ragwort (*Senecio obovatus*), possibly fleabanes (*Erigeron*); VA

Callophrys polios – Hoary Elfin

M: sunny, dry slopes and other barren or rocky habitats; host plant – mainly bearberry (*Arctostaphylos uva-ursi*) [not in NC], possibly trailing-arbutus (*Epigaea repens*); VA

Chlosyne harrisii – Harris' Checkerspot

M: marshes, damp meadows, and other wet brushy places; host plant – flat-topped white aster (*Doellingeria umbellata*); WV.

Colias interior – Pink-edged Sulphur

M: high elevation areas with acidic soils, such as wood margins, openings, and heath balds; host plant – blueberries (*Vaccinium*); VA

Erynnis lucilius – Columbine Duskywing

M: rocky woods, ravines, and wooded edges; host plant – wild columbine (*Aquilegia canadensis*); VA; reported from NC in early 2000s, but report retracted, likely an identification error

Erynnis persius – Persius Duskywing

M: openings in cool forests, fields or bogs near woods; host plant – lupine (*Lupinus perennis*); VA

Euphyes conspicuus – Black Dash

CM: marshes, wet meadows, but rarely in bogs; host plant – sedges, mainly *Carex stricta*; VA

Speyeria atlantis – Atlantis Fritillary

M: cool, open woods, wooded streams, clearings; host plant – violets (*Viola*); VA

SIGNIFICANT 2018 REVISIONS TO THE ANIMAL LIST

Animal Taxa with Upgraded State Status (Increased Concern)

SCIENTIFIC NAME	COMMON NAME	PREVIOUS STATUS	NEW STATUS
MAMMALS			
Canis rufus	Red Wolf	SR	T
Myotis septentrionalis	Northern Long-eared Bat	SR	T

Raleigh, NC 27699-1601

www.ncnhp.org

This list is dynamic and is revised frequently as new data become available. New species are added to the list, and others are dropped from the list as appropriate. The list is published every two years. Further information may be obtained by contacting the North Carolina Natural Heritage Program, Department of Natural and Cultural Resources, 1651 MSC, Raleigh, NC 27699-1651; by contacting the North Carolina Wildlife Resources Commission, 1701 MSC, Raleigh, NC 27699-1701; or by contacting the North Carolina Plant Conservation Program, Department of Agriculture and Consumer Services, 1060 MSC, Raleigh, NC 27699-1060. Additional information on rare species, as well as a digital version of this list, can be obtained from the Natural Heritage Program's website at www.ncnhp.org.

ACKNOWLEDGMENTS

This list was originally compiled and published by Alan Weakley in 1991. It has been revised and updated over the years by Alan Weakley, Jame Amoroso, Misty Franklin Buchanan, and Laura Robinson. Special thanks are given to Misty Buchanan, Wesley Knapp, Richard LeBlond, Harry LeGrand, Suzanne Mason, Linda Rudd, Michael Schafale, Bruce Sorrie, and Alan Weakley for their involvement in the development of the list; to Jame Amoroso, Blanka Aguero, and Paul Davison for assistance with the bryophyte lists; and to Gary Perlmutter for assistance with the lichen list.

The list of people who have assisted in the preparation of the vascular plant list, provided information to the NCNHP on rare species occurrences, or otherwise contributed to our understanding of the rare flora of the state are too many to mention, but a partial list of recent contributors includes: Nell Allen, Herb Amyx, Pat Amyx, Rex Badgett, Chris Baranski, Moni Bates, Brady Beck, Sean Bloom, Alvin Braswell, Ken Bridle, Kevin Caldwell, David Campbell, Angie Carl, Owen Carson, Logan Clark, Crystal Cockman, Ed Corey, David Danly, Jamey Donaldson, David Dumond, Marshall Ellis, Bryan England, Matt Estep, Rob Evans, Laura Fogo, Sue Fruchey, John Fussell, Lisa Gaffney, Jeff Glitzenstein, Cheryl Gregory, Tom Govus, Janet Gray, Steve Hall, Karin Heiman, Tom Howard, Kimberly Israel, Alicia Jackson, Andrew Jenkins, Claudia Jolls, Gary Kauffman, Josh Kelly, Lisa Kelly, Jay Kranyik, Alexander Krings, Mike Kunz, Lenny Lampel, Ron Lance, Michael Lee, Merrill Lynch, Jeff Marcus, Jim Matthews, David McAdoo, Carol Ann McCormick, Hervey McIver, Patrick McMillan, William Moye, Carl Nordman, Shawn Oakley, James Padgett, Tom Patrick, Cary Paynter, Bob Peet, Derick Poindexter, Gerald Pottern, April Punsalan, Milo Pyne, Lloyd Raleigh, Johnny Randall, Duke Rankin, Evan Raskin, Rebekah Reid, Jerry Reynolds, Mark Rose, Tim Savidge, Ed Schwartzman, John Shaw, Dale Shew, Roger Shew, Alan Smith, Matt Smith, Jennifer Stanley, Lesley Starke, Dale Suiter, Megan Sutton, John Taggart, Craig Ten Brink, Samantha Tessel, Robert Thornhill, Mike Turner, Julie Tuttle, Chris Ulrey, Andy Walker, Wade Wall, Bobby Ward, Tom Wentworth, Brenda Wichmann, Chris Wilson, and participants in the N.C. Vegetation Survey.

INTRODUCTION

The North Carolina Natural Heritage Program (NCNHP) conducts and maintains an inventory of known locations of rare animals and plants in the state as part of its mission to support conservation of natural areas. The primary functions of this inventory list are its use 1) in determining priorities for protection of the state's most important natural areas and the plants and animals contained therein, 2) in determining priorities for inventory, and 3) by public agencies and private persons for environmental assessment and land management planning.

The NCNHP is charged under the Nature Preserves Act (G.S. 143B-135.250 to 143B-135.272) with compiling and maintaining information relevant to the protection of North Carolina's most important natural areas. NCNHP takes the lead role in North Carolina in the inventory of the state's natural diversity and the identification of important natural areas and rare species habitats. The list incorporates the most recent federal status designations determined by the U.S. Fish and Wildlife Service (USFWS) for all animal and plant taxa native to North Carolina. Prior to 2018, NCNHP included Federal Species of Concern (FSC) as a federal status. The FSC list was collectively maintained by the North Carolina offices of the USFWS, but FSC is not an official federal status. Under the guidance of the USFWS Region 4 office, the Raleigh Ecological Services office has revised their focus toward At-Risk Species and as such the NCNHP will no longer report FSC as a federal status. The At-Risk Species list is a dynamic list which includes species proposed for listing under the ESA, Candidate species, and species that have been petitioned for listing. For more information, please refer to the At-Risk Species Finder at https://www.fws.gov/southeast/finder/#/species/list.

This list also includes North Carolina legal status information from the N.C. Plant Conservation Program (NCPCP), a unit of the Department of Agriculture and Consumer Services and the agency responsible for the listing and protection of North Carolina's endangered and threatened plants, under provisions of the North Carolina Plant Protection and Conservation Act (N.C. General Statutes - Chapter 106 Article 19B). The NCPCP *List of North Carolina's Endangered, Threatened and Special Concern Plant Species* can be found on the website: http://www.ncagr.gov/plantindustry/plant/plantconserve/. The North Carolina Wildlife Resources Commission (NCWRC) is responsible for the listing and protection of the state's nongame species of mammals, birds, reptiles, amphibians, freshwater fishes, mollusks, and crustaceans, under N.C. General Statutes - Chapter 113 Article 25. The NCNHP, NCPCP, NCWRC, and USFWS work cooperatively to ensure the continued survival of all of North Carolina's rich flora and fauna. Over the past 25 years and continuing in the future, the advice and protection designations (for example, Endangered, Threatened, and Special Concern) of scientific councils and committees have been considered in the creation of the list.

Many species that lack formal legal protection are nonetheless imperiled in North Carolina. Therefore, NCNHP collects data on these species in addition to those classified under the three protection designations above and places them in two categories: Significantly Rare (SR) and Watch List (W). These species receive no special legal protection; rather, the designation is used to convey information about the species' rarity within the state. The tracking of SR species, along with Endangered, Threatened, and Special Concern species, plays a critical role in how NCNHP evaluates natural areas for their importance in conservation of the state's native biodiversity. These status categories are defined in this list under "N.C. Status."

NCNHP requests locality and population data on the species listed in this publication. For the most current information about the range of tracked species in North Carolina, visit www.ncnhp.org. Information, including maps and datasets, on animals, plants, and communities nationwide may be found on NatureServe Explorer (www.natureserve.org/).

NUMBER OF PLANT TAXA IN NORTH CAROLINA

Numbers in the table indicate number of taxa – generally species as well as valid unique varieties and subspecies – for each group and status. Because many taxa have both an N.C. and a U.S. status, totals cannot be added across a complete line. The total number of species in North Carolina is an estimate of the species that do occur or have occurred at one time in the state.

GROUP	APPROXIMATE NUMBER IN NORTH CAROLINA	N.C. STATUS				U.S. STATUS		
		E	T	SC	SR	E	T	C
Vascular Plants	4,351	157	141	111	290	17	10	1
Mosses	440	0	1	1	121	0	0	0
Liverworts	225	0	0	5	53	0	0	0
Hornworts	9	0	0	0	1	0	0	0
Lichens	977	1	1	2	18	1	0	0
Totals	6,002	158	143	119	483	18	10	1

LIST FORMAT

Species are grouped by major taxa. Plants are placed in five groups: Vascular Plants, Mosses, Liverworts, Hornworts, and Lichens. Within a given taxon, species are listed alphabetically by scientific name. The following information is presented for each species on the list; "status" indicates the degree of legal recognition (if any); "rank" is a numerical scale of the rarity of a species, regardless of legal protection.

Scientific Name. Taxonomy and nomenclature of vascular plants (dicots, monocots, gymnosperms, ferns, and fern allies) generally follows Weakley, A.S. *Flora of the Southern and Mid-Atlantic States. 2018.* University of North Carolina Herbarium (NCU), N.C. Botanical Garden, University of North Carolina, Chapel Hill, North Carolina (available online at http://www.herbarium.unc.edu/. Scientific authorities for names have been omitted to save space, but follow Weakley (2018 *draft*) and J.T. Kartesz's *A Synonymized Checklist and Atlas with Biological Attributes for the Vascular Flora of the United States, Canada, and Greenland. First Edition.* (In: Kartesz, J.T. and C.A. Meacham. *Synthesis of the North American Flora, Version 1.0.* North Carolina Botanical Garden, Chapel Hill, N.C. 1999).

Taxonomy and nomenclature of nonvascular plants (mosses, liverworts, hornworts, and lichens) follow *Bryophyte Flora of North America*, provisional publication, Missouri Botanical Garden (2001), http://www.mobot.org/plantscience/BFNA/bfnamenu.htm. L.E. Anderson, H.A. Crum, and W.R. Buck's *List of the Mosses of North America North of Mexico* (Bryologist 93: 448-499 [1990]); L.E. Anderson's *A Checklist of Sphagnum in North America North of Mexico* (Bryologist 93: 500-501 [1990]); R. Schuster's *The Hepaticae and Anthocerotae of North America East of the Hundredth Meridian* (1966, 1969, 1974, 1980, and 1992); M.L. Hicks' *Liverworts of the Mountains of North Carolina* (1982); M.L. Hicks' *Guide to the Liverworts of North Carolina* (1992); M.L. Hicks and P.G. Davidson's *Some Rare, Endemic, and Disjunct Liverworts in North Carolina* (Castanea 54: 255-261 [1989]); G.B. Perlmutter's *Lichen Checklist for North Carolina*, Evansia 22[2]: 51-77 [2005]), see http://lichenportal.org/portal/checklists/checklist.php?cl=1187&pid=103); Brodo, Sharnoff, and Sharnoff's *Lichens of North America* (2001); and Esslinger's *Lichen Checklist for North America* (Esslinger, T.A. 2015. *A Cumulative Checklist for the Lichen-forming Lichenicolous and Allied Fungi of the Continental United States and Canada*. first posted 1 December 1997, most recent version [#22] 29 January 2018) https://www.ndsu.edu/pubweb/~esslinge/chcklst/chcklst7.htm.

EXPLANATION OF STATUS AND RANK CODES

Status Codes

In North Carolina, Endangered, Threatened, and Special Concern species have legally protected status through the North Carolina Plant Conservation Program (NCPCP). The Natural Heritage Program maintains computerized records and GIS map files on Significantly Rare species, as well as species considered extirpated in the state. United States Status is designated by the U.S. Fish and Wildlife Service (USFWS) and the U.S. National Marine Fisheries Service (USNMFS) in accordance with the U.S. Endangered Species Act of 1973 (USESA), as amended. Plants and plant varieties, (including fungi and lichens), animal species and subspecies, and vertebrate populations are considered for Endangered or Threatened status according to the criteria established under the USESA. Proposals and determinations to add taxa or populations to the Lists of Endangered and Threatened Wildlife and Plants are published in the Federal Register. Additionally, the USFWS and the USNMFS periodically publish a Notice of Review or Notice of Reclassification in the Federal Register that presents an updated list of plant and animal taxa that are regarded as candidates or proposed for possible addition to the Lists of Endangered and Threatened Wildlife and Plants. Contact the Asheville or Raleigh Ecological Services Field Offices for more information.

N.C. STATUS – PLANTS

N.C. STATUS CODE	STATUS	DEFINITION
E	Endangered	Any native or once-native species of higher taxon of plant whose continued existence as a viable component of the state's flora is determined to be in jeopardy or any species of plant determined to be an Endangered species pursuant to the Endangered Species Act. (GS19B-106:202.12.)
T	Threatened	Any native or once-native resident species of plant which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range, or one that is designated as a Threatened species pursuant to the Endangered Species Act. (GS19B-106:202.12.)
SC-V	Special Concern-Vulnerable	Any species or higher taxon of plant which is likely to become a threatened species within the foreseeable future. (NCAC 02 NCAC 48F .0401.)
SC-H	Special Concern-Historical	Any species or higher taxon of plant that occurred in North Carolina at one time, but for which all known populations are currently considered to be either historical or extirpated. (NCAC 02 NCAC 48F .0401)
SR	Significantly Rare	This is a NCNHP designation. Any species which has not been listed by the NCPCP as an Endangered, Threatened, or Special Concern species, but which exists in the state (or recently occurred in the state) in small numbers (generally fewer than 100 statewide populations) and has been determined by the NCNHP to need monitoring. Significantly Rare species include species of historical occurrence with some likelihood of rediscovery in the state and species substantially reduced in numbers by habitat destruction, direct exploitation, or disease. Species considered extirpated in the state, with little likelihood of rediscovery, are given no N.C. status

N.C. STATUS CODE	STATUS	DEFINITION
		listed by the NCWRC or NCPCP as E, T, or SC).
SR-L	Significantly Rare-Limited	The range of the species is **limited** to North Carolina and adjacent states (endemic or near endemic). These are species that may have 20-50 populations in North Carolina, but fewer than 100 populations range-wide. The preponderance of their distribution is in North Carolina and their fate depends largely on conservation here.
SR-T	Significantly Rare-Throughout	The species is rare **throughout** its range (fewer than 100 populations total).
SR-D	Significantly Rare-Disjunct	The species is **disjunct** to North Carolina from a main range in a different part of the country or world.
SR-P	Significantly Rare-Peripheral	The species is at the **periphery** of its range in North Carolina. These species are generally more common somewhere else in their ranges, occurring in North Carolina peripherally to their main ranges, mostly in habitats that are unusual in North Carolina.
SR-O	Significantly Rare-Other	The range of the species is sporadic or cannot be described by the other Significantly Rare categories.
WL	Watch List	This is an NCNHP designation for any other species believed to be rare and of conservation concern in the state but not warranting active monitoring at this time.

U.S. STATUS – PLANTS

U.S. STATUS CODE	STATUS	DEFINITION
E	Endangered	A taxon that is in danger of extinction throughout all or a significant portion of its range (Public Law 93-205 87 Stat. 884).
T	Threatened	A taxon that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range (Public Law 93-205 87 Stat. 884).
C	Candidate	Taxa for which the USFWS has on file enough substantial information on biological vulnerability and threat(s) to support proposals to list them as endangered or threatened. Proposed rules have not yet been issued because this action is precluded at present by other listing activity. Development and publication of proposed rules on these taxa are anticipated. The USFWS encourages state and other federal agencies as well as other affected parties to give consideration to these taxa in environmental planning [Federal Register, 5 December 1996 Volume 61(235):64481]. Taxa formerly considered "Category 1" are now considered "Candidate."

Ranking System

Natural Heritage Programs and the NatureServe Network have developed a consistent method for evaluating the relative imperilment of both species and ecological communities. These assessments led to the designation of a conservation rank. These ranks provide an estimate of extinction risk. Conservation rank values have been assigned over the past 30 years by the NCNHP, NatureServe, and a large number of collaborators in government agencies, universities, natural history museums, botanical gardens, and other conservation organizations. This information has been developed primarily to help in guiding conservation and informing environmental planning and management.

Conservation ranks are either state (S) or global (G) and are based on a one-to-five scale, ranging from critically imperiled (S1 or G1) to demonstrably secure (S5 or G5). These assessments are based on the best available information, considering a variety of factors such as abundance, distribution, population trends, and threats. Global ranks apply to the species throughout its range. The system is widely used by nationwide agencies and organizations, as the best available scientific and objective assessment of a species' imperilment throughout its range.

A rank involving two numbers indicates uncertainty. For example, an S2S3 or a G2G3 rank indicates that the species may be S2 or S3 (or G2 or G3), but that existing data do not allow that determination to be made.

N.C. RANK – PLANTS

N.C. RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
S1	1-5	Critically Imperiled	Critically imperiled due to extreme rarity or some factor(s) making it especially vulnerable to extirpation (local extinction) from the state. Typically 5 or fewer occurrences or very few remaining individuals (<1,000).
S2	6-20	Imperiled	Imperiled due to rarity or some factor(s) making it very vulnerable to extirpation from the state. Typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000).
S3	21-100	Vulnerable	Vulnerable to extinction either because rare or uncommon, found only in a restricted range (even if abundant at some locations), or due to other factors making it vulnerable to extirpation. Typically 21 to 100 occurrences or between 3,000 to 10,000 individuals.
S4	101-1,000	Apparently Secure	Apparently secure and widespread, usually with more than 100 occurrences and more than 10,000 individuals.

N.C. RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
S5	1,001+	Secure	Common, widespread, and abundant. Essentially ineradicable under present conditions. Typically with considerably more than 100 occurrences and more than 10,000 individuals.
SH	0?	Historical	Of historical occurrence, with some expectation that it may be rediscovered. Its presence may not have been verified in the past 20 years. Upon verification of an extant occurrence, SH-ranked elements would typically receive an S1 rank. Note: an element is not automatically assigned an SH (or SX) rank if it has not been verified in the past 20 years; some effort must have been made to locate or relocate occurrences.
SX	0	Presumed Extirpated	Believed to be extirpated. Has not been located despite intensive searches of historical sites and other appropriate habitat, and virtually no likelihood that it will be rediscovered.
SU	Unknown	Unrankable	Currently unrankable due to lack of information or substantially conflicting information about status or trends. More information is needed.
SNR	Unknown	Not Ranked	Statewide rank not yet assessed.
SNA	N/A	Not Applicable	A conservation rank is not applicable because the element is not a suitable target for conservation for one of these reasons: • Hybrid – an interspecific hybrid without conservation value; • Exotic Origin – not native to North Carolina; • Accidental/Nonregular – outside usual range and not regularly found in North Carolina; • Not Confidently Present – never documented as present in NC; • Synonym – the taxon is not recognized by the NCNHP.
S_?	---	Uncertain	Denotes inexact or uncertain numeric rank.

GLOBAL STATUS - PLANTS

GLOBAL RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
G1	1-5	Critically Imperiled	Critically imperiled globally because of extreme rarity or because of some factor(s) making it especially vulnerable to extinction. Typically five or fewer occurrences or very few remaining individuals (<1,000) or acres (<2,000) or linear miles (<10).
G2	6-20	Imperiled	Imperiled globally because of rarity or because of some factor(s) making it very vulnerable to extinction. Typically 6 to 20 occurrences or few remaining individuals (1,000 to 3,000) or acres (2,000 to 10,000) or linear miles (10 to 50).
G3	21-100	Vulnerable	Vulnerable globally either because very rare throughout its range, found only in a restricted range (even if abundant at some locations), or other factors making it vulnerable to extinction. Typically 21 to 100 occurrences or between 3,000 and 10,000 individuals.
G4	101-1,000	Apparently Secure	Uncommon but not rare (although it may be rare in parts of its range, particularly on the periphery) and usually widespread. Apparently not vulnerable in most of its range, but possibly cause for long-term concern. Typically more than 100 occurrences and more than 10,000
G5	1,001+	Secure	Common, widespread, and abundant (although it may be rare in parts of its range, particularly on the periphery). Not vulnerable in most of its range. Typically with considerably more than 100 occurrences and more than 10,000 individuals.
GH	0?	Historical	Known only from historical occurrences, but with some expectation that it may be rediscovered. May still be extant; further searching is needed.
GX	0	Presumed Extinct	Believed to be extinct throughout its range (e.g., passenger pigeon) with virtually no likelihood that it will be rediscovered. Not located despite intensive searches of historical sites and other appropriate habitat.
GU	Unknown	Unrankable	Currently unrankable due to lack of information or due to substantially conflicting information about status or trends; need more information.
GNR	Unknown	Not Ranked	Global rank not yet assessed.
G_T_	---	Subspecies or Variety Rank	The rank of a taxonomic subspecies or variety. As an example, G4T1 would apply to a subspecies of a species with an overall rank of G4, but the subspecies warranting a rank of G1.
G_?	---	Uncertain	Denotes inexact or uncertain numeric rank.

GLOBAL RANK	NUMBER OF EXTANT POPULATIONS	DESIGNATION	DESCRIPTION
G_Q	---	Questionable Taxonomy	Taxonomic classification that may reduce conservation priority. Distinctiveness of this entity as a taxon at the current level is questionable. Resolution of this uncertainty may result in change from a species to a subspecies or inclusion of this taxon in another taxon, with the resulting element having a lower-priority conservation status rank.

Physiographic Province/Region. The provinces/regions in which the species is known to occur are indicated. This should not be regarded as the only province(s) or regions(s) of the state in which the species could occur; our knowledge of the flora of North Carolina is still very imperfect. The provinces are abbreviated as follows:

ABBREVIATION	PROVINCE/REGION	DESCRIPTION
M	Mountains (Blue Ridge)	All parts of North Carolina west of the foot of the Blue Ridge Escarpment.
P	Piedmont	All parts of North Carolina east of the foot of the Blue Ridge Escarpment and west of the Fall Line, including outlying "foothill" ranges, such as the Brushy, Uwharrie, Sauratown, and South mountains. This province is shallowly underlain by crystalline metamorphic, igneous, or (rarely) consolidated sedimentary rocks.
S	Sandhills	Portions of Cumberland, Harnett, Hoke, Lee, Moore, Richmond, Scotland, and Montgomery counties consisting mostly of deep aeolian sands of the Middendorf and Pinehurst formations (Cretaceous to Tertiary age). The Sandhills are really part of the coastal plain but are here distinguished because of their distinctive geomorphology and vegetation. Areas somewhat resembling the Sandhills region but occurring in other parts of the state (such as Carolina bay rims and aeolian or beach ridge deposits in the outer Coastal Plain) are considered part of the Coastal Plain Province.
C	Coastal Plain	All parts of North Carolina east of the Fall Line, but excluding the Sandhills region and Tidewater. Generally consisting of unconsolidated sands, silts, clays, and peats, though rarely shallowly underlain by consolidated coquina limestone ("marl").
T	Tidewater	Areas associated with tidal water, such as the ocean and barrier islands, sounds, estuaries, and mainland brackish or salt marshes.

Habitat. The known habitats are described; as with provinces, these should not be regarded as the only possible habitats of the species in the state.

Counties of Known Occurrence. Following the description of habitats is a listing of the known counties of occurrence in the NCNHP database. We request information about any new occurrences in the state. County names are followed by symbols (defined below) if the species has not been recently verified within the county.

*	All recorded occurrences in the county are either extirpated, have not been found in recent surveys, or have not been surveyed recently enough to be confident they are still present. Unsurveyed occurrences are regarded as historical after 20-40 years, the number of years depending on the species and the amount of habitat alteration in the area. An asterisk should not be regarded as a definitive statement that the species is gone from the county but indicates that its continued existence is uncertain.
+	Counties with obscure or undatable records.
?	There is some question as to the validity of the county report.

The botanical exploration of North Carolina is far from complete, and many additional county records will be found, generally (but not always) in proximity to counties listed. Most species that do not have county of occurrence information are new to the Rare List and county status information had not been compiled at the time of publication. Visit the Natural Heritage Program website for the most up-to-date county occurrence information: www.ncnhp.org.

NORTH CAROLINA PLANT RARE LIST

Vascular Plants

Acmella repens **SR-D** **S1** **G5T5**

Creeping Spotflower

CP: low wet areas and floating mats in alluvial forests and swamps (Columbus, Robeson, Wake)

Acmispon helleri **SC-V** **S3** **G5T3**

Carolina Birdfoot-trefoil

P: open woods over clay soils, roadsides (Cabarrus, Caswell, Catawba*, Davidson, Davie*, Granville, Iredell*, Mecklenburg, Moore, Person, Randolph, Rockingham, Rowan, Stanly, Union, Wake, Warren*)

Aconitum reclinatum **SR-T** **S3** **G3**

Trailing Wolfsbane

M: rich coves, seepage slopes, boulderfields, rocky stream banks, mainly associated with mafic rocks (Ashe, Avery, Buncombe, Caldwell*, Cherokee, Graham, Haywood, Henderson, Jackson, Macon*, Mitchell, Transylvania*, Watauga, Yancey)

Adiantum capillus-veneris **T** **S1** **G5**

Venus Hair Fern

C: coquina limestone (marl) outcrops, also adventitious on mortar of old stone walls in Wilmington, New Hanover County (Columbus)

Adlumia fungosa **SC-V** **S2** **G4**

Climbing Fumitory

M: coves and cliffs (Alleghany, Buncombe, Graham, Haywood, Henderson, Jackson*, Macon*, Madison, Mitchell, Swain, Yancey)

Aeschynomene virginica **T** **T** **S1** **G2**

Sensitive Jointvetch

TC: freshwater to slightly brackish tidal marshes and wet ditches (Beaufort, Craven, Hyde, Lenoir*)

Agalinis virgata **T** **S2** **G3G4Q**

Branched Gerardia

CS: savannas and depression pond shores (Brunswick, Carteret, Craven, Duplin*, New Hanover, Onslow, Pender, Scotland)

Agastache nepetoides **SR-P** **S1** **G5**

Yellow Giant-hyssop

P: oak–hickory forests, especially over mafic rocks (Buncombe, Caswell, Durham, Granville, Madison*, Moore, Orange, Polk, Stokes*, Surry*, Transylvania*, Wake*, Warren*)

Agrostis altissima **SR-T** **S2** **G4**

Tall Bentgrass

C: wet savannas (Brunswick, Carteret, Onslow, Pender)

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Agrostis mertensii	**E**		**S1**	**G5**
Arctic Bentgrass				
M: high elevation rocky summits and balds (Avery, Mitchell*, Yancey)				
Aletris lutea	**SR-P**		**S1**	**G4G5**
Yellow Colic-root				
C: pine savannas (Pender)				
Allium allegheniense	**SR-T**		**S1**	**G3?**
Allegheny Onion				
M: rock outcrops and woodlands over mafic rock at moderate to high elevations (Ashe, Caldwell)				
Allium keeverae	**T**		**S2**	**G2**
Keever's Onion				
P: thin soils around rock outcrops, receiving nutrient-rich seepage (Alexander, Wilkes)				
Allium sp. 1	**SR-L**		**S1S2**	**G1G2**
Savanna Onion				
C: wet savannas (Brunswick, Onslow, Pender)				
Alnus viridis ssp. crispa	**SC-V**		**S1**	**G5T5**
Green Alder				
M: balds (Avery, McDowell, Mitchell)				
Amaranthus pumilus	**T**	**T**	**S1**	**G2**
Seabeach Amaranth				
T: ocean beaches and island-end flats (Brunswick, Carteret, Currituck, Dare, Hyde*, New Hanover, Onslow, Pender)				
Amorpha confusa	**T**		**S3**	**G3T3**
Savanna Indigo-bush				
C: wet savannas (Bladen*, Brunswick, Columbus, New Hanover*)				
Amorpha georgiana	**E**		**S2**	**G3T2**
Georgia Indigo-bush				
CS: mesic to moist terraces along blackwater streams and ecotones between pocosins and savannas (Cumberland, Harnett, Hoke, Lee, Lenoir*, Moore, Pender, Richmond, Robeson*, Scotland)				
Amphicarpum muhlenbergianum	**E**		**S1**	**G4**
Florida Goober Grass				
C: clay-based Carolina bays (Hoke, Robeson, Scotland)				
Andropogon mohrii	**T**		**S2**	**G4?**
Bog Bluestem				
C: wet savannas (Brunswick, Carteret, Columbus, Craven, Onslow, Pender, Robeson*, Scotland, Washington*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Anemone berlandieri	**E**		**S2**	**G4?**
Southern Anemone				
P: thin soils around rock outcrops, usually on basic soil (Alexander, Anson, Mecklenburg*, Montgomery, Moore, Orange, Polk*, Randolph, Rowan, Rutherford, Stanly, Union)				
Anemone caroliniana	**E**		**S1**	**G5**
Prairie Anemone				
P: clayey woodlands over mafic rocks (Mecklenburg, Rutherford, Stanly*)				
Anthoxanthum hirtum	**SR-D**		**S1**	**G5**
Holy Grass				
M: bogs (Ashe, Macon, Watauga*)				
Anticlea glauca	**SR-P**		**S1**	**G5T4T5**
White Camas				
M: calcareous rock outcrops (Buncombe*, McDowell, Yancey)				
Arabis patens	**SR-T**		**S1**	**G3**
Spreading Rockcress				
M: thin soils around limestone and nutrient-rich seepage from amphibolite (Madison, Rutherford, Swain)				
Arabis pycnocarpa var. adpressipilis	**E**		**S1**	**G5T4Q**
Hairy Rockcress				
PM: thin soils around basic rock outcrops (Alexander, Buncombe)				
Arenaria lanuginosa var. lanuginosa	**SR-P**		**S1**	**G5T5**
Spreading Sandwort				
TC: maritime grasslands and forests, other sandy sites, shell middens, coquina limestone (marl) outcrops (Beaufort*, Brunswick*, Carteret*, Dare*, Jones, Onslow, Pender*)				
Arethusa bulbosa	**E**		**S1**	**G5**
Bog Rose				
MP: bogs (Alleghany, Ashe*, Avery, Forsyth*, Henderson*, Transylvania)				
Arisaema stewardsonii	**SR-P**		**S2**	**G5T5**
Bog Jack-in-the-pulpit				
M: bogs (Alleghany, Ashe, Avery, Catawba, Henderson, Jackson, Macon, McDowell, Mitchell, Rutherford, Transylvania, Watauga, Yancey)				
Aristida condensata	**T**		**S2**	**G4?**
Big Three-awn Grass				
C: bay rims with xeric pine-oak scrub (Bladen, Hoke*, New Hanover, Pender, Richmond*, Scotland*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Aristida simpliciflora	**E**		**S1S2**	**G3G4**
Chapman's Three-awn				
C: wet savannas (Brunswick, Columbus, Pender)				
Aristida tenuispica	**SR-P**		**S1**	**G5T5**
Hillsboro Three-awn Grass				
C: xeric sandhill scrub (New Hanover, Pender)				
Arnoglossum ovatum var. lanceolatum	**E**		**S2**	**G4G5TNR**
Savanna Indian-plantain				
C: wet savannas (Bladen*, Brunswick, Columbus, Jones, Onslow, Pender)				
Asarum rosei	**SR-L**		**S1**	**G1?**
Rose's Heartleaf				
(=*Hexastylis* sp. 3) P: moist acid forests under *Rhododendron maximum* (Caldwell)				
Asclepias cinerea	**SR-D**		**SH**	**G4?**
Carolina Milkweed				
C: pine savannas (Columbus*)				
Asclepias pedicellata	**SC-V**		**S3**	**G4**
Savanna Milkweed				
C: dry savannas and moist flatwoods (Bladen, Brunswick, Carteret, Columbus, New Hanover, Onslow, Pender, Sampson)				
Asclepias purpurascens	**SR-T**		**S1?**	**G5?**
Purple Milkweed				
PMC: swamps, bottomlands, edges of moist woods (Bertie*, Burke, Davidson, Durham, Hertford, Johnston, Moore, Pender, Person, Union, Wilkes)				
Asemeia grandiflora	**SR-P**		**S2**	**G5?**
Showy Milkwort				
SC: sandhills (Hoke, Richmond, Robeson, Scotland)				
Asplenium bradleyi	**SR-P**		**S2**	**G4**
Bradley's Spleenwort				
PM: acidic rock outcrops and cliffs (Burke, Cleveland*, Gaston, McDowell, Orange, Polk, Rutherford, Stokes)				
Asplenium heteroresiliens	**E**		**S2**	**G2**
Carolina Spleenwort				
C: coquina limestone outcrops (Bladen, Craven, Jones, Onslow*)				
Asplenium monanthes	**E**		**S1**	**G4**
Single-sorus Spleenwort				
M: outcrops near waterfalls in escarpment gorges (Jackson, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Asplenium pinnatifidum	**SR-P**		**S2**	**G4**
Lobed Spleenwort				
PM: acidic rock outcrops and cliffs (Caldwell*, Henderson, Macon, Madison, Polk, Rutherford, Transylvania, Wilkes)				
Asplenium ruta-muraria var. cryptolepis	**SC-V**		**S1**	**G5T5**
American Wall-rue				
M: limestone outcrops (Burke, Madison, McDowell)				
Astragalus michauxii	**SC-V**		**S3**	**G3**
Sandhills Milk-vetch				
SC: dry to xeric longleaf pine-oak woodlands and river-deposited sandhills (Bladen, Cumberland, Harnett, Hoke, Moore, New Hanover*, Pender, Richmond, Robeson*, Sampson, Scotland)				
Athyrium angustum	**SR-P**		**S1**	**G5T5**
Northern Lady Fern				
M: rock outcrops and forests at high elevations (Avery)				
Baccharis glomeruliflora	**SC-H**		**S1**	**G4**
Silverling				
T: shrubby areas on margins of brackish marshes (Brunswick, New Hanover*, Pender)				
Bacopa caroliniana	**T**		**S1**	**G4G5**
Blue Water-hyssop				
C: Shallow ponds, marshes, natural lakes, and tidal creeks (Bladen, Brunswick, Columbus, New Hanover, Onslow, Pender)				
Bacopa innominata	**SC-H**		**SH**	**G3G5**
Tropical Water-hyssop				
C: tidal freshwater marshes (Chowan*, New Hanover*, Pender*)				
Bacopa rotundifolia	**SR-D**		**S1**	**G5**
Round-leaf Water-hyssop				
C: natural lakes (Hyde*, Pender)				
Balduina atropurpurea	**E**		**S1**	**G2**
Purple Honeycomb-head				
C: savannas (Bladen, Brunswick*)				
Baptisia aberrans	**E**		**S2**	**G5T2**
Prairie Blue Wild Indigo				
P: glades and open forests on basic soils (Cabarrus*, Caswell, Durham, Granville, Montgomery, Orange*, Person*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Baptisia alba	**T**		**S2**	**G5**
Thick-pod White Wild Indigo				
PCS: open woodlands, clearings (Anson, Cabarrus, Davidson, Johnston, Montgomery, Randolph, Stanly, Union)				
Baptisia bracteata	**SC-H**		**SH**	**G4G5T4?**
Creamy Wild Indigo				
P: open woodlands (McDowell*)				
Berberis canadensis	**SC-V**		**S2**	**G3G4**
American Barberry				
PM: open forests and glades on basic soils (Alamance*, Alexander*, Buncombe*, Catawba, Durham, Granville, Guilford*, Haywood*, Iredell*, Macon, Madison, McDowell, Montgomery, Orange*, Person*, Randolph*, Rockingham, Rutherford, Swain*, Transylvania*)				
Betula cordifolia	**SC-V**		**S1**	**G5T5**
Mountain Paper Birch				
M: high elevation forests and landslide scars (Orange, Yancey)				
Bidens trichosperma	**SR-P**		**S1**	**G5?**
Crowned Beggar-ticks				
CT: brackish marshes (Beaufort*, Chowan*, Craven*, Dare, Tyrrell*)				
Boechera missouriensis	**SC-V**		**S1S2**	**G5**
Missouri Rockcress				
P: thin soils around basic rock outcrops (Anson, Madison, Stanly, Union)				
Boltonia asteroides var. glastifolia	**SR-O**		**S2**	**G5TNR**
White Doll's-daisy				
CS: clay-based Carolina bays, marshes, savannas (Brunswick, Camden*, Columbus, Hoke, New Hanover, Robeson, Scotland)				
Botrychium lanceolatum var. angustisegmentum	**SR-P**		**S1**	**G5T4**
Lance-leaf Moonwort				
MP: cove forests (Burke, Macon, McDowell)				
Botrychium matricariifolium	**SR-P**		**S1**	**G5**
Daisy-leaf Moonwort				
MP: cove forests (Avery, Burke, Haywood, Jackson, Mitchell, Swain, Yancey)				
Botrychium simplex var. simplex	**SR-P**		**S2**	**G5T3T4**
Least Moonwort				
M: open, grassy sites (Haywood, Jackson, Mitchell, Transylvania)

Bouteloua curtipendula var. curtipendula	**SR-P**		**S1**	**G5T5**
Sideoats Grama				
M: dry rocky slopes and bluffs (Swain)				
Brachyelytrum aristosum	**SR-P**		**S3**	**G5**
Northern Shorthusk				
M: northern hardwood forests (Ashe, Avery, Buncombe, Caldwell, Clay, Graham, Haywood, Henderson*, Jackson, Macon, Mitchell, Swain, Transylvania, Watauga)				
Bromus ciliatus	**SR-P**		**S1**	**G5**
Fringed Brome				
M: moist areas near high elevation grassy balds (Alexander, Ashe, Buncombe, Haywood, Henderson, Mitchell*, Transylvania, Watauga)				
Bromus latiglumis	**SR-P**		**S1**	**G5**
Riverbank Brome				
M: river floodplains (Alleghany, Ashe, Jackson, Swain)				
Buchnera americana	**E**		**S1**	**G5?**
American Bluehearts				
MPS: glades, open forests, streambanks, probably primarily over mafic or calcareous rocks (Cherokee, Cumberland*, Durham*, Harnett*, Orange*, Polk*, Rowan, Sampson*, Union, Wake*)				
Buckleya distichophylla	**T**		**S2**	**G3**
Piratebush				
M: bluffs, dry slopes, forests on lower slopes (Buncombe, Haywood, Macon, Madison, Mitchell, Swain*)				
Bulbostylis warei	**SC-H**		**SH**	**G3G4**
Ware's Hair Sedge				
T: interdunes, riverine sandhills, and other xeric sand deposits (Brunswick*)				
Calamagrostis cainii	**E**		**S1**	**G1**
Cain's Reedgrass				
M: high elevation rocky summits (Buncombe, Yancey)				
Calamagrostis canadensis var. canadensis	**SR-P**		**S1**	**G5T5**
Canada Reed Grass				
M: bogs and moist areas around high elevation rock outcrops (Alleghany, Ashe, Avery, Haywood*, Macon, Mitchell*, Watauga*)				
Calamagrostis porteri ssp. porteri	**SR-P**		**S2?**	**G4T4**
Porter's Reed Grass				
M: middle elevation ridgetop forests (Cherokee, Clay, Graham, Jackson, Macon, Mitchell, Rutherford, Surry, Transylvania*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Callitriche terrestris	**SR-O**		**S2?**	**G5**
Terrestrial Water-starwort				
CP: low, wet places (Granville, Moore, Richmond, Stanly, Union)				
Calopogon multiflorus	**E**		**S1**	**G2G3**
Many-flower Grass-pink				
C: savannas (Brunswick, Carteret, Onslow, Pender)				
Caltha palustris var. palustris	**E**		**S1**	**G5T5**
Marsh-marigold				
M: boggy sites (Alleghany, Ashe, Avery*, Buncombe*, Madison*, Watauga, Yancey*)				
Camassia scilloides	**T**		**S1**	**G4G5**
Wild Hyacinth				
CP: rich levees, slopes, and bottomlands (Alleghany, Franklin, Northampton, Vance)				
Campanula aparinoides var. aparinoides	**SR-P**		**S2**	**G5TNR**
Marsh Bellflower				
M: bogs and other wet, open sites (Alleghany, Ashe, Avery, Burke, Cherokee, Clay*, Haywood, Henderson, Jackson, Macon, Mitchell*, Transylvania, Wilkes*, Yancey)				
Campanula rotundifolia	**E**		**S1**	**G5**
Bluebells				
M: high elevation rocky summits (Ashe)				
Cardamine clematitis	**SR-T**		**S2S3**	**G3**
Mountain Bittercress				
M: high elevation seeps, shaded outcrops, and streambanks (Avery, Buncombe, Burke, Caldwell, Clay, Graham, Haywood, Jackson, Macon, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Cardamine dissecta	**SC-V**		**S2**	**G4?**
Dissected Toothwort				
PM: rich woods, cove forests, bottomlands (Anson, Davidson, Durham, Guilford*, Mecklenburg, Montgomery, Randolph, Rowan*, Rutherford*, Union)				
Cardamine douglassii	**T**		**S2**	**G5**
Douglass's Bittercress				
P: bottomlands, rich lower slopes (Cumberland, Durham, Granville, Harnett, Hertford*, Northampton, Orange*, Wake)				
Cardamine longii	**SC-V**		**S2**	**G3?**
Long's Bittercress				
C: tidal marshes and tidal cypress-gum forests (Bladen, Columbus, Craven*, New Hanover, Onslow, Pender, Robeson, Washington)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cardamine micranthera	**E**	**E**	**S1**	**G2**
Small-anthered Bittercress				
P: seeps, streamside sandbars, and floodplain depressions (Forsyth*, Stokes)				
Cardamine rotundifolia	**T**		**S2**	**G4**
Mountain Watercress				
MP: seeps, banks of mountain brooks (Alleghany, Ashe, Mitchell, Stokes, Watauga, Yancey)				
Carex amplisquama	**SR-T**		**S2**	**G5T3**
Fort Mountain Sedge				
M: rich woods (Henderson, Polk, Transylvania)				
Carex arctata	**SR-P**		**S1**	**G5**
Black Sedge				
M: northern hardwood and spruce forests, bog edges (Ashe, Watauga)				
Carex argyrantha	**E**		**S1**	**G5**
Hay Sedge				
M: wet meadows (Ashe)				
Carex austrodeflexa	**SR-L**		**S2**	**G3G4**
Canebrake Sedge				
CS: streamhead pocosins and floodplains of small blackwater streams (Brunswick, Harnett, Hoke, Moore, Onslow, Pender, Richmond, Scotland)				
Carex baileyi	**SR-P**		**S2**	**G4**
Bailey's Sedge				
M: bogs and seeps (Alleghany, Ashe, Avery, Haywood, Henderson, Jackson, Mecklenburg*, Transylvania, Watauga)				
Carex barrattii	**SC-H**		**SH**	**G4**
Barratt's Sedge				
MS: seepage slopes (Harnett*, Henderson*)				
Carex basiantha	**SR-D**		**S1**	**G5**
Widow Sedge				
C: mesic forests, bottomlands, and lower slopes, over calcareous rock (Jones, Pender)				
Carex bushii	**SR-P**		**S1**	**G4**
Bush's Sedge				
PM: open wet areas (Ashe*, Cabarrus, Durham*, Gaston*, Granville*, Johnston*, Nash*, Orange, Rowan, Stanly)				
Carex buxbaumii	**SC-V**		**S2**	**G5**
Brown Bog Sedge				
MP: bogs and fens (Alleghany, Ashe, Avery, Forsyth*, Henderson, Watauga, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex calcifugens	**SR-T**		**S2?**	**G3**
Calcium-fleeing Sedge				
C: mesic deciduous forests and maritime woodlands (Brunswick, Carteret, Dare, Onslow)				
Carex canescens var. disjuncta	**SR-P**		**S2**	**G5T5**
Silvery Sedge				
CS: beaver ponds, old millponds, impoundments; usually on *Nyssa biflora* (Dare, Hoke, Hyde, Richmond, Scotland, Tyrrell)				
Carex careyana	**T**		**S1**	**G4G5**
Carey's Sedge				
M: rich cove forests (Jackson)				
Carex cherokeensis	**E**		**S1**	**G4G5**
Cherokee Sedge				
MP: floodplains (Bertie, Cherokee, Macon, Madison, Pender, Polk)				
Carex conoidea	**SC-V**		**S1**	**G5**
Cone-shaped Sedge				
MP: bogs (Alleghany, Ashe, Iredell*)				
Carex cristatella	**SC-H**		**S1**	**G5**
Small-crested Sedge				
M: grassy balds, bogs (Jackson*, Swain*, Yancey)				
Carex crus-corvi	**SR-P**		**S1**	**G5**
Crowfoot Sedge				
C: swamp forests (Bertie, Bladen, Columbus, Craven, Currituck, Durham, Edgecombe*, Halifax, Johnston, Lenoir, Martin, Northampton, Pitt*, Wayne)				
Carex decomposita	**SC-V**		**S2**	**G3G4**
Cypress Knee Sedge				
C: beaver ponds, old millponds; often on Taxodium ascendens trunks and knees (Brunswick, Chowan, Cumberland, Gates, New Hanover*, Richmond, Scotland, Warren*)				
Carex deflexa	**SR-D**		**S1?**	**G5**
A Sedge				
M: high elevation seepy forests				
Carex eburnea	**T**		**S1**	**G5**
Bristle-leaf Sedge				
M: calcareous outcrops (Madison*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex emmonsii	**SR-O**		**S2**	**G5T5**
Emmons's Sedge				
CS: moist woods and stream banks (Columbus, Harnett*, Hoke, Johnston*, Jones, Moore, Northampton*, Onslow, Pender, Tyrrell, Washington, Wayne*)				
Carex exilis	**E**		**S2**	**G5**
Coastal Sedge				
S: seepage slopes, wet seepy powerlines (Cumberland, Harnett, Hoke, Moore*)				
Carex hitchcockiana	**SC-V**		**S1**	**G5**
Hitchcock's Sedge				
M: moist to dryish forests over calcareous or mafic rocks (Ashe, Buncombe, Jackson, Macon, McDowell)				
Carex hormathodes	**T**		**S1**	**G4G5**
A Sedge				
C: freshwater and slightly brackish tidal marshes (Currituck)				
Carex impressinervia	**SR-T**		**S2**	**G2**
Ravine Sedge				
CP: rich alluvial forests (Anson, Harnett, Montgomery, Stanly, Union)				
Carex jamesii	**SR-P**		**S2**	**G5**
James's Sedge				
PC: rich woods, especially over mafic rocks (Bertie, Caswell, Cumberland, Durham, Halifax, Harnett, Lee, Martin, Moore, Northampton)				
Carex lasiocarpa var. americana	**SR-P**		**S1**	**G5T5**
Slender Sedge				
M: high elevation fens over amphibolite (Ashe)				
Carex lupuliformis	**SR-P**		**S1**	**G4**
False Hop Sedge				
CP: moist bottomlands, especially in calcareous or mafic areas (Bertie, Brunswick, Craven*, Forsyth*, Jones, Moore, Sampson, Tyrrell)				
Carex lutea	**E**	**E**	**S2**	**G2**
Golden Sedge				
C: ecotones between very wet clay savannas and swamp forests (Onslow, Pender)				
Carex meadii	**SR-P**		**S1**	**G4G5**
Mead's Sedge				
P: low wet places over diabase (Durham*, Granville, Macon, Wake*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex molestiformis	**SR-D**		**S1**	**G4**
Ozark Plateau Sedge				
M: Bottomland forests (Alleghany)				
Carex oligocarpa	**T**		**S1**	**G4G5**
Rich-woods Sedge				
CM: rich woods, mostly over calcareous or mafic rocks (Carteret)				
Carex oligosperma	**E**		**S1**	**G5**
Few-seeded Sedge				
M: seeps and bogs (Avery, Mitchell, Watauga)				
Carex pedunculata var. pedunculata	**SC-V**		**S2**	**G5**
Longstalk Sedge				
M: rich cove forests (Buncombe, Henderson, Polk, Transylvania)				
Carex projecta	**SR-P**		**S1**	**G5**
Necklace Sedge				
CMP: bogs, marshes, swamps, brownwater floodplain forests and openings (Avery, Cherokee, Cumberland*, Iredell*, Lee, Madison, Mecklenburg, Mitchell, Swain*, Transylvania, Wilkes)				
Carex purpurifera	**SC-V**		**S3**	**G4?**
Purple Sedge				
M: low elevation, rich forests over limestone or marble (Cherokee, Clay, Graham, Macon, Swain)				
Carex radfordii	**T**		**S1**	**G3**
Radford's Sedge				
M: rich cove forests in the Blue Ridge escarpment region (Jackson, Polk, Transylvania)				
Carex reniformis	**T**		**S1**	**G4?**
Kidney Sedge				
CP: swamps, open wet areas (Bladen, Johnston*, Pender, Sampson, Wake*)				
Carex roanensis	**SR-T**		**S2**	**G2G3**
Roan Sedge				
M: forests (Ashe, Avery, Buncombe, Haywood, Madison*, McDowell, Mitchell, Transylvania, Watauga, Yancey)				
Carex socialis	**SR-P**		**S1**	**G4**
Social Sedge				
C: streambeds and riverbanks (Bladen, Brunswick, Columbus, Cumberland, Pender)				
Carex sp. 2	**SR-T**		**S1**	**G1**
Fen Sedge				
M: seepage over mafic or ultramafic rocks (Alleghany)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex superata	**SR-T**		**S1?**	**G4?**
Limestone Forest Sedge				
P: Mesic Hardwood Forests (Anson)				
Carex tenax	**E**		**S1**	**G5?**
Wire Sedge				
CS: xeric sandhills (Moore, Wayne*)				
Carex trichocarpa	**SR-P**		**S1**	**G4**
Hairy-fruit Sedge				
M: marshy bogs (Alleghany, Ashe*, Haywood*)				
Carex trisperma	**E**		**S1**	**G5**
Three-seeded Sedge				
M: bogs, wet forests at high elevations (Ashe, Avery, Buncombe*, Mitchell*, Swain*, Watauga)				
Carex utriculata	**SR-P**		**S1**	**G5**
Beaked Sedge				
M: wet meadows (Alleghany, Henderson)				
Carex verrucosa	**SR-P**		**S2**	**G4**
Warty Sedge				
CS: savannas and pinelands (Beaufort*, Brunswick, Columbus*, Cumberland, Dare, Hoke, New Hanover*, Onslow, Pender, Robeson, Scotland)				
Carex vesicaria	**SR-P**		**S1**	**G5**
Inflated Sedge				
M: bogs (Alleghany, Ashe, Avery, Dare)				
Carex vestita	**SC-H**		**S1**	**G5**
Velvet Sedge				
P: low woods (Chatham*, Durham*, Polk)				
Carya laciniosa	**T**		**S1**	**G5**
Big Shellbark Hickory				
PC: brownwater river levees (Bertie, Durham, Halifax, Iredell)				
Carya myristiciformis	**E**		**S1**	**G4**
Nutmeg Hickory				
C: wet marl forests (Brunswick, Pender)				
Caulophyllum giganteum	**SR-P**		**S1**	**G4G5**
Northern Blue Cohosh				
M: cove forests (Alleghany, Ashe, Graham)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Celastrus scandens	**E**		**S2?**	**G5**
American Bittersweet				
MP: cove forests and rich woods (Buncombe, Burke, Caswell, Cherokee, Cleveland, Graham, Haywood*, Henderson, Jackson, Macon, Madison*, McDowell, Mitchell*, Randolph*, Rutherford, Surry, Swain*, Watauga*, Wilkes, Yancey*)				
Ceratophyllum australe	**SR-P**		**S1**	**G5TNR**
Southern Hornwort				
CT: pools in maritime forests, possibly other natural depression wetlands (Carteret*, Chowan)				
Chamerion platyphyllum	**E**		**S1**	**G5T5**
Fireweed				
M: grassy balds, roadsides, disturbed areas (Alleghany, Avery, Caldwell, Haywood, Mitchell, Watauga, Yancey*)				
Chasmanthium nitidum	**T**		**S1**	**G3G4**
A Spanglegrass				
C: blackwater bottomlands over marl (Pender)				
Chelone cuthbertii	**SC-V**		**S3**	**G3**
Cuthbert's Turtlehead				
MPC: bogs (Alleghany, Ashe, Avery, Burke, Catawba, Cumberland, Henderson, Jackson, Macon, Madison, McDowell, Stokes, Swain, Transylvania, Watauga, Wayne, Yancey)				
Chelone obliqua	**SR-T**		**S2**	**G4**
Red Turtlehead				
CM: swamp forests, bogs, wet places (Ashe, Burke, Gates, Graham, Hertford*, Jackson, McDowell, Rutherford, Swain, Transylvania, Watauga)				
Chenopodium foggii	**SR-T**		**SH**	**G2G3**
Fogg's Goosefoot				
M: rocky, mountain slopes (Haywood*)				
Chenopodium simplex	**T**		**S1**	**G5**
Giant-seed Goosefoot				
M: shaded soil at bases of cliffs (Alleghany, Ashe*, Jackson)				
Chrysoma pauciflosculosa	**E**		**S1**	**G4G5**
Woody Goldenrod				
C: riverine sand ridges and xeric pine-oak scrub (Columbus, Cumberland, Robeson)				
Cirsium carolinianum	**E**		**S2**	**G5**
Carolina Thistle				
P: forests and disturbed areas, mostly on basic soils (Burke, Cabarrus*, Granville, Mecklenburg, Montgomery, Onslow, Rowan, Rutherford, Wake*, Wilkes*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cirsium lecontei	**SC-V**		**S2**	**G3**
Leconte's Thistle				
C: savannas (Bladen*, Brunswick, Carteret, Columbus, Craven, Onslow, Pender, Robeson*)				
Cirsium nuttallii	**SR-P**		**S1**	**G5**
Nuttall's Thistle				
C: pine savannas, roadsides, pastures (Columbus, Pender)				
Cladium mariscoides	**SR-O**		**S3**	**G5**
Twig-rush				
CSMT: bogs, fens, brackish marshes, sandhill seepage bogs (Alleghany, Ashe, Camden, Carteret, Columbus, Craven*, Cumberland, Currituck, Dare, Harnett, Hoke, Moore, New Hanover, Onslow, Pender, Watauga, Yancey)				
Clematis catesbyana	**SR-P**		**S2**	**G4G5**
Coastal Virgin's-bower				
TCM: dunes, edges of maritime forests, or over dolomite (Carteret, Currituck*, Dare, Jones, McDowell, Onslow, Rutherford, Wake*)				
Clematis occidentalis var. occidentalis	**SC-V**		**S1**	**G5T5**
Mountain Clematis				
M: montane oak forests and northern hardwood forests (Ashe, Buncombe)				
Clinopodium georgianum	**E**		**S1**	**G5**
Georgia Calamint				
SC: rock ledges near blackwater streams and disturbed pine-oak uplands (Anson*, Brunswick, Pender, Richmond, Robeson*)				
Collinsonia tuberosa	**SC-V**		**S1**	**G3G4**
Piedmont Horsebalm				
PM: rich hardwood forests (Alamance*, Anson, Chatham, Davie, Guilford*, Henderson*, McDowell, Mecklenburg, Montgomery, Polk, Rutherford)				
Collinsonia verticillata	**SC-V**		**S2**	**G3G4**
Whorled Horsebalm				
PM: cove forests (Burke, Madison, Polk)				
Conioselinum chinense	**T**		**S1**	**G5**
Hemlock-parsley				
M: high elevation seepage slopes (Avery)				
Coptis trifolia var. groenlandica	**T**		**S1**	**G5T5**
Goldthread				
M: bogs and moist, mossy forests (Alleghany, Ashe)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Corallorhiza maculata var. maculata	**SR-P**		**S1**	**G5T5**
Spotted Coralroot				
M: northern hardwood forests (Buncombe*, Haywood*, Henderson*, Jackson*, Macon*, McDowell*, Transylvania, Watauga*, Yancey*)				
Corallorhiza wisteriana	**SR-O**		**S1**	**G5**
Spring Coral-root				
MPCT: nutrient-rich forests, especially over limestone, mafic rocks or shell rich sands (Buncombe, Carteret*, Catawba*, Cleveland, Davie*, Durham*, Graham*, Harnett, Jackson*, Macon*, Madison, McDowell, New Hanover, Orange*, Polk*, Rutherford, Surry*)				
Coreopsis aristulata	**SR-L**		**S1**	**G1**
Short-awned Coreopsis				
C: wet savanna with calcareous influence (Onslow, Pender)				
Coreopsis grandiflora var. grandiflora	**SR-O**		**S1**	**G5T4T5**
Large-flowered Tickseed				
M: acidic glades (Jackson, Macon)				
Coreopsis palustris	**SR-P**		**S1S2**	**G3G4Q**
Beadle's Coreopsis				
C: swamp forests and swamp edges (Beaufort*, Brunswick, Carteret, Columbus, Craven*, Duplin*, Jones*, Onslow, Pender, Pitt*)				
Cornus asperifolia	**E**		**S1**	**G4**
Roughleaf Dogwood				
C: wet marl forests (Onslow, Pender)				
Cornus racemosa	**SR-P**		**S1**	**G5**
Gray Dogwood				
P: moist soil in riparian zones, roadsides, and thickets (Caswell, Durham, Orange)				
Corydalis micrantha	**T**		**S1**	**G5T4**
Slender Corydalis				
PM: thin, circumneutral soils on rock outcrops or cliffs (Alexander, Carteret, Jackson*, Madison)				
Crataegus coccinea	**SR-P**		**S2?**	**G5**
Scarlet Hawthorn				
MP: deciduous forest understories, pastures, upland thickets (Alexander*, Alleghany*, Ashe)				
Crataegus munda	**SR-T**		**S2?**	**G3G5Q**
Batesburg Hawthorn				
C: xeric or subxeric forests, scrublands, disturbed woodlands (Bladen, Cumberland*, Sampson, Wake)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Crataegus pallens	**SR-T**		**S1S2**	**G1G2**
Pale Hawthorn				
M: subxeric forests, slopes, rock outcrops, especially over mafic or calcareous substrates (Buncombe)				
Crataegus senta	**SR-T**		**S1?**	**G2**
A Hawthorn				
CM: upland hills, disturbed forests, pastures (Buncombe*)				
Crataegus succulenta	**SR-P**		**S1S2**	**G5**
Fleshy Hawthorn				
M: high elevation rocky summits, mesic forests, pastures, especially over basic soil or mafic substrate (Ashe, Buncombe, Orange*, Stokes)				
Crinum americanum var. americanum	**SC-H**		**SH**	**G5T5**
Swamp-lily				
C: tidal swamp forests, tidal marshes (New Hanover*)				
Crocanthemum bicknellii	**SC-V**		**S1**	**G5**
Plains Sunrose				
M: rock outcrops, glades, fens (Ashe, Buncombe, Haywood, Henderson, Jackson*, Macon*, Swain*, Transylvania, Yancey)				
Crocanthemum carolinianum	**E**		**S1**	**G4**
Carolina Sunrose				
CS: sandhills, pinelands, dry savannas (Brunswick, Carteret, Craven*, Cumberland*, Dare, Hoke, New Hanover, Onslow, Pender, Robeson, Wilson*)				
Crocanthemum corymbosum	**T**		**S1**	**G4G5**
Pinebarren Sunrose				
TC: maritime forests (Brunswick, Carteret, Dare)				
Crocanthemum georgianum	**E**		**S1**	**G4**
Georgia Sunrose				
TC: maritime forests (Brunswick, Carteret, Dare, Hyde, New Hanover)				
Crocanthemum nashii	**E**		**S1**	**G3?**
Florida Scrub Frostweed				
C: coastal fringe sandhill (Brunswick, New Hanover)				
Crocanthemum propinquum	**T**		**S1**	**G4**
Creeping Sunrose				
MP: rock outcrops, glades (Alleghany, Ashe, Avery*, Buncombe*, Clay, Forsyth, Haywood, Henderson*, Macon, Stokes, Transylvania*, Watauga, Wilkes*, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Crocanthemum rosmarinifolium	**T**		**S2**	**G4**
Rosemary Sunrose				
SC: dry clearings and roadsides within longleaf pine ecosystems (Hoke, Richmond, Scotland)				
Croton monanthogynus	**E**		**S1**	**G5**
Prairie-tea Croton				
M: calcareous rock outcrops (Madison)				
Cuscuta cephalanthi	**SR-T**		**S1**	**G5**
Buttonbush Dodder				
MP: on woody hosts (Alleghany)				
Cuscuta coryli	**SR-T**		**S1?**	**G5?**
Hazel Dodder				
CPM: on woody or herbaceous hosts (Burke, McDowell, Rutherford)				
Cyperus dentatus	**SC-H**		**SH**	**G4**
Toothed Flatsedge				
C: marshes (Brunswick*, Currituck*, Dare*)				
Cyperus granitophilus	**T**		**S2**	**G3G4Q**
Granite Flatsedge				
P: granite flatrocks, other rock outcrops (Alexander*, Anson, Forsyth*, Franklin, Granville, Rutherford, Wake, Yadkin*)				
Cyperus lecontei	**T**		**S2**	**G4?**
Leconte's Flatsedge				
C: limesink ponds (Brunswick, New Hanover*, Onslow)				
Cyperus tetragonus	**SC-V**		**S1**	**G4?**
Four-angled Flatsedge				
T: maritime forests and barrier island grasslands (Brunswick, Carteret, Dare, New Hanover*, Onslow, Pender)				
Cyperus virens	**SR-P**		**S1**	**G5**
Green Flatsedge				
C:marshes and ditches (Columbus, Hyde)				
Cypripedium parviflorum var. parviflorum	**SR-T**		**S1S2**	**G5T3T5**
Small Yellow Lady's-slipper				
M: upper slopes of rich high elevation forests (Buncombe, Clay, Graham, Henderson, Jackson, Macon)				
Cystopteris fragilis	**SR-P**		**S1**	**G5**
Fragile Fern				
M: high elevation cliffs (Ashe, Haywood, Jackson, Mitchell, Watauga)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cystopteris tennesseensis	**E**		**S1**	**G5**
Tennessee Bladder-fern				
CM: calcareous rock outcrops (Craven, Graham*, Jones, Onslow*)				
Cystopteris tenuis	**SR-P**		**S1**	**G5**
Upland Bladder-fern				
M: high elevation rocky summits, cliffs (Transylvania, Watauga)				
Dactylorhiza viridis	**E**		**S1**	**G5T5**
Long-bracted Frog Orchid				
MP: seeps in cove forests (Ashe, Avery*, Buncombe*, Forsyth*, Haywood*, Jackson*, Macon*, Watauga)				
Danthonia epilis	**SR-T**		**S3**	**G4**
Bog Oatgrass				
MS: seepage bogs, wet seepy powerlines (Burke, Cumberland, Harnett, Haywood, Henderson, Jackson, Macon, Montgomery, Moore, Richmond, Scotland, Transylvania)				
Delphinium exaltatum	**E**		**S2**	**G3**
Tall Larkspur				
MP: grassy balds, glades, woodlands, mostly over mafic rock (Alleghany, Ashe, Avery, Caswell, Durham, Gaston*, Granville*, Haywood, Jackson, McDowell, Mecklenburg*, Mitchell*, Person, Watauga)				
Dendrolycopodium dendroideum	**SR-P**		**S2**	**G5**
Prickly Ground-pine				
M: openings and balds (Ashe, Avery, Burke, Graham, Haywood, Henderson*, Jackson, Macon, Swain, Transylvania*)				
Dendrolycopodium hickeyi	**SR-P**		**S2?**	**G5**
Pennsylvania Ground-pine				
M: openings, balds, bog margins, and high elevation forests (Avery, Buncombe, Burke*, Haywood, Henderson, Jackson, Macon, Mitchell, Transylvania, Yancey)				
Deschampsia cespitosa ssp. glauca	**T**		**S1**	**G5T5**
Tufted Hairgrass				
M: olivine barrens, high elevation outcrops of mafic rock (Alleghany, Ashe, Avery, Clay, Mitchell)				
Desmodium fernaldii	**SR-P**		**S1**	**G4**
Fernald's Tick-trefoil				
SC: dry to mesic hardwood-pine woodlands (Brunswick*, Cumberland, Dare*, Duplin*, Edgecombe*, Gates*, Hoke, Jones*, Lenoir*, Martin*, Montgomery, Richmond, Scotland*, Washington*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Desmodium ochroleucum	**SC-H**		**SH**	**G2**
Creamy Tick-trefoil				
P: sandy or rocky woodland openings (Davie*, Orange*, Swain*)				
Desmodium sessilifolium	**SC-H**		**SH**	**G5**
Sessile Tick-trefoil				
P: open woodlands (Cabarrus*, Mecklenburg*)				
Diarrhena americana	**E**		**S1**	**G4G5**
Eastern Beakgrass				
M: rich cove forest (Graham, Jackson)				
Dicentra eximia	**SR-P**		**S3**	**G4**
Bleeding Heart				
MP: rock outcrops (Buncombe, Burke, Graham, Haywood, Henderson, Macon, Madison, McDowell, Mitchell, Rutherford, Swain, Transylvania, Watauga*, Yancey)				
Dichanthelium annulum	**SR-P**		**S1**	**G4**
Ringed Witch Grass				
CP: dry sandy or rocky open woods and borders of thickets (Alleghany, Chatham*, Clay*, Dare*, Davie*, Durham, Lee*, Mecklenburg*, Montgomery*, Orange*, Person*, Rowan*, Stanly, Stokes*, Wake*)				
Dichanthelium bicknellii	**SR-P**		**S2**	**G4?Q**
Bicknell's Witch Grass				
MP: open woods (Alexander, Alleghany, Ashe, Columbus, Granville, Jackson, Macon, Madison, Mitchell, Montgomery, Moore*, Rowan, Union, Yancey)				
Dichanthelium caerulescens	**E**		**S1**	**G2G3**
Blue Witch Grass				
C: maritime grasslands and wet savannas with a calcareous influence (Brunswick*, Carteret, Currituck, Dare, Hyde, Onslow, Pender)				
Dichanthelium cryptanthum	**SR-T**		**S2**	**G3G4Q**
Hidden-flowered Witchgrass				
C: wet streamhead pocosin openings, including utility clearings (Bladen, Brunswick, Carteret, Cumberland, Harnett, Hoke, Johnston*, Moore, New Hanover*, Onslow, Pender, Richmond, Wake*)				
Dichanthelium fusiforme	**SR-P**		**S1**	**G5?**
Spindle-fruited Witch Grass				
CSM: dry sandy pinelands and dry montane woodlands (Alexander, Beaufort, Bladen*, Brunswick, Columbus*, Dare, Gates, Hoke, Jones, Moore*, Onslow, Richmond*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Dichanthelium hirstii	**E**		**S1**	**G1**
Hirsts' Panic Grass				
C: cypress savannas (Onslow)				
Dichanthelium neuranthum	**SC-V**		**S1**	**G5T3**
Nerved Witch Grass				
T: maritime wet grasslands (Brunswick*, Carteret*, Dare, Hyde, New Hanover*, Union)				
Dichanthelium spretum	**SR-D**		**S1S2**	**G5**
Eaton's Witch Grass				
CP: wet sands and peats of bogs, savannas, meadows, and shores (Carteret, Craven, Onslow, Pender)				
Dichanthelium strigosum var. glabrescens	**SR-D**		**S1**	**G5T4T5**
Hairless Witch Grass				
C: sandy pinelands and hammocks (Onslow)				
Didiplis diandra	**SR-P**		**S1**	**G5**
Water Purslane				
CS: sluggish streams and ponds (Chowan*, Edgecombe*, Harnett*, Hertford*, Johnston, Moore*, Nash, Perquimans*, Richmond, Wake, Warren*)				
Didymoglossum petersii	**SR-T**		**S2**	**G4G5**
Dwarf Filmy-fern				
M: moist rocks in humid gorges (Graham, Jackson, Macon, Transylvania)				
Diervilla rivularis	**T**		**S1**	**G3**
Riverbank Bush-honeysuckle				
M: forests (Mitchell, Yancey)				
Dionaea muscipula	**SC-V**		**S2**	**G2**
Venus Flytrap				
CST: savannas, seepage bogs, pocosin edges (Beaufort, Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Duplin, Hoke, Jones, Lenoir*, Moore*, New Hanover, Onslow, Pamlico, Pender, Robeson*, Sampson)				
Diplachne maritima	**E**		**S1**	**G5T3T4**
Salt-meadow Grass				
CT: fresh to brackish tidal marshes (Brunswick, Currituck, Dare, Hyde, Tyrrell)				
Ditrysinia fruticosa	**SC-V**		**S2**	**G5**
Sebastian-bush				
C: swamp forests (Brunswick, Columbus, Pender*, Robeson)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Draba ramosissima	**SC-V**		**S2**	**G4**
Branching Draba				
MP: calcareous and mafic rock outcrops (Buncombe, Haywood, Jackson, Madison, Rutherford)				
Drosera filiformis	**SC-V**		**S2**	**G4**
Threadleaf Sundew				
C: depression ponds, wet borrow pits, and ditches in various habitats including savannas, riverine sand ridges, and bay rims (Bladen, Brunswick, Columbus, Duplin, New Hanover, Robeson, Sampson)				
Echinacea laevigata	**E**	**E**	**S1S2**	**G2G3**
Smooth Coneflower				
P: glades, woodlands, and open areas over mafic rocks (Durham, Granville, Mecklenburg, Montgomery*, Orange*, Rockingham*)				
Echinacea pallida	**SR-D**		**S1**	**G4**
Pale Coneflower				
P: mafic glades and barrens (Gaston*, Granville, McDowell*, Mecklenburg*, Richmond, Rutherford)				
Echinacea purpurea	**SC-V**		**S1**	**G4**
Purple Coneflower				
M: open woods and clearings (Alleghany, Ashe, Chatham, Graham, Jackson*, Madison, McDowell, Randolph, Rutherford*, Vance, Warren, Yadkin*)				
Eleocharis atropurpurea	**SR-D**		**S1**	**G4G5**
Purple Spikerush				
C: clay-based Carolina bays (Scotland*)				
Eleocharis cellulosa	**E**		**S2**	**G4G5**
Gulfcoast Spikerush				
CT: interdune ponds, brackish marshes & tidal freshwater marshes (Beaufort, Carteret, Dare, Hyde, Onslow*, Washington)				
Eleocharis elongata	**E**		**S1**	**G5?**
Florida Spikerush				
C: limesink ponds (Brunswick, Onslow)				
Eleocharis fallax	**SR-T**		**S1S2**	**G4G5**
Creeping Spikerush				
C: fresh to brackish tidal marshes (Carteret*, Currituck, Dare, Jones, Onslow)				
Eleocharis halophila	**SR-P**		**S1**	**G4Q**
Saltmarsh Spikerush				
CT: brackish and freshwater marshes (Dare, Hyde*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Eleocharis montevidensis	**SR-P**		**S1**	**G5**
Sand Spikerush				
CT: maritime wet grassland (Currituck*, Dare, Hyde, Onslow)				
Eleocharis parvula	**SR-D**		**S1**	**G5**
Little-spike Spikerush				
CT: brackish and fresh marshes (Brunswick, Carteret, Currituck, Dare, Hyde, Onslow, Tyrrell)				
Eleocharis robbinsii	**SC-V**		**S2S3**	**G4G5**
Robbins' Spikerush				
CS: limesink ponds, clay-based Carolina bays, peat-burn lakes, millponds, beaver ponds, artificial lakes (Bladen*, Brunswick, Carteret, Craven, Cumberland, Harnett, Hoke, Moore, New Hanover, Onslow, Sampson, Scotland, Washington)				
Eleocharis rostellata	**SR-O**		**S2**	**G5**
Beaked Spikerush				
CT: brackish marshes (Beaufort*, Brunswick, Camden, Carteret, Currituck, Dare, Hyde, Pamlico)				
Eleocharis vivipara	**E**		**S1**	**G5**
Viviparous Spikerush				
C: bogs and pools (Brunswick, Carteret, Hyde, Moore, New Hanover, Onslow, Pender, Tyrrell)				
Eleocharis wolfii	**SR-T**		**S1**	**G3G5**
Wolf's Spikerush				
P: oak flatwoods, prairies (Cabarrus)				
Elymus trachycaulus ssp. trachycaulus	**T**		**S1**	**G5T5**
Slender Wheatgrass				
M: olivine barrens (Clay)				
Elymus virginicus var. halophilus	**SC-V**		**S1**	**G5T5**
Terrell Grass				
C: brackish marshes, maritime forests and hammocks (Beaufort, Brunswick, Carteret, Craven, Hyde, Washington)				
Enemion biternatum	**SC-V**		**S2**	**G5**
Eastern Isopyrum				
PC: rich bottomlands, levees, and lower slopes (Caswell, Chatham*, Cumberland, Durham, Franklin, Granville, Halifax, Harnett, Lee, Northampton, Orange*, Person, Vance)				
Epidendrum magnoliae	**T**		**S1S2**	**G4**
Green Fly Orchid				
C: epiphytic on trees in blackwater river swamps (Bladen, Brunswick, Columbus, New Hanover, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Epilobium ciliatum ssp. ciliatum	**SR-P**		**S2**	**G5T5**
American Willow-herb				
M: seeps and bogs (Avery, Buncombe, Caldwell, Henderson, Jackson*, Macon, Madison, Mitchell*, Swain*, Watauga, Yancey*)				
Erigenia bulbosa	**SR-P**		**S1**	**G5**
Harbinger-of-spring				
MP: rich woods (Caswell, Graham)				
Eriocaulon aquaticum	**SC-V**		**S2**	**G5**
Seven-angled Pipewort				
CS: blackwater creeks, natural lakes, tidal freshwater marshes (Bladen*, Brunswick*, Columbus, Craven, Cumberland, Hoke, Moore, New Hanover, Perquimans*, Tyrrell, Washington)				
Eriocaulon parkeri	**T**		**S1**	**G3**
Estuary Pipewort				
C: natural lakes (Craven, Hyde, Tyrrell*)				
Eriocaulon texense	**E**		**S1**	**G4**
Texas Hatpins				
S: streamhead seepage ecotones and seepage slopes (Cumberland, Richmond)				
Eriogonum tomentosum	**SC-H**		**SH**	**G4G5**
Southern Wild-buckwheat				
C: sandhills (Bladen*)				
Eryngium aquaticum var. ravenelii	**SR-P**		**S1**	**G4T2T3**
Marsh Eryngo				
C: wet flatwoods with a calcareous influence, ditches (Pender)				
Erythrina herbacea	**E**		**S2**	**G5**
Coralbean				
TC: maritime forests (Brunswick, Carteret*, New Hanover)				
Eupatorium anomalum	**SR-T**		**S1?**	**G2G3**
Florida Thoroughwort				
C: wet savannas				
Eupatorium leptophyllum	**E**		**S2**	**G4G5**
Limesink Dog-fennel				
C: limesink ponds and clay-based Carolina bays (Brunswick, New Hanover, Robeson, Scotland)				
Eupatorium paludicola	**T**		**S1S2**	**G2**
Bay Boneset				
C: cypress savannas, clay-based bays, and small depressions ponds (Brunswick, Onslow, Scotland)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Eupatorium resinosum	**SR-O**		**S3**	**G3**
Pine Barren Boneset				
SC: seepage bogs, impoundments, shrub swamps, openings in streamhead pocosins (Bladen, Cumberland, Harnett, Hoke, Moore, Robeson, Sampson, Scotland)				
Eupatorium saltuense	**SR-L**		**S1?**	**G4**
Tall Boneset				
P: upland forests, woodland borders (Burke, Caswell*, Granville, McDowell, Person, Rutherford, Sampson, Warren)				
Euphorbia bombensis	**SR-T**		**S2?**	**G4G5**
Southern Seaside Spurge				
T: seabeaches (Brunswick, Carteret, Dare, Onslow)				
Euphorbia commutata	**T**		**S1**	**G5**
Cliff Spurge				
MP: thin soil around mafic or calcareous outcrops (Buncombe, Caswell*, Haywood, Rutherford)				
Euphorbia cordifolia	**T**		**S1**	**G5**
Heartleaf Sandmat				
CS: sandhills (Bladen, Richmond*, Wayne*)				
Euphorbia mercurialina	**SC-V**		**S2**	**G4**
Cumberland Spurge				
P: rich slopes over gabbro (Anson, Granville, Montgomery, Moore, Richmond)				
Euphorbia purpurea	**SR-T**		**S3**	**G3**
Glade Spurge				
M: forests, especially over mafic rock (Ashe, Buncombe, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell, Swain, Watauga*, Yancey)				
Eurybia mirabilis	**SR-T**		**S3**	**G3**
Piedmont Aster				
P: rich slopes and bottomlands (Anson, Macon*, Mecklenburg, Montgomery, Richmond, Stanly, Union)				
Eurybia spectabilis	**SR-O**		**S2?**	**G5**
Showy Aster				
CMP: pine barrens and woodland borders (Bertie*, Cabarrus*, Chatham, Chowan*, Craven*, Durham, Gates*, Granville, Hertford, Johnston, Jones, Lee*, Onslow, Pitt*, Polk, Robeson*, Rowan*, Stanly*)				
Eustachys glauca	**SR-P**		**SH**	**G4**
Saltmarsh Fingergrass				
T: salt marshes (New Hanover)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Filipendula rubra	**E**		**S1**	**G4G5**
Queen-of-the-prairie				
M: bogs, wet meadows (Buncombe, Haywood, Macon, Transylvania, Watauga, Yancey)				
Fimbristylis perpusilla	**T**		**S1**	**G2**
Harper's Fimbry				
C: drawdown zones of blackwater rivers (Brunswick, Columbus)				
Fleischmannia incarnata	**T**		**S2**	**G5**
Pink Thoroughwort				
PMC: rich woods and thin woodlands over diabase, calcareous rocks, other basic rocks, or rich alluvium (Alexander, Durham, Madison, Martin*, Polk, Richmond, Warren*, Wilkes)				
Fothergilla major	**SR-T**		**S3**	**G3**
Large Witch-alder				
MP: dry ridgetop or bluff forests, seepage wetlands, and Piedmont longleaf pine forests (Burke, Chatham, Gaston*, Harnett, Jackson, McDowell, Montgomery, Orange, Person, Polk*, Rutherford, Stanly, Stokes, Surry, Transylvania, Wake)				
Frasera caroliniensis	**SR-P**		**S2S3**	**G5**
Columbo				
M: deciduous forests on mafic soil (Cherokee, Clay, Graham, Macon)				
Gaillardia aestivalis var. aestivalis	**E**		**S2**	**G5TNR**
Sandhills Blanket-flower				
S: dry sandy roadsides, dry longleaf pine-oak uplands (Cumberland*, Hoke, Moore*, Richmond, Scotland)				
Galactia mollis	**T**		**S2**	**G4G5**
Soft Milk-pea				
CST: loamy sand depressions in longleaf pine-oak uplands (Brunswick*, Cumberland, Hoke, Richmond, Scotland, Wayne*)				
Gaylussacia brachycera	**E**		**S1**	**G3**
Box Huckleberry				
P: dry ridges and slopes (Durham)				
Gaylussacia nana	**E**		**S1**	**G4**
Confederate Huckleberry				
C: coastal fringe sandhill (New Hanover)				
Gaylussacia orocola	**SR-L**		**S1**	**G1**
Appalachian Dwarf Huckleberry				
M: bogs (Avery*, Buncombe*, Haywood*, Henderson, Macon*, Transylvania)

Gelsemium rankinii	**SC-V**		**S1S2**	**G5**
Swamp Jessamine				
C: floodplains of blackwater rivers and streams (Brunswick, Columbus, Cumberland*, New Hanover, Pender, Robeson)				
Gentiana alba	**SC-V**		**SH**	**G4**
Yellow Gentian				
M: habitat not known (Watauga*)				
Gentiana latidens	**SR-L**		**S1S2**	**G5T2T3**
Balsam Mountain Gentian				
M: moist open sites on rocky slopes (Haywood, Jackson, Macon*, Transylvania)				
Gentianopsis crinita	**T**		**S1**	**G5**
Fringed Gentian				
M: glades, serpentine barrens, open sites over basic rocks (Ashe, Clay, Macon*, Watauga)				
Geum aleppicum	**E**		**S1**	**G5**
Yellow Avens				
M: bogs (Avery, Swain*)				
Geum geniculatum	**SC-V**		**S1S2**	**G2**
Bent Avens				
M: high elevation forests, streambanks, seepage slopes (Avery, Caldwell, Mitchell, Watauga)				
Geum laciniatum	**E**		**S1**	**G5**
Rough Avens				
M: bogs and wet meadows (Avery, Wilkes*)				
Geum lobatum	**E**		**S1**	**G3**
Lobed Barren Strawberry				
M: streambanks and ravines (Jackson*, Transylvania)				
Geum radiatum	**E**	**E**	**S2**	**G2**
Spreading Avens				
M: high elevation rocky summits (Ashe, Avery, Buncombe, Burke*, Haywood, Mitchell, Transylvania, Watauga, Yancey)				
Gillenia stipulata	**T**		**S2**	**G5**
Indian Physic				
P: forests and open woods, mainly over mafic rocks (Cabarrus*, Chatham*, Davidson, Durham, Granville, Lee*, McDowell, Montgomery, Moore*, Orange*, Person, Stokes, Surry, Transylvania, Union, Wake)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Glyceria laxa	**SR-P**		**S2**	**G5**
Lax Mannagrass				
M: seeps (Alleghany, Ashe, Avery, Buncombe, Henderson, Jackson*, Macon, Transylvania)				
Glyceria nubigena	**SR-L**		**S2**	**G2G3**
Smoky Mountain Mannagrass				
M: high elevation seeps (Graham, Haywood, Jackson, Swain, Transylvania)				
Gratiola aurea	**SC-V**		**S1**	**G5**
Golden Hedge-hyssop				
C: drawdown zones of blackwater rivers (Bladen, Brunswick, Columbus, Gates*, Pender, Sampson)				
Gratiola ramosa	**SR-P**		**S1**	**G4G5**
Branched Hedge-hyssop				
CS: cypress savannas and clay-based Carolina bays (Hoke, Robeson*, Scotland)				
Gymnocarpium appalachianum	**T**		**S1**	**G3**
Appalachian Oak Fern				
M: shaded and sheltered crevices on high elevation rocky summits (Ashe)				
Hackelia virginiana	**SR-P**		**S2**	**G5**
Virginia Stickseed				
MP: woods and thickets with circumneutral soil (Alexander, Alleghany, Ashe, Avery*, Buncombe, Burke, Caldwell, Clay*, Granville, Haywood*, Jackson*, Macon*, Madison, Martin, McDowell, Polk*, Rockingham, Rutherford, Surry*, Vance)				
Helanthium tenellum	**E**		**SH**	**G5?**
Dwarf-burhead				
C: drawdown zones of clay-based Carolina bays and blackwater rivers (Brunswick*, Columbus*, Robeson)				
Helenium brevifolium	**E**		**S1**	**G4**
Littleleaf Sneezeweed				
PMC: bogs, seeps, riverbanks, other wet sites (Alleghany, Brunswick*, Clay, Columbus, Davidson*, Henderson*, Iredell, Lenoir*, Lincoln, Montgomery, Rowan*, Stanly*, Wake*)				
Helenium pinnatifidum	**SR-P**		**S2**	**G4**
Dissected Sneezeweed				
C: savannas and open, wet, mucky sites (Bladen, Brunswick, Columbus, New Hanover*, Pender, Robeson*)				
Helenium vernale	**E**		**S1**	**G4?**
Spring Sneezeweed				
C: savannas and adjacent ditches (Brunswick, Columbus)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Helianthus floridanus	**T**		**S1**	**G3G4**
Florida Sunflower				
C: savannas and pocosins (Bladen, Brunswick, Columbus, Robeson)				
Helianthus laevigatus	**SC-V**		**S3**	**G4**
Smooth Sunflower				
PM: shaly open woods and roadsides (Anson, Burke, Cabarrus, Cleveland*, Davidson, Jackson, McDowell, Montgomery, Rowan, Rutherford, Stanly, Transylvania, Union)				
Helianthus occidentalis ssp. occidentalis	**SC-H**		**SX**	**G5T5**
Naked-stem Sunflower				
M: Rocky or sandy flood-scoured riversides (Buncombe*)				
Helianthus schweinitzii	**E**	**E**	**S3**	**G3**
Schweinitz's Sunflower				
P: open woods, roadsides, and other rights-of-way (Anson, Cabarrus, Catawba, Davidson, Gaston, Guilford, Mecklenburg, Montgomery, Randolph, Richmond, Rowan, Stanly, Stokes, Surry, Union)				
Heliotropium curassavicum var. curassavicum	**SR-P**		**SH**	**G5T5**
Seaside Heliotrope				
T: salt flats and salt marshes (Hyde*)				
Helonias bullata	**T**	**T**	**S2**	**G3**
Swamp Pink				
M: bogs (Ashe, Henderson, Jackson, Macon, Transylvania)				
Heteranthera multiflora	**SR-P**		**S1**	**G4**
Multiflowered Mud-plantain				
C: open pools in brownwater or blackwater river floodplains (Bertie*, Durham, Martin, Pasquotank, Perquimans, Wake, Washington)				
Heuchera hispida	**SR-P**		**S1**	**G5T3?**
Hispid Alumroot				
P: rich, rocky woods (Alleghany, Ashe, Wilkes)				
Heuchera pubescens	**SR-P**		**S1**	**G4?**
Downy Alumroot				
MP: rock outcrops (Haywood*, Madison, Stokes*, Surry, Yadkin)				
Hexalectris spicata	**SR-P**		**S2**	**G5**
Crested Coralroot				
PMC: dry or mesic woods on basic soils (Alleghany, Burke*, Cabarrus, Clay, Cumberland, Davidson*, Davie*, Durham, Franklin*, Granville, Harnett, Hoke, Jackson*, Johnston*, Jones*, Lincoln, Macon, Madison*, Mecklenburg, Orange, Polk*, Randolph, Rutherford, Stanly, Surry*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Hexastylis contracta **Mountain Heartleaf** M: acidic forests under rhododendron (Buncombe, Caldwell, Henderson)	**E**		**S1**	**G3**
Hexastylis naniflora **Dwarf-flowered Heartleaf** P: rich deciduous forests, bluffs, and ravines (Alexander, Burke, Caldwell, Catawba, Cleveland, Gaston, Iredell, Lincoln, Polk, Rutherford)	**T**	**T**	**S3**	**G3**
Hexastylis rhombiformis **French Broad Heartleaf** MP: cove forests (Buncombe, Burke, Henderson, Polk, Transylvania)	**SR-L**		**S3**	**G3**
Hibiscus aculeatus **Comfortroot** C: bay forests, sand ridges, and roadsides (Carteret, New Hanover, Robeson)	**T**		**S1**	**G4G5**
Hottonia inflata **Featherfoil** CPT: pools in blackwater or brownwater swamps, interdune ponds (Bertie, Dare, Edgecombe*, Gates, Halifax, Johnston, Lenoir, Martin, Tyrrell)	**SR-O**		**S1?**	**G4**
Houstonia montana **Roan Mountain Bluet** M: high elevation rocky summits, grassy balds (Ashe, Avery, Caldwell, Mitchell, Watauga, Yancey)	**E**	**E**	**S2**	**G5T2**
Hudsonia montana **Mountain Golden-heather** M: gorge rim outcrops, rocky summits, pine-oak/heath ridges (Burke, McDowell)	**T**	**T**	**S1**	**G1**
Hudsonia tomentosa **Sand Heather** T: openings in maritime forest, blowouts, and dunes (Currituck, Dare)	**T**		**S2**	**G5**
Huperzia porophila **Rock Fir-clubmoss** M: in spray zone of waterfalls (Ashe, Jackson, Macon, Polk*, Rutherford, Transylvania)	**SR-P**		**S2**	**G4**
Hydrastis canadensis **Goldenseal** MP: cove forests, other rich deciduous forests (Alleghany, Buncombe, Durham, Graham, Haywood, Jackson, Macon, Madison, McDowell, Mitchell, Polk, Rockingham, Stokes, Swain, Watauga*)	**SR-O**		**S3**	**G3G4**
Hymenocallis occidentalis var. occidentalis **Hillside Spider-lily** M: wooded hillsides (McDowell*)	**SC-H**		**SH**	**G4?TNR**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global

Yellow-fruited Flax				
C: pine savannas (Brunswick, Columbus, Onslow, Pender)				
Linum sulcatum	**SC-H**		**SH**	**G5T5**
Glade Flax				
P: diabase barrens (Durham*, Granville*)				
Liparis loeselii	**E**		**S1**	**G5**
Fen Orchid				
MT: seeps, bay swamps (Alleghany, Ashe*, Avery*, Dare, Jackson*, Madison, Rutherford*, Swain, Transylvania, Watauga*, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Lipocarpha micrantha	**SC-H**		**SH**	**G5**
Small-flowered Hemicarpha				
CT: drawdown zones of blackwater rivers, salt marshes (Brunswick*, Columbus*, Dare*)				
Lithospermum canescens	**T**		**S2**	**G5**
Hoary Puccoon				
P: diabase glades, open woods over diabase (Durham, Granville)				
Litsea aestivalis	**SC-V**		**S2S3**	**G3?**
Pondspice				
C: limesink ponds, other pools (Bladen, Brunswick, Carteret, Craven, Cumberland, Gates, Hoke, Lenoir, New Hanover, Onslow, Pender, Sampson, Wayne)				
Lobelia boykinii	**E**		**S1S2**	**G2G3**
Boykin's Lobelia				
C: depression ponds and meadows and clay-based cypress savannas (Bladen*, Cumberland, Hoke, Onslow, Robeson, Scotland)				
Lonicera canadensis	**SR-P**		**S2**	**G5**
American Fly-honeysuckle				
M: bogs, moist woods (Alleghany, Buncombe, Graham, Haywood, Jackson, Macon, Mitchell*, Transylvania, Watauga, Yancey)				
Lophiola aurea	**E**		**S2**	**G4**
Golden-crest				
C: very wet, mucky habitats in pine savannas (Brunswick, Columbus, New Hanover, Onslow)				
Ludwigia alata	**SR-P**		**S2**	**G3G5**
Winged Seedbox				
TC: interdune ponds, marshes (Brunswick, Camden, Carteret, Craven, Currituck, Dare, Hyde, New Hanover*, Onslow*, Pasquotank, Tyrrell*)				
Ludwigia brevipes	**SR-T**		**S1S2**	**G2**
Long Beach Seedbox				
CS: natural lake shores, blackwater stream shores and impoundments, and freshwater interdune ponds (Brunswick, Columbus, Craven*, Cumberland, Currituck, Dare, Gates*, Harnett*, Hyde*, Johnston*, Robeson*, Sampson*, Wayne*)				
Ludwigia lanceolata	**E**		**S1**	**G3**
Lanceleaf Seedbox				
TC: interdune ponds, open wet areas (Brunswick*, Carteret, Dare*, New Hanover)				
Ludwigia linifolia	**T**		**S2**	**G4**
Flaxleaf Seedbox				
CT: limesink ponds (Brunswick, Carteret, Columbus, New Hanover, Onslow)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Ludwigia ravenii	**T**		**S1**	**G1G2**
Raven's Seedbox				
C: savannas, swamps, marshes, wet open places (Brunswick*, Carteret, Chowan*, Columbus, Craven, Duplin*, Gates*, Jones, New Hanover*, Pamlico*, Perquimans*, Sampson)				
Ludwigia sphaerocarpa	**E**		**S1**	**G5**
Globe-fruit Seedbox				
CS: bogs, pools, and lake shores (Bladen*, Columbus, Craven, Dare*, Hoke*, Johnston*, Moore, New Hanover, Richmond, Washington)				
Ludwigia suffruticosa	**T**		**S2**	**G5**
Shrubby Seedbox				
CS: limesink ponds, clay-based Carolina bays (Bladen*, Brunswick, Columbus, New Hanover, Onslow, Robeson, Scotland)				
Lupinus villosus	**SR-P**		**S1**	**G5**
Lady Lupine				
C: sandhills and other dry sandy woods (Bladen, Brunswick*, Cumberland, Pender)				
Luziola fluitans var. fluitans	**SR-P**		**S2**	**G4G5TNR**
Southern Water Grass				
C: pools, lakes, streams (Bladen, Columbus, Dare, Moore, Pender, Richmond, Scotland, Tyrrell, Washington)				
Lycopodiella inundata	**SR-P**		**S1**	**G5**
Bog Clubmoss				
M: bogs and seeps (Avery, Haywood, Watauga)				
Lycopus angustifolius	**SR-P**		**S1**	**G4?Q**
Southern Bog Water-horehound				
C: bogs and marshes (Columbus, Richmond, Washington)				
Lysimachia asperulifolia	**E**	**E**	**S3**	**G3**
Rough-leaf Loosestrife				
CS: pocosin/savanna ecotones, pocosins (Beaufort, Bladen, Brunswick, Carteret, Columbus*, Craven, Cumberland, Harnett, Hoke, Montgomery*, Moore*, New Hanover, Onslow, Pamlico, Pender, Richmond, Scotland)				
Lysimachia fraseri	**E**		**S3**	**G3**
Fraser's Loosestrife				
M: wet forest borders, roadsides, alluvial meadows (Buncombe*, Haywood*, Henderson*, Jackson, Macon, Polk, Swain, Transylvania)				
Lysimachia hybrida	**SR-P**		**S2?**	**G5**
Lowland Loosestrife				
MPC: bottomlands (Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Lysimachia tonsa	**SR-P**		**S2**	**G4**
Southern Loosestrife				
P: upland forests and openings (Alexander, Ashe, Burke, Caswell, Granville, Madison, Orange*, Rockingham, Rutherford, Stokes, Surry, Swain, Vance)				
Lythrum lanceolatum	**SR-T**		**S1**	**G5T5**
Southern Winged-loosestrife				
C: marshes and low, wet places (New Hanover*, Pender)				
Macbridea caroliniana	**E**		**S2**	**G2G3**
Carolina Bogmint				
C: blackwater swamps, savanna/pocosin ecotones, ditches (Bladen, Brunswick, Columbus, Harnett, Johnston, Jones*, Pender, Robeson)				
Magnolia macrophylla	**T**		**S2**	**G5**
Bigleaf Magnolia				
P: rich deciduous forests (Gaston, Henderson, Iredell, Lincoln, Surry, Wake)				
Malaxis bayardii	**SR-T**		**S1**	**G1G2**
Appalachian Adder's-mouth				
MP: upland forests (Caldwell*, McDowell)				
Malaxis spicata	**SC-V**		**S1**	**G4?**
Florida Adder's-mouth				
CT: maritime swamp forests, calcareous but mucky outer coastal plain swamps (Brunswick, Carteret, Chowan, Craven, Dare, Jones, Pender*)				
Marshallia grandiflora	**SC-H**		**SH**	**G3**
Large-flowered Barbara's-buttons				
MP: bogs, dry basic soils (Henderson*, Polk*)				
Marshallia legrandii	**SR-L**		**S1**	**G1**
Oak Barrens Barbara's-buttons				
P: clayey upland soils over diabase (Granville)				
Marshallia trinervia	**SC-H**		**SH**	**G3**
Broadleaf Barbara's-buttons				
M: moist rocky streambanks and in calcareous clays (Macon*)				
Matelea decipiens	**SR-P**		**S3**	**G5**
Glade Milkvine				
PC: thin woodlands over mafic or calcareous rocks (Alamance, Alexander, Anson, Bertie, Burke, Davidson*, Durham, Franklin, Granville, Halifax, Hertford*, Lincoln, Martin, McDowell, Mecklenburg, Montgomery, Northampton, Orange, Richmond, Rutherford, Stanly, Wake)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Matelea obliqua	**SR-P**		**S1**	**G4?**
Climbing Milkvine				
M: dry, rocky woodlands over calcareous rocks (Madison)				
Meehania cordata	**SR-P**		**S2**	**G5**
Meehania				
M: cove forests, boulderfields (Alleghany, Ashe, Avery*, Haywood, Madison, Watauga, Wilkes, Yancey)				
Melica nitens	**E**		**S1**	**G5**
Three-flowered Melic				
M: open calcareous woods (Madison, Polk)				
Menyanthes trifoliata	**T**		**S1**	**G5**
Buckbean				
M: bogs (Alleghany*, Watauga)				
Micranthes caroliniana	**SR-T**		**S3**	**G3**
Carolina Saxifrage				
MP: high to middle elevation moist cliffs and rock outcrops (Alleghany, Ashe, Watauga, Wilkes)				
Micranthes pensylvanica	**E**		**S1**	**G5**
Swamp Saxifrage				
MP: bogs, seeps (Wake*, Watauga)				
Milium effusum var. cisatlanticum	**SR-P**		**S1**	**G5T5**
Millet-grass				
M: high elevation forests or openings (Swain)				
Mnesithea cylindrica	**SC-H**		**SH**	**G4G5**
Carolina Jointgrass				
P: open woodlands and roadsides (Anson*, Union)				
Monarda media	**SR-P**		**S1?**	**G4?**
Purple Bee-balm				
M: grassy balds (Avery, Graham, Jackson)				
Mononeuria groenlandica	**T**		**S2**	**G5**
Greenland Sandwort				
MP: high elevation and low elevation rocky summits (Alleghany, Ashe, Avery, Burke, Caldwell, Henderson, McDowell, Mitchell, Stokes, Surry, Wilkes)				
Mononeuria paludicola	**E**		**S1**	**G1**
Godfrey's Sandwort				
T: tidal freshwater marshes (Craven, Jones*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Mononeuria uniflora	**E**		**S1**	**G4**
Single-flowered Sandwort				
P: granite flatrocks (Anson, Rowan*, Rutherford)				
Monotropsis odorata	**SC-V**		**S3**	**G3**
Sweet Pinesap				
PM: dry forests and bluffs (Alamance*, Alleghany*, Buncombe, Burke, Caldwell, Catawba, Chatham, Cherokee, Clay, Cleveland, Durham, Haywood, Henderson, Jackson, Macon, McDowell, Mecklenburg, Orange, Person*, Polk, Randolph, Rutherford, Stokes, Swain*, Transylvania, Wake, Yancey)				
Moranopteris nimbata	**T**		**S1**	**G4?**
West Indian Dwarf Polypody				
M: spray zone behind waterfalls (Macon)				
Muhlenbergia glomerata	**SC-V**		**S1**	**G5**
Spiked Muhly				
M: olivine barrens, fens, mafic cliffs (Ashe, Avery, Clay)				
Muhlenbergia sobolifera	**SC-V**		**S2**	**G5**
Rock Muhly				
M: dripping cliffs and rocky slopes (Alexander, Ashe, Avery, Jackson, Macon, McDowell*, Mitchell*, Transylvania*)				
Muhlenbergia torreyana	**SC-V**		**S2**	**G3**
Pinebarren Smokegrass				
CS: cypress savannas (Brunswick, Cumberland, Hoke, Onslow, Pender, Richmond, Robeson)				
Myrica gale	**E**		**S1**	**G5**
Sweet Gale				
M: bogs (Henderson)				
Myriophyllum laxum	**E**		**S2**	**G3**
Loose Water-milfoil				
CS: limesink ponds, waters of natural lakes (Brunswick, Carteret, Craven*, Cumberland, Hoke, Onslow)				
Myriophyllum pinnatum	**SR-T**		**S1**	**G5**
Cutleaf Water-milfoil				
CS: pools and ditches (Bladen, Brunswick, Currituck*)				
Myriophyllum tenellum	**E**		**S1**	**G5**
Leafless Water-milfoil				
C: waters of natural lakes (Bladen, Tyrrell, Washington)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Myriopteris alabamensis	**SR-P**		**S1**	**G4G5**
Alabama Lipfern				
M: calcareous outcrops (Madison)				
Nabalus albus	**T**		**S2?**	**G5**
Northern Rattlesnake-root				
M: hardwood forests (Ashe, Granville, Haywood*, Henderson*, Jones, McDowell, Mitchell*, Montgomery, Onslow, Rutherford, Transylvania*)				
Narthecium montanum	**SC-H**		**SX**	**GX**
Appalachian Yellow Asphodel				
M: bogs (Henderson*)				
Oenothera perennis	**SC-V**		**S2**	**G5**
Perennial Sundrops				
MPC: wet meadows and bogs (Alleghany, Ashe, Avery*, Burke, Cabarrus, Clay, Hertford*, Iredell*, Jackson, Macon, McDowell, Transylvania, Tyrrell*, Watauga)				
Oenothera riparia	**SR-L**		**S2S3**	**G2G3**
Riverbank Evening-primrose				
C: tidal marshes (Brunswick, Dare, New Hanover, Pender, Tyrrell)				
Oldenlandia boscii	**E**		**S2**	**G5**
Bosc's Bluet				
C: clay-based Carolina bays (Brunswick, Columbus, Cumberland, Hoke, Robeson, Scotland)				
Oplismenus setarius	**SR-P**		**S1**	**G5T5**
Shortleaf Basket Grass				
TC: maritime forests, bottomlands (Bladen, Brunswick, Carteret, Columbus, Dare, Onslow, Pender, Washington)				
Orbexilum macrophyllum	**SC-H**		**SX**	**GX**
Bigleaf Scurfpea				
M: low mountain forests or outcrops? (Polk*)				
Orbexilum onobrychis	**SC-H**		**SH**	**G5**
Lanceleaf Scurfpea				
M: habitat in North Carolina not known (Haywood*)				
Orbexilum pedunculatum	**SR-P**		**S1**	**G5**
Sampson's Snakeroot				
MP: Open woodlands (Cherokee, Durham*, Orange*, Transylvania*)				
Oreojuncus trifidus	**SR-D**		**S1**	**G5**
Highland Rush				
M: high elevation rocky summits (Alleghany, Ashe, Buncombe, Mitchell)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Orthochilus ecristatus	**E**		**S1**	**G2G3**
Spiked Medusa				
C: Mesic pinelands with blackjack oak, sandhills, and dry-mesic to mesic longleaf pinelands. (Bladen*, Cumberland*, Hoke, New Hanover, Sampson*)				
Oxalis macrantha	**SR-D**		**SH**	**G3G5**
Sadie Price's Yellow Wood Sorrel				
P: Rich woodlands (Stanly*)				
Oxypolis canbyi	**E**	**E**	**S1**	**G2**
Canby's Dropwort				
C: clay-based Carolina bays (Scotland)				
Pachysandra procumbens	**E**		**S1**	**G4G5**
Allegheny Spurge				
P: cove forests (Polk)				
Packera crawfordii	**SR-T**		**S1**	**G2G3**
Bog Ragwort				
CM: bogs, fens, and wet savannas (Onslow, Pender, Watauga, Yancey)				
Packera millefolium	**T**		**S2**	**G3**
Divided-leaf Ragwort				
M: granitic domes, other outcrops (Buncombe, Haywood, Henderson, Jackson, Macon, McDowell, Polk, Rutherford, Transylvania)				
Packera paupercula var. appalachiana	**T**		**S1**	**G5TNR**
Prairie Ragwort				
M: mafic and calcareous glades, rock outcrops, and cliffs (Ashe, Madison)				
Packera paupercula var. paupercula	**SR-P**		**S1?**	**G5**
Balsam Ragwort				
PMC: fens, bogs, and diabase glades (Avery*, Burke, Caldwell*, Granville, McDowell, Nash*, Rutherford, Transylvania*, Watauga*)				
Packera schweinitziana	**T**		**S2**	**G5?**
Schweinitz's Ragwort				
M: grassy balds (Avery, Buncombe, Mitchell, Watauga, Yancey)				
Packera serpenticola	**SR-L**		**S1**	**G1**
Buck Creek Ragwort				
M: Serpentine barrens (Clay)				
Panicum dichotomiflorum var. puritanorum	**SR-P**		**S1**	**G5T4**
Puritan Panic Grass				
C: wet sands and peats of seasonally exposed pond and lake shores. (Onslow, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Panicum flexile	**T**		**S1**	**G5**
Wiry Panic Grass				
PM: glades and openings over mafic rocks (Ashe*, Durham, Granville, Henderson, Orange*)				
Panicum philadelphicum ssp. lithophilum	**SR-T**		**S1**	**G2G3Q**
Flatrock Panic Grass				
MP: soil islands on granite flatrocks (Anson, Granville)				
Parietaria praetermissa	**SC-V**		**S1**	**G3G4**
Large-seed Pellitory				
TC: shell middens, disturbed sites, maritime forests (Brunswick*, Carteret, Hyde, New Hanover*, Onslow)				
Parnassia caroliniana	**T**		**S2**	**G3**
Carolina Grass-of-Parnassus				
CS: wet savannas (Bladen, Brunswick, Columbus, Cumberland, Harnett, Hoke, Lee*, Onslow, Pender, Scotland)				
Parnassia grandifolia	**T**		**S2**	**G3**
Large-leaved Grass-of-Parnassus				
MCP: fens and seeps over calcareous or mafic rocks (Alleghany, Ashe, Avery*, Brunswick, Buncombe*, Clay, Columbus, Haywood, Macon, McDowell, Pender, Transylvania, Watauga)				
Paronychia herniarioides	**E**		**S1**	**G2G4**
Michaux's Whitlow-wort				
S: sandhills (Scotland)				
Parthenium auriculatum	**SR-T**		**S3**	**G3G4**
Glade Wild Quinine				
PM: glades and openings over mafic rocks (Alexander, Burke, Caswell, Durham, Franklin, Granville, Guilford*, Macon*, Mecklenburg, Montgomery, Orange, Person, Rockingham*, Rutherford, Stanly, Warren*)				
Parthenocissus inserta	**SR-P**		**S1**	**G5**
Thicket Creeper				
M: Rich alluvial forests (Polk)				
Paspalum dissectum	**E**		**S2**	**G4?**
Mudbank Crown Grass				
CTP: mudflats, other open wet areas (Brunswick, Columbus, Craven, Moore, Onslow, Pender, Scotland, Union*)				
Paspalum fluitans	**SR-P**		**S1**	**G5**
Horsetail Crown Grass				
CP: drawdown riverbanks and seepage areas in swamp forests (Bertie*, Bladen*, Chatham*, Harnett, Johnston, Martin*, Northampton*, Wake)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Paspalum vaginatum	**SR-P**		**S1S2**	**G5**
Seashore Crown Grass				
CPT: brackish marshes, low wet places (Carteret, Dare, Hyde, Onslow, Tyrrell)				
Pedicularis lanceolata	**T**		**S1**	**G5**
Swamp Lousewort				
M: bottomlands, swampy woods (Buncombe*, Cherokee*, Clay, Haywood, Jackson*, Macon*, Watauga*)				
Pellaea wrightiana	**E**		**S1**	**G5**
Wright's Cliff-brake				
P: rock outcrops, mafic or with nutrient-rich seepage (Alexander, Stanly, Union)				
Peltandra sagittifolia	**SR-P**		**S2S3**	**G3G4**
Spoonflower				
C: pocosins, other wet, peaty sites (Brunswick, Carteret, Columbus*, Craven, Dare, Jones, New Hanover, Onslow, Pender)				
Persicaria amphibia	**SR-P**		**S1**	**G5**
Water Smartweed				
MPC: marshes (Beaufort*)				
Persicaria hirsuta	**E**		**S1**	**G3G4**
Hairy Smartweed				
CS: limesink ponds, clay-based Carolina bays, drawdown zones of blackwater riverbanks (Bladen, Brunswick, Carteret*, Onslow*, Richmond, Scotland)				
Phacelia covillei	**SR-T**		**S3**	**G3**
Buttercup Phacelia				
PC: bottomlands, rich lower slopes (Alamance, Caswell, Chatham, Franklin, Harnett, Lee, Moore, Orange, Vance)				
Phacelia maculata	**E**		**S1**	**G3G4**
Spotted Phacelia				
P: granite flatrocks and creek bottomlands (Cleveland)				
Phanopyrum gymnocarpon	**SR-O**		**S2**	**G5**
Swamp Panic Grass				
C: tidal and blackwater cypress-gum swamps (Bertie, Bladen, Columbus, Martin, Pender, Robeson)				
Phegopteris connectilis	**E**		**S2**	**G5**
Northern Beech Fern				
M: spray zone of waterfalls, spruce-fir forests, high elevation seepage bogs (Buncombe, Haywood, Jackson, Macon, Mitchell, Swain*, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Phemeranthus piedmontanus	**SR-L**		**S1**	**G1**
Piedmont Fameflower				
P: shallow soil over mafic rock, where periodically wet by seepage (Granville)				
Phlox subulata	**SR-P**		**S1**	**G5**
Moss Pink				
M: outcrops and glades, especially over mafic rocks (Ashe, Buncombe, Jackson*, Macon*, Madison, Yancey)				
Pinguicula lutea	**SR-P**		**S1**	**G4G5**
Yellow Butterwort				
C: savannas (Bladen*, Brunswick, Columbus, New Hanover, Pender)				
Pinguicula pumila	**E**		**S2**	**G4**
Small Butterwort				
C: savannas (Brunswick*, Carteret, Columbus, Onslow, Pender)				
Pityopsis graminifolia var. graminifolia	**E**		**S1**	**G5T4**
A Silkgrass				
C: savannas, pine flatwoods, sandy roadsides (Brunswick, Columbus)				
Plantago cordata	**E**		**S1**	**G4**
Heart-leaf Plantain				
P: beds of small, slate-bottomed, perennial streams (Davidson)				
Plantago sparsiflora	**T**		**S1S2**	**G3**
Pineland Plantain				
C: wet savannas (Bladen*, Brunswick, Columbus, Onslow, Pender)				
Platanthera grandiflora	**T**		**S2**	**G5**
Large Purple-fringed Orchid				
M: bogs, seeps, grassy balds, high elevation moist forests and banks (Alleghany, Ashe, Avery, Buncombe, Clay, Haywood*, Macon, McDowell, Mitchell, Swain, Transylvania*, Watauga, Yancey)				
Platanthera herbiola	**SR-P**		**S1S2**	**G4?T4Q**
Northern Rein Orchid				
M: bogs and moist forests (Buncombe*, Burke, Cherokee, Clay*, Forsyth*, Graham*, Haywood, Jackson*, Macon, Mitchell, Swain*, Transylvania, Watauga)				
Platanthera integra	**SC-V**		**S2**	**G3G4**
Yellow Fringeless Orchid				
CMP: savannas (Brunswick, Carteret, Cherokee*, Columbus, Craven, Forsyth*, Henderson*, Jones, Onslow, Pamlico*, Pender, Robeson*, Rowan*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Platanthera integrilabia	**SC-H**	**T**	**SH**	**G2G3**
White Fringeless Orchid				
M: bogs (Cherokee*, Henderson*)				
Platanthera nivea	**T**		**SH**	**G5**
Snowy Orchid				
C: wet savannas (Beaufort*, Bladen*, Brunswick, Columbus*, Craven, Dare*, Hoke*, New Hanover*, Pender*, Robeson*)				
Platanthera peramoena	**T**		**S2**	**G5**
Purple Fringeless Orchid				
MP: bogs, forests (Buncombe*, Burke*, Caldwell*, Clay*, Durham, Forsyth, Franklin, Graham, Guilford, Haywood*, Henderson*, Jackson, Macon, Mitchell*, Orange, Swain*, Transylvania, Warren, Watauga, Yancey*)				
Platanthera shriveri	**SR-T**		**S1**	**G1**
Shriver's Purple Fringed Orchid				
M: damp, open woods, often along seeps (Watauga)				
Poa paludigena	**SR-T**		**S1**	**G3**
Bog Bluegrass				
M: bogs (Ashe, Avery, Watauga)				
Poa palustris	**SR-P**		**S1**	**G5**
Swamp Bluegrass				
M: spruce-fir forests, grassy balds (Ashe, Avery, Haywood*, Henderson*, Macon, Mitchell, Polk*, Swain, Yancey*)				
Poa saltuensis	**T**		**S1**	**G5**
A Bluegrass				
M: olivine barrens (Clay, Haywood)				
Polemonium reptans var. reptans	**T**		**S1**	**G5T5**
Jacob's Ladder				
PM: moist, nutrient-rich forests such as bottomlands and rich slopes (Ashe, Iredell, Rockingham, Stokes*, Watauga*)				
Polygala hookeri	**SC-V**		**S2S3**	**G3**
Hooker's Milkwort				
C: savannas (Brunswick, Carteret, Columbus, Craven, New Hanover, Onslow, Pender)				
Polygala nana	**SR-D**		**SH**	**G5**
Dwarf Milkwort				
M: habitat in North Carolina not known (Buncombe*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Polygala senega	**SR-D**		**S2**	**G4G5**
Seneca Snakeroot				
MP: woodlands and in thin soil around outcrops, usually over mafic or calcareous rocks (Ashe, Durham, McDowell, Stanly, Transylvania, Wake)				
Polygonella articulata	**SC-H**		**SH**	**G5**
Coast Jointweed				
C: sandhills (Gates*)				
Polygonum glaucum	**E**		**S1**	**G3**
Seabeach Knotweed				
T: ocean and sound beaches (Beaufort*, Brunswick, Carteret, Dare, Hyde, New Hanover*)				
Ponthieva racemosa	**T**		**S2**	**G4G5**
Shadow-witch				
C: blackwater forests and swamps, especially over marl (Beaufort*, Brunswick, Carteret, Craven, Jones, Onslow, Pender)				
Portulaca smallii	**T**		**S2**	**G3**
Small's Portulaca				
P: granite flatrocks and diabase glades (Cabarrus, Forsyth, Franklin, Granville, Rowan, Wake)				
Potamogeton amplifolius	**SR-D**		**S1**	**G5**
Largeleaf Pondweed				
C: submersed in blackwater streams (Brunswick, Craven*)				
Potamogeton confervoides	**SR-D**		**S2**	**G5**
Conferva Pondweed				
SC: beaverponds and old millponds on blackwater creeks (Craven, Cumberland, Gates*, Harnett, Hoke, Moore, Richmond, Scotland)				
Potamogeton illinoensis	**SR-D**		**S1**	**G5**
Illinois Pondweed				
C: alkaline waters of streams, rivers, lakes, and ponds (Brunswick*, Dare)				
Potamogeton natans	**SR-D**		**SH**	**G5**
Floating Pondweed				
M: lakes and artificial impoundments (Buncombe*)				
Potamogeton nodosus	**SR-D**		**SH**	**G5**
American Pondweed				
CMP: ponds and streams with moderate to high PH (Carteret*, Haywood*, Perquimans*, Vance*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Primula meadia	**T**		**S2S3**	**G5**
Shooting-star				
MP: mafic cliffs, dry coniferous woodlands, and associated nutrient-rich alluvial forests (Anson, Buncombe, Davidson*, Forsyth*, Haywood, Henderson, Iredell*, Jackson, Macon, Mecklenburg*, Montgomery, Orange*, Rutherford, Stanly, Union, Watauga*)				
Prunus alleghaniensis var. alleghaniensis	**SR-T**		**S1**	**G4T4**
Allegheny Plum				
M: Dry rocky woodlands (McDowell, Rutherford)				
Prunus susquehanae	**SR-P**		**SH**	**G5T4T5**
Susquehanna Cherry				
MP: rocky forests (Durham*)				
Pseudognaphalium helleri	**SR-P**		**S3**	**G4G5T3**
Heller's Rabbit-tobacco				
PS: dry woodlands, openings, and glades, especially over mafic rocks (Anson*, Cabarrus, Davidson, Davie*, Forsyth*, Franklin*, Gaston, Granville, Guilford*, Halifax*, Hoke, Iredell*, Mecklenburg, Montgomery, Northampton*, Orange*, Person*, Richmond*, Rowan*, Scotland*, Union, Wake)				
Pseudognaphalium micradenium	**SR-T**		**S1**	**G4G5T3?**
Small Rabbit-tobacco				
P: dry woodlands (Caswell, Durham*, Granville*, Person, Stokes*, Vance)				
Ptilimnium ahlesii	**SR-T**		**S1**	**G1**
Carolina Bishopweed				
C: tidal freshwater marshes (Brunswick, New Hanover)				
Ptilimnium costatum	**T**		**S1**	**GNR**
Ribbed Bishop-weed				
CT: tidal swamps or marshes (New Hanover)				
Ptilimnium nodosum	**E**	**E**	**S1**	**G2**
Harperella				
P: rocky riverbeds (Chatham, Granville, Lee)				
Pycnanthemum curvipes	**SR-T**		**S1**	**G3**
Tennessee Mountain-mint				
M: dry rocky woodlands and rock outcrops (Buncombe, Haywood, Madison)				
Pycnanthemum setosum	**SR-T**		**S2**	**G4**
Awned Mountain-mint				
C: blackwater swamps (Brunswick, Columbus, Craven, Gates, Jones, Pender, Tyrrell)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Pycnanthemum torreyi	**SR-T**		**S1**	**G2**
Torrey's Mountain-mint				
PM: dry upland forests and woodlands, over mafic rocks (Alexander*, Ashe*, Caswell, Cleveland*, Gaston*, Granville*, Haywood*, Jackson*, Macon*, Orange, Person*, Wilkes*)				
Pycnanthemum virginianum	**SR-P**		**S1?**	**G5**
Virginia Mountain-mint				
CMP: forests, woodland borders, bogs (Alleghany, Brunswick, Caswell, Henderson, Wake)				
Pyrola elliptica	**E**		**S1**	**G5**
Elliptic Shinleaf				
M: moist forests (Ashe, Watauga*)				
Pyxidanthera brevifolia	**SR-L**		**S3**	**G3**
Sandhills Pyxie-moss				
S: sandhills (Brunswick*, Cumberland, Harnett, Hoke, Moore)				
Quercus austrina	**SR-P**		**S1**	**G4?**
Bluff Oak				
CP: bluff and bottomland forests over circumneutral soil (Anson, Craven, Johnston*, Montgomery, Richmond, Sampson)				
Quercus elliottii	**SR-P**		**S2**	**G3G5**
Running Oak				
CP: mesic pine flatwoods and dry, silty sites (Bladen, Brunswick, Columbus, Duplin*, New Hanover*, Pender*, Robeson)				
Quercus georgiana	**SR-P**		**S1**	**G3**
Georgia Oak				
P: dry slopes and bluffs (Rutherford)				
Quercus ilicifolia	**E**		**S2**	**G5**
Bear Oak				
P: dry summits and rocky woods on Piedmont monadnocks (Alleghany, Burke, Gaston, Stokes, Surry, Wilkes)				
Quercus minima	**SR-P**		**S1**	**G5**
Dwarf Live Oak				
C: pine flatwoods, coastal fringe sandhills (Bladen, Carteret, New Hanover)				
Quercus prinoides	**E**		**S1**	**G5**
Dwarf Chinquapin Oak				
PM: dry, rocky slopes (Caldwell, Caswell, Cleveland*, Gaston*, Guilford*, Iredell*, Jackson*, Polk*, Rowan, Rutherford, Stanly*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Ranunculus ambigens **Water-plantain Spearwort** CP: open wet areas (Bertie*, Orange*, Perquimans*)	**SC-H**		**SH**	**G4**
Ranunculus fascicularis **Thick-root Buttercup** MP: serpentine and diabase barrens (Clay)	**SR-P**		**S1**	**G5**
Ranunculus flabellaris **Yellow Water-crowfoot** C: pools in blackwater swamps (Bertie, Edgecombe*, Gates*)	**SC-H**		**S1**	**G5**
Ranunculus hederaceus **Ivy Buttercup** C: marshes (Currituck*, Onslow)	**E**		**S1**	**G5**
Ranunculus micranthus **Rock Buttercup** P: rich woods on circumneutral soil (Caswell, Durham, Person*)	**SR-P**		**S1**	**G5**
Rhexia aristosa **Awned Meadow-beauty** C: clay-based Carolina bays and limesink ponds (Bladen, Brunswick*, Cumberland*, Hoke, Onslow, Robeson, Sampson, Scotland)	**SC-V**		**S3**	**G3G4**
Rhodiola rosea **Roseroot** M: high elevation rocky summits (Ashe*, Avery*, Caldwell*, Mitchell*, Watauga*, Yancey*)	**E**		**SH**	**G5**
Rhododendron cumberlandense **Cumberland Azalea** M: grassy or shrub balds (Graham*, Haywood*, Jackson, Macon, Swain, Transylvania)	**SR-P**		**S1**	**G4?**
Rhododendron prinophyllum **Election Pink** M: high elevation forests (Ashe)	**T**		**S1**	**G5**
Rhododendron vaseyi **Pink-shell Azalea** M: high elevation oak forests, heath balds, spruce-fir forests, and rocky areas (Avery, Buncombe, Caldwell, Haywood, Jackson, Macon*, McDowell, Mitchell*, Transylvania, Watauga, Yancey)	**SR-L**		**S3**	**G3**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rhus michauxii	**E**	**E**	**S2**	**G2G3**
Michaux's Sumac				
SCP: sandhills, sandy forests, woodland, woodland edges (Cumberland, Davie, Durham, Franklin, Hoke, Johnston*, Lincoln*, Mecklenburg, Moore, Nash, Orange*, Richmond, Robeson, Scotland, Union*, Wake, Wilson*)				
Rhynchospora alba	**SR-P**		**S2**	**G5**
Northern White Beaksedge				
MCS: fens, bogs, pocosin openings, limesink ponds (Alleghany, Ashe, Bladen, Brunswick, Craven, Cumberland*, Currituck, Dare, Mitchell, Pender*, Rutherford, Tyrrell, Watauga, Yancey)				
Rhynchospora crinipes	**T**		**S1**	**G2G3**
Alabama Beaksedge				
S: seepy banks of blackwater rivers (Hoke, Moore)				
Rhynchospora decurrens	**T**		**S1S2**	**G3G4**
Swamp Forest Beaksedge				
C: swamp forests (Brunswick, Columbus, Onslow, Pender)				
Rhynchospora divergens	**SR-P**		**S2**	**G4**
White-seeded Beaksedge				
C: wet savannas (Brunswick, Columbus, Onslow, Pender)				
Rhynchospora galeana	**SR-P**		**S2S3**	**G3G4**
Short-bristled Beaksedge				
C: savannas (Brunswick, Carteret, Columbus, Craven, Cumberland, Onslow, Pender)				
Rhynchospora harperi	**SC-V**		**S2**	**G4?**
Harper's Beaksedge				
C: limesink ponds and cypress savannas (Brunswick, Carteret, Onslow)				
Rhynchospora macra	**T**		**S2**	**G3G4**
Southern White Beaksedge				
S: sandhill seeps, blackwater impoundments, streamhead pocosins (Carteret, Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Rhynchospora microcarpa	**SR-P**		**S2**	**G5**
Southern Beaksedge				
CTP: maritime wet grasslands, clay-based Carolina bays, limesink ponds, swamp forests (Brunswick, Carteret, Columbus, Dare, Pender)				
Rhynchospora odorata	**SC-V**		**S1**	**G4**
Fragrant Beaksedge				
T: maritime wet grasslands (Brunswick*, Carteret, Dare, Hyde, Pender*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rhynchospora pinetorum	**SR-T**		**S2**	**G5?T3?**
Small's Beaksedge				
C: wet savannas, maritime wet grasslands (Brunswick, Carteret, Columbus, Onslow, Pender)				
Rhynchospora pleiantha	**T**		**S2**	**G2G3**
Coastal Beaksedge				
C: limesink ponds (Bladen, Brunswick, Carteret, New Hanover, Onslow)				
Rhynchospora thornei	**SC-V**		**S2**	**G3**
Thorne's Beaksedge				
C: wet savannas (Brunswick, Onslow, Pender)				
Rhynchospora tracyi	**T**		**S2**	**G4**
Tracy's Beaksedge				
C: clay-based Carolina bays, limesink ponds (Brunswick, New Hanover, Onslow, Scotland)				
Robinia hartwigii	**SR-L**		**S1S2**	**G3T2**
Hartwig's Locust				
M: high elevation granitic domes (Jackson, Macon, Mitchell*)				
Robinia hispida var. fertilis	**SR-O**		**S1**	**G4T1Q**
Fruitful Locust				
M: acidic cove forests, northern hardwoods forests, high elevation granitic domes (Alleghany, Avery, Burke*, Graham*, Haywood, Jackson, Macon*, Stokes, Swain, Wilkes)				
Robinia hispida var. kelseyi	**SR-O**		**S1**	**G4T1**
Kelsey's Locust				
M: high elevation red oak forests, dry rocky woods (Buncombe*, Burke*, Haywood, Henderson, Madison, Transylvania*)				
Robinia viscosa	**SR-T**		**S1**	**G3**
Clammy Locust				
MP: open woods (Catawba*, Jackson*, Rutherford, Transylvania)				
Rosa virginiana	**SR-P**		**SH**	**G5**
Virginia Rose				
M: moist to dry forests and woodlands (Ashe*, Buncombe*)				
Rubus idaeus ssp. strigosus	**T**		**S2?**	**G5T5**
Red Raspberry				
M: high elevation spruce-fir forests and openings (Buncombe, Haywood, Jackson, Swain, Yancey)				
Rubus repens	**E**		**S2**	**G5**
Robin Runaway				
M: bogs and moist woods under rhododendrons (Alleghany, Ashe, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rudbeckia heliopsidis	**E**		**S1**	**G2**
Sun-facing Coneflower				
C: moist pine flatwoods and woodland borders (Harnett, Moore)				
Rudbeckia triloba var. beadlei	**SR-T**		**S1**	**G5TNR**
Chauncey's Coneflower				
M: mafic cliffs (Buncombe, Graham, Madison, Swain)				
Ruellia ciliosa var. ciliosa	**T**		**S2**	**G5T3T5**
Sandhills Wild-petunia				
S: sandhills, especially in loamy, submesic swales (Cumberland, Hoke, Richmond, Scotland)				
Ruellia humilis	**E**		**S1**	**G5**
Low Wild-petunia				
P: diabase glades (Durham, Granville, Stanly, Wake)				
Ruellia purshiana	**SC-V**		**S2**	**G3**
Pursh's Wild-petunia				
PM: glades and woodlands, mostly over mafic or calcareous rocks (Alamance, Caswell, Cleveland, Davidson, Durham, Forsyth*, Gaston, Granville, Madison, Montgomery, Orange, Randolph*, Rutherford*, Stanly, Wake*)				
Ruellia strepens	**E**		**S1**	**G4G5**
Limestone Wild-petunia				
C: low woods over marl (Bertie, Pender, Richmond)				
Rugelia nudicaulis	**SR-L**		**S3**	**G3**
Rugel's Ragwort				
M: spruce-fir forests (Haywood, Swain)				
Sabal palmetto	**T**		**S1**	**G5**
Cabbage Palm				
TC: maritime forests on the southeastern coast (Brunswick, Carteret*, Dare, New Hanover)				
Sabatia kennedyana	**T**		**S2**	**G3**
Plymouth Gentian				
C: drawdown zones on banks of blackwater rivers (Brunswick, Columbus)				
Sageretia minutiflora	**T**		**S1**	**G4**
Small-flowered Buckthorn				
C: shell middens (Carteret, Onslow, Pender)				
Sagittaria chapmanii	**E**		**S1**	**G5T3?**
Chapman's Arrowhead				
C: limesink ponds (Bladen, Carteret, Columbus, Onslow)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Sagittaria fasciculata	**E**	**E**	**S1**	**G2**
Bunched Arrowhead				
M: bogs and mountain swamp forests (Buncombe*, Henderson)				
Sagittaria filiformis	**SR-P**		**SH**	**G4G5**
Water Arrowhead				
C: blackwater streams, rivers, and lakes (Bladen, Columbus*, Craven*, Pender, Wilson*)				
Sagittaria isoetiformis	**T**		**S2**	**G4?**
Quillwort Arrowhead				
CS: limesink ponds, clay-based Carolina bays, beaver ponds, natural lakes (Bladen, Brunswick*, Columbus, Cumberland, Hoke, New Hanover, Sampson, Scotland, Washington)				
Sagittaria macrocarpa	**T**		**S2**	**G5T2**
Streamhead Sagittaria				
S: shoreline of blackwater stream impoundment (Hoke, Moore)				
Sagittaria weatherbiana	**E**		**S2**	**G5T3T4**
Grassleaf Arrowhead				
C: fresh to slightly brackish marshes, streams, swamps, and pond margins (Beaufort*, Bladen*, Brunswick*, Columbus, Craven, Currituck*, Duplin, Gates*, Hyde*, New Hanover, Onslow, Pasquotank*, Pender, Pitt*, Sampson*, Wake*)				
Salvia azurea var. azurea	**SR-P**		**S2**	**G4G5T4?**
Azure Sage				
SC: sandhills (Anson, Hoke, New Hanover*, Richmond, Scotland)				
Sarracenia jonesii	**E**	**E**	**S1**	**G4T2**
Mountain Sweet Pitcher Plant				
M: bogs (Buncombe, Henderson, Macon, Transylvania)				
Sarracenia minor var. minor	**E**		**S2**	**G4T4**
Hooded Pitcherplant				
C: savannas (Brunswick, Columbus, New Hanover)				
Sarracenia oreophila	**E**	**E**	**S1**	**G2**
Green Pitcher Plant				
M: seepage bogs (Clay)				
Sarracenia purpurea var. montana	**SR-L**		**S1S2**	**G5T1T3**
Southern Appalachian Purple Pitcherplant				
M: mountain bogs, seepage bogs (Henderson, Jackson, Macon, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Sceptridium jenmanii	**SC-V**		**S2**	**G3G4**
Alabama Grape-fern				
MP: moist woods (Buncombe*, Burke, Cherokee, Clay*, Davie*, Granville, Iredell*, Jackson*, McDowell, Mecklenburg*, Rockingham*, Rutherford, Stokes*, Transylvania*)				
Sceptridium lunarioides	**SR-P**		**SH**	**G4?**
Winter Grape-fern				
P: dry pine woods (Davie*)				
Sceptridium multifidum	**SR-P**		**S1**	**G5**
Leathery Grape-fern				
M: grassy balds (Alleghany, Avery, Mitchell)				
Sceptridium oneidense	**SR-P**		**S2**	**G4**
Blunt-lobed Grape-fern				
MP: cove forests, bogs (Avery*, Buncombe*, Burke, Forsyth*, Haywood*, Jackson, Macon, McDowell, Mitchell*, Rutherford, Yancey*)				
Schisandra glabra	**T**		**S1**	**G3**
Magnolia Vine				
CP: rich slopes and floodplain islands (Gaston, Martin)				
Schoenoplectus acutus	**SR-P**		**SH**	**G5**
Hardstem Bulrush				
C: natural lakes (Carteret*, Craven*, Hyde*)				
Schoenoplectus etuberculatus	**SR-P**		**S3**	**G3G4**
Canby's Bulrush				
CS: blackwater creeks (Bladen, Brunswick, Carteret, Columbus, Craven*, Cumberland, Dare*, Harnett, Hoke, Hyde*, Johnston*, Moore, Onslow, Pender*, Randolph*, Richmond, Scotland, Wayne*)				
Schwalbea americana	**E**	**E**	**S2**	**G2**
Chaffseed				
SC: savannas and moist to dryish pinelands with frequent fire (Bladen, Cumberland, Hoke, Moore*, Pender*, Scotland)				
Scirpus divaricatus	**SR-O**		**S2?**	**G5**
Spreading Bulrush				
C: swamp forests (Bladen, Duplin)				
Scirpus flaccidifolius	**E**		**S1**	**G2**
Reclining Bulrush				
C: swamp forests (Northampton)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Scirpus lineatus	**T**		**S2**	**G4**
Drooping Bulrush				
C: low rich woods over marl (Brunswick, Carteret, Craven, Jones, New Hanover, Onslow, Pender)				
Scirpus pendulus	**SR-O**		**S1**	**G5**
Rufous Bulrush				
PC: wet places over mafic rocks (Cabarrus, Carteret, Durham*, Granville, Onslow)				
Scleria baldwinii	**T**		**S2**	**G4**
Baldwin's Nutrush				
C: wet savannas (Brunswick, Carteret, Columbus, Pender)				
Scleria bellii	**SR-L**		**S1**	**G2G3**
Smooth-seeded Hairy Nutrush				
C: pine savannas over limestone, diabase glades (Granville*, Onslow, Pender)				
Scleria reticularis	**T**		**S2**	**G4**
Netted Nutrush				
CS: clay-based Carolina bays, limesink ponds (Brunswick, Cumberland, Hoke, New Hanover, Onslow, Sampson, Scotland)				
Scleria verticillata	**SR-P**		**S2**	**G5**
Savanna Nutrush				
TC: calcareous wet savannas, maritime wet grasslands influenced by shell deposits (Brunswick*, Carteret, Columbus, Dare, Hyde, New Hanover*, Onslow, Pender, Tyrrell)				
Sclerolepis uniflora	**SR-T**		**S2**	**G4**
One-flower Hardscale				
C: clay-based Carolina bays, blackwater river foodplains, limesink ponds (Brunswick, Columbus, Cumberland, Hoke, Moore, New Hanover*, Robeson, Sampson*, Scotland)				
Scrophularia lanceolata	**SR-P**		**S1**	**G5**
American Figwort				
P: woodlands and forests (Guilford)				
Scutellaria australis	**E**		**S1**	**G4T4?**
Southern Skullcap				
PS: alluvial forests (Anson*, Granville*, Johnston*, Lee*, Orange*, Richmond*, Wake*)				
Scutellaria galericulata	**SC-H**		**SH**	**G5**
Hooded Skullcap				
M: spring-fed seepage (Buncombe*)				
Scutellaria leonardii	**E**		**S2**	**G4T4**
Shale-barren Skullcap				
P: diabase glades (Durham, Granville, Moore, Orange)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Scutellaria nervosa	**E**		**S1**	**G5**
Veined Skullcap				
P: alluvial forests (Chatham*, Durham*, Granville, Halifax, Jackson*, Northampton, Person, Wake, Warren*)				
Scutellaria ovata ssp. rugosa var. 1	**SR-T**		**S1**	**G1?Q**
Appalachian Skullcap				
M: rocky forests, boulderfields (Buncombe, Madison, Rutherford)				
Scutellaria saxatilis	**SR-T**		**S2**	**G3**
Rock Skullcap				
MP: northern hardwoods forests, rocky woodlands (Alleghany, Ashe, Cherokee, Graham, Mitchell, Watauga*, Yancey)				
Sedum glaucophyllum	**SR-P**		**S2**	**G4**
Cliff Stonecrop				
PM: rock outcrops, mainly calcareous or mafic (Jackson, Macon, Montgomery, Rockingham, Stokes)				
Sedum pusillum	**E**		**S1**	**G3**
Puck's Orpine				
P: granite flatrocks (Anson)				
Senecio suaveolens	**SC-H**		**S1**	**G4**
Sweet Indian-plantain				
M: bottomlands (Buncombe*, Henderson, Transylvania*)				
Sesuvium maritimum	**SR-O**		**S1?**	**G5**
Slender Sea-purslane				
T: seabeaches, marshes (Brunswick, Dare, New Hanover)				
Sesuvium portulacastrum	**SR-P**		**S1**	**G5**
Shoreline Sea-purslane				
T: seabeaches (Brunswick, Carteret, Dare, New Hanover, Onslow)				
Seymeria pectinata ssp. pectinata	**SC-H**		**SH**	**G4G5TNR**
Comb Seymeria				
C: dry pinelands, longleaf pine sandhills (Brunswick*)				
Shortia galacifolia var. brevistyla	**E**		**S2**	**G3T2**
Northern Oconee Bells				
M: streambanks, slopes, and outcrops in humid gorges (McDowell)				
Shortia galacifolia var. galacifolia	**SC-V**		**S2**	**G3T2T3**
Southern Oconee Bells				
M: streambanks, slopes, and outcrops in humid gorges (Jackson*, Macon, Swain*, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Sida elliottii var. elliottii	**SR-P**		**S1**	**G4G5TNR**
Coastal Plain Sida				
P: stream banks, sandy woodlands (Iredell)				
Sideroxylon tenax	**T**		**S1**	**G3?**
Tough Bumelia				
T: maritime forests and scrub (Brunswick, New Hanover)				
Silene ovata	**SC-V**		**S3**	**G3**
Mountain Catchfly				
M: rich slopes, cove forests, montane oak-hickory forests (Buncombe, Cherokee, Graham, Haywood, Henderson, Jackson, Macon, Madison, Mitchell, Rutherford*, Swain, Yancey)				
Silphium connatum	**SC-V**		**S2**	**G5T3T4**
Virginia Cup-plant				
MP: floodplains, rich alluvial woods (Alleghany, Ashe, Iredell, Rockingham, Stokes, Surry, Yadkin)				
Silphium perfoliatum	**T**		**S1**	**G5**
Northern Cup-plant				
PM: floodplains (Alleghany, Ashe, Cabarrus, Forsyth, Iredell*, Mecklenburg, Stokes, Surry)				
Silphium terebinthinaceum	**SR-P**		**S2**	**G4G5**
Prairie Dock				
P: diabase glades, other open or semi-open sites over mafic rock (Cabarrus, Davie, Durham, Granville, Mecklenburg, Person, Stanly, Union, Wake*)				
Sisyrinchium dichotomum	**E**	**E**	**S2**	**G2**
White Irisette				
M: thin woods, especially over amphibolite, in the escarpment region (Burke, Henderson, McDowell, Polk, Rutherford)				
Smilax hugeri	**SR-P**		**S3**	**G4**
Huger's Carrion-flower				
MP: deciduous forests (Anson, Clay, Cumberland, Graham, Macon, Richmond, Swain)				
Smilax lasioneura	**SR-P**		**S1**	**G5**
Blue Ridge Carrion-flower				
MP: oak-hickory forests over mafic rocks (Guilford*, Henderson, McDowell, Polk, Rutherford)				
Solanum pseudogracile	**SR-T**		**S1**	**GNR**
Graceful Nightshade				
T: dunes (Brunswick, Carteret, New Hanover*, Onslow, Pamlico)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Solidago leavenworthii	**T**		**S1**	**G3G4**
Leavenworth's Goldenrod				
C: savannas, pocosin borders, clay-based Carolina bays, peaty seeps (Carteret*, Columbus, Robeson, Sampson, Scotland*)				
Solidago plumosa	**T**		**S1**	**G1**
Yadkin River Goldenrod				
P: riverside rocks (Montgomery, Stanly)				
Solidago ptarmicoides	**E**		**S1**	**G5**
Prairie Goldenrod				
P: diabase glades (Granville, Rowan*)				
Solidago radula	**E**		**S1**	**G5?**
Western Rough Goldenrod				
P: dry woodlands over mafic rocks (Montgomery, Stanly, Wake*)				
Solidago rigida var. glabrata	**SR-P**		**S2**	**G5T4**
Southeastern Bold Goldenrod				
P: diabase glades, other open sites over mafic rock (Cabarrus, Durham, Granville, Mecklenburg*, Person, Rockingham, Union)				
Solidago rigida var. rigida	**T**		**S1**	**G5T5**
Prairie Bold Goldenrod				
M: forest openings, presumably on mafic or calcareous rocks (Buncombe*, Haywood*, Macon, Madison*, McDowell)				
Solidago simulans	**SR-L**		**S2**	**G2**
Granite Dome Goldenrod				
M: high and low elevation granitic domes south of the Asheville Basin (Buncombe, Graham, Jackson, Macon, Rutherford, Swain, Transylvania)				
Solidago spithamaea	**T**	**T**	**S2**	**G2**
Blue Ridge Goldenrod				
M: high elevation rocky summits (Ashe, Avery, Buncombe, Mitchell, Watauga)				
Solidago squarrosa	**SR-P**		**S1**	**G4G5**
Squarrose Goldenrod				
M: moist forests at high elevations (Buncombe*, Jackson, Watauga)				
Solidago tortifolia	**E**		**S1**	**G4G5**
Twisted-leaf Goldenrod				
CS: dry savannas and and mesic flats (Bladen, Brunswick*, Hoke, Jones*, New Hanover*, Pender, Robeson*, Scotland*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Solidago uliginosa var. uliginosa	**SR-P**		**S1S2**	**G5T4T5**
Bog Goldenrod				
MSP: bogs, seeps (Ashe, Clay*, Haywood, Macon*, Madison*, Transylvania, Watauga, Yancey)				
Solidago ulmifolia	**SR-D**		**S1?**	**G5**
Elm-leaf Goldenrod				
PM: wooded stream banks (Burke, Durham*, Jackson, McDowell, Rockingham, Rutherford)				
Solidago verna	**SR-O**		**S3**	**G3**
Spring-flowering Goldenrod				
CS: mesic to moist pinelands, pocosin ecotones (Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Duplin, Harnett, Hoke, Johnston, Jones, Moore, New Hanover, Onslow, Pamlico, Pender, Richmond, Sampson, Scotland)				
Solidago villosicarpa	**E**		**S1**	**G1**
Coastal Goldenrod				
C: edges and openings in maritime upland forests (Brunswick, Craven, Dare, New Hanover*, Onslow, Pender)				
Sparganium emersum	**T**		**S1**	**G5**
Greenfruit Bur-reed				
M: pondshores (Avery, Jackson*, Macon, Watauga)				
Spartina pectinata	**SC-V**		**S1**	**G5**
Freshwater Cordgrass				
MCS: freshwater marshes, spray zones of waterfalls, other moist sites (Alleghany, Ashe, Chowan*, Mitchell*, Montgomery*, Pasquotank, Transylvania)				
Spigelia marilandica	**T**		**S1**	**G4**
Pink-root				
M: open woods (Cherokee)				
Spiraea corymbosa	**E**		**S1**	**G5T4?**
Shinyleaf Meadowsweet				
P: open woods, thin soil over rock (Alexander, Alleghany, Catawba, Stokes)				
Spiraea virginiana	**T**	**T**	**S2**	**G2**
Virginia Spiraea				
M: riverbanks (Ashe, Buncombe, Graham, Macon, Mitchell, Swain, Transylvania, Yancey)				
Spiranthes eatonii	**E**		**S2**	**G2G4**
Eaton's Ladies'-tresses				
CS: pine savannas and pine-oak sandhills (Beaufort*, Bladen*, Brunswick, Carteret, Craven, Cumberland*, Moore, Onslow, Pamlico*, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Spiranthes floridana	**SR-P**		**S1**	**G1**
Florida Ladies'-tresses				
C: wet savannas and other moist sites (Brunswick, Pender*)				
Spiranthes lacera var. lacera	**E**		**S1**	**G5T5**
Northern Slender Ladies'-tresses				
M: mountain balds (Clay*, Jackson)				
Spiranthes laciniata	**SC-V**		**S2**	**G4G5**
Lace-lip Ladies'-tresses				
C: moist wet habitats (Beaufort*, Bladen, Brunswick, Carteret, Columbus, New Hanover, Onslow, Pender)				
Spiranthes longilabris	**E**		**S1**	**G3**
Giant Spiral Orchid				
C: savannas (Bladen, Brunswick, Carteret, Onslow, Pender)				
Spiranthes lucida	**E**		**S1**	**G4**
Shining Ladies'-tresses				
M: seepage over amphibolite (Alleghany)				
Spiranthes ochroleuca	**T**		**S1**	**G4**
Yellow Ladies'-tresses				
M: grassy balds, meadows, wooded slopes (Ashe, Avery, Buncombe*, Haywood*, Rutherford, Watauga, Yancey*)				
Sporobolus heterolepis	**T**		**S1**	**G5**
Prairie Dropseed				
M: olivine barrens (Clay, Jackson)				
Sporobolus teretifolius	**T**		**S1**	**G2**
Wireleaf Dropseed				
C: wet savannas (Brunswick, Columbus)				
Sporobolus virginicus	**T**		**S1**	**G5**
Saltmarsh Dropseed				
T: brackish marshes (Brunswick)				
Stachys appalachiana	**SR-L**		**S1**	**GNR**
Appalachian Hedge-nettle				
M: fens, usually over mafic or ultramafic rocks (Alleghany, Ashe*, Watauga*)				
Stachys cordata	**SR-P**		**S1**	**G5?**
Heartleaf Hedge-nettle				
M: rich forests, especially over calcareous rock (Madison, Montgomery)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Stachys eplingii	**SR-T**		**S1**	**GNR**
Epling's Hedge-nettle				
M: bogs (Burke*, Henderson, Jackson*, Watauga)				
Stachys matthewsii	**SR-T**		**S1**	**G1G2**
Yadkin Hedge-nettle				
P: sandy edges of forested floodplains (Durham*, Granville, Montgomery)				
Stachys tenuifolia	**SR-D**		**S1**	**G5**
Smooth Hedge-nettle				
C: swamp forests, edges of bottomlands (Bertie, Burke, Jackson, Macon, Martin, Northampton)				
Stenanthium gramineum var. robustum	**T**		**S1**	**G4G5T3**
Bog Featherbells				
M: bogs and wet meadows (Alleghany, Ashe, Avery)				
Stenanthium leimanthoides	**T**		**S1**	**G4Q**
Pinebarren Death-camas				
M: high elevation rocky summits, thin soil at high elevations (Ashe, Avery, Burke, Yancey)				
Stewartia ovata	**SR-P**		**S3**	**G4**
Mountain Camellia				
MP: bluffs and forests, usually with rhododendrons (Catawba, Cherokee, Clay, Graham, Granville, Haywood, Macon, Madison*, Montgomery, Randolph, Rutherford, Stokes, Swain, Transylvania, Wilkes)				
Streptopus amplexifolius var. amplexifolius	**SC-V**		**S1**	**G5T5**
White Mandarin				
M: spruce-fir forests (Buncombe, Haywood, Jackson, Mitchell, Swain*, Yancey)				
Stylisma aquatica	**E**		**S2**	**G4**
Water Dawnflower				
C: clay-based Carolina bays, pineland pools (Brunswick, Columbus*, Cumberland, Moore, Robeson, Scotland)				
Stylisma pickeringii var. pickeringii	**SC-V**		**S3**	**G4T3**
Pickering's Dawnflower				
SC: sandhills (Bladen, Carteret, Cumberland, Harnett, Hoke, Moore, New Hanover, Richmond, Sampson, Scotland)				
Symphyotrichum concinnum	**T**		**S2**	**G5T4**
Narrow-leaved Smooth Aster				
P: forests, woodland borders especially over mafic rocks (Alamance*, Alexander*, Caswell, Clay, Davie*, Durham, Granville, Iredell*, Orange*, Rutherford, Stanly, Union, Wake*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Symphyotrichum depauperatum	**E**		**S1**	**G2**
Serpentine Aster				
P: diabase glades (Granville)				
Symphyotrichum georgianum	**T**	**C**	**S3**	**G3**
Georgia Aster				
P: open woods, roadsides, and other rights-of-way (Davidson, Gaston, Lincoln, Mecklenburg, Montgomery, Randolph, Rowan, Stanly, Union)				
Symphyotrichum laeve	**SR-P**		**S1S2**	**G5**
Smooth Blue Aster				
P: forests, woodland borders especially over mafic rocks (Ashe, Clay, Gaston*, Graham, Jackson, Macon, Orange*, Polk*)				
Symphyotrichum oblongifolium	**T**		**S1**	**G5**
Aromatic Aster				
M: thin soils around limestone outcrops (Madison)				
Symphyotrichum rhiannon	**T**		**S1**	**G1**
Buck Creek Aster				
M: serpentine pine barrens (Clay)				
Symphyotrichum shortii	**SR-P**		**S2**	**G5**
Short's Aster				
M: bluffs and rocky banks (Cherokee, Transylvania*)				
Synandra hispidula	**E**		**S1**	**G4**
Synandra				
M: rich cove forests (Jackson*, Swain)				
Taxus canadensis	**T**		**S1**	**G5**
Canada Yew				
M: bogs, swamp forests under spruce (Ashe, Watauga)				
Thalictrum cooleyi	**E**	**E**	**S1**	**G1**
Cooley's Meadowrue				
C: wet savannas (Brunswick, Columbus, New Hanover, Onslow, Pender)				
Thalictrum macrostylum	**SR-T**		**S2**	**G3G4**
Small-leaved Meadowrue				
CSPM: bogs and wet woods (Alleghany, Ashe, Beaufort, Carteret, Cherokee, Clay, Cumberland, Gates, Graham, Henderson, Hertford, Hyde*, Jones, Macon, McDowell, Moore, Nash, New Hanover, Northampton, Pender, Richmond, Rutherford, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Thaspium pinnatifidum	**T**		**S1**	**G2G3**
Mountain Thaspium				
M: calcareous slopes (Jackson*, Macon, Madison, McDowell, Swain*)				
Thelypteris simulata	**E**		**S1**	**G4G5**
Bog Fern				
M: bogs (Alleghany, Avery)				
Thermopsis fraxinifolia	**SC-V**		**S2?**	**G3?**
Ash-leaved Golden-banner				
MP: dry ridges (Buncombe, Burke, Henderson, Jackson, Macon, McDowell, Polk, Stokes, Surry, Transylvania, Yancey)				
Thermopsis mollis	**SC-V**		**S2**	**G3G4**
Appalachian Golden-banner				
PM: dry ridges and open woodlands (Alexander, Buncombe*, Burke, Cabarrus*, Caldwell, Catawba, Chatham*, Cleveland, Columbus*, Durham*, Forsyth*, Franklin*, Gaston, Granville, Guilford*, Henderson, Iredell*, Lincoln, McDowell, Orange, Polk, Rutherford, Stokes, Surry, Vance*, Wake, Warren)				
Tomostima reptans	**SR-P**		**SH**	**G5**
Creeping Draba				
P: dry soil (Lincoln*)				
Torreyochloa pallida var. pallida	**SR-P**		**S1**	**G5**
Pale Mannagrass				
CM: blackwater pools, old millponds, and small stream swamps (Avery*, Columbus*, Currituck, Duplin*, Gates, Harnett, Henderson, Martin)				
Tradescantia virginiana	**T**		**S2**	**G5**
Virginia Spiderwort				
P: rich woods on circumneutral soils (Ashe, Burke, Caswell, Harnett, Lincoln, McDowell, Mecklenburg, Montgomery*, Moore, Orange, Randolph, Rockingham, Rutherford, Stanly, Surry, Wake)				
Triantha glutinosa	**SC-V**		**S1**	**G5**
Sticky Bog Asphodel				
MP: bogs, seepages (Ashe, Caldwell*, Haywood, Henderson*, Jackson, Transylvania)				
Trichophorum cespitosum	**SR-D**		**S2S3**	**G5**
Deerhair Bulrush				
M: high elevation rocky summits, moist cliffs (Ashe, Avery, Buncombe, Burke, Caldwell*, Haywood, Henderson, Jackson, Macon, Mitchell, Rutherford, Transylvania, Watauga, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Trichostema brachiatum	**E**		**S1**	**G5**
Glade Bluecurls				
PM: diabase glades, other dry calcareous or mafic outcrops (Buncombe, Granville, Madison, Orange*, Rockingham, Yancey*)				
Trichostema setaceum	**SR-T**		**S2**	**G5**
Narrowleaf Bluecurls				
SPC: dry woodlands, granite flatrocks (Alexander, Bladen, Burke, Cleveland, Hoke, Macon, McDowell, Moore, Richmond, Robeson, Rutherford, Wake, Wilkes)				
Trichostema sp. 1	**SR-L**		**S2**	**G2**
Dune Bluecurls				
T: dunes, openings in maritime forest and scrub (Brunswick, Carteret, Dare, Hyde, New Hanover)				
Tridens ambiguus	**E**		**S1**	**G4**
Pineland Triodia				
C: clay-based Carolina bays (Scotland)				
Tridens chapmanii	**T**		**S1S2**	**G5T3**
Chapman's Redtop				
CP: dry pine and oak woods, sandy roadsides (Bladen, Carteret*, Craven, Dare, Durham*, Hoke, Jones, Martin*, Montgomery, Moore, Orange*, Pender, Richmond, Scotland*)				
Tridens strictus	**SC-H**		**SH**	**G5**
Spike Triodia				
C: pine flatwoods (Duplin*, Hoke*, Pender*, Robeson*)				
Trientalis borealis	**E**		**S1**	**G5**
Starflower				
M: coves, northern hardwood forest (Buncombe, Cherokee, Graham, Haywood)				
Trifolium carolinianum	**SC-H**		**SH**	**G5**
Carolina Clover				
C: savannas, sandy open areas (Duplin*, New Hanover*, Onslow*)				
Trifolium reflexum	**T**		**S1S2**	**G3G4**
Buffalo Clover				
PMSC: open woods and clearings (Ashe, Buncombe*, Caswell, Chatham*, Durham*, Granville, Halifax*, Harnett, Iredell, Madison, Montgomery, Moore, Randolph*, Wake, Yadkin)				
Trillium discolor	**T**		**S1**	**G4**
Mottled Trillium				
M: rich coves in the Savannah River drainage (Jackson, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Trillium flexipes	**SC-H**		**S1**	**G5**
Bent White Trillium				
M: rich coves (Cherokee, Henderson, Swain*)				
Trillium pusillum var. ozarkanum	**E**		**S1**	**G3T3**
Alabama Least Trillium				
M: rich cove forests (Clay, Haywood*, Macon)				
Trillium pusillum var. pusillum	**E**		**S2**	**G3T2Q**
Carolina Least Trillium				
CP: ecotones between savannas and nonriverine wet hardwood forests, over marl (Anson, Onslow, Pender)				
Trillium pusillum var. virginianum	**E**		**S1**	**G3T2**
Virginia Least Trillium				
C: mesic to swampy hardwood forests (Camden, Currituck, Gates, Halifax, Johnston, Nash, Wake)				
Trillium recurvatum	**SR-P**		**S1**	**G5**
Prairie Trillium				
M: rich coves (Catawba)				
Trillium sessile	**T**		**S1**	**G4G5**
Sessile-flowered Trillium				
C: rich alluvial levees and slopes (Halifax, Northampton)				
Trillium simile	**T**		**S2**	**G3**
Sweet White Trillium				
MP: rich coves (Buncombe, Burke, Cherokee, Graham, Haywood*, Henderson, Jackson, Macon, Madison, McDowell, Polk, Rutherford, Swain*, Yancey)				
Trisetum spicatum	**SC-H**		**SH**	**G5**
Soft Trisetum				
M: grassy balds and/or high elevation rocky summits (Mitchell*)				
Turritis glabra	**E**		**S1**	**G5**
Tower Mustard				
M: mountain forests and meadows (Avery, Madison*, Watauga)				
Urtica chamaedryoides	**E**		**S2**	**G4G5**
Dwarf Stinging Nettle				
C: rich blackwater and brownwater levee forests (Bertie, Halifax, Johnston, Northampton)				
Utricularia cornuta	**T**		**S1S2**	**G5**
Horned Bladderwort				
CM: bogs, limesink ponds (Ashe, Brunswick, Columbus, Franklin, New Hanover, Robeson*, Rutherford, Watauga)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Utricularia floridana	**SR-T**		**SH**	**G3G5**
Florida Bladderwort				
C: natural lakes (Bladen*, Wayne*)				
Utricularia geminiscapa	**SC-V**		**S1**	**G4G5**
Two-flowered Bladderwort				
SC: seepage areas on Suffolk Scarp, beaver ponds (Beaufort, Cumberland, Hoke, Moore, Pender)				
Utricularia macrorhiza	**SR-O**		**S1?**	**G5**
Greater Bladderwort				
C: pools and ponds (Dare, Hyde)				
Utricularia minor	**SC-H**		**SH**	**G5**
Small Bladderwort				
M: bogs (Watauga*)				
Utricularia olivacea	**T**		**S2**	**G4**
Dwarf Bladderwort				
C: limesink ponds, beaver ponds (Brunswick, Carteret, Craven*, Cumberland, Hoke, New Hanover, Onslow, Pender)				
Utricularia resupinata	**E**		**S1**	**G4**
Northeastern Bladderwort				
C: natural lakes (Columbus, Washington)				
Vaccinium angustifolium	**SR-P**		**S1**	**G5**
Northern Lowbush Blueberry				
M: High elevation acidic forests and woodlands (Graham, Swain)				
Vaccinium macrocarpon	**T**		**S2**	**G5**
Cranberry				
MC: bogs, seeps, pocosins (Alleghany, Ashe, Avery, Bladen*, Brunswick, Burke, Caldwell*, Cumberland, Currituck*, Dare, Haywood, Hyde, Transylvania, Tyrrell, Watauga)				
Vandenboschia boschiana	**E**		**S1**	**G4**
Appalachian Filmy-fern				
M: spray zone of waterfalls, seeps over rock (Graham, Henderson*, Jackson, Macon, Polk*, Rutherford*)				
Veratrum woodii	**T**		**S1**	**G5**
Ozark Bunchflower				
M: circumneutral soil of woodlands over mafic rocks such as amphibolite or other calcareous substrates (Polk)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Verbesina walteri	**SR-T**		**S1**	**G4**
Walter's Crownbeard				
M: rich cove forests (Henderson, Macon, Mitchell, Polk, Transylvania, Yancey)				
Veronica americana	**T**		**S2**	**G5**
American Speedwell				
MC: seeps, bogs (Alleghany, Ashe*, Avery, Craven*, Madison, Mitchell*, Watauga, Yancey*)				
Viola appalachiensis	**SC-V**		**S2**	**G4**
Appalachian Violet				
M: olivine barrens and alluvial forests (Clay, Jackson, Macon, Swain)				
Viola walteri	**SR-T**		**S1**	**G4G5**
Prostrate Blue Violet				
MP: rich cove forests and other rich forests (Jackson, Montgomery, Richmond, Stanly, Transylvania)				
Warea cuneifolia	**E**		**S1**	**G4**
Carolina Pineland-cress				
S: sandhills (Harnett*, Hoke)				
Woodsia appalachiana	**SR-P**		**S2**	**G4**
Appalachian Cliff Fern				
M: cliffs, rock outcrops (Alleghany, Ashe, Buncombe*, Burke, Caldwell, Henderson, McDowell, Polk, Rutherford, Surry, Transylvania, Wilkes*)				
Woodsia ilvensis	**E**		**S1**	**G5**
Rusty Cliff Fern				
M: cliffs, rock outcrops (Alleghany, Ashe, Surry)				
Xyris chapmanii	**SC-V**		**S3**	**G3**
Chapman's Yellow-eyed-grass				
S: mucky sandhill seeps (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Xyris floridana	**T**		**S1**	**G5T4T5**
Florida Yellow-eyed-grass				
C: savannas (Brunswick, Carteret, Columbus, Hoke, Onslow, Pender, Robeson*)				
Xyris scabrifolia	**SC-V**		**S2**	**G3**
Harper's Yellow-eyed-grass				
S: sandhill seeps and bogs (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Xyris serotina	**T**		**S1**	**G3G4**
Acid-swamp Yellow-eyed-grass				
C: savannas (Columbus*)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Xyris stricta **Pineland Yellow-eyed-grass** C: savannas (Brunswick, Carteret, Pender*)	**E**		**S1**	**G4**
Yucca gloriosa **Moundlily Yucca** T: dunes (Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)	**SR-P**		**S2?**	**G4?**
Zephyranthes simpsonii **Rain Lily** C: roadsides, calcareous coastal fringe forest (Brunswick)	**E**		**S1**	**G2G3**
Mosses				
Aphanorrhegma serratum **A Moss** P: soil or clay in places subject to inundation (Durham*)	**SR-O**		**SH**	**G4G5**
Archidium donnellii **Donnell's Archidium** P: sandy or gravelly soil along roadsides, in fields, near granitic outcrops (Wake)	**SR-O**		**S1**	**G3G5**
Archidium tenerrimum **An Earth Moss** C: dunes, maritime grasslands (Dare*)	**SR-O**		**SH**	**G5?**
Astomum ludovicianum **A Moss** CP: moist soil, fields, among grasses, roadside banks (Durham*, Johnston*, Rowan, Sampson*)	**SR-T**		**S1?**	**G3G4**
Bellibarbula recurva **Recurved bryoerythrophyllum moss** M: thin soil over moist rock	**SR-P**		**S1?**	**G3G5**
Brachydontium trichodes **Peak Moss** M: on moist rocks in spruce-fir forests (Mitchell, Swain)	**SR-D**		**S1**	**G2G4**
Brachymenium andersonii **Anderson's Melon-moss** M: on humus in acidic cove forests - mixed hardwood-hemlock (Macon)	**SR-L**		**SH**	**GH**
Brachymenium systylium **Mexican Melon-moss** M: on humus in acidic cove forests mixed hardwood-hemlock (Macon*, Rutherford)	**SR-D**		**S1**	**G5**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Brachythecium populeum	**SR-P**		**S1**	**G5**
Matted Feather Moss				
M: mountain forests (Avery*, Caldwell*, Rutherford, Watauga*)				
Brachythecium rotaeanum	**SR-D**		**S1**	**G5**
Rota's Feather Moss				
CMP: on bark or rock in cove forests (Avery*, Caldwell*, Camden*, Craven*, Durham*, Graham, Haywood, Jackson*, Jones*, Martin*, McDowell*, Mitchell*, Pasquotank*, Rowan*, Rutherford, Swain*, Transylvania, Watauga*)				
Bruchia brevifolia	**SR-T**		**S1?**	**G3G4**
A Pygmy Moss				
C: soil of disturbed habitats (Harnett*, Pender*, Sampson)				
Bruchia carolinae	**SR-L**		**S1?**	**G3?**
A Pygmy Moss				
S: sandy soil of roadsides, old fields, or other disturbed areas (Lee*)				
Bruchia fusca	**SR-T**		**SH**	**G1?**
A Pygmy Moss				
S: sandy soil (Harnett*)				
Bruchia hallii	**SR-T**		**SH**	**G2**
A Pygmy Moss				
C: sandy soil in open places (Pender*)				
Bryocrumia vivicolor	**SR-T**		**SH**	**G1G2**
Gorge Moss				
M: rocks and streambanks in humid gorges, spray zones of waterfalls (Jackson, Transylvania)				
Bryoerythrophyllum ferruginascens	**SR-D**		**S1**	**G3G4**
Rust Foot Moss				
M: on moist rocks or soil at high elevations (Jackson, Rutherford*)				
Bryoerythrophyllum inaequalifolium	**SR-D**		**S1**	**G4?**
A Foot Moss				
M: on thin soil over shale (McDowell*)				
Bryoxiphium norvegicum	**SR-O**		**S1**	**G5?**
Sword Moss				
M: rocks in humid gorges, spray zones of waterfalls (Jackson, Macon, McDowell*, Transylvania)				
Bryum limbatum	**SR-D**		**S1?**	**G5?**
A Moss				
P: low elevation rocky summits (Rutherford)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Bryum riparium	**SR-D**		**SH**	**G2G4**
Riverside Bryum				
M: spray zones of waterfalls (Transylvania*)				
Buxbaumia aphylla	**SR-O**		**SH**	**G5**
Bug-on-a-stick				
M: forests, roadside banks (Haywood*)				
Buxbaumia minakatae	**SR-T**		**SH**	**G2G4**
Hump-backed Elves				
M: on rotten logs and stumps in mountain forests (Avery*, Watauga*)				
Campylium stellatum	**SC-V**		**S1**	**G5**
Yellow Starry Fen Moss				
M: fens (Ashe)				
Campylopus atrovirens var. atrovirens	**SR-D**		**S1?**	**G4G5TNR**
Black Fish Hook Moss				
M: near crevices and seepage zones on exposed granite (Ashe*, Buncombe*, Haywood, Jackson*, Macon*, Transylvania)				
Campylopus carolinae	**SR-T**		**S1S2**	**G2**
Savanna Campylopus				
C: Obscure in xeric sandy soils or compact tufts of other mosses (Bladen, Brunswick, Carteret, Columbus, Cumberland, Sampson, Scotland)				
Campylopus oerstedianus	**SR-D**		**S1**	**G2G3**
Oersted's Campylopus				
P: granite flatrocks (Rutherford, Wake)				
Campylopus paradoxus	**SR-D**		**S1**	**G5**
Paradoxical Campylopus				
M: high elevation rock outcrops (Avery*)				
Cirriphyllum piliferum	**SR-P**		**S1**	**G5**
Long Leaf Mustache Moss				
M: moist rocks, wet by seepage or waterfall spray (Alleghany*, Jackson, McDowell*, Swain*, Transylvania)				
Cleistocarpidium palustre	**SR-D**		**S1**	**G5?**
Prairie Pleuridium				
P: wet soil, sandy swamps (McDowell, Wake)				
Coscinodon cribrosus	**SR-T**		**S1**	**G3G4**
Copper Grimmia				
MP: rock outcrops and cliffs (Alleghany*, Burke)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cryphaea nervosa	**SR-T**		**S1?**	**G4?**
A Thread Cedar Moss				
MP: trunks of trees in humid forests, sometimes in swamp forests (Macon*, Moore*, Orange, Swain*)				
Cyrto-hypnum pygmaeum	**SR-O**		**S1?**	**G4G5**
Pygmy Cyrto-hypnum Moss				
M: moist woods, over moist rocks (Rutherford*, Swain*)				
Dichelyma capillaceum	**SR-P**		**S1?**	**G5**
Hair Claw Moss				
P: bases of trees, stumps, or on rocks in places submerged at high water (McDowell, Mecklenburg*, Orange)				
Dichodontium pellucidum	**SR-P**		**S2**	**G5**
Transparent Fork Moss				
M: seepage or spray zones of waterfalls on mafic or calcareous rocks (Ashe*, Buncombe*, Haywood*, Jackson*, Macon, McDowell*, Mitchell*, Swain*, Transylvania*, Yancey*)				
Dicranella rufescens	**SR-O**		**S1?**	**G5?**
Red Fork Moss				
MP: wet soil on banks of roads and streams (Burke, Durham*, Jackson, Macon*, Rutherford, Transylvania)				
Dicranella varia	**SR-O**		**S1?**	**G5**
Variable Fork Moss				
MP: wet, calcareous soil, in open, disturbed places (Durham*, Granville, Macon*, Rutherford)				
Dicranum undulatum	**SR-D**		**S1**	**G5**
Bog Broom-moss				
M: bogs, seeps (Avery, Buncombe*, Burke*, Haywood*, McDowell*, Yancey*)				
Didymodon fallax	**SR-O**		**SH**	**G5**
Fallacious Screw Moss				
M: soil, silt, sandstone, concrete, calcareous rock (McDowell*)				
Didymodon tophaceus	**SR-O**		**S1?**	**G5**
Three-ranked Didymodon				
MP: on limestone, limy shale, clay in moist areas, seepages, waterfalls (McDowell*, Rowan)				
Ditrichum ambiguum	**SR-P**		**S1**	**G4?**
Ambiguous Ditrichum				
M: acidic cove forests (Macon)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Ditrichum rhynchostegium	**SR-T**		**S1?**	**G3G5**
Ditrichum Moss				
MP: sandy or clay soil, clearings in woods, over rocks and along streams (Jackson*, Macon, Surry*, Transylvania*)				
Encalypta procera	**SR-D**		**S1**	**G5**
Extinguisher Moss				
M: on moist calcareous rocks (Macon, McDowell)				
Entodon compressus	**SR-P**		**S1**	**G4**
Flattened Entodon				
MP: on moist calcareous rocks (Macon, McDowell*, Person*, Rockingham*)				
Entodon concinnus	**SR-P**		**S1**	**G4G5**
Lime Entodon				
M: on moist calcareous rocks (McDowell*)				
Entodon sullivantii	**SR-O**		**S2**	**G3G4**
Sullivant's Entodon				
M: on rocks or bark in humid gorges and cove forests (Buncombe*, Burke, Caldwell*, Graham*, Jackson, Macon, McDowell, Polk*, Swain, Transylvania)				
Ephemerum cohaerens	**SR-T**		**SH**	**G4G5**
Northern Short-lived Moss				
P: moist or drying disturbed soil (Durham*)				
Eucladium verticillatum	**SR-O**		**S1**	**G4**
Lime-seep Eucladium				
M: on moist calcareous rocks (McDowell)				
Fissidens asplenioides	**SR-O**		**SH**	**G3G5**
A Plume Moss				
P: sandstone ledges and crevices in moist ravines and grottoes, along streams and waterfalls (Stokes*)				
Fissidens hallianus	**SR-O**		**SH**	**GNRQ**
A Plume Moss				
C: on bark in cypress-gum swamps (Beaufort*)				
Fissidens hallii	**SR-T**		**S1**	**G2**
Hall's Pocket Moss				
C: on bark in cypress-gum swamps (Jones*)				
Fissidens scalaris	**SR-O**		**SH**	**GNR**
A Plume Moss				
P: bare, disturbed soil of stream banks and roadsides (Mecklenburg*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Fontinalis sphagnifolia	**SR-O**		**S1?**	**G3G5**
A Water Moss				
M: on rocks in flowing water (Macon)				
Fontinalis welchiana	**SR-T**		**S1?**	**GU**
Welch's fontinalis moss				
P: submerged rocks (Orange)				
Grimmia longirostris	**SR-D**		**S1?**	**G5**
A Beard Moss				
M: waterfall spray zones (Transylvania*)				
Herzogiella turfacea	**SR-P**		**S1?**	**G5**
Flat Stump Moss				
M: on bases of trees and rotten logs in coniferous and hardwood forests (Burke, Jackson, Swain, Transylvania, Yancey)				
Homalia trichomanoides	**SR-P**		**S1**	**G5**
Lime Homalia				
M: in spray zones of waterfalls, on rocks in humid gorges (Avery, Jackson, Macon*, McDowell, Transylvania)				
Homaliadelphus sharpii	**SR-P**		**SH**	**G3?**
Sharp's Homaliadelphus				
M: on dry mafic or calcareous rocks in gorges (Jackson*, Transylvania*)				
Hygrohypnum closteri	**SR-T**		**S1**	**G3**
Closter's Brook-hypnum				
MP: on rocks submersed in streams (McDowell*, Orange, Polk*, Swain*)				
Hylocomiastrum umbratum	**SR-P**		**S1?**	**G5**
Shaded Feather Moss				
M: on trees and rocks in moist forests, especially under spruce-fir (Macon, Swain*, Yancey*)				
Hypnum pratense	**SR-P**		**S1?**	**G5**
Meadow Feather Moss				
M: terrestrial in damp open sites, swampy and peatland areas (Ashe, Jackson)				
Leptodontium excelsum	**SR-L**		**S1**	**G2**
Grandfather Mountain Leptodontium				
M: on bark of Fraser Firs and Red Spruces in spruce-fir forests (Avery, Caldwell, Haywood, Jackson, Mitchell, Swain, Transylvania*, Watauga)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Leptodontium flexifolium	**SR-D**		**S1**	**G5**
Pale-margined Leptodontium				
M: high elevation rocky summits and moist calcareous rocks (Ashe*, Avery, Caldwell, Haywood*, Swain*, Transylvania*, Watauga, Yancey*)				
Leptohymenium sharpii	**SR-L**		**S1**	**G1**
Mount Leconte Moss				
M: moist rocks in spruce-fir forests (Haywood*, Jackson, Mitchell*, Swain*, Yancey)				
Leskeella nervosa	**SR-O**		**SH**	**G5**
Common Fine Moss				
M: dry or moist, shaded substrates (Haywood*)				
Lindbergia brachyptera	**SR-P**		**S1**	**G5**
Lindberg's Maple-moss				
M: bark of hardwoods (Ashe*, Cherokee*, McDowell, Watauga)				
Macrocoma sullivantii	**SR-D**		**S2**	**G3G5**
Sullivant's Maned-moss				
MP: bark of cedar or hardwoods (Burke, Clay*, Jackson, Macon, Rutherford, Swain, Transylvania, Wilkes)				
Micromitrium synoicum	**SR-O**		**S1?**	**G4**
A Moss				
P: drying or dried ponds, edges of lakes or streams, bare soil in open forests (Durham)				
Neckera complanata	**SR-O**		**S1**	**G5**
Flat Feather Moss				
M: on calcareous rocks in humid gorges (Jackson, Transylvania)				
Orthodontium pellucens	**SR-O**		**S1**	**G5**
Translucent Orthodontium				
MP: moist felsic or calcareous rocks (Stokes*, Swain*)				
Orthotrichum exiguum	**SR-O**		**SH**	**G3?**
Small Wood-bark Moss				
P: base of trees or on tree trunks (Union*)				
Orthotrichum keeverae	**SR-L**		**S2**	**G2**
Keever's Bristle-moss				
MP: on trees around low elevation granitic domes (Alexander, Alleghany, Wilkes)				
Orthotrichum obtusifolium	**SR-P**		**S1**	**G5**
Blunt Bristle-moss				
M: bark of hardwoods (Ashe*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Orthotrichum strangulatum	**SR-P**		**SH**	**G4**
Drummond Moss				
MP: exclusively on dry, exposed, calcareous or dolomitic bluffs and rock faces (Forsyth*, Madison*, McDowell*)				
Oxyrrhynchium pringlei	**SR-D**		**S1**	**G2G3**
Pringle's Water Feather Moss				
M: rocks and streambanks in humid gorges, spray zones of waterfalls (Burke, Macon, McDowell, Polk, Transylvania)				
Palamocladium leskeoides	**SR-D**		**S1**	**G3G5**
Palamocladium				
M: calcareous rocks in humid gorges (Jackson*)				
Philonotis cernua	**SR-D**		**S1**	**G4?**
Dwarf Apple Moss				
M: in spray zones of waterfalls, moist rocks in humid gorges (Jackson, Macon, Rutherford*, Transylvania)				
Philonotis uncinata	**SR-P**		**SH**	**G5**
An Apple Moss				
M: rocks and soil in open habitats (Transylvania*)				
Pilosium chlorophyllum	**SR-D**		**S1?**	**GNR**
A Moss				
M: moist area on trees (Jackson, Transylvania)				
Plagiomnium carolinianum	**SR-L**		**S2**	**G3**
Carolina Star-moss				
M: rocks and streambanks in humid gorges (Jackson, Macon*, Swain*, Transylvania, Yancey)				
Plagiomnium ellipticum	**SR-P**		**S1?**	**G5**
Marsh Magnificent Moss				
M: rocks in moist areas (Graham)				
Plagiomnium rostratum	**SR-P**		**S1?**	**G5**
Long-beaked Thread Moss				
M: wet rocks (Buncombe, Macon, McDowell*, Transylvania)				
Platydictya confervoides	**SR-P**		**S1**	**G4G5**
Alga-like Matted-moss				
M: calcareous rocks (Madison*, McDowell*)				
Platyhypnidium riparioides	**SR-O**		**S1?**	**G4**
Long-beaked Water Feather Moss				
M: streams (Graham, Haywood, Jackson, Macon*, Rutherford, Transylvania)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Pleuridium sullivantii	**SR-O**		**SH**	**G3G5**
A Moss				
S: sandy soil in open weedy habitats, openings in woods, disturbed roadsides (Harnett*)				
Pleurochaete luteola	**SR-O**		**S1?**	**G5?**
Spring-leaved Screw Moss				
P: exposed clay or sandy soil over calcareous rock (Durham)				
Pogonatum dentatum	**SR-P**		**S1?**	**G5**
Hair-like Hair-cap				
M: dry, sunny habitats, sandy or gravelly soil, rocks (Mitchell)				
Pohlia lescuriana	**SR-T**		**S1?**	**G4G5**
Spherical Bulb Nodding Moss				
MP: on wet, noncalcareous soil in open areas (Ashe*, Burke, Forsyth*, Jackson, Macon, Rutherford, Watauga)				
Pohlia melanodon	**SR-D**		**S1?**	**G4?**
Pink-fruited Thread-moss				
P: moist, clay soils (Durham, Yancey*)				
Polytrichastrum alpinum	**SR-D**		**S1?**	**G5**
Alpine Hair Moss				
M: open areas on rocks or humus (Mitchell)				
Racomitrium aciculare	**SR-P**		**S1?**	**G5**
Dark Mountain Fringe Moss				
M: wet, shaded, acid rocks (Burke, Jackson, Macon, Transylvania)				
Rhabdoweisia crenulata	**SR-D**		**S1**	**G3G5**
Himalayan Ribbed-weissia				
M: moist rocks in cove forests in humid gorges (Jackson, McDowell)				
Rhachithecium perpusillum	**SR-D**		**S1S2**	**G4G5**
Budding Tortula				
PM: bark of hardwoods (Ashe*, Cleveland*, Iredell*, McDowell*, Mecklenburg*, Surry*, Watauga*, Wilkes*)				
Rhytidiadelphus subpinnatus	**SR-T**		**S1?**	**G5**
Subpinnate Gooseneck Moss				
M: damp to wet substrates in swamps and moist forests, along streams, spray of waterfalls (Macon)				
Rhytidium rugosum	**SR-P**		**S2**	**G5**
Golden Tundra-moss				
M: high elevation rocky summits, grassy balds, glades, over mafic rocks (Ashe, Avery, Buncombe*, Caldwell, Mitchell, Watauga, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Schlotheimia lancifolia	**SR-O**		**S1**	**G2**
Highlands Moss				
M: on bark of hardwoods in cove forests (Clay, Graham, Jackson, Macon, Transylvania)				
Scopelophila cataractae	**SR-D**		**S1**	**G3**
Agoyan Cataract Moss				
MP: copper-rich soils (Burke, Cabarrus, Davidson, Jackson, McDowell, Montgomery, Rowan)				
Scopelophila ligulata	**SR-O**		**S1**	**G5?**
Copper Moss				
MP: copper-rich soils and rock faces (Buncombe, Burke, Cabarrus, Clay*, Graham, Haywood, Jackson*, McDowell, Rowan, Swain, Transylvania)				
Sphagnum angustifolium	**SR-D**		**S1**	**G5**
Narrowleaf Peatmoss				
M: bogs (Alleghany, Ashe, Jackson, Mitchell, Transylvania, Watauga)				
Sphagnum capillifolium	**SR-P**		**S1**	**G5**
Northern Peatmoss				
M: bogs, heath bald (Ashe, Avery*, Buncombe, Burke, Caldwell*, Henderson*, Jackson, Macon*, Watauga)				
Sphagnum contortum	**T**		**S1**	**G5**
Contorted Peatmoss				
M: bogs (Ashe, Burke, Watauga)				
Sphagnum fallax	**SR-P**		**S2**	**G5**
Pretty Peatmoss				
CM: bogs (Ashe, Avery, Brunswick*, Burke, Catawba, Jackson, McDowell)				
Sphagnum flavicomans	**SR-T**		**SH**	**G5**
Peatmoss				
M: spray cliff, spruce-fir forest, or high elevation rocky summit (Macon*, Mitchell*)				
Sphagnum flexuosum	**SR-P**		**S1**	**G5**
Flexuous Peatmoss				
M: bogs (Jackson, McDowell, Watauga)				
Sphagnum fuscum	**SR-P**		**S1**	**G5**
Brown Peatmoss				
M: bogs (Ashe, Watauga)				
Sphagnum pylaesii	**SR-D**		**S1**	**G4**
Simple Peatmoss				
M: seepage cliffs, natural pools (Burke, Jackson)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Sphagnum russowii **Russow's Peatmoss** M: bogs (Bertie, Macon*, Watauga)	**SR-D**		**S1**	**G5**
Sphagnum squarrosum **Squarrose Peatmoss** M: spray zones of waterfalls, seepage in spruce-fir forests (Burke, Macon, Watauga*, Yancey)	**SR-P**		**S1**	**G5**
Sphagnum subsecundum **Orange Peatmoss** M: bogs and rock ledges (Ashe, Avery, Burke*, Catawba, Haywood*, Jackson, Macon, McDowell, Mitchell, Swain, Transylvania, Wake, Watauga)	**SR-P**		**S1**	**G5**
Sphagnum tenellum **Delicate Peatmoss** M: high elevation granitic domes (Jackson)	**SR-D**		**S1**	**G5**
Sphagnum torreyanum **Giant Peatmoss** C: beaver ponds and old mill ponds on blackwater creeks (Craven, Dare, Harnett*, Hoke, Jones, Richmond, Scotland, Tyrrell)	**SR-P**		**S1**	**G5**
Sphagnum warnstorfii **Fen Peatmoss** M: bogs and fens (Alleghany, Burke, McDowell, Watauga)	**SR-D**		**S1**	**G5**
Splachnum pennsylvanicum **Southern Dung Moss** M: bogs (Avery*, Macon*)	**SR-O**		**SH**	**G4?**
Syrrhopodon incompletus **Cuban Schliessmund** T: on treetrunks in maritime forests (Brunswick*)	**SR-P**		**S1**	**G5**
Taxiphyllum alternans **Japanese Yew-moss** M: on limestone in spray zones of waterfalls (Macon)	**SR-O**		**S1**	**G3?**
Taxiphyllum cuspidifolium **A Moss** M: on limestone in spray zones of waterfalls (Macon*)	**SR-T**		**S1**	**G2G4**
Tetrodontium brownianum **Little Georgia** M: shady recesses of rock overhangs (Jackson, Transylvania)	**SR-T**		**S1**	**G3G4**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Tortula ammonsiana	**SR-O**		**S1**	**G1G3**
Ammons's Tortula				
M: shaded rock faces, probably with nutrient-rich seepage (Jackson)				
Tortula fragilis	**SR-D**		**S1**	**G5**
Fragile Tortula				
M: shaded rock faces, probably with nutrient-rich seepage (Jackson*)				
Tortula papillosa	**SR-P**		**S1**	**G5**
Papillose Tortula				
PM: bark of hardwoods (Davie*, Haywood, Madison*, Orange, Surry*, Watauga)				
Tortula plinthobia	**SR-O**		**S1?**	**G4G5**
A Chain-teeth Moss				
CMP: calcareous rocks, concrete or mortared walls (Carteret, Craven*, Madison*, Wake*)				
Warnstorfia fluitans	**SR-D**		**S1**	**G5**
Floating Sickle-moss				
M: in spray zones of waterfalls (Avery, Jackson*, Transylvania*)				
Weissia sharpii	**SR-O**		**S1?**	**G3**
A Moss				
P: calcareous rock, cedar-oak bluffs, cedar barrens (Davidson, Rutherford)				
Zygodon viridissimus var. 1	**SR-L**		**SH**	**GU**
A Moss				
M: bark of hardwoods in dry oak-hickory forests (Alleghany*)				

Liverworts

Acrobolbus ciliatus	**SC-V**		**S1**	**G3?**
A Liverwort				
M: on moist rocks, in spray zones of waterfalls in humid gorges or in high elevation spruce-fir forests (Buncombe, Haywood*, Jackson, Macon, Transylvania, Yancey*)				
Anastrophyllum saxicola	**SR-D**		**S1**	**G3G4**
A Liverwort				
M: high elevation rocky summits (Mitchell*)				
Aneura sharpii	**SR-T**		**S1**	**G1G2**
A Liverwort				
MP: in spray zones of waterfalls (Alleghany, Durham*, Jackson*, Macon*, McDowell, Rutherford, Swain, Transylvania*, Watauga)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Barbilophozia barbata	**SR-D**		**S1**	**G5**
A Liverwort				
M: on high elevation rocky summits (Alleghany*, Ashe, Wilkes*)				
Barbilophozia hatcheri	**SR-D**		**S1**	**G5**
A Liverwort				
M: on high elevation rocky summits (Ashe, Yancey*)				
Bazzania nudicaulis	**SR-T**		**S2**	**G2G3**
A Liverwort				
M: on bark of Fraser Fir or on shaded rock in spruce-fir forests (Avery, Buncombe*, Caldwell, Mitchell, Swain, Watauga, Yancey)				
Cephalozia connivens var. bifida	**SR-T**		**S1**	**G5T1Q**
A Liverwort				
C: moist riverbank (New Hanover*, Pender*)				
Cephalozia pleniceps var. caroliniana	**SR-L**		**SH**	**G5T1**
A Liverwort				
M: edge of stream (Transylvania*)				
Cephalozia pleniceps var. pleniceps	**SR-D**		**SH**	**G5T5**
A Liverwort				
M: moist soil near a spring (Yancey*)				
Cephaloziella hampeana	**SR-D**		**S1**	**G5**
A Liverwort				
M: fens (Ashe*, Rutherford)				
Cephaloziella spinicaulis	**SR-P**		**S1**	**G3G4**
A Liverwort				
M: in crevices of high elevation rocky summits (Alleghany*, Ashe*, Buncombe, Haywood, Macon, Madison, McDowell, Transylvania)				
Cheilolejeunea discoidea	**SR-P**		**SH**	**GU**
A Liverwort				
MC: on tree bark in sandhills or mountain forests (Sampson*, Transylvania*)				
Cheilolejeunea evansii	**SR-L**		**S1**	**G1G2**
A Liverwort				
M: on bark of hardwoods in humid gorges (Jackson, Macon, Transylvania)				
Cheilolejeunea rigidula	**SR-P**		**S2**	**G5**
A Liverwort				
CT: on bark in maritime forests, and in blackwater swamp forests (Brunswick, Columbus*, Hyde*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Chiloscyphus appalachianus	**SC-V**		**S1**	**G1G2Q**
A Liverwort				
M: on rock faces in spray zone of waterfalls (Burke, Cherokee, Graham, Jackson, Macon, McDowell, Rutherford)				
Chiloscyphus muricatus	**SC-V**		**S1**	**G5**
A Liverwort				
M: on rocks or bark in humid gorges (Burke, Jackson, Macon*, Transylvania)				
Cololejeunea ornata	**SR-T**		**SH**	**G2G4**
A Liverwort				
M: on bark of trees, sometimes over other liverworts (Macon*)				
Cylindrocolea rhizantha	**SR-P**		**SH**	**G3?**
A Liverwort				
C: on marl outcrops (Columbus*)				
Diplophyllum obtusatum	**SR-D**		**S1**	**G2?**
A Liverwort				
M: on rock outcrops (Buncombe*, Burke*, McDowell*)				
Diplophyllum taxifolium var. mucronatum	**SR-L**		**S1**	**G5T1**
A Liverwort				
M: high elevation rocky summits (Haywood*, Jackson*, Transylvania*)				
Drepanolejeunea appalachiana	**SC-V**		**S1**	**G2?**
A Liverwort				
M: on moist rock, rhododendron bark, and rhododendron leaves in humid gorges (Burke, Clay*, Graham, Haywood, Jackson, Macon, Transylvania)				
Frullania appalachiana	**SR-L**		**S1?**	**G2?**
A Liverwort				
M: on bark of hardwoods in spruce-fir forests (Avery*, Burke, Clay*, Graham, Haywood*, Jackson*, Macon*, Rutherford, Transylvania)				
Frullania donnellii	**SR-T**		**SH**	**G3?**
A Liverwort				
C: on bark of *Ilex* in marshes (Carteret*)				
Lejeunea bermudiana	**SR-P**		**S1**	**G3G4**
A Liverwort				
C: on marl outcrops or on decaying logs in blackwater swamps, or tree bases in swamps (Brunswick*, Carteret, Columbus, Craven, Jones)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Lejeunea blomquistii	**SC-V**		**S1**	**G1G2**
A Liverwort				
M: on dead tree bark or vertical rock faces in spray zone of waterfalls (Burke, Jackson, Macon*, McDowell, Transylvania)				
Lejeunea cavifolia	**SR-P**		**S1**	**G5**
A Liverwort				
M: on shaded mafic rocks (Ashe*, Polk*, Swain)				
Lejeunea dimorphophylla	**SR-L**		**S1**	**G2G3**
A Liverwort				
TC: on bark in maritime forests (Carteret*)				
Lejeunea glaucescens var. acrogyna	**SR-L**		**SX**	**G5TH**
Raven Rock Liverwort				
C: Endemic to one historical location on shaded rock at the piedmont/coastal plain fall line (Harnett*)				
Leptoscyphus cuneifolius	**SR-D**		**S2**	**G4G5T4**
A Liverwort				
M: on bark of Fraser Firs or on moist rock, in spruce-fir forests (Haywood*, Jackson*, Mitchell*, Swain, Yancey)				
Lopholejeunea muelleriana	**SR-D**		**SH**	**G4G5**
A Liverwort				
C: on bark of gums and cypresses in blackwater swamp forests (Columbus*)				
Lophozia excisa	**SR-D**		**S1**	**G5**
A Liverwort				
M: on high elevation rocky summits (Ashe*)				
Lophozia heterocolpos	**SR-D**		**S1**	**G5**
A Liverwort				
M: on high elevation rocky summits (Ashe)				
Mannia californica	**SR-T**		**S1**	**G3?**
A Liverwort				
M: on mineral-rich, dry rock outcrops (Jackson*, McDowell, Polk*, Rutherford)				
Marsupella funckii	**SR-D**		**S1**	**G4G5**
A Liverwort				
M: on high elevation, sulphur-bearing rock (Swain*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Metzgeria temperata	**SR-D**		**S1S2**	**G4**
A Liverwort				
M: Fraser fir forests and hemlock forests (Avery, Caldwell, Clay*, Graham, Haywood, Jackson, Macon*, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Metzgeria violacea	**SR-D**		**S1S2**	**G4**
A Liverwort				
M: bark of trees (Haywood, Jackson)				
Mylia taylorii	**SR-D**		**S1**	**G5**
A Liverwort				
M: moist rock outcrops at high elevations, spray zone of waterfalls (Avery, Caldwell, Jackson, Watauga)				
Nardia scalaris ssp. botryoidea	**SR-O**		**S1**	**G5T1**
A Liverwort				
P: exposed rock ledges sometimes wet from seepage (Burke)				
Nardia scalaris ssp. scalaris	**SR-D**		**S1**	**G5T5**
A Liverwort				
M: on high elevation rocky summits and on moist rocks in spruce-fir forests (Buncombe, Haywood*, Jackson*)				
Plagiochasma intermedium	**SR-O**		**S1**	**G3G5**
A Liverwort				
M: on moist limestone (McDowell*)				
Plagiochasma wrightii	**SR-D**		**S1**	**G3?**
A Liverwort				
M: on moist calcareous rocks (McDowell, Rutherford)				
Plagiochila austinii	**SR-T**		**S1S2**	**G3**
A Liverwort				
M: moist rocks (Avery, Burke, Graham, Jackson, Macon*, Madison, Wilkes)				
Plagiochila corniculata	**SR-D**		**S2**	**G4?**
A Liverwort				
M: on bark of Fraser Firs in spruce-fir forests, rarely on hardwoods (Avery, Buncombe*, Haywood*, Jackson*, Mitchell, Swain, Transylvania*, Yancey)				
Plagiochila dubia	**SR-P**		**S1**	**G4G5**
A Liverwort				
CP: on bark at bases of trees in swamps (Brunswick, Columbus*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Plagiochila echinata	**SR-L**		**S1**	**G2**
A Liverwort				
M: rocks and streambanks in humid gorges, spray zone of waterfalls (Graham, Jackson, Macon*, Transylvania)				
Plagiochila ludoviciana	**SR-P**		**S1**	**G5**
A Liverwort				
CPM: on bark or moist rock in swamps and mountain gorges (Beaufort, Bladen, Brunswick*, Burke, Carteret, Cherokee*, Clay*, Craven, Durham*, Jackson*, Macon*, McDowell, Onslow, Orange, Rutherford*, Stokes*, Transylvania, Washington*, Yadkin*)				
Plagiochila miradorensis var. miradorensis	**SR-P**		**SH**	**G4T4**
A Liverwort				
T: on bark in maritime forests and swamps (Carteret*)				
Plagiochila sullivantii var. spinigera	**SR-L**		**S1**	**G2T1**
A Liverwort				
M: on moist rocks in spray zones of waterfalls (Burke*, Jackson*, McDowell*, Transylvania*)				
Plagiochila sullivantii var. sullivantii	**SR-T**		**S2**	**G2T2**
A Liverwort				
M: on moist rocks, in spray zones of waterfalls and in spruce-fir forests (Avery, Burke, Caldwell*, Cherokee*, Clay*, Graham, Haywood*, Jackson*, Macon*, McDowell, Mitchell*, Swain*, Transylvania, Watauga*, Yancey*)				
Plagiochila virginica var. caroliniana	**SR-T**		**S1**	**G3T2**
A Liverwort				
M: moist rock faces, including spray zone of waterfalls (Avery*, Buncombe, Caldwell, Graham, Jackson*, Macon*, Mitchell, Transylvania*)				
Plagiochila virginica var. virginica	**SR-L**		**S1**	**G3T3**
A Liverwort				
CM: on limestone (Ashe, Jackson, Martin*, McDowell, Pitt*, Wilkes*)				
Porella wataugensis	**SR-L**		**S1**	**G1G2Q**
A Liverwort				
M: on rocks in humid gorges (Burke, Graham, Macon, McDowell, Transylvania, Watauga*)				
Ptilidium ciliare	**SR-D**		**S1**	**G5**
A Liverwort				
M: on soil in high elevation forests (Mitchell)				
Radula voluta	**SR-D**		**S1**	**G3**
A Liverwort				
M: on moist rocks in spray zones of waterfalls (Macon)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Riccardia jugata	**SR-L**		**S1?**	**G2**
A Liverwort				
M: on fallen logs in humid areas, especially gorges (Graham, Haywood, Macon*)				
Scapania mucronata	**SR-D**		**S1**	**G5**
A Liverwort				
M: high elevation rocky summits (Ashe*)				
Sphenolobopsis pearsonii	**SR-O**		**S2**	**G2?**
A Liverwort				
M: on bark of Fraser Firs in spruce-fir forests (Avery, Caldwell, Haywood, Jackson, Mitchell, Swain, Watauga, Yancey)				
Tritomaria exsectiformis ssp. exsectiformis	**SR-D**		**SH**	**G5T5**
A Liverwort				
M: on high elevation rocky summits (Ashe*)				
Hornworts				
Aspiromitus appalachianus	**SR-L**		**S1**	**G1**
A Hornwort				
M: on rocks on streambeds (Transylvania*)				
Lichens				
Anaptychia crinalis	**SR-D**		**S1**	**G5**
Hanging Fringe Lichen				
M: high elevation rocky summits and exposed tree twigs on dry ridges (Mitchell)				
Anzia americana	**SR-T**		**S1**	**G3G5**
A Black-foam Lichen				
M: on bark of trees in humid gorges (Transylvania*)				
Anzia ornata	**SR-T**		**S2**	**G1G3**
A Black-foam Lichen				
C: on bark of deciduous trees where humidity is fairly high (Brunswick, Camden, Dare, Duplin*, Gates, Jones, Pender, Tyrrell, Washington)				
Canoparmelia amabilis	**SC-V**		**SNA**	**G1**
Worthy Shield Lichen				
(now lumped in *Canoparmelia caroliniana*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cetraria arenaria	**SC-V**		**S2**	**G4**
Sand-loving Iceland Lichen				
M: high elevation rocky summits, sandy soil, or thin soil over bedrock (Ashe, Avery, Mitchell*, Watauga)				
Cetrelia cetrarioides	**SR-D**		**S2**	**G4G5**
Sea Storm Lichen				
M: on trees and mossy rocks in forests with an open understory; may prefer old growth or very mature forests (Buncombe*, Haywood, Jackson*, Mitchell*, Swain*, Yancey*)				
Cladonia psoromica	**T**		**S1**	**G1**
Bluff Mountain Reindeer Lichen				
M: rock outcrops and fens and glades over amphibolite rock (Ashe)				
Ephebe americana	**SR-T**		**S1**	**G2G3**
A Rockshag Lichen				
M: high elevation rocky summits (Caldwell*, Haywood*, Jackson*, Transylvania)				
Ephebe lanata	**SR-D**		**S1**	**G5**
Rockshag Lichen				
MP: on rocks in rapidly flowing water and grottoes around mountain spray cliffs (Jackson*, Macon*, Stokes*, Transylvania*)				
Gymnoderma lineare	**E**	**E**	**S3**	**G3**
Rock Gnome Lichen				
M: high elevation rock outcrops, outcrops in humid gorges (Ashe, Avery, Buncombe, Burke, Clay, Graham, Haywood, Jackson, Macon, Mitchell, Rutherford, Swain, Transylvania, Yancey)				
Heterodermia appalachensis	**SR-O**		**S1S2**	**G2?**
Appalachian Fringe Lichen				
MP: hardwood bark or rock faces (Graham, Haywood, Henderson, Macon, Stokes*, Swain)				
Hypotrachyna sinuosa	**SR-D**		**S1**	**G3G5**
Green Loop Lichen				
M: on twigs or small branches in humid but open forests (Haywood*, Jackson*, Yancey*)				
Hypotrachyna virginica	**SR-T**		**S1S2**	**G1G2**
Virginia Loop Lichen				
M: on twigs or rocks in open forests at high elevations (Buncombe*, Haywood, Jackson*, Swain, Yancey)				
Lobaria scrobiculata	**SR-P**		**S2?**	**G5**
Textured Lungwort				
M: on bark of hardwoods at high elevations (primarily spruce-fir zone) (Buncombe*, Graham, Haywood, Jackson*, Macon, Swain, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Melanelia stygia	**SR-D**		**S1S2**	**G5**
Alpine Camouflage Lichen				
M: high elevation rocky summits (Avery, Buncombe, Macon, McDowell, Mitchell, Yancey)				
Pannaria conoplea	**SR-D**		**S1**	**G4G5**
Mealy-rimmed Shingle Lichen				
M: on bark at high elevations (Buncombe, Haywood, Henderson, Macon, Transylvania)				
Physcia pseudospeciosa	**SR-T**		**S1**	**G1G2**
A Rosette Lichen				
M: mossy rocks in open woods and high elevation granitic and sandstone rock outcrops (Jackson)				
Porpidia contraponenda	**SR-T**		**S1**	**G2G3**
Boulder Lichen				
M: high elevation rocky summits (Swain)				
Sticta limbata	**SR-D**		**S1**	**G3G4**
Powdered Moon Lichen				
M: on bark and over mosses on trees and rocks (Haywood)				
Teloschistes flavicans	**SR-P**		**S1**	**G4G5**
Sunrise Lichen				
C: on branches of trees and shrubs or on the ground in open areas, especially near the coast (Brunswick, Carteret, Onslow)				
Usnea angulata	**SR-P**		**S1**	**G3G5**
Old Man's Beard				
M: on branches of juniper on high elevation granitic domes (Jackson, Macon, Swain*)				
Xanthoparmelia monticola	**SR-L**		**S2?**	**G2?**
A Rock-shield Lichen				
MP: high elevation rocky summits and mafic glades (Buncombe*, Haywood*, Jackson*, Mitchell*, Montgomery, Transylvania*)				

NORTH CAROLINA PLANT WATCH LIST

The North Carolina Plant Watch List includes species that are rare or uncommon, are not well studied, or are otherwise threatened with serious decline but for which current information does not justify placement on the Rare List by the NCNHP. Watch List species can be indicators of significant habitats, and their presence should be considered in planning natural area protection efforts, though obviously with less weight than higher priority rare species and natural communities. The NCNHP maintains files on these species but does not include them in its GIS maps or database files. Plants placed on this list fall into a number of categories, discussed below. The NCNHP requests additional information about these species in order to clarify their status and reclassify them into other appropriate and more specific categories. Counties of known occurrence are listed for most groups

Reasons for the current placement of species on the Watch List rather than at a high rarity status (Endangered, Threatened, Special Concern, or Significantly Rare) vary. The taxonomic validity of some of these species is currently in doubt. For many of them, the NCNHP lacks adequate documentation of their historic or present extent in North Carolina. Others are known to be rare or uncommon in North Carolina but may not be native to the state, and they may or may not be declining. Some others may not necessarily be rare yet, but they are undergoing significant losses of or disturbances to their habitats. For most species, however, their actual rarity is poorly known and we are **requesting more data for every Watch List category** before such species receive a higher, and more formal, rarity status. A field survey form is provided online at http://www.ncnhp.org/share-data/contribute/plant-survey-form. We request that people fill out this survey form and mail it to NCNHP after visiting occurrences of these species.

The Watch List has been divided into categories, which have been devised to indicate the reasons for each species' current placement. These categories and their descriptions have been developed by the NCNHP. A number of species have been placed in two Watch categories because it is believed they may be at risk for at least two reasons.

CATEGORY	DESIGNATION	DESCRIPTION
W1	Rare but Relatively Secure	Species whose status in N.C. is relatively well known and appear to be relatively secure at this time. While still notably rare, these species do not currently require site-specific monitoring and so are not on the Rare List. Many of these species were formerly on the Rare List; they are retained in this category because they require a lower level of continued monitoring to ensure their long-term security.
W2	Rare but Questionable Taxonomy	Species including taxa of dubious validity and taxa under study and potentially to be named. If further study reveals that these are valid taxa, they would warrant addition to the Rare List. This category has been used for named and unnamed taxa that currently appear to have some significant chance of being proven valid.
W3	Rare but Questionable Documentation	Species that have been reported from N.C. without adequate documentation. These species should be listed at a higher level when their reported occurrence in N.C. is verified. This category includes sight records, old and vague reports for which no documentation has appeared, and, in a few cases, more recent literature reports for which we have not yet received documentation.
W4	Rare but Possibly Not Native	Species known to occur in N.C. that current data suggest are not native to N.C. but whose native occurrence is plausible. Some of

CATEGORY	DESIGNATION	DESCRIPTION
		these species were previously listed at a higher level, but field investigations suggest that all known N.C. occurrences are introductions.
W5	Rare because of Severe Decline to Population or Habitat	Species that have declined sharply in N.C. but do not appear yet to warrant site-specific monitoring. Most species in this category have undergone declines of more than 50% (in many cases more than 90%) from their pre-Columbian status. Reasons for decline include exotic pests or pathogens, massive modification of the landscape, suppression of natural fires, and failure of reproduction. Because many of these species were once abundant or even dominant in parts of N.C., they may still be fairly common or frequently encountered, despite the strong decline. If current trends continue, however, many of these species will be threatened with extirpation in all or a major part of their ranges in N.C.
W6	Regionally Rare	Species that are rare in one region of North Carolina while being uncommon to abundant within another region. These regional rarities, generally within-state disjuncts, are significant for protection of genetic variation and long-term viability of species. **W6 plants are listed immediately following the Watch List in this volume**.
W7	Poorly Known in NC	Species with inadequate information about their distribution and rarity in N.C. These are generally species not previously listed as rare in N.C. but which appear to be so based on herbarium or museum records and field experience of NCNHP staff, consultants, and cooperating scientists. Further information is needed to determine the true status of these species in N.C.

NORTH CAROLINA PLANT WATCH LIST

Vascular Plants

Abies fraseri — **W5** — **S2** — **G2**
Fraser Fir
M: spruce-fir forests (Ashe, Avery, Buncombe, Caldwell, Clay, Jackson, Mitchell, Swain, Transylvania, Watauga, Yancey)

Acer nigrum — **W7** — **S1?** — **G5**
Black Maple
M: rich cove forests (Ashe, Macon, Madison, Swain*, Watauga*, Yancey*)

Agalinis aphylla — **W1** — **S3** — **G3G4**
Scale-leaf Gerardia
CS: wet savannas and Sandhills streamhead pocosin ecotones (Brunswick, Carteret, Columbus, Craven, Cumberland, Duplin*, Harnett, Hoke, Jones*, New Hanover*, Onslow, Pender, Richmond)

Agalinis decemloba — **W1** — **S3** — **G3G4**
Piedmont Gerardia
PMS: dry, open sites (Buncombe*, Burke, Caswell, Durham, Forsyth*, Granville, Harnett, Henderson*, Hoke, Montgomery, Orange, Person, Randolph, Richmond, Rutherford*, Scotland, Stanly, Swain*, Transylvania*, Wake, Warren, Wilkes*)

Agalinis linifolia — **W1** — **S3** — **G4?**
Flaxleaf Gerardia
C: savannas, clay-based Carolina bays, depression ponds, and other wet, open habitats (Bladen, Brunswick, Carteret*, Columbus, Craven, Cumberland*, Hoke, New Hanover, Onslow, Pender, Robeson, Sampson, Scotland*)

Agalinis obtusifolia — **W1** — **S2S3** — **G4G5**
Blunt-leaf False-foxglove
C: savannas, seepage bogs, and wet ecotones (Bladen, Brunswick, Carteret, Columbus, Craven, Onslow, Pender)

Agarista populifolia — **W3** — **SNR** — **G4G5**
Agarista
C: blackwater swamps (Columbus*)

Amelanchier sanguinea — **W1** — **S3** — **G5**
Roundleaf Serviceberry
M: thin soils around mafic rock outcrops at lower and middle elevations (Buncombe, Burke, Graham, Haywood, Henderson, Jackson, Macon, McDowell, Rutherford, Swain, Transylvania)

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Amorpha schwerinii	**W1**		**S3**	**G3G4**
Piedmont Indigo-bush				
P: dry forests (Anson, Burke, Catawba, Cleveland, Davidson, Iredell*, Montgomery, Randolph, Rowan, Rutherford*, Stanly)				
Ampelopsis cordata	**W7**		**S2**	**G5**
Heartleaf Peppervine				
PM: floodplain forests (Anson, Burke, Madison*, Richmond, Wake)				
Amphicarpum amphicarpon	**W1**		**S3**	**G4**
Pinebarrens Goober Grass				
C: pine savannas, pocosins, shallow peat burns in pocosin/savanna ecotones (Beaufort*, Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Duplin*, Hoke, Martin*, Onslow, Pender, Pitt*, Robeson*, Sampson, Scotland, Wilson*)				
Andropogon arctatus	**W3**		**SU**	**G3**
Pinewoods Bluestem				
C: marsh (Pamlico*)				
Andropogon perangustatus	**W1**		**S2S3**	**G5T4**
Narrowleaf Bluestem				
CS: clay-based Carolina bays, upland depressions (Brunswick, Carteret, Columbus, Cumberland, Harnett, Hoke, Moore, Onslow, Pender, Richmond, Sampson, Scotland)				
Andropogon tracyi	**W7**		**S2**	**G4?**
Tracy's Bluestem				
SCP: sandhills, other dry soils (Gates*, Granville*, Harnett*, Hoke, Johnston*, Moore, Richmond, Scotland*)				
Andropogon virginicus var. decipiens	**W7**		**S1S2**	**G5T4**
Deceptive Bluestem				
C: pinelands and disturbed areas (Bertie*, Bladen*, Craven, Dare*, Duplin*, Hyde, Martin*, Nash*, Onslow, Pender)				
Anemone minima	**W3**		**S2?**	**G5T3**
Dwarf Thimble-weed				
M: forests, openings (Burke)				
Angelica atropurpurea	**W4**		**S2S3**	**G5**
Purple-stem Angelica				
M: roadsides (Alleghany, Haywood*, Wilkes)				
Antennaria howellii ssp. petaloidea	**W7**		**S1?**	**G5T4T5**
Field Pussytoes				
M: dry woodlands (Rutherford)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Anthenantia rufa	**W1**		**S2**	**G5**
Purple Silkyscale				
CS: savannas (Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Duplin*, Jones, Moore, New Hanover*, Onslow, Pender)				
Arabidopsis lyrata ssp. lyrata	**W1**		**S2**	**G5**
Lyre-leaf Rockcress				
CM: calcareous or mafic rocks (Alleghany*, Ashe, Avery, Buncombe*, Caldwell, Jackson, Jones*, Madison, McDowell*, Watauga*)				
Aronia prunifolia	**W1**		**S2**	**GNA**
Purple Chokeberry				
M: bogs, seepages, and swamp forests (Ashe, Avery, Burke, Jackson, Macon, McDowell, Watauga)				
Asclepias longifolia	**W1**		**S2S3**	**G4G5**
Longleaf Milkweed				
CS: savannas and sandhill seeps (Brunswick, Carteret*, Columbus, Craven, Cumberland*, Dare*, Johnston, Onslow, Pender, Pitt)				
Asclepias tomentosa	**W1**		**S3**	**G4**
Sandhills Milkweed				
SC: sandhills (Bladen, Cumberland, Harnett, Hoke, Lee, Moore, Richmond, Sampson, Scotland*)				
Asplenium resiliens	**W1**		**S2**	**G5**
Blackstem Spleenwort				
MP: calcareous rock outcrops (Avery, Haywood, Jackson*, Macon*, Madison, McDowell, Rutherford*, Stanly*, Swain*, Transylvania, Yadkin)				
Baccharis angustifolia	**W1**		**S2**	**G4**
Saltwater False-willow				
CT: brackish marshes, shrubby marsh edges (Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender)				
Baptisia albescens	**W1**		**S3**	**G4**
Thin-pod White Wild Indigo				
MPS: open woodlands, clearings (Anson, Burke*, Chatham*, Cleveland, Iredell*, McDowell, Mecklenburg, Montgomery, Moore, Person*, Polk*, Richmond, Rockingham*, Rowan*, Rutherford, Stanly*, Stokes, Surry*, Transylvania*, Union)				
Bartonia paniculata ssp. paniculata	**W1**		**S2S3**	**G5T5**
Twining Screwstem				
CMPS: bogs, wet savannas, sandhill seeps, other open wet areas (Alleghany, Brunswick*, Burke, Carteret, Craven, Duplin*, Gates*, Jones, Moore, New Hanover, Pender, Scotland, Wake*, Yancey)				
Bartonia verna	**W1**		**S2**	**G5?**
White Screwstem				
C: savannas, limesink ponds (Bladen*, Brunswick, Carteret, New Hanover*, Onslow, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Bidens mitis	**W7**		**S2?**	**G4?**
Coastal Plain Tickseed				
CM: freshwater marshes, brackish marshes, and mountain bogs (Brunswick*, Buncombe*, Chowan*, Currituck*, Dare, Jackson, Onslow)				
Bigelowia nudata var. australis	**W7**		**S1?**	**G5T4T5**
Rayless-goldenrod				
C: wet depressions and limesink ponds (Carteret)				
Boechera burkii	**W7**		**SH**	**G5T3T5**
Porter's Rockcress				
M: dry, rocky calcareous areas and shale barrens (Madison*)				
Boykinia aconitifolia	**W1**		**S3**	**G4**
Brook Saxifrage				
M: stream banks, meadows, and seepage slopes (Alleghany, Ashe, Avery, Burke, Jackson*, Macon, Mitchell*, Transylvania, Wilkes*)				
Bromus nottowayanus	**W7**		**S1?**	**G3G5**
Nottoway Valley Brome				
P: rich woods (Ashe, Buncombe, Cherokee, Henderson, Madison, Polk, Rockingham*, Surry*)				
Burmannia biflora	**W1**		**S2S3**	**G4G5**
Northern Bluethreads				
CS: limesinks, cypress savannas, and sandhill seeps (Beaufort*, Bladen, Brunswick, Carteret, Cumberland, Dare*, Harnett*, Hoke, Moore, New Hanover*, Onslow, Pender, Pitt, Scotland)				
Calamovilfa brevipilis	**W1**		**S3**	**G4**
Pinebarren Sandreed				
CS: savannas, sandhill seeps (Brunswick, Carteret, Columbus*, Craven, Cumberland, Duplin*, Harnett, Hoke, Johnston*, Montgomery, Moore, Nash, New Hanover, Onslow, Pender, Pitt, Richmond, Sampson*, Scotland)				
Calystegia spithamaea ssp. stans	**W1**		**S2S3**	**G4G5TNR**
Shale Barren Bindweed				
MP: shale barrens and woodlands (Burke*, Forsyth*, Henderson, Orange*, Rowan*)				
Carex albursina	**W7**		**S2**	**G5**
White Bear Sedge				
M: rich cove forests, over mafic or calcareous rocks (Ashe, Buncombe, Graham, Haywood*, Macon, Madison*, Mitchell*, Rutherford, Transylvania, Wilkes, Yancey)				
Carex aquatilis	**W7**		**S1**	**G5**
Aquatic Sedge				
M: mafic fens at high elevation (Ashe*, Avery, Macon)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex biltmoreana	**W1**		**S3**	**G3**
Biltmore Sedge				
M: cliffs, outcrops, and granitic domes (Buncombe, Cherokee, Graham, Haywood, Henderson, Jackson, Macon, McDowell, Polk, Rutherford, Transylvania)				
Carex bromoides ssp. montana	**W7**		**S3?**	**G5T3?**
Blue Ridge Brome Sedge				
M: bogs, moist areas along streams, seepages in coves (Ashe, Avery*, Buncombe*, Haywood, Henderson, Macon, Rutherford*, Transylvania, Watauga)				
Carex chapmanii	**W1**		**S3**	**G3**
Chapman's Sedge				
C: moist bottomlands and slopes, perhaps associated with marl (Bladen*, Brunswick*, Carteret, Columbus, Craven, Gates, Jones, New Hanover*, Onslow, Pender)				
Carex collinsii	**W1**		**S3**	**G4**
Collins's Sedge				
SM: white cedar swamps, bogs (Cumberland, Harnett, Henderson, Hoke, Lee, Moore, Richmond, Scotland, Transylvania)				
Carex echinata ssp. echinata	**W1**		**S2S3**	**G5T5**
Star Sedge				
M: bogs and seeps (Alleghany, Ashe, Avery, Clay, Henderson, Jackson, Macon, Transylvania, Watauga, Wilkes*, Yancey)				
Carex fraseriana	**W1**		**S3**	**G4**
Fraser's Sedge				
M: forests (Ashe, Avery, Caldwell, Clay, Graham, Haywood*, Jackson, Macon, McDowell*, Mitchell*, Swain, Watauga, Wilkes, Yancey*)				
Carex gholsonii	**W7**		**S1S2**	**G4G5**
Gholson's Sedge				
C: along creeks and springs (Brunswick, Craven, Jones, Onslow, Pender)				
Carex granularis	**W7**		**S1?**	**G5**
Limestone Meadow Sedge				
PC: piedmont bottomlands, coastal plain marl forests (Bladen*, Caswell*, Craven*, Durham*, Granville*, Guilford*, Henderson, Jones, Mecklenburg*, Orange*, Pender, Person*, Rowan*, Stokes*, Wilson*)				
Carex hyalinolepis	**W1**		**S2**	**G4G5**
Shoreline Sedge				
C: marshes (Beaufort*, Brunswick, Carteret, Craven, Hyde*, New Hanover, Perquimans*, Richmond, Warren*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex leavenworthii	**W7**		**S1?**	**G5**
Leavenworth's Sedge				
PM: dry woods (Durham*, Lee, Madison*, Randolph*, Richmond, Rutherford, Warren*)				
Carex leptonervia	**W1**		**S3**	**G5**
A Wood Sedge				
M: rich cove forests and seepage slopes (Alleghany, Avery*, Buncombe, Cherokee, Clay*, Graham, Haywood, Henderson, Jackson, Macon, Madison*, Swain*, Transylvania, Watauga, Yancey)				
Carex lucorum var. austrolucorum	**W7**		**S2?**	**G5T3T4**
Appalachian Woodland Sedge				
M: medium to high elevation forests, especially over calcareous or mafic rocks (Alleghany, Ashe, Buncombe*, Clay*, Jackson, Macon*, Swain*, Transylvania*, Watauga*)				
Carex manhartii	**W1**		**S3**	**G3G4**
Manhart's Sedge				
M: rich cove forests (Ashe, Avery, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Swain, Transylvania)				
Carex misera	**W1**		**S3**	**G3**
Wretched Sedge				
M: high elevation rock outcrops (Ashe, Avery, Buncombe, Burke, Clay, Graham, Haywood, Henderson, Jackson, Macon, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Carex mitchelliana	**W1**		**S2**	**G4**
Mitchell's Sedge				
CMPS: swampy woodlands and forests (Alleghany, Anson*, Beaufort*, Brunswick, Carteret, Cherokee*, Clay, Craven, Cumberland, Dare*, Gaston*, Harnett*, Hoke, Iredell*, Jones, Lenoir*, Moore, New Hanover, Pasquotank*, Pender, Richmond, Scotland*, Stokes*, Tyrrell*)				
Carex oklahomensis	**W7**		**S1?**	**G4**
Oklahoma Sedge				
M: seeps (Graham)				
Carex physorhyncha	**W1**		**S2S3**	**G5T5**
Bellow's-beak Sedge				
CP: somewhat shaded dry to mesic woods (Columbus, Duplin, Edgecombe, Halifax, Harnett, Jones, Macon, Moore, Pender, Richmond, Washington)				
Carex ruthii	**W1**		**S3**	**G3**
Ruth's Sedge				
M: seeps and bogs (Ashe, Avery, Buncombe*, Clay*, Graham*, Haywood, Jackson*, Macon, Mitchell*, Swain*, Transylvania*, Watauga, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Carex sparganioides	**W7**		**S2?**	**G5**
Bur-reed Sedge				
MP: rich cove forests (Alleghany*, Ashe*, Jackson*, Macon, Madison*, Mitchell*, Randolph*)				
Carex tenera var. tenera	**W7**		**S1?**	**G5**
Quill Sedge				
P: low woods (Cabarrus, Durham*, Richmond)				
Carex turgescens	**W1**		**S3**	**G4G5**
Pinebarren Sedge				
S: seepage bogs (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Carex woodii	**W1**		**S3**	**G4**
Wood's Sedge				
MPC: forested slopes, cove forests, and northern hardwoods (Alleghany, Ashe, Avery, Cherokee, Clay, Henderson, Jackson, Jones*, Macon, Mitchell*, Orange*, Transylvania, Watauga)				
Celtis occidentalis	**W7**		**S2**	**G5**
Mountain Hackberry				
CMP: rocky woodlands and mafic cliffs (Buncombe*, Burke, Caswell, Durham, Haywood, Jackson*, Macon*, Madison, McDowell, Polk, Rutherford, Swain*, Wake, Warren*, Yancey*)				
Cerastium nutans	**W7**		**S3?**	**G5**
Nodding Chickweed				
MP: alluvial forests, bottomlands, moist forests (Ashe*, Buncombe, Clay, Macon, Mitchell, Rockingham*, Transylvania)				
Ceratophyllum echinatum	**W7**		**S2**	**G4**
Prickly Hornwort				
CT: pools, lakes, and estuaries (Beaufort*, Brunswick*, Dare, Perquimans*, Richmond, Wayne*)				
Chasmanthium sessiliflorum var. sessiliflorum	**W1**		**S2S3**	**G5TNR**
Longleaf Spikegrass				
CMP: hardwood forests (Anson, Bertie*, Bladen, Brunswick*, Craven*, Cumberland, Davidson, Gates*, Graham, Harnett, Jones, Martin, Montgomery, Moore, Onslow, Pender, Polk, Richmond, Rowan, Stanly, Union)				
Chrysopogon pauciflorus	**W4**		**S1**	**G4G5**
Goldenbeard				
C: sandhills (New Hanover*)				
Chrysopsis trichophylla	**W1**		**S2**	**G5T5**
Naked Golden-aster				
C: xeric sandhills and sandhill scrub (Bladen, Cumberland, New Hanover, Pender, Sampson)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Chrysosplenium americanum	**W1**		**S3**	**G5**
Golden Saxifrage				
M: seeps (Ashe, Avery, Haywood, Jackson, Macon, Madison*, Mitchell, Polk*, Swain, Transylvania, Watauga*, Wilkes*, Yancey)				
Cinna latifolia	**W7**		**S1S2**	**G5**
Slender Wood-reed				
M: high elevation forests and openings (Buncombe*, Graham, Haywood, Macon*, Mitchell*, Swain*, Watauga*, Yancey*)				
Cladrastis kentukea	**W1**		**S2S3**	**G4**
Yellowwood				
M: forests (Cherokee, Clay, Graham, Haywood, Macon, Madison, Swain*)				
Cleistesiopsis bifaria	**W1**		**S3**	**G4?**
Small Spreading Pogonia				
MPC: savannas, dry meadows (Brunswick, Buncombe*, Burke, Carteret, Catawba, Cherokee*, Cleveland, Craven, Graham, Harnett*, Henderson*, Hoke, Madison*, McDowell, New Hanover, Onslow, Robeson*, Rutherford, Scotland*, Transylvania)				
Cleistesiopsis divaricata	**W1**		**S3**	**G4**
Spreading Pogonia				
C: pine savannas (Brunswick, Carteret, Columbus, Hoke, Moore, Onslow, Pender)				
Cleistesiopsis oricamporum	**W7**		**S2**	**G3?**
Small Coastal Plain Spreading Pogonia				
C: Savannas (Brunswick, Craven, New Hanover, Onslow, Pender)				
Coelorachis rugosa	**W1**		**S3**	**G5**
Wrinkled Jointgrass				
CS: limesink ponds, clay-based Carolina bays, wet savannas (Brunswick, Carteret, Columbus, Craven, Cumberland*, Dare*, Harnett*, Hoke, Moore*, New Hanover, Onslow, Pender, Richmond, Robeson, Sampson, Scotland)				
Comptonia peregrina	**W1**		**S3**	**G5**
Sweet Fern				
CMPS: open dry sites, often fire-maintained (Alleghany, Burke, Caldwell, Gaston, Henderson, Hoke, Johnston*, Lee*, McDowell*, Moore, Transylvania, Wake*, Wilkes)				
Corallorhiza odontorhiza	**W1**		**S4?**	**G5**
Autumn Coral-root				
CMP: forests (Alleghany, Ashe*, Avery*, Buncombe*, Burke, Caswell, Catawba, Chatham*, Cherokee, Davidson*, Davie*, Franklin*, Gaston*, Graham, Granville, Guilford*, Haywood*, Henderson*, Iredell*, Jackson, Jones*, Macon, Madison*, Martin*, McDowell, Mecklenburg*, Mitchell*, Montgomery*, Moore*, Nash*, Northampton*, Orange, Person*, Randolph, Rowan*, Rutherford, Stanly*, Stokes*, Vance*, Wake, Warren*, Watauga*, Yancey)

P: dry woodlands (not yet documented in North Carolina)				
Coreopsis latifolia	**W1**		**S3**	**G3**
Broadleaf Coreopsis				
M: cove forests and other rich woods (Avery, Buncombe, Caldwell, Haywood, Henderson, McDowell, Mitchell, Polk, Rutherford, Yancey)				
Coreopsis pubescens var. robusta	**W7**		**S2?**	**G5?T3T5**
Blue Ridge Coreopsis				
MP: rich woodlands, glades, outcrops (Alleghany*, Ashe*, Cherokee*, Clay*, Haywood*, Iredell*, Jones*, Macon, Polk*, Rutherford, Watauga*)				
Crataegus aestivalis	**W1**		**S2**	**G5**
May Hawthorn				
C: swamp forests (Brunswick*, Columbus*, Craven*, Duplin, Onslow*, Pender, Sampson, Wayne*)				
Crataegus oreophila	**W7**		**S2**	**GNR**
Balsam Mountain Hawthorn				
M: high elevation grassy balds, openings, or hardwood forests (Haywood, Jackson)				
Crataegus schuettei	**W1**		**S2?**	**G5?**
Schuette's Hawthorn				
M: mesic hardwood forests (Graham, Macon)				
Crataegus spathulata	**W1**		**S1S2**	**G5**
Littlehip Hawthorn				
CPM: bottomlands (Anson, Ashe, Bladen*, Columbus, Cumberland, Davidson, Macon*, Stanly)				
Cuthbertia rosea	**W7**		**S1?**	**G5**
Roseling				
P: dry woodlands (Cleveland*, Rutherford)				
Cynanchum laeve	**W7**		**S1?**	**G5**
Smooth Swallowwort				
C: bottomlands and disturbed areas (Bertie, Halifax*, Northampton*, Warren*)				
Cyperus distans	**W4**		**SH**	**G5**
A Flatsedge				
C: marshes (New Hanover*)				
Cyperus houghtonii	**W3**		**SH**	**G4?**
Houghton's Flatsedge				
P: dry soil (Iredell*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Cyperus hystricinus	**W7**		**SH**	**G4**
Bristly Flatsedge				
PC: dry woodlands and forests (Cumberland*, Durham*)				
Cyperus odoratus var. engelmannii	**W7**		**S1?**	**G4Q**
Engelmann's Flatsedge				
C: alluvial and other damp to wet soils (Brunswick, New Hanover)				
Cyperus squarrosus	**W7**		**S2**	**G5**
Awned Flatsedge				
P: granite flatrocks, other rock outcrops (Durham*, Franklin*, Rowan*, Rutherford)				
Cyperus surinamensis	**W4**		**S1**	**G5**
Tropical Flatsedge				
C: marshes, pond edges, disturbed wet areas (Dare)				
Cypripedium reginae	**W4**		**SNA**	**G4G5**
Showy Ladyslipper				
M: the only specimen from NC is from implausible habitat - highly acid humus under rhododendron (Jackson*)				
Cystopteris bulbifera	**W7**		**S1S2**	**G5**
Bulblet Bladder Fern				
MP: calcareous rocks (Avery, Buncombe, Madison, McDowell, Orange, Swain*, Transylvania)				
Dalea pinnata	**W1**		**S2**	**G5**
Eastern Prairie-clover				
SC: sandhills and dryish pinelands (Bladen, Cumberland, Harnett*, Hoke, Lenoir*, Moore*, Pender, Richmond, Robeson*, Sampson, Scotland, Wayne*)				
Desmodium cuspidatum var. cuspidatum	**W7**		**S2?**	**G5T5?**
Large-bract Tick-trefoil				
CPM: roadsides and wooded banks of rivers and streams (Avery*, Brunswick*, Caswell, Clay*, Gaston*, Guilford*, Henderson*, Jones*, Madison*, Mitchell*)				
Diamorpha smallii	**W1**		**S3**	**G4**
Elf Orpine				
PM: granite flatrocks (Alexander, Anson, Forsyth*, Franklin, Gaston, Granville, Iredell*, Nash*, Rowan, Rutherford, Wake, Yadkin*)				
Dichanthelium dichotomum var. roanokense	**W1**		**S2**	**G5T4?**
Roanoke Witch Grass				
CS: savannas, open swampy woods, wet peaty meadows (Bladen, Brunswick, Columbus, Dare, Hyde*, Moore, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Dichanthelium erectifolium	**W1**		**S2**	**G4**
Erectleaf Witch Grass				
C: pond shores (Bladen, Brunswick, Columbus, Hoke, New Hanover, Onslow, Robeson, Sampson, Scotland)				
Dichanthelium linearifolium	**W7**		**S1?**	**G5**
Low White-haired Witch Grass				
PM: dry open woods and rock outcrops (Ashe, Durham*, Gaston*, Macon)				
Dichanthelium malacon	**W7**		**S1?**	**G3**
Dehiscent Witch Grass				
C: dry pine/scrub oak woodlands (New Hanover*, Pender)				
Dichanthelium oligosanthes var. scribnerianum	**W7**		**S1?**	**G5T5**
Scribner's Witch Grass				
CP: calcareous, coastal-fringe forests and dry, thin woods on basic soils (Carteret, Granville, Onslow)				
Dichanthelium ovale var. ovale	**W1**		**S2S3**	**G5T5**
Elliott's Witch Grass				
C: dry to damp, sandy pinelands (Brunswick*, Carteret, Gates*, Pender)				
Dichanthelium webberianum	**W1**		**S3**	**GNR**
Webber's Witch Grass				
C: moist pine savannas and flatwoods (Brunswick, Carteret, Columbus, New Hanover, Onslow)				
Dirca palustris	**W1**		**S3**	**G4**
Leatherwood				
PM: rich woods, either alluvial or over mafic or calcareous rocks (Anson*, Ashe, Burke, Caswell, Catawba, Chatham*, Clay*, Cleveland, Durham, Haywood, Jackson, Lee, Macon, Madison*, McDowell, Mecklenburg*, Moore, Person, Polk, Randolph, Rockingham, Rutherford, Stanly, Swain*, Wake)				
Dryopteris carthusiana	**W7**		**S2**	**G5**
Spinulose Woodfern				
MCP: swampy woods (Avery, Cabarrus*, Camden*, Chowan*, Gates, Haywood*, Jackson*, Macon*, Mecklenburg*, Mitchell*, Moore, Perquimans, Yancey*)				
Dryopteris cristata	**W1**		**S3**	**G5**
Crested Woodfern				
MCP: bogs, wet woods (Alamance*, Alleghany, Ashe, Avery, Buncombe, Burke, Camden*, Durham*, Franklin, Gates*, Guilford, Haywood, Henderson*, Macon, Madison*, McDowell, Mecklenburg*, Mitchell*, Orange*, Person, Transylvania, Wake, Warren, Watauga, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Dryopteris goldiana	**W1**		**S3**	**G4G5**
Goldie's Woodfern				
MP: rich, moist woods (Alleghany, Ashe, Buncombe, Burke, Cherokee, Clay, Graham, Haywood, Jackson, Macon, Madison, Mitchell*, Orange*, Swain, Transylvania, Watauga*, Yancey)				
Dryopteris ludoviciana	**W1**		**S2**	**G4**
Southern Woodfern				
C: acid swamps (Brunswick*, Carteret, Chowan, Columbus*, Craven, Jones, New Hanover*, Onslow, Pender, Washington)				
Echinocystis lobata	**W7**		**S1**	**G5**
Wild Mock Cucumber				
M: alluvial forests (Alleghany*, Ashe, Watauga)				
Elatine americana	**W4**		**SNA**	**G4**
American Waterwort				
M: the only known site for this species in NC is an artificial lake; it is uncertain whether it should be considered native or introduced (Burke, Jackson*)				
Elatine minima	**W4**		**SNA**	**G5**
Tiny Waterwort				
P: lakes (Granville)				
Eleocharis engelmannii	**W7**		**S1?**	**G4G5**
Englemann's Spikerush				
PCM: marshes (Alexander*, Henderson*, Hoke, Northampton*, Rowan*, Stanly*)				
Eleocharis equisetoides	**W1**		**S3**	**G4**
Horsetail Spikerush				
CP: limesink ponds, lakes, borrow pits, ditches (Bladen, Brunswick, Carteret, Columbus, Craven*, Cumberland, Harnett, Hoke, Moore, New Hanover*, Onslow, Pender, Randolph, Richmond, Scotland, Wake, Washington)				
Eleocharis erythropoda	**W7**		**S1**	**G5**
Bald Spikerush				
MC: stream banks and marshes (Ashe*, Madison*)				
Eleocharis palustris	**W3**		**S1**	**G5**
Small's Spikerush				
M: open, wet places (Macon*)				
Eleocharis tricostata	**W1**		**S2S3**	**G4**
Three-angle Spikerush				
CP: bogs and savannas (Bladen, Brunswick, Cabarrus, Carteret*, Cumberland, Dare*, Hoke, New Hanover, Northampton*, Onslow, Richmond, Robeson, Sampson, Scotland, Stanly*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Elodea canadensis	**W7**		**S1?**	**G5**
Canada Waterweed				
CPM: lakes, ponds, and stagnant waters of streams (Alleghany, Ashe, Craven*, Gates, McDowell*, Orange*, Perquimans*, Wake*, Watauga*)				
Elodea nuttallii	**W7**		**S2?**	**G5**
Nuttall's Elodea				
CPM: lakes, ponds, and streams (Avery*, Currituck*, Dare*, Franklin*, Haywood*, Jones*, McDowell*, Perquimans*, Tyrrell*, Wake*, Wilson*, Yancey*)				
Elymus canadensis var. canadensis	**W7**		**S1**	**G5T5**
Great Plains Wild-Rye				
M: rich woods (Buncombe*, Cherokee, Macon, Swain*)				
Elymus riparius	**W7**		**S1S2**	**G5**
Riverbank Wild Rye				
MP: riverbanks and low, rich woods (Alleghany, Ashe*, Avery*, Henderson, Jackson, Madison*, Orange*, Watauga*)				
Epilobium leptophyllum	**W1**		**S3**	**G5**
Narrowleaf Willowherb				
MP: bogs and seeps (Alleghany, Ashe, Avery, Burke, Guilford*, Jackson, Macon, Madison, Mitchell, Watauga, Wilkes)				
Eragrostis frankii	**W7**		**S1**	**G5**
Frank's Lovegrass				
P: open, disturbed sites (Granville*)				
Eragrostis lugens	**W7**		**S1**	**G5**
Mourning Lovegrass				
P: open, wet areas (Mecklenburg*)				
Eriophorum virginicum	**W1**		**S3**	**G5**
Cottongrass				
MSCP: peaty sites - bogs, fens, pocosins, seeps (Alleghany, Ashe, Bladen, Brunswick, Burke, Cumberland, Currituck*, Edgecombe*, Forsyth*, Harnett, Henderson*, Jackson, Macon*, Moore*, Richmond, Scotland, Transylvania*, Tyrrell*, Watauga, Yancey)				
Eryngium yuccifolium var. synchaetum	**W2**		**S2**	**G5T5**
Southern Rattlesnake-master				
C: wet savannas (Bladen*, Brunswick, Columbus, Onslow, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Euonymus atropurpureus var. atropurpureus	**W7**		**S2**	**G5T5**
Eastern Wahoo				
PMC: levee forests and rich forests with circumneutral soils (Caswell, Cherokee*, Franklin, Guilford*, Halifax, Lee, Moore, Northampton, Orange*, Person, Polk, Rockingham*, Rutherford*, Stokes*, Swain*)				
Eupatorium altissimum	**W1**		**S2**	**G5**
Tall Boneset				
P: woodlands, openings, and old fields over mafic rocks (Burke, Cabarrus, Caswell, Chatham, Davidson*, Granville, McDowell, Mecklenburg, Moore, Person, Randolph, Rowan*, Stanly, Wake*)				
Eupatorium godfreyanum	**W1**		**S3**	**G4**
Godfrey's Thoroughwort				
PM: woodlands, especially over mafic rocks (Burke, Caldwell, Caswell, Catawba, Cleveland, Durham, Granville, Henderson*, McDowell, Orange*, Person, Rutherford, Swain*, Vance*, Wake*)				
Eupatorium recurvans	**W7**		**S1?**	**G3G4Q**
Recurved Eupatorium				
C: wet savannas (Pender)				
Eupatorium sessilifolium var. brittonianum	**W7**		**S1?**	**G5T3T5**
Britton's Eupatorium				
M: rocky woodlands over mafic rocks (Buncombe*, Burke, Macon, McDowell, Rutherford)				
Eurybia avita	**W3**		**SNA**	**G3**
Alexander's Rock Aster				
M: thin soil around granitic outcrops (Transylvania)				
Eurybia surculosa	**W1**		**S3?**	**G4G5**
Creeping Aster				
M: rock outcrops, glades, rocky woodlands (Buncombe, Cherokee, Graham, Jackson, Macon, Madison, McDowell, Rutherford, Transylvania)				
Euthamia graminifolia var. nuttallii	**W7**		**S1?**	**G5T5?Q**
Nuttall's Flat-top Goldenrod				
M: moist to dry riverbanks, bottomlands, and bog margins (Alleghany, Avery, Buncombe*, Henderson, Macon, Watauga)				
Eutrochium maculatum var. maculatum	**W7**		**S3?**	**G5T5**
Spotted Joe-pye Weed				
M: wet calcareous meadows, cove forests, grassy balds (Ashe*, Avery*, Buncombe*, Haywood*, Jackson, Macon*, Mitchell, Polk*, Watauga*, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Fallopia cristata	**W7**		**S2?**	**G5T5**
Crested Climbing Buckwheat				
PMC: moist forests, especially alluvial forests (Alexander*, Ashe, Burke, Granville*, Haywood*, Iredell*, Macon*, McDowell, Onslow*, Orange*, Polk, Rutherford, Stokes*, Wake*, Wilkes*)				
Fragaria vesca var. americana	**W4**		**S1**	**G5T5**
Woodland Strawberry				
M: rich forests (Watauga*)				
Frangula caroliniana	**W1**		**S3**	**G5**
Carolina Buckthorn				
PMC: rich bottomlands and slopes (Beaufort*, Buncombe, Burke, Cabarrus, Catawba, Cleveland*, Graham, Iredell*, Lincoln*, Madison, McDowell, Mecklenburg, Polk, Rutherford, Union, Watauga)				
Galactia minor	**W1**		**S2?**	**G4**
Little Milkpea				
S: sandy fields and roadsides (Hoke*)				
Galium asprellum	**W7**		**S2**	**G5**
Rough Bedstraw				
M: bogs (Alleghany, Ashe, Avery, Haywood*, Watauga)				
Galium lanceolatum	**W7**		**S2**	**G5**
Lanceleaf Wild Licorice				
M: rich cove forests (Ashe, Buncombe, Caldwell, Clay*, Graham, Haywood, Jackson, Macon, Madison, Mitchell*, Watauga)				
Gaylussacia bigeloviana	**W7**		**S2**	**G5T4T5**
Northern Dwarf Huckleberry				
C: pocosins (Bladen, Brunswick, Carteret, Dare, Jones, Pender)				
Gentiana austromontana	**W1**		**S2S3**	**G3**
Appalachian Gentian				
M: high elevation forests and balds (Alleghany, Ashe, Avery, Buncombe*, Burke*, Caldwell, Clay, Jackson*, Mitchell, Stokes*, Transylvania*, Watauga*, Yancey)				
Gentiana clausa	**W7**		**S3?**	**G5**
Closed Gentian				
MP: forests				
Geum fragarioides	**W1**		**S2S3**	**G5T5**
Northern Barren-strawberry				
P: forests and streambanks (Burke, Catawba, Graham)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Glandularia canadensis	**W7**		**S1?**	**G5**
Rose Mock-vervain				
CPS: sandhills, diabase glades, and other dry woods (Alamance*, Beaufort*, Brunswick*, Granville, Randolph*, Richmond*, Washington*)				
Goodyera repens	**W1**		**S2S3**	**G5**
Lesser Rattlesnake Orchid				
MP: moist, acid forests, especially under rhododendrons and conifers (Alleghany, Ashe, Avery, Buncombe, Burke, Graham, Haywood, Macon*, Madison, Mitchell, Rutherford, Surry, Swain*, Transylvania, Watauga, Wilkes, Yancey)				
Habenaria repens	**W1**		**S2**	**G5**
Water-spider Orchid				
CS: in stagnant, blackwater pools and impoundments (Anson, Bladen*, Brunswick, Carteret, Columbus, Cumberland, Dare, Duplin*, Hoke, Moore, New Hanover*, Pender*, Richmond, Scotland)				
Heteranthera dubia	**W3**		**S1?**	**G5**
Water Stargrass				
M: sluggish streams (Alleghany*)				
Heteranthera reniformis	**W7**		**S2?**	**G5**
Kidneyleaf Mud-plantain				
CP: muddy shores, bars, pools (Bertie, Chowan, Davidson*, Franklin*, Gates*, Halifax*, Pasquotank*, Perquimans*, Pitt*, Wake, Washington*)				
Heuchera caroliniana	**W7**		**S3**	**G3**
Carolina Alumroot				
P: rich, rocky woods (Alexander*, Anson*, Burke, Cabarrus*, Cleveland, Davidson*, Forsyth*, Gaston*, Iredell*, Lincoln*, Mecklenburg*, Moore, Randolph*, Rockingham, Rowan*, Rutherford, Stanly, Stokes*, Surry*, Union*)				
Heuchera longiflora	**W7**		**S2**	**G4**
Long-flower Alumroot				
M: rich and rocky cove forests, especially over calcareous or mafic rocks (Buncombe, Haywood*, Madison)				
Heuchera parviflora var. parviflora	**W1**		**S3**	**G4T4**
Grotto Alumroot				
MP: in deep shade under overhanging cliffs (Avery, Buncombe, Burke, Haywood, Henderson*, Jackson, Macon, McDowell, Polk*, Rutherford, Stokes, Surry*, Transylvania)				
Heuchera parviflora var. saurensis	**W7**		**SH**	**G4TH**
Sauratown Grotto Alumroot				
MP: Shaded cliff bases (Burke*, Stokes*, Surry*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Hexastylis lewisii	**W1**		**S3**	**G3**
Lewis's Heartleaf				
PSC: mesic mixed hardwood forests, streamhead pocosin ecotones (Anson, Bladen, Burke, Chatham, Cumberland*, Duplin*, Durham, Granville, Halifax, Harnett, Johnston, Lenoir*, Nash, Northampton, Orange, Pender, Person, Sampson, Vance, Wake)				
Houstonia longifolia var. glabra	**W1**		**S3**	**G5T3Q**
Granite Dome Bluet				
M: high elevation granitic domes, rarely other outcrops (Clay, Haywood, Henderson, Jackson, Macon, Madison, Transylvania)				
Houstonia purpurea var. calycosa	**W7**		**S2?**	**G5T5**
Summer Bluet				
MP: rocky forests, often dry (Burke, Jackson, Macon, Madison)				
Humulus lupulus var. lupuloides	**W7**		**S1?**	**G5T5**
Hops				
CP: alluvial forests and bottomlands (Caswell, Randolph*, Rockingham*, Stokes*, Wake*)				
Humulus lupulus var. pubescens	**W4**		**S1**	**G5T4?**
Hops				
P: bottomlands (Randolph*, Rockingham*, Stokes*)				
Huperzia appressa	**W1**		**S3**	**G5**
Appalachian Fir-clubmoss				
M: high elevation rocky summits, seeps, fens (Ashe, Avery, Buncombe, Haywood, Jackson, Macon, McDowell, Mitchell, Rutherford, Transylvania, Watauga, Yancey)				
Hydrangea cinerea	**W7**		**S2**	**G4**
Ashy Hydrangea				
M: shady ledges and cliffs, upslope of alluvial forests (Cherokee, Clay*, Cleveland, Graham, Henderson, Jackson*, Macon*, McDowell, Polk, Rutherford, Swain*, Transylvania)				
Hydrophyllum macrophyllum	**W1**		**S3**	**G5**
Largeleaf Waterleaf				
M: rich woods, especially rocky calcareous forests and cliffs (Buncombe, Haywood, Jackson, Madison, Watauga, Yancey)				
Hypericum buckleyi	**W1**		**S3**	**G3**
Blue Ridge St. John's-wort				
M: high elevation rocky summits, granitic domes, grassy balds (Buncombe, Clay, Haywood, Jackson, Macon, Transylvania)				
Hypericum ellipticum	**W3**		**SNR**	**G5**
Pale St. John's-wort				
M: habitat in North Carolina not known				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Hypericum graveolens	**W1**		**S2S3**	**G3**
Mountain St. John's-wort				
M: high elevation balds, outcrops, seeps (Buncombe*, Haywood, Jackson, Macon, McDowell*, Mitchell, Swain*, Transylvania, Yancey*)				
Hypericum mitchellianum	**W1**		**S2S3**	**G3**
Mitchell's St. John's-wort				
M: high elevation balds, outcrops, seeps (Ashe, Avery, Buncombe*, Burke, Graham, Haywood, Jackson, Macon*, McDowell, Mitchell, Watauga, Yancey)				
Hypericum tubulosum	**W7**		**S2?**	**G4?**
Marsh St. John's-wort				
C: wet sites, pools (Anson, Bertie, Davidson, Gaston, Mecklenburg, Watauga)				
Ilex amelanchier	**W1**		**S3**	**G4**
Sarvis Holly				
CS: blackwater swamps and riverbanks, clay-based Carolina bays (Bladen, Brunswick, Columbus, Cumberland, Harnett*, Hoke, Montgomery, Pender, Richmond, Robeson, Sampson, Scotland)				
Ilex cassine	**W1**		**S2**	**G5**
Dahoon				
C: blackwater swamps and pocosins (Brunswick, Carteret, New Hanover)				
Ipomoea brasiliensis	**W4**		**S1**	**G5T5**
Railroad Vine				
C: ocean beaches (Carteret)				
Ipomopsis rubra	**W7**		**S1S2**	**G4G5**
Standing Cypress				
CMPS: sandy soils (Cumberland*, Harnett*, Henderson, Hoke, Moore, Richmond, Robeson*, Rutherford*, Scotland)				
Iresine rhizomatosa	**W1**		**S2S3**	**G5**
Rootstock Bloodleaf				
TC: low wet places, interdune swales, damp woods, edges of brackish marshes (Brunswick, Carteret, Cumberland, Dare, New Hanover, Onslow, Pender*, Sampson*)				
Isoetes hyemalis	**W7**		**S2S3**	**G2G3**
Wintergreen Quillwort				
CPS: beds of blackwater and other streams (Brunswick*, Columbus, Cumberland, Duplin, Harnett, Johnston*, Jones, Moore, Orange, Pender, Sampson*, Scotland)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Isotria verticillata	**W1**		**S2S3**	**G5**
Large Whorled Pogonia				
CMPS: forests (Alleghany, Ashe*, Bertie*, Buncombe*, Burke, Caldwell, Carteret, Catawba, Cherokee, Cumberland, Gates*, Graham, Greene*, Guilford, Harnett*, Haywood*, Henderson, Hertford*, Macon, Madison*, McDowell, Montgomery*, Moore, Orange*, Polk*, Randolph, Richmond, Rowan*, Sampson*, Scotland*, Stokes*, Transylvania, Yancey)				
Juglans cinerea	**W5**		**S2S3**	**G4**
Butternut				
MP: cove forests, rich woods (Alleghany, Ashe, Avery, Buncombe*, Burke, Caldwell*, Cherokee, Clay, Durham*, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell*, Orange*, Polk, Rutherford, Sampson*, Stanly*, Stokes*, Swain, Transylvania, Watauga, Wilkes*, Yancey)				
Juncus brachycarpus	**W7**		**S2?**	**G4G5**
Whiteroot Rush				
PC: wet sandy soil (Cabarrus, Chatham*, Duplin*, Durham*, Granville*, Hertford*, Hyde*, Iredell*, Montgomery*, Moore, Nash*, Northampton*, Orange*, Stanly*, Union, Wake*)				
Juncus brevicaudatus	**W7**		**S1?**	**G5**
Mountain Rush				
M: bogs and seeps at high elevations (Alleghany, Clay*, Haywood*, Jackson*, Swain*, Transylvania*, Watauga*, Yancey*)				
Juncus georgianus	**W7**		**S1?**	**G4**
Georgia Rush				
P: shallow depressions in granitic flatrocks and domes (Alexander, Franklin*, Gaston, Rowan*)				
Juncus longii	**W7**		**S1S2**	**G3Q**
Long's Rush				
CP: wet, clayey soil (Cumberland, Dare*, Graham*, Harnett, Henderson, Hoke, Iredell*, Jackson*, Lee*, McDowell, Montgomery, Moore, Rutherford, Union*, Wayne*)				
Juncus secundus	**W7**		**S1S2**	**G5?**
Nodding Rush				
PM: rock outcrops and glades (Alexander, Alleghany*, Buncombe, Burke, Caswell*, Davie*, Forsyth*, Franklin*, Gaston*, Granville*, Madison*, Mitchell*, Orange*, Person*, Rockingham*, Union, Wake*)				
Juncus torreyi	**W3**		**SNR**	**G5**
Torrey's Rush				
M: bogs (Clay*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Kalmia cuneata	**W1**		**S3**	**G3**
White Wicky				
CS: low and high pocosins, streamhead pocosins, and ecotones (Bladen, Cumberland, Hoke, Moore, Pender, Richmond, Scotland)				
Krigia biflora var. biflora	**W7**		**S2?**	**G5T5**
Two-flower Dwarf-dandelion				
MP: rich mesic woods (Ashe, Avery*, Buncombe*, Caldwell*, Chatham*, Clay, Graham*, Haywood*, Transylvania*)				
Lathyrus japonicus var. maritimus	**W3**		**SNR**	**G5T5**
Beach Pea				
C: beaches (Dare?)				
Lathyrus palustris	**W7**		**S2?**	**G5**
Marsh Peavine				
C: bottomlands, streambanks and marshes (Beaufort*, Chowan*, Gates, Hertford, Martin*, Washington*)				
Lathyrus venosus	**W1**		**S3**	**G5**
Smooth Peavine				
PM: rich bottomlands and rocky slopes, generally over mafic rocks (Buncombe, Burke, Caswell, Catawba, Cleveland, Durham, Graham, Granville*, Haywood*, Jackson, Macon, Madison, Montgomery, Moore, Orange*, Richmond, Transylvania, Wake*, Watauga*, Wilkes*)				
Lespedeza frutescens	**W7**		**S2?**	**G5**
Violet Lespedeza				
CP: woodlands and woodland borders (Anson, Edgecombe, Montgomery, Orange, Randolph, Richmond, Stanly)				
Leucospora multifida	**W4**		**SU**	**G5**
Cliff Conobea				
C: sandy margins of ponds and wetlands (Carteret)				
Liatris scariosa var. scariosa	**W7**		**S2**	**G5?TNR**
New England Blazing-star				
MP: rock outcrops, glades, dry woodlands; mostly over mafic rocks? (Cherokee, Clay, Haywood, Henderson, Jackson, Macon, McDowell, Swain)				
Liatris secunda	**W7**		**S2**	**G4G5**
Sandhill Blazing-star				
SC: sandhills (Anson*, Bladen, Brunswick*, Hoke, New Hanover, Pender, Richmond, Scotland, Wake)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Lilium sp. 1	**W2**		**S1**	**G1G3Q**
Blackwater Turk's Cap Lily				
C: blackwater swamps (Chowan, Gates, Nash*)				
Lindernia monticola	**W1**		**S2**	**G4**
Flatrock Pimpernel				
PM: seepages on granitic flatrocks and other rock outcrops (Alexander, Cherokee*, Forsyth*, Franklin, Gaston, Granville, Henderson, Nash*, Rowan*, Rutherford, Stokes*, Wake, Yadkin*)				
Listera australis	**W1**		**S3**	**G4**
Southern Twayblade				
CM: moist hardwood forest, swamps, wet woods with acidic soils (Avery*, Beaufort, Bertie, Bladen, Brunswick, Columbus, Craven*, Currituck, Dare, Gates, Halifax, Henderson, Hoke, Hyde, Jones, Moore, Nash, Onslow, Pender, Richmond, Robeson, Sampson, Transylvania*, Tyrrell, Wake, Washington, Wayne)				
Listera cordata var. cordata	**W3**		**SH**	**G5T5**
Heartleaf Twayblade				
M: habitat in North Carolina not known (Avery*)				
Lobelia sp. 1	**W1**		**S3**	**G3**
Cedar Swamp Lobelia				
SC: wet streamheads and seepage slopes (Cumberland, Hoke, Moore, Richmond, Scotland)				
Lonicera flava	**W1**		**S3**	**G5?**
Yellow Honeysuckle				
MP: thin soils around rock outcrops, mainly mafic (Buncombe, Burke, Henderson, Jackson, Macon, McDowell, Polk, Rutherford)				
Ludwigia maritima	**W7**		**S2S3**	**G5**
Seaside Seedbox				
C: savannas, dunes, and ditches (Brunswick, Carteret, Dare, Onslow, Pender)				
Luzula multiflora var. multiflora	**W7**		**S2?**	**G5**
Heath Woodrush				
MP: moist woods (Burke*, Caldwell, Durham, Jackson, Macon, Madison*, Stokes*)				
Lycopodiella prostrata	**W7**		**S2?**	**G5**
Featherstem Clubmoss				
C: wet savannas (Bladen*, Brunswick, Columbus*, Onslow, Pender, Richmond)				
Lycopus amplectens	**W1**		**S3**	**G5**
Clasping Bugleweed				
CS: clay-based Carolina bays, cypress savannas (Cumberland*, Hoke, Moore, Onslow, Pender, Richmond, Robeson, Scotland)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Lysimachia loomisii	**W1**		**S3**	**G3?**
Loomis's Loosestrife				
C:pine savannas and pocosins (Beaufort*, Brunswick, Carteret, Columbus*, Craven, Cumberland, Duplin, Johnston*, Jones, Lenoir*, Martin*, Onslow, Pamlico, Pender, Robeson, Wayne*)				
Magnolia acuminata var. subcordata	**W7**		**S1?**	**G5T3Q**
Piedmont Cucumber-tree				
P: moist slopes (Anson*, Montgomery*, Moore*, Stanly)				
Magnolia grandiflora	**W1**		**S2?**	**G5**
Southern Magnolia				
C: mainland forests with maritime influence on the southeastern coast of North Carolina; introduced elsewhere (Brunswick, Carteret, Jones*, New Hanover*, Pender)				
Manfreda virginica	**W1**		**S3**	**G5**
Eastern Agave				
PMCS: granite flatrocks, mafic glades, dry outcrops, dry woodlands (Anson, Burke, Cabarrus, Cherokee, Clay*, Cleveland*, Cumberland*, Granville, Iredell*, Mecklenburg, Montgomery, Orange*, Randolph, Richmond, Rowan*, Rutherford, Stanly, Union)				
Matelea flavidula	**W3**		**SNR**	**G3?**
Yellow Carolina Milkvine				
P: habitat in North Carolina not known (Person*)				
Mertensia virginica	**W7**		**S2**	**G5**
Virginia Bluebells				
PCM: rich forests on slopes and bottomlands (Alamance, Bertie*, Caswell, Halifax, Person, Rockingham, Watauga*)				
Micranthes careyana	**W1**		**S3**	**G3**
Carey's Saxifrage				
M: seepy rock faces (Avery, Buncombe, Burke, Graham, Haywood, Henderson*, Jackson, Macon, Madison, McDowell, Mitchell, Polk, Rutherford, Transylvania, Watauga, Yancey*)				
Monarda austroappalachiana	**W7**		**S1**	**G1**
Ocoee Beebalm				
M: Glades, talus slopes, roadsides				
Monarda punctata var. arkansana	**W7**		**S1?**	**G5TNR**
Arkansas Horsemint				
M: dry forests over mafic rock (Haywood, Polk)				
Muhlenbergia glabrifloris	**W7**		**SH**	**G4?**
Clay-pan Muhly				
P: clay soils (Durham*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Muhlenbergia mexicana	**W7**		**S1?**	**G5**
Mexican Muhly				
M: forests and openings (Alleghany, Ashe, Buncombe, Macon*, Mitchell*, Rutherford)				
Muhlenbergia sylvatica	**W7**		**S1S2**	**G5**
Woodland Muhly				
PM: rich alluvial forests (Avery*, Buncombe, Cherokee, Durham*, Forsyth*, Franklin*, Gaston*, Graham, Granville*, Montgomery*, Orange*, Person*, Rutherford, Swain*)				
Nabalus roanensis	**W1**		**S3**	**G3**
Roan Rattlesnakeroot				
M: grassy balds, high elevation forests and outcrops (Alleghany, Ashe, Avery, Buncombe, Clay, Graham, Haywood, Jackson, Macon, Madison, McDowell, Mitchell, Swain, Transylvania, Watauga, Yancey)				
Najas gracillima	**W7**		**S2**	**G5?**
Slender Waternymph				
CPM: pools and lakes (Avery*, Buncombe*, Chowan*, Forsyth*, Iredell*, Jackson*, Madison*, McDowell*, Orange*, Randolph*, Wake*, Washington*)				
Nelumbo lutea	**W7**		**S2**	**G4**
American Lotus				
CS: ponds, slow streams, natural lakes, estuarine rivers (Anson, Bertie*, Columbus*, Craven, Halifax*, Johnston*, Perquimans*, Pitt, Richmond*, Robeson*, Stanly, Wake, Wilson*)				
Nuphar sagittifolia	**W1**		**S2**	**G5T2**
Cape Fear Spatterdock				
CS: blackwater streams, rivers, and lakes (Beaufort*, Bladen, Brunswick*, Columbus, Cumberland, Duplin, Harnett, Hoke, Jones*, Moore, Nash*, New Hanover, Pender, Pitt, Richmond, Robeson, Sampson, Scotland)				
Nymphoides cordata	**W7**		**S2**	**G5**
Little Floating-heart				
S: blackwater streams and pools, Carolina bays, vernal pools (Cumberland*, Hoke, Moore, Richmond, Scotland)				
Oenothera fruticosa var. unguiculata	**W7**		**S2S3**	**G5T2T3**
Southern Sundrops				
CP: wet clay savannas (Brunswick, Carteret, Columbus, Jones, Onslow, Pender)				
Onosmodium virginianum	**W1**		**S3**	**G4**
Virginia Marbleseed				
CTSP: sandhills, dry mafic sites, shell middens (Brunswick*, Burke, Catawba, Cleveland*, Cumberland, Durham*, Harnett, Hoke, Jones*, McDowell, Moore, Polk*, Richmond, Robeson*, Rutherford, Scotland, Wake*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Ophioglossum crotalophoroides	**W7**		**S1?**	**G5**
Bulbous Adder's-tongue				
C: moist ditchbanks and grassy roadside flats (Beaufort*, Brunswick*, Carteret*, Craven*, Dare*, Hyde*, Martin*, Pamlico*, Washington*)				
Ophioglossum nudicaule	**W7**		**S1?**	**G5**
Slender Adder's-tongue				
C: moist sandy flats (Brunswick*)				
Ophioglossum petiolatum	**W7**		**S2?**	**G5**
Long-stem Adder's-tongue				
CT: maritime wet grasslands, moist ditchbanks, grassy roadside flats (Beaufort*, Brunswick*, Carteret, Craven*, Dare*, Washington*)				
Orbexilum lupinellum	**W1**		**S3**	**G3G4**
Lupine Scurfpea				
CS: sandhills (Bladen*, Craven, Cumberland*, Harnett, Hoke, Moore, Pamlico*, Richmond, Scotland)				
Panax quinquefolius	**W1**		**S3S4**	**G3G4**
Ginseng				
MPS: cove forests, other rich forests (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Caswell, Catawba, Cherokee, Clay, Cleveland, Davidson*, Durham, Graham, Granville, Haywood, Henderson, Jackson, Lee, Macon, Madison, Martin*, McDowell, Mecklenburg*, Mitchell, Moore, Orange, Person, Polk, Randolph, Rockingham, Rutherford, Stokes, Surry, Swain, Transylvania, Wake, Watauga, Wilkes, Yancey)				
Panax trifolius	**W1**		**S3**	**G5**
Dwarf Ginseng				
MP: cove forests, northern hardwoods, other rich forests (Ashe, Buncombe, Caldwell*, Caswell, Cherokee, Clay, Durham, Graham, Haywood, Jackson, Macon, Orange, Rockingham*, Swain*, Wake, Watauga*)				
Panicum tenerum	**W1**		**S3**	**G4**
Southeastern Panic Grass				
CST: wet savannas, sandhill seeps, limesink ponds (Brunswick, Carteret, Columbus, Moore*, New Hanover, Onslow, Sampson, Scotland)				
Parietaria floridana	**W4**		**S1**	**G5**
Florida Pellitory				
TC: shell middens, disturbed sites, maritime forests (Beaufort*, New Hanover*, Onslow)				
Parietaria pensylvanica	**W7**		**S2**	**G5**
Pennsylvania Pellitory				
PMC: slopes and bottomlands, usually over calcareous or mafic rocks (Alleghany, Anson*, Bertie*, Buncombe*, Harnett, Haywood, Madison, Martin*, Mitchell*, Wilkes)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Paronychia fastigiata var. fastigiata	**W7**		**S1S2**	**G5T5**
Forked Whitlow-wort				
PS: dry woods and open areas (Burke, Moore*, Stanly)				
Paronychia montana	**W7**		**S1?**	**G4**
Mountain Nailwort				
MP: rocky slopes (Alexander, Cherokee*, Henderson*, McDowell, Rutherford, Transylvania*)				
Parthenium integrifolium var. mabryanum	**W1**		**S3**	**G5T3**
Mabry's Wild Quinine				
SPC: savannas, pocosin edges, upland pine-oak woods (Alexander*, Beaufort*, Bladen*, Craven*, Cumberland, Harnett, Hoke, Johnston*, Lee*, Mecklenburg*, Montgomery*, Moore, Nash*, Pitt*, Scotland, Union, Wake*, Warren*)				
Paspalum bifidum	**W1**		**S3**	**G5**
Pitchfork Crown Grass				
SC: sandhills and savannas (Brunswick*, Craven, Cumberland, Harnett, Hoke, Jones*, Montgomery*, Moore, Richmond, Scotland)				
Paspalum praecox	**W1**		**S2S3**	**G4**
Early Crown Grass				
CS: limesink ponds and savannas (Bertie*, Bladen*, Brunswick, Carteret, Columbus, Craven, Cumberland, Dare*, Harnett, Hoke, Lee*, Martin*, New Hanover, Onslow, Pamlico*, Pender, Richmond)				
Paspalum pubiflorum var. glabrum	**W7**		**S1?**	**G5T5**
Hairy-seed Crown Grass				
MP: open areas (Haywood*, Madison*, Stokes*, Yadkin*)				
Paxistima canbyi	**W4**		**SNA**	**G2?**
Canby's Mountain-lover				
M: rock outcrops (Mitchell*)				
Pediomelum canescens	**W1**		**S3**	**G3G4**
Buckroot				
SC: sandhills (Bladen*, Brunswick, Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Pellaea atropurpurea	**W1**		**S3**	**G5**
Purple-stem Cliff-brake				
MPC: limestone outcrops (Ashe, Buncombe, Cherokee, Forsyth*, Haywood*, Jackson, Jones*, Macon*, Madison, McDowell, Mitchell*, Rutherford, Swain, Transylvania, Wake*, Yadkin*)				
Persea borbonia	**W7**		**S2**	**G5**
Upland Red Bay				
TC: sandy upland soils in maritime forests (Brunswick, Carteret, Columbus, Craven, Hyde, Lenoir, New Hanover, Onslow, Pender, Washington)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Persicaria densiflora	**W1**		**S3**	**G5**
Dense-flower Smartweed				
C: Swamp forests (Carteret, Chowan, Dare, Halifax, Hyde, New Hanover, Wake)				
Phaseolus sinuatus	**W1**		**S3**	**G5T3?**
Sandhills Bean				
SC: sandhills (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Philadelphus hirsutus	**W1**		**S2**	**G5**
Hairy Mock-orange				
MP: bluffs, cliffs, and rocky woods, mainly over mafic or calcareous rocks (Buncombe, Cleveland, Graham*, Madison, McDowell, Mitchell*, Polk, Rutherford, Transylvania)				
Philadelphus inodorus	**W1**		**S3**	**G4G5**
Scentless Mock-orange				
MP: bluffs, cliffs, and rocky woods, mainly over mafic or calcareous rocks (Avery*, Bladen*, Buncombe*, Burke, Cabarrus*, Caswell, Catawba, Cherokee*, Cleveland*, Durham, Forsyth*, Haywood, Iredell*, Macon, Madison, McDowell, Mecklenburg, Orange, Polk, Randolph, Rutherford, Stanly, Swain*, Wilkes)				
Phlox amplifolia	**W1**		**S2**	**G3G5**
Largeleaf Phlox				
M: hardwood forests on mafic rock (Buncombe*, Burke, Graham, Haywood*, Jackson, Macon, Madison, McDowell, Mitchell*, Rutherford, Swain, Watauga*, Yancey*)				
Phlox divaricata	**W1**		**S3**	**G5**
Wild Blue Phlox				
CM: rich deciduous forests and slopes (Burke, Halifax, Henderson*, Madison*, Northampton, Rutherford*, Swain, Transylvania*, Watauga*)				
Phragmites americanus	**W7**		**S1?**	**G5T5**
American Reed				
C: Freshwater marshes (Currituck)				
Physalis lanceolata	**W1**		**S2?**	**G3Q**
Sandhill Ground Cherry				
SC: sandhills (Cumberland*, Harnett*, Hoke, Lee*, Montgomery*, Moore, New Hanover*, Richmond, Robeson*, Sampson, Scotland, Wayne*)				
Phytolacca rigida	**W7**		**S2**	**G5T5**
Maritime Pokeweed				
T: dunes, edges of brackish or salt marshes (Beaufort, Brunswick, Carteret, Dare, Hyde, New Hanover, Onslow, Pender)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Pieris floribunda	**W1**		**S2S3**	**G4**
Fetterbush				
MP: acid wooded slopes, heath balds at high elevations and summits of Piedmont monadocks (Buncombe*, Burke*, Haywood*, Jackson*, Macon*, Stokes*, Surry*, Transylvania, Watauga*)				
Piriqueta caroliniana var. caroliniana	**W4**		**S1?**	**G4?TNR**
Pitted Stripeseed				
C: Sandy soils of roadsides, woodland edges, and disturbed areas (Brunswick)				
Platanthera blephariglottis	**W1**		**S3?**	**G4G5**
White-fringed Orchid				
CMPS: bogs or depressions (Bladen*, Brunswick*, Carteret, Craven, Cumberland, Dare, Duplin*, Gates*, Henderson*, Hoke, Johnston*, Martin*, Moore, Onslow*, Pender, Richmond, Robeson*, Scotland*, Transylvania, Tyrrell*, Wake*)				
Polygonella americana	**W4**		**SU**	**G5**
Southern Jointweed				
S: sandhills (Hoke, Richmond, Scotland, Stanly)				
Polygonum erectum	**W7**		**S1S2**	**G5**
Erect Knotweed				
MP: open places (Alamance*, Alleghany, Ashe, Avery*, Caswell, Cherokee*, Clay*, Henderson, Jackson*, Madison*, Surry*, Wake*, Watauga*, Yancey*)				
Polygonum pinicola	**W4**		**S1?**	**G4G5**
Wireweed				
S: dry sandy areas (Hoke)				
Polygonum prolificum	**W7**		**S1?**	**G5T4T5**
Bushy Knotweed				
T: brackish marshes (Dare)				
Polygonum tenue	**W7**		**S2?**	**G5**
Glade Knotweed				
MP: glades and other thin soil over mafic rock (Alexander, Alleghany, Ashe*, Buncombe*, Burke, Durham*, Forsyth*, Granville, Henderson*, Jackson, Macon*, Mecklenburg*, Mitchell*, Orange*, Rockingham*, Stanly*, Wilkes)				
Polymnia canadensis	**W7**		**S2**	**G5**
Canada Leaf-cup				
M: moist, rich forests, especially over calcareous rock (Graham, Haywood, Madison, Mitchell*, Surry*, Yancey)				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Populus grandidentata **Bigtooth Aspen** M: dry ridges and rocky woods (Alleghany*, Ashe, Haywood*, Macon, Polk, Swain, Wilkes, Yancey)	**W7**		**S2**	**G5**
Potamogeton foliosus var. foliosus **Leafy Pondweed** CMP: lakes, streams, and ponds (Alleghany*, Brunswick*, Buncombe*, Carteret, Cherokee*, Currituck*, Gates*, Jones*, Madison*, Tyrrell*)	**W1**		**S2**	**G5T5**
Prunus nigra **Canada Plum** MP: rich forests (Davie*, Mecklenburg*, Montgomery*, Orange*, Polk*, Stanly*)	**W7**		**S1?**	**G4G5**
Prunus umbellata **Hog Plum** PSC: rocky or sandy woodlands (Anson, Bladen, Brunswick*, Burke, Cabarrus*, Cleveland*, McDowell, Moore*, Robeson*, Rutherford, Stanly, Union*)	**W7**		**S2**	**G4G5**
Prunus virginiana var. virginiana **Choke Cherry** M: oak and northern hardwood forests (Ashe, Buncombe, Graham)	**W7**		**S2**	**G5T5**
Psilotum nudum **Whiskfern** C: acid swamp (Chowan)	**W4**		**S1**	**G5**
Ptelea trifoliata **Wafer-ash** MPC: rich woods, cliffs and rock exposures mainly over mafic or calcareous rocks (Alexander*, Alleghany, Ashe, Brunswick*, Burke, Cabarrus, Caldwell, Cleveland, Cumberland*, Forsyth*, Franklin*, Granville, Guilford, Harnett, Jones, Madison, McDowell, Montgomery, New Hanover*, Northampton, Polk*, Rockingham, Rutherford, Wake, Wilkes)	**W1**		**S3**	**G5**
Pycnanthemum clinopodioides **Basil Mountain-mint** MP: forests, woodland borders (Burke, Catawba, Graham, McDowell, Rutherford)	**W7**		**S1?**	**G1G2**
Pyrola americana **American Shinleaf** MPC: forests (Alleghany, Ashe, Caswell, Davidson, Durham*, Guilford, Iredell*, Mitchell*, Orange, Person, Rockingham*, Rowan, Wake*, Warren*, Wilkes)	**W1**		**S2S3**	**G5**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Quercus bicolor	**W1**		**S2**	**G5**
Swamp White Oak				
P: upland swamp forests (Burke, Davie*, Durham, Granville, Guilford*, McDowell, Mecklenburg, Nash*, Person, Rockingham, Rowan, Wake*, Wilson*)				
Quercus muehlenbergii	**W1**		**S2**	**G5**
Chinquapin Oak				
MP: calcareous forests and bluffs (Ashe*, Beaufort*, Burke, Cabarrus*, Caswell, Chatham, Cherokee, Guilford*, Jackson, Madison, McDowell, Montgomery, Person, Polk, Rockingham, Rutherford, Swain, Vance, Wake)				
Quercus palustris	**W1**		**S2**	**G5**
Pin Oak				
MP: swamps (Caswell*, Chatham*, Davidson*, Davie*, Durham, Granville, Hertford*, Lee*, Lincoln*, McDowell, Mecklenburg*, Orange*, Person, Rowan*, Rutherford)				
Ranunculus allegheniensis	**W7**		**S2**	**G4G5**
Allegheny Mountain Buttercup				
M: rich cove forests (Alleghany, Ashe, Avery, Haywood*, Macon, Mitchell*, Watauga)				
Ranunculus laxicaulis	**W7**		**S2**	**G5?**
Swamp Buttercup				
C: swamp forests, open wet areas (Bladen, Columbus, Halifax, Northampton)				
Rhexia cubensis	**W1**		**S3**	**G4G5**
West Indies Meadow-beauty				
C: limesink ponds (Bladen, Brunswick, Carteret, Columbus, New Hanover, Onslow, Pender, Sampson)				
Rhynchospora careyana	**W1**		**S2**	**G4?Q**
Carey's Beaksedge				
C: limesink ponds, clay-based bays (Brunswick, Columbus, Craven, Hoke, New Hanover, Onslow, Robeson, Scotland)				
Rhynchospora cephalantha var. attenuata	**W1**		**S3**	**G5T3?**
Small Bunched Beaksedge				
S: boggy openings in streamhead pocosins (Cumberland, Harnett, Hoke, Moore, Scotland)				
Rhynchospora inundata	**W1**		**S3**	**G4?**
Narrowfruit Beaksedge				
SC: limesink ponds, clay-based Carolina bays (Bladen, Brunswick, Carteret, Hoke, New Hanover, Onslow, Pender, Robeson, Scotland)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rhynchospora leptocarpa	**W1**		**S3**	**G3**
Brownish Beaksedge				
S: boggy openings in streamhead pocosins, boggy beaverponds (Cumberland, Hoke, Moore, Richmond, Scotland)				
Rhynchospora nitens	**W1**		**S3**	**G4?**
Shortbeak Baldsedge				
C: savannas, limesinks, other wet open places (Bladen, Brunswick, Carteret, Columbus, Craven, Cumberland, Harnett, Hyde*, Johnston*, Onslow, Pender, Richmond, Scotland)				
Rhynchospora oligantha	**W1**		**S3**	**G4**
Feather-bristle Beaksedge				
CSP: savannas, seepage bogs (Brunswick, Carteret, Columbus, Craven, Cumberland, Harnett, Hoke, Moore, Onslow, Pender, Richmond)				
Rhynchospora pallida	**W1**		**S3**	**G3**
Pale Beaksedge				
CS: savannas, sandhill seeps, and pocosins (Beaufort*, Bladen*, Brunswick, Carteret, Columbus, Craven*, Cumberland, Duplin*, Edgecombe, Harnett*, Hoke, Jones*, Nash*, New Hanover, Onslow, Pamlico*, Pender, Richmond, Sampson, Scotland*, Wilson*)				
Rhynchospora scirpoides	**W1**		**S3**	**G4**
Long-beak Baldsedge				
C: beaver ponds, limesink ponds, wet savannas (Brunswick, Carteret, Columbus, Craven, Cumberland, Dare, Harnett, Hoke, Moore, New Hanover, Onslow, Richmond, Tyrrell*, Washington)				
Rhynchospora sp. 2	**W7**		**S1?**	**G1?**
Croatan Beaksedge				
C: ecotone between savanna and pocosin (Carteret*)				
Rhynchospora stenophylla	**W1**		**S3**	**G4**
Littleleaf Beaksedge				
CS: savannas, seepage bogs (Carteret*, Cumberland, Harnett, Hoke, Moore, Onslow, Pender*, Sampson, Scotland)				
Rhynchospora wrightiana	**W1**		**S3**	**G5**
Wright's Beaksedge				
C: savannas (Brunswick, Carteret, Cumberland, Harnett, Hoke, New Hanover, Onslow, Pender, Sampson, Scotland, Wayne*)				
Robinia hispida var. rosea	**W7**		**S2?**	**G4T3?**
Boynton's Locust				
MP: open woods (Alexander*, Alleghany, Buncombe*, Burke*, Catawba, Henderson*, Macon*, Stanly*, Wilkes*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rubus setosus	**W7**		**S1?**	**G4G5**
Bristly Blackberry				
M: bogs and wet thickets (Clay, Macon)				
Rudbeckia laciniata var. humilis	**W7**		**S2?**	**G5T3?**
Blue Ridge Cutleaf Coneflower				
CMP: seeps, stream banks, and boulderfield forests (Ashe*, Brunswick*, Buncombe, Burke, McDowell, Moore*)				
Rudbeckia triloba var. rupestris	**W7**		**S2?**	**G5T3?**
Blue Ridge Three-lobed Coneflower				
M: forests at high elevations				
Rumex altissimus	**W7**		**S2?**	**G5**
Pale Dock				
CPM: low wet places (Dare*, Durham*, Guilford*, Iredell*, Johnston*, Madison*, McDowell*, Wake*, Warren*, Wilson*)				
Sabatia campestris	**W4**		**SH**	**G5?**
Prairie Sabatia				
M: forest edges (Haywood*)				
Sabatia capitata	**W3**		**SH**	**G2**
Rose Gentian				
M: habitat in North Carolina not known (Cherokee*)				
Sabatia dodecandra	**W1**		**S3?**	**G5?**
Large Marsh Pink				
C: tidal, brackish, and freshwater marshes (Beaufort*, Brunswick*, Carteret, Craven, Currituck*, Dare, Hyde*, Jones*, New Hanover*, Pamlico*, Pasquotank*, Tyrrell*)				
Sabatia quadrangula	**W7**		**S2**	**G4G5**
Four-angle Sabatia				
PCS: moist to mesic grassy glades, woodland borders, powerline clearings, often with hardpan soils (Bertie*, Durham*, Granville, Halifax*, Johnston*, Orange*, Person, Randolph*, Richmond, Rowan*, Scotland*, Stanly, Wake, Wayne*)				
Sagina procumbens	**W4**		**SNA**	**G5**
Northern Pearlwort				
M: high elevation disturbed sites (Mitchell)				
Sagittaria calycina var. spongiosa	**W3**		**SNR**	**G5T4**
Tidal Sagittaria				
TC: tidal freshwater to brackish marshes				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Sagittaria engelmanniana	**W1**		**S2**	**G5?**
Engelmann's Arrowhead				
SCP: mostly blackwater streams and bogs (Carteret, Craven*, Cumberland, Harnett, Hoke, Moore, Onslow, Richmond, Scotland)				
Sagittaria platyphylla	**W4**		**SH**	**G5**
Delta Arrowhead				
P: marshes (Union*)				
Schizachyrium littorale	**W1**		**S2S3**	**G5T5**
Seaside Little Bluestem				
T: coastal dunes and maritime dry grasslands (Brunswick, Carteret, Dare, New Hanover, Onslow, Pender)				
Schoenolirion croceum	**W3**		**SH**	**G4**
Sunnybell				
S: wet pinelands (Richmond*)				
Schoenoplectus americanus	**W7**		**S1?**	**G5**
Olney Threesquare				
T: tidal marshes (Brunswick, Carteret, Dare, Hyde*, New Hanover, Onslow)				
Schoenoplectus californicus	**W3**		**SH**	**G5**
California Bulrush				
C: tidal marshes (New Hanover*)				
Schoenoplectus subterminalis	**W1**		**S3**	**G5**
Swaying Bulrush				
S: blackwater creeks (Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Scleria georgiana	**W1**		**S3**	**G4**
Georgia Nutrush				
CS: savannas (Brunswick, Carteret, Columbus, Craven, Hoke, New Hanover, Onslow, Pender, Robeson, Sampson, Scotland)				
Scutellaria mellichampii	**W7**		**SH**	**G5TNR**
Mellichamp's Skullcap				
C: sandy deciduous forests (Brunswick*)				
Scutellaria ovata ssp. bracteata	**W7**		**S2?**	**G5T3T5**
A Heartleaf Skullcap				
CP: rich woods on circumneutral soil (Anson, Bladen*, Caswell, Chatham*, Granville, Halifax, Harnett, Northampton, Stanly, Union, Wake)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Scutellaria ovata ssp. ovata var. ovata	**W7**		**S1**	**G5TNR**
Heartleaf Skullcap				
M: rich woods on circumneutral soil (Ashe, Burke*, Macon, Madison, Polk*, Stanly*, Transylvania, Wilkes*)				
Scutellaria ovata ssp. rugosa	**W7**		**S1**	**G5TNR**
A Heartleaf Skullcap				
PM: rich woods on circumneutral soil (Haywood*, Mitchell*, Yancey*)				
Scutellaria serrata	**W1**		**S2S3**	**G4G5**
Showy Skullcap				
PM: deciduous forests (Alamance*, Alexander*, Alleghany, Ashe, Buncombe*, Burke, Caswell, Durham*, Granville, Harnett, Lee*, Macon, McDowell, Orange, Person, Rockingham*, Rutherford, Surry*, Wake)				
Senna hebecarpa	**W7**		**S2S3**	**G5**
Wild Senna				
PM: forests (Buncombe, Burke, Durham, Graham, Granville, McDowell, Moore, Orange, Rowan, Rutherford, Surry)				
Sideroxylon lycioides	**W1**		**S2S3**	**G5**
Buckthorn Bumelia				
TCP: maritime forests, bluffs or forests over calcareous or mafic rocks (Alexander*, Anson*, Beaufort*, Bladen, Brunswick, Cabarrus, Carteret*, Columbus, Craven*, Currituck*, Dare*, Johnston*, Jones*, Montgomery, New Hanover, Onslow, Pender, Polk, Richmond, Rowan, Stanly, Tyrrell*)				
Silene caroliniana var. caroliniana	**W7**		**S2S3**	**G5T4**
Rock Catchfly				
P: open, rocky slopes (Anson*, Gaston, Moore, Richmond*, Stanly, Union)				
Silene caroliniana var. pensylvanica	**W7**		**S1S2**	**G5T4T5**
Sticky Catchfly				
CMP: open woodlands with sandy or sandy-loamy soils (Cumberland*, Dare*, Franklin*, Harnett*, Hoke, Johnston, Lenoir*, Macon, Moore, Orange*, Scotland, Wake)				
Sisyrinchium montanum var. crebrum	**W7**		**S1?**	**G5T5**
Strict Blue-eyed Grass				
P: oak-hickory forests (Alleghany, McDowell, Rutherford)				
Smilax pseudochina	**W1**		**S3?**	**G4G5**
Long-stalk Greenbrier				
C: streamheads, ecotones, borders of blackwater creek floodplains (Cumberland*, Gates*, Harnett, Hoke*, Martin, Moore, Onslow*, Robeson*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Solidago arguta var. arguta	**W7**		**S2?**	**G5T4T5**
Forest Goldenrod				
MPC: forests (McDowell)				
Solidago gracillima	**W1**		**S3**	**G4?**
Graceful Goldenrod				
CS: savannas, boggy sites, peaty places (Brunswick, Carteret, Columbus, Cumberland, Hoke, Jones, Montgomery, Moore, Onslow, Pender, Richmond)				
Solidago lancifolia	**W7**		**S1?**	**G3G4**
Lance-leaf Goldenrod				
M: moist forests over 5,000 ft., grassy balds, openings in Spruce-Fir forests (Avery*, Buncombe*, Macon*, Mitchell)				
Solidago puberula var. puberula	**W7**		**S2**	**G5T4T5**
Downy Goldenrod				
MP: dry, rocky areas (Alleghany, Avery*, Burke, Cabarrus*, Haywood*, Henderson*, Macon, Mitchell*, Surry*, Transylvania)				
Solidago pulchra	**W1**		**S3**	**G3**
Carolina Goldenrod				
C: savannas (Bladen*, Brunswick, Carteret, Craven, Cumberland, Jones, New Hanover*, Onslow, Pender)				
Solidago rugosa var. sphagnophila	**W7**		**S1?**	**G5T3T5**
Rough-leaved Goldenrod				
CM: Boggy habitats				
Solidago salicina	**W1**		**S2?**	**G5T5**
Round-leaved Goldenrod				
SPC: seeps, pocosins, peaty places (Brunswick*, Cumberland, Harnett, Hoke, Johnston*, Moore, Person, Richmond, Scotland, Wake)				
Solidago tarda	**W3**		**S1?**	**G4?Q**
Atlantic Goldenrod				
P: dry, disturbed roadside (Burke, McDowell, Rutherford)				
Spergularia salina	**W7**		**S1S2**	**G5**
Saltmarsh Sandspurrey				
T: salt marshes and tidal flats (Brunswick*, Carteret, Currituck*, Dare, Hyde*, Onslow, Pamlico*)				
Sphenopholis intermedia	**W7**		**S2**	**G5**
Prairie Wedgescale				
MPC: rich woods (Ashe*, Cabarrus*, Caldwell*, Graham*, Guilford*, Haywood*, Madison*, Martin*, Mitchell*, Rutherford, Stokes*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Spiraea alba	**W1**		**S2**	**G5**
Narrow-leaf Meadowsweet				
M: bogs (Alleghany, Ashe, Avery, Buncombe*, Clay*, Henderson, Jackson*, Macon, Transylvania, Wilkes*)				
Spiraea latifolia	**W7**		**S2?**	**G5T5**
Broadleaf Meadowsweet				
M: bogs (Alleghany, Ashe, Avery*, Jackson*, Macon, Surry*, Transylvania*)				
Spirodela polyrrhiza	**W7**		**S2?**	**G5**
Common Water-flaxseed				
C: pools, stagnant waters (Bertie, Bladen, Currituck, Dare, Gates, Pender, Perquimans*, Washington)				
Sporobolus pinetorum	**W1**		**S3**	**G3**
Carolina Dropseed				
CS: wet savannas (Bladen, Brunswick, Columbus, Cumberland, Duplin, Greene*, Harnett, Hoke, Jones, Lenoir*, Onslow, Pender, Richmond, Robeson*, Sampson*, Scotland)				
Stachys aspera	**W7**		**S2?**	**G4?**
Rough Hedge-nettle				
PS: moist or wet sandy soil of savannas, marshes, or swamp forests (Moore, Person)				
Stachys clingmanii	**W2**		**S2?**	**G2**
Clingman's Hedge-nettle				
M: spruce-fir forests, northern hardwoods forests				
Stachys hyssopifolia var. hyssopifolia	**W7**		**S2**	**G5T4T5**
Hyssopleaf Hedge-nettle				
CP: moist soils of savannas, marshes, seasonally flooded sinkhole ponds, roadside ditches, utility easements (Burke*, Columbus*, Davidson*, Harnett, Hoke, Jones*, Onslow, Scotland*, Stanly*)				
Stellaria alsine	**W1**		**S3?**	**G5**
Longstalk Starwort				
MP: seeps and river banks (Buncombe, Graham, Haywood, Henderson, Madison, Polk, Transylvania)				
Stellaria corei	**W1**		**S3**	**G4**
Core's Starwort				
MP: coves, seeps, northern hardwood forests (Ashe, Avery, Buncombe, Burke, Caldwell*, Catawba*, Clay, Haywood, Jackson, Macon, Madison, Mitchell, Polk, Swain, Watauga, Yancey)				
Stuckenia pectinata	**W1**		**S2?**	**G5**
Sago Pondweed				
CT: Brackish and alkaline waters (Currituck*, Dare*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Symphyotrichum elliottii	**W1**		**S2S3**	**G4**
Elliott's Aster				
C: freshwater to brackish marshes, swamps, and ditches (Beaufort*, Brunswick, Chowan*, Dare*, Duplin*, Jones, New Hanover*, Onslow*, Pasquotank*, Pender, Tyrrell*)				
Symphyotrichum firmum	**W7**		**S1?**	**G5**
Purple-stem Aster				
M: bogs and other wet places (Avery, Buncombe*, Clay, McDowell, Watauga, Yancey)				
Symphyotrichum lanceolatum var. lanceolatum	**W7**		**S2?**	**G5T5**
Panicled Aster				
P: sunny, wet meadows (Ashe, Hyde, McDowell)				
Symphyotrichum novae-angliae	**W1**		**S3**	**G5**
New England Aster				
M: wet meadows, bogs, prairies (Ashe*, Avery, Buncombe, Clay, Gaston, Graham*, Haywood*, Henderson, Jackson, Johnston*, Macon, Richmond*, Watauga)				
Symphyotrichum simmondsii	**W1**		**S2S3**	**G4G5**
Simmonds' Aster				
CP: wet ditches (Beaufort*, Brunswick, Carteret*, Columbus*, Currituck*, Dare, Hyde*, New Hanover*, Pender)				
Syngonanthus flavidulus	**W1**		**S3**	**G5**
Yellow Hatpins				
C: ditches, pocosin ecotones, savannas (Bladen, Brunswick, Carteret, Craven*, Cumberland, New Hanover*, Onslow, Pender, Sampson)				
Tetragonotheca helianthoides	**W1**		**S3?**	**G5**
Pineland Squarehead				
CMP: sandy woodlands, forests, roadsides (Burke, McDowell, Mecklenburg, Rutherford)				
Thermopsis villosa	**W7**		**S2?**	**G3?**
Aaron's-rod				
M: forests and openings (Avery, Cherokee*, Clay, Graham, Haywood, Jackson*, Macon, Madison*, Surry*, Swain, Transylvania)				
Thuja occidentalis	**W3**		**SNR**	**G5**
American Arborvitae				
M: calcareous rocks? (no known and documented native occurrences in North Carolina) (Alleghany, Ashe)				
Tilia americana var. americana	**W7**		**S1?**	**G5T5**
American Basswood				
MP: rich cove forests (Buncombe, Burke, Catawba, Cherokee, Davidson*, Person, Swain*, Wake*, Watauga*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Tradescantia hirsuticaulis	**W7**		**S2**	**G5**
Hairy Spiderwort				
MP: dry rocky woodlands and rock outcrops (Catawba, Jackson, Macon, Madison, McDowell, Orange*, Rutherford, Wake)				
Tridens carolinianus	**W1**		**S3**	**G3G4**
Carolina Triodia				
S: sandhills and pine flatwoods (Brunswick*, Cumberland, Harnett, Hoke, Moore, Richmond, Scotland)				
Trillium rugelii	**W1**		**S3**	**G3**
Southern Nodding Trillium				
PM: rich woods and coves over mafic and calcareous rocks (Avery, Buncombe, Burke, Cherokee, Davie*, Guilford*, Haywood, Henderson, Macon, Madison, McDowell, Mecklenburg*, Mitchell*, Polk, Richmond, Rutherford, Transylvania, Yancey)				
Triosteum angustifolium	**W7**		**S2?**	**G5**
Narrowleaf Tinker's-weed				
P: thin woodlands over mafic rocks (Cabarrus*, Caswell, Durham, Granville, Guilford*, Mecklenburg*, Orange*, Randolph*)				
Triosteum aurantiacum var. aurantiacum	**W7**		**S2**	**G5T5**
Early Horse Gentian				
MP: rich cove forests over mafic rocks (Ashe, Graham, Granville, Haywood, Jackson, Macon, Madison, McDowell*, Transylvania)				
Triphora trianthophoros var. trianthophoros	**W1**		**S2S3**	**G3G4T3**
Three Birds Orchid				
CMP: moist forests (Ashe*, Avery, Buncombe, Burke, Carteret, Cherokee, Clay, Dare, Graham, Haywood*, Henderson, Jackson*, Macon, McDowell, Polk*, Swain*, Transylvania, Yancey)				
Tsuga canadensis	**W5**		**S4S5**	**G5**
Eastern Hemlock				
MP: moist soils (Alexander, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Cherokee, Clay, Cleveland, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Orange, Polk, Rutherford, Stokes, Surry, Swain, Transylvania, Wake, Watauga, Yancey)				
Tsuga caroliniana	**W5**		**S2**	**G3**
Carolina Hemlock				
MP: open forests on ridgetops, rocky bluffs, or gorge walls (Alexander, Ashe, Avery, Burke, Catawba, Cleveland, McDowell, Mecklenburg*, Rutherford, Stokes, Surry, Transylvania)				
Ulmus serotina	**W3**		**SH**	**G4**
September Elm				
M: Mesic limestone forests (Madison*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Utricularia foliosa	**W3**		**SU**	**G5**
Leafy Bladderwort				
C: habitat in North Carolina not known				
Vaccinium hirsutum	**W1**		**S3**	**G3**
Hairy Blueberry				
M: ridgetop red oak forests, oak hickory forests, pine oak heath (Cherokee, Graham, Macon, Swain)				
Vaccinium virgatum	**W7**		**S2?**	**G4**
Small-flower Blueberry				
S: pocosins, blackwater swamps, mesic pine flatwoods, sandhill seeps (Brunswick, Craven, Cumberland, Hoke, Jones, Moore, Pender, Pitt, Richmond, Robeson, Scotland, Wake)				
Valerianella umbilicata	**W7**		**SH**	**G4G5**
Woodland Cornsalad				
PM: rich woods and disturbed sites (Forsyth*, Randolph*, Stokes*, Swain*)				
Verbena hastata	**W7**		**S2S3**	**G5**
Blue Vervain				
CMP: marshes, bogs, and fields (Alleghany, Ashe, Buncombe, Burke, Onslow, Wake)				
Verbena scabra	**W7**		**S2?**	**G5**
Sandpaper Vervain				
CT: marsh edges, shell middens (Bladen*, Brunswick*, Carteret*, Chowan*, Currituck*, Hyde*, New Hanover*, Onslow, Pender, Pitt)				
Verbesina helianthoides	**W3**		**SU**	**G5**
Ozark Crownbeard				
M: open woods and glades				
Verbesina virginica var. virginica	**W7**		**S2?**	**G5?T5?**
Frostweed				
CMPS: moist forests, especially over calcareous rocks (Jones, Macon, Richmond, Rockingham, Stanly, Wake)				
Veronica anagallis-aquatica	**W7**		**S1?**	**G5**
Blue Water Speedwell				
M: bogs, streambanks, rivulets (Avery, Madison*, Mitchell*)				
Veronicastrum virginicum	**W7**		**S2?**	**G4**
Culver's-root				
MP: bogs, wet meadows, dry soils over mafic rocks (Alleghany, Ashe, Avery*, Buncombe*, Durham*, Forsyth*, Graham, Granville, Jackson, Madison*, Orange*, Person*, Vance, Wake, Warren, Yancey*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Vigna luteola	**W4**		**S1?**	**G5**
Wild Cowpea				
C: marsh edges, wet open areas (Brunswick, New Hanover*)				
Viola brittoniana	**W7**		**S2?**	**G4G5**
Northern Coastal Violet				
CSP: moist slopes and low wet places (Columbus, Cumberland, Currituck*, Gates, Harnett, Hertford*, Johnston, Jones, Moore*, Northampton*, Pender, Perquimans*, Richmond*, Robeson*, Scotland, Washington*)				
Viola labradorica	**W7**		**S2?**	**G5**
Alpine Violet				
MP: rich cove forests, bottomlands and seepage slopes (Alexander*, Alleghany, Ashe, Cherokee, Clay*, Haywood*, Henderson, Iredell, Macon, Swain, Vance*)				
Viola tripartita	**W7**		**S2?**	**G5**
Three-parted Violet				
MP: forests associated with basic soils (Buncombe*, Burke, Catawba*, Clay*, Davidson*, Forsyth*, Graham*, Henderson, Iredell*, Mitchell*, Orange*, Polk, Rockingham*, Rowan*, Stanly*, Stokes*, Transylvania, Yancey*)				
Viola villosa	**W7**		**S2**	**G5**
Carolina Violet				
CSP: moist places, especially pocosin edges (Anson*, Bladen*, Cumberland, Hoke, New Hanover*, Onslow*, Pender, Richmond, Scotland)				
Xyris brevifolia	**W1**		**S3**	**G4G5**
Shortleaf Yellow-eyed-grass				
C: savannas, other low wet areas (Bladen, Brunswick, Carteret, Columbus, Craven, Onslow, Pender, Sampson)				
Xyris flabelliformis	**W1**		**S3**	**G4**
Savanna Yellow-eyed-grass				
CPS: savannas, streamhead pocosins (Bladen, Brunswick, Carteret, Onslow, Pender)				
Xyris iridifolia	**W7**		**S2**	**G4G5T4**
Iris-leaf Yellow-eyed-grass				
CS: limesink ponds, pineland pools, marshes (Beaufort*, Bladen, Brunswick, Carteret, Columbus*, Craven, Cumberland, Jones*, Onslow, Pender, Richmond, Robeson)				
Xyris smalliana	**W1**		**S3**	**G5**
Small's Yellow-eyed-grass				
CS: pineland pools, limesink ponds, shores (Bladen, Brunswick, Carteret, Columbus, Craven*, Moore, New Hanover, Onslow, Richmond, Sampson, Scotland, Washington)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Xyris sp. 1	**W2**		**S2**	**G2**
Small-seeded Xyris				
SC: wet savannas and pond margins (Carteret, Onslow, Pender, Sampson, Scotland)				
Yucca aloifolia	**W1**		**S2?**	**G5**
Aloe Yucca				
T: dunes (Brunswick, Carteret, Dare, Hyde, New Hanover, Pender)				
Yucca flaccida	**W7**		**S1?**	**G5**
Weakleaf Yucca				
CSPM: open, dry woodlands (Alleghany, Burke, Catawba, Cherokee*, Lee*, Lenoir*, McDowell)				
Zannichellia palustris	**W7**		**S2?**	**G5**
Horned Pondweed				
TC: calcareous or brackish waters of pools and estuaries (Brunswick*, Craven, Currituck*, Dare*, Hyde*, Onslow, Pamlico*, Tyrrell*)				
Zizania aquatica var. aquatica	**W7**		**S2**	**G5T5**
Indian Wild Rice				
C: freshwater marshes (Brunswick, Carteret, Craven, Dare, Gates, Jones, New Hanover, Pender, Washington)				
Mosses				
Amblystegium humile	**W7**		**S2?**	**G5**
A Thin-net Moss				
CP: wet substrates (Bertie, Brunswick, Buncombe, Caswell*, Durham, Edgecombe, McDowell, Moore, Pasquotank, Tyrrell)				
Amphidium mougeotii	**W7**		**S2?**	**G5**
Mougeot's Yoke Moss				
M: Seasonally wet crevices of neutral to acidic cliffs (Ashe*, Haywood*, Jackson, Macon, Polk*, Transylvania*, Watauga*)				
Anacamptodon splachnoides	**W7**		**S2?**	**G3G5**
Knothole Moss				
MP: bark of trees (Burke*, Chatham*, Clay*, Durham*, Graham*, Haywood*, Henderson*, Jackson, Macon*, McDowell, Mitchell*, Moore*, Orange*, Stokes*, Yancey*)				
Andreaea rothii var. rothii	**W7**		**S2?**	**G5TNR**
Black Falcate Split Moss				
MP: shaded, calcium-free rocks (Burke, Haywood, Jackson, Macon, McDowell*, Mitchell, Stokes*, Swain*, Yancey)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Andreaea rupestris	**W1**		**S2?**	**G5**
Rock Split Moss				
MP: rock, typically acidic (Buncombe*, Burke, Jackson, Mitchell*, Rutherford)				
Anomobryum julaceum	**W7**		**SH**	**G5**
Common Silver Moss				
M: high elevations on soil and rocks (Ashe*, Jackson*, Macon*, Rutherford*, Transylvania*)				
Archidium ohioense	**W7**		**SH**	**G4G5**
Tokyo Soil Moss				
CMP: open ground of old fields or meadows (Cumberland*, Durham*, Forsyth*, Transylvania*)				
Atrichum altecristatum	**W7**		**S2?**	**G5**
A Catherinea Moss				
MP: open or semishaded soils, usually low elevations (Buncombe*, Burke, Jackson, Macon, Orange, Transylvania)				
Atrichum cylindricum	**W7**		**S2?**	**G5**
A Catherinea Moss				
CP: moist soils of ditches and stream banks in bottomlands and swamp forests (Bertie*, Columbus*, Craven, Currituck, Franklin*, Johnston, Moore*, Orange)				
Atrichum tenellum	**W7**		**S1?**	**G4G5**
A Catharinea Moss				
P: wet depressions and bogs (McDowell, Rutherford)				
Barbula indica var. indica	**W7**		**S2?**	**G5?T5?**
Small Twist Teeth Moss				
CMP: soil, clay, limestone, cement, walls (Beaufort*, Brunswick*, Columbus*, Forsyth*, Macon*, McDowell*, New Hanover*, Pender*)				
Blindia acuta	**W7**		**S2?**	**G5**
Sharp-pointed Weissia				
M: moist or dripping acidic rock faces (Graham*, Jackson, Transylvania*, Wilkes*)				
Brachelyma subulatum	**W7**		**S2?**	**G4G5**
A Moss				
CP: bases of trees or on hard surfaces in swampy areas (Bladen, Columbus, Greene*, Hertford*, McDowell, Mecklenburg*)				
Brachythecium acuminatum var. cyrtophyllum	**W7**		**S2?**	**G5TNR**
Acuminate Brachythecium				
bark at base of trees, logs; localities in NC have not been confirmed.				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Brachythecium oedipodium	**W7**		**S2?**	**G5**
Sprawling Grass Moss				
M: on humus, rocks in moist, shaded areas, spruce-fir forest (Jackson*, Polk*, Swain*)				
Brachythecium plumosum	**W7**		**S2?**	**G5**
Rusty Feather Moss				
CM: moist, acid rocks in or near streams (Columbus*, Harnett*, Haywood, Jackson, McDowell, Rutherford, Transylvania, Watauga, Yancey*)				
Brachythecium reflexum	**W7**		**S2?**	**G5**
Reflexed Feather Moss				
M: on trees and boulders (Jackson, Watauga)				
Brachythecium rutabulum	**W7**		**S2?**	**G5**
Rough-stalked Feather Moss				
MP: trees, humus, rocks in wet forests (Avery*, Durham*, Jackson, Mecklenburg*, Rowan*, Swain*)				
Brachythecium salebrosum	**W7**		**S2?**	**G5**
Smooth-stalked Yellow Feather Moss				
MP: shaded sills, rocks, bases of trees, and logs in disturbed places (Forsyth*, Graham, Macon*, Watauga*, Yancey*)				
Brachythecium velutinum	**W7**		**S1?**	**G5**
Velvet Moss				
M: high elevation forests (Buncombe, Rutherford)				
Brothera leana	**W7**		**S2?**	**G3G4**
Boar Moss				
MP: on logs in forests; on thin soil around rock outcrops (Ashe, Avery, Burke*, Haywood*, Jackson*, McDowell*, Rutherford*, Stokes, Surry, Watauga*)				
Bruchia ravenelii	**W7**		**SH**	**G3?**
A Pygmy Moss				
S: sandy soil of old fields and open woods (Cumberland*, Harnett*, Hoke*, Johnston*, Richmond*, Wake*)				
Bruchia texana	**W7**		**SH**	**G3G5**
Texas Bruchia Moss				
CPS: moist clay or sandy soil in open areas (Durham*, Harnett*, Mecklenburg*, Pender*, Richmond*)				
Bryhnia novae-angliae	**W1**		**S2?**	**G5**
Arrowhead Moss				
CM: soil, humus, or rotten logs of shady, wet places (Haywood, Macon, Martin*, Transylvania, Tyrrell)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Bryoerythrophyllum recurvirostrum	**W7**		**S2?**	**G5**
A Red Foot Moss				
M: on soil, rock, and bark in forested boggy areas and stream banks (Clay*, Jackson, Macon*, Transylvania*)				
Campylostelium saxicola	**W7**		**S2?**	**G3G5**
Sandstone Grimmia				
M: acidic sandstone boulders and cliffs, and sandstone rock shelters (Macon*, Swain*, Transylvania*, Watauga*)				
Cryphaea ravenelii	**W7**		**S2?**	**G3?**
A Thread Cedar Moss				
PC: on bark of trees (Anson*, Chatham*, Durham*, Halifax*, Harnett*, Hertford*, Person*)				
Cynodontium schisti	**W7**		**S1**	**G3G5**
Cynodontium Moss				
PM: rock crevices, thin soil over rock (Burke, McDowell*)				
Dicranum bonjeanii	**W7**		**S2?**	**G5**
Thin-rib Curved-tail Moss				
M: mainly in eutrophic fens, sometimes on calcareous soil or rock (Ashe*, Avery*, Haywood*, Jackson*, Macon*, Mitchell*, Transylvania*, Yancey*)				
Dicranum fuscescens	**W7**		**S2?**	**G5**
Fuscous Moss				
MP: on trees, logs, soil, rock, and humus in woodlands, spruce-fir forest, occasionally bogs (Avery*, Buncombe, Burke, Graham*, Haywood*, Jackson*, Mitchell*, Stokes*, Swain*, Transylvania*, Yancey)				
Dicranum spurium	**W7**		**S2?**	**G5**
Rusty Fork Moss				
CMP: sandy soil, decayed logs, acidic rock, humus over rock, pine woods, sometimes bogs (Alexander*, Alleghany*, Avery*, Burke*, Carteret*, Franklin*, Jackson*, Macon*, Stokes*, Surry*)				
Diphyscium mucronifolium	**W7**		**S1?**	**G4**
Grain o'Wheat Moss				
MP: wet rocks at spray cliffs and cove forests (Burke, Graham)				
Entosthodon drummondii	**W7**		**SH**	**G4G5**
A Cord Moss				
CPS: primarily sandy soils of disturbed, often wet areas (Durham*, Harnett*, Moore*, Pender*, Randolph*, Tyrrell*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Ephemerum spinulosum	**W7**		**S2?**	**G4G5**
Emerald Dewdrops				
CP: moist or drying soil in disturbed, partly sunny areas, or on rotting wood (Columbus*, Durham, Mecklenburg*, Orange)				
Fabronia ciliaris var. polycarpa	**W7**		**S2?**	**G5T4T5**
A False Crushed-rice Moss				
CMPT: bark of trees, less commonly on rocks (Alexander*, Carteret*, Clay*, Cumberland*, Hyde*, Jackson*, Rowan*, Rutherford, Transylvania*, Washington*)				
Fissidens adianthoides	**W7**		**S1**	**G5**
Maiden Hair Moss				
MP: wet areas on soil, around bases of trees, on decaying wood or calcareous rocks (Ashe*, Avery*, Brunswick*, Durham*, Forsyth*, Granville*, Jackson, Johnston*, McDowell, Rutherford, Transylvania)				
Fissidens appalachensis	**W7**		**S2S3**	**G2G3**
Appalachian Pocket Moss				
M: submerged in rapids of moderate to high elevation mountain streams (Buncombe*, Caldwell*, Jackson*, Macon*, McDowell*, Rutherford, Swain*, Watauga*)				
Fissidens elegans	**W7**		**S2?**	**G5**
A Plume Moss				
CMP: sandy and clayey soils along roadsides and streams, on trees or stumps (Anson*, Columbus*, Cumberland*, Durham, Harnett, Hyde*, Jackson, Martin*, New Hanover*, Pender*, Rutherford, Sampson*, Stokes*)				
Fissidens exilis	**W4**		**SNA**	**G3G4**
Small Pocket Moss				
P: stream banks (Cleveland, Durham, Gaston*)				
Fissidens fontanus	**W7**		**S2?**	**G5**
Water Pocket Moss				
PC: attached to various substrata in stagnant and flowing water, and in coastal estuaries (Anson*, Craven*, Durham*, Franklin*, Gates*, Jackson, Jones*, Macon*, Mecklenburg*, New Hanover*, Orange, Pitt, Transylvania)				
Fissidens polypodioides	**W7**		**S2?**	**G4G5**
A Moss				
Calcareous soil, and limestone rocks along streams and in ravines; localities in NC have not been confirmed.				
Fontinalis flaccida	**W7**		**S2?**	**G4G5**
A Water Moss				
CMP: bases of trees in brooks or swamps, submerged (Bladen*, Brunswick*, Columbus*, Harnett, Jackson, Macon, Mitchell*, Wake*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Fontinalis sullivantii	**W7**		**S2?**	**G3G5**
A Water Moss				
CM: rocks or trees in pools or streams (Brunswick*, Columbus*, Gates*, Macon, Mitchell*, Nash)				
Funaria serrata	**W7**		**SH**	**G4**
A Cord Moss				
CP: on soil of disturbed places, near streams or ditches (Chatham*, Durham*, Forsyth*, Gaston*, Hertford*, Johnston*, Nash*, Randolph*)				
Grimmia olneyi	**W7**		**S2?**	**G3G5**
A Beard Moss				
MP: faces of dry to periodically wet rocks, along streams or splash zones of lakes (Alexander*, Alleghany*, Burke*, Forsyth*, Jackson*, Macon*, Montgomery*, Polk*)				
Helodium paludosum	**W7**		**S2?**	**G3G5**
Pond Fern Moss				
CMP: on soil, humus, trees, or logs in swamps, marshes, or meadows (Anson*, Camden, Caswell*, Columbus*, Durham*, Gates*, Granville*, Haywood*, Martin*, McDowell, Mecklenburg*, Orange, Pasquotank*, Stokes*, Watauga*)				
Herpetineuron toccoae	**W7**		**S2?**	**G4G5**
Coiled Moss				
M: bark of trees or calcareous to noncalcareous rocks (Graham*, Jackson*, McDowell*, Transylvania)				
Hygroamblystegium fluviatile	**W7**		**S2?**	**G5**
Brookside Feather Moss				
CMP: wet, calcareous rocks (Avery*, Burke*, Harnett, McDowell*, Wake)				
Hypnum fauriei	**W7**		**S2?**	**G5**
A Cedar Moss				
MP: logs and tree bases in deciduous forest (Haywood, Jackson, Johnston*, Macon, Moore*, Orange, Swain*, Transylvania, Watauga, Yancey)				
Hypnum plicatulum	**W7**		**S2?**	**G5**
A Cedar Moss				
M: epiphytic, terrestrial, and on humus over rock (Haywood*, Jackson, Swain*, Transylvania*, Yancey*)				
Leskea australis	**W7**		**S2?**	**G4**
A Dusky Moss				
P: lower parts of hardwood trees and bald cypress and logs in woods along rivers, swamps (Orange)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Leucodon andrewsianus	**W7**		**S2?**	**G5T5**
Squirrel Tail Moss				
M: trunks of trees, occasionally on rocks (Ashe*, Haywood*, Jackson, Macon*, Rutherford*, Watauga)				
Micromitrium megalosporum	**W7**		**S2?**	**G4**
A Moss				
CMP: unfertilized bare soil, in sun or partial shade (Bladen*, Columbus*, Durham*, Mecklenburg*, Transylvania*, Wilson*)				
Philonotis longiseta	**W7**		**S2?**	**G3G4**
An Apple Moss				
CMP: soil or rock, often on wet embankments (Alleghany*, Forsyth*, Haywood*, Jackson*, Jones*, Lee*, McDowell*, Stokes*, Swain*, Transylvania)				
Philonotis marchica	**W7**		**S2?**	**G5**
An Apple Moss				
CMP: rocks and soil in wet places, roadsides, springs (Forsyth*, Franklin*, Harnett*, Haywood*, Jackson, Macon, McDowell*, Rutherford, Swain*, Tyrrell, Watauga)				
Platydictya subtilis	**W7**		**S2?**	**G5**
A Moss				
CMP: bark at base of hardwoods, rarely on logs (Brunswick*, Clay*, Currituck, Durham*, Haywood, Jackson, McDowell, Surry, Transylvania, Watauga)				
Pohlia longicollis	**W1**		**S2?**	**G4G5**
Long Neck Nodding Moss				
M: rocks on cliffs, in crevices, on humus or soil (Jackson, Swain*, Yancey*)				
Pohlia rabunbaldensis	**W7**		**S1**	**G1**
A Moss				
M: high elevation hardwood forest (Buncombe)				
Polytrichum appalachianum	**W1**		**S3**	**G3**
Appalachian Haircap Moss				
MP: rocky summits, mostly in high elevations (Ashe, Avery, Buncombe*, Burke*, Haywood*, Jackson, Macon*, Mitchell, Stokes, Transylvania*, Watauga, Yancey*)				
Pterigynandrum filiforme	**W7**		**S1**	**G5**
Twisted Thread Moss				
M: mesic, acidic boulders and rock shelves (Buncombe*, Jackson, McDowell*, Mitchell*, Swain*)				
Pylaisiella polyantha	**W1**		**S2?**	**G5**
Many-fruited Feather Moss				
MP: on tree trunks and bases or logs (Forsyth*, Haywood, Mitchell*, Rutherford, Transylvania*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Rauiella scita	**W7**		**S2?**	**G3G5**
Smaller Fern Moss				
M: on rocks, trees, logs (Alexander*, Alleghany*, Ashe*, Avery*, Haywood*, Jackson*, Macon*, McDowell*, Transylvania*, Watauga*, Wilkes*, Yancey*)				
Sphagnum cribrosum	**W7**		**S2?**	**G3G5T3**
Florida Peatmoss				
CS: in blackwater streams; ditches (Beaufort*, Bladen, Brunswick*, Carteret*, Craven, Duplin*, Sampson*)				
Sphagnum fitzgeraldii	**W1**		**S2S3**	**G3**
Fitzgerald's Peatmoss				
C: pocosins and savannas (Bladen, Brunswick, Carteret, Craven, Duplin*, Onslow, Pamlico, Pender)				
Sphagnum henryense	**W1**		**S2S3**	**G4?**
Peatmoss				
CMP: bogs (Alleghany, Anson, Beaufort, Bladen, Brunswick*, Carteret*, Craven, Cumberland, Gates*, Hyde, Iredell*, Jackson, Johnston*, Moore*, Onslow, Pender*, Richmond*, Robeson*, Sampson*, Scotland, Tyrrell)				
Sphagnum subtile	**W1**		**S3**	**G5**
Peatmoss				
M: bogs and near wet rock outcrops (Ashe, Avery*, Haywood, Jackson, Macon, Swain, Transylvania*, Watauga)				
Thuidium allenii	**W7**		**S2?**	**G3G5**
Fernmoss				
CP: on soil, logs, exposed roots, and tree bases in swamps, often just above water line (Bertie*, Bladen*, Brunswick*, Carteret*, Chatham*, Columbus, Craven*, Davie*, Durham*, Gates*, Granville*, Lenoir*, McDowell, Pasquotank, Pender*, Tyrrell*, Wilkes)				
Thuidium recognitum	**W7**		**S2?**	**G5**
Hokkaido Fern Moss				
MP: on moist soil, humus, or rocks, in calcareous habitats, in woodlands, in clearings (Ashe*, Madison*, McDowell, Orange*, Randolph*, Watauga*, Yadkin*)				
Tortella flavovirens	**W7**		**S3**	**G4G5**
Beach Moss				
T: dune swales (Brunswick, Carteret*, Dare, Hyde)				
Tuerckheimia svihlae	**W7**		**S2?**	**GNR**
A Moss				
moist, calcareous rocks, stream margins in forests; localities in North Carolina not yet confirmed				

Scientific Name Common Name Region: Habitat Comments (Counties of Occurrence)	Status N.C.	 U.S.	Rank N.C.	 Global
Weissia brachycarpa **A Moss** Habitat and locations in NC have not been confirmed.	**W3**		**SNA**	**GNR**
Weissia muehlenbergiana **A Moss** CP: soil among grasses, roadsides (Brunswick*, Davidson*, Durham*, Madison*, Mecklenburg*, New Hanover*, Orange*, Pender*, Wake)	**W7**		**S2?**	**G5**
Zygodon viridissimus var. rupestris **A Moss** M: trunks of trees and on rocks (Avery*, Burke*, Caldwell*, Haywood, Jackson, Macon*, Mitchell, Swain*, Watauga*, Yancey*)	**W7**		**S2?**	**G5T5?**

Liverworts

Barbilophozia attenuata **A Liverwort** M: on rocks in spruce-fir forests (Avery*, Buncombe*, Haywood*, Transylvania*, Yancey*)	**W7**		**S2**	**G5**
Cephalozia macrostachya ssp. australis **A Liverwort** M: on moist rocks in humid gorges (Burke*, Jackson*, Macon*)	**W2**		**S1?**	**G4T1**
Cephaloziella massalongi **A Liverwort** M: high elevation rocky summits (Rutherford, Swain*)	**W7**		**S1**	**G3G5**
Cephaloziella obtusilobula **Roundleaf Liverwort** M: high elevation cliffs or other moist rocks (Burke*, Macon*, Rutherford)	**W2**		**S1?**	**G1?Q**
Diplophyllum andrewsii **A Liverwort** M: on soil or rocks on banks (Avery*, Buncombe*, Burke*, Graham*, Jackson, Macon*, McDowell*, Swain*, Yancey*)	**W7**		**S2**	**G3**
Diplophyllum apiculatum var. taxifolioides **A Liverwort** M: moist soil or rocks (Ashe*, Burke*, Haywood*, McDowell, Mitchell*)	**W2**		**S1?**	**G5T2Q**
Diplophyllum taxifolium var. taxifolium **A Liverwort** M: crevices and underledges of rock outcrops, mostly in spruce-fir forests at high elevations (Ashe*, Buncombe*, Burke*, Caldwell*, Clay*, Haywood*, Jackson*, Macon*, Mitchell*, Swain*, Transylvania*, Yancey*)	**W7**		**S2?**	**G5T5**

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Dumortiera hirsuta ssp. nepalensis	**W1**		**S1**	**G5T5**
A Liverwort				
M: in grottoes behind waterfalls in humid gorges (Graham*, Jackson*, Macon*, Rutherford)				
Frullania oakesiana	**W7**		**SH**	**G5**
A Liverwort				
M: on bark of conifers or deciduous trees at high elevations (Avery*, Buncombe*, Haywood*, Jackson*, Macon*, McDowell*, Mitchell*, Swain*, Watauga*, Yancey*)				
Frullania plana	**W7**		**S1**	**G4**
A Liverwort				
MP: on rock outcrops in gorges or near rivers (Burke*, Durham*, Graham*, Haywood*, Jackson, Macon*, McDowell, Polk*, Stokes*)				
Lophozia capitata	**W7**		**S1**	**G4**
A Liverwort				
CPM: in moist depressions in savannas or on clay-pans in the piedmont, rock outcrops (Durham*, Jones*, Onslow*, Orange*, Watauga)				
Mannia triandra	**W7**		**S1**	**G3G4**
A Liverwort				
M: on limestone (McDowell*)				
Marsupella emarginata ssp. emarginata	**W2**		**S1?**	**G5T5**
A Liverwort				
M: on moist rocks in humid gorges, spray zones of waterfalls, or high elevations (Burke, Haywood*, Jackson*, Macon*, McDowell*, Mitchell*, Transylvania*)				
Metzgeria furcata var. setigera	**W7**		**SH**	**G1**
A Liverwort				
M: damp shaded rocks at high elevations in spruce-fir forests or in humid gorges (Caldwell*, McDowell, Swain*)				
Metzgeria pubescens	**W7**		**SH**	**G5**
A Liverwort				
M: on bark of trees (Buncombe*, Swain*)				
Metzgeria uncigera	**W7**		**S1**	**G3**
A Liverwort				
CTM: on bark in maritime forests or on rhododendron in mountain forests (Brunswick, Carteret*, Gates*, Graham*, Hyde*, New Hanover*, Pamlico*)				
Pellia appalachiana	**W7**		**S1**	**G4**
A Liverwort				
MPC: on moist rock outcrops, usually near waterfalls, streams, or pools (Gaston, Graham, Macon*, Pender*, Transylvania, Wake*)				

Scientific Name / Common Name / Region: Habitat Comments (Counties of Occurrence)	Status N.C.	Status U.S.	Rank N.C.	Rank Global
Plagiochila caduciloba	**W1**		**S3**	**G3**
A Liverwort				
M: rocks and streambanks in humid gorges, spray zone of waterfalls (Burke, Clay, Graham, Haywood*, Jackson, Macon, McDowell*, Transylvania, Yancey*)				
Plagiochila columbiana	**W2**		**SH**	**GHQ**
A Liverwort				
P: on thin soil over boulders on floodplains (Durham*, Orange*)				
Plagiochila retrorsa	**W1**		**S3**	**G2G4**
A liverwort				
(=Plagiochila sharpii) M: damp rock faces in humid gorges, high elevation rocky summits (Buncombe, Graham, Haywood*, Jackson, Macon, Transylvania, Yancey*)				
Plagiochila undata	**W7**		**S2**	**G4G5**
A Liverwort				
CMP: on rocks or bark (Anson*, Chatham*, Columbus*, Durham*, Madison*, McDowell*, Orange*, Polk*, Rutherford, Stanly*)				
Plagiochila virginica var. euryphylla	**W2**		**SH**	**G3THQ**
A Liverwort				
M: rockfaces in the sprayzone of waterfalls (Transylvania*)				
Porella japonica ssp. appalachiana	**W3**		**SNR**	**G5?T1**
A Liverwort				
M: on rocks in spray zones of waterfalls				
Ptilidium pulcherrimum	**W7**		**S1**	**G5**

Speckled Shield Lichen				
MPC: on bark of hardwoods at high elevations, granitic or mafic rocks (Buncombe*, Haywood*, Jackson*, Macon, Swain*, Yancey*)				

Watch Category 6 (regionally rare) includes species which are rare in one region of North Carolina, while being uncommon to abundant within another region. These regional rarities, generally within-state disjuncts, are significant for protection of genetic variation and long-term viability of species.

A list of North Carolina's rare plants is determined by the political boundaries of the state. Biological rarity, however, is determined by the natural boundaries of physiography, geology, soils, and climate. These and other physical, biological, and historical factors have determined the evolutionary history and phytogeography of plants currently occupying what is now called "North Carolina." Rarity in one part of the state can have as much biological significance as disjunctions from another state. Disjunct populations nearly always have some level of genetic differentiation from populations in the main part of a species' range. Further study will likely show that many disjunct populations do warrant taxonomic status. Preservation of biodiversity requires not only preventing the extinction of species, but also maintaining genetic diversity within the species. The long-term viability of a species is dependent on the genetic diversity represented within and between different populations of the species. Moreover, within-state disjunctions are likely to serve as indicators of regionally unique or unusual habitats. Attention to such species is especially important in county natural area inventories and regional planning.

The following list of Watch Category 6 plants is not exhaustive, but represents some of the most important and significant within-state disjunctions. Emphasis is placed on species which are disjunct rather than peripheral — that is, which have a demonstrable gap in their North Carolina ranges. Examples are *Rhododendron catawbiense*, which is common at high to medium elevations in the mountains, but occurs in small, disjunct populations in the lower Piedmont and upper Coastal Plain, and *Pogonia ophioglossoides*, a primarily Coastal Plain species, occurring in rare bogs in the mountains.

SANDHILLS

Comptonia peregrina
Drosera rotundifolia
Kalmia buxifolia
Pinguicula caerulea
Pleea tenuifolia
Rhododendron catawbiense
Rhododendron minus
Magnolia tripetala
Pellaea atropurpurea
Platanthera lacera
Viola blanda

COASTAL PLAIN

Anemone minima
Castilleja coccinea
Clematis ochroleuca
Clematis virginiana
Delphinium tricorne
Kalmia buxifolia
Ranunculus hispidus
Symphyotrichum cordifolium

MOUNTAINS

Aristida virgata
Bartonia virginica
Brasenia schreberi
Calopogon tuberosus var. tuberosus
Cardamine bulbosa
Chamaedaphne calyculata
Clematis crispa
Coreopsis gladiata
Cuscuta corylii
Eriocaulon compressum
Eriocaulon decangulare var. decangulare
Eryngium integrifolium
Gaylussacia dumosa
Kalmia carolina
Lespedeza angustifolia
Orontium aquaticum
Platanthera cristata
Pogonia ophioglossoides
Pycnanthemum flexuosum
Rhynchospora gracilenta
Sabatia brachiata
Sium suave
Smilax laurifolia
Sphagnum cuspidatum
Sphagnum strictum
Sphagnum tenerum
Toxicodendron vernix
Hypericum virginicum
Utricularia biflora
Utricularia subulata

PIEDMONT

Aconitum uncinatum [lower Piedmont only]
Actaea pachypoda
Aralia nudicaulis
Aralia racemosa
Asplenium montanum [lower Piedmont only]
Berchemia scandens
Campanula americana
Carex torta
Cornus alternifolia
Dicentra cucullaria
Dryopteris intermedia
Eleocharis microcarpa var. filiculmis
Eryngium integrifolium
Hydrophyllum canadense
Hydrophyllum virginianum
Lachnocaulon anceps
Diphasiastrum tristachyum
Magnolia virginiana var. virginiana
Micranthes micranthidifolia
Morella caroliniensis
Paronychia argyrocoma
Phalaris arundinacea
Pieris floribunda
Pinus strobus [lower Piedmont only]
Platanthera flava
Pogonia ophioglossoides
Rhododendron catawbiense
Rhynchospora chalarocephala
Salix humilis
Sarracenia flava
Sarracenia purpurea var. venosa
Eriocaulon compressum
Schoenoplectus pungens var. pungens
Sium suave
Smilax laurifolia
Symplocarpus foetidus
Tsuga canadensis [lower Piedmont only]
Xyris baldwiniana
Xyris curtissii
Xyris jupicai

ENDEMIC PLANTS IN NORTH CAROLINA

This is a list of all taxa (including subspecies) considered to be strictly endemic to North Carolina. The list does not include taxa whose range barely extends into another state, such as taxa endemic to the Roan Mountain area or Great Smoky Mountains National Park.

SCIENTIFIC NAME	COMMON NAME	N.C. STATUS	U.S STATUS	N.C. RANK	GLOBAL RANK
Acanthothecis fontana	Fontana Lichen	W7	N/A	S1	G1

Symphyotrichum rhiannon	Buck Creek Aster	T	N/A	S1	G1

EXPLOITED PLANT TAXA IN NORTH CAROLINA

Plant species listed as Exploited in N.C. were previously tracked on the Watch List (Category W5a). This includes species that are either rare or generally widespread species that are in commercial demand and are often collected from wild populations. Such collection can cause local extirpation and is not sustainable over time. The NCNHP requests information on illegal collection incidents, but does not otherwise maintain species occurrences on Exploited species that are not Significantly Rare or on the Watch List.

SCIENTIFIC NAME	COMMON NAME	N.C. STATUS	U.S STATU	N.C. RANK	GLOBAL RANK
Actaea podocarpa	Mountain Black-cohosh	Exploited	N/A	S4	G4

Trillium catesbaei	Catesby's Trillium	Exploited	N/A	S4	G4
Trillium cuneatum	Little Sweet Trillium	Exploited	N/A	S3	G4G5
Trillium erectum	Stinking Benjamin	Exploited	N/A	S5	G5
Trillium grandiflorum	Large-flower Trillium	Exploited	N/A	S5	G5

POTENTIAL NEW TO NORTH CAROLINA PLANTS

The following list contains species that are not currently thought to occur in North Carolina but which are considered to have some possibility of being found here based on their established range and habitat preferences. Most are species that occur in the adjacent states of South Carolina, Georgia, Tennessee, or Virginia in habitats at least relatively similar to habitats known to exist in North Carolina. The purpose of this list is to encourage and challenge field workers to find new state occurrences. This list should give field investigators an idea of some of the species that may be regular components of North Carolina's flora. While some of these species may have relatively remote chances of being found in North Carolina, the likelihood of finding new state records is greatly increased by awareness of the possibilities and by species-directed searching. New state records of native vascular plants are being found at a rate of about five per year. Our knowledge of North Carolina's flora is still quite imperfect. Many natural areas are being destroyed before they can be investigated, and it can be assumed that a number of native species have been extirpated from North Carolina before they were ever documented as occurring in the state.

Following each species is the North Carolina province in which the species is considered most likely to be found. Where possible, a description of the typical habitat of the species in the vicinity of North Carolina is also given. Sometimes, the nearest known occurrence(s) to North Carolina are also listed.

SCIENTIFIC NAME	PROVINCE	STATE: Adjacent County of Occurrence	HABITAT
Abdra aprica	P	SC: Lancaster	granite outcrops
Actaea rubifolia	M	VA: Scott	cove forests

Trillium nivale	M	VA: Highland	moist calcareous forests
Trillium persistens	MP	SC; GA: Rabun	acid woods under hemlock
Trillium reliquum	PC	SC: Aiken	rich river bluffs
Urtica gracilis	M	VA: Giles	limestone outcrops
Uvularia floridana	C	SC: Berkeley, Charleston	alluvial forests
Vaccinium myrtilloides	M	VA: Pulaski, Roanoke	forests and bogs
Vaccinium oxycoccos	M	WV: Pocahontas	bogs
Vaccinium sempervirens	SC	SC: Lexington	sphagnous seeps, savannas
Vernonia angustifolia var. *scaberrima*	C	SC: Marion	pinelands
Vernonia pulchella	SC	SC: Beaufort, Jasper	pinelands
Veronica scutellata	M	VA: Carroll, Grayson	swamps and bogs
Viburnum obovatum	C	SC: Horry	moist forests

SIGNIFICANT 2018 REVISIONS TO THE PLANT LISTS

RARE LIST SPECIES ADDITIONS FOR 2018

SCIENTIFIC NAME	NEW N.C. STATUS	PREVIOUS N.C. STATUS	U.S. STATUS	N.C. RANK	GLOBAL RANK
Asarum rosei (*Hexastylis sp. 3*)	SR-L	N/A	N/A	S1	G1?
Eleocharis wolfii	SR-T	N/A	N/A	S1	G3G5

WATCH LIST SPECIES ADDITIONS FOR 2018

SCIENTIFIC NAME	NEW N.C. STATUS	PREVIOUS N.C. STATUS	U.S. STATUS	N.C. RANK	GLOBAL RANK
Acanthothecis fontana	W7	N/A	N/A	S1	G1
Carex aquatilis	W7	N/A	N/A	S1	G5
Cyperus hystricinus	W7	N/A	N/A	SH	G4
Dichanthelium malacon	W7	N/A	N/A	S1?	G3
Monarda austroappalachiana	W7	N/A	N/A	S1	G1

TAXA REMOVED FROM RARE AND WATCH LIST SINCE 2016

SCIENTIFIC NAME	NEW N.C. STATUS	PREVIOUS N. C. STATUS	U.S. STATUS	N.C. RANK	GLOBAL RANK
Calycanthus floridus	N/A	W7	N/A	S5	G5
Carex festucaea	N/A	W7	N/A	S3	G5
Carex tetanica	N/A	SR-P	N/A	SNA	G4G5
Carex woodii	W1	SR-P	N/A	S3	G4
Cephalozia macrostachya ssp. australis	W2	SR-T	N/A	S1?	G4T1
Dichanthelium columbianum	N/A	W7	N/A	S3	G5

SCIENTIFIC NAME CHANGES TO THE PLANT LIST SINCE 2016

FORMER NAME	CURRENT NAME
Allium cuthbertii	*Allium keeverae*
Arabidopsis lyrata	*Arabidopsis lyrata ssp. lyrata*
Asplenium ruta-muraria	*Asplenium ruta-muraria var. cryptolepis*
Baptisia australis var. aberrans	*Baptisia aberrans*
Bigelowia nudata ssp. australis	*Bigelowia nudata var. australis*
Canoparmelia amabilis	*Canoparmelia caroliniana*
Cheilolejeunea myriantha	*Cheilolejeunea discoidea*
Cladonia evansii	*Cladina evansii*
Cymophyllus fraserianus	*Carex fraseriana*
Ipomoea pes-caprae	*Ipomoea brasiliensis*
Marsupella emarginata var. latiloba	*Marsupella emarginata ssp. emarginata*
Micropolypodium nimbatum	*Moranopteris nimbata*
Muhlenbergia glabriflora	*Mulenbergia glabrifloris*
Minuartia godfreyi	*Mononeuria paludicola*
Panicum lithophilum	*Panicum philadelphicum ssp. lithophilum*
Parthenocissus vitacea	*Parthenocissus inserta*
Persicaria glabra	*Persicaria densiflora*
Plagiochila sharpii	*Plagiochila retrorsa*
Platanthera flava var. herbiola	*Platanthera herbiola*
Potamogeton foliosus	*Potamogeton foliosus var. foliosus*
Rubus dalibarda	*Rubus repens*
Salvia azurea	*Salvia azurea var. azurea*
Seymeria pectinata	*Seymeria pectinata ssp. pectinata*
Streptopus amplexifolius	*Streptopus amplexifolius var. amplexifolius*

Taxonomy in this publication generally follows Weakley, A.S. *Flora of the Southern and Mid-Atlantic States. 2018.* University of North Carolina Herbarium (NCU) NC Botanical Garden, University of North Carolina, Chapel Hill, North Carolina. Available online at www.herbarium.unc.edu.

INDEX OF SCIENTIFIC NAMES

Abies fraseri, 100
Acanthothecis fontana, 150, 155, 162
Acer nigrum, 100
Acmella repens, 10
Acmispon helleri, 10
Aconitum reclinatum, 10
Aconitum uncinatum, 154
Acrobolbus ciliatus, 89
Actaea pachypoda, 154
Actaea podocarpa, 156
Actaea racemosa, 156
Adiantum capillus-veneris, 10
Adlumia fungosa, 10
Aeschynomene virginica, 10
Agalinis aphylla, 100
Agalinis decemloba, 100
Agalinis linifolia, 100
Agalinis obtusifolia, 100
Agalinis virgata, 10
Agarista populifolia, 100
Agastache nepetoides, 10
Agrostis altissima, 10
Agrostis mertensii, 11
Aletris farinosa, 156
Aletris lutea, 11
Allium allegheniense, 11
Allium cuthbertii, 163
Allium keeverae, 4, 11, 155, 163
Allium sp. 1, 11, 155
Allium tricoccum, 156
Alnus viridis ssp. crispa, 11
Amaranthus pumilus, 11
Amblystegium humile, 139
Amelanchier sanguinea, 100
Amorpha confusa, 11
Amorpha georgiana, 11
Amorpha schwerinii, 101
Ampelopsis cordata, 101
Amphicarpum amphicarpon, 101
Amphicarpum muhlenbergianum, 11
Amphidium mougeotii, 139
Anacamptodon splachnoides, 139
Anaptychia crinalis, 95
Anastrophyllum saxicola, 89
Andreaea rothii var. rothii,139
Andreaea rupestris, 140
Andropogon arctatus, 101
Andropogon mohrii, 11
Andropogon perangustatus, 101
Andropogon tracyi, 101
Andropogon virginicus var. decipiens, 101
Anemone berlandieri, 12
Anemone caroliniana, 12
Anemone minima, 101, 153
Anemone quinquefolia, 153
Aneura sharpii, 89
Angelica atropurpurea, 101
Anomobryum julaceum, 140
Antennaria howellii ssp. petaloidea, 101
Anthenantia rufa, 102
Anthoxanthum hirtum, 12
Anticlea glauca, 12
Anzia americana, 95
Anzia ornata, 95
Aphanorrhegma serratum, 78
Arabidopsis lyrata, 102, 163
Arabidopsis lyrata ssp. lyrata, 102, 163
Arabis patens, 12
Arabis pycnocarpa var. adpressipilis, 12
Aralia nudicaulis, 154
Aralia racemosa, 154
Archidium donnellii, 78
Archidium ohioense, 140
Archidium tenerrimum, 78
Arenaria lanuginosa var. lanuginosa, 12
Arethusa bulbosa, 12
Arisaema stewardsonii, 12
Aristida condensata, 12
Aristida simpliciflora, 13
Aristida tenuispica, 13
Aristida virgata, 154
Arnoglossum ovatum var. lanceolatum, 13
Aronia prunifolia, 102
Arthonia kermesia, 155
Arthonia kermesina, 150
Arthotheliopsis floridensis, 150
Asarum rosei, 13, 155, 162
Asclepias cinerea, 13
Asclepias longifolia, 102
Asclepias pedicellata, 13
Asclepias purpurascens, 13
Asclepias tomentosa, 102
Asemeia grandiflora, 13
Aspiromitus adscendens, 150
Aspiromitus appalachianus, 95
Asplenium bradleyi, 13
Asplenium heteroresiliens, 13
Asplenium monanthes, 13
Asplenium montanum, 154
Asplenium pinnatifidum, 14
Asplenium resiliens, 102
Asplenium ruta-muraria var. cryptolepis, 14, 163
Asplenium trichomanes, 157
Asplenium x trudellii, 157
Astomum ludovicianum, 78
Astragalus michauxii, 14
Athyrium angustum, 14
Atrichum altecristatum, 140
Atrichum cylindricum, 140
Atrichum tenellum, 140
Baccharis angustifolia, 102
Baccharis glomeruliflora, 14
Bacopa caroliniana, 14
Bacopa innominata, 14
Bacopa rotundifolia, 14
Balduina atropurpurea, 14
Baptisia aberrans, 14, 163
Baptisia alba, 15
Baptisia albescens, 102
Baptisia australis, 163
Baptisia bracteata, 15
Barbilophozia attenuata, 147
Barbilophozia barbata, 90
Barbilophozia hatcheri, 90
Barbula indica var. indica, 140
Bartonia paniculata ssp. paniculata, 102
Bartonia verna, 102
Bartonia virginica, 154
Bazzania nudicaulis, 90
Bellibarbula recurva, 78
Berberis canadensis, 15
Berchemia scandens, 154
Betula cordifolia, 15
Bidens mitis, 103
Bidens trichosperma, 15
Bigelowia nudata var.

australis, 103, 163
Blindia acuta, 140
Boechera burkii, 103
Boechera missouriensis, 15
Boltonia asteroides var. glastifolia, 15
Botrychium lanceolatum var. angustisegmentum, 15
Botrychium matricariifolium, 15
Botrychium simplex var. simplex, 15
Bouteloua curtipendula var. curtipendula, 16
Boykinia aconitifolia, 103, 163
Brachelyma subulatum, 140
Brachydontium trichodes, 78
Brachyelytrum aristosum, 16
Brachymenium andersonii, 78
Brachymenium systylium, 78
Brachythecium acuminatum var. cyrtophyllum, 140
Brachythecium oedipodium, 141
Brachythecium plumosum, 141
Brachythecium populeum, 79
Brachythecium reflexum, 141
Brachythecium rotaeanum, 79
Brachythecium rutabulum, 141
Brachythecium salebrosum, 141
Brachythecium velutinum, 141
Brasenia schreberi, 154
Bromus ciliatus, 16
Bromus latiglumis, 16
Bromus nottowayanus, 103
Brothera leana, 141
Bruchia brevifolia, 79
Bruchia carolinae, 79
Bruchia fusca, 79
Bruchia hallii, 79
Bruchia ravenelii, 141
Bruchia texana, 141
Bryhnia novae-angliae, 141
Bryocrumia vivicolor, 79
Bryoerythrophyllum ferruginascens, 79
Bryoerythrophyllum inaequalifolium, 79
Bryoerythrophyllum recurvirostrum, 142
Bryoxiphium norvegicum, 79
Bryum limbatum, 79
Bryum riparium, 80
Buchnera americana, 16
Buckleya distichophylla, 16
Bulbostylis warei, 16
Burmannia biflora, 103
Buxbaumia aphylla, 80
Buxbaumia minakatae, 80
Calamagrostis cainii, 16
Calamagrostis canadensis var. canadensis, 16
Calamagrostis porteri ssp. porteri, 16
Calamovilfa brevipilis, 103
Callitriche terrestris, 17
Calopogon multiflorus, 17
Calopogon tuberosus, 154
Calopogon tuberosus var. tuberosus, 154
Caltha palustris var. palustris, 17
Calycanthus floridus, 162
Calystegia spithamaea ssp. stans, 103
Camassia scilloides, 17
Campanula americana, 154
Campanula aparinoides var. aparinoides, 17
Campanula rotundifolia, 17
Campanulastrum americanum, 154
Campylium stellatum, 80
Campylopus atrovirens var. atrovirens, 80
Campylopus carolinae, 80
Campylopus oerstedianus, 80
Campylopus paradoxus, 80
Campylostelium saxicola, 142
Canoparmelia amabilis, 95, 163
Canoparmelia caroliniana, 95, 163
Cardamine bulbosa, 154
Cardamine clematitis, 17
Cardamine dissecta, 17
Cardamine douglassii, 17
Cardamine longii, 17
Cardamine micranthera, 18
Cardamine rotundifolia, 18
Carex albursina, 103
Carex amplisquama, 18
Carex aquatilis, 103, 162
Carex arctata, 18
Carex argyrantha, 18
Carex austrodeflexa, 18
Carex baileyi, 18
Carex barrattii, 18
Carex basiantha, 18
Carex biltmoreana, 104
Carex bromoides ssp. montana, 104
Carex bushii, 18
Carex buxbaumii, 18
Carex calcifugens, 19
Carex canescens var. disjuncta, 19
Carex careyana, 19
Carex chapmanii, 104
Carex cherokeensis, 19
Carex collinsii, 104
Carex conoidea, 19
Carex cristatella, 19
Carex crus-corvi, 19
Carex decomposita, 19
Carex deflexa, 19
Carex eburnea, 19
Carex echinata ssp. echinata, 104
Carex emmonsii, 20
Carex exilis, 20
Carex fraseriana, 104, 163
Carex gholsonii, 104
Carex granularis, 104
Carex hitchcockiana, 20
Carex hormathodes, 20
Carex hyalinolepis, 104
Carex impressinervia, 20
Carex jamesii, 20
Carex lasiocarpa, 20
Carex lasiocarpa var. americana, 20
Carex leavenworthii, 105
Carex leptonervia, 105
Carex lucorum var. austrolucorum, 105
Carex lupuliformis, 20
Carex lutea, 20, 155
Carex manhartii, 105
Carex meadii, 20
Carex misera, 105
Carex mitchelliana, 105
Carex molestiformis, 21
Carex oklahomensis, 105
Carex oligocarpa, 21

Carex oligosperma, 21
Carex pedunculata var. pedunculata, 21
Carex physorhyncha, 105
Carex projecta, 21
Carex purpurifera, 21
Carex radfordii, 21
Carex reniformis, 21

Cladonia psoromica, 96, 155
Cladrastis kentukea, 107
Cleistesiopsis bifaria, 107
Cleistesiopsis divaricata, 107
Cleistesiopsis oricamporum, 107
Cleistocarpidium palustre, 80
Clematis catesbyana, 24
Clematis crispa, 154
Clematis occidentalis, 24
Clematis occidentalis var. occidentalis, 24
Clematis ochroleuca, 153
Clematis virginiana, 153
Clinopodium georgianum, 24
Coelorachis rugosa, 107
Collinsonia tuberosa, 24
Collinsonia verticillata, 24
Cololejeunea ornata, 91
Comptonia peregrina, 107, 153
Conioselinum chinense, 24
Coptis trifolia var. groenlandica, 24
Corallorhiza maculata var. maculata, 25
Corallorhiza odontorhiza, 107
Corallorhiza wisteriana, 25
Coreopsis aristulata, 25, 155
Coreopsis delphiniifolia, 108
Coreopsis gladiata, 154
Coreopsis grandiflora var. grandiflora, 25
Coreopsis latifolia, 108
Coreopsis palustris, 25
Coreopsis pubescens var. robusta, 108
Cornus alternifolia, 154
Cornus asperifolia, 25
Cornus racemosa, 25
Corydalis micrantha, 25
Coscinodon cribrosus, 80
Crataegus aestivalis, 108
Crataegus coccinea, 25
Crataegus munda, 25
Crataegus oreophila, 108, 155
Crataegus pallens, 26
Crataegus schuettei, 108
Crataegus senta, 26
Crataegus spathulata, 108
Crataegus succulenta, 26
Crinum americanum var. americanum, 26
Crocanthemum bicknellii, 26
Crocanthemum carolinianum, 26
Crocanthemum corymbosum, 26
Crocanthemum georgianum, 26
Crocanthemum nashii, 26
Crocanthemum propinquum, 26
Crocanthemum rosmarinifolium, 27
Croton monanthogynus, 27
Cryphaea nervosa, 81
Cryphaea ravenelii, 142
Cuscuta cephalanthi, 27
Cuscuta coryli, 27, 154
Cuthbertia rosea, 108
Cylindrocolea rhizantha, 91
Cynanchum laeve, 108

Cynodontium schisti, 142
Cyperus dentatus, 27
Cyperus distans, 108
Cyperus granitophilus, 27
Cyperus houghtonii, 108
Cyperus hystricinus, 109, 162
Cyperus lecontei, 27
Cyperus odoratus var. engelmannii, 109
Cyperus squarrosus, 109
Cyperus surinamensis, 109
Cyperus tetragonus, 27
Cyperus virens, 27
Cypripedium parviflorum, 156
Cypripedium parviflorum var. parviflorum, 27
Cypripedium reginae, 109
Cyrto-hypnum pygmaeum, 81
Cystopteris bulbifera, 109
Cystopteris fragilis, 27
Cystopteris tennesseensis, 28
Cystopteris tenuis, 28
Dactylorhiza viridis, 28
Dalea pinnata, 109
Danthonia epilis, 28
Delphinium exaltatum, 28
Delphinium tricorne, 153, 154
Dendrolycopodium dendroideum, 28
Dendrolycopodium hickeyi, 28
Deschampsia cespitosa ssp. glauca, 28
Desmodium cuspidatum var. cuspidatum, 109
Desmodium fernaldii, 28
Desmodium ochroleucum, 29
Desmodium sessilifolium, 29
Diamorpha smallii, 109
Diarrhena americana, 29
Dicentra cucullaria, 154
Dicentra eximia, 29
Dichanthelium annulum, 29
Dichanthelium bicknellii, 29
Dichanthelium caerulescens, 29
Dichanthelium columbianum, 162
Dichanthelium cryptanthum, 29
Dichanthelium dichotomum var. roanokense, 109
Dichanthelium erectifolium, 110
Dichanthelium fusiforme, 29
Dichanthelium hirstii, 30
Dichanthelium linearifolium, 110
Dichanthelium malacon, 110, 162
Dichanthelium neuranthum, 30
Dichanthelium oligosanthes var. scribnerianum, 110
Dichanthelium ovale var. ovale, 110
Dichanthelium spretum, 30
Dichanthelium strigosum var. glabrescens, 30
Dichanthelium webberianum, 110
Dichelyma capillaceum, 81
Dichodontium pellucidum, 81
Dicranella rufescens, 81
Dicranella varia, 81
Dicranum bonjeanii, 142
Dicranum fuscescens, 142
Dicranum spurium, 142
Dicranum undulatum, 81
Didiplis diandra, 30
Didymodon fallax, 81
Didymodon tophaceus, 81
Didymoglossum petersii, 30
Diervilla rivularis, 30
Dionaea muscipula, 30, 156
Diphasiastrum tristachyum, 154
Diphyscium mucronifolium, 142
Diplachne maritima, 30
Diplazium pycnocarpon, 162
Diplophyllum andrewsii, 147
Diplophyllum apiculatum var. taxifolioides, 147, 162
Diplophyllum obtusatum, 91
Diplophyllum taxifolium var. mucronatum, 91
Diplophyllum taxifolium var. taxifolium, 147
Dirca palustris, 110
Ditrichum ambiguum, 81
Ditrichum rhynchostegium, 82
Ditrysinia fruticosa, 30
Draba ramosissima, 31
Drepanolejeunea appalachiana, 91
Drosera filiformis, 31
Drosera rotundifolia, 153
Dryopteris carthusiana, 110
Dryopteris cristata, 110
Dryopteris goldiana, 111
Dryopteris intermedia, 154
Dryopteris ludoviciana, 111
Dumortiera hirsuta ssp. nepalensis, 148
Echinacea laevigata, 31
Echinacea pallida, 31
Echinacea purpurea, 31
Echinocystis lobata, 111
Elatine americana, 111
Elatine minima, 111
Eleocharis atropurpurea, 31
Eleocharis cellulosa, 31
Eleocharis elongata, 31
Eleocharis engelmannii, 111
Eleocharis equisetoides, 111
Eleocharis erythropoda, 111
Eleocharis fallax, 31
Eleocharis halophila, 31
Eleocharis microcarpa, 154
Eleocharis montevidensis, 32
Eleocharis palustris, 111
Eleocharis parvula, 32
Eleocharis robbinsii, 32
Eleocharis rostellata, 32
Eleocharis tricostata, 111
Eleocharis vivipara, 32
Eleocharis wolfii, 32, 162
Ellisia nyctelea, 158
Elodea canadensis, 112
Elodea nuttallii, 112
Elymus canadensis var. canadensis, 112
Elymus riparius, 112
Elymus trachycaulus ssp. trachycaulus, 32
Elymus virginicus var. halophilus, 32
Encalypta procera, 82
Endodeca serpentaria, 156
Enemion biternatum, 32
Entodon compressus, 82
Entodon concinnus, 82
Entodon sullivantii, 82
Entosthodon drummondii, 142
Ephebe americana, 96
Ephebe lanata, 96
Ephebe solida, 150

Ephemerum cohaerens, 82
Ephemerum spinulosum, 143
Epidendrum magnoliae, 32
Epilobium ciliatum, 33
Epilobium ciliatum ssp. ciliatum, 33
Epilobium leptophyllum, 112
Eragrostis frankii, 112
Eragrostis lugens, 112
Erigenia bulbosa, 33
Eriocaulon aquaticum, 33
Eriocaulon compressum, 154
Eriocaulon decangulare, 154
Eriocaulon decangulare var. decangulare, 154
Eriocaulon parkeri, 33
Eriocaulon texense, 33
Eriogonum tomentosum, 33
Eriophorum virginicum, 112
Eryngium aquaticum var. ravenelii, 33
Eryngium integrifolium, 154
Eryngium yuccifolium var. synchaetum, 112
Erythrina herbacea, 33
Erythronium americanum, 158
Eucladium verticillatum, 82
Euonymus atropurpureus var. atropurpureus, 113
Eupatorium altissimum, 113
Eupatorium anomalum, 33
Eupatorium godfreyanum, 113
Eupatorium leptophyllum, 33
Eupatorium paludicola, 33
Eupatorium recurvans, 113
Eupatorium resinosum, 34
Eupatorium saltuense, 34
Eupatorium sessilifolium var. brittonianum, 113
Euphorbia bombensis, 34
Euphorbia commutata, 34
Euphorbia cordifolia, 34
Euphorbia mercurialina, 34
Euphorbia purpurea, 34
Eurybia avita, 113
Eurybia mirabilis, 34
Eurybia spectabilis, 34
Eurybia surculosa, 113
Eustachys glauca, 34
Euthamia graminifolia var. nuttallii, 113
Eutrochium maculatum var. maculatum, 113
Fabronia ciliaris var. polycarpa, 143
Fallopia cristata, 114
Fellhanera eriniae, 151
Fellhanera hybrida, 151
Fellhanera montesfumosi, 151, 155
Filipendula rubra, 35
Fimbristylis perpusilla, 35
Fissidens adianthoides, 143
Fissidens appalachensis, 143
Fissidens asplenioides, 82
Fissidens elegans, 143
Fissidens exilis, 143
Fissidens fontanus, 143
Fissidens hallianus, 82
Fissidens hallii, 82
Fissidens polypodioides, 143
Fissidens scalaris, 82
Fleischmannia incarnata, 35
Fontinalis flaccida, 143
Fontinalis sphagnifolia, 83
Fontinalis sullivantii, 144
Fontinalis welchiana, 83
Fothergilla major, 35
Fragaria vesca var. americana, 114
Frangula caroliniana, 114
Frasera caroliniensis, 35
Frullania appalachiana, 91
Frullania donnellii, 91
Frullania oakesiana, 148
Frullania plana, 148
Funaria serrata, 144
Gaillardia aestivalis var. aestivalis, 35
Galactia minor, 114
Galactia mollis, 35
Galax urceolata, 156
Galium asprellum, 114
Galium lanceolatum, 114
Gaultheria hispidula, 162
Gaylussacia bigeloviana, 114
Gaylussacia brachycera, 35
Gaylussacia dumosa, 154
Gaylussacia nana, 35
Gaylussacia orocola, 35, 155
Gelsemium rankinii, 36
Gentiana alba, 36
Gentiana austromontana, 114
Gentiana clausa, 114
Gentiana latidens, 36, 155
Gentianopsis crinita, 36
Geum aleppicum, 36
Geum fragarioides, 114
Geum geniculatum, 36
Geum laciniatum, 36
Geum lobatum, 36
Geum radiatum, 36
Gillenia stipulata, 36
Glandularia canadensis, 115
Glyceria laxa, 37
Glyceria nubigena, 37
Goodyera repens, 115
Graphis sterlingiana, 151, 155
Gratiola aurea, 37
Gratiola ramosa, 37
Grimmia longirostris, 83
Grimmia olneyi, 144
Gyalectidium appendiculatum, 151
Gymnocarpium appalachianum, 37
Gymnoderma lineare, 96
Habenaria repens, 115
Hackelia virginiana, 37
Helanthium tenellum, 37
Helenium brevifolium, 37
Helenium pinnatifidum, 37
Helenium vernale, 37
Helianthus floridanus, 38
Helianthus laevigatus, 38
Helianthus occidentalis ssp. occidentalis, 38
Helianthus schweinitzii, 38
Heliotropium curassavicum var. curassavicum, 38
Helodium paludosum, 144
Helonias bullata, 38
Herpetineuron toccoae, 144
Herzogiella turfacea, 83
Heteranthera dubia, 115
Heteranthera multiflora, 38
Heteranthera reniformis, 115
Heterodermia appalachensis, 96
Heterodermia erecta, 151
Heterodermia pseudospeciosa, 151
Heuchera caroliniana, 115
Heuchera hispida, 38
Heuchera longiflora, 115
Heuchera parviflora, 155

Heuchera parviflora var. parviflora, 115
Heuchera parviflora var. saurensis, 115, 155, 162
Heuchera pubescens, 38
Hexalectris spicata, 38
Hexastylis contracta, 39
Hexastylis lewisii, 116
Hexastylis naniflora, 39
Hexastylis rhombiformis, 39
Hibiscus aculeatus, 39
Homalia trichomanoides, 83
Homaliadelphus sharpii, 83
Hottonia inflata, 39
Houstonia longifolia var. glabra, 116
Houstonia montana, 39
Houstonia purpurea var. calycosa, 116
Hudsonia montana, 39, 155
Hudsonia tomentosa, 39, 43
Humulus lupulus var. lupuloides, 116
Humulus lupulus var. pubescens, 116
Huperzia appressa, 116
Huperzia porophila, 39
Hydrangea cinerea, 116
Hydrastis canadensis, 39, 156
Hydrolea corymbosa, 159
Hydrophyllum canadense, 154
Hydrophyllum macrophyllum, 116
Hydrophyllum virginianum, 154
Hygroamblystegium fluviatile, 144

Enclosure 7. Invasive Plant Species of Virginia

This page intentionally left blank.

Virginia Invasive Plant Species List

Tree-of-heaven

Phragmites

Wavyleaf Grass

The Virginia Invasive Plant Species List comprises species that are established — or may become established — in Virginia, cause economic and ecological harm, and present ongoing management issues.

The list is for educational purposes only and has no regulatory authority.

To be included on the list, there must be demonstrable evidence that a species poses a threat to Virginia's forests, native grasslands, wetlands or waterways.

The Virginia Department of Conservation and Recreation's Invasive Species Assessment Protocol, approved by the Virginia Invasive Species Working Group, May 2015, was used to conduct a risk assessment for each listed species. Species were ranked as exhibiting **high**, **medium** or **low** levels of invasiveness based on their threat to natural communities and native species.

Scientific Name	Common Name	Virginia Invasiveness Rank	REGION		
			Mountain	Piedmont	Coastal
Ailanthus altissima	**Tree-of-heaven**	High	•	•	•
Alliaria petiolata	**Garlic Mustard**	High	•	•	•
Alternanthera philoxeroides	**Alligator-weed**	High			•
Ampelopsis brevipedunculata	**Porcelain-berry**	High		•	•
Carex kobomugi	**Japanese Sand Sedge**	High			•
Celastrus orbiculatus	**Oriental Bittersweet**	High	•	•	•
Centaurea stoebe ssp. micranthos	**Spotted Knapweed**	High	•	•	•
Cirsium arvense	**Canada Thistle**	High	•	•	•
Dioscorea polystachya	**Cinnamon Vine**	High	•	•	•
Elaeagnus umbellata	**Autumn Olive**	High	•	•	•
Euonymus alatus	**Winged Euonymus**	High	•	•	
Ficaria verna	**Lesser Celandine**	High		•	•
Hydrilla verticillata	**Hydrilla**	High	•	•	•
Iris pseudacorus	**Yellow Flag**	High	•	•	•
Lespedeza cuneata	**Chinese Lespedeza**	High	•	•	•
Ligustrum sinense	**Chinese Privet**	High	•	•	•
Lonicera japonica	**Japanese Honeysuckle**	High	•	•	•
Lonicera maackii	**Amur Honeysuckle**	High	•	•	•
Lonicera morrowii	**Morrow's Honeysuckle**	High	•	•	
Lythrum salicaria	**Purple Loosestrife**	High	•	•	•
Microstegium vimineum	**Japanese Stiltgrass**	High	•	•	•
Murdannia keisak	**Marsh Dewflower**	High	•	•	•
Myriophyllum aquaticum	**Parrot Feather**	High	•	•	•
Myriophyllum spicatum	**Eurasian Water-milfoil**	High	•	•	•
Persicaria perfoliata	**Mile-a-minute**	High	•	•	•
Phragmites australis ssp. australis	**Common Reed**	High	•	•	•
Pueraria montana var. lobata	**Kudzu**	High	•	•	•
Reynoutria japonica	**Japanese Knotweed**	High	•	•	•
Rosa multiflora	**Multiflora Rose**	High	•	•	•
Rubus phoenicolasius	**Wineberry**	High	•	•	•
Sorghum halepense	**Johnson Grass**	High	•	•	•
Urtica dioica	**European Stinging Nettle**	High	•	•	•
Acer platanoides	**Norway Maple**	Medium	•	•	•
Agrostis capillaris	**Colonial Bent-grass**	Medium	•	•	•
Akebia quinata	**Five-leaf Akebia**	Medium		•	•
Albizia julibrissin	**Mimosa**	Medium	•	•	•
Arthraxon hispidus var. hispidus	**Joint Head Grass**	Medium	•	•	•
Berberis thunbergii	**Japanese Barberry**	Medium	•	•	•
Cirsium vulgare	**Bull Thistle**	Medium	•	•	•
Dipsacus fullonum	**Wild Teasel**	Medium	•	•	•
Egeria densa	**Brazilian Waterweed**	Medium	•	•	•
Euonymus fortunei	**Winter Creeper**	Medium	•	•	•
Glechoma hederacea	**Gill-over-the-ground**	Medium	•	•	•
Hedera helix	**English Ivy**	Medium		•	•

continued

Invasiveness rank is higher for species that:

- Alter ecosystem processes, such as succession, hydrology or fire regime.
- Are capable of invading undisturbed natural communities.
- Cause substantial impacts on rare or vulnerable species or natural communities or high-quality examples of more common communities.
- Are found widely distributed and generally abundant where present.
- Disperse readily to new areas.
- Are difficult to control.

Early detection species

The list includes a subcategory of invasive plants that are considered early detection species. These are species not yet established or, if established, are not yet widespread in Virginia but known to be highly invasive in habitats similar to those found here. If discovered in Virginia, these species need to be quickly mapped, photographed and reported to DCR. The management goal for early detection species is eradication, as preventing the establishment and spread of newly arrived species will save valuable natural and economic resources.

INFORMATION

For more information, or to report early detection species, contact Stewardship Biologist Kevin Heffernan with the Virginia Department of Conservation and Recreation at 804-786-9112 or kevin.heffernan@dcr.virginia.gov

NC Native Plant Society – Invasive Exotic Plants in NC – 2010

compiled by Misty Franklin Buchanan with review and input from biologists in the following agencies: NC Natural Heritage Program, NC Botanical Garden, University of North Carolina Herbarium, NC Exotic Pest Plant Council, NC DENR Aquatic Weed Control Program, US Fish & Wildlife Service, The Nature Conservancy, and the NC Zoo.

The intent of the NC Native Plant Society Invasive Exotic Plant list is to rank exotic (alien, foreign, introduced, and non-indigenous) plants based on their invasive characteristics, to educate the public and resource managers, and to encourage early detection of invasive exotic species so that a rapid response can be implemented when needed. We hope this list will help eliminate the use of invasive exotic plants in landscaping and restoration projects. The 2004 Tennessee Exotic Pest Plant Council Invasive Exotic Plant list was used as a model for organization of this list, but species listed and ranks assigned here are applicable to North Carolina. The NC Native Plant Society Invasive Exotic Plant List is considered a work in progress, and will be evaluated and updated as new information is gathered about these and other species. Please send your comments to:

North Carolina Native Plant Society
c/o North Carolina Botanical Garden
Totten Center 3375
Chapel Hill, NC 27599-3375

Background: Many introduced plants have become naturalized in North Carolina and some are replacing our native plant species. Not all exotic species are considered harmful. Invasive plants are usually characterized by fast growth rates, high fruit production, rapid vegetative spread and efficient seed dispersal and germination. Not being native to NC, they lack the natural predators and diseases which would naturally control them in their native habitats. The rapid growth and reproduction of invasive plants allows them to overwhelm and displace existing vegetation and, in some cases, form dense one-species stands. Invasive species are especially problematic in areas that have been disturbed by human activities such as road building, residential development, forest clearing, logging, grazing, mining, ditching, mowing, erosion control, and fire control activities.

Invasive exotic plants disrupt the ecology of natural ecosystems, displace native plant and animal species, and degrade our biological resources. Aggressive invaders reduce the amount of light, water, nutrients and space available to native species. Some cause increased erosion along stream banks, shorelines and roadsides. Some exotics hybridize with related native plant species, resulting in changes to a population's genetic makeup; others have been found to harbor plant pathogens, which can affect both native and non-native plants, including ornamentals. Others contain toxins that may be lethal humans and other animals. Some invasive plants compete with and replace rare and endangered species and encroach upon their limited habitat. Other problems include disruption of native plant-pollinator relationships, tree and shrub mortality due to girdling, reduced establishment of native tree and shrub seedlings, reduction in the amount of space, water, sunlight and nutrients that would be available to native species, and altered fire regimes. Invasive plants also cause economic losses and expenditures each year for agriculture, forestry, and roadside management.

Our native fauna, including insects, birds, mammals, reptiles, fish and other animals, is dependent on native plants for food and shelter. While some animals can feed on a wide number of plant species, others are highly specialized and may be restricted to feeding on several or a single plant species. As exotic plants replace our native flora, fewer host plants are available to provide the necessary nutrition for our native wildlife. In some cases, invasive plants replace nutritious native plant foods with lower quality sources. Each exotic plant is one less native host plant for our native insects, vertebrates and other organisms that are dependent upon them.

It is important to document the spread of invasive exotic plants into natural areas. When invaders are found outside of landscape plantings, they should be recorded and voucher specimens should be collected for donation to a herbarium.

To reduce invasive plant invasions, we must approach the problem in a variety of ways: stop planting them, prevent accidental introductions, manage existing infestations, minimize disturbance to forests, wetlands, and other natural communities, and learn to work with (rather than against) natural systems and cycles.

Rank 1 – Severe Threat: Exotic plant species that have invasive characteristics and spread readily into native plant communities, displacing native vegetation.

Scientific Name	Common Name
Ailanthus altissima (Mill.) Swingle	Tree of Heaven
Albizia julibrissin Durz.	Mimosa
Alliaria petiolata (Bieb.) Cavara & Grande	Garlic-mustard
Alternanthera philoxeroides (Mart.) Griseb.	Alligatorweed
Celastrus orbiculatus Thunb.	Asian bittersweet
Elaeagnus angustifolia L.	Russian olive
Elaeagnus umbellata Thunb.	Autumn olive
Hedera helix L.	English ivy
Hydrilla verticillata (L.f.) Royle	Hydrilla
Lespedeza bicolor Turczaninow	Bicolor lespedeza
Lespedeza cuneata (Dum.-Cours.) G. Don	Sericea lespedeza
Ligustrum sinense Lour.	Chinese privet
Lonicera fragrantissima Lindl. & Paxton	Fragrant honeysuckle
Lonicera japonica Thunb.	Japanese honeysuckle
Microstegium vimineum (Trin.) A. Camus	Japanese stilt-grass
Murdannia keisak (Hassk.) Hand.-Mazz.	Asian spiderwort
Myriophyllum aquaticum (Vell.) Verdc.	Parrotfeather
Paulownia tomentosa (Thunb.) Sieb.& Zucc. ex Steud.	Princess tree
Persicaria perfoliata (Linnaeus) H. Gross (=Polygonum perfoliatum L.)	Mile-a-minute vine
Phragmites australis (Cav.) Trin. ssp. australis	Common reed
Pyrus calleryana Decne.	Bradford pear
Reynoutria japonica Houttuyn (Polygonum cuspidatum)	Japanese knotweed
Pueraria montana (Lour.) Merr.	Kudzu
Rosa multiflora Thunb.	Multiflora rose
Salvinia molesta Mitchell	Aquarium water-moss
Vitex rotundifolia L.f.	Beach vitex
Wisteria sinensis (Sims) DC	Chinese wisteria

Rank 2 – Significant Threat: Exotic plant species that display some invasive characteristics, but do not appear to present as great a threat to native communities in NC as the species listed in Rank 1.

Scientific Name	Common Name
Ampelopsis brevipedunculata (Maxim.) Trautv.	Porcelain-berry
Arthraxon hispidus (Thunb.) Makino	Hairy jointgrass
Bambusa spp.	Exotic bamboo
Berberis thunbergii DC	Japanese barberry
Broussonetia papyrifera (L.) L'Her. ex Vent.	Paper mulberry
Cardiospermum halicacabum L.	Balloonvine
Cayratia japonica (Thunb. ex Murray) Gagnep.	Bushkiller
Centaurea biebersteinii DC	Spotted knapweed
Clematis terniflora DC (=C. dioscoreifolia)	Leatherleaf clematis
Conium maculatum L.	Poison hemlock
Coronilla varia L.	Crown vetch
Dioscorea oppositifolia L.	Air-potato
Eichhornia crassipes (Mart.) Solms	Water-hyacinth
Euonymus alata (Thunb.) Sieb.	Burning bush
Euonymus fortunei (Turcz.) Hand. – Mazz.	Winter creeper
Ficaria verna ssp. ficariiformis (F.W. Schultz) B. Walln. (=Ranunculus ficaria)	Lesser Celandine
Glechoma hederacea L.	Gill-over-the-ground, ground ivy
Humulus japonicus Siebold & Zuccarini	Japanese Hops
Lamium purpureum L.	Henbit
Ligustrum japonicum Thunb.	Japanese privet
Ligustrum vulgare L.	Common privet
Lonicera maackii (Rupr.) Maxim.	Amur bush honeysuckle
Lonicera morrowii A. Gray	Morrow's bush honeysuckle
Lonicera standishii Jaques	Standish's Honeysuckle
Lonicera ×bella [morrowii × tatarica]	Hybrid Bush Honeysuckle
Lygodium japonicum (Thunb. ex Murr.) Sw.	Japanese climbing fern
Lythrum salicaria L.	Purple loosestrife
Mahonia beali (Fortune) Carriere	Leatherleaf Mahonia
Miscanthus sinensis Andersson	Chinese silver grass
Morus alba L.	White mulberry
Myriophyllum spicatum Komarov	Eurasian watermilfoil
Nandina domestica Thunb.	Nandina
Persicaria longiseta (de Bruijn) Moldenke (=Polygonum caespitosum Blume)	Oriental ladies-thumb
Persicaria maculosa S.F. Gray (=Polygonum persicaria L.)	Lady's thumb
Phyllostachys spp.	Exotic bamboo
Poncirus trifoliata (L.) Raf.	Hardy-Orange
Pseudosasa japonica (Sieb. & Zucc. ex Steud.) Makino ex Nakai	Arrow bamboo
Rhodotypos scandens (Thunb.)	Makino jetbead
Rubus phoenicolasius Maxim.	Wineberry
Solanum viarum Dunal	Tropical soda apple
Sorghum halepense (L.) Pers.	Johnson grass
Spiraea japonica L.f.	Japanese spiraea
Stellaria media (L.) Vill.	Common chickweed
Veronica hederifolia L.	Ivyleaf speedwell
Vinca major L.	Bigleaf periwinkle
Vinca minor L.	Common periwinkle
Wisteria floribunda (Willd.) DC	Japanese Wisteria
Xanthium strumarium L.	Common cocklebur

Rank 3 – Lesser Threat: Exotic plant species that spread into or around disturbed areas, and are presently considered a low threat to native plant communities in NC.

Scientific Name	Common Name
Ajuga reptans L.	Bugleweed
Allium vineale L.	Field garlic
Artemisia vulgaris L.	Mugwort, common wormwood
Arundo donax L.	Giant reed
Baccharis halimifolia L.*	Silverling, groundsel tree
Bromus catharticus Vahl	Bromegrass, rescue grass
Bromus commutatus Schrad.	Meadow brome
Bromus japonicus Thunb. ex Murray	Japanese bromegrass
Bromus secalinus L.	Rye brome
Bromus tectorum L.	Thatch bromegrass, cheat grass
Buddleia davidii Franch.	Butterfly bush
Chicorium intybus L.	Chicory
Chrysanthemum leucanthemum L.	Ox-eye daisy
Cirsium vulgare (Savi) Ten.	Bull thistle
Daucus carota L.	Wild carrot, Queen Anne's-lace
Dipsacus fullonum L.	Fuller's teasel
Egeria densa Planch.	Brazilian elodea, Brazilian water-weed
Fatoua villosa (Thunb.) Nakai	Hairy crabweed
Festuca pratensis Huds.	Meadow fescue
Ipomoea quamoclit L.	Cypressvine morningglory
Kummerowia stipulacea (Maxim.)	Makino Korean clover
Kummerowia striata (Thunb.) Schindl.	Japanese clover
Liriope muscari (Dcne.) Bailey	Liriope, Lilyturf
Lysimachia nummularia L.	Moneywort, creeping Jenny
Melilotus albus Medik.	White sweet clover
Melilotus officinalis (L.) Lam.	Yellow sweet clover
Najas minor All.	Brittle naiad
Pastinaca sativa L.	Wild parsnip
Perilla frutescens (L.) Britt.	Beefsteakplant
Populus alba L.	White poplar
Senecio vulgaris L.	Ragwort
Setaria faberi R.A.W. Herrm.	Nodding foxtail-grass
Triadica sebifera (L.) Small	Chinese tallowtree
Tussilago farfara L.	Coltsfoot
Vicia sativa L.	Garden vetch

*_Baccharis halimifolia_ is native to marshes and marsh borders on the outer Coastal Plain in NC, but has spread along road corridors to invade disturbed areas in the Piedmont, which is not considered its native habitat.

Watch List A: Exotic plants that naturalize and may become a problem in the future; includes species that are or could become widespread in North Carolina. At this time, more information is needed.

Scientific Name	Common Name
Arum italicum P. Mill.	Italian lords and ladies
Buglossoides arvensis (L.) I.M. Johnston (L.) I.M.	Corn gromwell
Bupleurum rotundifolium L.	Hound's-ear, hare's-ear
Centaurea cyanus L.	Cornflower
Cyperus entrerianus Böckler	Deeprooted sedge
Echium vulgare L.	Viper's bugloss
Elaeagnus pungens Thunb.	Thorny olive
Hibiscus syriacus L.	Rose of Sharon
Hypericum perforatum L.	St. John's-wort
Ornithogalum umbellatum L.	Star of Bethlehem
Solanum dulcamara L.	Climbing nightshade
Verbascum thapsus L.	Common mullein

Watch List B: Exotic plant species that cause problems in adjacent states but have not yet been reported to cause problems in NC.

Scientific Name	Common Name
Acer platanoides L.	Norway maple
Akebia quinata (Houtt.) Dcne.	Fiveleaf akebia
Bromus inermis Leyss.	Smooth bromegrass
Carduus nutans L.	Musk thistle
Carex kobomugi Ohwi	Japanese sedge
Cirsium arvense (L.) Scop.	Canada thistle
Commelina benghalensis L.	Bengal dayflower
Elaeagnus pungens Thunb.	Thorny-olive
Hesperis matronalis L.	Dame's rocket
Imperata cylindrica (Linnaeus) Palisot de Beauvois	Cogongrass
Iris pseudoacorus L.	Pale-yellow iris
Lonicera tatarica L.	Tartarian honeysuckle
Ludwigia grandiflora ssp. grandiflora (Michx) Greuter & Burdet	Creeping waterprimrose
Melia azedarach L.	Chinaberry
Nymphoides cristata (Roxburgh) Kuntze	Crested floating heart
Pistia stratiotes L.	Watter-lettuce
Potamogeton crispus L.	Curly pondweed
Quercus acutissima Carruthers	Sawtooth oak
Rhamnus cathartica L.	European buckthorn
Setaria italica (L.) P. Beauv.	Foxtail-millet
Setaria verticillata (L.) Beauv.	Bur-foxtail
Setaria viridis (L.) P. Beauv.	Green millet
Stachys floridana Shuttlw. ex Benth.	Florida Hedge nettle
Torilis arvensis (Huds.) Link	Spreading hedge-parsley
Tragopogon dubius Scop.	Yellow goat's-beard
Trapa natans L.	Water-chestnut
Tribulus terrestris L.	Puncturevine
Xanthium spinosum L.	Spiny cocklebur

Enclosure 9. IPaC Reports

IPaC **U.S. Fish & Wildlife Service**

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Project information

NAME

NSAHR HQ Complex

LOCATION

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Log in to IPaC.
2. Go to your My Projects list.
3. Click PROJECT HOME for this project.
4. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

NOT FOR CONSULTATION

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

THERE ARE NO ENDANGERED SPECIES EXPECTED TO OCCUR AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act[1] and the Bald and Golden Eagle Protection Act[2].

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described below.

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php
- Measures for avoiding and minimizing impacts to birds http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php
- Nationwide conservation measures for birds http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NOT FOR CONSULTATION

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE

BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

Bald Eagle Haliaeetus leucocephalus This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Oct 15 to Aug 31
Black Skimmer Rynchops niger This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/5234	Breeds May 20 to Sep 15
Bobolink Dolichonyx oryzivorus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 20 to Jul 31
Canada Warbler Cardellina canadensis This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 20 to Aug 10
Clapper Rail Rallus crepitans This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Apr 10 to Oct 31
Dunlin Calidris alpina arcticola This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds elsewhere
Least Tern Sterna antillarum This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Apr 20 to Sep 10
Lesser Yellowlegs Tringa flavipes This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9679	Breeds elsewhere
Nelson's Sparrow Ammodramus nelsoni This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 15 to Sep 5
Prairie Warbler Dendroica discolor This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 1 to Jul 31

NOT FOR CONSULTATION

Prothonotary Warbler Protonotaria citrea — Breeds Apr 1 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Purple Sandpiper Calidris maritima — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Red-headed Woodpecker Melanerpes erythrocephalus — Breeds May 10 to Sep 10
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Red-throated Loon Gavia stellata — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Ruddy Turnstone Arenaria interpres morinella — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Rusty Blackbird Euphagus carolinus — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Semipalmated Sandpiper Calidris pusilla — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Whimbrel Numenius phaeopus — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/9483

Willet Tringa semipalmata — Breeds Apr 20 to Aug 5
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Wood Thrush Hylocichla mustelina — Breeds May 10 to Aug 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper

Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

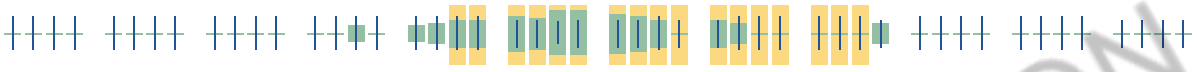
No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

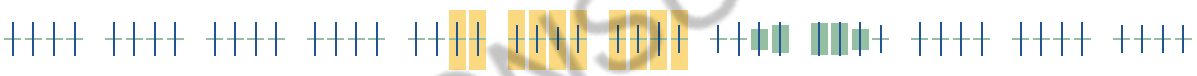
NOT FOR CONSULTATION

Bald Eagle Non-BCC Vulnerable (This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.)

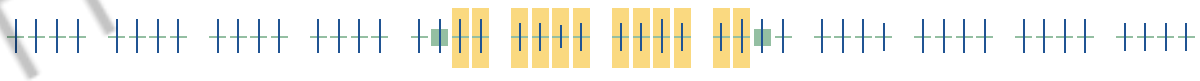
Black Skimmer BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



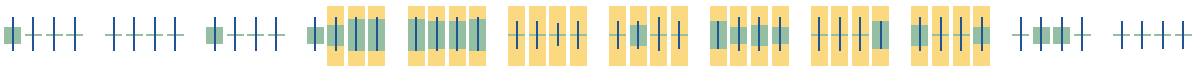
Bobolink BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



Canada Warbler BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



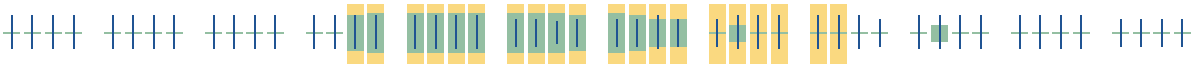
Clapper Rail BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)



NOT FOR CONSULTATION

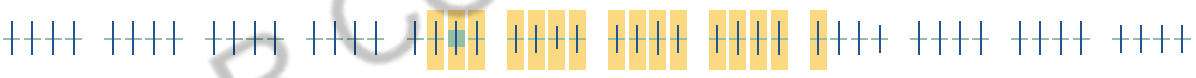
Dunlin
BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)

Least Tern
BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)

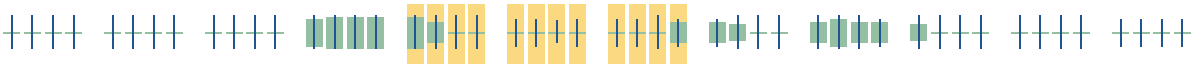


Lesser Yellowlegs
BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Nelson's Sparrow
BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



Prairie Warbler
BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



NOT FOR CONSULTATION

Prothonotary Warbler BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Purple Sandpiper BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

SPECIES JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

Red-headed Woodpecker BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Red-throated Loon BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Ruddy Turnstone BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)

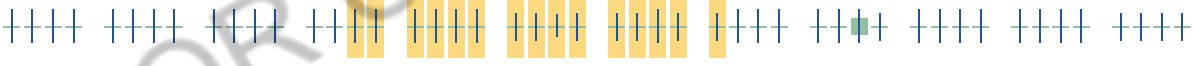
NOT FOR CONSULTATION

Rusty Blackbird BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Semipalmated Sandpiper BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Whimbrel BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Willet BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



Wood Thrush BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

NOT FOR CONSULTATION

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be

breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the AKN Phenology Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

NOT FOR CONSULTATION

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

NOT FOR CONSULTATION

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

WETLAND INFORMATION IS NOT AVAILABLE AT THIS TIME

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the NWI map to view wetlands at this location.

NOT FOR CONSULTATION

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

IPaC **U.S. Fish & Wildlife Service**

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Log in to IPaC.
2. Go to your My Projects list.
3. Click PROJECT HOME for this project.
4. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

NOT FOR CONSULTATION

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

THERE ARE NO ENDANGERED SPECIES EXPECTED TO OCCUR AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act[1] and the Bald and Golden Eagle Protection Act[2].

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described below.

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php
- Measures for avoiding and minimizing impacts to birds http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php
- Nationwide conservation measures for birds http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NOT FOR CONSULTATION

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE

BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

Bald Eagle Haliaeetus leucocephalus — Breeds Oct 15 to Aug 31
This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.
https://ecos.fws.gov/ecp/species/1626

Black Skimmer Rynchops niger — Breeds May 20 to Sep 15
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/5234

Bobolink Dolichonyx oryzivorus — Breeds May 20 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Canada Warbler Cardellina canadensis — Breeds May 20 to Aug 10
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Clapper Rail Rallus crepitans — Breeds Apr 10 to Oct 31
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Dunlin Calidris alpina arcticola — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Least Tern Sterna antillarum — Breeds Apr 20 to Sep 10
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Lesser Yellowlegs Tringa flavipes — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/9679

Nelson's Sparrow Ammodramus nelsoni — Breeds May 15 to Sep 5
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Prairie Warbler Dendroica discolor — Breeds May 1 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

NOT FOR CONSULTATION

Prothonotary Warbler Protonotaria citrea — Breeds Apr 1 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Purple Sandpiper Calidris maritima — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Red-headed Woodpecker Melanerpes erythrocephalus — Breeds May 10 to Sep 10
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Red-throated Loon Gavia stellata — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Ruddy Turnstone Arenaria interpres morinella — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Rusty Blackbird Euphagus carolinus — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Semipalmated Sandpiper Calidris pusilla — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Whimbrel Numenius phaeopus — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/9483

Willet Tringa semipalmata — Breeds Apr 20 to Aug 5
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Wood Thrush Hylocichla mustelina — Breeds May 10 to Aug 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper

Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

NOT FOR CONSULTATION

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be

breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the AKN Phenology Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

NOT FOR CONSULTATION

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

- Measures for avoiding and minimizing impacts to birds http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php
- Nationwide conservation measures for birds http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE.

NOT FOR CONSULTATION

"BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

Bald Eagle Haliaeetus leucocephalus — Breeds Oct 15 to Aug 31
This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.
https://ecos.fws.gov/ecp/species/1626

Least Tern Sterna antillarum — Breeds Apr 20 to Sep 10
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Prairie Warbler Dendroica discolor — Breeds May 1 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Prothonotary Warbler Protonotaria citrea — Breeds Apr 1 to Jul 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Purple Sandpiper Calidris maritima — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Ruddy Turnstone Arenaria interpres morinella — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Rusty Blackbird Euphagus carolinus — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Wood Thrush Hylocichla mustelina — Breeds May 10 to Aug 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (▪)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

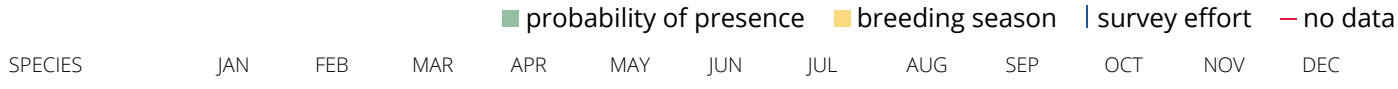
Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

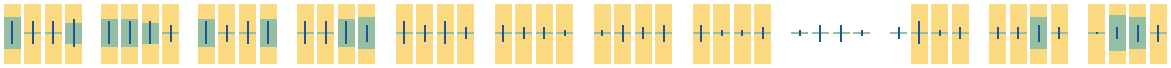
No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

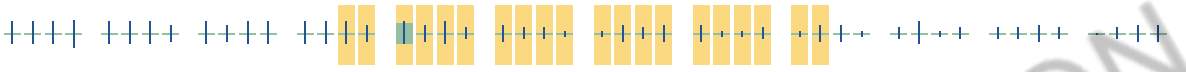
NOT FOR CONSULTATION



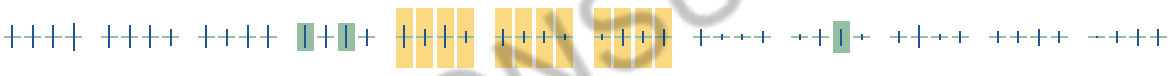
Bald Eagle Non-BCC Vulnerable (This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.)



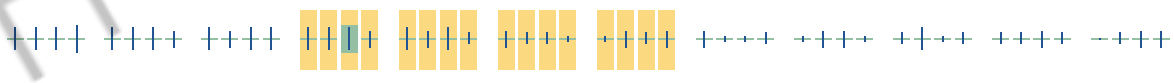
Least Tern BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)



Prairie Warbler BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



Prothonotary Warbler BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



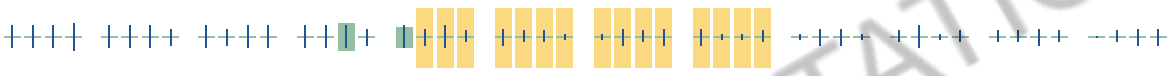
Purple Sandpiper BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

NOT FOR CONSULTATION

Ruddy Turnstone BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)

Rusty Blackbird BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Wood Thrush BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



NOT FOR CONSULTATION

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the AKN Phenology Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

NOT FOR CONSULTATION

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

NOT FOR CONSULTATION

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

WETLAND INFORMATION IS NOT AVAILABLE AT THIS TIME

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the NWI map to view wetlands at this location.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

IPaC **U.S. Fish & Wildlife Service**

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population, even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Log in to IPaC.
2. Go to your My Projects list.
3. Click PROJECT HOME for this project.
4. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

NOT FOR CONSULTATION

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information.
2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME	STATUS

Northern Long-eared Bat Myotis septentrionalis — Threatened
No critical habitat has been designated for this species.

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)
American Kestrel Falco sparverius paulus This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Apr 1 to Aug 31
Prairie Warbler Dendroica discolor This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 1 to Jul 31
Prothonotary Warbler Protonotaria citrea This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Apr 1 to Jul 31
Wood Thrush Hylocichla mustelina This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 10 to Aug 31

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

NOT FOR CONSULTATION

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

NOT FOR CONSULTATION

Marine mammals

Marine mammals are protected under the Marine Mammal Protection Act. Some are also protected under the Endangered Species Act[1] and the Convention on International Trade in Endangered Species of Wild Fauna and Flora[2].

The responsibilities for the protection, conservation, and management of marine mammals are shared by the U.S. Fish and Wildlife Service [responsible for otters, walruses, polar bears, manatees, and dugongs] and NOAA Fisheries[3] [responsible for seals, sea lions, whales, dolphins, and porpoises]. Marine mammals under the responsibility of NOAA Fisheries are **not** shown on this list; for additional information on those species please visit the Marine Mammals page of the NOAA Fisheries website.

The Marine Mammal Protection Act prohibits the take (to harass, hunt, capture, kill, or attempt to harass, hunt, capture or kill) of marine mammals and further coordination may be necessary for project evaluation. Please contact the U.S. Fish and Wildlife Service Field Office shown.

1. The Endangered Species Act (ESA) of 1973.
2. The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is a treaty to ensure that international trade in plants and animals does not threaten their survival in the wild.
3. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following marine mammals under the responsibility of the U.S. Fish and Wildlife Service are potentially affected by activities in this location:

NAME

West Indian Manatee Trichechus manatus
https://ecos.fws.gov/ecp/species/4469

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

This location overlaps the following wetlands:

FRESHWATER EMERGENT WETLAND

Palustrine

RIVERINE

Riverine

A full description for each wetland code can be found at the National Wetlands Inventory website

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

NOT FOR CONSULTATION

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Enclosure 1. Hazards/Safety: Black Bear

This page intentionally left blank.

Hazards/Safety: Black Bear

- Avoid Contact
- Don't get between an adult and their cub (see a cub look for an adult)
- Don't turn your back on the animal
- Don't run, back away slowly
- Make yourself look big (open wide arms)
- Speak in a loud, authoritative voice (not a scared voice)
- If attacked, fight back (most black bear will back down to resistance)

Photo credit: Cynthia L. Cunningham, USGS.

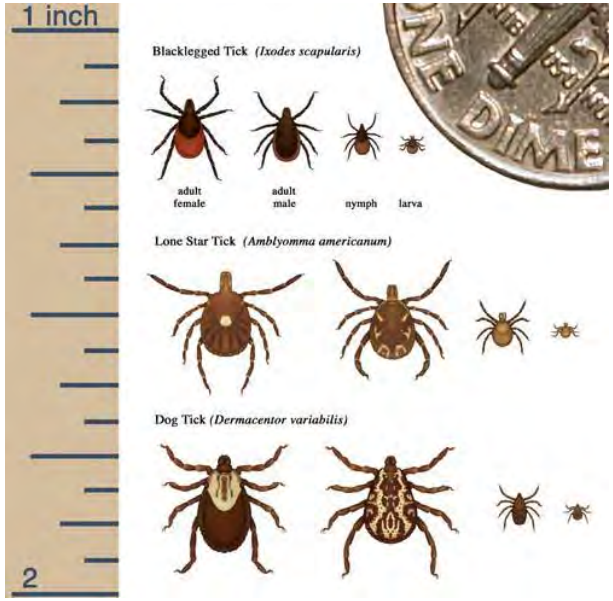
This page intentionally left blank.

Enclosure 2. Hazards/Safety: Diseases

This page intentionally left blank.

Hazards/Safety: Diseases

- Lyme's Disease
- West Nile Virus
- Equine Encephalitis
- Rabies
- Distemper



Protect yourself from mosquito-born illnesses: When working or playing outdoors, utilize Mosquito repellents; Cover as much of your body as possible with clothing; Reduce the amount of standing water that may be supporting breeding populations of mosquitoes.

Protect yourself from tick-born illnesses: When working or playing outdoors, utilize Tick repellents (spray all clothing, including hats); Cover as much of your body as possible with clothing; Tuck your pant legs into your boots and Tuck your shirt into your pants; Utilize duct tape around your pant bottoms and boots, your waist line, and your shirt sleeve arm openings (to seal potential openings for ticks to get to our skin); Wear a hat and tuck your hair into the hat.

Protect yourself from Rabies and other diseases by avoiding contact with wildlife. Admire from afar, do not try to pick up, touch, or come in contact with any animals (wild or domesticated).

Enclosure 3. Cat Control

This page intentionally left blank.

Military bases often struggle with how to manage domestic cat populations. Frequent transfers of personnel often means cats are left behind, abandoned to fend for themselves. Lucky cats find a new human, but most are not so fortunate. Abandoned cats face many dangers: being hit by cars, starving, freezing temperatures, disease, and more. If not spayed or neutered, cat populations can explode.

Free-roaming cats kill native wildlife, including many rare and endangered species, and can also threaten the health and safety of military personnel and their children. Base commanders must deal with how to humanely and cost-effectively resolve the issue of too many free-roaming cats. ***As a cat owner, you are an important part of the solution.***

Photo: Dr. Gil Ewing

Cat killing a Yellow-rumped Warbler at a bird bath.

The Skinny on Cats

Domesticated in Egypt over 4,000 years ago, house cats are descendants of the European and African wild cat. Now considered a separate species, *Felis catus* was introduced all over the rest of the world by European explorers and settlers. Recent estimates place the U.S. pet cat population at 90 million. No one knows how many stray or feral cats are out there—best estimates range from 60 to 100 million.

- ***Stray* cats are lost or abandoned by their owners.**
- **Truly *feral* cats live entirely on their own without any human assistance.**
- **A female cat can have two to three litters per year, with four to eight kittens per litter.**

Photo: Microsoft

Cats kill small animals such as chipmunks.

Keeping Cats Indoors Is Good For People

Stray cats often congregate around a food source such as garbage dumps and mess halls, or where people leave food out for them. They can be a nuisance around base housing, where people may feed birds, tend flower gardens, or have children's sand boxes.

Outdoor cats are exposed to many diseases and parasites, some of which can be transmitted to people:

Rabies, a deadly virus, can infect cats, wildlife, and humans. Outdoor cats are more likely to contract rabies than any other domestic animal.

Cat-scratch Disease: is transmitted from cat to cat by fleas, and from cat to human by a scratch or bite. While cats show no symptoms of the disease, it can cause severe illness in people.

Toxoplasmosis is caused by a tiny parasite found in the intestines of cats and in the tissues of many animals. People can contract this disease by not washing their hands after coming into contact with cat litter or soil contaminated with cat feces. If contracted by a pregnant woman, abortion of the fetus or blindness or retardation in the newborn can result.

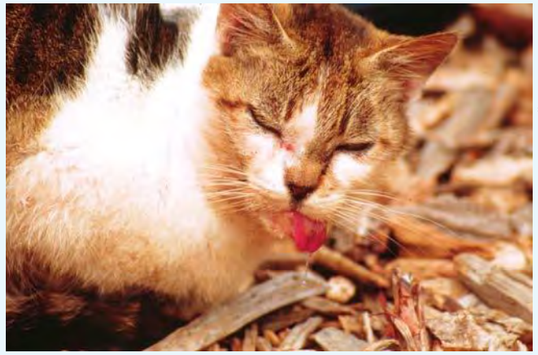


Photo: Alan Hopkins

Cats are not wildlife and struggle to survive outdoors.

Cats can also transmit fleas, roundworm, and hookworm to humans. In the southwest, cases of the most lethal form of plague in humans have been linked to outdoor cats.

Keeping Cats Indoors Is Good For Cats

Many people don't realize the daily hazards that outdoor cats face. The average life expectancy of a free-roaming cat is less than five years, while indoor cats commonly live to 12 - 20 years. Cats who roam are in constant danger from:

Cars: Millions of cats are run over by cars annually. In colder climates, cats may crawl into car engines to get warm and are killed or maimed when the car is started.

Disease: In addition to rabies, outdoor cats risk exposure to fatal diseases such as feline leukemia and feline immunodeficiency virus (FIV). While vaccines are available for some diseases, they are not 100 percent effective. A vaccine for FIV is not available.

Injuries: Abscesses, broken limbs, disease, torn ears, scratched eyes, internal injuries, parasites, and death can result from encounters with dogs, other cats, coyotes, raccoons, foxes, hawks, and owls.

Overpopulation: Cats who have not been spayed or neutered are the greatest cause of cat overpopulation. As a result, millions of cats must be euthanized each year because there are not enough homes for them.

Poisons and Traps: Pesticides, rodenticides, and antifreeze poison and kill thousands of outdoor cats yearly. Cats may be caught in traps set for furbearing animals.

Parasites: Outdoor cats suffer from debilitating parasites such as ear mites, fleas, ticks, and worms.

Human Cruelty: Unfortunately, it is not uncommon for animal shelters and veterinarians to have to treat cats who have been shot, stabbed, or set on fire.

Inclement Weather: Outside cats suffer from extreme weather conditions and natural disasters, such as hurricanes, floods, fires, and tornadoes.

Keeping Cats Indoors Is Good For Birds

Isn't it natural for cats to kill birds?
No! Cats are not native to North America or many other parts of the world. Our wildlife did not evolve with this abundant and efficient predator, and thus have few defenses against them. Millions of animals may be killed each year by outdoor, pet cats in the U.S. Stray and feral cats add to the toll.

The Truth About Cats and Wildlife

- **Even well-fed cats kill wildlife.** This is because cats are born predators and the urges to hunt and eat are controlled by different parts of their brain.
- Belled cats kill wildlife. Cats quickly learn to silently stalk their prey. Wild animals don't necessarily know a ringing bell means danger.

Photo: Michael Stubblefield

Cats kill rare species such as this Piping Plover chick.

- Once caught by a cat, few small animals survive the ordeal. Even if the animal escapes, infection from a cat's teeth or claws, or internal injury usually result in death.

Tips for Happy Indoor Cats

Kittens who are kept indoors from the start usually show no desire to go outside as adults. With patience and time, most outdoor cats can become happy indoor pets. The following tips will help:

Photo: Dr. Jeff Price

An indoor cat is a safe and happy cat.

- Play with your cat for at least 15 minutes each day.
- Paper bags and cardboard boxes provide places to play when they are alone.
- Provide window shelves and bird feeders to keep your indoor cat entertained.
- Give your cat a nutritious diet, including constant access to clean water.
- If your cat must go outside, train him to wear a harness and leash or provide a safe outside enclosure such as a screened porch or cat run.
- Plant kitty grass in indoor pots so your cat can safely graze.
- Keep the litter box clean.

Indoor Cats Can Slip Out, So Remember To:

- Spay or neuter your kitten as early as eight weeks old, *before* it can breed. Your cat will be healthier and won't contribute to the overpopulation problem.
- Attach an ID tag to your pet's collar or get a microchip implanted containing your contact information.
- Provide routine veterinary care, including an annual check up and vaccinations.

Cat ownership is a responsibility, so please do your part.

For the Sake of Cats, Wildlife and People:

- *Never* abandon cats. If you are transferred and can't take your cat with you, find a good home or contact a veterinarian or local humane society for help.
- Do not feed stray cats—this only increases the cat overpopulation problem. Take them to a local shelter or call your base animal control officer for help.

For more information: contact your base veterinarian, local humane society, or **www.denix.osd.mil/DoDPIF.**

Indoor Cats Are Safe Cats

Enclosure 4. CNRMA Environmental Management System

This page intentionally left blank.

CNRMA
Environmental Policy Statement

CNRMA's Environmental Policy Statement is the foundation of the EMS and reflects CNRMA's commitment to integrate mission accomplishment with environmental stewardship.

CNRMA's policy is communicated through the acronym, **"CARE"**, which summarizes the key concepts:

- **C – Comply with all rules**
- **A – Always improve**
- **R – Reduce waste**
- **E – Eliminate pollution**

Visit our website to see entire policy

CNRMA EMS facilities include:

- NAVSTA Norfolk
- NSA Norfolk
- NAS Oceana
- NAVPHIBASE Little Creek
- WPNSTA Yorktown
- NAVSUBASE New London
- NAVSTA Newport
- NAS Brunswick
- NAES Lakehurst
- NWS Earle
- NCTAMS LANT DET Cutler
- NAS JRB Willow Grove
- NSA Mechanicsburg
- NSA Philadelphia
- Philadelphia Naval Business Center
- NSGA Sugar Grove

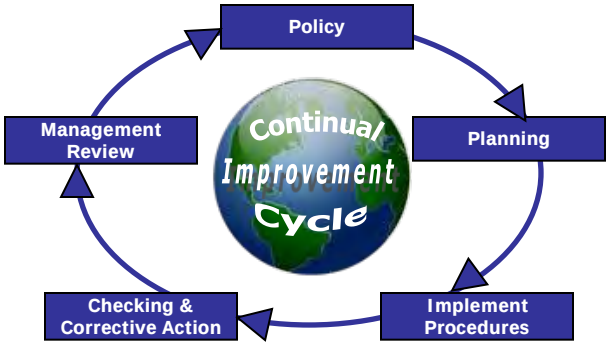
To learn more about CNRMA's EMS, please visit our Website: www.cnrma.navy.mil/environmental/Environmental_management_system.htm

Commander Navy Region Mid-Atlantic (CNRMA)

E nvironmental
M anagement
S ystem

www.cnrma.navy.mil/environmental/environmental_management_system.htm

CNRMA
Environmental Management System (EMS)



The EMS Cycle of Continuous Improvement

What is EMS?

EMS is a set of management processes and procedures that allows an organization to:

- analyze, control and reduce it's impact on the environment
- operate with greater efficiency and control

The EMS management tool is used to plan, implement, review, and improve the actions CNRMA takes to meet environmental goals. The CNRMA EMS must be:

- Mission focused
- Integrated into existing business processes
- Flexible in order to optimize mission performance while minimizing negative environmental impacts

The EMS is based on the International Organization for Standardization (ISO) 14001 Standard

CNRMA's EMS Goals include:

Reduce energy and water use

Increase purchase of alternative fuel vehicles, hybrid, and plug-in hybrid vehicles

Reduce greenhouse gas emissions

Reduce use of petroleum in fleet vehicles

Increase use of alternative fuels and renewable energy

Integrate green building concepts in major renovations and new construction

Expand purchase of green products and services; increase recycling

Procure, use, and dispose of electronic equipment in an environmentally-sound manner

Reduce purchase and use of toxic and hazardous materials

What is your role?

All personnel working for or on behalf of CNRMA have roles and responsibilities regarding CNRMA's EMS. Following are some examples:

- Know CNRMA's environmental policy, or the "CARE" acronym
- Know and comply with the environmental procedures that apply to your job
- Know how your job could impact the environment (i.e. potential spills, emission of air pollutants, material and energy use
- Know what your installation's significant environmental aspects are
- Incorporate concepts of conservation and pollution prevention in your day-to-day activities
- Know what to do in the event of a spill or environmental emergency:
  - * Contain the spill if safe to do so
  - * Notify your supervisor
  - * Call Emergency Communications Center

Think about activities you do everyday that may impact the environment:

- Do you recycle?
- Do you buy "green" office supplies?
- Do you print double-sided copies?
- Do you conserve energy and water?
- Do you comply with all environmental laws applicable to your job?

Enclosure 5. NAS Oceana, NASO Dam Neck Annex, NALF Fentress, and NSA Northwest Hunting, Fishing, and Archery Range

This page intentionally left blank.

Fishing: Questions & Answers

Q: What permits are needed to fish and where can they be purchased?

A: Authorized patrons and guests between the ages 16 and 65 must obtain as appropriate, Virginia (state or county) freshwater fishing licenses and Base fishing permits. Virginia Saltwater fishing licenses are required for anyone attempting saltwater fishing except when fishing from MWR piers that maintain pier licenses. Dependents and guests under the age of 12 must be directly supervised by an adult, 18 years of age or older, who holds a valid fishing licenses and station permits. Permits are sold at the NAS Oceana and NASO Dam Neck Annex MWR ITT offices and they are currently valid, in authorized locations only, at: NAS Oceana, NASO Dam Neck Annex, NSA Northwest Annex, JEB Little Creek, and JEBLC Fort Story. Permits are currently $8.00 for a full calendar year, but the cost is subject to change.

Q: When can I Fish?

A. Fishing is only authorized during state sanctioned seasons. Fishing is from sunrise to sunset (dawn to dusk), unless otherwise stipulated in the Base Fishing Instruction.

Q: With what can I Fish?

A. Fishing shall be conducted only by angling with a hook and line or rod and reel, held in hand. No more than two treble hooks are permitted on any fishing lure. In catch-and-release waters, barbed hooks are discouraged and treble hooks are prohibited. A hand-held landing net may also be used to remove legally hooked fish. No live bait fish are authorized.

Q: Where can I get more specific information regarding fishing on base?

A. Visit the Natural Resources Website and view the CNRMA Fishing Instruction. The general content of the instruction is still good, but there have been updates to fishing area locations, and ticket purchasing locations. Contact the NRC for the most current information.

Q: Can I use a boat?

A. Only at those locations authorized in the Fishing instruction. The boat and trailer should be cleaned, thoroughly flushing water through the motor's cooling system, live wells, and other areas that hold water and drying the boat and equipment for five days in a sunny location before transferring it to a new body of water.

Additional Information

WARNINGs:
No off-road or 4-wheel driving is authorized.

Be aware there are venomous snakes and poisonous plants on the premises.

It is unlawful and strictly PROHIBITED to harm, disturb, or collect plants and animals.

The release of fish of or other aquatic wildlife not caught on the premises is PROHIBITED.

The release of any animals or the planting of any plants without the written approval of the Base's Natural Resources Manager is PROHIBITED.

It is recommended that individuals recreating on site use insect repellent.

It is required to provide, when requested, appropriate identification, permits and passes to Base Security and Conservation Law Enforcement Officers.

Please enjoy yourself while recreating on base and help us maintain it by packing out your trash and placing your litter in appropriate receptacles.

Public Access

Hunting, Fishing & Archery range utilization is open to anyone with Base Access privileges. Members of the General Public that would like to recreate on base must have a qualified sponsor. Sponsors can be active or retired military or government civilians with current base access identification. Contact the Natural Resource Center (NRC) at 757-433-2151 or stop by the NRC, Building 78, to ensure you have all appropriate access documentation.

You may also visit the Natural Resources Website at:
http://www.cnic.navy.mil/Oceana/About/Departments/NaturalResources/index.htm

In case of an emergency call 911 or 757-433-9111.

Hunting, Fishing & Archery Range

NAS Oceana,
NASO Dam Neck Annex,
NALF Fentress &
NSA Northwest Annex

Hunting: Questions & Answers

Q: What do I need to do to hunt on the local bases?

A: (1) You must be Active Duty, dependent or retired. DoD Civilians are allowed and Non-DoD affiliated civilians are allowed with a qualified sponsor.

(2) You need a Hunter Safety Course Certificate valid in the state of Virginia.

(3) You need to attend the annual Basic Hunter Indoctrination (Indoc.) conducted by Navy Natural Resources Staff.

Note: The above will allow you to deer hunt with shotgun, buckshot only, at NASO Dam Neck Annex, NALF Fentress, and NSA Northwest Annex. The fee for the annual license as of 2010 is $20.00 (subject to change). This license is in addition to the required Virginia State Hunting Licenses.

(4) To hunt via Shotgun with Slugs, Muzzleloader, or Archery:

Shotgun Slugs?

You must qualify with your shotgun by shooting 3 out of 3 slugs within a 9" circle @ 50 yards. You will be allowed to shoot from a seated rest.
Note: Slugs are only allowed for use at NSA Northwest Annex.

Muzzleloader?

You must qualify with your muzzleloader by shooting 3 out of 3 slugs within a 9" circle @ 50 yards. You will be allowed to shoot from a seated rest. Flintock, Percussion Cap and In-Lines are allowed on NAS Oceana, NASO Dam Neck Annex, NALF Fentress, and NSA Northwest Annex only in designated hunting areas.

Archery?

You must have graduated from the International Bowhunter Education Program (IBEP) which is taught at the Natural Resources Center (NRC) Building #78 on NAS Oceana. Schedules will be posted by July 1st each year. You must qualify by shooting two arrows from an elevated platform into the kill zone of each of three 3D deer targets placed at varying ranges. The ranges will vary from directly beneath the platform out to 30 yards maximum. Your archery tackle will be inspected prior to any qualification attempt and can be grounds for rejection if determined to be unsafe. The qualification will be with Broadheads attached unless you will be hunting with Mechanical Broadheads; you will be allowed to shoot field points in this instance.

Q: Where do I purchase a permit?

A: You must have both the appropriate State Hunting Permit(s) and a Base Hunting Permit. Contact the appropriate state Wildlife Agency for information on purchasing their permits. Base Hunting Permit can be purchased from the NAS Oceana or NASO Dam Neck Annex MWR ITT ticket offices.

Q: Where and when are qualifications?

A: A schedule of qualifications will be posted at the NRC/NAS Oceana Bldg. 78, made available at the Basic Indoctrination Classes, and will be posted on the Natural Resources Program Website. Muzzleloader and shotgun qualifications will be conducted at the NASO Dam Neck Annex rifle range. Bow qualifications will be conducted at the NRC/Bldg. #78. All qualifications must be observed by designated NRC representatives on scheduled days to be valid.

Q: Where can I hunt on base?

A: The NAS Oceana Natural Resources Center controls and manages all hunting aboard NAS Oceana, NASO Dam Neck Annex, NALF Fentress, and NSA Norfolk Northwest Annex. Areas are designated at each base for Archery, Shotgun, and Muzzleloader as applicable. NAS Oceana allows Archery and Muzzleloader ONLY. NASO Dam Neck Annex and NALF Fentress allow Archery, Shotgun (Buckshot Only) and Muzzleloader. NSA Northwest Annex allows Archery, Shotgun (Buckshot and Slugs) and Muzzleloader. Maps of the exact hunting area are located on the Natural Resources website or can be obtained at the Natural Resources Center, Oceana building 78.

Q: Can I hunt anything else besides deer?

A: Yes. Small game hunting is authorized. Contact the NRC for more details.

Q: When can I deer hunt?

A: Within the State Hunting season dates, generally from Oct 1st through the 1st Saturday in January. NAS Oceana has an extended hunting season through the end of February. Operational Security and Threat Conditions will dictate closures but normally NAS Oceana, NASO Dam Neck Annex and NALF Fentress are open 6 days a week, closed only on Sundays. NSA Northwest is only open on Tuesdays, Thursdays, and Saturdays.

Q: Can I deer hunt from the ground?

A: Ground hunting or stalking is only allowed by Archers (except crossbow archers). No ground hunting is allowed on any base by Shotgun, Muzzleloader or Crossbow hunters.

Q: Do I need a tree stand?

A: Tree stands are required of all Shotgun, Muzzleloader and Crossbow hunters. These stands must be elevated at a shooting height of 15 feet. Climbers and clip-ons are allowed with minimal tree limb removal permitted. NAS Oceana, NASO Dam Neck Annex, and NALF Fentress have no permanent tree stands available. Any permanent tree stands found on these bases are not maintained and are unauthorized for use. NSA Northwest Annex has permanent tree stands available for use. Much work has gone into the stands at NSA Northwest Annex but they are still only available for use at your own risk and judgment. You can use your own tree stand at these locations but you must use it in the vicinity of the stand you have checked out.

Q: Where do I find the Base's Annual Hunting Rules & Regulations?

A: On the Oceana Natural Resources website. For questions regarding the R&Rs visit the Natural Resources Center, Oceana building 78, or call the NRC at 757-433-2151.

Archery Range: Questions & Answers

Q: Where is the Archery Range?

A: The range is located off of Oceana Blvd., across from the Oceana Stables, at/adjacent to the Natural Resources Center, NASO building 78.

Q: What do I need to do to use the archery range on NAS Oceana?

A. Obtain a permit from the Oceana MWR ITT ticket office and visit the NRC to fill out the appropriate paperwork and obtain required signatures and stamps. Contact the NRC if you have additional questions.

Q: Can I use the range if I purchased a base hunting permit?

A: Yes, the hunting permit and the archery range permit are all on 1 single permit. If you qualify to be a hunter you can use the archery range for the permitted calendar year. If you do not qualify to be a hunter or you do not want to hunt but just use the archery range you may get your permit stamped for archery range use only. You are not authorized to use this range until you have obtained the range or appropriate hunting stamps, signatures and card lamination. (To get your permit stamped for archery range use only visit the NRC, Oceana Building 78.)

Enclosure 6. Venomous Snakes of Naval Facilities in Southeastern Virginia

This page intentionally left blank.

Characteristics of Venomous Snakes

- Vertical pupil (Figure 7)
- Pit organ: The pit organ is located on each side of the head between the eye and nostril (Figure 7) It detects heat from small mammals and other prey
- The scales under the tail form only a single row (Figure 8)
- The head is distinctly wider than the neck giving the snake a triangular shaped head

Non-venomous **Venomous**

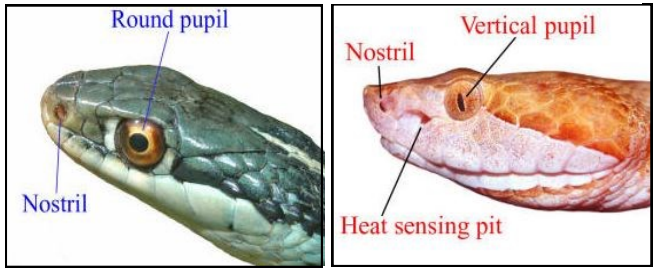


Figure 7. Facial characteristics of non-venomous and venomous snakes of southeastern Virginia.

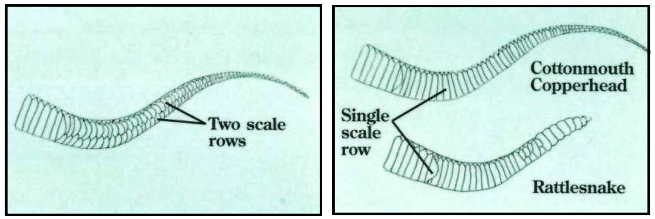

Figure 8. Undersides of tails of a non-venomous and venomous snakes of southeastern Virginia.

If You Encounter a Snake

Leave the snake alone and move away. Approximately half of all bites occur when individuals were attempting to capture, harass, or kill the snake.

Snake Safety Tips

- Snakes prey on small animals including mice, rats, lizards, and frogs. Removing habitat for these animals (eliminating brush piles, wood piles, sources of food, etc.) will help reduce unwelcome encounters with snakes.
- Be careful working around brush piles or other debris. Use a rake or long handled tool to move brush, debris, or other materials before picking it up.
- Wear snake chaps or tall leather boots when walking in thick vegetation.
- Seek medical attention immediately if you are bitten by any venomous or unknown snake. Do not attempt to draw out the venom. If possible, collect the snake or provide a description of the animal to medical staff.

Venomous Snakes of Southeastern Virginia

Timber Rattlesnake

Copperhead

Cottonmouth

Timber Rattlesnake
(*Crotalus horridus*)

Figure 1. Timber Rattlesnake

Figure 2. Rattle of Timber Rattlesnake. Shape of rattle and number of segments.

Description

- Black chevron-shaped markings on a dark yellow, gray or tan background color
- Orange or rust-brown stripe down the middle of the back
- Black tail with distinctive rattle
- Newborns look like adults, but rattle consists of only one segment

Size

Average length: 54 inches
Maximum length in Virginia: 67 inches

Remarks

This snake was listed as State Endangered in 1992, primarily due to habitat loss. These snakes are present at NALF Fentress and NSAHR Northwest Annex.

Copperhead
(*Agkistrodon contortrix*)

Figures 3 and 4. Copperhead

Description

- Chestnut to brown hourglass-shaped bands on a lighter brown to tan background color
- Hourglass markings on the sides may not always match up along the back
- Newborns and young have a bright yellow tail

Size

Average length: 45.3 inches
Maximum length in Virginia: 48 inches

Remarks

This secretive snake occupies forested habitats. It is present at JEB Little Creek-Fort Story (Fort Story only), NALF Fentress, NAS Oceana, NSAHR Northwest Annex, NWS Yorktown, and Cheatham Annex.

Cottonmouth
(*Agkistrodon piscivorus*)

Figures 5 and 6. Cottonmouth

Description

- Black, olive or brown bands on a lighter olive to gray background
- Some individuals may appear to be all black in color, especially when out of the water
- Newborns and young have a bright yellow tail

Size

Average length: 51.8 inches
Maximum length in Virginia: 61 inches

Remarks

Habitats used by this snake include: streams, lakes, rivers and ditches. It is present on JEB Little Creek-Fort Story (Fort Story only), NALF Fentress, NAS Oceana, and Dam Neck Annex.

Enclosure 7. Compliance: Wildlife

This page intentionally left blank.

Compliance: Wildlife

- Threatened & Endangered Species
- Marine Resources
- Migratory Birds
- Bald Eagles
- Code of Virginia
- Code of North Carolina

Bald Eagle, *delisted but still protected*

Small Whorled Pogonia

Loggerhead Sea-Turtle

Canebrake Rattlesnake

Endangered Species Act (ESA); Marine Mammal Protection Act (MMPA); Bald & Golden Eagle Protection Act; Code of Virginia; Migratory Bird Treaty Act (MBTA)...etc. (there are many laws which protect wildlife, several of which cross international/country borders)

Yes, even the dead remains of a protected species are protected and you are subject to federal or state penalties if found to be in violation of the law (possession without permit is a violation).

Assume all bird species are protected (since there are very few species that are not protected).

Enclosure 8. A Visitor's Guide to the Great Dismal Swamp Boardwalk Project

This page intentionally left blank.

Visitors wishing access to the boardwalk should contact:

Dr. Maurice Powers
ECSU Box 858
Elizabeth City, NC 27909
(919) 335-3375 or
(919) 336-4577

Guided tours are available at no charge

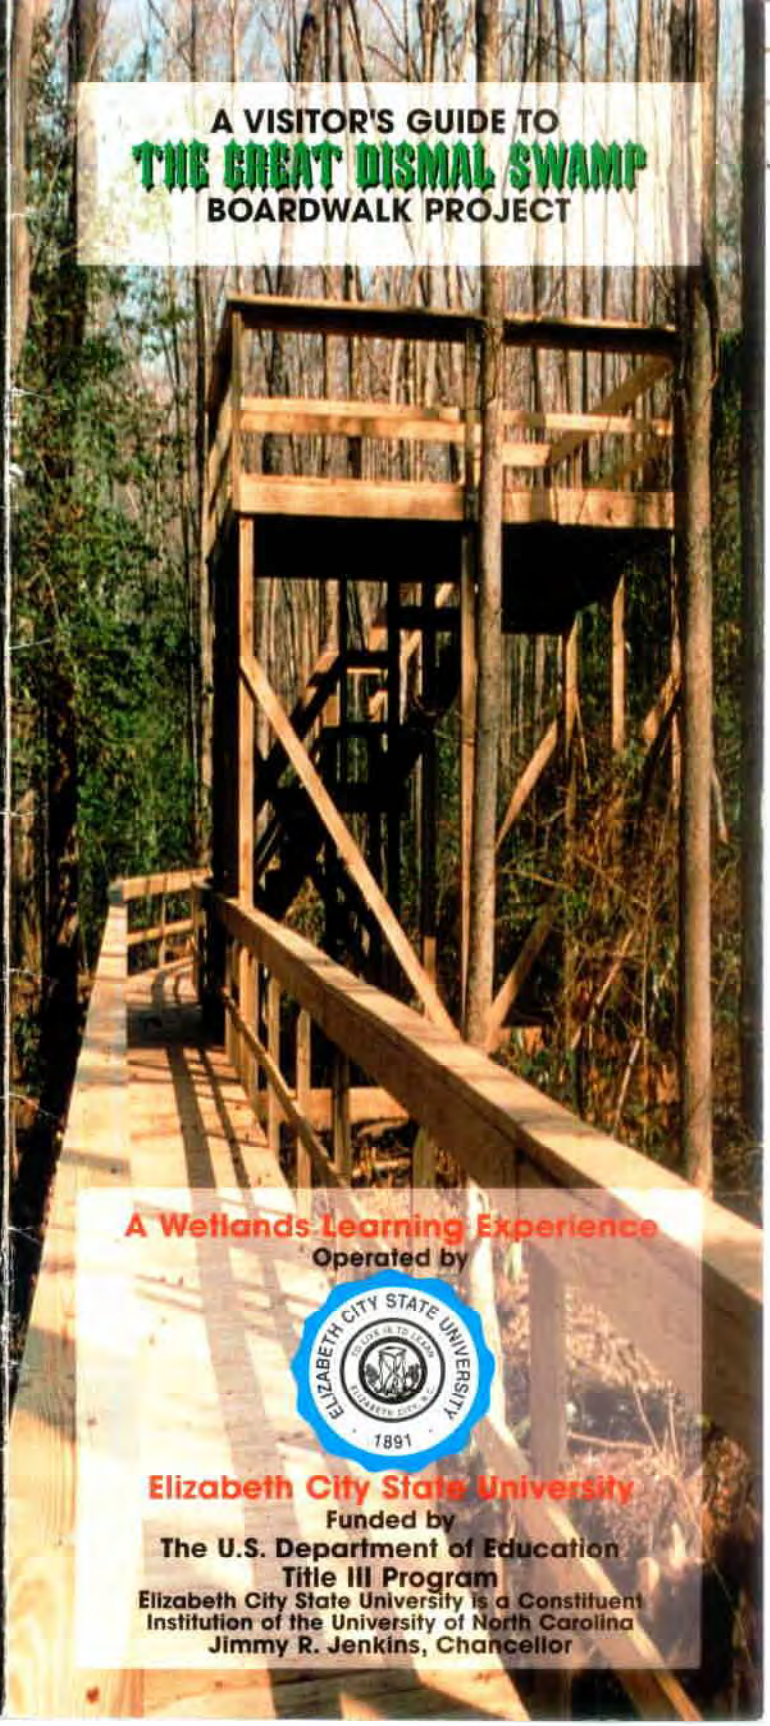
A VISITOR'S GUIDE TO THE GREAT DISMAL SWAMP BOARDWALK PROJECT



A Wetlands Learning Experience

Operated by

Elizabeth City State University

Funded by
The U.S. Department of Education
Title III Program

Elizabeth City State University is a Constituent Institution of the University of North Carolina
Jimmy R. Jenkins, Chancellor

A SELF-GUIDING BOARDWALK TOUR OF A WETLANDS ENVIRONMENT

Development and Purpose

The Dismal Swamp Boardwalk Project was completed and dedicated by Elizabeth City State University in the spring of 1994. The wetlands property, consisting of 639 acres, was acquired by the University from the Department of Health, Education and Welfare. The half-mile long boardwalk and observation tower were constructed with Title III funds, and its primary function is to provide access to a wetlands wilderness area for use in research and educational activities.

How Old is the Dismal Swamp?

Evidence from geology and fossil plants indicate that the Dismal Swamp began forming at the close of the Pleistocene Ice Age around 12,000 years ago. The last great ice advance of the Pleistocene was coming to an end, and the climate slowly began to warm. As the glacial ice melted, sea level which had dropped about 300-feet below present levels, was raised rapidly for the first several thousand years. As sea level rose, so did the water table and wetlands formed along flooded stream valleys, gradually extending inland to the present western margin of the swamp. Sea level reached its present elevation about 3,000 years ago, and by that time peat was developing throughout the entire wetlands area. Trees making up the forests gradually changed, as the climate warmed, from northern species, including jack pines and spruces, to the present day cypress-gum associations. The forest groups of today have been fairly stable for the past 3,500 years.

Post 166 Face the end of the boardwalk and look 45 degrees to your right, and a distance of about 75 feet for a large pine tree - Pond Pine or Swamp Pine (Pinus serotina)

Swamp pines grow to 80 feet with trunks 2 feet in diameter. This excellent example has tangled, crooked branches which are typical of the tree. It grows well in wetlands, even in peat-laden soils. It is not commercially valuable, but its seeds provide food for rodents and birds. Its cones are smaller and more globe-shaped than loblolly or pitch pines, and spines on the cones are tiny.

Post 121-122 Area to the right
Peat underlies this area to a depth of several feet. The rotting logs, twigs, leaves, and a variety of plants still add to the peat. For the past 6,000 years, peat has been forming over most of the Dismal Swamp. Peat is the first step in the development of coal. If about 10 feet of peat became deeply buried, compacted, and heated by geothermal heat in the earth, it would probably yield about 1 foot of coal.

Post 148.4 2FT.R - Tulip Tree. Yellow Polar. Tulip Poplar (Liriodendron tulipifera)
Although this tree is often referred to as a poplar, actually it has very little relation to poplars and it is a relative of magnolias. Tulip trees grow in good soil to as much as 150 feet plus, and many have trunk diameters of 5 feet or more. The leaves are large and have a unique notched tip. The wood of the long straight trunks is easily worked and finds many uses such as veneer for furniture, furniture frames, boats, toys, etc. Look for other larger examples of this tree as you move along the boardwalk.

Post 153.3 IFT.R - Carolina Jessamine, Yellow Jasmine (Gelsemium sempervinens)
The flowers of this beautiful yellow trumpet vine have a nice fragrance, but all parts of it are poisonous. It is even toxic to bees! Strychnine has been commerically extracted from these plants.

Post 164 2FT.R - Carpet Moss
There are several varieties of moss in the Dismal Swamp. The moss sometimes covers logs and old stumps, and helps in the decay process. Each log seen lying in the swamp in various stages of decay has its own mini-environment of plants and animals which benefit from the log in one way or another.

Post 165.2 0.5FT.L - Greenbriar
The common greenbriar is a tough climbing vine with sharp prickles. It sometimes grows in thick clusters which are very difficult to penetrate.

What are Wetlands?

Wetlands come in all sizes and shapes. They may be found in prairies, at high elevations in mountainous areas, in hill country, and especially in deltas and coastal lowlands. The area of immediate concern is a parcel of The Great Dismal Swamp, a coastal plain fresh water wetlands in northern Currituck County. It is difficult to define wetlands because there is so much variety. However, they are all generally low compared to the surrounding area. They are often waterlogged or covered by shallow water for all or part of a year, and they support plant and animal communities which have adapted to water budgets with marked seasonal variations.

Why are Wetlands so Important?

The extremely important coastal fishing and shellfishing economy of North Carolina demands clean healthy estuaries, and it is the bordering wetlands which determine the condition of estuarine waters. Wetlands perform as natural filters which clean the nutrients and sediments from waters that drain into the estuaries. They also provide for pollution retention, flood control, habitats for wildlife, ground water recharge, and aquatic life production.

Increased nutrient levels from agricultural runoff, construction of canals, and lumbering operations have combined to deteriorate the effective role that wetlands play in providing clean water runoff at controlled rates for the estuaries and primary nurseries along their fringes. Without these controls the nurseries will cease to function, and most of the animal life in the coastal waters of North Carolina will disappear: no wetlands, no seafood. According to information from the U.S. Fish and Wildlife Service and others, about 50 percent of the nation's swamps and marshes (wetlands) have been effectively destroyed just during the last 40 years.

Things to Look For.

The careful observer may see evidence of a variety of mammals that inhabit the swamp. White-tailed deer, black bear, grey squirrel, bats, otter, mink, raccoon, grey and red foxes, and bobcat have been observed and hunted or trapped in the swamp.

Wetland habitats provide the ideal environment for a diversity of amphibians and reptiles. Lizards, salamanders, frogs, toads, and turtles share the swamp habitat with 21 varieties of snakes. The poisonous snakes are the copperhead,canebrake rattler, and cottonmouth.

The ideal time for observing the greatest variety of birds in the swamp is during the spring migration--from April through June. More than 200 species of birds have been identified in the Dismal Swamp.

Wetlands may be second only to the great rain forests in life diversity and the impact they have on world ecosystems. Yet, they are indeed fragile and need our serious consideration if they are to survive.

DISMAL SWAMP BOARDWALK

Points of Interest

Alternating posts along the boardwalk are numbered. Numbers in the brochure correspond to numbers on the hand rail. All arrows are on the right hand rail, but point either to the right or left indicating the location of the tree or plant being identified. For example, the first entry would be 1.4 the distance between post number 1 and post number 2; 1 foot from the boardwalk toward the right. Enjoy your walk.

Post 1.4 1FT.R Poison Ivy growing on Sweet Gum tree.
You know the old saying, "Leaflets three, leave it be." Watch for this plant as you continue your walk. The blue sign is high because when it was lower a bear tore it off the tree and chewed on it.

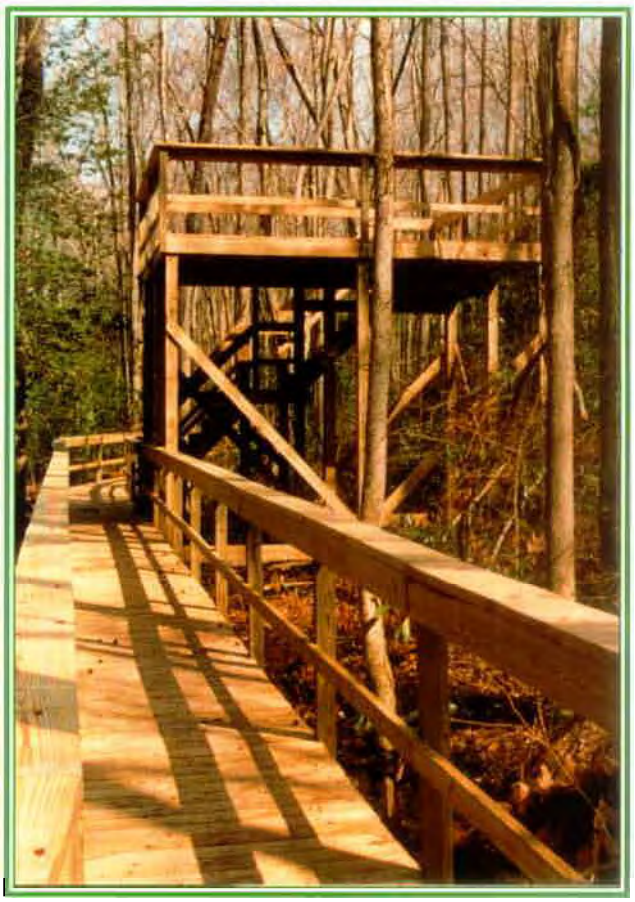
Post 2.4 20FT.R on Ditch Bank - Willow Oak (Quercus phellos)
The Willow Oak is not related at all to the willow tree. It is a large imposing oak which grows to 90 feet tall with a trunk diameter of almost 4 feet. It has willow-shaped leaves, hence its name. In winter, its large size and dark color may visually dominate the area around it. A large willow oak can produce two bushels of acorns in a season, and this provides excellent food for squirrels, deer, turkeys, quail, and other animals. Wood from this tree is heavy and hard. It is sold as "red oak" and used for stairs, furniture, and interior finishes. It is planted by many people as a shade or ornamental tree. Notice the scar on the tree where a huge limb broke off during a storm and crashed through the board walk. The fallen limb was almost immediately claimed for fire wood!

Post 50.0 6FT.R - Muscadine Grape
Several varieties of grapes grow wild, and they are sought after by man and many other animals. The vines may grow well up into tall trees, and they very well may outlive the tree.

Post 53.8 7FT.R
Woodpeckers may unknowingly damage trees in their relentless search for insects and worms. The large number of holes in this tree would suggest that the woodpeckers hit the jackpot.

Post 59 6FT.R - Shelf Mushroom (Polyporous sulphureus)
These mushrooms are a showy growth of fungus. The shelf mushroom changes color from yellow to nearly white as it matures.

Post 67 Tower
The tower offers the opportunity to selectively see the canopy trees, second story growth and shrubs and vines. A pair of binoculars makes it possible to seek out birds and other animals.



Post 42.0 6FT.L - Wild Blueberry
The wild blueberry is best known for its sweet juicy fruit, which is used in pies, puddings, ice cream, cereal, and muffins. Bears truly love blueberries and so do a variety of other mammals and birds. In early spring the flowers are beautiful dainty little creamy white bells that hang downward in clusters from the bush.

Post 42.7 0.5FT.L - Sweet Bay (Magnolia virginiana)
This lowland medium size tree is wellknown for its sweet smelling creamy white flowers, as well as for its aromatic leaves which are used in cooking soups, stews, and roasts. The wood is pale brown and used for making furniture and other wood products. It grows well in sandy acid soils and in wetlands. The tree produces bright red seeds which are eaten by a variety of animals.

Post 43.5 7FT.R - Burl on Water Oak
The large burl on this tree is actually a tumor, referred to as a gall tumor. It is the result of bacterial infection which initiates rapid cellular growth.

Post 47.3 1.5FT.R-Atlantic White Cedar (Chamaicyparis thyoides)
The lumber from this tree is soft, durable, and very light. It is so valuable that the tree has been cut to the danger point. It is used in construction, boat building, and as shingles. The wood is aromatic and also has good resonance. Hence it was used to make organ pipes. Extracts and tinctures from the tree are used in medicines. It may grow to 80 feet and has a diameter of 2 feet. It is a good wetlands indicator.

Post 8.5 3FT.R - Loblolly Pine (Pinus taeda)
This imposing pine grows to 140 feet tall and may have a trunk over 3 feet in diameter. It thrives well from sea level to over 2,000 feet, and it is common in all of the mid-atlantic and southern coastal states. The loblolly grows and develops a long trunk with a high crown. This feature makes the tree valuable for lumber and pulp. Tree ring counting on fallen pines in this area indicates that the large pines are in excess of 80 years old. The loblolly is very important to wildlife. The seeds are consumed by a variety of mammals and birds. Squirrels eat the green fruit as well as the matured seeds.

Post 11.0 3FT.L - Bamboo Reeds and Bald Cypress Knees
Reeds grow well in drained low areas, and the leaves are good browsing for deer. The cypress knees are said to provide oxygen for the tree roots: this feature enables the cypress to grow in stagnated water. The reeds and knees are good indicators of a wetlands environment.

Post 11.8 at the rail on right-Bald Cypress (Taxodiumdistichum)
The bark of this tree is smooth but fibrous, and it has small rounded cones about one inch in diameter. Cypress may grow up to 120 feet tall and the trunk diameter may exceed 3 feet. It is a majestic tree and claims kinship to the Redwood. The wood is soft, straight grained, light weight, and very durable. Lumber is used for many kinds of construction work including houses, fences, shingles, and railroad ties. The tree drops its needles during winter, and it is unusual for its vertical root growths known as Cypress Knees.

Post 12.8 5FT.L - Water Oak (Quercus nigra)
The water oak is commonly found in low ares where it is associated with sweet gum, loblolly pine, and swamp chestnut. The tree takes 20 years to mature to the flowering stage. It produces large crops of acorns every year or two. The acorns are eaten by deer, ducks, raccoons, squirrels, quail, and other birds. The water oak's wood is fairly hard, close grained and a brownish color. It is sold as a rather inferior grade of "red oak" lumber. The tree may reach 80 feet tall and develop a trunk 3 feet in diameter.

Post 14.6 2FT.L - American Holley (Ilex opaca)
This beautiful holly is commonly found in low moist bottomlands where it may attain a height of nearly 50 feet and trunk diameter of 2 feet. Its evergreen spiny leaves and red berries are popular at Christmas. Many song birds and game birds eat the berries. The wood is white, hard, and tough, but seldom used except for small carvings and utensils.

Post 19.2 1FT.L - Black Gum, Gum Tumpelo, Sour Gum (Nyssa sylvatica)
The black gum has pretty red leaves in the fall. It grows to 60 feet and may have a diameter of 2 feet. Berry-like fruits develop about 3/4" long, and these are relished by the black bear and a large variety of birds. Wood from the black gum is used in the manufacture of furniture, boxes, veneer, and paper pulp. The tree may grow in standing water and develop characteristic swollen bases.

Post 30.2 2FT.L - Sweet Gum (Liquidambar styraciflus)
The star-shaped leaves on this tree have a pleasing spicy odor when crushed. The sweet gum is a stately tree which may reach 140 feet in height and the wood polishes well. It is considered a very important hardwood lumber tree in the south, where it is used for interior finishes, furniture, toys, boxes, and even firewood. Leaves change in the fall to a variety of colors with red dominating. In the spring, flowers appear with spherical heads. The fruits dry to hard prickly balls which may be spray painted and used as Christmas tree ornaments. Some people even use the sap from the tree as chewing gum.

Post 39 2FT.L - PawPaw (Asimina triloba)
The pawpaw is a small tree with large pretty yellow leaves in the fall. In the spring it has purple flowers which mature to edible fruit in late summer. Bears, raccoons, squirrels, wild turkeys, and other animals, including man, eat the fruit. The pulp of the fruit has been used to make yellow dye. This understory tree does best in low wet soils, where it may often form thickets.

Post 39.5 8FT.L - Red Maple (Acer rubrum)
Maple trees are well known for their beautiful fall colors, and the graceful red maple is no exception. It is a hardy tree that will grow just about anywhere. It has a tendency to "take over" after logging operations or destructive fires, and along with sweet gum it is the most common second growth tree along roadways and ditches. The tree trunk grows to as much as 100 feet with a trunk that may reach 5 feet in diameter. It has light brown, fairly hard wood, that is used in furniture, cabinets, flooring, and as a veneer. The fruit which spirals from the trees is relished by rodents.

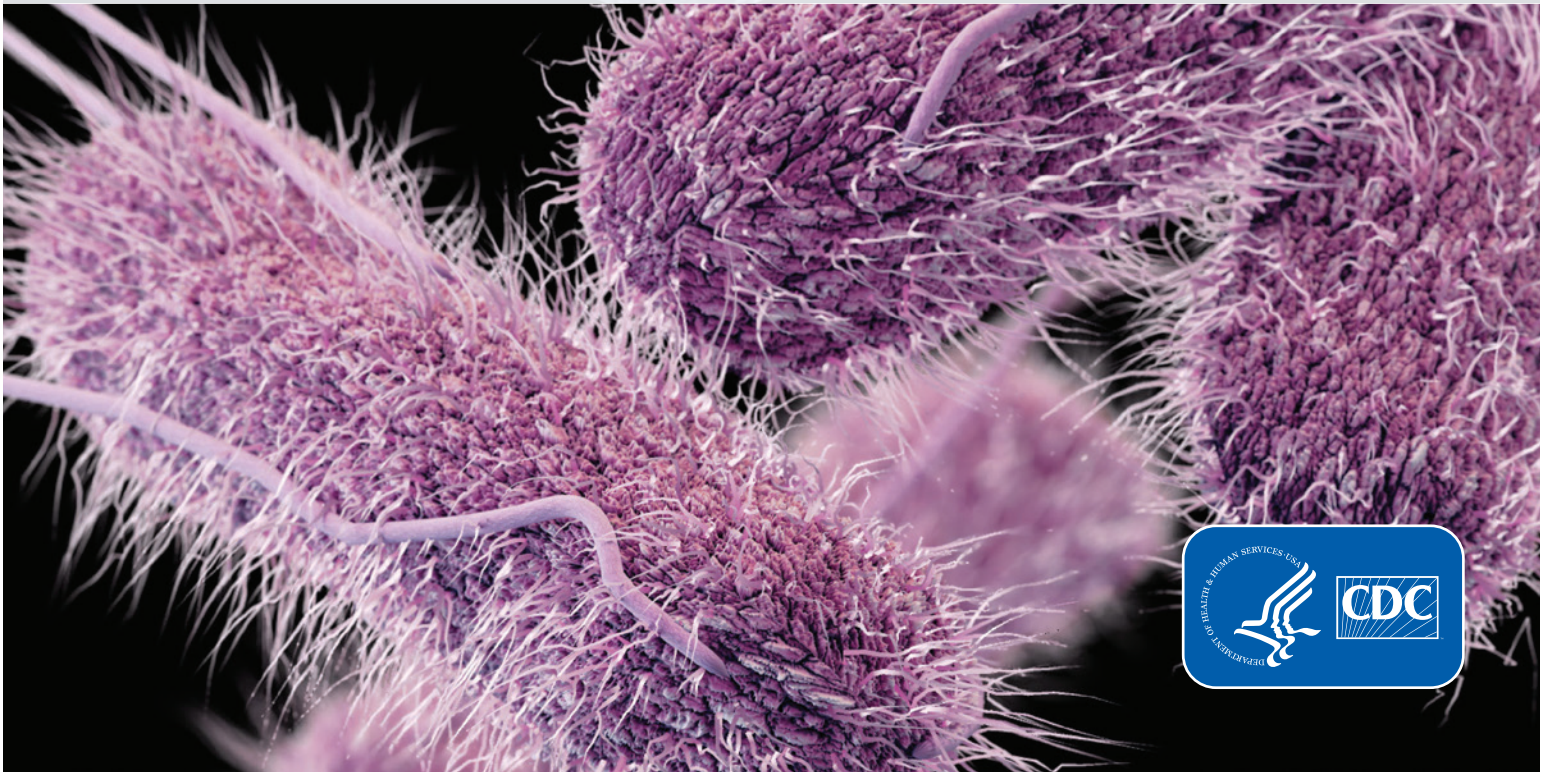
EMERGING AND ZOONOTIC INFECTIOUS DISEASES



This page intentionally left blank.

WHAT WE DO

If CDC is in the headlines, chances are good that it's a story we're involved in. That's because the work of the **National Center for Emerging and Zoonotic Infectious Diseases** **(NCEZID)** is about protecting America's health, safety, and security. We do this by keeping people safe from hundreds of infections ranging from A to Z–anthrax to sepsis, *Salmonella* food poisoning to Zika.

NCEZID is ground zero when there's an outbreak of infectious disease. We have world-class scientists, researchers, laboratories, and emergency responders to protect people from

- Foodborne, waterborne, and fungal infections
- Deadly diseases like Ebola
- Bioterror threats like anthrax
- Infections like rabies, Lyme disease, and Zika that spread between people, animals, and bugs
- Illnesses spread in healthcare settings and drug-resistant threats
- Illnesses that cross borders and affect travelers and people entering the country

Infectious diseases can pose a major threat to our national security.

NCEZID was at the forefront of CDC's battle to contain the spread of Ebola virus in Africa in 2014.

ABOUT OUR NAME:

National Center for **Emerging and Zoonotic Infectious Diseases**

Emerging diseases are infections that have increased recently or are threatening to increase in the near future. These infections could be

- newly discovered (like the sometimes-deadly Bourbon virus that was identified in 2014 in Bourbon County, Kansas).
- completely new to an area (like Zika virus in the Western Hemisphere).
- reappearing in an area (like dengue in south Florida, Texas, and Hawaii).
- caused by bacteria that have become resistant to antibiotics, like the so-called "nightmare bacteria" CRE (carbapenem-resistant Enterobacteriaceae).

Zoonotic means infectious diseases spread between animals, insects, ticks, and people. Examples include

- Lyme disease (spread by ticks)
- *Salmonella* infections (spread by poultry and other animals)
- rabies (spread by mammals)

Infectious diseases are illnesses caused by germs (such as bacteria, viruses, and fungi) that enter the body, multiply, and cause an infection.

- Some infectious diseases are contagious, that is, spread from one person to another.
- Other infectious diseases can be spread by germs carried in air, water, food, or soil. They can also be spread by insects, ticks, or animals.

75% of new or emerging infectious diseases in people are spread from animals.

FRONT COVER
Top: Ebola (virus)
Bottom: *Salmonella* (bacteria)

In 2016, almost 900 people got *Salmonella* infection from keeping chickens and ducks in backyard flocks. Children have an even greater chance of getting sick from handling live poultry.

RESPONDING TO OUTBREAKS

Perhaps what NCEZID is best known for is responding to outbreaks of infectious disease. Here are a few large-scale responses that NCEZID has led since 2010:

- 1st outbreak of Zika virus in the Western Hemisphere, which was linked to birth defects
- Largest Ebola epidemic in history, which killed more than 11,000 people
- Fungal meningitis outbreak caused by contaminated steroid injections
- 2nd-largest outbreak of West Nile virus infections that sickened 5,600 people in the US
- Outbreak of cholera in Haiti, which killed at least 10,000 people

We work to protect Americans from well-known outbreaks (Ebola) to outbreaks you're more likely to encounter—like *Salmonella* food poisoning.

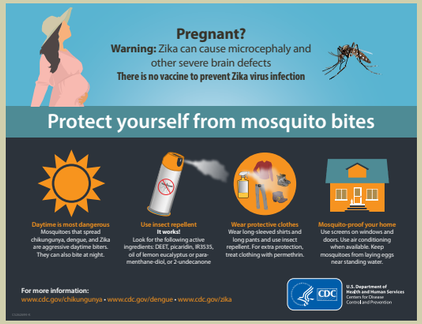
NCEZID provides rapid assistance to states and foreign ministries of health through formal requests called epidemic-assistance investigations, or Epi-Aids. Each year, NCEZID conducts almost half (~25) of all CDC's Epi-Aid investigations of outbreaks—large and small, domestic and international. Recent examples of Epi-Aids and other outbreak investigations that NCEZID participated in include:

- ***E. coli* (*Escherichia coli*) infections among children** who visited a goat farm in Connecticut
- Emerging, drug-resistant **fungal infections (*Candida auris*) that spread among patients** in healthcare settings
- Rarely seen **bloodstream infections (*Elizabethkingia*)** in patients in Wisconsin
- Illness caused by ***E. coli*-tainted flour** that infected people in more than 20 states
- ***Listeria* bacteria in packaged salads** that hospitalized 19 people, killing 1

IMAGE (LEFT): NCEZID staff collect samples while investigating an *E. coli* outbreak linked to a Connecticut dairy goat farm that sickened more than 40 people, many of them young children. Recommendations (like reduce direct contact with goats and their soiled bedding; provide handwashing stations) will help prevent illness in the future.

DID YOU KNOW?

NCEZID scientists helped confirm the connection between Zika virus infection during pregnancy and microcephaly and other birth defects.



TAKING A ONE HEALTH APPROACH

More than half of all infections that people get are spread by animals. Diseases like rabies, *Salmonella* infection, and West Nile virus are examples of zoonotic diseases—diseases that can be shared between animals and people. Animals can sometimes serve as early warning signs of potential illness in people. For example, birds often die of West Nile virus before people get sick with West Nile virus fever.

NCEZID's One Health Office recognizes that the health of people is connected to the health of animals and the environment. A One Health approach encourages collaborative efforts of many experts (like physicians and veterinarians) working across animal, human, and environmental health to improve the health of people and animals, including pets, livestock, and wildlife.

What we're doing:

- The One Health Office is working with multiple partners to **educate rural youth in agricultural organizations** like 4-H and the Future Farmers of America about preventing the spread of diseases shared between people and animals like zoonotic influenza viruses. The project has reached thousands of young people and their families in Arizona, Georgia, Iowa, Michigan, Minnesota, and Ohio, many of whom are actively involved in exhibiting livestock or farming.
  - One important outcome of the project was the rapid response to an outbreak of flu in people who had attended agricultural fairs in Ohio and Michigan. Partnerships formed during the project helped pinpoint the source of illness—infected swine exhibited at the fairs.
- On the global front, One Health is taking a strategic, targeted approach to controlling infectious disease. Experts from the One Health Office lead **One Health Zoonotic Disease Prioritization Workshops** so that countries with limited resources can focus on the top zoonotic diseases (for example, rabies and Ebola) of greatest national concern. Workshop participants include a wide-ranging group of people who protect health—of people, animals, or the environment—and they identify that country's top 5 diseases to target. Prioritizing diseases means countries can more efficiently build

lab capacity, conduct disease surveillance, plan outbreak response and preparedness activities, and create disease prevention strategies to reduce illness and death in people and animals.

Pet owners need to know about zoonoses and how to prevent them, so they can enjoy their pets without getting sick.

KEEPING BORDERS SECURE AND TRAVELERS SAFE

One of CDC's best-kept secrets is the people in NCEZID who focus on preventing the importation and spread of infectious diseases into the United States. More than a million people travel to the United States each day. Americans stay on the go, too, taking about 74 million trips each year. All international travelers face increased risk of getting and spreading infectious diseases.

What we're doing:

- NCEZID oversees 20 **quarantine stations**, strategically located at US airports, land borders, and seaports. Staff at these Q stations, as they are called, work hard to protect the public's health from threats, both foreign and domestic. The work extends to cover all ports of entry (more than 300) into the United States. Every day NCEZID staff work with Customs and Border Protection and other federal agencies, the airlines and cruise lines, and state and local public health departments to prevent the spread of infectious disease to US communities.
- The **Travelers' Health website** provides outbreak updates and travel notices, travel-related disease information, interactive maps, and other destination-specific recommendations for travelers and their healthcare providers.
- NCEZID publishes The **Yellow Book** (*CDC Health Information for International Travel*), the definitive US travel medicine reference for clinicians advising patients before and after travel.
- We **alert travelers at airports** about disease outbreaks and steps they can take to protect themselves.
- NCEZID **responds to sick travelers** who arrive in the United States at major airports, seaports, or land border crossings.
  - For example, when sick passengers are on a flight, the airline lets CDC know. We evaluate whether they might be contagious to others on the plane.

A CDC quarantine public health officer takes a call from an airline crew alerting him that a flight is about to land at Los Angeles International Airport with a sick passenger onboard. *Courtesy of Julie Konidakis*

- We **restrict the importation of animals** and products that may carry disease, such as monkeys, bats, small turtles, cats, and dogs.
- Because we are located at airports, we can **send life-saving drugs** on the next flight to save the life of someone with malaria, botulism, or diphtheria. These drugs are difficult to obtain commercially, but we make them available to US clinicians for patients who meet certain requirements.

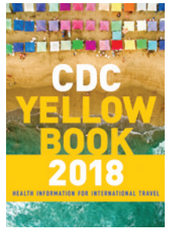


IMAGE (LEFT): The flight map shows ~60,000 flight patterns in a 24-hour period. Blue lines are shorter flights; purple lines longer flights. *Courtesy of Dr. Kamran Khan, BlueDot*

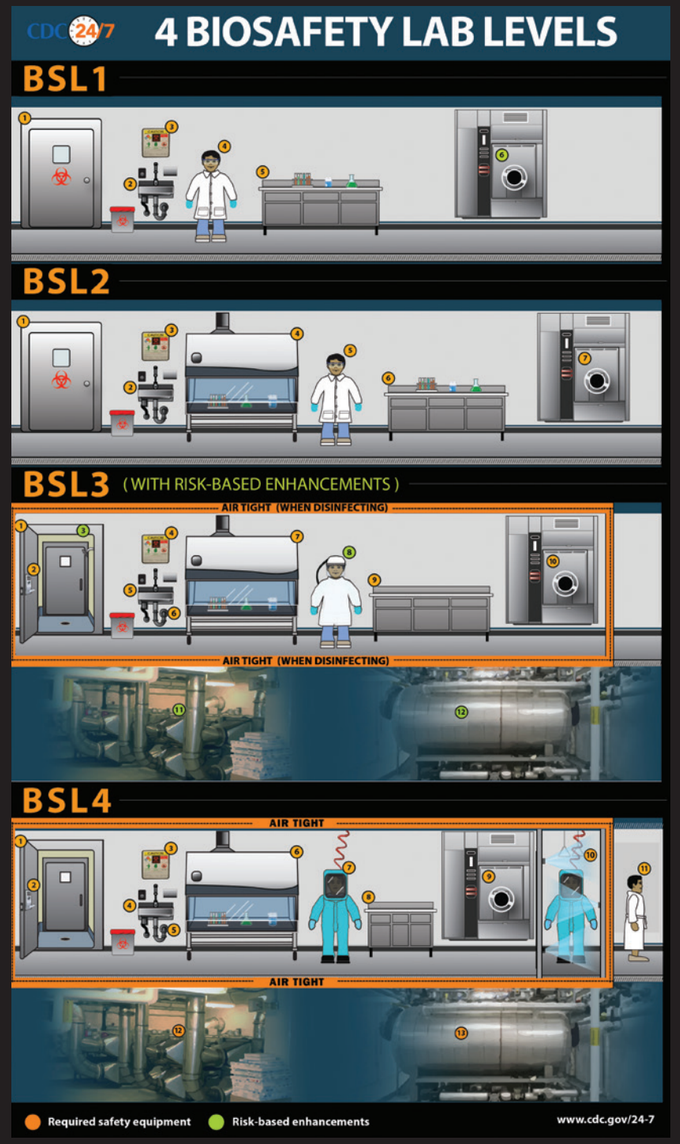
- **BSL1** – these labs handle agents that pose minimal risks and are not known to consistently cause disease in healthy adults
- **BSL2** – these labs handle agents that pose only moderate risks to lab staff or the environment
- **BSL3** – these labs handle agents that can cause serious or fatal disease
- **BSL4** – the highest level of lab safety in the world, these labs handle the deadliest germs that cause life-threatening and frequently fatal disease

NCEZID laboratorians quickly detect harmful pathogens—whether spread by people, animals, insects, food, or a bioterrorist.



LABORATORY EXPERTISE

NCEZID laboratories serve as vital reference laboratories for the United States and the world, aiding in critical disease detection, investigation, training, and public health research. In addition to managing the Laboratory Response Network (*see p. 29*), NCEZID provides oversight for a number of highly specialized laboratories.

NCEZID laboratories include:

- The **Infectious Disease Pathology Lab** is the primary unit at CDC that tests and evaluates tissues from patients with infectious diseases of unknown origin; they can test for more than 200 viruses and bacteria.
- **Viral special pathogens** labs work with some of the world's most dangerous viruses that need to be handled at the highest biosafety level (BSL4) containment laboratory (*see p. 10*). Laboratorians sometimes deploy to the field, as they did during the Ebola epidemic to set up a laboratory in Bo, Sierra Leone.
- **Bacterial special pathogens** labs work on anthrax and other potentially deadly bacteria.
- **Rickettsial zoonoses** labs provide expertise in the diagnosis of diseases such as Rocky Mountain spotted fever and discovery of other tickborne disease pathogens. Tests developed by the labs have improved the speed and sensitivity of rickettsial pathogen detection.
- **PulseNet** labs and enteric (gastrointestinal) diseases labs are critical in rapidly identifying foodborne pathogens and helping control foodborne disease outbreaks.
- **Healthcare-associated infections** (HAIs) laboratories look at causes of infectious illnesses occurring in patients who receive health care. They also issue protocols that partners can use for testing for specific pathogens causing HAIs.
- The **Biotechnology Core Facility** is a collection of six laboratories that use cutting-edge technologies like genomic sequencing to test for infectious and biothreat agents. It also evaluates emerging technologies for improving diagnostic tests as part of the Advanced Molecular Detection Program (*see page 17*).

Some important work NCEZID laboratories have produced includes:

- Discovering and **characterizing new infectious disease threats**.
- Providing an **early warning system** for new or emerging viruses like chikungunya.
- **Monitoring changes** in known germs that hurt people, including new drug-resistant strains like carbapenem-resistant Enterobacteriaceae (CRE) in hospital settings.
- **Preparing reference materials** (strains, cultures, and blood samples) that help confirm germs and providing quality assurance for other laboratories.

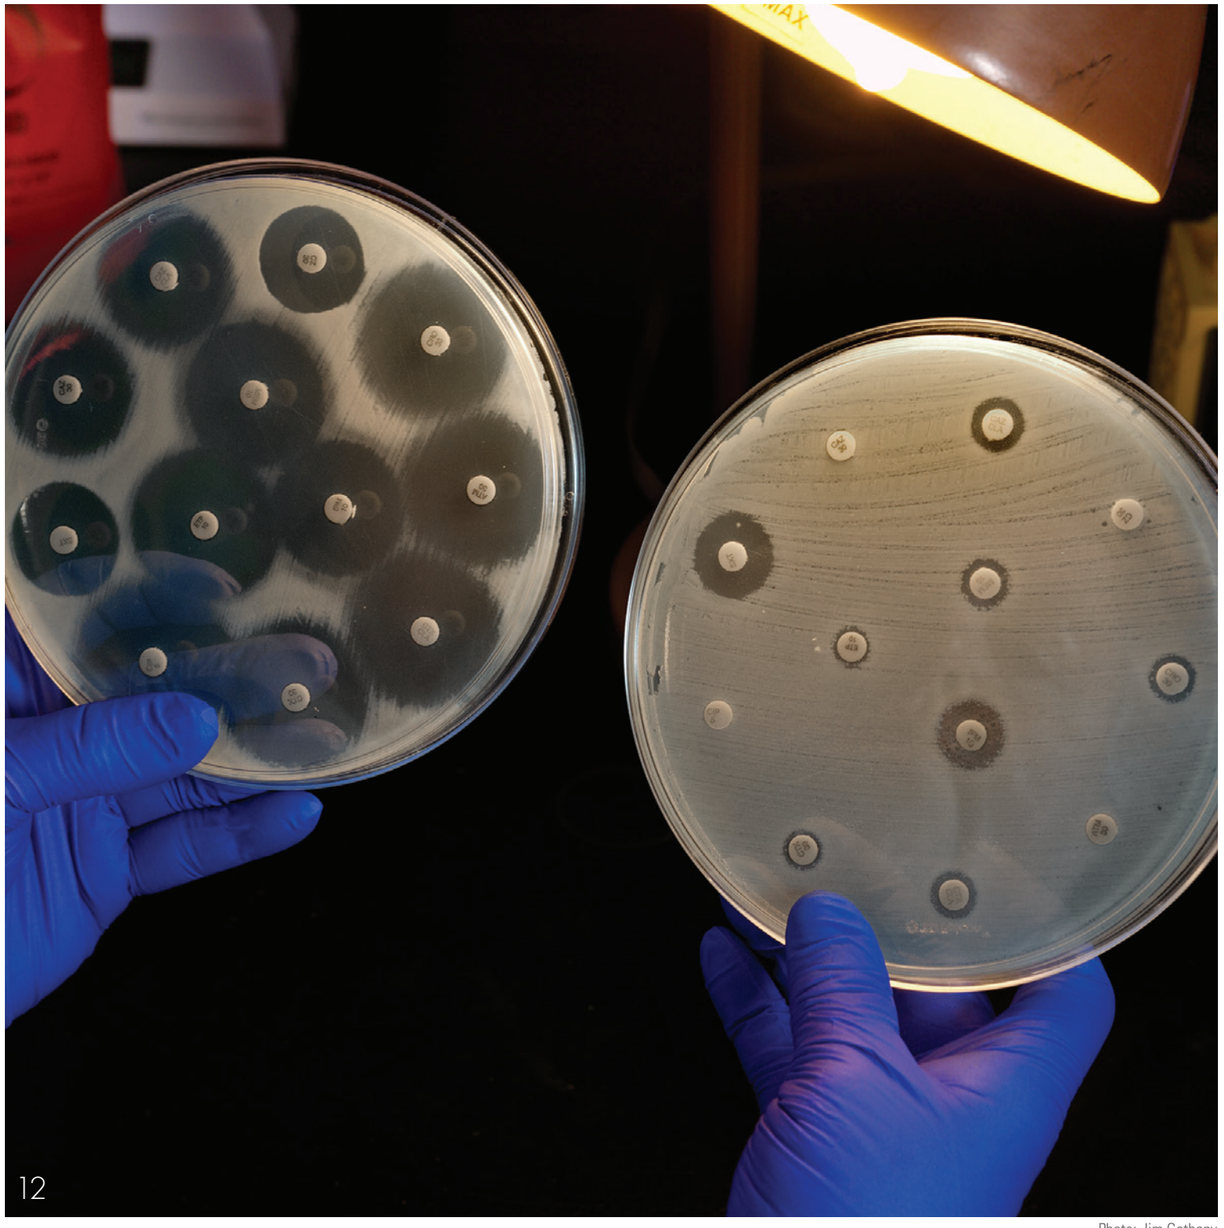


Photo: Jim Gathany

FIGHTING ANTIBIOTIC RESISTANCE

Each year in the United States, at least 2 million people become infected with bacteria that are resistant to antibiotics. Antibiotic resistance (AR) is the ability of microbes to resist the effects of drugs—that is, the germs are not killed, and their growth is not stopped. At least 23,000 people die each year as a direct result of these infections. Although some people are at greater risk than others, no one can completely avoid the risk of antibiotic-resistant infections. Infections with resistant organisms are difficult to treat, requiring costly and sometimes toxic alternatives. Some of the current trends in resistance:

- Antibiotics are among the most commonly prescribed drugs used in human medicine, but up to 50% of the time antibiotics are not prescribed properly (for example, often given when not needed or with incorrect drug dosing or duration).
- The germs that contaminate food can become resistant because of the use of antibiotics in food animals as well as people. Studies have shown that the use of antibiotics in food animals can lead to resistant infections, like those caused by *Salmonella* and *Campylobacter* in people.
- The other major factor in the alarming growth of antibiotic resistance is spread of resistant strains of bacteria from person to person, or from contaminated sources in the environment.

What we're doing:

In 2016, Congress appropriated $160 million for CDC to fight antibiotic resistance. With this investment, NCEZID is working with others to detect, respond, contain, and prevent resistant infections. Some key activities include:

- **Investing in states and communities** across the US for better response, containment, and prevention of AR threats.
- Establishing **the AR Lab Network** made up of CDC labs, 7 regional labs in health departments, and expanded capacity of all state and local health department labs. The new lab network will conduct nationwide testing to fill data gaps and inform how we respond to some of the most serious antibiotic-resistant threats like the nightmare bacteria CRE (carbapenem-resistant Enterobacteriaceae), gonorrhea, and *Salmonella*.
- **Funding innovation** to understand how antibiotics disrupt a healthy microbiome, the community of naturally occurring microbes in and on our bodies.

We are in a post-antibiotic era where doctors and patients are faced with untreatable infections.

IMAGE (page 12): What antibiotic resistance looks like. The bacteria on the right plate almost touch the discs of antibiotics, meaning they are antibiotic resistant. The antibiotics are ineffective against the bacteria. The bacteria on the left plate can't grow next to the discs of antibiotics, meaning the bacteria are susceptible and can be treated with antibiotics.

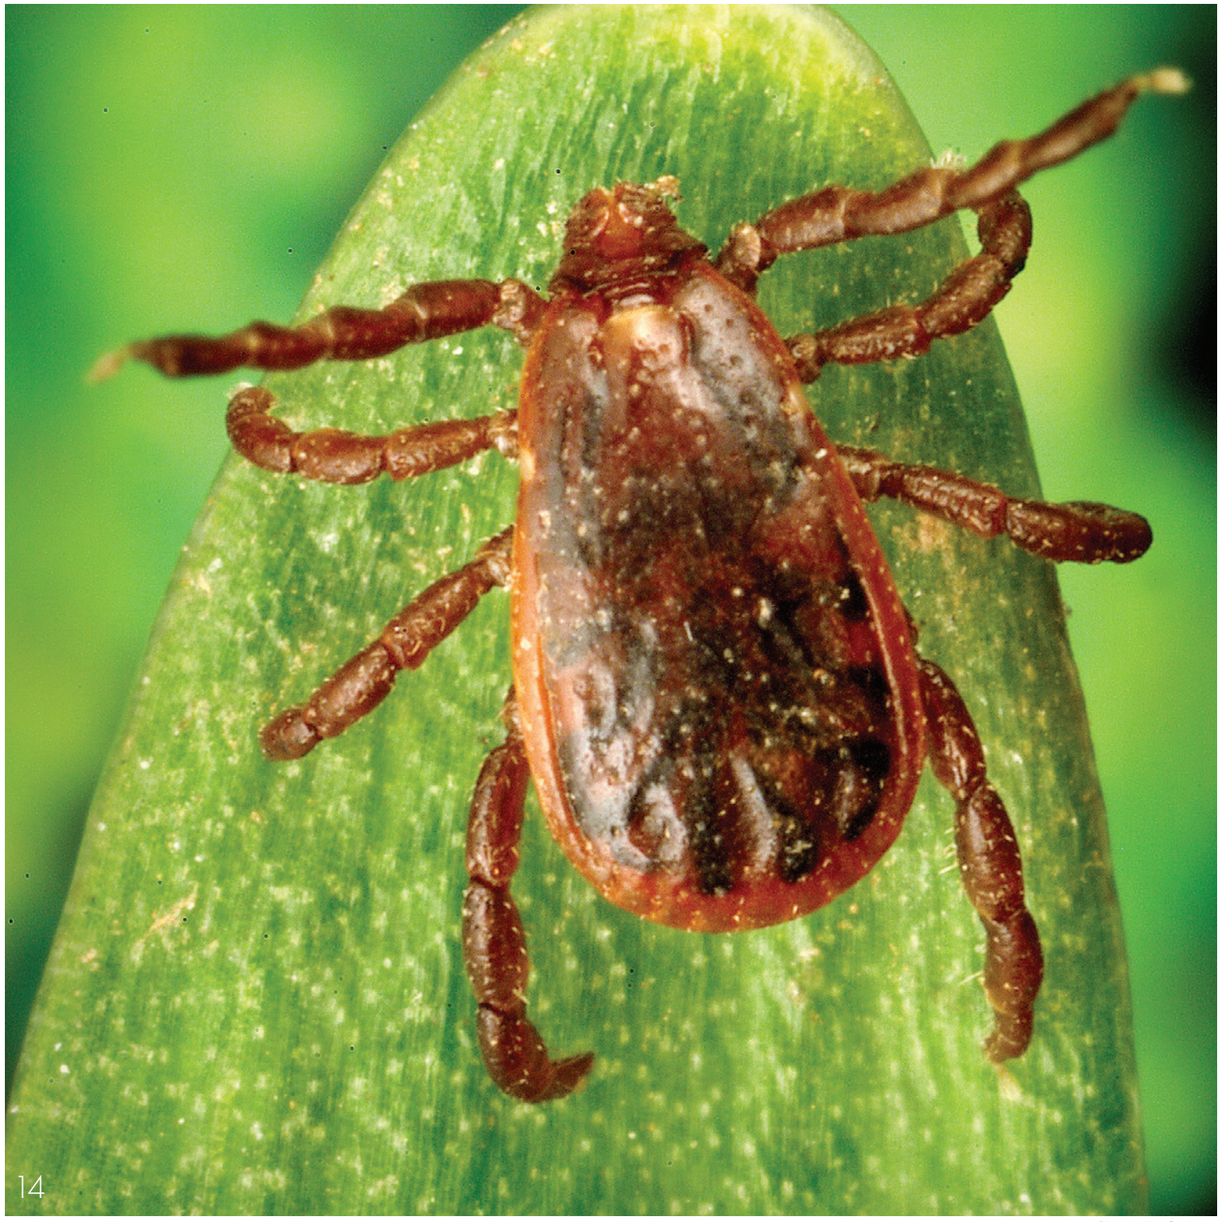

Photo: Jim Gathany

VECTOR-BORNE DISEASES (caused by bites from mosquitoes, ticks, or fleas)

Everyone—in the United States and around the world—is vulnerable to diseases spread by infected insects or ticks, also called vectors. Increasing global travel and urbanization are contributing to vector-borne disease outbreaks in new regions and countries. These diseases can be difficult to prevent and control, particularly since vaccines are available for only a few of them. NCEZID's work, directed by national and international leaders in vector-borne pathogens, is focused on priority diseases, including:

- Zika (causes severe birth defects), chikungunya (causes debilitating joint pain), and dengue (can be deadly), which are caused by bites of infected *Aedes aegypti* and *Aedes albopictus* mosquitoes. Forty percent (40%) of the world's population is at risk for dengue infection.
- West Nile virus is now native to the United States, and outbreaks are reported each summer. The deadliest West Nile virus outbreak in the United States occurred in 2012. Although most people infected with West Nile virus will have no symptoms, about 1 in 5 will experience fever with other symptoms, and less than 1% will develop a serious, sometimes fatal disease.
- Lyme disease is the most commonly reported vector-borne illness in the United States, with an estimated 300,000 infections occuring each year. Other tickborne diseases like Rocky Mountain spotted fever are also a serious public health problem and can be deadly within days if not treated promptly with antibiotics.

What we're doing:

- NCEZID has worked with partners on recent **vector-borne outbreaks** including Zika and chikungunya in Latin America, dengue in Hawaii, plague in Yosemite National Park, and Rocky Mountain spotted fever in Arizona and New Mexico.
- Early in the Zika outbreak, NCEZID scientists **developed a new test** called the Trioplex that detects Zika virus, dengue, and chikungunya in a single test.
- CDC is partnering with the Minnesota Department of Health and the Mayo Clinic to obtain up to 30,000 clinical specimens from patients with suspected tickborne illness over a 3-year period. CDC will use genetic sequencing methods to **identify the specific tickborne bacterium** that caused these patients' illnesses.
- NCEZID scientists have found **nootkatone,** an ingredient found in Alaska yellow cedar trees, some herbs, and citrus fruits, to be an effective repellent and insecticide for use against mosquitoes, ticks, and other pests. Efforts are now underway to bring this product to market.

Photo: Jim Gathany

Since 2004 in the US, scientists have discovered 7 new tickborne viruses in people.

IMAGE (LEFT): The brown dog tick is one of the ticks that spreads Rocky Mountain spotted fever.

INNOVATING SOLUTIONS

Pathogens constantly evolve. Protecting Americans demands that we develop better tools to keep us one step ahead of emerging infectious diseases. Innovation is taking place across NCEZID.

What we're doing:

Examples of innovations worked on by NCEZID scientists include:

- **Advanced Molecular Detection (AMD)** combines two powerful technologies (DNA sequencing and advanced computing) to solve complex infectious disease mysteries—the who, what, where, when, and how microbes harm people. Since the Office of Advanced Molecular Detection was established in 2014, AMD has played a pivotal role in:
  - Identifying the genetic makeup of Ebola and Zika during each of those outbreaks.
  - Solving foodborne outbreaks involving *Listeria* infection faster by linking food sources to clusters of illness.
- **New diagnostics** like these are ensuring that diseases are accurately and quickly diagnosed and treated:
  - A test kit for yellow fever gives results in 4 hours that used to take 2 days.
  - A new tool that screens for antifungal resistance when treating invasive candidiasis, the most common cause of healthcare-associated bloodstream infections in the United States. The new tool provides rapid and cost-effective screening tool for *Candida*.
- Safer and more effective **vaccines against rabies** for use in people and animals.
- An electronic platform called **ePathology** allows physicians and scientists from anywhere in the world to electronically submit images and scanned pathology slides to CDC pathologists for evaluation.
  - Doctors working in the most remote and resource-limited villages just need an internet connection to share slides of their patient's specimens with pathologists at NCEZID.

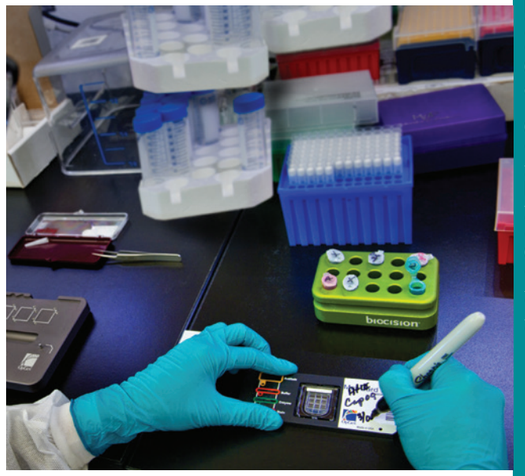

Photo: Jim Gathany

Advanced Molecular Detection means that it took 3 weeks to develop a test protocol for Zika. Before AMD, it would have taken 3 months.

HEALTHCARE-ASSOCIATED INFECTIONS

Healthcare-associated infections (HAIs)–infections patients can get while receiving medical treatment in a hospital or other healthcare facility–are a major, yet often preventable, threat to patient safety. On any given day, about 1 in 25 hospital patients has at least one HAI.

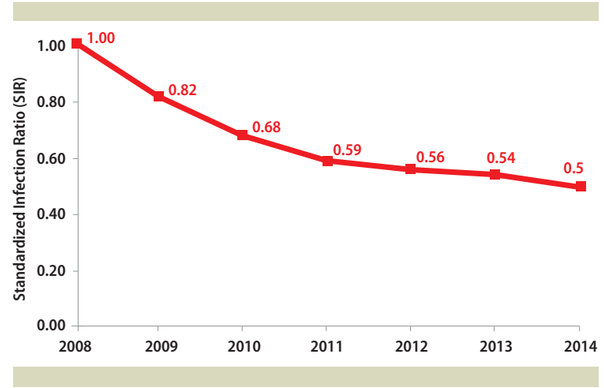
Modern healthcare employs many types of invasive devices and procedures to treat patients and to help them recover. Infections can be associated with devices used in medical procedures, such as central lines, catheters, or ventilators. Infections may also occur at surgery sites, known as surgical site infections.

What we're doing:

Our mission is to protect patients and healthcare personnel and promote safety, quality, and value in healthcare delivery systems. NCEZID's HAI experts, together with healthcare and public health partners, work to bring increased attention to HAIs and prevention. And studies show it works: when healthcare facilities take steps to target prevention of specific HAIs, they can decrease these infections by more than 70%.

HAI data are used to identify problem areas, measure progress of prevention efforts, and ultimately eliminate HAIs. NCEZID provides data on HAIs through:

- NCEZID's **National Healthcare Safety Network (NHSN)** is the nation's most widely used HAI tracking system. NHSN provides facilities, states, regions, and the nation with data needed to identify problem areas, measure progress of prevention efforts, and ultimately eliminate HAIs. In addition, NHSN allows healthcare facilities to track antimicrobial use and resistance, healthcare safety issues, and important healthcare process measures such as influenza vaccination status of healthcare personnel and infection control adherence rates.
- CDC's annual *National and State Healthcare-Associated Infections Progress Report* (HAI Progress Report) provides **a closer look at the HAIs** most commonly reported to CDC's NHSN. This report describes national and state progress in preventing central line-associated bloodstream infections, catheter-associated urinary tract infections, select surgical site infections, hospital-onset *Clostridium difficile* infections, and hospital-onset methicillin-resistant *Staphylococcus aureus* (MRSA) bacteremia (bloodstream infections).



Central line-associated bloodstream infections **declined 50%**

FOODBORNE DISEASE (food poisoning)

CDC estimates that each year roughly 48 million people (1 in 6) gets sick from a foodborne illness, 128,000 are hospitalized, and 3,000 die. Many different disease-causing microbes, or pathogens, can contaminate foods, so there are many different foodborne infections.

According to CDC estimates, the most common foodborne illnesses are caused by norovirus and by the bacteria *Campylobacter*, *Salmonella*, and *Clostridium perfringens*.

What foods are associated with foodborne illness?

- Fruits and vegetables consumed raw are a particular concern. Washing can decrease—but not eliminate—contamination.
- Raw meat and poultry, raw eggs, unpasteurized milk, and raw shellfish.
- Filter-feeding shellfish (like oysters) are especially likely to be contaminated with viruses and bacteria.
- Foods that combine the products of many individual animals, such as bulk raw milk, pooled raw eggs, or ground beef, are particularly hazardous because a pathogen in one of the animals may contaminate the whole batch.

What we're doing:

CDC provides the vital link between illness in people and the food safety systems of government agencies and food producers. We take action by:

- **Collaborating at the federal level** with the US Food and Drug Administration and the US Department of Agriculture's Food Safety and Inspection Service. State and local health departments and the food industry also play critical roles in all aspects of food safety.
- **Tracking** the occurrence of foodborne illnesses.
- Facilitating and **leading outbreak investigations**.
- Managing the **DNA fingerprinting network** for foodborne illness-causing bacteria in all states to detect outbreaks.
- **Using whole genome sequencing** to show which bacterial strains are most alike genetically.
- Attributing **illnesses to specific foods** and settings.
- Targeting **prevention measures** to reduce illness and death.
- **Providing data and analyses** to inform food safety action and policy.

***Listeria*, associated with soft cheeses, raw milk, and certain refrigerated foods, is a deadly foodborne bacteria. About 1 in 5 people who get sick from listeriosis die.**

WATERBORNE AND FUNGAL INFECTIONS

Water is essential for life but can also lead to illness when it is contaminated by disease-causing organisms. Examples of **waterborne disease** include:

- Cholera, a severe diarrheal disease, often caused by drinking *Vibrio cholerae*-contaminated water.
- An infection called microbial keratitis, which can occur when germs invade the eye. These germs can be associated with improper use and care of contact lenses.
- Cryptosporidiosis, giardiasis, and other gastrointestinal diseases caused by swallowing contaminated water.
- An infection caused by the rare but often fatal brain-eating ameba (*Naegleria fowleri*) that can occur when people go swimming or diving in warm freshwater places like lakes and rivers, and contaminated water enters through the nose.

Fungal diseases are a concern in the medical and public health community for several reasons. Increasing numbers of people with weakened immune systems (like cancer patients and organ transplant recipients) are especially vulnerable to fungal infections. Changes in healthcare practices provide opportunities for new and drug-resistant fungi to emerge in healthcare settings. Other fungal diseases, like valley fever, are caused by fungi that live in soil.

What we're doing:

NCEZID has world-class scientists who are experts in the fields of preventing and controlling waterborne and fungal diseases. Recent accomplishments include:

- Tested more than 150 clinical samples in the US for **free-living amebas**, including *Naegleria fowleri*, the "brain-eating" ameba.
- Launched **CryptoNet**, the first system that uses molecular fingerprints for tracking a parasite. *Cryptosporidium* is a major cause of US waterborne disease outbreaks.
- Released the 2nd edition of the **Model Aquatic Health Code** to help state and local health departments prevent drowning, injuries, and the spread of recreational water illnesses at public swimming pools and spas.
- Provided epidemiological field support to ministries of health in multiple countries to prevent and **control outbreaks of cholera and typhoid**.
- Helped conduct **fungal disease outbreak investigations**, including mucormycosis outbreaks in Kansas, Colorado, and Pennsylvania. Mucormycosis typically affects people with weakened immune systems, such as people who have had an organ transplant.
- Applied new **laboratory tools to detect valley fever** (coccidioidomycosis) in the environment and used whole genome sequencing to understand the emergence of this fungus in new geographic areas.
- Investigating **new cases of *Candida auris* infections**, an emerging drug-resistant fungus that can spread through healthcare settings and cause serious and sometimes deadly bloodstream infections that have limited treatment options.

A multistate outbreak of fungal meningitis sickened more than 750 people and killed nearly 65 in 2012. NCEZID fungal experts helped nail the culprit: contaminated injections of a steroid linked to a compounding pharmacy. Photo: Jim Gathany

DEADLY AND UNEXPLAINED DISEASES

Germs that cause Ebola, anthrax, rabies, smallpox, and plague, also called "high-consequence pathogens," require expert oversight, especially because of the threat of bioterrorism. NCEZID places a high priority on understanding and tracking these diseases domestically and globally, operating state-of-the-art laboratories that can identify them, and preventing their spread.

What we're doing:

- NCEZID studies diseases caused by **highly hazardous bacteria** (like anthrax) **and viruses** (like Ebola). After the Ebola epidemic of 2014, scientists continue to conduct follow-up studies with survivors to learn what long-term symptoms they may face, how long the virus can persist, and how some people are better able to survive Ebola.
- NCEZID scientists also investigate **unexplained deaths and diseases** of unknown origins. Uncovering new infectious diseases contributed to the identification of the agents that cause SARS and hantavirus pulmonary syndrome. Recently, NCEZID pathologists were amazed when they found a new disease—tapeworms growing inside a person essentially getting cancer that spreads to the person, causing tumors. It is the first-known case of a person becoming ill from cancer cells that arose in a parasite—in this case, the dwarf tapeworm, the most common tapeworm in people.
- An important part of the mission to keep deadly diseases at bay is to investigate and find new ways to **prevent zoonotic infections** that spread between animals and people. Although rabies is a vaccine-preventable disease, close to 60,000 people die from the disease around the world each year. The NCEZID Rabies Team has traveled throughout the world to reduce rabies in countries like Ethiopia, Vietnam, and Haiti, where rabies from dogs is common.

The dwarf tapeworm is the most common tapeworm found in people.

NCEZID has world-renowned experts in the world's deadliest diseases like Ebola, anthrax, and rabies.

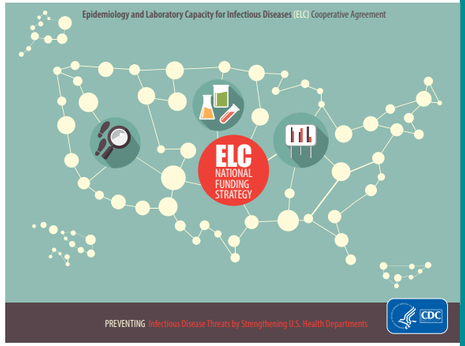
IMAGE (LEFT): In Haiti, the Rabies Team and partners vaccinated more than 37,000 dogs in just 18 days in 2017 as part of a months-long campaign.

SUPPORTING STATES

State, local, and territorial health departments work to combat emerging and reemerging infectious diseases (like Zika), improve public health (like food safety surveillance), and respond to public health emergencies like outbreaks of *E. coli* or *Salmonella* infections. NCEZID supports their work in a variety of ways.

What we're doing:

- Each year, CDC awards millions of dollars to states through the **Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) Cooperative Agreement**, one of CDC's key nationwide cooperative agreements, which is managed by NCEZID.
  - The ELC oversees an array of cross-cutting epidemiology, laboratory, and health information systems activities that help domestic public health departments respond to complex infectious disease threats like Zika and antibiotic resistance.
- NCEZID's innovative online tool, **MicrobeNet**, provides laboratorians in all 50 states unprecedented—and free—access to CDC's library of information about more than 2,400 rare and emerging infectious bacteria and fungi.
  - This tool helps doctors and laboratorians get the information they need to accurately diagnose unknown causes of diseases faster and save lives.
- The **Arctic Investigations Program** (AIP) focuses on reducing and preventing infectious diseases that disproportionately affect Alaska Native people. For more than 40 years, AIP has collaborated with partners to tackle infectious disease threats by using state-of-the-art diagnostics, epidemiology, outbreak investigations, and targeted research.
  - Approximately 20% of rural Alaska homes lack running water and sanitation services. AIP studies showed that running water and sanitation in homes prevent the spread of infectious diseases like bloodstream infections, pneumonia, and skin infections. This work resulted in policy changes that have made it easier to get water and sewer grants, which can help to provide more homes with running water.
- The **Emerging Infections Program** (EIP), a network of state health departments and their collaborators, quickly translates surveillance and research activities into informed policy and public health practice. For example, EIP work has been instrumental in evaluating and honing strategies for preventing severe disease in newborns caused by group B *Streptococcus*.



Every year, NCEZID awards millions of dollars to states to help them control infectious disease.

PROTECTING AMERICANS FROM BIOTERRORISM

At NCEZID, our first priority is to keep people safe. Preparing for infectious disease threats—naturally occurring or intentional—is one of the mission-critical activities of NCEZID. We do not know when—or if—a national health emergency like the anthrax attacks of 2001 might happen again. What we do know is that if anthrax or another biological agent were intentionally released, NCEZID will be central to CDC's response because of three primary and unique assets:

1. We have the scientific expertise. At CDC, the scientists who specialize in the scariest pathogens work at NCEZID. NCEZID's epidemiologists and microbiologists are among the world's leading experts in highly pathogenic bacteria and viruses like those that cause anthrax, botulism, plague, smallpox, and Ebola. They also handle less-familiar but dangerous germs that cause brucellosis, tularemia, Q fever, Lassa fever, Rift Valley fever, and other viral hemorrhagic fevers.

These specialized NCEZID scientists are vital in helping CDC and its partners prepare by developing diagnostic tests and updated guidance for clinicians, laboratories, public health officials, and the public. All of this would be critically important to saving lives during a large-scale public health emergency caused by bioterrorists.

2. We oversee work in CDC's high-containment labs (HCL). Many of the dangerous pathogens that could cause major outbreaks or be used in bioterrorism are securely handled in HCL labs (*see p. 10*). The biosafety level (BSL)-3 lab handles pathogens that could cause serious illness, but could be treated. Pathogens that are even more deadly and for which no vaccine or treatment is available require containment in the most secure facility, the BSL-4 lab.

3. We manage the Laboratory Response Network (LRN). The LRN is a unique network of more than 130 laboratories established in collaboration with the Federal Bureau of Investigation and the Association of Public Health Laboratories to respond to bioterrorism, chemical terrorism, and other public health emergencies. The network includes state and local public health laboratories, as well as veterinary, agriculture, military, law enforcement, and water- and food-testing labs. When an emergency strikes, the LRN quickly mobilizes as it did during the anthrax investigation of 2001 and in 2014 for the Ebola outbreak.

Bioterrorism has the potential to quickly kill millions of people.

IMAGE (LEFT): NCEZID scientists suiting up before they enter the BSL-4 laboratory.

NCEZID Working Around The World

TARGETING INFECTIOUS DISEASE AROUND THE WORLD

NCEZID scientists are in the forefront of global outbreak response, reducing the spread of diseases that cross borders, because as the Ebola and Zika epidemics have demonstrated, an outbreak overseas is only a plane ride away. Our scientists also strengthen health security in the United States by focusing on pathogens (like anthrax or plague) that could be intentionally spread by bioterrorists.

What we're doing:

- **Lead major outbreak responses**, providing the technical expertise and workforce for major outbreaks like cholera, Ebola, and Zika.
  - 500+ NCEZID staff deployed to Zika response
  - 1,000+ NCEZID staff deployed to West Africa for Ebola response
- During the 2014 Ebola outbreak, NCEZID worked with Sierra Leone to fast-track development of a national program to **decrease the spread of Ebola in healthcare facilities**. The program's success led Sierra Leone to add trained infection prevention staff to 25 government hospitals and 14 districts, ensuring that infection prevention and control remain a priority in healthcare.
- We've **developed many new tests** with partners that have helped us respond faster to outbreaks of emerging infectious diseases including Zika, Ebola, yellow fever, dengue, and plague.
- Our **ePathology** service lets our pathology experts share a microscope with scientists across the globe and provide real-time consultation for urgent cases or rarely seen pathogens.
- Strengthen **public health systems** to prevent global spread of disease, including robust surveillance systems to pick up diseases, disease detectives who can trace the source of the outbreak, and responsive and effective laboratories that provide confirmation.
- Reduce illness and death among **US travelers**, expatriates, and other globally mobile populations.

NCEZID epidemiologist greets children in a northern Tanzania village during a cholera outbreak rapid response.

An outbreak of infectious disease is always just a plane ride away.

NIOSH

Fast Facts

Protecting Yourself from

Poisonous Plants

Any person working outdoors is at risk of exposure to poisonous plants, such as poison ivy, poison oak, and poison sumac. When in contact with skin, the sap oil (urushiol) of these plants can cause an allergic reaction. Burning these poisonous plants produces smoke that, when inhaled, can cause lung irritation.

Workers may become exposed through:

- Direct contact with the plant
- Indirect contact (touching tools, animals, or clothing with urushiol on them)
- Inhalation of particles containing urushiol from burning plants

Symptoms of Skin Contact

- Red rash within a few days of contact
- Swelling
- Itching
- Possible bumps, patches, streaking or weeping blisters
  NOTE: Blister fluids are not contagious

First Aid

If you are exposed to a poisonous plant:

- Immediately rinse skin with rubbing alcohol, poison plant wash, or degreasing soap (such as dishwashing soap) or detergent, and lots of water.
  - Rinse frequently so that wash solutions do not dry on the skin and further spread the urushiol.
- Scrub under nails with a brush.
- Apply wet compresses, calamine lotion, or hydrocortisone cream to the skin to reduce itching and blistering.
  - Oatmeal baths may relieve itching.
- An antihistamine may help relieve itching.
  - NOTE: Drowsiness may occur.
- In severe cases or if the rash is on the face or genitals, seek professional medical attention.
- Call 911 or go to a hospital emergency room if you have a severe allergic reaction, such as swelling or difficulty breathing, or have had a severe reaction in the past.

Poisonous plants, from left to right: poison ivy, poison oak, poison sumac.

Images courtesy of U.S. Department of Agriculture.

Protect Yourself

- Wear long sleeves, long pants, boots, and gloves.
  - Wash exposed clothing separately in hot water with detergent.
- Barrier skin creams, such as lotion containing bentoquatum, may offer some protection.
- After use, clean tools with rubbing alcohol or soap and lots of water. Urushiol can remain active on the surface of objects for up to 5 years.
  - Wear disposable gloves during this process.
- Do not burn plants or brush piles that may contain poison ivy, poison oak, or poison sumac.
  - Inhaling smoke from burning plants can cause severe allergic respiratory problems.

When exposure to burning poisonous plants is unavoidable, employers should provide workers with:

- A NIOSH-certified half-face piece particulate respirator rated R–95, P–95, or better. This recommendation does NOT apply to wildland firefighters, who may require a higher level of protection.
- These respirators should protect against exposure to burning poisonous plants, but will not protect against all possible combustion products in smoke, such as carbon monoxide.
- Respirators must be worn correctly and consistently throughout the time they are used.
- For respirators to be effective there must be a tight seal between the user's face and the respirator.
- Respirators must be used in the context of a written comprehensive respiratory protection program (see OSHA Respiratory Protection standard 29 CFR 1910.134).
- For more information about respirators, visit www.cdc.gov/niosh/npptl/topics/respirators/

Common invasive plants at:

- Naval Air Station Oceana
- NASO Dam Neck Annex
- Naval Auxiliary Landing Field Fentress
- Naval Support Activity Hampton Roads Northwest Annex (NSAHR NWA)

The purpose of this brochure is to provide a basic understanding of the most common invasive plants occurring at four Navy installations in the Hampton Roads region, the threats they pose, and what you can do to help control and prevent their spread.

what are invasive species?

Invasive species are plants, animals, or micro-organisms that are non-native and are likely to cause economic or environmental harm or harm to human health. They are often spread by wind, wildlife, and intentional or unintentional actions.

The Department of Defense and other Federal and state agencies have instituted policies and guidelines to prevent and control the introduction and spread of invasive species.

why are invasive plants a problem?

Invasive species can interfere with military operations and readiness, kill or shade out native plants, harm fish and wildlife and their habitats, and have negative economic impacts on crop yields and forest productivity. Furthermore, invasive species are a threat to availability of training areas, increase risk of wildfires, and can pose serious health and safety issues for people.

Economic losses and control costs have been estimated to exceed $120 billion per year (Pimentel et al. 2005)

what you can do about invasive plants

You can help stop invasive plants by identifying these species and taking actions to prevent their introduction and spread:

- Learn about the invasive species that are in your area and what is being done about them
- Be able to identify invasive plants
- Report new invasive species and infestations to the Natural Resources Manager
- Remove invasive plants from your property
- Plant non-invasive plants on your property
- Clean boats and trailers, off-road vehicles, boots, waders, and other pathways of spread to stop hitchhiking invasive species
- Use certified “weed-free” forage, firewood, hay, mulch, and soil
- Volunteer for organized efforts to remove invasive species from natural areas and support organizations that work with invasive species

Natural Resources Managers need your help to prevent and contain the spread of these invaders.

Early Detection and Rapid Response (EDRR) is critical to identify new areas of infestation, rapidly respond, and increase the chances of success.

The Department of Defense is a leader in natural resources management and controlling invasive species.

This page intentionally left blank.

2016 HAZARDOUS MATERIALS REUTILIZATION, HAZARDOUS WASTE MINIMIZATION AND DISPOSAL GUIDE

The purpose of this guide is to communicate regulatory requirements and management procedures relevant to the utilization of hazardous material, and minimization and disposal of hazardous waste. It is your responsibility to notify the hazardous waste Media Manager of new wastes requiring characterization. The hazardous waste Media Manager should be notified before the waste is generated if at all possible.

Implementing effective environmental management, by incorporating these procedures, shows our commitment to environmental stewardship through regulatory compliance, pollution prevention, and continual improvement.

Understanding how your job impacts the environment and what regulatory requirements apply provides for a reduction in environmental impacts, ensures environmental compliance through enhanced awareness and is essential in maintaining our Environmental Management System (EMS).

Annual training is required for all personnel managing hazardous waste and hazardous materials. Web-based training is available via ECATTS at https://environmentaltraining.ecatts.com/.

For questions regarding hazardous waste management or hazardous material use, please see Appendix 1 for Hazardous Waste Media Manager contacts for your installation.

This guide is for the following Naval installations in the Hampton Roads area ONLY.

Naval Station Norfolk, NSA Hampton Roads, Lafayette River Annex, Craney Island, Naval Weapons Station Yorktown, Yorktown Fuels, Cheatham Annex, New Kent ROTHR, Joint Expeditionary Base Little Creek-Fort Story, St. Julien's Creek Annex, South Gate Annex, Scott Center Annex, Naval Medical Center Portsmouth, Naval Air Station Oceana, Dam Neck Annex, NSA Northwest Annex, Fentress Air Field,Dare County Bombing Range

DOCUMENT TITLE: Hazardous Materials Minimization, Hazardous Waste Reutilization and Disposal Guide

CONTENTS

TABLE OF CONTENTS BEGINS ON PAGE IV

PREPARED BY: Hazardous Waste Program Managers | APPROVED BY: EQMB

REVISION NO.	EFFECTIVE DATE	DESCRIPTION OF REVISION	APPROVAL SIGNATURE	APPROVAL DATE
A	2005	ORIGINAL ISSUE		
B	Dec. '07	Updated POC, aerosol and oil filter information; added Universal Waste Guidance, changed ECAP Tech to CHRIMP Tech and updated inspection checklists		
C	March '08	Updated POC information and phone numbers, bio-hazardous waste information		25 Mar 08
D	Oct. '09	Updated compressed gas cylinder, bio-hazardous waste, Universal Waste, and POC information. Updated inspection checklists and included Joint Expeditionary Base Fort Story installation in guidance.		3 Nov 09
E	Aug. 10	Updated guidance throughout. Material Turn-In-Work Guidance		17 Aug 10
F	March 12	Updated guidance throughout. Streamlined format and waste SOPs.		26 Mar 12
G	Feb 12	Updated POCs, added guidance on C2R, THF.		20 Feb 13
H	May 13	Updates throughout		5/2/13

FORM EMS-2 (REV. B)

GUIDE INTRODUCTION

This guide applies to naval installations in the Hampton Roads area and was developed in accordance with applicable Navy instructions (Ref. A) and Federal and State laws. It is divided into four (4) main sections:

I. Waste Minimization Information
II. Hazardous Material Reutilization Information
III. Hazardous Waste Management and Disposal Information
IV. Management of Specific Materials/Wastes

The first three sections of this guide will provide you information on how to best manage your excess Hazardous Material (HM) or the Hazardous Waste (HW) that you may generate.

The **Waste Minimization Information** section will provide tips and information on how to generate less waste. Reducing waste generation is the most cost-effective way to manage waste. By not creating waste, an activity reduces its environmental footprint, protects the environment for future generations, and helps maintain the public image of the Navy as good environmental stewards.

The **Hazardous Material Reutilization Information** section provides various options other than disposal. Information and procedures are provided on how to return HM to Hazardous Material Minimization Centers (HAZMINCENs), shelf-life extension procedures, various recycling and/or cross-decking efforts, and material transfer procedures to DLA Disposition Services for public resale.

The **Hazardous Waste Management and Disposal Information** section of this guide details the procedures to be followed to dispose of an item.
HW disposal is the most costly and regulated method of managing expired or unneeded HM. The cost of disposal is often more than the purchase cost of the material, thus every effort should be made to avoid generation of a hazardous waste. The options in Sections I and II should be explored prior to HW disposal.

Section IV of this guide, **Management of Specific Materials/Wastes**, provides instructions for the management of specific HW that are generated most frequently in the Hampton Roads Region.

Useful contact information is listed at the beginning of each section. For a full list of points of contact related to this guide, see Appendix 1.

TABLE OF CONTENTS

I. WASTE MINIMIZATION INFORMATION 1

A) USEFUL CONTACT INFORMATION 1
B) WORK PRACTICES AND MATERIAL SUBSITUTION 1
C) CONSOLIDATED HAZARDOUS MATERIAL REUTILIZATION AND INVENTORY MANAGEMENT PROGRAM (CHRIMP) 3
D) REGIONAL SOLID WASTE AND RECYCLING 3

II. HAZARDOUS MATERIAL REUTILIZATION INFORMATION 7

A) USEFUL CONTACT INFORMATION 7
B) RETURNING HAZARDOUS MATERIALS (HM) TO SUPPLY HAZMINCENs 7
C) EXTENDING SHELF LIFE 8
D) CROSSDECKING MATERIAL 9
E) DLA DISPOSITION SERVICES, NORFOLK 9

III. HAZARDOUS WASTE MANAGEMENT AND DISPOSAL INFORMATION 12

A) USEFUL CONTACT INFORMATION 12
B) ACCUMULATION OF HAZARDOUS WASTES – SHORE ACTIVITIES: 12
1. SATELLITE ACCUMULATION AREA (SAA) 13
2. HAZARDOUS WASTE ACCUMULATION AREA (HWAA) 14
3. UNIVERSAL WASTE ACCUMULATION AREA (UWAA) 15
C) WASTE PACKAGING REQUIREMENTS - SHIPS OR SHORE ACTIVITIES 16
D) MATERIAL / WASTE PAPERWORK REQUIREMENTS – SHIP OR SHORE 16
E) MATERIAL / WASTE TURN-IN REQUIREMENTS – SHIPS 16
F) DUMPSTER REQUEST 17

IV. MANAGEMENT OF SPECIFIC MATERIALS/WASTES 18

A) USEFUL CONTACT AND WASTE PICKUP INFORMATION 18
B) WASTE MANAGEMENT REQUIREMENTS 18
1. ABSORBENT MATERIAL 18
2. AEROSOL CANS 18
3. ANTIFREEZE 19
4. APPLIANCES/WHITE GOODS (A/C&R Equipment)– see Recycling Section 19
5. AQUEOUS FILM FORMING FOAM (AFFF) 19

I. WASTE MINIMIZATION INFORMATION

A) USEFUL CONTACT INFORMATION

– see Appendix 1.

B) WORK PRACTICES AND MATERIAL SUBSITUTION

– In an effort to reduce the generation of Hazardous Waste (HW), users of Hazardous Material (HM) should incorporate CHRIMP and the following business practices into their everyday work.

PLEASE NOTE!

When applicable, relevant technical manual guidance must be the prevailing factor in any decision to use a substitute for a hazardous material.

- **HM control and management**: Activities should adopt procedures to manage, minimize, and control the acquisition of HM. This is an excellent way to prevent waste, fraud and abuse as well as to ensure that HM is utilized prior to expiration. Having the correct amount of HM for a job and using the HM before it expires will save time and money in reduced HW. Please refer to Ref. B for specific guidance on HM Storage.

- **HM procurement through the Re-Use store:** HM may be available for no cost at the Reuse Store. Instead of bringing more HM (that must be managed in accordance with Navy guidelines) on Navy property, reuse another work center's overage. The Reuse Store is primarily located at NS Norfolk Building X-218. The Navy ERP (N-ERP) website provides Asset Visibility by Installation and Region and allows customers to see if material are available at their local HAZMINCEN for free issue or for purchase. N-ERP is a CAC enabled website so a CAC certificate is required but a login and password may not be required to check material availability. If the vessel wants a list of the Hazardous material that is carried at X-218, CHRIMP Techs can add the vessel to the distribution list.

- **HAZMINCEN Locations:**
  - NS Norfolk: Building LF-50 (Building X-218 Reuse Store)
  - NAS Oceana: Building 826
  - Fort Eustis Building 1205

  Note: NS Norfolk customers are encouraged to contact Building X-218 to confirm material availability of Reuse/SHIPR material (walk-ins are welcome).

- **Self-Help:** When working on a project, ensure that all appropriate work permits are obtained prior to starting your project. You can get free paint and other building materials for small jobs to spruce up your command at your base's Self-Help Center.

- **Process changes**: Is there a way to conduct the work without using a HM or creating a HW? The Navy is constantly testing safer, more environmentally friendly chemicals and processes. For the latest developments, call your P2 Media Manager or Naval Air Technical Data & Engineering Service Command (NATEC) representative (https://mynatec.navair.navy.mil).

- **Solvents**: Solvents can generate large volumes of HW with stringent management requirements and costly disposal. Consider replacing solvents containing methyl ethyl ketone (MEK (a.k.a. 2-butanone)), xylene, and toluene with less toxic materials such as EP-921. Clean parts requiring high purity solvents with fresh solvent and use the remaining solvent to clean other dirtier parts before replacing.

- **Material substitution**: Is there a less hazardous or more "environmental friendly" material that can be substituted for the HM? Green procurement is the purchase of **approved** environmentally preferable products and services in accordance with one or more of the established Federal "green" procurement preference programs.

- **Green Products**: Consider green products and/or services as the first choice in all procurement, including service contracts. DoN activities must purchase green products when planning to purchase products and/or services in the following categories (note that this list is not all inclusive):
    - Office products (including electronic equipment) and printing services
    - Fleet maintenance products
    - Building construction, renovation, maintenance, and janitorial products
    - Traffic control
    - Parks and recreation and landscaping services
    - Appliances and lighting

Federal green procurement preference programs

Products manufactured from recovered materials	https://www.epa.gov/greenerproducts
Environmental preferable products	https://www.epa.gov/greenerproducts
Energy efficient products	https://www.epa.gov/statelocalclimate
Bio-based products	http://www.biopreferred.gov/?SMSESSION=NO
EPA's Design for the Environment Safer Product Labeling Program	http://epa.gov/dfe/pubs/projects/formulat/formpart.html
Alternative fuels and fuel efficient vehicles	http://www.eere.energy.gov/topics/vehicles.html

To support the Green Procurement Program(GPP), Contracting and Purchasing personnel must take GPP training through Navy Schools, Defense Acquisition University, DLA's Buying Green Workshop, NAVSUP'S DON Consolidated Card Program Management Division (CCPMD) Website (https://www.navsup.navy.mil/ccpmd), and NAVFAC Environmental Compliance, Assessment Training and Tracking System(https://environmentaltraining.ecatts.com/).

Defense Logistics Agency (DLA) has developed an environmental products catalog that can be found at http://www.dscr.dla.mil/userweb/dscrld/epa/epinfo.htm. This catalog gives brief equipment descriptions, national stock numbers (NSNs), and environmental benefits of products.

- **Recycle/Reuse:** Instead of disposing of an item, is there another use for this material within your command? Can the item be recycled through the Regional Recycling Program (RRP)? If the item is not currently accepted through the Program, should it be?

The P2 media managers can assist in waste reduction efforts by identifying pollution prevention equipment and conducting process evaluations. Additional information and resources are available at Ref. C the Joint Services P2 library.

C) ***CONSOLIDATED HAZARDOUS MATERIAL REUTILIZATION AND INVENTORY MANAGEMENT PROGRAM (CHRIMP)***

In accordance with the Chief of Naval Operations (CNO) message dated 3 Jan 2003, all ships and shore installations are required to fully implement CHRIMP. All commands (ship or shore) can return excess and unused HM to the Fleet Industrial Supply Center (FISC) HAZMINCENs (see section I.B for HAZMINCEN locations). For more information please see section II.B of this guide.

D) ***REGIONAL SOLID WASTE AND RECYCLING***

- Information on Naval Facilities Engineering Command Mid-Atlantic (NAVFAC MIDLANT) Regional Resource, Recovery, and Recycling Program and other recycling programs can be obtained by contacting the Mid-Atlantic Regional Recycling Program (RRP) contact listed in Appendix 1.

- The Regional Recycling Centers are located at:
  - NS Norfolk: Building Z-309
  - NAS Oceana & Dam Neck Annex: Oceana Building 934
  - Joint Expeditionary Base Little Creek-Fort Story West: FS West Building 3661
  - NWS Yorktown and Cheatham Annex: Yorktown Bldgs. 718 & 2024

- To continue recycling in a safe and environmentally responsible manner, we need your help when preparing for delivery to the Recycling Center. It is important that you have a clear understanding of which materials are acceptable and which are not. To help you in preparing your loads and to ensure they will be accepted at the Recycling Center, the following information is provided. This does not encompass all possible items, rather it is a general list of most frequently delivered items.
  - Hours of operation are Monday-Friday 0700-1500 (no appointment necessary)
  - DD1348 required
  - No after-hours drop-off on certain turn-ins
  - For additional information contact the RRP

NOTE!

Items collected and received may change from time to time based on the commodities markets. If you find or have items not included below and you are uncertain about them, please call your installation Recycling Center.

1) Examples of materials that are recycled
   a. **Mixed stream office recycling:** All office recycling is accomplished through a mixed stream recycling method utilizing 90 gallon blue recycling bins. These bins are located in various areas in all buildings on the installation. The bins are picked up on prescheduled days and on call emergencies. All material is also accepted at all the Recycling Centers. The following materials are accepted in the blue recycling bins: white and colored paper; newspaper; phone books; plastic bottles; small cardboard containers; file folders; magazines; aluminum cans; envelopes.
   b. **Cardboard**: Flat cardboard may be placed in dumpsters marked "Cardboard Only". Cardboard is accepted at all recycling centers.
   c. **Metal Items**: Metal items may be placed in dumpsters marked "Metal Only". Metal items are also accepted at the Recycling Centers. Units with special needs should contact their Recycling Center, located on their installation.
   d. **Dock (Mooring) Lines**: All lines can be coiled, and secured to a pallet when dropped off at the Recycling Centers. (Not required at JEBLC Recycling Center.)
   e. **Drums (Metal or Plastic)**: Contact your Recycling Center before turning in empty drums/containers for special instructions. Drums containing one inch or more liquid will be rejected.
   f. **Empty Compressed Gas Cylinders**:NAVFAC MIDLANT ESD no longer accepts cylinders.
      1. Attempt first to return the CGC to the vendor.
      2. If the vendor will not accept, attempt turn-in through coordination with DLA's contract with Haas (.Cylinder Returns and Excess Turn-ins (866) 724-0932)

      If Haas will not accept, contact your HW Media Manager for disposal assistance. Disposal costs of CGCs are the responsibility of the customer.
   g. **Appliances**:
      - Useable appliances such as air conditioning and refrigeration (A/C&R) units, washers, and dryers may be turned in to DLA Distribution Services for possible resale. Contact DLA for guidance (see section II.E for details).
   - Unusable washers and dryers may be recycled.
   - Unusable AC&R units (e.g. refrigerators, air conditioners, water fountains, freezers, or any item that normally contains refrigerant), may be recycled IF:
      - All remaining refrigerant has been removed and unit is certified "refrigerant-free" by a certified technician. Contact NAVFAC-MIDLANT maintenance or your FMS to coordinate this service.
      - The run capacitors and start capacitors have been removed (a/c units).
      - The compressors have been removed (refrigerators and a/c units)
      - All oils have been removed and properly disposed of.

   h. **Motor Vehicle Parts**: Units must deliver their parts in government vehicles.
   - Engine blocks must be drained* of all fluids; oil filters and pans must be removed.
   - Transmissions must be open and drained* of all fluids.
   - Rear ends must be drained* and the plate removed.

drained oils can be turned in by calling the Environmental Services Desk (ESD)

i. **Batteries**: recyclable lead acid batteries are accepted provided they meet the following restrictions:

- Only **lead acid** batteries that are **not metal encased**. In special cases metal encased lead acid batteries may be taken by the Recycling Program depending on market conditions- contact your installation recycling manager for clarification.
- Batteries must be in good condition with caps securely in place. Batteries that are cracked or have missing caps must be disposed of as HW- contact the NAVFAC MIDLANT Environmental Services Desk (ESD) for disposal.
- The customer must deliver the batteries to the Recycling Centers in a government owned vehicle.
- All batteries not meeting the requirements listed above are to be turned over for disposal to NAVFAC-MIDLANT ESD.

j. **Toner Cartridges**: Cartridges must be placed in a clear plastic bag or in a box and sealed to prevent powder from spilling; place beside the 90 gallon Blue Recycling container for pickup.

k. **Expended Brass Casings**: All MPPEH residue (i.e., inert small arms spent brass casings .50 caliber or smaller), lead, and mixed metals or shrapnel will be turned-in to the local QRP via the NAVFAC MIDLANT QRP Hampton Roads Operations Manager or QRP MPPEH Supervisor. Please refer to COMNAVREGMIDLANTINST 5090.6 Appendix D (Installation Explosive Hazardous Waste Management Plan) for a full list of requirements regarding the management of MPPEH residue. Requirements for managing expended brass casings include but are NOT limited to the following:

- Small arms cartridge cases should be separated by metal types (i.e., steel, chrome, aluminum, brass). Under no circumstances should large .50 caliber and small .22 caliber, be mixed or co-mingled with any other size cartridge casings in the same container. They must be packed separately. Range residue, other than small arms cases, i.e. shrapnel or lead, will be placed in its own container and clearly marked.
- Expended brass casings must be managed in sealed and labeled 55-gallon drums in a facility or area where the drums are protected from the elements (i.e. rain, snow, etc.). At no time before or after certification and verification should water be allowed to enter the drums.
- Drums must be accompanied by a DD 1348-1A that includes the Generating Command/Range, Quantity, Date, Names and Signatures of personnel certifying and verifying that all shell casing are inert. (NOTE: Each shell casing requires a two-person 100% visible inspection that the shell casing is inert. QRP has been instructed to turn away expended brass that does not contain the appropriate paperwork with authorized dual signatures and certification statement.)

l. **Recycling Pallets-** For recycling pallets, tenants are responsible for transporting the pallets, whether broken or whole to a local recycling center. Broken pallets are accepted, and then sent out as recycled wood. Pallets are also available for reuse if picked up. For more information please contact the recycling manager that is responsible for your installation. Contact information is located in Appendix 1.

2) Some materials that are **<u>rejected</u> (*questions contact Recycling Manager or See Section IV)***

a. Any material containing hazardous or toxic substances, materials or waste
b. Gasoline, diesel fuel, propane or other petroleum products
c. Pressurized Cylinders and Fire Extinguishers
d. Asbestos of any kind (such as pipe insulation or surfacing materials)
e. Wire rope or cable in lengths greater than 6 feet
f. A/C&R units that are NOT certified CFC free or have run/start capacitors
g. PCB containing materials such as capacitors, ballast, and transformers
h. Fluorescent or mercury vapor lights and related fixtures
i. Radioactive materials or containers
j. Free flowing fluids of any kind
k. Dirt, debris, trash or waste of any kind
l. Food or food byproducts
m. Bedding or clothing products
n. Cooking oil or grease
o. Wood (accepted only at selected sites)
p. Yard waste
q. Tires (accepted only at selected sites)
r. Rags/Shop Towels
s. Lawn or plastic furniture
t. Speedy-Dry or absorbent materials or chemicals
u. U. Medical waste of any kind

II. HAZARDOUS MATERIAL REUTILIZATION INFORMATION

If you have excess or unused hazardous material, it is important that the following alternatives to disposal be considered. Disposal of HM should be utilized as a last resort.

- Returning to supply (HAZMINCENs) for credit or reuse
- Extending shelf-life
- Crossdecking use
- Turning in to DLA Disposition Services Norfolk (formerly DRMO)

A) USEFUL CONTACT INFORMATION

- see Appendix 1.

- **HAZMINCEN Locations:**
  - NS Norfolk: Building LF-50 (Building X-218 Reuse Store)
  - NAS Oceana: Building 826

B) RETURNING HAZARDOUS MATERIALS (HM) TO SUPPLY HAZMINCENs

If you purchase HM and determine the item is not needed, it can be returned to the HAZMINCENs for a refund or for reuse. Refunds are provided for new/unopened HM purchased from the HAZMINCEN. Please note that refunds are not given on special (non-stock) orders. FLC Norfolk also offers a Reuse Store located at Naval Station Norfolk, Building X-218. The Reuse Store will accept and issue excess or unused HM **free of charge**; however, any disposal associated with unused HM shall be funded by the customer. HM needs to be processed through HICSWIM or if it is BP-28 material, it must be processed through R-SUPPLY. HM destined for the Reuse Store can be turned in at any of the FISC HAZMINCENs across the region. To return excess/unused material, the item must meet the following conditions:

1) Material must be accompanied by 2 (two) copies of completed DD Form 1348-1A or DD Form 1348-1 created by HICSWIN (see Appendix 2 for instructions).

2) Material must be unopened and have original labels. (Partially used material may be considered for cross-decking or turned in for disposal.)

3) Container must be undamaged or minimally damaged (i.e. slightly dented) and have minimal rusting.

4) FLC Norfolk will accept Type I that has not expired and Type II shelf life material that has not been extended more than two times (see section II.C). Contact DLA Disposition Services for items that have been extended more than two times.

IF YOU HAVE MORE THAN 4 PALLETS OF EXCESS HM TO TURN-IN (SHIPS)

- Coordinate the offload/turn-in through the assigned CHRIMP Technician **24 hours** in advance of desired off-load.
- All HM leaving ships must be processed through the HAZMINCEN via HICSWIN.
- The offload procedure is as follows:
  PLANNING: Once informed of a request for an offload, the designated ship representative will contact the CHRIMP office.

REVIEWING: The CHRIMP technician will examine the items to determine what is still usable and what is excess used material.
TRACKING: Data management depends on the type of excess stock. HICSWIN will be the software used for all reuse material offloaded; R-Supply will be used for all BP-28 (Deep Stock) material offloaded. These programs have the capability to print four (4) copies of DD Form 1348-1A or 1348-1, "Material Turn-In." The 1348-1A or 1348-1 must have the ECAP acronym stamped on the document prior to turn-in.
DISPOSAL: should the HM require disposal, contact NAVFAC MIDLANT ESD services to arrange for pick-up by calling 757-341-0412/0460.

- Additional information regarding disposal procedures is detailed in Section III.

C) EXTENDING SHELF LIFE

- One of the most effective waste minimization programs that can be established is the active life-cycle management of hazardous materials before they become hazardous waste. All shelf-life material is either Type I or Type II.

- Type I shelf-life items are materials that have a set expiration date, which cannot be extended. Once this date has passed, the material cannot be used for its intended purposes and can be turned into DLA Disposition Services for resale. The containers must be unopened and in good shipping condition (no excessive rust).

- Type II shelf-life items are materials that do not have a specific expiration date. The manufacturer typically will recommend that the item be re-evaluated on a particular date. The label will usually state a "Test" or "Re-Inspect" date. Type II shelf-life items can be extended providing the material is still viable or usable. For most Type II materials, shelf-life extension tests are not complicated, do not require a laboratory, and can be done on the spot by anyone with a minimum of training (usually consisting of nothing more than visual checks for damage or deterioration). FISC Norfolk is available to assist with shelf-life extensions- please contact the HAZMINCENS for additional assistance.

- The General Services Administration (GSA) and all military services have developed separate storage standards. For example, shelf-life extension of paint can be accomplished according to the Federal Standard 793, "Depot Storage Standards". End users are authorized and encouraged to examine paint using FED-STD-793 guidelines or by using practical, end-use related tests to determine if the materials still meet their intended use. End users may extend the shelf life as long as the paint performs satisfactorily for their needs. Before disposing of paint, you are strongly encouraged to review FED-STD-793, paragraph 4. See NAVSUP P-485, Chapter 4, paragraph 4664 for further shelf-life material management guidance. For further assistance in determining if the shelf life can be extended, contact CHRIMP Technician on board or your supply officer. The best way to extend the life of all Type II materials is proper storage. For example, paints should not be stored below freezing and should be protected from rain or salt spray.

- DLA Aviation, formerly Defense Supply Center Richmond (DSCR), VA has a Quality Status List (QSL) which extends certain Type II Federal Stock Class (FSC) material. Included on the QSL are Federal Stock Classes (FSCs): 6635, 6750, 6810, 6840, 6850, 9110, 9150, and 9160. To obtain a copy of the microfiche that show the shelf-life extensions, contact DLA Aviation (see Appendix 1 for contact information).

- REFERENCES - "Shelf Life Identification Management and Control" (PIN# V805830) is a video available at any electronic media center. More information on DOD's shelf-life extension program may be found in Ref. D.

D) ***CROSSDECKING MATERIAL***

HM may be available for no cost at the Reuse Store. Instead of bringing more HM (that must be managed in accordance with Navy guidelines) on Navy property, reuse another work center's overage. The Reuse Store is primarily located at NS Norfolk Building X-218. The Navy ERP (N-ERP) website provides Asset Visibility by Installation and Region and allows customers to see if material are available at their local HAZMINCEN for free issue or for purchase. N-ERP is a CAC enabled website so CAC certificate is required but a login and password may not be required to check material availability.

PLEASE NOTE!

Prior to receiving HM from another activity, contact your Safety representative or CHRIMP Technician to ensure that the material is authorized for use. The material must be listed on your Authorized Use List (AUL) or Type Ships Hazardous Material List (T-SHML). Also your Safety representative or CHRIMP Technician can assist you in obtaining a Material Safety Data Sheet (MSDS) for the item.

E) ***DLA DISPOSITION SERVICES, NORFOLK***

- may accept material for resale that the HAZMINCENs cannot accept, even expired materials. Contact DLA Disposition Services to ensure acceptance and to arrange for the transfer of material. Requirements include:

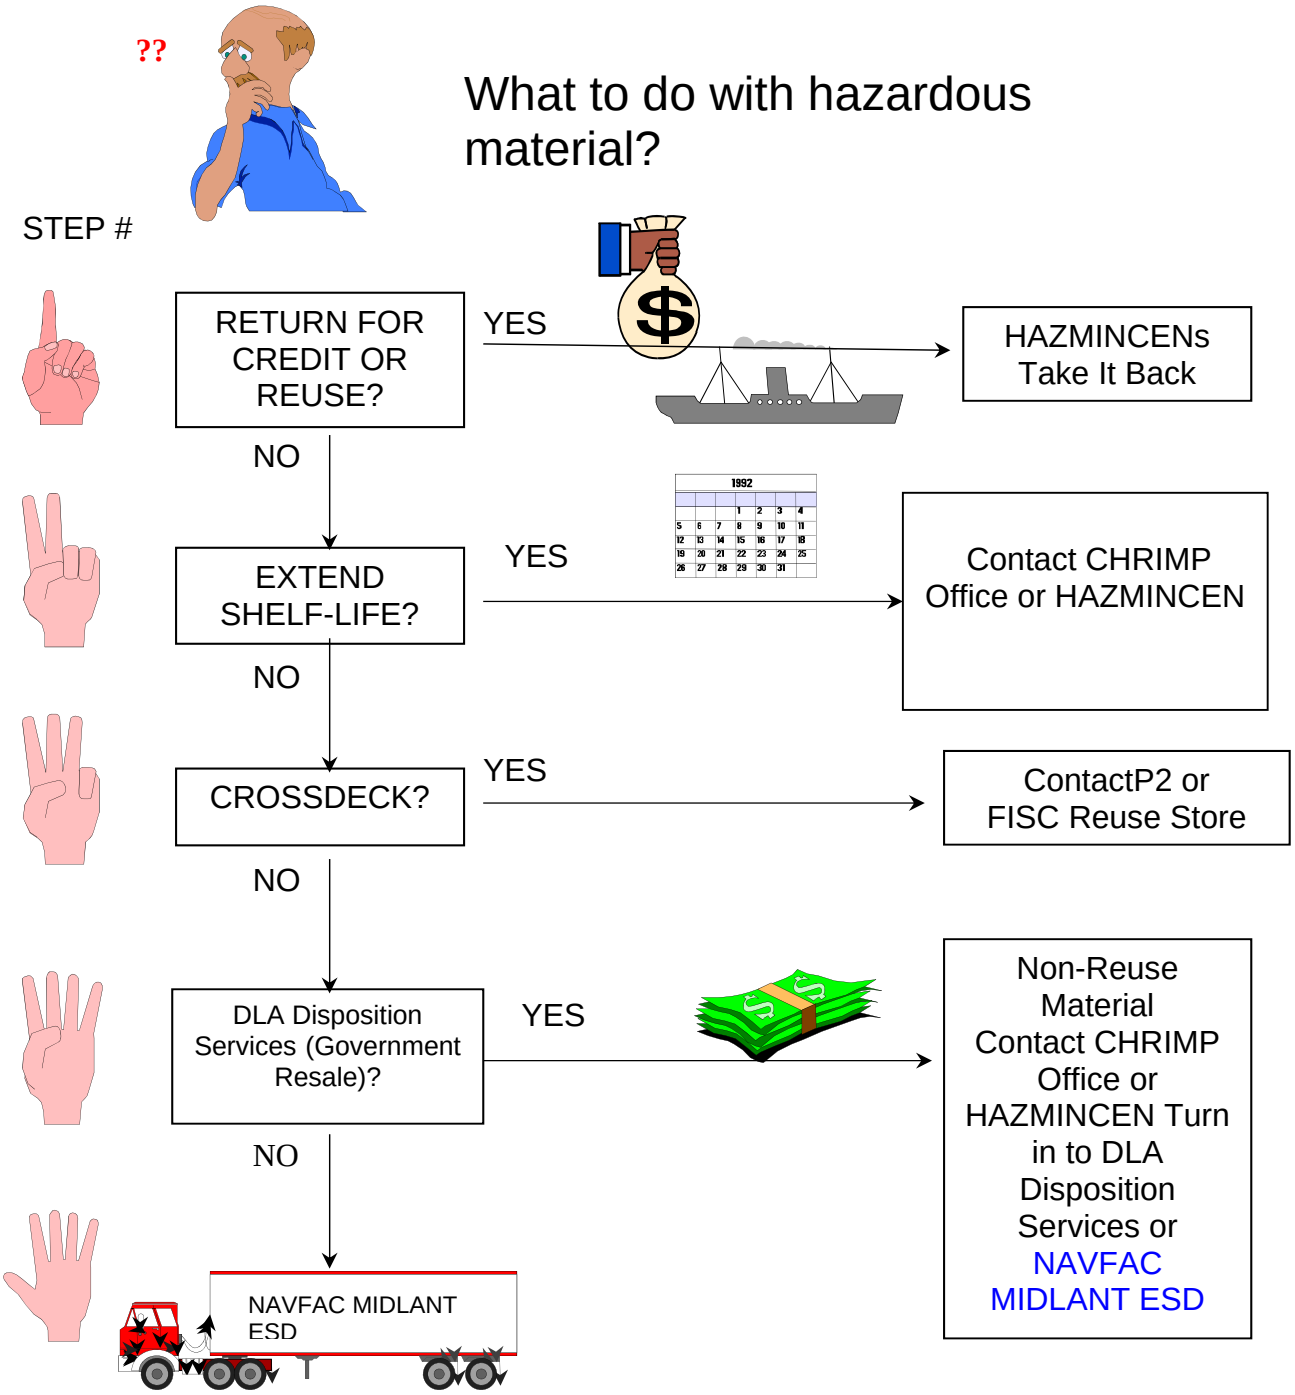
3) Containers should be in good condition-not rusted or dented
4) If kits are being turned in, all parts of the kit must be included
5) Paperwork required:
   a. Two (2) copies of completed DD Form 1348-1A, or 1348-1 created in HICSWIN for each item. (See Appendix 2 for instructions).
   b. MSDS for each item.
   c. The Occupation Safety and Health Administration (OSHA) Hazardous Chemical Warning Label must be present on the items (must be adhesive type label).
6) Examples of materials ACCEPTED by DLA Disposition Services Norfolk:
   - All flammable materials (solvents, paints, etc.)
   - All photographic chemicals
   - Corrosive material (acids, bases, etc.)
   - Used synthetic oils and used synthetic hydraulic fluids
   - Mercuric nitrate
   - Cleaning compounds
   - Greases, POLs
7) Examples of materials NOT ACCEPTED by DLA Disposition Services Norfolk
   - Oxidizers (hydrogen peroxide, emergency escape breathing devices, etc.)

- Dented or excessive rusted drums
- Open containers
- Compressed Gas Cylinders or Fire Extinguishers
- Used items that would be considered waste
- Items containing any level of polychlorinated biphenyls (PCBs)
- Any radioactive materials

If your HM is rejected, please request a 39-3U form, which provides specific information explaining why your HM was rejected. If the item was rejected for clerical reasons, make the necessary corrections and re-attempt transfer. Otherwise, contact the NAVFAC MIDLANT ESD for disposal of the item (see Section III for specific instructions).

NOTE!

As of August 27th 2014, Hazardous Waste Transporters are no longer required to have VA DEQ Permits.



NOTE- SELF TRANSPORT OF HW IS NOT PERMITTED!

Under no circumstances should HW be transported by a vehicle not authorized by NAVFAC MIDLANT Environmental. It is illegal to transport HW without meeting the required EPA and DOT training, certifications and commercial driver's license endorsements.

III. HAZARDOUS WASTE MANAGEMENT AND DISPOSAL INFORMATION

What is a Hazardous Waste?

In accordance with Ref. E, for a material to become a hazardous waste it must first become a solid waste. A solid waste is any discarded material that is not excluded by regulation. Discarded material can be a solid, liquid, or gas and is any which is:

- Abandoned
- Inherently Waste-Like (Hazardous Waste to be recycled)

A solid waste becomes a hazardous waste as defined in the Resource Conservation and Recovery Act (RCRA) when it is:

- Not excluded or exempted by RCRA (examples of wastes that are not hazardous waste due to exclusions or exemptions are scrap metal and household waste).
- A Characteristic Waste (determined by generator knowledge or testing). These include wastes that are:
    - Ignitable
    - Corrosive
    - Reactive
    - Toxic
- A Listed Waste. These include wastes specifically identified in RCRA of the Code of Federal Regulations. (ex; 2,4-Dinitrotoluene, benzene, phenol, nitroglycerine, etc.)

RCRA gives the Environmental Protection Agency (EPA) or delegated state regulatory agency the authority to control hazardous waste from "cradle to grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste.

If a HM is determined to no longer be suitable for its intended purpose and all other routes of utilization have been attempted, the last management alternative is disposal as waste. NAVFAC MIDLANT ESD, the region's HW transportation and disposal agent, will pick up HW at Hazardous Waste Accumulation Areas (HWAAs), Satellite Accumulation Areas (SAAs), Universal Waste Accumulation Areas (UWAAs) and other specified locations.

Funding for disposal of Fleet (FLT) activity's generated wastes has been established. Non-FLT activities are required to submit a valid Job Order Number (JON) when turning in waste. For assistance in establishing a job order number, contact the appropriate Hazardous Waste Media Manager or NAVFAC MIDLANT ESD or follow the procedure in Appendix 8. HW management and disposal instructions are listed below.

A) USEFUL CONTACT INFORMATION

- see Appendix 1.

B) ACCUMULATION OF HAZARDOUS WASTES – SHORE ACTIVITIES:

The EPA and the Virginia Department of Environmental Quality (VDEQ) regulate the management and disposal of HW. NAVFAC MIDLANT is the HW manager for the Navy in the Hampton Roads area. To ensure compliance, the appropriate Hazardous Waste Media

Manager must approve establishment of all HW accumulation areas **prior to use**, as well as closure of the areas **prior to the planned closure date**. In addition, the Hazardous Waste Media Manager must be informed of any issues that have the potential to affect the Navy's ability to comply with the governing environmental regulations. All HW must be accumulated in designated areas. If HM is stored in the same location as HW, ensure the areas are clearly marked to identify HM from HW. There are three main types of authorized hazardous waste accumulation areas: Satellite Accumulation Areas **(SAAs)**; Hazardous Waste Accumulation Areas **(HWAAs)**; and Universal Waste Accumulation Areas **(UWAAs)**.

1. SATELLITE ACCUMULATION AREA (SAA)

SAA PURPOSE: to allow proper management of HW as it accumulates without interfering with the work process. There are no limits on the number of waste streams that can be accumulated, but the TOTAL AMOUNT MUST NOT EXCEED 55 gallons (or 1 quart of acutely hazardous waste). Each waste stream shall be stored in a separate container and the container must be compatible with the waste being stored. If a SAA will be unattended due to unit deployment, project ending, etc., waste must be turned in to NAVFAC MIDLANT ESD and the Hazardous Waste Manager contacted to have the area shutdown two weeks in advance.

GENERAL REQUIREMENTS FOR ALL HW AREAS

- All containers must be labeled and kept closed except when adding or removing waste.
- Operators must be trained annually on proper area management and emergency response procedures.
- Areas must be identified with legible signs as a SAA with the point of contact's information, NO SMOKING, and emergency procedures and numbers.
- Areas must have adequate suitable spill control equipment to contain contents of the area should a spill occur. Spill equipment/supplies must be maintained. Follow spill reporting procedures in Appendix 3
- A fire extinguisher must be located within 50 feet of the area. An ABC type extinguisher is recommended. The fire extinguisher shall be routinely inspected in accordance with safety or fire departments requirements.
- Good housekeeping standards must be employed at all times. Keep areas orderly with adequate aisle space and clear of trash.

SAA SPECIFIC REQUIREMENTS: a SAA area must meet several criteria, including:

- Be located at or near the point of waste generation.
- Be under the control of the operator of the process that generates the waste.
- Operators must be trained annually on proper area management and emergency response procedures.
- Containers must be labeled with the words "Hazardous Waste" and the contents of the container.
- The container does not require an accumulation start date, however, if a container becomes full prior to pick up, it must be dated immediately, and moved to an approved HWAA or a permitted facility within 72 hours.
- May only store a max of 55-gal total of all HW (or 1 quart acutely hazardous waste).

SAA INSPECTIONS:
The checklist included in Appendix 5 provides a concise listing of the regulatory requirements of a SAA. It is **highly recommended** that each HW generator perform undocumented reviews of their SAA at least weekly, using the checklist. The Installation Environmental Office will perform SAA inspections at least quarterly to provide technical support, management guidance, and regulatory oversight.

SAA DISPOSAL PROCESS:
When a container is 75% full (or one quart of acute HW), contact NAVFAC MIDLANT ESD to schedule a pickup. Be sure to inform Dispatcher your area is a SAA site.

2. HAZARDOUS WASTE ACCUMULATION AREA (HWAA)

HWAA PURPOSE: to allow for the temporary accumulation of HW in preparation for transportation to a permitted treatment, storage or disposal facility.

GENERAL REQUIREMENTS FOR ALL HW AREAS
- All containers must be labeled and kept closed except when adding or removing waste.
- Operators must be trained annually on proper area management and emergency response procedures.
- Areas must be identified with legible signs as a HWAA with the point of contact's information, NO SMOKING, and emergency procedures and numbers.
- Areas must have adequate suitable spill control equipment to contain contents of the area should a spill occur. Spill equipment/supplies must be maintained. Follow spill reporting procedures in Appendix 3
- A fire extinguisher must be located within 50 feet of the area. An ABC type extinguisher is recommended. The fire extinguisher shall be routinely inspected in accordance with safety or fire departments requirements.
- Good housekeeping standards must be employed at all times. Keep areas orderly with adequate aisle space and clear of trash.

HWAA SPECIFIC REQUIREMENTS:
- Provide at least 14-days notice to the Hazardous Waste Media Manager prior to the need for a HWAA set-up to allow for area set up and timely notification to the VDEQ.
- Provide at least seven (7) days notice to the Hazardous Waste Media Manager prior to closure of a HWAA.
- Containers must be labeled with the words "HAZARDOUS WASTE", contents of the container, and the start date of when the waste is placed in the container.
- Must be inspected every seven (7) calendar days.

HWAA INSPECTIONS:
Operators of a HWAA must perform a documented inspection of their site every seven (7) calendar days and maintain those inspection records for three (3) years. The inspection is to be documented using the HWAA checklist that is included in Appendix 6. The checklist provides a concise listing of the regulatory requirements of a HWAA.

Any deficiency/violation must be corrected immediately. Deficiency corrections must be noted on the inspection sheet in the space provided. Corrective action taken, date accomplished, and initials of person performing corrective actions must be recorded.

The Installation Environmental Office will perform HWAA inspections at least quarterly to provide technical support, management guidance, and regulatory oversight.

HWAA DISPOSAL PROCESS:

At or before 45 days of accumulation, contact the NAVFAC MIDLANT ESD to schedule a pickup of the waste. If waste is not picked up by the ESD within their allotted service response time (1 week), recall the ESD immediately!

3. UNIVERSAL WASTE ACCUMULATION AREA (UWAA)

UWAA PURPOSE: to allow for the temporary accumulation of specific waste streams in preparation for transportation to a permitted treatment, storage or disposal facility.

GENERAL REQUIREMENTS FOR ALL HW AREAS

- All containers must be labeled and kept closed except when adding or removing waste.
- Operators must be trained annually on proper area management and emergency response procedures.
- Areas must be identified with legible signs as a UWAA with the point of contact's information, NO SMOKING, and emergency procedures and numbers.
- Areas must have adequate suitable spill control equipment to contain contents of the area should a spill occur. Spill equipment/supplies must be maintained. Follow spill reporting procedures in Appendix 3
- A fire extinguisher must be located within 50 feet of the area. An ABC type extinguisher is recommended. The fire extinguisher shall be routinely inspected in accordance with safety or fire departments requirements.
- Good housekeeping standards must be employed at all times. Keep areas orderly with adequate aisle space and clear of trash.

UWAA SPECIFIC REQUIREMENTS:

The current Universal Waste regulations apply to four types of widely generated HW: *batteries, pesticides, mercury-containing equipment, and lamps*. It should be noted that there is a separate recycle program for discarded rechargeable batteries and is encouraged to be utilized. Please refer to Appendix (7) for additional information. All UWAAs must adhere to various environmental regulatory requirements including:

- Containers must be labeled with the words "UNIVERSAL WASTE", contents of the container, and the start date of when the waste is placed in the container.
- A seven (7) day advance notice should be provided to the Hazardous Waste Media Manager to allow time for set up of the UWAA. For closure of a UWAA, contact the Hazardous Waste Media Manager before the planned closure date.

UWAA INSPECTIONS:

It is **highly recommended** that each generator perform monthly reviews of their UWAA using the checklist in Appendix (8).

The Installation Environmental Office will perform UWAA inspection at least quarterly to provide technical support, management guidance, and regulatory oversight. The standard operating procedure and inspection checklist for UWAAs are included in Appendix 8.

UWAA DISPOSAL PROCESS:
At or before 270 days of accumulation (9 months), prior to expiration of the one year accumulation period, contact NAVFAC MIDLANT ESD to schedule a pickup of the waste. Inform the NAVFAC MIDLANT ESD that your waste is stored in a UWAA.

C) WASTE PACKAGING REQUIREMENTS - SHIPS OR SHORE ACTIVITIES

Hazardous waste must be properly packaged in the original or an approved container. DOT requires specific packaging and training for shipment. Direct specific questions regarding container availability and packing requirements to the NAVFAC MIDLANT ESD.

NOTE! ONLY NAVFAC MIDLANT ESD OR A PRE-APPROVED CONTRACTOR IS PERMITTED TO TRANSPORT HW WASTE OFF BASE OR ON OPEN ROADS UNDER ANY CIRCUMSTANCES. IT IS ILLEGAL TO TRANSPORT HW ON PUBLIC ROADWAYS WITHOUT MEETING THE REQUIRED EPA AND DOT TRAINING, CERTIFICATIONS, COMMERCIAL DRIVERS LICENSE ENDORSEMENTS, AND PROPER SHIPPING DOCUMENTS.

D) MATERIAL / WASTE PAPERWORK REQUIREMENTS – SHIP OR SHORE

- Four completed copies of the DD Form 1348-1A, or 1348-1 created in HICSWIN, are required for turn-in of unusable HM or HW to NAVFAC MIDLANT ESD. Instructions on how to complete this form are listed in Appendix 2.
- Contact the NAFAC MIDLANT ESD at 757-341-0412/0460 and fax a copy of the completed DD Form 1348-1A, or 1348-1 created in HICSWIN, to 341-0436 prior to scheduling a pickup and to ensure prompt service.
- All four copies of the DD Form 1348-1A, or 1348-1 created in HICSWIN, are required at time of pickup. Copies are distributed as follows: client, MIDLANT driver, on container, and returned to FISC.
- For ships, one copy of the 1348-1 created in HICSWIN with the ECAP acronym stamped on the document and signed by the CHRIMP Technician is needed.
- For material that was not procured through the Navy stock system, a Material Safety Data Sheet (MSDS) is required.

E) MATERIAL / WASTE TURN-IN REQUIREMENTS – SHIPS

- Ships in local private shipyards: Ships will be provided with a POC to call to schedule a HAZMAT pickup. Contact the CHRIMP Office to initiate this action for you. Only CHRIMP Technicians are authorized to contact NAVFAC MIDLANT ESD to schedule a pickup of the waste. Allow adequate time for waste screening and quality control (QC) for CHRIMP and NAVFAC MIDLANT ESD.

- Ships at Norfolk Naval Shipyard: contact the NNSY Occupation, Safety, Health, and Environmental Office (Code 106), for assistance with HW disposal.

- Ships at Naval Weapons Station Yorktown: contact the NAVFAC MIDLANT ESD to arrange an offload.

- Ships at NS Norfolk (4 pallets or less) or JEB Little Creek (2 pallets or less): NAVFAC MIDLANT ESD offers several HW pickup points on the piers. The specific piers and pickup times are listed below. Each ship is to contact and coordinate with their assigned CHRIMP Technician. A representative from the ship must accompany the HW from the time it leaves the ship to the time it is picked-up by NAVFAC MIDLANT ESD. **Under no circumstances shall waste be left unattended or abandoned on piers**

Naval Station Norfolk Pier pickup schedule is: Monday – Friday

0800-0915	Pier 9
0800-0915	Pier 12
1000-1115	Pier 3
1000-1115	Pier 4

4 pallets or less

JEB Little Creek Pier pickup schedule is: Tuesday and Thursday

0800-0900	Pier 15
1000-1100	Quaywall

2 pallets or less

- Ships at NS Norfolk (more than 4 pallets) or JEB Little Creek (more than 2 pallets) must request and turn-in through the CHRIMP Office, the Logistic Support Representative (LSR) or the FISC Hazmat representative. Once informed of a request for off-load, the CHRIMP Technician will screen the material and determine what is still usable and what is waste. The CHRIMP Technician and NAVFAC MIDLANT ESD representatives will then coordinate the off-load. A representative from the ship must accompany the waste until it is picked up by the NAVFAC MIDLANT ESD. Under no circumstances shall waste be left unattended or abandoned on the piers. If possible, ships should utilize the pier pickup option over the course of several days instead of scheduling an offload. For special pickups, LSR or FISC Hazmat representatives do not screen unless it is known ahead of time and special arrangements are made, otherwise, call for special pickups.

PLEASE NOTE!

It is a violation of state and federal law to abandon HM/HW.

F) DUMPSTER REQUEST

- **Procedures for requesting a Hazardous Waste Dumpster-** coordinate with EV services for disposal.

IV. MANAGEMENT OF SPECIFIC MATERIALS/WASTES

A) USEFUL CONTACT AND WASTE PICKUP INFORMATION

– see Appendix 1

B) WASTE MANAGEMENT REQUIREMENTS

All waste turn-ins to NAVFAC MIDLANT ESD require four copies of the DD Form 1348-1A (for shore activities) or 1348-1 (for ships). For instruction on completing Form 1348, see Appendix 2.

A job order number (JON) is required for all environmental services. To establish a JON, follow the procedure in Appendix 9.

For items not listed below, please contact your installation Hazardous Waste Media Manager!

PLEASE NOTE!
BAGGED WASTE WILL ONLY BE ACCEPTED FOR PICK-UP IN CLEAR BAGS!
RED OR YELLOW BAGS SHALL NEVER BE USED!

1. ABSORBENT MATERIAL

- If the absorbent material was used to absorb HW or HM, it must be managed as a HW.
- If the absorbent material has been used to absorb oil, the absorbent will be managed in a similar fashion as oil. Oily absorbent materials should be fully utilized prior to disposal and must be placed in clear plastic bags and then containerized and turned in to the NAVFAC MIDLANT ESD.
- Please refer to section I for absorbent green alternatives. Using greener absorbents may increase product efficiency and reduce waste generation.
- See IV.B.28 for oily rag management.

2. AEROSOL CANS

Return unused aerosol cans to the HAZMINCEN for potential reuse. Contact your HAZMINCEN for more details. Also see the Material Reutilization Information (Section II) of this guide for additional alternatives to disposal. If the cans are rejected by the HAZMINCEN and the additional options listed in Section II of this guide are non-applicable, manage the aerosol cans as applicable below:

a. **Punctured Aerosol Cans:** Shore Tenants have the option to puncture aerosol cans using equipment approved by the Hazardous Waste Media Manager. The site POC is responsible for restricting access to the aerosol puncturer to ensure correct use. The contents of the punctured

cans must be collected and must be managed as HW: contact the Hazardous Waste Media Manager to establish the appropriate accumulation area prior to setting up the puncturing device. In addition, the MSDS should be provided to the Hazardous Waste Media Manager prior to set up of the accumulation area. Punctured aerosol cans may then be placed in Metals Dumpsters for recycling. **NOTE-Aerosol cans containing corrosives, freon, pesticides, insecticides, fungicides, chlorofluorocarbons (CFCs) or oven cleaners shall not be punctured**

THERE ARE NO NAVSEA APPROVED AEROSOL PUNCTURE DEVICES FOR SHIPBOARD USE. SHIPS ARE NOT AUTHORIZED TO PUNCTURE AEROSOL CANS!

b. **Un-punctured Aerosol Cans:** Contact the Hazardous Waste Media Manager to set up an appropriate accumulation area to manage aerosol cans. Aerosol cans must either have tops in place or nozzles removed prior to containerizing.

3. ANTIFREEZE

– is typically *managed as a non-RCRA regulated waste. Antifreeze will be managed by NAVFAC MIDLANT ESD. Contact NAVFAC MIDLANT ESD to schedule a pickup. Contact the Hazardous Waste Media Manager to determine proper disposition. Do not mix the antifreeze with solvents or metals, as the mixture could result in a hazardous waste.*

4. APPLIANCES/WHITE GOODS (A/C&R Equipment)– see Recycling Section

5. AQUEOUS FILM FORMING FOAM (AFFF)

– will be managed by NAVFAC MIDLANT ESD. Contact NAVFAC MIDLANT ESD to schedule a pickup. AFFF in original containers can be turned in to the Reuse Store (NS Norfolk Building X-218).

6. ASBESTOS

- For asbestos removal from shore command pipes, buildings, roofs, floors, ceilings, etc., contact NAVFAC MIDLANT ESD to schedule an asbestos removal or waste pick-up. Four completed copies of DD Form 1348-1A and a valid Job Order Number (JON) are required.

- For asbestos removal operations aboard ships or submarines contact the Ship Support Office.

- If you are unsure if you are dealing with asbestos, shore activities should contact the NAVFAC MIDLANT ESD and ships should contact the Navy Environmental Preventative Medical Unit #2 (NEMPU-2).

- For disposal of safes and file cabinets that possibly contain asbestos, shore commands should contact CNRMA Safety to confirm asbestos presence.

Disposal must be coordinated with your Hazardous Waste Media Manager. The safe must be double wrapped in plastic by the generator and delivered to DLA Disposition Services at St. Juliens Creek. Contact DLA to schedule an appointment and to ensure you have the proper paperwork. If transportation is required, call MIDLANT Transportation Services for assistance.

- For demolition and renovation operations, see section IV.8, entitled "Construction and Demolition Debris."

7. BATTERIES

- All batteries are not managed in the same manner. Below are the specific disposal guidelines.

- Alkaline Batteries: Alkaline batteries such as AAs, C, and D batteries can be disposed of as normal trash.

- Lead acid batteries: Lead acid batteries (car type) shall be turned into Recycling.

- Rechargeable batteries: The Call2Recycle program is designed to recycle your old, rechargeable batteries from items such as cell phones, lab tops, power tools, etc. at no costs to your facility. Rechargeable batteries that are accepted through Call2Recycle include Nickel Metal Hydride, Nickel Cadmium (a.k.a. NiCd or NiCAD, Lithium Ion and Nickel Zinc. Contact your HW Media Manager to set up your own program if the above batteries are present or need additional information (See Appendix 7).

- All other batteries: Such as lithium, NICAD, mercury, lithium sulfur dioxide, and magnesium dioxide, shall be managed as Universal Waste in accordance with Section III.B.3. The batteries will be packaged to prevent shorting, (i.e. one battery to one Ziploc bag or terminals taped over). Contact NAVFAC MIDLANT ESD to schedule a pickup.

8. BONDECOTE TENT DISPOSAL

- Disposal of Bondecote Tents will go through DLA Disposition Services (formerly DRMO). POC can be reached at (445-4077.)

9. CONSTRUCTION AND DEMOLITION DEBRIS

- Building materials from demolition or renovation operations which are suspected to contain lead, asbestos and/or other regulated waste should be characterized with representative sample(s) of the entire waste stream tested prior to disposal. Contact the Hazardous Waste Media Managers for specific guidance prior to project initiation and during the planning phase to ensure proper management and disposal. NAVFAC MIDLANT ESD is required to sign all manifest prior to off-site shipment. For safety-related issues, contact the Regional Safety Department or your command's Health and Safety official.

REMEMBER: IMPROPER MANAGEMENT AND DISPOSAL OF HAZARDOUS WASTE VIOLATES STATE AND FEDERAL LAWS.

10. CALCIUM HYPOCHLORITE and SODIUM HYPOCHLORITE

- are highly unstable (i.e.,strong oxidizers), and corrosive chemicals. There have been several instances when improper storage and handling of these chemicals has resulted in fires. In addition exposure can cause extreme damage to the skin and eyes.

Handle Hypochlorites carefully. Do not allow these containers or any packaging material to become wet. Store in compatible containers off the ground so that the containers do not come in contact with a wet floor. Inspect containers for physical integrity, notify ESD if you have any containers that are physically damaged so that they may be repackaged and disposed of promptly. Do not allow these chemicals to come in contact with combustibles such as swept material from the floor, oily rags, etc. Follow the directions specified in the Safety Data Sheets (SDS) for appropriate handling and in the event of a spill. Consult Safety and your HW Media Manager for additional information.

11. CONTRACTOR PROJECTS

– For all waste generated onboard a Naval installation, it is the liability and responsibility of the Navy to ensure proper management and disposal. Specific arrangements for transportation and disposal of the waste vary by contract. Please contact your HW Media Manager for questions related to waste generated during contracted projects prior to project initiation and during the planning phase to ensure proper management and disposal. NAVFAC MIDLANT ESD is required to sign all manifest prior to off-site shipment.

12. COOKING OIL

Used cooking oil/grease can be recycled. Do not mix hazardous materials (i.e. solvents/paints) with cooking oil or grease. Do not dispose of cooking oil or grease in trash dumpsters or any drains.

At NS Norfolk there are three 300-gallon containers available for the collection of used cooking oil/grease. The containers are located at the heads of Piers 3, 10, and 14. The collection containers are located near the trash and metal only dumpsters. *Do not store pallets of cooking oil against buildings, instead store them near the dumpster(s). If questions exist regarding the use of these containers, contact the Hazardous Waste Media Manager.

At JEB Little Creek, grease should be managed in pier-side containers or in appropriate containers at food locations.

13. CREOSOTE TIMBERS

Creosote Timbers are currently NOT being recycled. Contact your Hazardous Waste Media Manager for disposal assistance.

14. CYLINDERS – (Compressed Gas Cylinders – CGC)

NAVFAC MIDLANT ESD no longer accepts cylinders.

1. Attempt first to return the CGC to the vendor.
2. If the vendor will not accept, attempt turn-in through coordination with DLA's contract with Haas (.Cylinder Returns and Excess Turn-ins (866) 724-0932)
3. If Haas will not accept, contact your HW Media Manager for disposal assistance. Disposal costs of CGCs are the responsibility of the customer.

15. DESICCANTS

Some desiccants may be disposed of as solid waste; contact your HW Media Manager for disposal requirements.

.

16. ELECTRONIC WASTES (E-WASTES)

– Coordinate disposal of E-Waste with respective installation solid waste manager listed in Appendix 1.

17. EXPLOSIVE WASTES

– for all ammunition explosive waste or waste classified by the DOT regulations as explosive the NOSSA-MMRAT-2.0-Military Munitions Rule Awareness Training Course will be required and is provided online through Naval Education and Training Command. Please contact your HW Media Manager for additional information to gain access to the training module.

18. FIRE EXTINGUISHERS

– NAVFAC MIDLANT ESD no longer accepts fire extinguishers. Contact your HW Media Manager for disposal requirements.

19. FLARES

- Unused/ Unwanted Flares will be shipped as hazardous material.

Ship to:
W25G1R
Letterkenny Munitions Center
RTE 997, Voelz Gate
Chambersburg, PA 17201-4150
MARK : ***FOR WOODY PIKE***

20. FLUORESCENT / OTHER LIGHT BULBS

- Fluorescent light bulbs (green-tip* and silver-tip), compact fluorescent bulbs, high intensity discharge, neon, mercury vapor, high pressure sodium, and metal halide bulbs are to be managed as Universal Waste. Please contact your HW Media Manager for guidance. * Low mercury bulbs, often referred to as **"Green tip" bulbs still contain low levels of mercury and shall be managed as Universal Waste.**

- Except at JEB Fort Story, all tube fluorescent light bulbs will be turned into the Self-Help Facility (one for one exchange) or managed as a universal waste in accordance with Section III.B.3. All other bulbs shall be managed as a universal waste and then turned in via 1348 to the NAVFAC MIDLANT ESD.
- At JEB Fort Story,EV services no longer is sending an employee over on Tuesdays to collect bulbs. EV services requires the tenant to submit a 1348 for pickup.
- Afloat commands- turn in via pier-side pickup (see Section III.C).

- PCB-containing fluorescent light ballasts are to be turned into NAVFAC MIDLANT ESD as PCB waste. To schedule a pickup call NAVFAC MIDLANT ESD. Any non-PCB fluorescent light ballasts can be turned in to RRP.

PLEASE NOTE!

Fluorescent light ballast that do not possess the marking "PCB free" are to be assumed to contain PCBs and should be managed accordingly.

21. FUEL FILTERS (OIL, JP-5, DIESEL AND GASOLINE)

- **Gasoline/JP-8 Filters, due to ignitability, shall be managed as hazardous waste.** Contact your HW Media Manager prior to generating gasoline filters for guidance.
- **JP-5, Diesel, and other Oil Filters**
  - Drain for a minimum of 72 hours to remove liquids (when cold draining filters, puncturing the top can aid in removing oil from filter)
  - Double bag drained filters in clear plastic bags (no more than 10 in one bag), and place in the trash or turn over to NAVFAC MIDLANT ESD or NAVFAC MIDLANT Oil Recovery for disposal.

22. HEPA FILTERS

HEPA filters from indoor firing ranges may contain lead and other particulates. Prior to a filter change out contact your HW Media Manager for proper staging of the filters and assistance in characterization for disposal.

23. INDUSTRIAL WASTEWATER

depending on the wastewater characteristics and facility permit requirements, some wastewaters may be treated at the Navy's Industrial & Oily Wastewater Treatment Plants (IWTPs) or will have to be disposed of off base via DLA. Do not mix industrial wastewater with any other wastes. For more information and assistance in disposing of industrial wastewasters contact your Water Media Manager.

24. LEATHER ITEMS

Leather materials generated from activities occurring in maintenance and welding shops, laboratories, and aboard ships shall be managed as hazardous waste and

turned into NAVFAC Environmental Services for proper disposal. This includes but is not limited to leather gloves, boots, and various PPE. Should an installation tenant or command require an accumulation area for the storage of such leather material, please contact your installation's hazardous waste media manager.

Leather materials generated from office spaces, including but not limited to chairs and sofas, will be turned into DLA for proper management. Should DLA not accept this material, please contact your installation's hazardous waste media manager for proper guidance.

25. LOW LEVEL RADIOACTIVE MATERIAL

(ex: smoke detectors, Tritium EXIT signs, Radium gauges & dials, some watches and compasses) is disposed of through the Radiological Support Office (RASO). LRWW must remain at the site of generation and must be disposed of by the RASO office. To coordinate disposal of these items, contact RASO with the following information:

- Manufacturer Name, Trade Name, and Model Number
- National Stock Number (if applicable)
- Radiological Hazard (if known) and Amount (if known)
- Quantity of each
- Location of Items

**********LLRW shall not be turned into the ESD at any time. **********

26. MEDICAL / BIO-HAZARDOUS WASTE OUTSIDE OF MEDICAL FACILITIES

- RMW is any solid waste that is suspected by a health care professional of being capable of producing an infectious disease in humans. Specifically, RMW includes cultures and stocks of microorganism and biologicals that are pathogenic to humans; human blood an body fluids; tissues and other anatomical wastes; sharps such as syringes, suture needles and scalpels; animal carcasses, parts and bedding from animals intentionally infected with organism pathogenic to humans; any residue resulting from a spill of RMW; and any solid waste mixed with RMW.

- In the event of an emergency and/or incident that generates a medical/bio-hazardous waste, tenants should contact their Facilities Management Specialist who will arrange for the proper management and disposal of this waste stream.

- Please contact your Hazardous Waste Media Manager if you have any questions regarding medical/bio-hazardous waste.

27. METHYL ETHYL KETONE PEROXIDE

Due to the reactive nature of this material and its high disposal costs; MEKP will be issued in either 1-ounce resin kits (NSN 6810-01-452-3268) or 2-ounce resin kits (NSN 6810-01-452-3273). Every attempt should be made to completely consume the accelerant (MEPK) in the process. To dispose of unusable quantities of MEKP, contact the NAVFAC MIDLANT ESD at for guidance.

28. OBA (OXYGENATED BREATHING APPARATUS) CANISTERS / EEBD (EMERGENCY ESCAPE BREATHING DEVICE) / NUCLEAR / BIOLOGICAL / CHEMICAL (NBC) FILTERS

Contact the NAVFAC MIDLANT ESD to arrange a pickup. The OBA canisters, EEBDs, and NBC filters need to be kept in the original packages. Do not attempt to disassemble the original packages.

29. OIL, USED

- **Used petroleum based** oils can be recycled. Label the container with the words **USED OIL**. Contact NAVFAC MIDLANT ESD for further instructions or to schedule a pickup.
    - At the point of generation it is acceptable to consolidate the following **petroleum-based** products Used Oil, Used Hydraulic Fluid, Used PD-680 Type II, or Used JP-5 in the same container.
    - **Mixtures of Used Oil and Used Gasoline or MoGas are prohibited and must be managed as HW.**

- **Used synthetic based oils** cannot be recycled and must be turned in to NAVFAC MIDLANT ESD. **Do not** mix synthetic oils/fluids with petroleum products and note synthetic on the container.

- **Ship Generated Oily Waste:**
    - **Acceptable Oily Wastes-** Non-contaminated bilge, ballast, and ship's fuel tank cleaning wastes, including butterworthing rinse water, may be disposed of as oily waste.
    - **For all other oil containing wastes**, contact the Water Media Manager who will determine proper disposal procedures.
    - **Ensure no contaminants** have entered the bilge water or oily waste.
    - **Unacceptable contaminants include**, but are not limited to: Aqueous Film Forming Foam (AFFF); sewage (black water and gray water); HM and HW; JP4, AVGAS, MOGAS, and gasoline; boiler cleaning wastes; anti-freeze; and FSII (Fuel System Icing Inhibitor).
    - **Oily Waste Transfers During Night Hours** (between sunset and sunrise) are not normally permitted due to reduced ability to immediately detect a spill; inability to determine amount and spread of a spill; and the need to recall and fund oil clean-up personnel. Approval for ships to discharge oily waste after dark must be obtained from the CO of the appropriate installation by phone call to the local Port Ops Officer. The following additional requirements must be in place:
        1. Extra Topside Safety Watches stationed at the discharge station and on the pier or SWOB to monitor the water for any oil sheens;
        2. Oil spill clean-up equipment on hand;
        3. Adequate lighting erected; and
        4. The Chief Engineer will be on board to supervise the evolution.
    - **AT NAVSTA Norfolk**
        1. Piers are equipped with oily waste collection piping and risers for off-loading bilge water and non-contaminated oily wastes. NAVFAC MIDLANT's Ship Support Office (SSO) will coordinate connections

and disconnections to the collection system through LOGREQS. To ensure adequate resources are available to respond in the event of a system casualty, discharges to the system are only permitted during daylight hours during the regular workweek.

2. Vessels must have a 2.5 in. male camlock fitting on their oily waste overboard discharge connection in order to connect. Vessel connections will be scheduled by SSO to occur approximately 24 hours after arrival. Following connection to the system, the vessel must check for leakage from the hose and connections by flushing the hose with seawater for 5 minutes. A "T" adapter is available from NAVFAC MIDLANT, which will allow use of a 1.5 in. fire hose to flush the hose. Disconnection from the system will occur approximately 48 hours before vessel departure. Prior to disconnection, the vessel must flush the hose with seawater for 10 minutes to remove residual oil. The vessel is responsible for lowering the hose to the pier and walking the residual seawater in the hose into the pier riser. If the vessel was issued a "T" adapter, the adapter must be returned to NAVFAC MIDLANT.
3. Individual off-loads of greater than 50K Gallons, or discharge rates greater than 200 gpm, must be coordinated through SSO to ensure the pier collection system capacity is not exceeded. It is the responsibility of vessels to periodically observe the connections and hose and to report any unusual conditions that may occur.
4. If the pier side collection system is nonoperational, NAVFAC MIDLANT SSO will arrange for collection services via a contractor or NAVFAC MIDLANT Oil Recovery Tanker Truck, square/FRAC tank, or SWOB. If the vessel uses their shipboard oil water separator, NAVFAC MIDLANT SSO will coordinate pick-up of oil from the shipboard used oil tanks.
5. Do not discharge viscous oils in to the discharge lines, this has been shown to cause failures (fuel spills).

- **At JEB Little Creek-Ft. Story**: The Ship Support Office (SSO) provides oily waste collection and handling services. For emergency requirements outside normal working hours, contact JEB Little Creek Port Ops.

- **At WPNSTA Yorktown/Cheatham Annex**: If possible, oily waste should be off-loaded before arrival. If off-load at the facility is required, approval by the Installation Commanding Officer prior to off-loading must be obtained and NAVFAC MIDLANT Oil Recovery should be contacted for disposal.

30. PAINTS

- **Empty paint can:** is defined as an original paint can that is free of liquids and contains less than 1 inch (or 3% by volume) of dried material.
  - Metal paint cans that meet this standard can be placed in dumpsters marked “metal only”; plastic cans should be placed in solid waste dumpsters.

  - **Paint cans that DO NOT meet this standard must be managed as HW and turned in to NAVFAC MIDLANT ESD for disposal and must not be allowed to air dry.**

- **Unused/unopened containers of paint**: should be returned to the HAZMINCEN for potential reuse. **Keep containers closed; do not allow to air dry.** Please see the Hazardous Material Reutilization Information section of this guide for more information and additional alternatives to disposal. If the cans are rejected by the HAZMINCEN, the items will be managed as a waste; follow the procedure listed below:
  - Liquid or solidified oil-based paint: is to be managed as a HW and properly labeled. Contact NAVFAC MIDLANT ESD to schedule a pickup. Excess un-used paint should be accumulated separately from solvent waste.
  - Oil-Based Paint/Solvent related items: such as brushes, rags, and rollers shall be managed as HW. *Immediately containerize and keep containers closed at all times. Air drying is prohibited.
  - Water-based (latex) paint: is to be managed as non-regulated. Properly label the container and Contact NAVFAC MIDLANT ESD to schedule a pickup. Keep cans closed. Air drying is prohibited.
  - Water Based (latex) Paint Debris: such as brushes, rags, and rollers will be managed as non-regulated and can be disposed of as solid waste.

31. PAPER SHREDDING

- Commands are responsible for transporting to/overseeing the shredding activity at Z-312. The cost is around $8/bag. Please contact the manager listed in Appendix 1 to schedule shredding services.

32. PARTWASHERS

- Parts washer units utilize various substances such as solvents to remove dirt, lubricants, and other foreign particles from equipment components. When this solvent becomes contaminated to the point where it must be replaced, contact your HW media manager to ensure proper waste characterization.
- If your operations change, contact your HW media manager to ensure proper waste characterization.
- Do not assume that an environmentally friendly cleaning agent will not produce HW. Waste characterization depends on factors including what is being cleaned. Contact your HW media manager to ensure proper waste characterization.
- HW solvent must be turned in to NAVFAC MIDLANT ESD for disposal.
- For units maintained by a private company (i.e. Safety Kleen), contact your HW media manager to ensure proper waste characterization and disposal. Prior to off-site shipment of this waste, information about the waste must be provided to NAVFAC MIDLANT ESD and a representative from the ESD must be present to sign the Hazardous Waste manifest.

33. PEST MANAGEMENT CONTROL

Contact NAVFAC MIDLANT ESD for Pest control services.

34. POLYCHLORINATED BIPHENYL (PCB)

PCBs were domestically manufactured from 1929 until their manufacture was banned in 1979. They have a range of toxicity and vary in consistency from thin, light-colored liquids to yellow or black waxy solids. Due to their non-flammability, chemical stability, high boiling point, and electrical insulating properties, PCBs were used in hundreds of industrial and commercial applications including electrical, heat transfer, and hydraulic equipment; as plasticizers in paints, plastics, and rubber products; in pigments, dyes, and carbonless copy paper; and many other industrial applications. The most common trade name is Aroclor. Askeral may also be present and requires specific testing. Although no longer commercially produced in the United States, PCBs may be present in products and materials produced before the 1979 PCB ban. Products that may contain PCBs include:

- Transformers and capacitors
- Other electrical equipment including voltage regulators, switches, reclosers, bushings, and electromagnets
- Oil used in motors and hydraulic systems
- Old electrical devices or appliances containing PCB capacitors
- Galbestos siding
- Fluorescent light ballasts (not green tips)
- Cable insulation
- Thermal insulation material including fiberglass, felt, foam, and cork
- Adhesives and tapes
- Oil-based paint
- Caulking, plastics, carbonless copy paper, floor finish

If you have items for disposal that you believe may contain PCBs, please contact NAVFAD MIDLANT ESD for guidance on disposal.

PCB-containing fluorescent light ballasts are to be turned into NAVFAC MIDLANT ESD as PCB waste. To schedule a pickup call NAVFAC MIDLANT ESD. Any non-PCB fluorescent light ballasts can be turned in to RRP.

PLEASE NOTE!

Fluorescent light ballast that do not possess the marking “PCB free” are to be assumed to contain PCBs and should be managed accordingly.

35. PRESSURE TREATED LUMBER

- Pressure treated lumber is currently being disposed of via landfill. Contact your Hazardous Waste Media Manager for disposal assistance.

36. RAGS / SHOP TOWELS/CLOTH ABSORBENTS

- **Oily Rags:** Place the rags in clear double plastic bags and label as "Used oil rags". Each bag should contain less than 35lbs. Two completed copies of DD Form 1348-1A, or 1348-1 created in HICSWIN, for each item are required for turn-in.
  - o **At Naval Station Norfolk*: Oily rags can be taken to the NAVFAC MIDLANT Oil Recovery located at Bldg. Q-50 Monday-Friday from 0700-1530.
  - o **At Naval Weapons Station Yorktown*: Oily rags can be taken to Building 2035 on Tuesdays and Thursdays from 0730 to 0900.
  - o *At *JEB Little Creek* and *NAS Oceana*, contact NAVFAC MIDLANT ESD at 341-0412/341-0460 to schedule a pickup.
- **Hazardous Waste (HW) Rags**: Rags that have been contaminated with HM/HW, such as MEK (a.k.a. 2-butanone), gasoline, solvent or paint thinner must be managed as HW and properly labeled. Contact NAVFAC MIDLANT ESD to schedule a pickup. Do not transport rags that are considered hazardous waste. *Immediately containerize and keep containers closed at all times. Air drying is prohibited.

- **Shop Towel Laundering Service:** The current Navy Shop Towel Afloat/Ashore Management Program (STAMP) contract for the Mid-Atlantic/Northeast Region; N00189-07-D-Z010 is available on the DENIX Website at https://www.denix.osd.mil or from the Rag Recycling Contract Administrator. Note: All Naval vessels in port and shore activities are covered by this STAMP contract.

  The current shop towel contract requires the customer to either use shop towels provided by the contractor or to own their own towels and have the contractor wash them. In the first scenario, the local contractor delivers an agreed upon quantity of towels to ship. On a schedule that has been agreed-upon, the contractor picks up soiled shop towels and replaces them with clean towels. The ship is then billed for the towels washed as well as the towels that are lost/missing. In the second scenario, the ship/government buys shop towels and has the contractor pick them up on an agreed-upon schedule and bills the ship for the cost of washing. To obtain further assistance, contact your CHRIMP Technician or the Rag Recycling Contract Administrator.

  The P2 Program may be able to provide 55-gallon-drum mounted wringers and small table top wringers that remove free liquids in rags, allowing for additional uses. P2 equipment is also available at DLA free of charge. For more information, contact the P2 Media Managers.

37. RAILROAD TIES

Railroad Ties must be sent to a permitted landfill for proper disposal. Disposal must be coordinated with the Regional Solid Waste & Recycling Program who will arrange for a dumpster. Railroad ties shall not be placed in regular solid waste dumpsters. Railroad ties *may not* be recycled, but they *may* be reused on a case by case basis.

38. REGULATED FOREIGN GARBAGE (FOREIGN FOOD WASTE)

- Regulated Garbage (Foreign Food Waste) includes, but is not limited to, food scraps, table refuse, food wrappers or packaging materials and other waste material from stores, food preparation areas, crews' or passengers' quarters and from aircraft or ships generated during international travel. Regulated Garbage also means meals and other foods that were available for consumption by passengers or crew on an aircraft but were not consumed. Plastic disks or plastic waste contaminated with foreign source food and garbage will be managed as Regulated Garbage.

GENERAL

- All Regulated Garbage is to be bagged, labeled with the words "Regulated Garbage" and placed in the Regulated Garbage container.
- Only Regulated Garbage and any item comingled with Regulated Garbage are to be placed into the container.
- All offloads of Regulated Garbage must be logged onto the Foreign Garbage Tracking Log. This form must be faxed or emailed to NAVFAC Integrated Solid Waste Management (ISWM), (757-341-0066/theresa.j.arnold@navy.mil).
- **ALL** Regulated Garbage must be removed from the installation within 72 hours of placement in the Regulated Garbage Container. NAVFAC ISWM will coordinate removal of the container by Stericycle, Inc.
- The seal and door on the Regulated Garbage Container must remain closed unless adding waste.
- For spills, contact the Emergency Communications Command at the respective installation. Spiller will be responsible to perform initial clean-up.
- EV Services will responsd to spills at Navy Installations in Hampton Roads and perform required decontamination.
- The Tracking Log, Fact Sheet and Training presentation are available on the Portal at http://www.navfac.navy.mil/navfac_worldwide/atlantic/fecs/mid-atlantic/about_us/environmental_norfolk/environmental_compliance.html

VESSELS:

- Port Operations, on behalf of the ship, contacts NAVFAC ISWM to order a container prior to ship's arrival. Port Operations will place the container near the ship at the pier.
- The Ship's designee will accompany the CBP inspector during the on-board inspections prior to off-loading Regulated Garbage. The CBP Inspector will determine which food items are to be managed as Regulated Garbage.
- Ship's crew collects all Regulated Garbage in 3 mil plastic bags, labels the bags and places them in the Regulated Garbage container located near the ship at the pier.
- **ALL** food wastes generated within the first 24 hours after arrival must be placed in the Regulated Garbage container.

AIRCRAFT (Naval Station Norfolk and Naval Air Station Oceana)

- Commercial: Jet Services collects Regulated Garbage in 3 mil plastic bags and places in the Regulated Garbage container at the respective locations, LP-210 (Naval Station Norfolk) or Bldg. 3050–North Pad (NAS Oceana).
- Military: Military Crew collects Regulated Garbage in 3 mil plastic bags and places in the Regulated Garbage container at the respective locations.

39. SILVER / SILVER RECOVERY UNITS

Solutions used in silver recovery units (i.e. photography shops, weapons x-ray, dental or hospital/ship X-ray rooms) may require management as a HW. Contact the HW Media Manager for guidance on the management of these units.

40. SOIL GUIDANCE

Soil cannot be removed from construction sites without NAVFAC MIDLANT Environmental Office authorization. This also includes any soil/debris removed from stormwater drainage structures. Any movement of soil/fill material outside of project boundaries, meaning both soil brought onsite and soil from the site relocated to other areas, must be coordinated with the installation Hazardous Waste and the Pest program managers to ensure proper characterization, which may require testing, and environmental compliance. If the excavated soil is going to be reused in the construction site (i.e. for grading), no characterization is required. However, if obvious signs of contamination are observed (free product, staining, odors, etc.) the hazardous waste media manager should be contacted prior to reuse. Any soil that cannot be reused will need to be characterized prior disposal. Contact the HW Media Manager for additional information.

Soil should be stored in a manner that prevents rain from infiltrating the soil matrix and preventing any runoff into the surrounding soil or pavement (e.g. store the soil over and under plastic sheets surrounded by hay bales or in lined, covered dumpsters).

Soil to be used in IR sites

In order to use fill on a Navy Environmental Restoration site, it first must be sampled and analyzed for the following constituents:

TCL VOCs: EPA SW-846 8260B
TCL SVOCs: EPA SW-846 8270C
TCL Pesticides/PCBs: EPA SW-846 8081B_8082A
Total Metals: SW-846 6010 or 6020 (Total Analyte List)
Cyanide: SW-846 9012B
TPH: SW-846 METHOD 5035/8015B

The sample results must be reviewed and approved by the Environmental Restoration Program Manager before the fill maybe used on an Environmental Restoration site.

41. SOLVENTS (i.e. PD-680/Acetone/Alcohols etc.)

All Solvents shall be turned in to the NAVFAC MIDLANT ESD for disposal as HW. Ensure containers are kept closed at all times.

42. SPENT BLAST MEDIA

Spent blast media from blast booths or gloves boxes have the potential for recycling instead of disposal. Ensure blast media is reused/recycled within the blast booth/glove box until it is no longer feasible prior to disposal. Properly label waste container and contact NAVFAC MIDLANT ESD to schedule a pickup.

- Initiate conversation with your blast media supplier to investigate the potential of a take back or recycling program. Contact the installation HW Media Manager for guidance and assistance.

43. TETRAHYDROFURAN (THF)

THF is a chemical that is commonly used as a softener, cleaner, and a bonding enhancer for fiberglass, plastic and rubber, and may be found in such things as boat repair kits. THF degrades by auto-oxidation into crystalline form over time or if exposed to air for a time and presents an explosives risk. THF in crystal form is **highly unstable** and must be disposed of as an emergency response using detonation by EOD or a qualified contractor.

For any THF material, whether still in liquid form or crystallized, notify your base Safety and the Hazardous Waste Media Manager for proper disposal. **Do not** attempt to open, move, or transport the material until it can be properly assessed for continued use/storage/disposal. Targeted NIINS may include item 01-271-4835 and item 01-339-3640.

44. UNKNOWNS

If you discover an unknown waste, please contact your HW Media Manager for guidance.

45. X-2 OR X-3 MATERIALS (CHEMICALS & RESINS)

X-2 and X-3 materials must be de-militarized prior to disposal. Ships need to contact the item manager to receive de-militarized instructions. NAVFAC MIDLANT ESD will also provide this service for an additional cost. Contact NAVFAC MIDLANT ESD to schedule a pickup.

PLEASE NOTE:

To ensure proper handling, on the 1348-1A indicate the items are X-2 or X-3 material.

APPENDIX 1: POINTS OF CONTACT

Hazardous Waste and Pollution Prevention Media Managers

Director	341-0400
Hazardous Waste Media Manager By Installation	
Naval Station Norfolk, Craney Island	341-0478
St. Julien's Creek Annex, Southgate Annex, Scott Creek Annex,	341-0404
Joint Expeditionary Base Little Creek – Fort Story	341-0403
NAS Oceana, Dam Neck Annex, Fentress, Dare County, Northwest	341-0409
NWS Yorktown, Cheatham Annex, New Kent, NMCP	341-0402
Senior Program Manager-All sites	341-0408
Environmental Pollution Prevention Media Managers	341-0405 and 341-1021

Installation Environmental Compliance Departments

Joint Expeditionary Base Little Creek – Fort Story	
Director	462-5350
Lead Environmental Protection Specialist	462-5361

APPENDIX 2: INSTRUCTION FOR DD FORM 1348-1A, or HICSWIN DD FORM 1348-1

http://www.dispositionservices.dla.mil/turn-in/usable/dd1348-1a.pdf

I. GENERAL SAFE HANDLING GUIDANCE

1. Segregate material according to Federal Stock Class (FSC), compatibility and container size.
2. Segregate used from unused HM/HW.
3. Place leaking HM in appropriate salvage containers (5, 55, or 85 gallon).
4. Properly complete four copies of DD Form 1348-1A or HICSWIN 1348-1 for all waste turn-ins. Fax one copy to MIDLANT Environmental Services Desk (FAX: 341-0436) as follows:

II. REQUIREMENTS FOR DOCUMENTATION

NAVFAC MIDLANT, DRMO, & FISC require the following information on DD form 1348-1a, or Form 1348-1 created in HICSWIN**:**

Block:
02. Activity generating the waste, (Ex. Building # or Command/Ship & Hull #).

03. Activity accepting the waste (Ex. MIDLANT, DRMO, FISC, or UIC, etc.)

Mark for “DISPOSAL,” “RECYCLING,” “REUSE,” ”MIDLANT,” “DRMO,” FISC,” etc.

Generic name of product (listing any known contaminants).

18. Type of container (Ex. 55 gallon, 5 gallon, 10 -lb. Box)

19 (or 25-29) Number of containers

Total Weight of Shipment (May leave blank if turned into MIDLANT, they will weigh the materials MIDLANT takes custody of.)

Unit Identification Code (UIC) Number.

FSC and NIIN (The National Stock Number). Include the manufacturer.

Open Area Additional data - Enter MSDS or profile number, if known.

Open Area Job Order Number (JON) (required for non-FLT activities)

Open Area A point of contact (who has knowledge about the process that generated the waste) and phone number and email address.

Open Area Indicate that waste is from a SAA or HWAA and include date of oldest drum.

Open Area All activities not using HICSWIN, list the process that generated the waste, (Ex. Painting, degreasing, etc.)

Open Area Words “Approved for transfer” and a qualified signature

Open Area FISC ECAP stamp approval noted.

In addition to the general requirements, MIDLANT upon receipt of materials will add the following information:

Open Area Unique drum control number or barcode

MIDLANT will sign for custody of material (one copy return to client)

MIDLANT will enter date of acceptance.

For off-site transportation only:

MIDLANT will enter the DOT proper shipping name, UN or NA code, packing group, and EPA codes when appropriate.

When appropriate enter weight.

Open Area Emergency Response Guide number

In addition to the general requirements listed above, DRMO also requires the following information:

Boxes 52-53 Fund Code (Command Specific)

65-66 Demilitarization Code

74-80 Unit Price

Open Area DOT Certification statement: "The HM is packaged in containers as prescribed in DOT HM Regulations 49 CFR parts 170-189." Please note that original containers meet this certification.

NOTE: Range residue must have a signed NOSSA statement on the 1348 for EV services to accept it. OP 5 Volume 1 Seventh Revision 13-15.5.1.3.c
"The material listed on this form has been inspected or processed by DDESB-approved means, as required by DOD policy, and to the best of my knowledge and belief does not pose an explosive hazard."

APPENDIX 3: SPILL REPORTING PROCEDURES

1. In the event of a spill of oil or a hazardous substance, Navy personnel may take action to stop, reduce, or contain the spill, provided they have the proper training and equipment to do so without risking personal injury/contamination.

2. Report **ALL** spills to the Emergency Communications Center (ECC) immediately. Notify the ECC if any cleanup assistance required (i.e. MIDLANT Spill Response Team).

Naval Station Norfolk	444-3333
NAS Oceana	433-9111
Dam Neck Annex	433-9111
NWS Yorktown	887-4911
JEB Little Creek	462-4444
JEB Ft. Story	422-7141
NALF Fentress	433-9111
DFSP Craney Island	396-3333
NNSY	396-3333
ROTHR New Kent	887-4911
St. Helena Annex	911
NSA Northwest	911
Dare County	911
NMC Portsmouth	396-3333

ECC will dispatch the appropriate station Command Duty Officer (CDO) and the Station Fire Department to the spill location. Upon arrival of the Fire Department, the command who reported the spill will relay all of the pertinent information to the Fire Department, who will serve as the Incident Commander (IC) for the duration of the spill containment, clean up and investigation process. The following information should be obtained:

INFORMATION REQUIRED WHEN REPORTING A SPILL

Name of person reporting the spill.	Quantity spilled
Command of person reporting the spill.	Cause of spill
Location of spill, Date & time of Spill	Substance spilled
Weather conditions including wind direction and speed and cloud cover	
Slick description including color and size	
Clean-up information: method, time and person(s) performing the clean up.	
Spill Cleanup assistance requirements	
Notifications made to other commands.	

3. The National Response Center (NRC) will be notified by the Emergency Communication Center (ECC). The command responsible for spill must contact the Installation Environmental Office to ensure the spill information is available.

4. The command responsible for the spill is required to report the incident, by sending a Navy spill message, in accordance with COMNAVBASENORVA/SOPA(ADMIN)HAMPINST 5400.1F and OPNAVINST 5090.1C, 5090.3, and 3100.6H. CHECK WITH SPILL PM.

5. If there are any questions on spill reporting requirements, call your Environmental Media Manager or Installation Environmental Office for more information. Personnel that fail to report a spill or who submit false or misleading information may be subject to criminal sanctions, including fines and/or imprisonment.

APPENDIX 4: CONTAINER PROCUREMENT & MARKING DEVICES

CONTAINER PROCUREMENT

If original containers cannot be used to store the HW, acceptable containers may be obtained by the following methods:

1. The RRP has free, used drums on a limited basis. Ensure these drums have been cleaned and do not contain any residual hazardous waste prior to reuse. Contact the RRP for availability.

2. New or reconditioned drums can be purchased through FISC, contact FISC Customer Service for more details.

    - 55 gallon steel with bung openings: NSN 8110-00-292-9783
    - 55 gallon steel with open tops: NSN 8110-00-030-7780
    - 55 gallon plastic with bung opening: NSN 8110-01-150-0677

3. Other containers may be used if they meet the DOT container requirements. Any container used to store a hazardous waste must be made of or lined with materials, which will not react with, and are compatible with the item(s) to be stored inside them. The container must possess the ability to hold the waste without being impaired. The containers must be able to be secured/sealed to ensure the contents will not spill during routine storage or transportation.

    Empty drums can be obtained through the NAVFAC MIDLANT ESD who will provide containers as a last resort with a DD- 1348.

MARKING DEVICES

Paint Pens may be used to mark the containers with the proper information. Ordering information for Paint Pens is listed below:

- White Paint Pen NSN 7520-01-207-4149
- Red Paint Pen NSN 7520-01-207-4161
- Yellow Paint Pen NSN 7520-01-207-4165
- Gold Paint Pen NSN 7520-01-207-4166

APPENDIX 5: SITE GUIDANCE FOR SATELLITE ACCUMULATION AREAs

Enclosure: Inspection Checklist for Satellite Accumulation Area (SAA)

HW Satellite Accumulation Area

CHECK TO ENSURE

- Drums are kept closed except when adding waste
- HW labels are facing outward
- Secondary containment is clean (if applicable)
- Max Capacity: 55-gallons, regardless of the # of HW containers
- When HW containers are 75% full, arrange for pickup (341-0412/ 0460)
- Do not date drum until is full (3 days to move to <90 days or dispose)

HW Container ***Legally Required*** Label

Must identify type of waste

ASD

Please call the Hazardous Waste Manager with any HW issues: _____

If an uncontrolled spill occurs , please call _____

SATELLITE ACCUMULATION AREA (SAA) CHECKLIST

INSPECTOR	INSPECTION DATE/TIME		AREA
HW CUSTODIAN	PHONE NUMBER	HW TRAINING DATE	CODE/UNIT

All checklist questions must be answered. All "NO" answers require the violation to be noted and corrected unless otherwise noted. Comment may include violation description, action, date action completed, and other pertinent details.

SATELLITE ACCUMULATION AREA Compliance Questions	***Circle Answer***	***Comment***
1. Is the SATELLITE ACCUMULATION AREA near the point of generation and under control of the operator of the process generating the waste?	Yes No	
2. Is the area free of any spills or container overfills (waste product on the container lid) and is good housekeeping maintained?	Yes No	
3. Is a fire extinguisher located and available within 50 feet and is the inspection current?	Yes No	
4. Is spill control equipment (Example: absorbents) available at the SATELLITE ACCUMULATION AREA?	Yes No	
5. Is the HW operator/site custodian annual training up to date?	Yes No	
6. Is a "SATELLITE ACCUMULATION AREA" sign with Primary and Alternate emergency contact information posted at the site?	Yes No	
7. Is a "NO SMOKING" Sign posted at the Satellite Accumulation Area?	Yes No	
If there is no hazardous waste currently stored at the site answer N/A for the remainder of checklist.		
8. Is the total volume of hazardous waste 55 gallons or less (OR 1 quart or less of acutely hazardous waste)?	Yes No N/A	
9. Are containers kept sealed at all times except when waste is added?	Yes No N/A	
10. Are containers in good condition (non-leaking or non-corroded) and compatible with the waste stored in them? (Example of incompatibility: corrosive waste in a metal drum).	Yes No N/A	
11. HW Labeling Checks **a.** does each HW container have a HW label?	Yes No N/A	
b. clearly visible and facing out for inspection?	Yes No N/A	
c. include the words, "HAZARDOUS WASTE?""	Yes No N/A	
d. include specific contents of the waste(s)?	Yes No N/A	
e. include the accumulation date? (Containers must only be dated once the total volume of the SATELLITE ACCUMULATION AREA reaches 55 gallons, or one quart of acute HW, then all the wastes must be removed within 72 hours).	Yes No N/A	
12. If the Satellite Accumulation Area container (I.E. 55 Gallon) has reached capacity has the container been dated and moved to the Hazardous Waste Accumulation Area site within 72 hours?	Yes No N/A	

For Environmental Personnel Only:
Check Inspection Type: Oversight___; Setup___; Closeout___

APPENDIX 6: SITE GUIDANCE FOR HAZARDOUS WASTE ACCUMULATION AREA

Enclosure: Hazardous Waste Accumulation Area Inspection Checklist for Containers Less Than or Equal to 119 Gallons.

HW (<90 Day) Accumulation Area

CHECK TO ENSURE

- Drums are kept closed except when adding waste
- HW labels are facing outward
- Secondary containment is clean
- Contact Environmental Services (341-0412/0460) to arrange HW container pickup no later than the 45th day from **ASD**
- Site **MUST** be inspected every 7 days (records kept for 3 years)
- Aisle space **MUST** allow for removal of HW and a 360 degree inspection
- No limit on volume storage

HW Container ***Legally Required*** Label

Must have a start date if waste is placed in drum (**ASD**)

Must identify type of waste

Please call the Hazardous Waste Manager with any HW issues: _____

If an uncontrolled spill occurs , please call _____

HAZARDOUS WASTE ACCUMULATION AREA (HWAA) CHECKLIST

INSPECTOR	INSPECTION DATE/TIME		AREA
HW CUSTODIAN	PHONE NUMBER	HW TRAINING DATE	CODE/UNIT

All checklist questions must be answered. All "NO" answers require the violation to be noted and corrected unless otherwise noted. Comment may include violation description, action, date action completed, and other pertinent details.

HAZARDOUS WASTE ACCUMULATION AREA Compliance Questions	***Circle Answer***	***Comment***
1. Are good housekeeping standards employed?	Yes No	
2. Is the area free of any spills or container overfills (waste product on the container lid)?	Yes No	
3. Is a fire extinguisher located and available within 50 feet and is Inspection current?	Yes No	
4. Is spill control equipment (examples: absorbents) available at the Site?	Yes No	
5. Are HAZARDOUS WASTE inspections conducted and properly documented every 7 days?	Yes No	
6. Are HAZARDOUS WASTE inspection records kept for 3 years?	Yes No	
7. Is the HW operator/site custodian annual training up to date?	Yes No	
8. Is a "HAZARDOUS WASTE ACCUMULATION AREA" sign with Primary and Alternate emergency contact information posted at the site?	Yes No	
9. Is a "NO SMOKING" sign posted?	Yes No	
If there is no hazardous waste currently stored at the site answer N/A for the remainder of checklist.		
10. Are HAZARDOUS WASTE containers in good condition (non-leaking or non-corroded) and compatible with the waste stored in them?	Yes No N/A	
11. For hazardous waste containing volatile organics, are individual HAZARDOUS WASTE containers either (circle applicable items) **a**. less than 26 gallons? **b**. 26 or greater but less than 119 gallons; and DOT approved? **c**. Is air emissions documentation allowing non-DOT containers maintained with the inspection records?	Yes No N/A Yes No N/A Yes No N/A	
12. Are incompatible wastes separated by a wall, berm, or overpack to prevent mixing?	Yes No N/A	
13. Are HAZARDOUS WASTE containers kept sealed except when waste is being added or removed?	Yes No N/A	
14. HW Labels **a.** does each HW container have a HW label?	Yes No N/A	
b. clearly visible and facing out for inspection?	Yes No N/A	
c. include the words, "HAZARDOUS WASTE?"	Yes No N/A	
d. include specific contents of the waste(s)?	Yes No N/A	
e. include the accumulation date?	Yes No N/A	
15. Are old Hazardous Waste labels & markings removed?	Yes No N/A	
16. Date of oldest HW container in the HWAA.		
17. Has a pickup request been submitted for all HW containers that have been accumulating for more than 45 days?	Yes No N/A	
18. Are adequate aisle spaces maintained for incident response?	Yes No N/A	

For Environmental Personnel Only: Check Inspection Type: Oversight___; Setup___; Closeout___

APPENDIX 7: SITE GUIDANCE FOR UNIVERSAL WASTE ACCUMULATION AREA

Enclosure: Universal Waste Accumulation Area (UWAA) Inspection Checklist

Universal Waste Accumulation Area

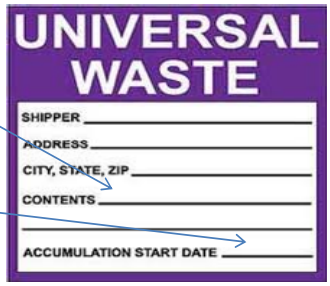
CHECK TO ENSURE

- Drum lids are secure and boxes sealed
- UW labels are facing outward
- **ASD** reflects the date when item is put at site
- Arrange for pickup (341-0412/0460) no later than the 270th day (9 months) from **ASD**

UW Container ***Legally Required*** Label

Must identify type of waste

ASD



Please call the HW Manager with any HW issues:

_____

If an uncontrolled spill occurs , please call _____

UNIVERSAL WASTE ACCUMULATION AREA (UWAA) CHECKLIST

INSPECTOR	INSPECTION DATE/TIME		AREA
HW CUSTODIAN	**PHONE NUMBER**	**HW TRAINING DATE**	**CODE/UNIT**

All checklist questions must be answered. All "NO" answers require the violation to be noted and corrected unless otherwise noted. Comment may include violation description, action, date action completed, and other pertinent details.

UNIVERSAL WASTE ACCUMULATION AREA Compliance Questions	***Circle Answer***	***Comment***
1. Is the area free of any spills or container overfills (waste product on the container lid)?	Yes No	
2. Are good housekeeping standards employed?	Yes No	
3. Is a fire extinguisher located and available within 50 feet and is Inspection current?	Yes No	
4. Is spill control equipment (examples: absorbents) available at the Site?	Yes No	
5. Is the HW operator/site custodian annual training up to date?	Yes No	
6. Is a "UNIVERSAL WASTE ACCUMULATION AREA" sign with Primary and alternate emergency contact information posted at the site?	Yes No	
7. Is a "NO SMOKING" sign posted?	Yes No	
If there is no Universal Waste currently stored at the site answer N/A for the remainder of checklist.		
8. Are Universal Waste containers kept sealed except when waste is being added or removed?	Yes No N/A	
9. Are Universal Waste containers in good condition (non-leaking or non-corroded) and compatible with the waste stored in them?	Yes No N/A	
10. Is each Universal Waste item or the container for the Universal Waste(s) labeled or marked with one of the following phrases? Circle the applicable item:		
a. "Universal Waste – Battery(ies)", or	Yes No N/A	
b. "Universal Waste – Pesticide(s)", or	Yes No N/A	
c. "Universal Waste – Mercury Containing Equipment", or	Yes No N/A	
d. "Universal Waste – Lamp(s)"	Yes No N/A	
11. Is each Universal Waste container for the universal waste(s) labeled with the accumulation start date?	Yes No N/A	
12. Are adequate aisle spaces maintained for incident response?	Yes No N/A	
13. Date of oldest UW container in the UWAA.		
14. Has a pickup request been submitted for all UW containers that have been accumulating for no more than 270 days (9 months)?	Yes No N/A	
15. Is the Universal Waste segregated/packaged and/or stored correctly? (i.e. Waste lithium batteries individually wrapped/packaged).	Yes No N/A	

For Environmental Personnel Only:
Check Inspection Type: Oversight___; Setup___; Closeout___

APPENDIX 8: PROCEDURE FOR ESTABLISHING A JOB ORDER NUMBER

In order to provide service to any customer, a job order number (JON) must be established with the NAVFAC Midlant Financial Management Business Line, Accounts Receivable Department.

To establish a job order number the customer must provide a Funding Document (NAVCOMPT form 2275) or a Requisition & Invoice (form DD-1149). The funding document should state under the description of work "MIDLANT ENVIRONMENTAL SERVICES " at minimum and should list the type of work requested. Forms may be obtained at the comptrollers' office for each command (phone: 341-1325/1318). A copy of the completed funding document must be sent to NAVFAC-MIDLANT (Accounts Receivable), FAX # (757) 341-1318. The NAVFAC MIDLANT Accounts Receivable Department can assign a job order as soon as the funding document is received. Work may be requested as soon as a valid JON is established.

Appendix 9: CALL 2 RECYCLE GUIDELINES

Call2Recycle

Rechargeable Battery Recycling Program Management Guidelines

This program is designed to recycle your old, rechargeable batteries from items such as cell phones, lab tops, power tools, etc. at no costs to your facility. Rechargeable batteries meet the definition of Universal Waste and must be properly managed during accumulation and sent for proper disposal or recycling.

Contact your installation Hazardous Waste (HW) Media Manager to get started with your own Call2Recycle collection box.

1) The HW Media Manager will provide the proper tools and training to successfully manage and recycle your rechargeable batteries. In addition to the provided on-site training, web based training may be accessed at https://environmentaltraining.ecatts.com/.

2) A POC will be designated as the responsible person for the collection box at the time it is established. The name and number of this POC will be documented on a site specific sign provided by the HW Media Manager. **Only this POC and those trained on the Call2Recycle program will be allowed to bag and place batteries into the collection box.** The sign also provides the POC with a battery recycling guide for reference.

3) Each battery shall be packaged in accordance with the directions on the box. Leaking or damaged batteries cannot be recycled and should be disposed of as HW. Your HW Media Manager can assist with this process. Adhering to these directions will help ensure safe storage.

4) The box must be dated when the very first battery is placed in it. Once the collection box is full or the 270 day limit has been reached (whichever comes first), tape the box closed and ship through UPS.

5) The collection boxes are already properly labeled and marked to comply with DOT and EPA regulations so additional labels or markings will not be required.

6) Site inspections will be performed quarterly by your assigned Environmental Protection Specialist to check for site safety, proper storage and correct batteries.

7) Please coordinate with the HW Media Manager to receive new collection boxes.

1 INTRODUCTION

Stell Environmental Enterprises, Inc. (SEE) prepared this Erosion Control Plan (ECP) under Naval Facilities Engineering Command (NAVFAC) Contract No. N62470-12-R-7002, Delivery Order No. 002. A survey of all erosion features was conducted at each of the following four installations, located in the Virginia Beach, Virginia (VA) area:

- Naval Air Station Oceana (NASO),
- Naval Auxiliary Landing Field Fentress (NALFF),
- NASO Dam Neck Annex (NASO-DNA), and
- Naval Support Activity Hampton Roads Northwest Annex (NSA-NWA)

The results of the erosion survey, documented in this ECP, will allow the installations to maintain compliance with regulations, such as the Environmental Protection Agency's (EPA) Clean Water Act (CWA); prevent release of sediment to streams, ponds and wetlands; maintain productive land use; and ensure the safety of personnel using the lands. The locations of these installations are shown in Figure 1-1.

This is the first erosion control survey undertaken at these installations. Based on conversations with the client, there have been no Notices of Violation associated with erosion or sediment release to the surface waters on or off-site. This survey will be proactive in identifying those areas that may or could be releasing sediment that could affect downgradient water quality in surface water. This survey will also be used to establish a baseline showing the location and extent of erosion that currently exists at each installation.

1.1 PROJECT OBJECTIVES

The purpose of the erosion survey is to identify erosion areas and to document those areas (Sections 4 and 5), and then describe measures to address those areas (Sections 6 and 7). Specifically, the objectives for this project are to:

- Identify the areas of existing and potential erosion at each installation;
- Document the survey process and results of the erosion survey; and
- Address the erosion areas by recommending the appropriate control measure which may include: construction to repair the erosion or reduce the potential for future erosion, implementation of a best management practice, or monitoring.

1.2 PROJECT SCOPE

To meet the project objectives, the scope of this project includes the following activities:

- Provide a desk-top analysis of existing information, including Integrated Natural Resource Management Plans (INRMPs), Stormwater Pollution Prevention Plans (SWPPPs), and numerous aerials, wetland maps, and geographic information system (GIS) information for each installation;
- Conduct a visual survey of accessible surface water features including streams, ditches, ponds, stormwater outfalls, unpaved roadways, agricultural areas, etc.;

- Document signs of erosion for the above areas by recording the type and cause of erosion, obtaining global positioning system (GPS) coordinates and photographs, and documenting soil types, and usage level; and
- Prepare the ECP to document observation results and provide recommendations to control or mitigate the erosion areas and the associated costs.

2 JUSTIFICATION AND DRIVERS

2.1 MISSION

The mission of NASO is to provide every element of supply, material, maintenance, personnel, and training facilities required to ensure F/A-18 Hornet fighter squadrons achieve the requisite level of readiness necessary to deploy on command aircraft carriers as fully combat fighter and attach squadrons. NALFF serves as a major carrier landing training facility for aircraft stationed at NASO and Chambers Field. The mission of NASO DNA is to provide quality education and training in specified combat systems operations and maintenance, provide specialized skills training, and to provide training systems support to operational and systems commands. The mission of NSA-NWA is to coordinate the provision of shore activity support to tenant commands, which include all branches of the armed forces and the Coast Guard. A large amount of suitable land area without erosion features, ruts, steep slopes, and depressions is required to support the training activities for these missions. By minimizing erosion, the current amount of suitable, level land area and roadways can be maintained for training purposes to support each facility's mission (INRMPs for NASO, NASO DNA, NALFF and NSA-NWA).

2.2 REGULATORY DRIVERS

Numerous federal and state government regulations, standards, and guidance drive or influence erosion control activities at NASO, NALFF, NASO DNA and NSA NWA. The following is an identification and summary of the primary regulations, standards, and guidance that pertain to the erosion control measures discussed in this document:

Navy Erosion and Sediment Control Instruction - The Commander, Navy Region (COMNAVREG), Mid-Atlantic (MIDLANT) has developed minimum standards and criteria for the effective control of soil erosion, sediment deposition, and non-agricultural runoff from land disturbing activities at installations under its purview. These standards and criteria apply to land disturbing activities greater than or equal to 10,000 square feet (SF) in size and have the following objectives:

- Establish the criteria, procedures, and responsibilities for preparing and complying with Erosion and Sediment Control Plans for land disturbing activities.
- Establish a procedure for inspecting land disturbing activities and their associated erosion and sediment controls.

Navy Post Construction Stormwater Runoff Management Instruction - The COMNAVREG MIDLANT has adopted stormwater best management practices for development or redevelopment activities of parcels greater than or equal to one acre in size. This instruction also applies to land development activities for parcels less than one acre in size if the activities are part of a larger common plan of development. This instruction seeks to maintain compliance with state and federal environmental regulations through the following objectives:

- Require that the after-development runoff from land development and redevelopment activities is maintained as nearly as practicable to the pre-development runoff characteristics in order to reduce flooding, siltation, stream bank erosion, and property damage.

- Establish minimum design criteria for the protection of properties and aquatic resources downstream from land development and redevelopment activities to prevent damage resulting from increases in volume, velocity, frequency, duration, and peak flow rate of stormwater runoff.
- Establish minimum design criteria for measures to minimize non-point source pollution from stormwater runoff that would otherwise degrade water quality.
- Establish provisions for the long-term maintenance of stormwater management control devices and other techniques specified to manage the quality and quantity of runoff.
- Establish administrative procedures for the submission, review, approval, and disapproval of stormwater plans and the inspection of approved projects.

VA Erosion and Sediment Control Regulation. The VA Erosion and Sediment Control Regulation (4 VA Code 50-60-48) was developed to address erosion and sediment control. The *Virginia Erosion and Sediment Control Handbook*, 1992, was prepared as a guidance to assist in implementing the above regulation and was used in preparing this document.

- This regulation is based upon relevant physical and developmental information relating to the watershed and drainage basins of the Commonwealth of VA, including, but not limited to, data relating to land use, soils, hydrology, geology, size of land area being disturbed, proximate water bodies and their characteristics, transportation, and public facilities and services.
- Erosion control measures will include such surveys of lands and waters as may be deemed appropriate by the VA Water Pollution Control Board or required by any applicable law to identify areas, including multijurisdictional and watershed areas, with critical erosion and sediment problems.
- The regulation contains conservation standards for various types of soil and land uses to include criteria, techniques, and methods for the control of erosion and sediment resulting from land-disturbing activities.

United States (U.S.) EPA CWA – Section 104 (2)(n1) of the CWA promotes and encourages continuing comprehensive studies of the effects of pollution, including sedimentation, in the estuaries and estuarine zones of the U.S. on fish and wildlife, fishing, recreation, water supply and water power, and other beneficial purposes. The CWA addresses water quality impacts through multiple sections within the Act including nonpoint pollution control, discharges to potable water systems, and stormwater management. Nonpoint pollution and stormwater discharges play a major role in transporting sediment resulting from erosion into our nation's water resources; therefore, minimizing erosion will have a positive impact on water quality by limiting the sediment and pollutants that enter the potable, recreational, and navigable surface water on and downstream of the four installations.

Chesapeake Bay Preservation Act - The Chesapeake Bay Preservation Act, 1988, states that the Virginia Soil and Water Conservation Board will encourage and promote protection of existing high quality state waters and restoration of all other state waters to a condition or quality

that will permit all reasonable public uses and will support the propagation and growth of all aquatic life, including game fish, which might reasonably be expected to inhabit them. Minimizing erosion will have a positive impact by limiting the sediment and pollutants that enter state waters from portions of NASO.

2.3 NAVY POLICY

Navy policy on natural resources management, including surface water, is to manage natural resources to support and be consistent with the military mission while protecting and enhancing those resources for multiple use, sustainable yield, and biological integrity. Land use practices and decisions must be based on scientifically sound conservation procedures and techniques, and the use of scientific methods and an ecosystem management approach. (OPNAVINST 5090.1C 2007)

Employing ecosystem management will help maintain and improve the sustainability and biological diversity of terrestrial and aquatic ecosystems while supporting sustainable economies, human use, and the environment required for realistic military training operations. (Department of Defense Initiative 4715.3 1996).

The basic principles and guidelines of ecosystem management are to:

- Preserve the function and integrity of natural ecosystems;
- Integrate human social and economic interests with environmental considerations;
- Involve all interested parties (stakeholders) in identifying management goals; and
- Adapt to changing conditions and requirements.

2.4 STEWARDSHIP

Environmental stewardship is essential to the safe, healthful, and compliant execution of the Navy's mission and the protection and preservation of natural resources. The Navy promotes environmental stewardship through projects that enhance the installation's natural resources, promote proactive conservation measures, and support investments that demonstrate the Navy's environmental leadership and environmental stewardship (Department of the Navy, NASO 2011). To achieve these ideals, NAVFAC has established an Environmental Management System that will:

- Comply with applicable laws, regulations and policies;
- Integrate environmental stewardship into operational decisions;
- Implement, modify, and sustain practices that minimize and prevent creation of waste and pollutants at its source;
- Develop objectives and targets to minimize environmental risk, and monitor progress towards those goals;
- Educate the Navy's workforce and supported commands on their responsibilities to the environment;

- Foster communication throughout the installation on our environmental commitments and performance; and
- Sustain the Navy's partnerships with public agencies and community organizations to mutually monitor and improve the quality of the environment.

3 EROSION PROCESSES AND TYPES OF EROSION

Soil erosion is the process by which the land's surface is worn away by the action of wind, water, ice, and gravity. Natural or geologic erosion has been occurring at a relatively slow rate since the earth was formed and is a tremendous factor in the creation of the earth as we know it today. The picturesque mountains of the west, the rolling farmlands of the Piedmont, and the productive estuaries of the Coastal Zone are all products of the geologic erosion and sedimentation process in Virginia. Except for some cases of shoreline and stream channel erosion, natural erosion occurs at a slow rate and is an important factor in maintaining an environmental balance (VA DCR 1992).

Water-generated erosion is the most severe type of erosion and is the type of erosion that is the focus of this report. Water-generated erosion occurs as a result of the impact of rain droplets on unprotected soil surfaces and is due to frictional forces on soil particles as those rain droplets combine and move across the surface of the land. The force due to impact of raindrops is primarily vertical and tends to detach soil particles, while the force of flowing water is primarily horizontal and acts to move detached particles from one place to another. Water-generated erosion can be broken down into the following types, as defined in the Virginia Erosion and Sediment Control Handbook (VA DCR 1992).

Splash erosion is the initial effect of rain upon the soil. Raindrop impact dislodges soil particles and splashes them into the air. These detached particles are then vulnerable to movement via surface water flow, including sheet, rill, gully, or channel erosion.

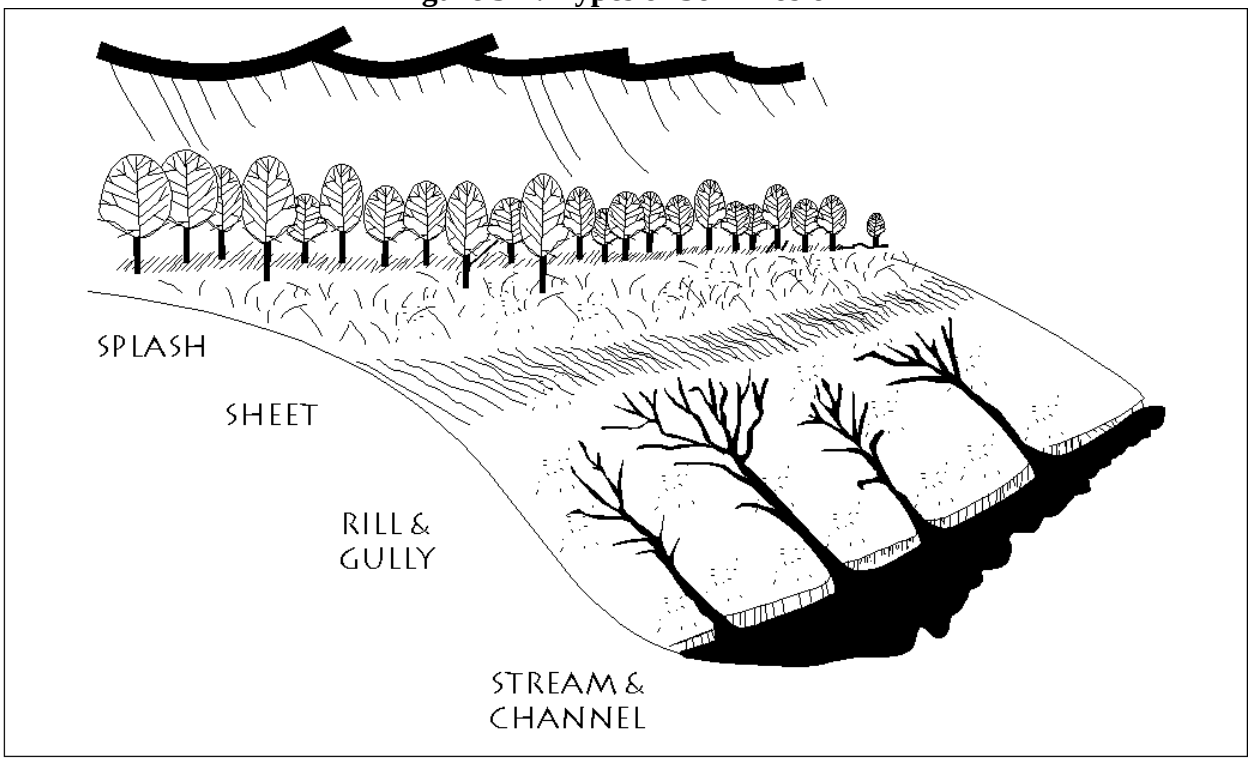
Sheet erosion is caused by the shallow flow of water over the land's surface before it concentrates. Although seldom the detaching agent, sheet flow transports soil particles detached by raindrop impact. Sheet erosion has been identified as a major cause of soil loss on agricultural fields. Sheet flow rarely moves as a uniform sheet for more than a few feet on land surfaces before concentrating in the surface irregularities.

Rill erosion occurs as sheet flow begins to concentrate in the low spots of irregular surfaces. As flow changes from sheet flow to shallow concentrated flow, the velocity and turbulence of flow increase. The energy of this concentrated flow is able to detach and transport additional soil particles. When this occurs, the running water begins to cut small channels. Rills are small but well-defined channels that are up to a few inches deep. They are easily mitigated in agricultural areas by harrowing and other surface treatments.

Gully erosion occurs when rills combine and the increased volume and velocity of water form larger and deeper channels. The main difference between rill erosion and gully erosion is magnitude. Gullies are often too large to be repaired by tillage equipment and typically require heavy equipment and special repair techniques.

Stream and Channel erosion takes place when the volume and velocity within a stream channel are such that bed and/or bank materials are moved and not replaced. Streambed scour is the removal of underwater material by waves or currents, especially at the base or toe of a streambank or shoreline.

Figure 3-1: Types of Soil Erosion



(Source: CEP 1998)

4 METHODOLOGY USED FOR FIELD ASSESSMENT

4.1 DESKTOP ANALYSIS

Prior to the field assessment, a desk top analysis was conducted by SEE to review information provided by NAVFAC and to identify potential sites to be surveyed. Information provided by NAVFAC for the desk top analysis primarily consisted of the most recent INRMPs for each installation and relevant GIS files for each base. Using this information, SEE identified areas to be investigated during the field assessment. These areas consisted of primary stormwater drainage ditches, natural streams, channelized natural streams, and lake and pond shorelines. The primary resources utilized by SEE were Water Resource Maps from the INRMPs (GMI 2006 and 2008) and the Wetland Centerline GIS layers (GMI 2002), provided by NAVFAC in October and November 2012. Additional clarification regarding survey areas was provided by Michael Wright, Navy Natural Resources Specialist, during a site tour held on November 13, 2012, at the onset of site assessment activities. This site tour consisted of a daylong driving tour of NASO, NASO-DNA, NALFF, and NSA-NWA.

4.2 FIELD SURVEY

The field assessment was performed by SEE between the dates of November 13, 2012 and January 23, 2013. A total of five nonconsecutive weeks of field assessment was conducted to complete the field survey at all four facilities.

Field assessment activities consisted of the field location of survey areas, visual inspection of these areas, and documentation of any notable erosion features observed upon inspection. Investigation methods included walking inspections, driving inspections where practical, and investigation by means of canoe. When possible, the surveys were conducted by starting downstream and continuing upstream so that any discharge of sediment from erosion to the receiving stream would be identified early in the survey. The identification of erosion features was primarily based on the visual observation of typical erosion features such as sparse vegetation, occurrences of sheet erosion, erosion rills and gullies, slope failures, and scour. The general process employed by SEE was conducted as follows:

- Follow shoreline of watercourse or surface water until an erosion feature was identified.
- Take one or more photographs of the erosion feature showing the extent of erosion.
- Document each feature's location using a Trimble GeoXH 3000 GPS device. GPS measurements were recorded manually in decimal format and also stored on the unit. The GPS measurements collected represent the center of the erosion feature. The target accuracy was three meters or less.
- Complete a field inspection form.
- Repeat the process for the remainder of watercourse or surface water features.

Field documentation of erosion features included the following information:

- General description;
- GPS coordinates that were both manually and digitally recorded;
- Designated use of the surrounding area (e.g. agricultural, training, recreational, etc.);
- Apparent usage level of the surrounding area (e.g. heavy, moderate, light);
- Vegetative condition of the surrounding area (e.g. sparse grass, dense brush, etc.)
- Photographic documentation;
- Nature of erosion and sedimentation issues observed;
- Condition of drainage structure, if applicable;
- Apparent cause of the erosion; and
- Physical dimensions pertaining to the erosion feature.

Initially, SEE sought to perform a direct visual inspection of every area, regardless of impediments such as heavy brush and thickly forested areas. This approach, while very labor intensive and time consuming, proved worthwhile in that it allowed SEE to confirm that major erosion issues were not of primary concern in these densely vegetated areas where natural occurrences of erosion were present. Upon reporting this and with NAVFAC approval, SEE limited direct visual inspection to areas that were reasonably accessible by foot, vehicle, or canoe.

Areas identified in the field for which mitigation cost estimates were not provided generally consisted of occurrences of natural erosion along drainage ditches or channelized natural streams located within wooded areas where mitigation of the erosion would result in greater disturbance of surrounding areas if the present condition were to be addressed.

A summary of the surface water locations surveyed at each installation is provided in Table 4-1. These surface water locations and erosion features for NASO, NASO DNA, NALFF, and NSA NWA are shown in figures 5-1, 5-2, 5-3, and 5-4 respectively.

Table 4-1: Survey Summary by Installation

Installation	Total Length of Surface Water Surveyed	Surface Water Areas Surveyed	No. of Photographs (incl. in Appendix A)	No. of Erosion Features Identified
NASO	32 miles	Outfalls, Aeropines Golf Course Ponds and Mitigation Site, Runway Ditches, Agricultural Ditches, West Neck Creek, Weapons Compound Ditches, Oceana Pond, Owls Creek, Sand Pit Ponds, Base Perimeter Ditches, Roadside Ditches, Concrete Ponds, Skeet Range, VACAPES Area	173	20
NASO DNA	9 miles	MACS 24 Area, DEVGRU Area, Lake Christine, Redwing Lake, Lake Tecumseh, Sadler Pond, Lotus Pond, Lily Pond, Roadside Ditches, Main Ditch between Redwing Lake and Lake Tecumseh	11	3
NALFF	11 miles	Pocaty Creek, Runway Ditches, Agricultural Ditches, Chesapeake City Channel	18	3
NSA NWA	11 miles	Mill Stream, Lunker Lake, Brig Area, ROTHR Ditches, Agricultural Ditches, Roadside Ditches	12	6

Notes:
DEVGRU – Development Group
MACS – Marine Air Control Squadron
NALFF – Naval Auxiliary Landing Field Fentress
NASO – Naval Air Station Oceana
NASO DNA – Naval Air Station Oceana Dam Neck Annex
NSA NWA – Naval Support Activity Hampton Roads Northwest Annex
ROTHR - Relocatable Over-the Horizon Radar
VACAPES – Virginia Capes

5 ASSESSMENT RESULTS

The following sections present and discuss the results of the erosion survey by installation. Figures for each installation are provided at the end of this section. The primary causes of each erosion feature and the GPS coordinates are shown in Table 5-1.

5.1 NASO

A total of 20 erosion features, designated as NASO 01 through NASO 20, were identified during field assessment activities at NASO. The surface waters surveyed and locations of these 20 erosion features are shown in Figure 5-1 (end of section).

5.1.1 NASO 01

Erosion feature NASO 01 consists of multiple erosion features located along an approximate 500 foot reach of an agricultural field drainage ditch west of West Neck Creek. These features are designated as NASO 01(a) through NASO 01(d) and are discussed in further detail below.

5.1.1.1 NASO 01(a)

Erosion feature NASO 01(a) is located approximately 0.27 miles upstream of Outfall 001 via an agricultural ditch west of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-1. The GPS coordinates for this feature are latitude 36.7892 and longitude -76.0438. All GPS coordinates represent the center of the erosion feature.

NASO 01(a) is characterized by occurrences of sheet erosion and erosion rills at the southeast corner of the intersection of the main agricultural drainage ditch and a tributary ditch to the south. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the concentration of upgradient drainage over the sparsely vegetated area adjacent to the ditch.

Erosion at this feature extends southeast of the intersection of the main and tributary ditches and has an area of about 175 SF. The erosion rills are an average of 6 inches deep.

Photograph 5-1: NASO 01(a), Erosion Rills along Agricultural Field Drainage Ditch

5.1.1.2 NASO 01(b)

Erosion feature NASO 01(b) is located downstream of NASO 01(a), approximately 0.22 miles upstream of Outfall 001 via an agricultural branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-2. The GPS coordinates for this feature are latitude 36.7893 and longitude -76.0438.

NASO 01(b) is characterized by occurrences of sheet erosion and erosion gullies at the northwest corner of the intersection of the main agricultural drainage ditch and a tributary ditch to the north. In addition to the erosion, a small diameter pipe culvert, located within the tributary ditch immediately north of the main ditch, is partially obstructed with soil. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the concentration of upgradient drainage over the sparsely vegetated area adjacent to the ditch.

Erosion at this feature extends northeast in an approximate radius of eight feet from the ditch corner, corresponding to an area of about 50 SF. The erosion gullies range from six to 18 inches in depth.

Photograph 5-2: NASO 01(b), Erosion Gullies along Agricultural Field Ditch

5.1.1.3 NASO 01(c)

Erosion feature NASO 01(c) is located downstream of NASO 01(b), approximately 0.20 miles upstream of Outfall 001 via a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-3. The GPS coordinates for this feature are latitude 36.7894 and longitude -76.0425.

NASO 01(c) is characterized by occurrences of sheet erosion and erosion gullies at all four corners of the intersection of the main agricultural drainage ditch and two tributary ditches to the north and south, as well as an occurrence of localized slope failure along the southern streambank of the main ditch located downstream of the intersection. In addition to the erosion, a small diameter pipe culvert, located within the tributary ditch immediately north of the main ditch, is damaged. The soil type present at this feature is silty loam. The sheet and gully erosion present at this feature can be attributed to the concentration of upgradient drainage as flow from intersecting ditches combine resulting in a higher volume of runoff converging in one ditch.

The slope failure can be attributed to steeply sloped streambanks and streambed scour at the toe of the slope under peak flow conditions. This action contributed to unstable slope conditions by removing toe material that was supporting material on the slope. With material at the toe of the slope being removed, the slope material became mobile and collapsed into the channel.

Although erosion is present at this feature in slightly varying degrees on all four corners of the ditch intersection, the erosion generally extends in a radius of approximately 30 feet from the ditch intersection, corresponding to an area of about 2,800 SF. The erosion gullies south of the main ditch range in depth from six to 18 inches. Erosion gullies to the north of the main ditch range in depth from six to 36 inches. The slope failure occurs along the southern streambank of the main ditch located downstream of the intersection, and spans about 10 feet of the streambank.

Photograph 5-3: NASO 01(c), Erosion Gullies along Agricultural Field Ditch

5.1.1.4 NASO 01(d)

Erosion feature NASO 01(d) is located downstream of NASO 01(c), approximately 0.18 miles upstream of Outfall 001 via a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-4. The GPS coordinates for this feature are latitude 36.7894 and longitude -76.0422.

NASO 01 (d) is characterized by the occurrence of deep gully erosion along the northern and southern streambanks of the main agricultural ditch. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the combined concentration of upgradient drainage as runoff from multiple directions resulting in a higher volume of runoff converging in one ditch.

This erosion feature has an estimated area of approximately 500 SF. The gullies along the northern streambank range in depth from six to 42 inches. The gully along the southern streambank is approximately 36 inches deep.

Photograph 5-4: NASO 01(d), Erosion Gullies along Agricultural Field Ditch

5.1.2 NASO 02

Erosion feature NASO 02 is located along a drainage ditch running parallel to the main runway, approximately 2.10 miles upstream of Outfall 001 via a series of drainage ditches and a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-5. The GPS coordinates for this feature are latitude 36.8125 and longitude -76.0384.

NASO 02 is characterized by localized slope failure along the southeastern streambank of the drainage ditch. The soil type present at this feature is clayey silt. The slope failure can be attributed to steeply sloped streambanks and streambed scour at the toe of the slope under peak flow conditions. This action contributed to unstable slope conditions by removing toe material that was supporting material on the slope. With material at the toe of the slope being removed, the slope material became mobile and collapsed into the channel.

The slope failure occurs along the southeastern streambank, spans about 20 feet of the ditch, and is approximately four feet in height. The average thickness of the material mobilized by the slope failure is one foot. The estimated volume of collapsed material based on the above dimensions is approximately 3 cubic yards (CY).

Photograph 5-5: NASO 02, Slope Failure along Runway Ditch

5.1.3 NASO 03

Erosion feature NASO 03 is located at the outlet of a pipe culvert on the Aeropines Golf Course. The pipe culvert is located between a small drainage ditch and an unnamed pond. Both the pond and the ditch receive drainage from the golf course and do not discharge to any outfalls. No significant downstream impacts, including the transport of sediment, were observed as a result of NASO 03. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-6. The GPS coordinates for this feature are latitude 36.7911 and longitude -76.0382.

NASO 03 is characterized by the occurrence of streambed scour at the culvert outlet. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the lack of sufficient outlet and streambed protection required to dissipate the energy of water discharged by the culvert under peak flow conditions.

Approximately 35 feet of streambed scour is present. The streambed scour is an average of six inches deep and 18 inches wide, corresponding to an area of about 55 SF.

Photograph 5-6: NASO 03, Streambed Scour at Culvert Outlet

5.1.4 NASO 04

Erosion feature NASO 04 is located within the Aeropines Golf Course Mitigation Site, approximately 0.30 miles upstream of Outfall 001 via a channelized branch of West Neck Creek. The Aeropines Golf Course Mitigation Area is a forested wetland that was planted to replace other wetlands destroyed by development. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-7. The GPS coordinates for this feature are latitude 36.7914 and longitude -76.0406.

NASO 04 is characterized by the occurrence of sheet erosion. The soil type present at this feature can primarily be described as sandy with little fines or topsoil. The erosion present at this feature can be attributed to upgradient drainage over the sparsely to moderately vegetated area and the highly erodible soils that are prevalent in this area. Reportedly, vegetation survival rates have been poor in this area.

This erosion feature consists of two primary areas: (1) an approximate 7,000 SF of moderately vegetated area containing a silt fence that was never removed from the original mitigation project; and (2) an approximate 4,000 SF of sparsely vegetated area located upslope of the silt fence area. The corresponding total area of erosion is approximately 11,000 SF.

Photograph 5-7: NASO 04, Sheet Erosion at Aeropines Golf Course Mitigation Site

5.1.5 NASO 05

Erosion feature NASO 05 is located at the outlet of a drainage ditch pipe culvert at the Aeropines Golf Course, approximately 1.30 miles upstream of Outfall 001 via a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-8. The GPS coordinates for this feature are latitude 36.7914 and longitude -76.0291.

NASO 05 is characterized by the occurrence of erosion along an embankment adjacent to a culvert. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the concentration of upgradient drainage from the paved golf cart path above the culvert. The increased drainage velocity due to the paved surface is an additional contributor to the occurrence of erosion at this feature.

The footprint of the erosion feature is approximately 25 SF; the total embankment including the erosion, the area on both sides of the culvert and the area above the culvert is approximately 100 SF. The depth of the drainage ditch is approximately three feet.

Photograph 5-8: NASO 05, Gully Erosion at Aeropines Golf Course

5.1.6 NASO 06

Erosion feature NASO 06 is located along the bank of a pond at the Aeropines Golf Course, approximately 1.56 miles upstream of Outfall 001 via two unnamed golf course ponds, a drainage ditch, and a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-9. The GPS coordinates for this feature are latitude 36.7967 and longitude -76.0277.

NASO 06 is characterized by bank destabilization and sloughing of material along the pond bank. The soil type present at this feature is silty loam. A combination of mechanisms including a steep slope and scouring by small waves from the pond likely contributed to the destabilization.

The embankment as originally constructed had a nearly vertical two foot embankment. This steep slope along with small waves coupled with rising and falling pond levels over the years resulted in mobilization of the pond bank material, with separation occurring at the interface of the more densely rooted vegetative buffer and the less densely rooted bank soil, where well maintained grass is present.

The erosion feature spans about 220 feet of the pond bank. The thickness of the destabilized material ranges from approximately one to two feet. The average distance of separation from the main pond bank is approximately one foot.

Photograph 5-9: NASO 06, Pond Bank Destabilization at Aeropines Golf Course

5.1.7 NASO 07

Erosion feature NASO 07 is located at the outlet of a drainage ditch pipe culvert that discharges to a channelized branch of West Neck Creek at the Aeropines Golf Course. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-10. The GPS coordinates for this feature are latitude 36.7996 and longitude -76.0294.

NASO 07 is characterized by erosion of the culvert embankment and joint failure of the culvert piping. The soil type present at this feature is silty loam. The erosion can be attributed to the concentration of upgradient drainage above the culvert resulting in erosion around the concrete piping by scouring. The erosion has contributed to separation of the final pipe section of the culvert, although flow through the pipe has not been significantly altered or become obstructed due to the erosion. This area appears to be under some type of recent repair activity, as evidenced by signs of recent brush clearing and excavator operations.

The footprint of the erosion gully itself is approximately 20 SF. The surrounding area, including above and along both sides of the culvert, is approximately eight feet wide by 15 feet long or approximately 120 SF. The depth of the gully is approximately three to four feet.

Photograph 5-10: NASO 07, Embankment Erosion and Pipe Collapse at Aeropines Golf Course

5.1.8 NASO 08

Erosion feature NASO 06 is located along the bank of a pond at the Aeropines Golf Course, approximately 1.30 miles upstream of Outfall 001 via the unnamed golf course pond and a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-11. The GPS coordinates for this feature are latitude 36.8006 and longitude -76.0281.

NASO 08 is characterized by bank destabilization and sloughing of material along the pond bank. The soil type present at this feature is silty loam. A combination of mechanisms including a steep slope and scouring by small waves from the pond likely contributed to the destabilization.

The embankment as originally constructed had a nearly vertical two foot embankment. This steep slope along with small waves coupled with rising and falling pond levels over the years resulted in mobilization of the pond bank material, with separation occurring at the interface of the more densely rooted vegetative buffer and the less densely rooted bank soil where well maintained grass is present.

The separation located on the pond bank near the area of destabilized bank and is a result of concentrated drainage from the upslope area entering the pond and eroding soil from its bank.

The destabilized bank feature spans about 50 feet of the pond bank. The thickness of the destabilized material ranges from approximately one to three feet. The average distance of separation from the main pond bank is approximately one foot.

The separation is approximately eight feet in length and two feet wide. The total depth of the gully is approximately three feet.

Photograph 5-11: NASO 08, Pond Bank Destabilization at Aeropines Golf Course

5.1.9 NASO 09

Erosion feature NASO 09 is located at a drainage ditch pipe culvert at the Weapons Compound perimeter, approximately 1.2 miles upstream of Outfall 004 via a series of drainage ditches. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-12. The GPS coordinates for this feature are latitude 36.7988 and longitude -76.0447.

NASO 09 is characterized by a significant obstruction to flow present at the culvert inlet. The obstruction is a result of an accumulation of debris consisting of approximately one to two feet of leaves and pine needles over a 30 SF area at the culvert inlet. Additional debris likely exists within the culvert piping for an indiscernible length. No erosion was observed in this area, although the potential exists due to the obstruction.

Photograph 5-12: NASO 09, Culvert Obstruction at Weapons Compound

5.1.10 NASO 10

Erosion feature NASO 10 is located at a drainage ditch pipe culvert at the Weapons Compound perimeter, approximately 0.60 miles upstream of Outfall 001 via a drainage ditch and a channelized branch of West Neck Creek. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-13. The GPS coordinates for this feature are latitude 36.7933 and longitude -76.0408.

NASO 10 is characterized by a significant obstruction to flow present at the culvert inlet, resulting in streambank scour, scouring of the culvert embankment, and undermining of the overlaying roadway. The obstruction is a result of an accumulation of debris consisting of approximately one to three feet of leaves, pine needles, branches, and sediment over a 240 SF area at the culvert inlet. The soil type present at this feature is silty loam. A heavy accumulation of debris at the culvert inlet has resulted in a restriction of flow, causing significant erosion to occur in the immediate vicinity of the inlet. The eroded areas include the ditch streambank immediately upstream of the inlet and the culvert embankment supporting the overlaying roadway. The primary concern is erosion of the culvert embankment, which extends approximately one to three feet into the embankment and undermines the overlaying roadway. Stress cracks present in the roadway asphalt indicate that the culvert embankment is subsiding in the absence of supporting material. The approximate total height of the culvert embankment and the ditch streambank is six feet. In total, an estimated 40 feet of streambank (20 feet on each side) and embankment is affected in this area.

A Navy escort at the Weapons Compound had indicated that this area receives a substantial volume of drainage under peak flow conditions and that stormwater from the ditch crested the roadway during Hurricane Sandy in late 2012.

Photograph 5-13: NASO 10, Culvert Obstruction at Weapons Compound

5.1.11 NASO 11

Erosion feature NASO 11 is located at a pipe culvert along a runway drainage ditch, approximately 1.15 miles upstream of Outfall 004 via a series of drainage ditches. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-14. The GPS coordinates for this feature are latitude 36.8048 and longitude -76.0477.

NASO 11 is a pipe culvert in which the flared end section has detached approximately four inches from the main pipe. No erosion was observed in this area due to the detachment, although the potential for additional separation exists under peak flow conditions.

Photograph 5-14: NASO 11, Separation of Pipe Culvert along Runway Ditch

5.1.12 NASO 12

Erosion feature NASO 12 is located at a drainage ditch pipe culvert southwest of the main runway, approximately 0.35 miles upstream of Outfall 004. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-15. The GPS coordinates for this feature are latitude 36.7986 and longitude -76.0573.

NASO 12 is characterized by the occurrence of minor sheet and rill erosion along the culvert embankment. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the concentration of upgradient drainage over the sparsely vegetated area adjacent to the culvert.

Most erosion occurred in a horseshoe-shaped pattern around the upstream end of the culvert and encompasses an approximate footprint of 300 SF.

Photograph 5-15: NASO 12, Embankment Erosion at Culvert Southwest of Main Runway

5.1.13 NASO 13

Erosion feature NASO 13 is located at a fence line screen along a drainage ditch at Outfall 004. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-16. The GPS coordinates for this feature are latitude 36.8025 and longitude -76.0608.

NASO 13 is characterized by a significant obstruction to flow present at the fence line screen. No erosion was observed in this area, although the potential for future erosion exists due to the obstruction. The obstruction is a result of an accumulation of debris consisting of approximately three CY of branches, leaves, and pine needles.

Photograph 5-16: NASO 13, Screen Obstruction at Oufall 004

5.1.14 NASO 14

Erosion feature NASO 14 is located along the shoreline of the Owls Creek tidal area. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-17. The GPS coordinates for this feature are latitude 36.8259 and longitude -76.9861.

NASO 14 is characterized by the occurrence of erosion rills and gullies perpendicular to the shoreline. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to both the concentration of upgradient drainage and tidal impacts from Owls Creek.

Approximately 80 feet of eroded shoreline is present in this area. The erosion gullies are approximately eight inches deep and six inches wide. This area appears to be heavily utilized for recreational purposes.

Photograph 5-17: NASO 14, Shoreline Erosion at Owls Creek Area

5.1.15 NASO 15

Erosion feature NASO 15 is located at a drainage ditch pipe culvert in the Sand Pit Ponds area, approximately 625 feet upstream of Outfall 006. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-18. The GPS coordinates for this feature are latitude 36.8323 and longitude -76.0121.

NASO 15 is characterized by minor erosion occurring along the ditch streambank and the resulting partial obstruction of flow through the culvert. The soil type present at this feature can primarily be described as sand with little fines or topsoil. The erosion is attributable to the sandy soil and lack of vegetation or other stabilization measures in the area. The pipe culvert is partially obstructed by collapsed streambank material at its inlet and outlet, which is inhibiting drainage from the nearby Sand Pit Ponds.

The impacted area, which includes the culvert embankment and abutting streambanks, is approximately 1,800 SF.

Photograph 5-18: NASO 15, Minor Erosion and Culvert Obstruction at Sand Pit Ponds Area

5.1.16 NASO 16

Erosion feature NASO 16 is located at the facility's perimeter security fence along Oceana Boulevard near the Sand Pit Ponds area, approximately 0.25 miles upstream of Outfall 006. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-19. The GPS coordinates for this feature are latitude 36.8304 and longitude -76.0113.

NASO 16 is characterized by the occurrence of gully erosion beneath the security fence. The soil type present at this feature can primarily be described as sand with little fines or topsoil. The erosion at this feature can be attributed to the concentration of drainage from the adjacent roadway. The increased drainage velocity due to the paved surface of the roadway is an additional contributor to the occurrence of erosion at this feature. Due to the sandy soil and sparse vegetation in the area, this erosion feature has the potential to worsen rapidly if not addressed and may present a security issue due to its location along the perimeter security fence.

The erosion gully is approximately two feet deep, 20 feet long, and 10 feet wide resulting in an area of 200 SF.

Photograph 5-19: NASO 16, Gully Erosion along Oceana Boulevard near Sand Pit Ponds Area

5.1.17 NASO 17

Erosion feature NASO 17 is located in a drainage ditch parallel to the main runway, approximately 0.60 miles upstream of Outfall 006. NASO 17 spans a main ditch from the outlet of a pipe culvert to the intersection with a perpendicular downstream ditch, and includes a section of the downstream ditch near the intersection. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-20. The GPS coordinates for this feature are latitude 36.8287 and longitude -76.0200.

NASO 17 is characterized by slope failure occurring along the streambank. The soil type present at this feature is silty loam. The slope failure can be attributed to steeply sloped streambanks and streambed scour at the toe of the slope under high flow conditions. This action contributed to unstable slope conditions by removing toe material that was supporting material on the slope. With material at the toe of the slope being removed, the slope material became mobile and collapsed into the channel.

Slope failure has occurred along an approximately 350 foot section the main drainage ditch. Both sides of the streambank are impacted, although erosion along the southeastern embankment is more severe. The height of the streambank is approximately 10 to 12 feet. The total impacted area along the main ditch is approximately 8,400 SF.

Along the intersecting ditch, slope failure has occurred along an approximately 50 foot section of the northeastern streambank. The height of the streambank is approximately 10 to 12 feet. The total impacted area along the intersecting ditch is approximately 600 SF.

Photograph 5-20: NASO 17, Slope Failure along Runway Ditch

5.1.18 NASO 18

Erosion feature NASO 18 is located at a drainage ditch pipe culvert southwest of the main runway, approximately 0.40 miles upstream of Outfall 004. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-21. The GPS coordinates for this feature are latitude 36.7983 and longitude -76.0575.

NASO 18 is characterized by the occurrence of minor sheet and rill erosion along the culvert embankment and some minor embankment scour. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the concentration of upgradient drainage over the sparsely vegetated area adjacent to the culvert.

An approximate 5,000 SF area, including the culvert embankment and roadway, is impacted by erosion.

Photograph 5-21: NASO 18, Embankment Erosion at Culvert Southwest of Main Runway

5.1.19 NASO 19

Erosion feature NASO 19 is located at a large diameter pipe culvert at Outfall 002. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-22. The GPS coordinates for this feature are latitude 36.8305 and longitude -76.0454.

NASO 19 is characterized by occurrences of gully erosion, embankment scour, and slope failures in the general vicinity of the outfall. The soil type present at this feature is fine sandy loam. Although dense vegetation and fallen leaves presented difficulties in assessing the full extent of erosion present at this feature, notable erosion of the culvert embankment was observed. The erosion present at this feature can be attributed to loose soils, steeply sloped embankments, and the large volume of drainage that this area receives under peak flow conditions. The potential for future downstream impacts exists should erosion persist in this area.

Erosion associated with NASO 19 generally occurs in a 120 foot horseshoe-shaped footprint around the culvert embankment. The bank height is approximately 12 feet. A deep erosion gully is also present along the southern embankment and measures approximately four feet deep and three feet wide. A total area of approximately 1,500 SF of erosion is present at this feature.

Photograph 5-22: NASO 19, Embankment Erosion at Oufall 002

5.1.20 NASO 20

Erosion feature NASO 20 is located at the convergence of a roadside drainage ditch and multiple pipe culverts at Outfall 005, immediately outside of the perimeter security fence along Potters Road. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-1 and a photograph is provided as Photograph 5-23. The GPS coordinates for this feature are latitude 36.8375 and longitude -76.0391.

NASO 20 is characterized by occurrences of streambed scour, gully erosion and embankment scour. The soil type present at this feature is loam. The erosion present at this feature can primarily be attributed to the large volume of drainage that this area receives under peak flow conditions. A deep scour hole located where the roadside ditch enters the outfall area presents a potential safety issue due to its close proximity to the road. Erosion gullies along the culvert embankment, resulting from the shallow concentration of upgradient drainage from the adjacent agricultural field, undermine the perimeter security fence and present potential security concerns. Additionally, erosive scour at the embankment of the culverts passing under the road will begin to undercut the roadway if erosion persists and may pose future problems relating to roadway stability.

The general depth of scouring and gully erosion in the area ranges from approximately three to five feet deep. The total area of the erosion feature is approximately 200 SF.

Photograph 5-23: NASO 20, Ditch Scour and Embankment Erosion at Outfall 005

5.2 NASO DNA

A total of three erosion features, designated as NASO DNA 01 through NASO DNA 03, were identified during field assessment activities at NASO DNA. The surface waters surveyed and the three erosion features identified are shown in Figure 5-2. These erosion features are discussed in detail in the following subsections.

5.2.1 NASO DNA 01

Erosion feature NASO DNA 01 is located at a bend along a small roadside drainage ditch. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-2 and a photograph is provided as Photograph 5-24. The GPS coordinates for this feature are latitude 36.8147 and longitude -75.9707.

NASO DNA 01 is characterized by the occurrence of minor streambank scour along a ninety degree bend in the drainage ditch and undermining of the adjacent security fence. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to the abrupt change in flow direction, which is likely only an issue under peak flow conditions.

Approximately 20 feet of erosive scour is present along the three feet deep streambank. The total eroded area is approximately 60 SF.

Photograph 5-24: NASO DNA 01, Streambank Scour along Roadside Ditch

5.2.2 NASO DNA 02

Erosion feature NASO DNA 02 is located along the southern shoreline of Lake Christine. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-2 and a photograph is provided as Photograph 5-25. The GPS coordinates for this feature are latitude 36.8145 and longitude -75.9769.

NASO DNA 02 is characterized by occurrences of limited embankment scour and failure along a relatively small section of the lake shoreline. The soil type present at this feature is silty loam. The erosion present at this feature can be attributed to wave action from the lake.

Approximately 500 feet of erosion is present along the shoreline, which varies in height from one to four feet above the water. Assuming an average height of 2.5 feet, the total eroded area of shoreline that is visible above the water is 1,250 SF.

Photograph 5-25: NASO DNA 02, Shoreline Erosion at Lake Christine

5.2.3 NASO DNA 03

Erosion feature NASO DNA 03 is located at the outlet of a drainage ditch culvert that passes beneath an unpaved roadway, approximately 0.60 miles upstream of Redwing Lake. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-2 and a photograph is provided as Photograph 5-26. The GPS coordinates for this feature are latitude 36.8035 and longitude -75.9698.

NASO DNA 03 is characterized by failure of the culvert embankment, resulting in potential blockage of the culvert outlet and roadway stability concerns. The soil type present at this feature is silty loam. The embankment failure is likely due to the concentration of upgradient drainage from the overlaying unpaved roadway at the point immediately above the culvert.

A section of the embankment above the culvert approximately 10 feet wide has collapsed. The embankment height is approximately three feet. The total eroded area is approximately 30 SF.

Photograph 5-26: NASO DNA 03, Embankment Failure and Culvert Obstruction along Roadway

5.3 NALFF

A total of three erosion features, designated as NALFF 01 through NALFF 03, were identified during field assessment activities at NALFF. The surface waters surveyed and the three erosion features identified are shown in Figure 5-3. These erosion features are discussed in detail in the following subsections.

5.3.1 NALFF 01

Erosion feature NALFF 01 is located along a roadside drainage ditch that receives drainage from an adjacent agricultural field and is approximately 585 feet upstream of Pocaty Creek. Significant deep erosion is present at this location. Both NALFF 01 and the conjoining downstream erosion feature, NALFF 02, have contributed to the transport of a large volume of sediment that has primarily accumulated in a wooded area located between the end of NALFF 02 and Pocaty Creek. Although the ditches within which NALFF 01 and NALFF 02 are located appear to drain in the general direction toward Pocaty Creek, no direct discharge to Pocaty Creek was observed. The wooded area at the end of NALFF 02, where sediment is deposited, is of generally low relief and drainage appears to dissipate into sheet flow upon exit from the ditch channel. Therefore, sediment transported from these erosion features presently accumulates within the wooded area prior to Pocaty Creek and appears to have no significant impacts to the creek itself. The general location of this erosion feature is presented in Figure 5-3 and photographs are provided as Photographs 5-27 and 5-28. The GPS coordinates for this feature are latitude 36.6758 and longitude -76.1507.

NALFF 01 is characterized by significant drainage ditch scour. The soil type present at this feature is fine sandy loam. The erosion present at this feature can primarily be attributed to the large volume of drainage that the ditch appears to receive under peak flow conditions. The origination of the scour is likely due to flow restrictions at the downstream pipe culvert, which can be attributed to either obstruction of the culvert inlet from the accumulation of debris or the culvert having insufficient capacity to manage the drainage it receives. The scour appears to have originated at the culvert inlet and receded upstream to the present location of the upstream portion of the erosion feature NALFF 0l.

This erosion feature is approximately 100 feet long and 6 feet deep, with an average width of 10 feet resulting in a volume of approximately 225 CY. Immediately upstream of the erosion feature, the typical dimensions of the drainage ditch are approximately three feet wide and two feet deep. An estimated two CY of debris consisting of dead grasses and soil is present at the culvert inlet.

Photograph 5-27: NALFF 01, Scour along Agricultrual Field Ditch

Photograph 5-28: NALFF 01, Scour along Agricultrual Field Ditch

5.3.2 NALFF 02

Erosion feature NALFF 02 is located along an agricultural drainage ditch, approximately 300 feet upstream of Pocaty Creek. Significant erosion is present at this location. Both NALFF 02 and its conjoining upstream erosion feature, NALFF 01, have contributed to the transport of a large volume of sediment that has primarily accumulated in a wooded area located between the end of NALFF 02 and Pocaty Creek. Although the ditches within which NALFF 01 and NALFF 02 are located appear to drain in the general direction toward Pocaty Creek, no direct discharge to Pocaty Creek was observed. The wooded area at the end of NALFF 02, where the sediment is deposited, is of generally low relief and drainage appears to dissipate into sheet flow upon exit from the ditch channel. Therefore, sediment transported from these erosion features presently accumulates within the wooded area prior to Pocaty Creek and appears to have no significant impacts to the creek itself. The general location of this erosion feature is presented in Figure 5-3 and a photograph is provided as Photograph 5-29. The GPS coordinates for this feature are latitude 36.6765 and longitude -76.1501.

NALFF 02 is characterized by occurrences of streambank scour along the southeastern streambank of an agricultural drainage ditch, erosion gullies along the northwestern streambank, and heavy sedimentation along the streambed. The soil type present at this feature is fine sandy loam. The streambank scour, which occurs along the well vegetated southeastern streambank, can be attributed to the large volume of drainage that this ditch receives under peak flow conditions. The erosion gullies, occurring along the northwestern streambank where no vegetative buffer exists, are due to the concentration of upgradient drainage entering the ditch from the adjacent agricultural field.

Approximately 230 feet of erosion is present along this streambank. The depth of the ditch is approximately four feet. Multiple erosion gullies occur along the entire length of the northwestern streambank and range in size from three to five feet long, one to three feet deep, and one to four feet wide.

Photograph 5-29: NALFF 02, Erosion Gullies along Agricultrual Field Ditch

5.3.3 NALFF 03

Erosion feature NALFF 03 consists of multiple erosion features located along an approximate 0.45 mile span of the Chesapeake City drainage channel that discharges directly to Pocaty Creek. These features are designated as NALFF 03(a) through NALFF 03(g) and are addressed as a single unit because of they are located along the same reach of the channel, have similar erosion characteristics, and the repair of these locations involve the same technologies (regarding, filter fabric installation, and riprap). It is very likely that areas 3(a – g) would be repaired by the same contractor. These areas are discussed in further detail below.

5.3.3.1 NALFF 03(a)

Erosion feature NALFF 03(a) consists of erosion present within a large drainage channel known as the City Channel from the channel's intersection with Pocaty Creek to approximately 350 feet upstream of the creek. Significant erosion is present within this section of the channel and heavy sedimentation was observed within Pocaty Creek at the channel's point of discharge. The general location of this erosion feature is presented in Figure 5-3 and a photograph is provided as Photograph 5-30. The GPS coordinates for this feature are latitude 36.6811 and longitude -76.1545.

NALFF 03(a) is primarily characterized by streambed scour along the span of the feature, as well as some minor streambank scour on the southern streambank in an area immediately downstream of the existing riprap armoring. The soil type present at this feature is loam. Both occurrences of erosion can be attributed to the large volume of drainage this channel appears to receive under peak flow conditions.

Approximately 350 feet of significant streambed scour is present. This scour consists of the washout of the main portion of the channel and stabilization matting that was originally placed during channel construction and the channelization of the streambed below the original construction grade of the streambed. The channelization due to scour is approximately 3.5 feet wide and two feet deep.

An estimated 50 to 100 SF of scouring is present along the southern streambank in the area immediately downstream of the existing riprap armoring.

Photograph 5-30: NALFF 03(a), Streambed Scour along Chesapeake City Channel

5.3.3.2 NALFF 03(b) through NALFF 03(g)

Erosion features NALFF 03(b) through NALFF 03(g) consist of similar erosion features located where lateral drainage ditches discharge into the larger City Channel. Each lateral ditch flows to a small diameter pipe culvert located along an approximate 0.32 mile span of the large City channel. These culverts direct drainage from agricultural field ditches which are tributary to the main drainage channel and are located just outside of the main channel. The general locations of these erosion features are presented in Figure 5-3 and a typical photograph is provided as Photograph 5-31. Although Photograph 5-31 is for NALFF 03(b) it is also representative of

features NALFF 03(c through g). The GPS coordinates for NALFF(b) is latitude 36.6814 and longitude -76.1568.

These erosion features are characterized by heavy scour at the culvert inlets. The soil type present at these features is loam. The scour can be attributed to insufficient culvert capacity under peak flow conditions resulting in a restriction of flow and turbulent conditions at the culvert inlet.

Although the extent of erosion varies at each feature, an average of approximately 50 SF of erosion is present at each location. The typical depth of erosion at each location is one foot.

Photograph 5-31: NALFF 03(b), Scour at Agricultrual Field Culvert

5.4 NSA NWA

A total of six erosion features, designated as NSA NWA 01 through NSA NWA 06, were identified during field assessment activities at NSA NWA. The surface waters surveyed and the six erosion features identified are shown in figure 5-4. These erosion features are discussed in detail in the following subsections.

5.4.1 NSA NWA 01

Erosion feature NSA NWA 01 is located at a drainage ditch pipe culvert approximately 325 feet upstream of Mill Stream. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. It was noted that erosion and sediment control measures, including riprap and a rock check dam, were present downstream within the

drainage ditch between the culvert and Mill Stream. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-32. The GPS coordinates for this feature are latitude 36.5725 and longitude -76.2577.

NSA NWA 01 is characterized by the occurrence of gully erosion along one side of the culvert embankment. The soil type present at these features is fine sandy loam. The erosion can be attributed to the concentration of upgradient drainage from the overlaying roadway entering the ditch at the culvert embankment. A minor accumulation of sediment is present within the pipe culvert, although flow through the culvert is not obstructed.

The gully is approximately three feet wide and two feet deep along the four feet tall embankment.

Photograph 5-32: NSA NWA 01, Gully Erosion along Culvert Embankment

5.4.2 NSA NWA 02

Erosion feature NSA NWA 02 is located along Mill Stream. Heavy sedimentation was noted about 200 feet downstream of the feature, although overall downstream impacts to water quality as a result of erosion at NSA NWA 02 appear to be minimal. The occurrences of erosion and sedimentation that are present along this stream section appear to be typical of a channelized natural stream such as Mill Stream. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-33. The GPS coordinates for this feature are latitude 36.5729 and longitude -76.2583.

NSA NWA 02 is characterized by a significant obstruction to normal stream flow and minimal sheet erosion along the shoreline. The obstruction to flow is due to trees that have fallen across the stream and have accumulated debris. The soil type present at this feature is fine sandy loam. The occurrence of erosion at this feature is primarily present along the southern streambank, where scour occurs as a result of the altered flow path from the obstruction present in the stream.

An estimated two to three CY of debris is present within the stream. Approximately 30 linear feet of scour is present along the southern streambank.

Photograph 5-33: NSA NWA 02, Flowpath Obstruction and Sheet Erosion along Mill Stream

5.4.3 NSA NWA 03

Erosion feature NSA NWA 03 is located at a drainage ditch pipe culvert adjacent to a large agricultural field approximately 150 feet upstream of Mill Stream. Significant erosion is present at this feature and sedimentation was observed in Mill Stream at the ditch's point of discharge. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-34. The GPS coordinates for this feature are latitude 36.5755 and longitude -76.2522.

NSA NWA 03 is characterized by a number of erosion issues, including deep gully erosion, streambed and streambank scour, and slope failures. The soil type present at this feature is fine sandy loam. Erosion primarily occurs around the outlet of the culvert and immediately downstream, although erosion is also present at the culvert inlet and atop the culvert embankment. The erosion can be attributed to the large volume of drainage this area receives

under peak flow conditions. The lack of outlet protection, such as riprap, has led to severe streambed scour and has greatly increased the depth of the ditch, particularly under the culvert outlet, and has resulted in significant downstream slope failures. Deep erosion gullies on the southern side of the culvert outlet indicate that substantial shallow concentrated drainage is also received from the upgradient agricultural field. Overall, it appears that this culvert was constructed prior to recent development and is no longer adequately sized to manage the associated increase in drainage volume.

The pipe culvert is approximately 40 feet in length. The streambank height is eight to 10 feet at the culvert inlet and 10 to 12 feet at the outlet. Where eroded, the width of the ditch is approximately 20 feet, which is about double the normal width of the ditch. For the purpose of estimating mitigation costs, an approximate 10,000 SF area would need to be addressed. This includes the erosion area and the surrounding woods and brush that would need to be cleared to facilitate mitigation.

Photograph 5-34: NSA NWA 03, Embankment Scour at Culvert Upstream of Mill Stream

5.4.4 NSA NWA 04

Erosion feature NSA NWA 04 is located at a pipe culvert at the downstream end of an unnamed, natural stream, at its intersection with Mill Stream. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-35. The GPS coordinates for this feature are latitude 36.5687 and longitude -76.2668.

NSA NWA 04 is characterized by obstruction of the culvert inlet resulting in bypass flow along the outside of the culvert pipe and erosion of the culvert embankment. The soil type present at this feature is fine sandy loam. The obstruction is due to the accumulation of debris consisting of fallen branches and leaves.

About half of the culvert inlet is obstructed. An estimated one CY of debris is present outside of the culvert, at its inlet. Approximately 30 feet of erosion occurs along the bottom and sides of the pipe.

Photograph 5-35: NSA NWA 04, Bypass Flow at Mill Stream Culvert

5.4.5 NSA NWA 05

Erosion feature NSA NWA 05 is located at a drainage ditch arch culvert located approximately 0.22 miles upstream of the eastern boundary of the base. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-36. The GPS coordinates for this feature are latitude 36.5658 and longitude -76.2483.

NSA NWA 05 is characterized by the occurrence of gully erosion along the culvert embankment. The soil type present at this feature is loam. The erosion can be attributed to the concentration of upgradient drainage from the overlaying roadway entering the ditch at the culvert embankment. It was apparent upon inspection that soil had been dumped into the gully sometime after the erosion had originally occurred. This soil was washed out of the gully at the time of inspection.

The gully is approximately two feet wide and three feet deep along the four feet tall embankment.

Photograph 5-36: NSA NWA 05, Gully Erosion along Culvert Embankment

5.4.6 NSA NWA 06

Erosion feature NSA NWA 06 is located at a drainage ditch pipe culvert approximately 0.18 miles upstream of the eastern base boundary. No significant downstream impacts, including the transport of sediment, were observed as a result of this feature. The general location of this erosion feature is presented in Figure 5-4 and a photograph is provided as Photograph 5-37. The GPS coordinates for this feature are latitude 36.5656 and longitude -76.2477.

NSA NWA 06 is characterized by the occurrence of sheet erosion along the culvert embankment. The soil type present at this feature is loam. The erosion can be attributed to upgradient sheet flow over the embankment and sparse vegetation in the area. Some of the erosion appears to be due to runoff from the paved parking lot located inside the adjacent fence line as there is evidence of sediment between parking lot and embankment. The gully has some vegetation growing in it so it appears that this erosion feature has been around for a while. Approximately 500 SF of sheet erosion is present at this feature.

Photograph 5-37: NSA NWA 06, Sheet Erosion along Culvert Embankment

Table 5-1: Primary Causes of Erosion for Each Erosion Feature

Area of Erosion	Latitude	Longitude	Poor Agricultural Practices	Recent Land Development or Human Activity	Poor Drainage Structure Design	Severe Storm Event	Little or No Maintenance	Natural Erosion or Steep Slopes

6 DISCUSSION AND RECOMMENDATIONS

Based on the survey results discussed in Section 5.0 of this report, SEE has provided recommendations to address each erosion feature with an emphasis to stop any current erosion and downstream transport of sediment. The recommendations utilize proven methods and technologies that meet the following primary criteria: effectiveness in controlling erosion, implementability from an engineering standpoint, and cost effectiveness.

6.1 NASO

A total of 20 erosion features, designated as NASO 01 through NASO 20, where identified during field assessment activities at NASO and presented in Section 5.1 of this report. The following subsections discuss SEE's recommendations for addressing these erosion features. Estimated costs are also provided for each recommended approach with supporting documentation provided in Appendix C. Cost estimates are turnkey and include planning, supplies, equipment, and manpower for implementation, in addition to any required maintenance costs.

6.1.1 NASO 01

Erosion feature NASO 01 consists of multiple erosion features located along an approximate 500 foot span of an agricultural field drainage ditch that discharges into West Neck Creek. These features are designated as NASO 01(a) through NASO 01(d). For cost estimate purposes, these features are addressed as a single unit because of their close proximity to each other, similar erosion characteristics, and use of similar methods to address them.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. Where erosion rills and gullies are present, the recommended mitigation approach is to restore the areas to their original grade and reestablish vegetation to prevent erosion from recurring. Soil fill will be required to bring the areas up to grade. Grading work can be performed using a backhoe loader or similar equipment. Final grades should have a uniform surface with no irregularities to prevent drainage from concentrating and causing erosion to reoccur.

Where slope failure occurs along the streambank, the recommended mitigation approach is to restore the streambank to a stable condition. This can be accomplished by reducing the slope and revegetating the streambank. In the area where slope failure occurs, the streambank should be cut back to reduce the slope and minimize the potential for future failure. Where slope reduction is performed, the final grade of the newly sloped area should gradually taper into the existing undisturbed sections of the streambank to minimize abrupt irregularities that could lead to further erosion. In general, final slopes exceeding three horizontal to one vertical should be avoided when implementing these mitigation approaches.

The eight inch drain pipes associated with these erosion features should be addressed by removing the obstruction present at NASO 1(b) and by repairing or replacing the damaged section present at NASO 1(c). Maintenance of the planted vegetation and good agricultural practices will prevent the erosion from reoccurring.

Vegetation can be reestablished by applying an appropriate seed mixture. Soil amendments, such as topsoil, may need to be incorporated to provide the nutrients necessary to support growth. The Erosion and Sediment Control (ESC) Technical Bulletin No. 4 issued by the Virginia Department of Conservation and Recreation (VDCR), July 2003 specifies native plant species applicable for erosion control in Coastal Plain Areas. An example of an applicable seed mixture consists of tall fescue 62-72%, Bermudagrass 0-15%, Red Top Grass or Creeping Red Fescue 1%, Seasonal Nurse Crop 13%, and/or Sericea Lespedeza 13%. Five foot vegetative buffers should be maintained along the ditch edges to protect against erosion.

Soil stabilization matting should be installed immediately upon completion of seed application. The matting will hold the seed in place, promote its germination, and control erosion until vegetation is firmly established. The application of soil stabilization matting should be in accordance with the specifications of VA ESC Handbook, chapter 3, section 3.36.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for initial plant growth.

This mitigation approach will require approximately five days to execute, excluding the planning and preparation prior to field work. The total estimated cost of addressing erosion feature NASO 01 (a-d) is $22,700. This estimate includes planning, construction, and maintenance costs. The documentation for all costs for NASO sites is provided in Appendix C.

6.1.2 NASO 02

The recommended approach to mitigating erosion feature NASO 02 is to restore the eroded streambank slope to a stable condition which will resist the forces that caused this erosion feature. Stabilization can be achieved by reducing the slope of the eroded area and establishing vegetation on the disturbed surface. All work should be performed during low water levels without influence from storm events.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. Reducing the overall slope of the streambank by cutting back and removing a portion of the bank will minimize the potential for future slope failure. The resulting slope should not exceed three horizontal to one vertical.

Establishing vegetation can be achieved by placing sod as a final cover. Using sod will increase the likelihood of establishing vegetation quickly, provide immediate erosion control, and match the vegetation of the surrounding area. This mitigation approach will require approximately three days to execute, excluding the planning and preparation prior to execution.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for plant growth.

The total estimated cost of addressing erosion feature NASO 02 is $7,500. This estimate includes planning, construction, and maintenance costs.

6.1.3 NASO 03

The recommended approach to mitigating erosion feature NASO 03 is to apply riprap outlet protection between the culvert and the pond. The activities associated with placement of the riprap include minor regrading of the channel to provide a uniform surface, installation of a layer of geotextile filter fabric on the graded surface, and placement of riprap to a final grade matching the regraded surface. Regrading and riprap placement can be performed using a backhoe or similar equipment.

The application of riprap should be in accordance with the specifications of VA ESC Handbook, Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap. The length of channel to place rip-rap would be 35 feet.

This mitigation approach will require approximately one day to implement, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NASO 03 is $7,500. This estimate includes planning and construction costs.

6.1.4 NASO 04

The recommended approach to mitigating erosion feature NASO 04 is to overseed (place new seed on an area already seeded) the large bare areas to establish a well vegetated area where the roots will hold the soil in place. This area already has a stable, gentle slope with some established vegetation and regrading is not necessary. In addition, some soil amendments or topsoil should be added prior to seeding to provide more nutrients for growth of vegetation. The existing silt fencing should be removed. This approach provides prompt and effective mitigation with low construction and maintenance costs and can be implemented using conventional construction equipment and manpower.

Establishing vegetation can be achieved by overseeding areas where vegetation is sparse. The *Erosion and Sediment Control Technical Bulletin No. 4, July 2003* recommends using the native plants for erosion control in Coastal Plain Areas: tall fescue 62-72%, Bermudagrass 0-15%, Red Top Grass or Creeping Red Fescue 1%, Seasonal Nurse Crop 13%, and/or Sericea Lespedeza 13%.

Soil stabilization matting should be installed immediately upon completion of overseeding efforts. The matting will hold the seed in place, promote germination, and control erosion until vegetation is established. All materials and installation should meet the specifications of VA ESC Handbook Chapter 3, Section 3.36 pertaining to requirements for soil stabilization matting.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for initial plant growth.

This mitigation approach will require approximately three days to execute, excluding the planning and preparation prior to field work. The total estimated cost of addressing erosion feature NASO 04 is $16,500. This estimate includes planning, construction, and maintenance costs.

6.1.5 NASO 05

Although there is no significant downstream impact from erosion, repairing this area could prevent a small area from becoming a larger erosion problem. The recommended approach to addressing NASO 05 is to add riprap along both sides of the existing culvert and over the top of the culvert between the culvert and the golf cart path. The activities associated with adding riprap in this area would be to strip the vegetation on both sides and above the culvert, regrade the area to provide a more uniform sloped surface, place a layer of filter fabric on the graded surface, and add riprap to a final grade matching that of the surrounding ground surface.

The vegetation and topsoil should be stripped using a backhoe or similar equipment and these materials should be either stored at on-site stockpiles for reuse at other on-site areas or disposed of as solid waste in an on-site (preferable) or off-site landfill. The same backhoe could be used to regrade the relatively small area. A layer of filter fabric meeting the specifications in VA ESC Handbook Chapter 3, Section 3.36 should be placed on top of the graded slope and anchored in the upslope and side edges. This filter fabric will help to stabilize the subgrade and minimize plant growth through the riprap. A layer of riprap meeting VA ESC Handbook Chapter 3, Section 3.19 should be placed on the matting to reach a uniform grade matching the surrounding ground surface. This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work.

There are no maintenance activities associated with this approach.

The total estimated cost of addressing erosion feature NASO 05 is $8,000. This estimate includes planning and construction costs.

6.1.6 NASO 06

The recommended approach to mitigating erosion feature NASO 06 is to install a retaining wall with backfill along the embankment that has separated and sloughed toward the pond. This approach will stabilize the embankment, maximize the usable golf course space, and add an aesthetic quality to the area. A retaining wall composed of H-beams and wooden lagging could be constructed relatively easily. This recommendation only considers repair of the separated area but the Navy may want to consider other steep areas around the pond that could collapse or slough off in the future.

Since there is an existing strip of tall vegetation, the first step would be to strip and remove the vegetation and topsoil landward to the extent that separation has occurred from the water's edge. The retaining wall would then be constructed as follows: drive H-piles vertically into the ground at the water's edge. Treated wooden lagging such as railroad ties or something similar could then be placed horizontally within the U-shaped portion of the H-piles with little or no anchoring

required until they reach the top of the H-piles. The equipment used for driving the H-piles should have rubber tires instead of metal tracks to avoid tearing up the golf course area.

Following completion of the retaining wall, the space behind it should be backfilled with course grained soil near the bottom and against the wall to facilitate drainage and minimize build-up of pore water pressure. A layer of topsoil would then be placed above the backfill. Establishing vegetation can be achieved by placing sod as a final cover on the topsoil and any disturbed surface upon completion of the filling and regrading activities. Using sod will increase the likelihood of establishing vegetation quickly and will conform with the existing vegetation at the golf course. This mitigation approach will require approximately three weeks to execute, excluding the planning and preparation prior to field work.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for plant growth.

The total estimated cost of addressing erosion feature NASO 06 would be approximately $73,800. This estimate includes planning, construction, and maintenance costs.

6.1.7 NASO 07

The recommended approach to addressing NASO 07 is to remove the existing loose riprap and topsoil, remove and replace the end section of the existing culvert, encase the end section of culvert in concrete, and re-install riprap on both sides and above the culvert to a final grade matching that of the surrounding ground surface.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. The loose and strewn about riprap and topsoil should be removed using a backhoe or similar equipment and either stored at on-site stockpiles for reuse or disposed of as solid waste in an on-site (preferable) or off-site landfill. The end section of the existing culvert should be removed and replaced as it may be damaged; other culvert sections are intact and do not need replacement. New riprap should be placed beneath the new culvert to serve as a bedding material to support the new culvert at the same elevation as the old culvert. A minimal concrete collar should be placed around the new culvert to stabilize it and hold it in place.

A layer of soil stabilization matting meeting the specifications in VA ESC Handbook Chapter 3, Section 3.36 should be placed on the regraded area and anchored in the upslope and side edges. This soil matting will help to stabilize the subgrade and minimize plant growth through the riprap. A layer of riprap meeting VA ESC Handbook Chapter 3, Section 3.19 should be placed on the matting to reach a uniform grade matching the surrounding ground surface. The riprap should extend from the water's edge, up the bank on both sides of the culvert, and to the edge of the lawn. This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work.

There are no maintenance activities associated with this approach.

The total estimated cost of addressing erosion feature NASO 07 is $10,300, which includes planning and construction costs.

6.1.8 NASO 08

The recommended approach to mitigating erosion feature NASO 08 is to install a retaining wall with backfill along the embankment that has separated and sloughed toward the pond. This approach will stabilize the embankment, maximize the usable golf course space, and add an aesthetic quality to the area. A retaining wall composed of H-beams and wooden lagging could be constructed relatively easily. This recommendation only considers repair of the separated area but the Navy may want to consider repairing other steep areas around the pond that could collapse or slough off in the future.

Since there is an existing strip of tall vegetation, the first step would be to strip and remove the vegetation and topsoil landward to the extent that separation has occurred from the water's edge. The retaining wall would then be constructed as follows: drive H-piles vertically into the ground right at the water's edge, treated wooden lagging such as railroad ties or something similar could then be placed horizontally within the U-shaped portion of the piles with little or no anchoring required until they reach the top of the H-piles. The equipment used for driving the H- piles should have rubber tires instead of metal tracks to avoid tearing up the golf course area.

Following completion of the retaining wall, the space behind it should be backfilled with course grained soil near the bottom and against the wall to facilitate drainage and minimize build-up of pore water pressure. A layer of topsoil would then be placed above the backfill. Establishing vegetation can be achieved by placing sod as a final cover on the topsoil and any disturbed surface upon completion of the filling and regrading activities. Using sod will increase the likelihood of establishing vegetation quickly and will conform with the existing vegetation at the golf course. This mitigation approach will require approximately two weeks to execute, excluding the planning and preparation prior to field work.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for plant growth.

The total estimated cost of addressing erosion feature NASO 08 is $27,400. This estimate includes planning, construction, and maintenance costs.

6.1.9 NASO 09

No erosion was observed in this area, although the potential for erosion exists due to obstruction of the culvert. The obstruction is a result of an accumulation of debris consisting of approximately one to two feet of leaves and pine needles over a 30 SF area at the culvert inlet. In order to prevent future erosion issues, it is recommended that the obstruction be removed and disposed of on-site, if possible. In addition, this area should be monitored annually by conducting a visual survey for erosion. Annual maintenance will keep the erosion from reoccurring.

The total estimated cost of addressing erosion feature NASO 09 is $3,700. This includes debris removal and monitoring costs.

6.1.10 NASO 10

A heavy accumulation of debris at the culvert inlet has caused stream flows to backup and erode a significant portion of the embankment supporting the overlaying roadway. The recommended approach to addressing NASO 10 is to remove the existing debris from the culvert and strip the vegetation from both sides and above the existing culvert, and excavate a sufficient amount of the overburden from above and laterally of the culvert to enable reconstruction of the embankment. Structural fill would be placed and compacted up to the roadway edge. A concrete headwall would be placed from the culvert up to the roadway to provide stability for the embankment and reduce future erosion.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. The eroded area is estimated to be 40 feet in width and approximately 18 CY of soil, debris, vegetation is recommended for excavation and removal. These materials should be removed using a backhoe or similar equipment and should be either stored at on-site stockpiles for reuse or disposed of as solid waste in an on-site (preferable) or off-site landfill. Following removal of the soil and debris, the end section of the existing 48-inch metal culvert should be inspected for structural integrity and replaced if there are any concerns.

A steel reinforced concrete headwall should be constructed at the outer edge of the existing culvert and extend vertically approximately six feet and laterally approximately ten feet on each side of the culvert.

A sufficient amount of structural fill containing coarse grained material should be imported and placed behind the headwall, extending up to the bottom of the roadway and laterally to the extent of the eroded areas. Approximately 36 CY of structural fill will be required for this effort. The fill should be placed in eight inch layers and compacted using a vibratory roller or similar equipment.

Due to the steepness of the embankment and the susceptibility of vegetation to erosion, a layer of riprap meeting VA ESC Handbook Chapter 3, Section 3.19 should be placed on top of the newly compacted embankment extending up to the roadway and laterally for the length of the headwall (approximately 40 feet).

This technical approach will require approximately 30 days to execute, excluding the planning and preparation time prior to field work.

The total estimated cost of addressing erosion feature NASO 10 is $63,000, which includes planning and construction.

6.1.11 NASO 11

Although the end section of the culvert has separated from the rest of the culvert, no erosion or downstream impacts were observed in this area. In order to prevent future erosion issues, it is

recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO 11 is $950 per year for the annual monitoring.

6.1.12 NASO 12

Although there is one bare spot on the south embankment, no significant erosion or downstream impacts were observed in this area. It is recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO 12 is $950 per year for the annual monitoring.

6.1.13 NASO 13

Although no erosion was observed at this location (Outfall 004), a significant obstruction has occurred due to accumulation of debris consisting mostly of vegetation. The volume of debris against the fence is estimated to be approximately 4 CY. Removal of this debris is recommended because the flow path of the stream is obstructed, the force of debris against the fence could rip a hole in or otherwise the damage the fence, and the obstruction could cause flooding on the upstream side of the fence. The debris consists of vegetation and should be removed for on-site disposal, if possible. In addition, this area should be monitored annually by conducting a visual survey for future debris accumulation and/or erosion and repairs designed and implemented if larger scale erosion issues are observed.

The total estimated cost of addressing erosion feature NASO 13 is $3,700. This amount includes debris removal and monitoring costs.

6.1.14 NASO 14

Although some minor erosion is occurring on the bank of this area along Owl Creek, no significant erosion or downstream impacts were observed. In addition, there would be limited access to this area by construction equipment to perform any repairs, and it is likely that future recreational use in this area would return this area to the present condition. However, it is recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO 14 is $950 per year for annual monitoring.

6.1.15 NASO 15

This site is located in the Sand Pit Ponds area where there are numerous bare areas due to the sandy soil present. There is no evidence of erosion or downstream impacts in this area. The bottom of the ditch was dry and without any significant flow, and the potential for erosion is

considered low; however, it is recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO 15 is $950 per year for monitoring.

6.1.16 NASO 16

The recommended approach to mitigating erosion feature NASO 16 is to create a riprap lined swale within the existing gully to prevent further erosion from occurring. This approach is preferred over attempting to restore the area to its original condition because drainage naturally concentrates at this point and would continue to erode the area.

The activities associated with adding riprap in this area includes stripping any existing vegetation along the gully, regrading the area to provide a uniform slope, installing a layer of geotextile fabric on the graded surface, and placing riprap to a final grade matching the bottom of the adjacent security fence.

The vegetation and topsoil should be stripped using a backhoe or similar equipment and these materials should be either stored at on-site stockpiles for reuse or disposed of as solid waste in an on-site (preferable) or off-site landfill. The same backhoe can be used to regrade the area. A layer of geotextile filter fabric meeting the specifications of VA ESC Handbook Chapter 3, Section 3.19 should be installed within the graded swale and anchored per the handbook. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap. A layer of riprap meeting the specifications of VA ESC Handbook Chapter 3, Section 3.19 should be placed on the geotextile to reach a final grade matching the bottom of the security fence. This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work.

There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NASO 16 is $15,600. This estimate includes planning and construction costs.

6.1.17 NASO 17

The recommended approach to mitigating erosion feature NASO 17 is to place riprap along the streambed and side slopes of the embankment where erosion has occurred and revegetate the areas of sparse or no vegetation. The portion of the channel to be riprapped is approximately 350 feet long and up to 12 feet deep. In addition to slowing flow, the riprap will help to stabilize the side slopes within the ditch.

A temporary silt fence should be placed on both sides of the channel to prevent runon from reaching disturbed areas. Implementation of this approach involves stripping vegetation and topsoil from the streambed, constructing rip-rap along the side slopes of the stream beds, overseeding of sparsely vegetated areas along the streambanks, and disposal of the material stripped from the streambed. Debris generated from this effort can be disposed of as solid waste in an on-site (preferable) or off-site landfill.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where the riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against scour. The geotextile will also prevent the migration of soils from the subgrade into the rock and minimize plant growth through the rock.

Revegetation can be accomplished by overseeding the bare areas to establish a well vegetated area where the roots will hold the soil in place. Soil amendments, such as topsoil, should be incorporated to provide nutrients. The VDCRs *Erosion and Sediment Control Technical Bulletin No. 4, July 2003*, specifies native plant species applicable for erosion control in Coastal Plain Areas. An example of an applicable seed mixture consists of: tall fescue 62-72%, Bermudagrass 0-15%, Red Top Grass or Creeping Red Fescue 1%, Seasonal Nurse Crop 13%, and/or Sericea Lespedeza 13%. Five foot vegetative buffers should be maintained along the ditch edges to protect against erosion.

The only maintenance activity associated with this approach is watering of the vegetation for two weeks.

Implementation of this work will take approximately one month and the total estimated cost of mitigating erosion feature NASO 17 is $390,200. This estimate includes planning, construction, and maintenance costs.

6.1.18 NASO 18

Only minor erosion is present at NASO 18 and no significant downstream impacts were observed as a result of this erosion feature. It is recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO 18 is $950, which includes monitoring costs only.

6.1.19 NASO 19

Although notable erosion has occurred at NASO 19, dense vegetation, steep slopes, and security fencing pose equipment access issues in this area and mitigation would be a substantial undertaking. Approximately 70 feet of wooded area would require clearance in order to reach this area. At this time, it is recommended that this area be monitored annually by conducting a visual survey to ensure there are no significant increases in erosion that could present potential downstream impacts. The potential for future downstream impacts exists should erosion persist in this area.

The total estimated cost of addressing erosion feature NASO 19 is $950 per year for monitoring.

6.1.20 NASO 20

The recommended approach to mitigating erosion feature NASO 20 is to apply riprap where erosion is present at the outfall and along the drainage ditches parallel to the roadway, and install a concrete headwall where erosion undercuts the culvert embankment.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. Riprap should be placed at the convergence of the roadside drainage ditches and the pipe culverts. The riprap should extend up to and slightly beyond where any erosion occurs within the ditches and on the culvert embankment. The riprap should also extend to where erosion occurs beneath the security fence. The activities associated with adding riprap in this area would be to strip existing vegetation where riprap will be placed, regrade the area to the extent necessary to provide uniform slopes, install a layer of geotextile filter fabric on the graded surface, and place riprap to a final grade matching the regraded surface. Final slopes should not exceed three horizontal to one vertical. A backhoe loader or similar equipment can be used to perform the grading and riprap placement.

Where erosion occurs above and between the concrete pipe culvert that extend beneath the road, a cast-in-place concrete headwall reinforced with structural steel should be installed to prevent undercutting of the embankment that supports the overlaying roadway. This will require some additional excavation of the culvert embankment, but should not require any disturbance of the road itself. The headwall can be prepared by constructing a form to encase the top and sides of the existing concrete pipe culvert.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately two weeks to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NASO 20 is $33,700. This estimate includes planning and construction costs.

6.2 NASO DNA

A total of three erosion features, designated as NASO DNA 01 through NASO DNA 03, were identified during field assessment activities at NASO DNA and presented in Section 5.2 of this report. The following subsections discuss SEE's recommendations for addressing these erosion occurrences. Estimated costs are provided for each recommended approach. The documentation for all NASO DNA areas are in Appendix C.

6.2.1 NASO DNA 01

The recommended approach to mitigating erosion feature NASO DNA 01 is to apply riprap where erosion has occurred along the bend in the drainage ditch. The riprap should also extend to where erosion has occurred around the security fencepost.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. The activities associated with adding riprap in this area include stripping existing vegetation where riprap will be placed, regrading the area to the extent necessary to provide uniform slopes, installing a layer of geotextile filter fabric on the graded surface, and placing riprap to a final grade matching the regraded surface. Final slopes should not exceed three horizontal to one vertical. This work can be performed with a backhoe or similar equipment.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NASO DNA 01 is $9,200. This estimate includes planning and construction costs.

6.2.2 NASO DNA 02

Although some minor erosion is occurring along this section of shoreline at Lake Christine, no significant erosion or downstream impacts were observed in this area and there are no signs of collapse or sloughing along the embankment. It is recommended that this area be monitored annually by conducting a visual survey for erosion to determine if additional erosion control measures are required.

The total estimated cost of addressing erosion feature NASO DNA 02 is $950 per year for monitoring.

6.2.3 NASO DNA 03

Difficulty was encountered in assessing the condition of the culvert at NASO DNA 03 due to the collapsed embankment material obscuring direct inspection, but it is assumed that some degree of blockage is present. The size and construction details associated with the existing culvert are unknown. In addition to blockage concerns, the stability and future use of the overlaying unpaved roadway is a concern, as erosion is likely to continue in this area.

The first step would be to clear the area adjacent to and within the culvert and dispose the material in an on-site (preferred) or off-site landfill. This will facilitate inspection of the culvert

so that an accurate assessment can be made. A temporary measure to mitigate erosion until further action can be determined is to place crushed stone along the section of road crossing over the culvert. The crushed stone should be underlain by geotextile filter fabric. The approach would require a backhoe loader or similar equipment.

This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of removing overlying debris and installing the temporary measure for the roadway at NASO DNA 03 is $6,900. This estimate includes planning and construction costs. Once debris is removed and the current status of the erosion feature can be evaluated, additional recommendations may be required to mitigate the erosion.

6.3 NALFF

A total of three erosion features, designated as NALFF 01 through NALFF 03, were identified during site assessment activities at NALFF and presented in Section 5.3 of this report. The following subsections discuss SEE's recommendations for addressing these erosion occurrences. Estimated costs are provided for each recommended approach. The documentation for all the NALFF costs is provided in Appendix C.

6.3.1 NALFF 01

Significant erosion exists at erosion feature NALFF 01. Erosion of this scale can be indicative of larger problems, such as inadequate channel or culvert capacity and changes in upstream conditions that affect high flow conditions. For larger scale erosion such as this, it is recommended that peak flow volumes be reevaluated prior to mitigation to ensure that proper design options are evaluated.

The recommended approach to mitigating erosion feature NALFF 01 is to utilize the existing eroded area as a catchment basin by regrading the impacted area and lining it with riprap. Removal of the debris from the culvert inlet will also be required as a part of mitigation. This approach would minimize mitigation costs by eliminating the need to import fill material that would be required to restore the area to its original condition. Also, restoring the area to its original condition with soil would increase the likelihood of the same erosion recurring.

The catchment basin upstream of the culvert will provide additional capacity to retain and temporarily store peak flow volumes, as well as provide energy dissipation that will reduce erosion potential downstream. The catchment basin would have the added benefit of acting as a small sedimentation pond by capturing any sediment or debris prior to entering the culvert and preventing sediment transport downstream.

Prior to initiating and land disturbing activities, a temporary silt fence will be placed around the eroded area and any areas disturbed by excavation. The activities associated with creating the catchment basin include cutting back the steeply sloped southwestern streambank and regrading the area to the extent necessary to provide uniform slopes. The excess material generated from cutting back the slopes could be used to restore the equally steep slopes along the northeastern

streambank, since the existing roadway prevents cutting from being performed. The final grade of the catchment basin should gradually taper into the existing ground surface in the area to minimize abrupt irregularities that could lead to further erosion. Additionally, the catchment basin should be constructed to allow complete drainage once flow has subsided, so as to not create standing water.

A layer of riprap will be installed on the surface of the retention basin. The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately two weeks, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NALFF 01 is $116,200. This estimate includes planning and construction costs.

6.3.2 NALFF 02

The primary erosion requiring mitigation at NALFF 02 is along the northwestern drainage ditch where gully erosion occurs due to the concentration of drainage entering the ditch from the adjacent agricultural field.

The recommended approach to mitigating erosion feature NALFF 02 is to restore the areas to their original grade and reestablish vegetation to prevent erosion from recurring. Soil fill will be required to bring the areas up to grade. Grading work can be performed using a backhoe loader or similar equipment. Final grades should have a uniform surface with no irregularities to prevent drainage from concentrating and causing erosion to reoccur.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. Where slope reduction is performed, the final grade of the newly sloped area should gradually taper into the existing undisturbed sections of the streambank to minimize abrupt irregularities that could lead to further erosion. In general, final slopes exceeding three horizontal to one vertical should be avoided when implementing these mitigation approaches. This work can be performed using a backhoe loader or similar equipment.

Following grading, vegetation can be reestablished by applying an appropriate seed mixture. Soil amendments, such as topsoil, should be incorporated to provide the nutrients if necessary to support growth. The VDCRs *Erosion and Sediment Control Technical Bulletin No. 4* dated July 2003 specifies native plant species applicable for erosion control in Coastal Plain Areas. An example of an applicable seed mixture consists of tall fescue 62-72%, Bermudagrass 0-15%, Red Top Grass or Creeping Red Fescue 1%, Seasonal Nurse Crop 13%, and/or Sericea Lespedeza 13%. Five foot vegetative buffers should be maintained along the ditch edges to protect against erosion.

Soil stabilization matting should be installed immediately upon completion of seed application. The matting will hold the seed in place, promote its germination, and control erosion until vegetation is firmly established. The application of soil stabilization matting should be in accordance with the specifications of VA ESC Handbook chapter 3, section 3.36.

This mitigation approach will require approximately five days to execute, excluding the planning and preparation time prior to field work.

Maintenance in the form or watering the newly planted vegetation would be required for approximately two weeks.

The total estimated cost of mitigating erosion feature NALFF 02 is $32,700. This estimate includes planning, construction, and maintenance costs.

6.3.3 NALFF 03

Erosion feature NALFF 03 consists of multiple features located along an approximate 0.45 mile reach of the Chesapeake City Channel that discharges directly to Pocaty Creek. These erosion features are designated as NALFF 03(a) through NALFF 03(g). For control mitigation purposes, features NALFF 03(a) through NALFF 03(g) are addressed as a single unit because they are located in close proximity to each other along the same channel reach, have similar erosion characteristics, and require the same recommendations for repair. It is very likely that the same contractor would repair all three areas as one project.

6.3.3.1 NALFF 03(a)

The recommended approach to mitigating erosion feature NALFF 03(a) is to apply a riprap liner where erosion occurs along the streambed, riprap armoring on both side slopes of the streambank up to the top of the channel, and a series of small rock check dams along the streambed to reduce the velocity in the channel. A check dam is a shallow dam constructed of riprap approximately one to two feet in height installed perpendicular to the flow direction.

The riprap channel lining should be applied in sufficient quantity to cover the entire width of the channel and should extend upward from the streambed to the top of the embankment to minimize scour along the slope. An estimated 10,500 SF of riprap will be required for this effort. Due to the volume and velocity of flow anticipated in this channel, a larger diameter, heavier, grade of riprap is recommended, such as that used in the existing riprapped section.

Prior to any construction, a temporary silt fence will be installed upgradient of the side slopes of the channel and around any areas where land disturbing will occur. To prevent the same erosion from occurring in the upstream reach of the channel, riprap check dams should be installed along the streambed to reduce overall flow velocities within the channel. The check dams should be spaced and sized appropriately to manage the anticipated flow rates. For cost estimation purposes, a minimum of 10 check dams is assumed, requiring an estimated 500 SF of riprap.

The activities associated with this approach include stripping existing vegetation where riprap will be placed, regrading the area to the extent necessary to provide a uniform surface, installing

a layer of geotextile filter fabric on the graded surface, and placing riprap to a final grade matching the regraded surface. The stripped vegetation should be staged on-site for future reuse or disposed of as solid waste in an on-site (preferable) or off-site landfill.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

6.3.3.2 NALFF 03(b) through NALFF 03(g)

The recommended approach to mitigating erosion features NALFF 03(b) through NALFF 03(g) use the same control measures as NALFF 03(a) and extend them to provide a liner where erosion occurs at each of the pipe culvert inlets. It is important to note that, due to the extent and nature of erosion present at these features, it is recommended that peak flows be evaluated to determine if adequate culvert capacity is adequate at each feature prior to implementing these mitigation measures. The riprap aprons may be entirely effective in controlling the erosion despite any potential culvert deficiencies, although a significantly undersized culvert will continue to be a source of erosion.

The activities associated with placement of the riprap include minor regrading of the ditches to the extent necessary to provide a uniform surface, installation of a layer of geotextile filter fabric on the graded surface, and placement of riprap to a final grade matching the regraded surface.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

6.3.3.3 NALFF 03 Total Cost Estimate

This mitigation approach will require approximately 30 days, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NALFF 03 is $267,100. This estimate includes planning and construction costs.

6.4 NSA NWA

A total of six erosion features, designated as NSA NWA 01 through NSA NWA 06, were identified during site assessment activities at NSA NWA and presented in Section 5.4 of this report. The following subsections discuss SEE's recommendations for addressing these occurrences of erosion. Estimated costs to implement and maintain the recommendations are also provided for each recommended approach. The documentation for all NSA NWA sites are included in Appendix C.

6.4.1 NSA NWA 01

The recommended approach to mitigating erosion feature NSA NWA 01 is to regrade the culvert embankment and apply a riprap apron. Reducing the slope of the embankment will minimize the potential for future erosion and will provide a suitable subgrade for placement of the riprap apron. The riprap apron will dissipate the energy of water entering the ditch from atop the embankment, as well as water flowing through the ditch. The riprap apron should extend from the culvert inlet and up both sides of the inlet to the top of the embankment.

This approach involves minor regrading of the embankment to the extent necessary to provide a uniform surface, installation of a layer of geotextile filter fabric on the graded surface, and placement of riprap to a final grade matching the regraded surface. A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately two days to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NSA NWA 01 is $7,100. This estimate includes planning and construction costs.

6.4.2 NSA NWA 02

The recommended approach to mitigating erosion feature NSA NWA 02 is removal of the debris that is obstructing flow in the stream and annual monitoring of the area where sheet erosion occurs along the southern shoreline. Removing the debris will restore normal streamflow and minimize potential future occurrences of streambank scour in the area.

It may be necessary to cut a path to the stream by minimal tree clearing between the adjacent road and the stream to provide access to the work area. Removal of the debris can be performed using a backhoe or similar equipment. The debris that is generated from clearing and removal efforts can be disposed of as solid waste in an on-site (preferable) or off-site landfill.

This mitigation approach will require approximately one day to execute, excluding the planning and preparation prior to field work. The total estimated cost of addressing erosion feature NSA NWA 02 is $5,100. This estimate includes planning and construction costs.

6.4.3 NSA NWA 03

The conditions present at erosion feature NSA NWA 03 indicate that the existing pipe culvert has insufficient capacity to manage current peak flow volumes; therefore, the recommended

approach to mitigating this area is to remove the existing pipe culvert and replace it with a riprap lined channel. This approach will provide additional capacity for peak flow volumes by widening the channel.

Prior to any construction activities, a silt fence will be installed on both sides of the culvert and any other areas of land disturbance. The construction activities associated with mitigation of this area include clearing efforts to remove trees and undergrowth present in the work zone, excavation of the existing culvert embankment, removal of the culvert piping, excavation to create the new channel, and application of a riprap liner. During excavation of the culvert and placement of riprap, a bypass channel will be excavated to divert the streamflow away from the work area. Soil and debris generated from this effort can be staged at or near the facility for future reuse or disposed of as solid waste in an on-site (preferable) or off-site landfill. The debris will consist of vegetation that was cleared, potential excess soil, and the concrete pipe. Alternatively, the concrete pipe can be crushed and beneficially reused as riprap material for the new channel lining.

Riprap should be placed to a final grade matching the regraded surface. Final side slopes should not exceed three horizontal to one vertical. The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately 15 days to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NSA NWA 03 is $91,000. This estimate includes planning and construction costs.

6.4.4 NSA NWA 04

The recommended approach to mitigating erosion feature NSA NWA 04 is to restore the functionality of the pipe culvert by removing the debris that obstructs flow at the inlet. Upon removal of the obstruction, water will likely continue to bypass the culvert due to existing erosion along the bottom and sides of the culvert. Some degree of erosion will continue because of this, but its effects are expected to be minor. The intent of mitigation at this feature is to reestablish capacity for high flow volumes when the potential for erosion is at its greatest.

Removal of the debris should be performed by hand in this area to minimize the disturbance that would be associated with equipment access. Access with motorized equipment is limited due to the wooded area surrounding the feature and the stream itself. Only a small quantity of debris is present and this debris can be easily managed and disposed of in the surrounding wooded area in a manner that prevents reentry into the stream.

This mitigation approach will require one day to execute, excluding any planning and preparation time prior to field work. In addition to mitigation, this area should be monitored annually by conducting a visual survey for erosion.

The total estimated cost of addressing erosion feature NSA NWA 04 is $4,100. This estimate includes debris removal and monitoring costs.

6.4.5 NSA NWA 05

The recommended approach to mitigating erosion feature NSA NWA 05 is to regrade the culvert embankment and apply a riprap apron. Reducing the slope and shape of the embankment will minimize the potential for future erosion and will provide a suitable subgrade for placement of the riprap apron. The riprap apron will dissipate the energy of water entering the ditch from atop the embankment, as well as water flowing through the ditch. The riprap apron should extend from the culvert inlet upward along both sides of the inlet to the top of the embankment.

A temporary silt fence should be placed upgradient of any land disturbing activities to prevent runon from reaching disturbed areas. This approach involves minor regrading of the embankment to the extent necessary to provide a uniform surface, installation of a layer of geotextile filter fabric on the graded surface, and placement of riprap to a final grade matching the regraded surface. Grading and riprap placement can be performed using a backhoe or similar equipment.

The application of riprap should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.19. A layer of geotextile filter fabric should be installed and appropriately anchored where riprap is to be placed. The geotextile will help to stabilize the subgrade and protect against future scour. The geotextile will also prevent the migration of soils from the subgrade into the riprap and will minimize plant growth through the riprap.

This mitigation approach will require approximately three days to execute, excluding the planning and preparation time prior to field work. There are no maintenance activities associated with this approach.

The total estimated cost of mitigating erosion feature NSA NWA 05 is $9,200. This estimate includes planning and construction costs.

6.4.6 NSA NWA 06

The recommended approach to mitigating erosion feature NSA NWA 06 is to revegetate the area where sheet erosion occurs along the culvert embankment to prevent the erosion from worsening.

Revegetation can be accomplished by overseeding the bare areas to establish a well vegetated area where the roots will hold the soil in place. Soil amendments, such as topsoil, should be incorporated as necessary to provide nutrients. The VDCRs *Erosion and Sediment Control Technical Bulletin No. 4,* dated July 2003 specifies the use of native plant species applicable for erosion control in Coastal Plain Areas. An example of an applicable seed mixture consists of tall fescue 62-72%, Bermudagrass 0-15%, Red Top Grass or Creeping Red Fescue 1%, Seasonal

Nurse Crop 13%, and/or Sericea Lespedeza 13%. Vegetative buffers should be maintained along the ditch edges to protect against erosion.

Soil stabilization matting should be installed immediately upon completion of seed application. The matting will hold the seed in place, promote its germination, and control erosion until vegetation is firmly established. The application of soil stabilization matting should be in accordance with the specifications of VA ESC Handbook Chapter 3, Section 3.36.

During the site assessment, it was observed that the cause of erosion may be over-topping of the parking lot curb inside the fence. The parking lot inside the fence line should be inspected for signs of overtopping of the curb from runoff from the paved area. All storm inlets should be inspected for debris and sediment, and any such debris and sediment should be removed so the runoff can drain through them and into the culvert.

Maintenance associated with this approach consists of short-term watering and monitoring requirements. Watering should be performed as necessary for a minimum of two weeks to maintain proper soil moisture levels for initial plant growth.

This mitigation approach will require approximately two days to execute, excluding the planning and preparation prior to field work. The total estimated cost of addressing erosion feature NSA NWA 06 is $4,000. This estimate includes planning, construction, and maintenance costs.

7 BEST MANAGEMENT PRACTICES

Best Management Practices (BMPs) are devices, systems, and procedures that reduce or eliminate pollutants and sediment from being released into the environment, particularly surface water features. BMPs generally fall into two categories: 1) physical devices or structures that involve construction, landscaping, and agricultural practices; and 2) systems and procedures that include stormwater management, training, regular monitoring, and natural resources management.

7.1 CONSTRUCTION

Uncontrolled stormwater runoff from construction sites can significantly impact rivers, lakes and estuaries. Sediment in water bodies from construction sites can transport pollutants that have a high affinity through adsorption on soil particles, reduce the amount of sunlight reaching aquatic plants, and smother aquatic habitats and fish spawning areas. Stormwater Management Control at construction sites is generally viewed as temporary erosion and sediment (E&S) control measures that provide benefit during the construction phase. Effective stormwater runoff control can be achieved through BMPs that consider future site usage, growth, inspection, and maintenance of the stormwater drainage controls implemented at the site. BMPs at construction sites can be implemented prior to construction activities, during construction activities, after following completion of construction activities as discussed below.

7.1.1 Pre-Construction BMPs

Construction activities that potential release sediment to streams are required to comply with federal National Pollutant Discharge Elimination System (NPDES) construction site stormwater regulations. These regulations include developing SWPPPs and preparing erosion and sediment control plans (ESCPs). The VA ESC Handbook requires an erosion and sediment control plan for all projects where the area of disturbed soil or vegetation exceeds 10,000 SF. In some cases, it may be good practice to prepare an ESCP for areas less than 10,000 SF. Such areas include: sites with steep slopes, areas that will be denuded for extended periods of time, and riparian areas. Due to the of the proposed repairs in this report to surface water, E&S controls are included for areas where land disturbance is proposed. Good construction management is as important as the physical BMPs. The following are management considerations that are recommended prior to construction:

- Include E&S controls as an agenda item during the pre-construction meeting;
- Sequence construction activities so that no area remains exposed for unnecessarily long periods of time;
- Consider the time of year: be prepared for thunderstorms, use straw mulch during poor germination periods;
- Limit land disturbance to only those that need to be disturbed and barricade vegetated areas that are not to be disturbed since construction workers tend to drive on and use more area than is required; and
- Designate one individual to be responsible for implementing E&S measures.

7.1.2 Construction Activities

Two general types of E&S controls that can be implemented during the construction phase of projects: structural and vegetative controls. A complete description of all available E&S controls is beyond the scope of this project but the structural controls recommended for NASO, NALFF, NASO DNA, and NSA NWA include: sediment barriers such as silt fencing; riprap; installing new culverts, retaining walls, excavation and filling; regrading to reduce slope; catchment basins, and in-stream sediment barriers such as check dams. The selection of the most appropriate controls is highly site-specific and needs to be evaluated for each erosion feature. The vegetative controls consist of seeding, over-seeding, sodding, soil stabilization blankets, and landscaping, which also need to be evaluated for each erosion feature. Most erosion control measures utilize a combination of structural and vegetative controls.

7.1.3 Post-Construction Activities:

Adequate BMP performance requires not only proper installation, but also regular maintenance and inspection. Maintenance needs are best determined by a self-inspection program since local agencies require advance notice to schedule an inspection. Stormwater control BMPs require regular inspections to ensure their effectiveness, and many permitting authorities require self-inspection for construction projects. Three types of BMP inspections can be performed: routine inspections, inspections performed before rain events, and inspections performed after rain events.

Routine inspections are an integral part of regular maintenance activities, such as debris removal, repair, and replacement necessary to ensure the integrity and effectiveness of BMPs. Construction site activities can damage BMPs. Earthmoving equipment, for example, can easily dislodge an entrenched silt fence. Routine inspection and maintenance minimizes the work required to prepare a site before a rain event.

After a rain event, prepare the site for the next rain event. Typically within 48 hours after a rain event, inspect, clean, and repair the site's BMPs. To prevent health and safety hazards, remove mud in traffic areas and remove mosquito-breeding standing water. Clean mud and debris from silt fences and other BMPs. Clogged BMP structures will not prevent sediment releases during subsequent rain events, so the contractor needs to clean, repair, or replace them as quickly as possible.

7.2 TRAINING

One of the most important factors in determining whether BMPs are properly installed and maintained is knowledge and experience of the contractor implementing and inspecting them. To ensure a high level of expertise, many naval facilities require formal certification for on-site contractors. These certified private contractors can then be used to lessen the community's inspection burden.

Any contractor who wishes to construct a BMP involving a land-disturbing activity in Virginia must complete the training and pass an exam as part of the *Responsible Land Disturber Certificate of Competence Program* (VDCR n.d.). This program was established through revisions to the VA ESC Law (VA Code of Regulations 1988). The VDCR administers this program which became effective in July 2001. The code states that any person responsible for

implementing the E&S plan must provide the name of an individual holding an RLD Certificate who will be in charge of and responsible for carrying out a regulated "land-disturbing activity."

7.3 LANDSCAPING

Proper landscaping practices help stabilize disturbed areas, minimize sediment transport from stormwater, and improve the overall aesthetics of a stormwater BMP. Landscaped areas can provide significant reductions in sediment transport from developed sites through biological uptake of nutrients, sediment trapping, filtering, and infiltration.

7.3.1 Landscaping Practices

The sites for this project are located primarily in riparian zones that experience both wet and dry soil conditions and periodic inundation. The vegetation in riparian zones serves the following purposes:

- reduce re-suspension of newly deposited sediments;
- prevent erosion; and
- provide habitat and food for wildlife,

The following are recommended landscaping practices at NASO, NALFF, NASO DNA, and NSA NWA to help prevent occurrence of future erosion:

- Do not mow vegetation within 5 feet of the surface water edge. Where there is a definite embankment, the 5 feet buffer starts from the top of the embankment and extends away from the channel.
- Do not mow vegetation too short. This will prevent it from drying or burning out, which can cause bare spots.
- Follow the instructions for adding fertilizer and other soil amendments in the applicable landscaping plan or design document so that the addition of phosphorous, nitrogen and other chemicals to the land surface are minimized.
- If fertilizer is needed, apply 10-20-10 fertilizer at a rate of 500 pounds per acre or 12 pounds per 1,000 SF.

7.3.2 Plants for Erosion Control

Plants selected for a stormwater BMP must tolerate stresses such as pollutants, variable soil types and soil moisture fluctuations, climate, and topography. When selecting plants, native plant species should always be used. Non-native plants require more care to adapt to the hydrology, climate, exposure, soil, or other conditions. Also, some non-native plants can become invasive, especially those used for stabilization, and may ultimately choke out the native plant population.

The placement of trees and larger shrubbery on an embankment is discouraged. The root system of large trees and shrubs can threaten the structural integrity of the embankment and possibly cause its failure. The side slopes of BMPs are usually compacted during the construction process to ensure stability and the density of these compacted soils is often such that plant roots cannot

penetrate to an adequate depth, leading to premature mortality or loss of vigor. In addition, planting trees will take from several years to a decade before any benefits are achieved.

Technical Bulletin No. 4 (VDCR 2003) identifies permanent seeding specifications for new plantings in Coastal Plain areas, such Virginia Beach, VA. For low-maintenance areas with a steep slope, the Bulletin recommends the following:

SPECIES	APPLICATION RATES (lbs/acre)
Tall Fescue	93–108
Bermudagrass	0-15
Red Top Grass or Creeping Red Fescue	2
Seasonal Nurse Crop	20
Sericea Lespedeza	20

The seed mixture recommended in section 6 conforms to the species and rates shown above. Other types of seed mixes may also be appropriate for coastal areas in Virginia. Although the seed mixture is important, it is also important that the plants be naturally occurring in coastal Virginia and that they be low maintenance and durable.

The success of any landscape plan depends on the selection of the proper specifications that are subsequently implemented by the contractor. The specifications should include procedures for installing the plants. They should also provide details for the steps to be taken before and after installation, such as any special instructions for the preparation for planting, fertilization, and watering requirements. Any seasonal requirements for installation should also be specified.

A maintenance schedule should be provided in the project plans and/or specifications. This is particularly important for BMPs that have a vegetative component that is integral to the pollutant removal efficiency. The schedule should include guidance regarding methods, frequency, and time of year for landscape maintenance and fertilization. Specific plant communities may require different levels of maintenance. Upland and floodplain terrace areas require very little maintenance, while aquatic or emergent vegetation may need periodic thinning or reinforcement plantings. After the first growing season it should be obvious if reinforcement plantings are needed. If they are, reinforcement plantings should be installed at the onset of the second growing season after construction (VDCR 2012).

7.4 AGRICULTURAL PRACTICES

The VDCR, U.S. Department of Agriculture, and other water conversation partners spend a large portion of their time and budgets installing, promoting and tracking agricultural BMPs. These include practices to control cropland runoff, animal waste dispersal, streambank erosion, improper use of fertilizers and pesticides, and other non-point source pollutant reduction actions. This is accomplished by constructing control devices such as riparian buffers, diversions, grass buffer strips, and chemical and fertilizer handling facilities. BMPs also include activities such as rotational grazing, planting of cover crops, practicing integrated pest management, nutrient management plan implementation, and other similar proven actions.

SEE recommends the following agricultural BMPs for NASO, NALFF and NSA NWA:

- Maintain a 5 foot buffer vegetation strip between planted crop areas and any stream embankment, ditch, channel, pond, or other surface water features. Do not mow the vegetation strip but allow the vegetation to reach maximum height.
- Construct feeder drainage ditches that are perpendicular to the direction of runoff rather than in the same direction as runoff.
- Maintain access roads in the agricultural fields so ruts do not develop associated with vehicle traffic.
- Follow the instructions for adding chemicals, fertilizer, and other soil amendments in the applicable landscaping plan or design document.

7.5 STORMWATER MANAGEMENT

One of the first considerations in selecting a stormwater BMP is the functional goal of the BMP. In general, stormwater BMPs can be categorized into water quality (sediment and pollution control) and water quantity (stream channel erosion and flooding) BMPs. The use of some BMPS is limited by site or watershed feasibility factors such as environmental impacts, drainage area or watershed size, and topographic constraints. The BMPs designed for water quality control provide varying levels of pollutant removal and are suited for specific development densities.

The decision making process of choosing a stormwater BMP must weigh the goals of the proposed activity against the limiting site feasibility factors of the proposed site or BMP location. The limiting site feasibility factors include:

- Topographic and geologic constraints;
- Contributing drainage area size;
- Environmental impacts; and
- Access for maintenance.

The possible stormwater management requirements that influence BMP selection include:

- Stormwater quality, stream channel erosion, flooding, and environmental mitigation;
- Multiple discharge points;
- Pollutant removal capability; and
- Performance-based versus technology-based water quality criteria.

7.6 NATURAL RESOURCE MANAGEMENT

Successful implementation of a watershed management plan will also depend on the ability to obtain the appropriate permits from state and federal agencies. An inventory of natural resource features in the watershed will promote a BMP development approach that minimizes or avoids impacts on environmental resources to the maximum extent practicable. Natural resource features to be considered prior to implementing BMPs depend on the characteristics of the watershed being studied and could include:

- Wetlands
- Floodplains
- Stream corridors and greenways
- Steep slopes
- Erodible soils
- Rare and endangered species
- Sensitive habitats
- Fish and wildlife resources
- Recreational areas
- Sources of water supply

Although all of the above resources apply to NASO, NALFF, NASO DNA, and NSA-NWA to some extent; the following natural resources should be carefully considered prior to implementing BMPs.

Wetlands. Protecting the natural functions of wetlands is a critical element of the site development process and watershed management planning. Wetlands provide unique habitats for both plants and wildlife, including many threatened and endangered species. Some BMPs, such as check dams, can retain more water in streams and could negatively impact down-stream wetlands by preventing water from reaching the normally saturated areas. For the repair projects recommended by this report, only the erosion areas associated with the Chesapeake City Channel at NALFF have a recommendation for the installation of check dams and there are no wetlands near that channel.

Floodplains and Stream Corridors. Floodplains and stream corridors include waterways and adjacent riparian lands that may be subject to flooding. Natural waterways provide habitat for fish, aquatic plants, and benthic (bottom dwelling) organisms. Vegetated riparian land adjacent to streams stabilize the stream bank; filter pollutants from storms and floods; and provide habitats for a variety of amphibians, aquatic birds, and mammals that depend on the proximity to water for their life functions. A riparian buffer should be preserved or created along the banks of streams, where possible.

Steep Slopes. Steep slopes, such as those on steam embankments, cause instability of the soil on the slopes. High runoff velocities from exposed steep slopes could result in destructive and unsightly erosion, denuded slopes that may be difficult to revegetate, and sediment deposition in sensitive areas both on and off the site. Stabilizing vegetation should be protected to the maximum extent practicable and disturbed areas should be immediately revegetated. Maintenance or revegetated areas, including removal of debris and mowing of non-slope areas is critical to the long-term growth and propagation of the planted vegetation. Some of the recommendations in this report directly address steep slopes by recommending reconstruction to a 3:1 (horizontal to vertical) slope.

Fish and Wildlife Resources. In accordance with Navy Instruction 5090.1C, installations must improve the quantity, function, sustainable productivity, and distribution of aquatic resources for increased recreational fishing opportunities by restoring degraded habitat, fostering conservation, and providing access to and awareness of opportunities for recreational fishing. Although hunting is a significant activity at NASO, hunting does not impact water quality by erosion.

There are no water bodies at NALF Fentress managed for recreational fishing. Oceana Pond at NASO is currently the only water body at NASO managed for recreational fishing. Freshwater fishing is permitted at Lake Tecumseh, Redwing Lake, and Sadler Pond at DNA. Fishing is also allowed in the ditches that drain DNA. Appropriate state licenses and a base permit for freshwater fishing are required for fishing at DNA.

Although three recreational fishing ponds were excavated during the 1960s at NSA NWA, there are no authorized fishing lakes at NSA NWA. Past fisheries assessments of Lunker Lake suggest that the pond is too small, steep-sided, and lacks shallow spawning grounds needed to support a self-sustaining, balanced fish population and that extensive reconstruction would be required to establish a fishing program (USFWS 1987).

Recreational Areas. An inventory of recreational areas and sources of water supply will also facilitate, and in some cases mandate, the goals of the watershed. This information will also be important in the selection of models that would be needed to identify sources of pollution, understand the hydrologic and hydraulic characteristics of the watershed, and evaluate alternatives to meet the watershed goals and manage water quality.

Types of outdoor recreation available at NSA NWA include hunting, fishing, picnicking, bird watching, hiking, jogging, and camping. The MWR at NSA NWA administers a number of these activities, whereas the fishing, hunting, and environmental awareness programs are administered as part of the regional natural resources program under the Regional Environmental Group. Fishing is the recreational activity most impacted by erosion due to sedimentation and should be a criterion in identifying the appropriate BMP for an area.

GLOSSARY

The hierarchy of terminology will be those defined in law, those defined in policy, those defined in this guidance and then all other agency and interagency documentation. The NWCG (National Wildfire Coordinating Group) Glossary of Wildland Fire Terminology will be maintained as the source of record.

Controlled burn – synonymous with Prescribed Fire.

Escaped Prescribed Fire – a prescribed fire that has exceeded or is expected to exceed prescription parameters or otherwise meets the criteria for conversion to wildfire. Criteria is specified in "Interagency Prescribed Fire – Planning and Implementation Procedures Reference Guide".

Fire Management Plan (FMP) – a plan that identifies and integrates all wildland fire management and related activities within the context of approved land/resource management plans. It defines a program to manage wildland fires (wildfire and prescribed fire). The plan is supplemented by operational plans, including but not limited to preparedness plans, preplanned dispatch plans, prescribed fire burn plans and prevention plans. Fire Management Plans assure that wildland fire management goals and components are coordinated.

Initial Action – the actions taken by the first resources to arrive at a wildfire.

Land/Resource Management Plan (L/RMP) – a document prepared with public participation and approved by an agency administrator that provides general guidance and direction for land and resource management activities for an administrative area. The L/RMP identifies the need for fire's role in a particular area and for a specific benefit. The objectives in the L/RMP provide the basis for the development of fire management objectives and the fire management program in the designated area.

Planned Ignition –the intentional initiation of a wildland fire by hand-held, mechanical or aerial device where the distance and timing between ignition lines or points and the sequence of igniting them is determined by environmental conditions (weather, fuel, topography), firing technique, and other factors which influence fire behavior and fire effects (see prescribed fire).

Prescribed Fire—is a wildland fire originating from a planned ignition to meet specific objectives identified in a written, approved, prescribed fire plan for which NEPA (National Environmental Policy Act) requirements (where applicable) have been met prior to ignition (see planned ignition).

Protection - the actions taken to limit the adverse environmental, social, political, and economical effects of fire (FEC Briefing Paper, 3/14/2008).

Response to wildland fire - the mobilization of the necessary services and responders to a fire based on ecological, social, and legal consequences; the circumstances under which a fire occurs; and the likely consequences on firefighter and public safety and welfare, natural and cultural resources, and values to be protected.

Suppression - all the work of extinguishing a fire or confining fire spread.

Unplanned Ignition – the initiation of a wildland fire by lightning, volcanoes, unauthorized and accidental human-caused fires (see wildfire).

Use of Wildland Fire - management of either wildfire or prescribed fire to meet resource objectives specified in Land/Resource Management Plans.

Wildfire – unplanned ignition of a wildland fire (such as a fire caused by lightning, volcanoes, unauthorized and accidental human-caused fires) and escaped prescribed fires. (See unplanned ignition and escaped prescribed fire).

Wildland Fire – a general term describing any non-structure fire that occurs in the wildland.

Wildland Urban Interface (WUI) – The line, area, or zone where structures and other human development meet or intermingle with undeveloped wildland or vegetation fuels.

1.0 INTRODUCTION, POLICY AND LAND MANAGEMENT PLANNING

This Wildland Fire Management Plan is designed to complement the Integrated Natural Resource Management Plan (INRMP). It provides specific fire management policy, strategy, and programmatic functions that support the Installation's fire and resource management goals.

1.1 PURPOSE OF THE WILDLAND FIRE MANAGEMENT PLAN

Wildland fires can pose a significant threat to facilities and mission capabilities within Navy Support Activity Hampton Roads, Northwest Annex (NSAHR NWA) areas of responsibility and adjacent lands. This Wildland Fire Management Plan is written to:

- Ensure that the safety of firefighters and the public is the primary objective in all wildland fire operations. Wildland firefighters will work with base fire departments when buildings/infrastructure are threatened or involved by fire. Only trained structural firefighters should attempt to manage structure fires or fires involving infrastructure.
- Describe the wildland fire management program for NSAHR NWA.
- Meet Department of Defense Instruction (DoDI) requirements 6055.6 (2006) that every Installation with burnable vegetation must have an approved WFMP.
- Establish wildland fire management actions that assist in implementing and accomplishing the goals and objectives of the approved INRMP.

1.2 WILDLAND FIRE MANAGEMENT PLAN AREA

NSAHR NWA lies along the southeastern border of Virginia and the northeastern border of North Carolina. The current total Installation acreage, as provided by the Navy Real Estate Office, is 3,726 acres (ac, 1,508 hectares, ha), three-quarters of which is in Chesapeake, Virginia, and one-quarter is in Currituck County, North Carolina (Figure 1). Total acreage is based on Navy geographic information system (GIS) data for the Installation and used throughout this document for natural resources summary purposes is 3,661 (1,482 ha).

The majority of immediate area surrounding NSAHR NWA is undeveloped and is comprised of agricultural land and forested wetlands. In the last several years, however, residential development has expanded along the Ballahack Road corridor to the northeast of the Installation. NSAHR NWA is located within the historic boundaries of the Great Dismal Swamp, which once extended from the James River to the Albemarle Sound. Beginning in the mid-1700s, however, much of the Great Dismal Swamp, including a large percentage of the land currently occupied by NSAHR NWA, was ditched and drained for agriculture and timber production (Navy 2002a). The largest contiguous parcels remaining of swamp are restricted to the Great Dismal Swamp National Wildlife Refuge to the west of the Installation, the Northwest River Preserve to the northeast, and various Virginia and North Carolina state reserves in the area (NWA INRMP 2014).

NSAHR NWA is located within the Outer Coastal Plain physiographic province, which greatly influences the topography, soils, and hydrology of the Installation. The Coastal Plain physiographic province consists of an eastward-thickening wedge of unconsolidated sediments consisting of gravels, sands, clays, and varying amounts of shell material (Roberts and Bailey 2002). This physiographic province is characterized by flat, low relief elevations of 0 to 60 feet

(ft) (0 to 18 meters, m) above mean sea level (msl). Within this province, topography generally slopes eastward toward the Atlantic Ocean. NSAHR NWA, however, is within a region influenced by a geologic feature called the Fentress Rise, which extends from Norfolk, Virginia to the Albemarle Sound, North Carolina. This region consists of a gently inclined, west-facing slope that dips toward the Great Dismal Swamp.

Approximate elevation ranges from 14 to 30 ft (4 to 9 m) above msl (Figure 2-1), and the Installation is depicted on two USGS 7.5 minute series map sheets: the Lake Drummond South East Quadrangle and the Moyock Quadrangle. A majority of the Installation has elevations of about 18 ft (6 m) above msl, with the exception of a small rise located in the center of the Installation that has an elevation of 30 ft (9m) above msl.

NASHR NWA has approximately 2,203.59 acres classified as wetland. Palustrine emergent/palustrine forested (1,624.60 ac or 657.45 ha), palustrine forested (438.11 ac or 117.30 ha), and palustrine forested/palustrine scrub-shrub (122.14 ac or 49.43 ha) are the three largest wetland types. Table 1 provides land use cover classifications.

TABLE 1. LAND USE COVER CLASSIFICATIONS AT NSAHR NWA.

Community Type	Acres
Forest	2,345
Agricultural	750
Maintained open	295
Developed	271
Total	**3,661**

The forests on NSAHR NWA are typically wet with the exception of the pine forests. Some of the hardwood species found in these seasonally flooded swamps are combinations of green ash (*Fraxinus pennsylvanica*), red maple (*Acer rubrum*), sweetgum (*Liquidambar styraciflua*), swamp blackgum (*Nyssa biflora*), water hickory (*Carya aquatica*), willow oak (*Quercus phellos*), and overcup oak (*Q. lyrata*). Well drained levees support swamp chestnut oak (*Quercus michauxii*), cherrybark oak (*Q. pagodifolia*), laurel oak (*Q. laurifolia*), sugarberry (*Celtis laevigata*), and American elm (*Ulmus americana*). In the flatwoods, vegetation is dominated by mixtures of loblolly pine (*Pinus taeda*), red maple (*Acer rubrum*), sweetgum (*Liquidambar styraciflua*), frequently with scattered pond pine (*Pinus serotina*). Small trees and shrubs include sweetbay (*Magnolia virginiana*), swamp blackgum *(Nyssa biflora*), swamp bay (*Gordonia lasianthus*), and coastal dog-hobble (*Leucothoe axillaris*). Giant cane (*Arundinaria gigantea*) typically dominates the shrub layer in patchy to very dense colonies.

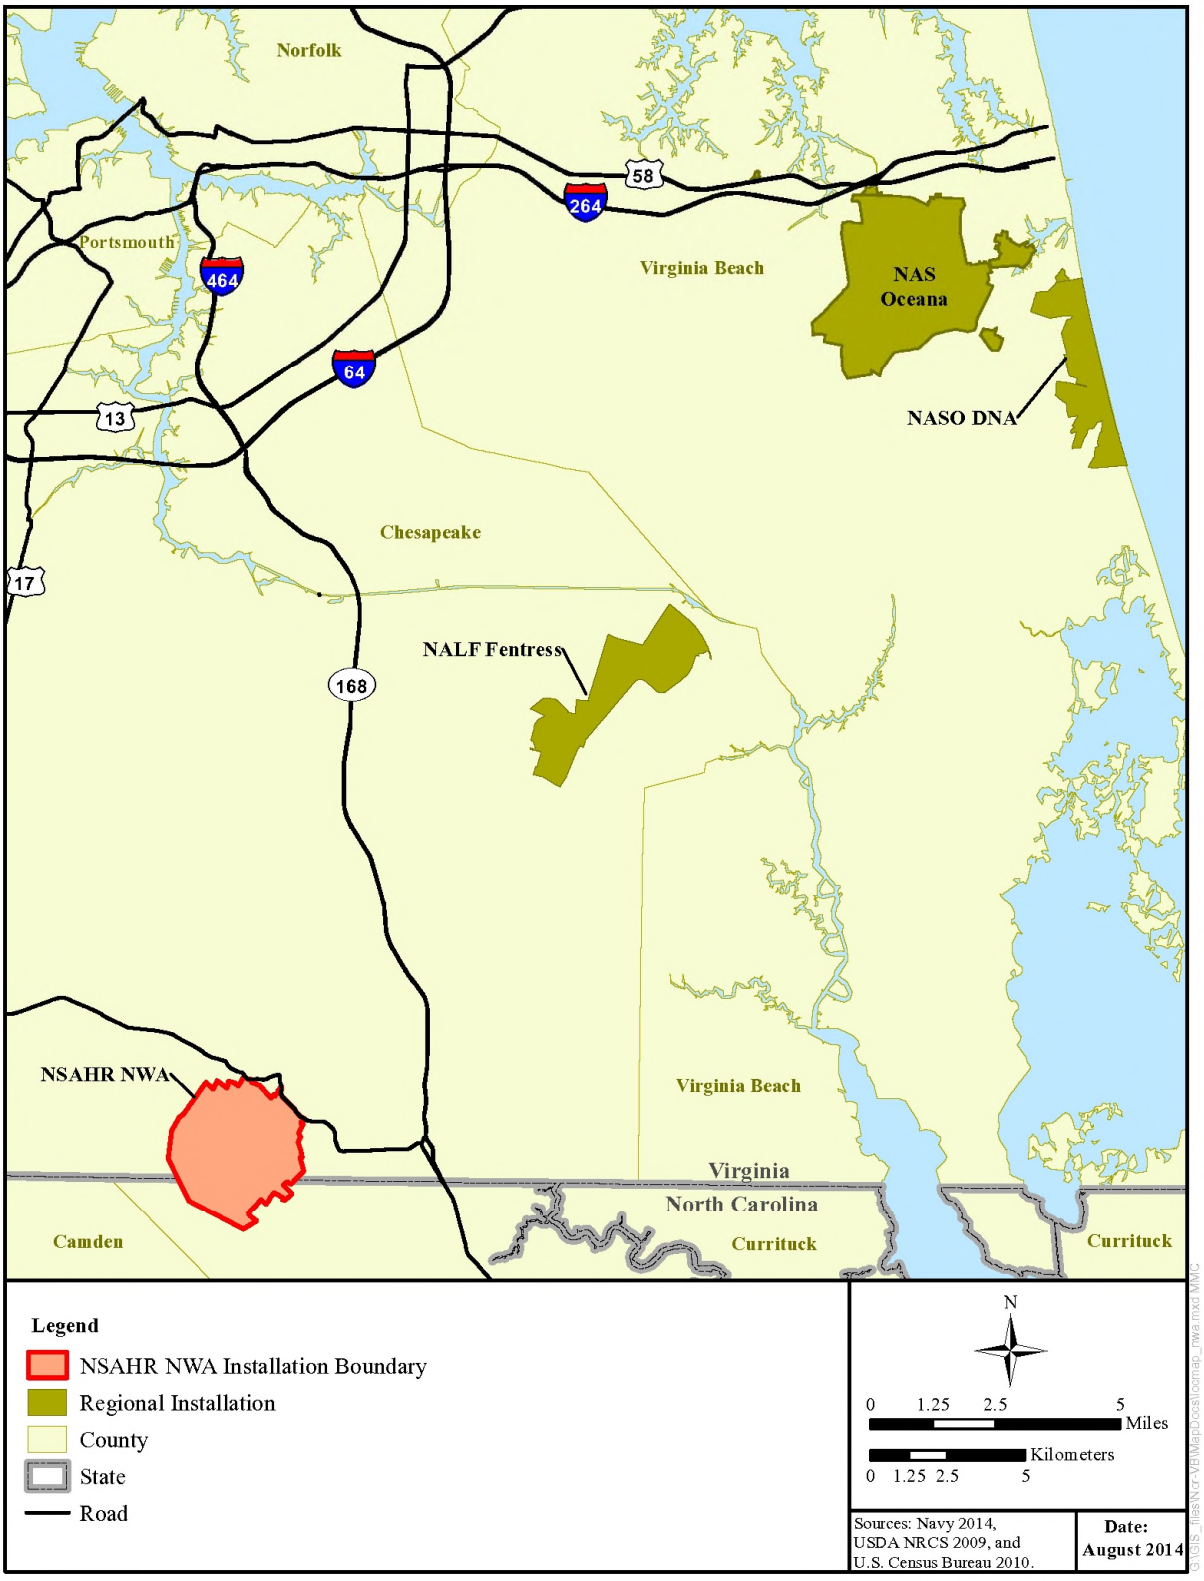

FIGURE 1. NSAHR NORTHWEST ANNEX AND VICINITY.

1.3 WILDLAND FIRE IMPACTS TO THE MILITARY MISSION

The current mission of NSAHR NWA is to coordinate the provision of shore activity support to tenant commands and to operational forces of the U.S. and its allies as required. The Installation provides a wide array of support services for 11 tenant commands, and maintains and operates the largest small-arms range facilities in Commander, Navy Region Mid-Atlantic. Wildland fires have the potential to impact the missions of NSAHR NWA. The primary adverse impact would be the loss of life and/or critical facilities. Additionally, a wildfire could adversely affect the operation of the Relocatable Over-the-Horizon Radar (ROTHR) and other communication sites on the Installation, operations, and access. A wildfire igniting on an Installation could threaten or escape to adjacent lands, which would affect the Navy's public relationship. Installation activities will be disrupted from smoke and particulates. Large wildfires in 2008 and 2011 at Great Dismal Swamp National Wildlife Refuge (NWR) released large volumes of smoke and particulates into the local air shed. These smoke impacts include breathing impairment, visibility impairment, and ash/particulate fallout.

1.4 MILITARY MISSION IMPACTS TO WILDLAND FIRE ACTIVITIES

Military missions have the potential to impact wildland fire activities, which could result in the loss of significant natural and cultural resources, critical facilities, and life. A wildland fire can be either an unplanned ignition (wildfire) or a planned ignition (prescribed fire). The sensitivity of the ROTHR could preclude the use of ground and air assets for fire suppression activities during a wildfire. Current mission requirements could restrict the use of prescribed fire. The absence of prescribed fire would accelerate fuel accumulation and increase the risk of a catastrophic wildfire.

1.5 SIGNIFICANT VALUES TO PROTECT

The most important value is life and property. NSAHR NWA has Installation values that are of national interest. Threatened and endangered (T&E) species of concern, cultural, environmental, and recreational values are discussed later in this section. Additionally, the Great Dismal Swamp Heritage Area runs along the boundary from west to south.

1.6 PUBLIC AND FIREFIGHTER SAFETY

Public and Firefighter Safety is the highest priority for all fire management activities on the Installations. Prevention of injury to the public by fire is the responsibility of all personnel during prescribed burning and wildfire suppression operations. Careful planning of prescribed fires minimizes the risk of escape that may endanger the public. Coordination of fire management activities between the Installation Natural Resources Manager (NRM) and Chief, Fire and Emergency Services along with other Installation departments is essential.

1.7 ENDANGERED SPECIES AND OTHER BIOLOGICAL CONSIDERATIONS

NSAHR NWA has threatened and endangered (T&E) species that can be affected both positively and negatively by fire. Most terrestrial T&E species in the southeastern United States (US) are dependent on fire to maintain their habitat and some have very specific habitat requirements, which require a specific fire regimen.

On-going rare species monitoring at the Installation provides information that is invaluable to fire management planning, prioritization, and implementation. Close collaboration between

Installation and regional staff biologists is therefore critical. Managers can adapt fire practices based on T&E species monitoring recommendations. During most wildfire events, biologists are available to provide input to the fire command staff regarding the effect of suppression plans on endangered species and biological communities.

The 2015 INRMP showed two rare plants and 41 wildlife species have been identified at the Installation that are considered rare, threatened, or endangered under federal or state ESAs, or global or state conservation rankings. The Northern Long Eared Bat has been found at NSAHR NWA during surveys. This bat is currently listed as Threatened (April 2015) under the Federal Endangered Species Act. A complete list of species of concern on this Installation is identified in the INRMP. The INRMP also covers potential impacts of fire to these species. Fire management strategies for T&E species are as follows:

- Prescribed fire will be utilized as appropriate. Using adaptive management, fire managers will adjust prescribed fire parameters according to habitat objectives, current conditions, and specific species requirements.
- Notify every vehicle and equipment operator to avoid adverse impacts to all T&E species. All on-site personnel will be educated to recognize T&E species and where they occur in the burn unit. If any T&E species is encountered, it will be avoided to the extent practicable, and be allowed to leave the immediate area of disturbance before vehicle or equipment use is resumed.
- Use firing patterns to provide escape routes for wildlife (i.e, avoid ring fires and fast-moving head fires).
- If a canebrake rattlesnake (*Crotalus horridus*) is observed in a burn unit during a burn, ignition will cease or the ignition pattern will be adjusted to allow escape routes or additional time for exit.
- Due to the presence of a Federally listed and several State listed bat species occurring on the Installation, no prescribed burning activities will be conducted in forested areas during the months of June and July. This is to reduce the potential negative impacts to these species during their primary pupping season.

1.8 ARCHAEOLOGICAL/CULTURAL RESOURCES CONSIDERATIONS

There are no known Historical Structures at NSAHR NWA that qualify for the registry. Although, suggestions been made regarding the military buildings as potential candidates. Several Phase I surveys were performed on proposed construction sites, and though some artifacts were found, no sites were determined to be eligible for the National Register of Historic Places (NRHP) (Couch and Cottrell 1994, Fesler and Luccketti 1992, and Morehead et al. 1987). Subsequent surveys determined there are seven sites at NSAHR NWA that are eligible for the NRHP and two additional sites that require Phase II surveys (Lowthert et al. 2000, McDonald et al. 1999, and Sheehan et al.1999). Three cemeteries also are part of the resource complement (NSAHR NWA INRMP 2015). Additional information is provided in the Installation INRMP and Integrated Cultural Resources Management Plan (ICRMP). All fire line construction and fuels breaks will be approved by the State Historic Preservation Officer (SHPO) prior to plan work. The exception is when a wildfire has an imminent threat to life or property.

1.9 PUBLIC USE ACTIVITIES

Because of mission constraints, there are limited opportunities for public access to outdoor recreational programs at NSAHR NWA. Recreational opportunities at the Installation include hunting, picnicking, wildlife watching, hiking, jogging, and camping. The Morale, Welfare, and Recreation (MWR) Department administers picnicking and camping activities. The Natural Resources Program (NRP) manages the hunting program. Both MWR and the NRP provide management oversight of facilities/programs that provide wildlife viewing/watching opportunities. These programs are open to active duty and retired military personnel and their dependents, current civilian employees of NSAHR NWA and their dependents, and reservists. These individuals may sponsor other individuals from the public, but they must be present and able to escorts their sponsored guests.

1.10 PRIVATE PROPERTY/URBAN INTERFACE

NSAHR NWA is unique as it straddles two states. Roughly one quarter is in Currituck County, North Carolina (NC) and three quarters in Chesapeake, Virginia (VA). The Installation is located in a fairly rural area. The closest communities are Moyock, NC to the south and Hickory, VA to the north. Adjacent properties are farms, dairy farms and scattered rural homes. Looking out 10 miles from the Installation there are significant farming areas and the City of Chesapeake. The roads, highways, and urban areas contain smoke sensitive areas. These areas are defined in Figure 2, using 2010 Census Block Population Data.

1.11 EFFECTS OF CLIMATE CHANGE ON WILDLAND FIRE MANAGEMENT

NSAHR NWA is located in the humid-subtropical zone which is characterized by long, humid summers and mild winters. The climate is moderated by the proximity of water bodies, including the Atlantic Ocean, Albemarle Sound, and Chesapeake Bay. The average annual temperature is approximately 60F (16C), ranging from monthly averages of 45F (7C) in January to 79F (26C) in July. Extremes have been recorded as high as 105F (41C) and as low as 2F (-17C). Average annual precipitation at Norfolk, Virginia, is 45.74 in (116 cm, National Weather Service, Wakefield, Virginia). Snowfall is a relatively rare event. Southerly winds dominate during the warmer months, while northerly winds dominate the cooler months. Sea breezes from the ocean can cause localized effects and dramatic shifts in wind direction in the spring months, as the land heats up, and ocean temperatures remain cool or cold.

Southeastern Virginia is at the northern edge of a distinctly southern, fire-adapted ecosystem. A long-term change in climate has the potential to push that ecosystem further north, altering vegetative composition and fire regimes. Short-term weather patterns over the past 10 years give indications that drought cycles may be growing longer and becoming more frequent, hydrological conditions are changing, and there may be some shift in seasons. These changes – short or long-term - may lead to longer fire seasons, more intense fires, and more severe fire effects.

Climatic changes in Virginia could amplify current land management challenges and will strongly influence wildland fire operations. Warmer conditions are currently increasing fire seasons length and severity. Vegetative communities may also shift as temperatures increase or as sea water levels rise. This may create vegetation that is more or less flammable. Managing wildland fuels at appropriate levels will help to increase the resiliency of the wildlands to changes that may occur.

2.0 POLICY, LAND MANAGEMENT PLANNING, AND PARTNERSHIPS

2.1 DEPARTMENT OF DEFENSE POLICY

DoD wildland fire suppression policy is found in DoDI 6055.6, Section E3.8. *Wildland Fire Response,* available at http://www.dtic.mil/whs/directives/corres/pdf/605506p.pdf. This section dictates:

> Plan for and respond to wildland fires on Installations using 2001 Federal Wildland Fire Management Policy, established standards, local conditions' risk considerations, and the following:
>
> - The Federal Wildland Fire Management Policy and Program Review of 1995 (as updated), the NWCG *Wildland Fire Qualification Subsystem Guide* (PMS 310-1/NFES 1414), National Fire Protection Association (NFPA) Standard 295 – *Standard for Wildfire Control,* NFPA Standard 1051 – *Standard for Wildland Firefighter Professional Qualifications,* NFPA Standard 1143 – *Standard for Wildland Fire Management,* and NFPA Standard 1144 – *Standard for Protection of Life and Property from Wildfire* establish the accepted professional standards for AF wildland fire management policy. Installations with unimproved lands that present a wildfire hazard, and Installations which utilize prescribed burns as a land management tool, will develop and implement a WFMP. The WFMP will be incorporated into or consistent with the INRMP as a component plan.
> - For Installations with burnable acreage or bordered by burnable acreage, prepare an Installation WFMP that identifies: 1) All wildland fire management strategies including military training availability, ecosystem sustainability, and protection of fire and emergency service personnel and the public and 2) Wildland fire preparedness, preplanned dispatch for both initial and extended attack, and prescribed fire and prevention per NFPA Standard 1710.
> - Train all personnel involved in wildland fire management activities to the appropriate Publication Management System (PMS) 310-1 or NFPA 21 Standard 1051, and all personnel shall be outfitted with protective clothing and equipment per NFPA 1977.

2.2 FEDERAL INTERAGENCY WILDLAND FIRE POLICY

The Review and Update of the 1995 Federal Wildland Fire Management Policy (January 2001) is the primary interagency wildland fire policy document. The Interagency Strategy for the Implementation of Federal Wildland Fire Management Policy (June 20, 2003) was developed and approved under the authority of the Wildland Fire Leadership Council (WFLC) to set forth direction for consistent implementation of the federal fire policy. It has been used since that time.

On May 2, 2008, the WFLC issued a memorandum entitled Modification of Federal Wildland Fire Policy Guidance. This memorandum directed federal agencies to test and implement new guidelines for wildland fire management. The modifications were tested in a number of field units in the 2008 fire season.

In 2009 the National Wildfire Coordinating Group (NWCG) issued a memorandum to the NWCG executive board (NWCG#001-2009, January 7, 2009) that 1) affirms the soundness of the Review and Update of the 1995 Federal Wildland Fire Management Policy (January 2001), 2) reiterates the policy changes stated in the May 2, 2008 WFLC memorandum entitled Modification of Federal Wildland Fire Policy Guidance, 3) states that the Wildland Fire Decision Support System (WFDSS) will replace existing analysis and decision processes, and 4) confirms that the Interagency Strategy for the Implementation of Federal Wildland Fire Management Policy (June 20, 2003) will be replaced in 2009.

The Guidance for Implementation of Federal Wildland Fire Management Policy (February, 2009), is that replacement, https://www.nifc.gov/policies/policies_documents/GIFWFMP.pdf

This WFMP meets the DOD and Federal Wildland Fire Management Policy by implementing and following these guiding principles:

- Firefighter and public safety is the first priority in every fire management activity.
- Support the Naval military mission by managing wildland fire fuels.
- The role of wildland fire as an essential ecological process and natural change agent has been incorporated into the planning process.
- INRMP and pertinent resource management plans set the objectives for the use and desired future condition of the various public lands.
- Wildland fire management plans, programs, and activities support land and resource management plans and their implementation.
- Sound risk management is a foundation for all wildland fire management activities. Risks and uncertainties relating to wildland fire management activities must be understood, analyzed, communicated, and managed as they relate to the cost of either doing or not doing an activity.
- Wildland Fire management programs and activities are economically viable, based upon values to be protected, costs, and land and resource management objectives,
- Wildland Fire management plans and activities are based upon the best available science.
- Wildland Fire management plans and activities incorporate public health and environmental quality considerations.
- Federal, State, tribal, local, interagency, and international coordination and cooperation are essential.
- Standardization of policies and procedures for wildland fire management among Navy Installations is an ongoing objective.

2.3 NATIONAL COHESIVE STRATEGY FOR WILDLAND FIRE

This WFMP meets the direction in the National Cohesive Strategy for Wildland Fire through its emphasis on the following primary goals:

- Improving fire prevention and suppression,

- Reducing hazardous fuels,
- Restoring fire-adapted ecosystems, and
- Promoting community assistance.

These can be found at: https://www.doi.gov/wildlandfire/cohesive-strategy

2.4 NAVAL INSTRUCTION

The WFMP incorporates and adheres to Navy policy (OPNAVINST) 11320.23F, http://govdocs.rutgers.edu/mil/navy/11320.23G.pdf, by planning for the use of wildland fire as a natural process and as a tool in the land management planning process and by providing for the following:

- Wildfires, whether on or adjacent to lands administered by the Navy, which threaten life, improvements, or are determined to be a threat to natural and cultural resources or improvements under the Navy's jurisdiction, will be considered emergencies and their suppression given priority over other Navy programs.
- Installations shall cooperate in the development of interagency preparedness plans to ensure timely recognition of approaching critical wildfire situations, to establish processes for analyzing situations and establishing priorities, and for implementing management responses to these situations.
- Installations will enforce rules and regulations concerning the unauthorized ignition of wildfires, and aggressively pursue violations.

This WFMP addresses a full range of potential wildfires and considers a full spectrum of tactical options (from monitoring to intensive management actions) for wildfires in order to meet Fire Management Unit (FMU) objectives. It fully applies and affirms these key elements of policy:

- Firefighter and public safety is the first priority of the wildland fire management program and all associated activities.
- Only trained and qualified individuals will be responsible for, and conduct, wild fire management duties and operations.
- Fire management planning, preparedness, wildfire and prescribed fire operations, other hazardous fuel operations, monitoring, and research will be conducted on an interagency basis with involvement by all partners to the extent practicable.
- The responsible leaders have coordinated, reviewed, and approved this WFMP to ensure consistency with approved INRMP's, values to be protected, and natural and cultural resource management plans, and that it addresses public health issues related to smoke and air quality. Incorporate public health and environmental quality considerations into fire management planning and execution.
- Fire, as an ecological process, has been integrated into INRMP and related resource management plans and activities on a landscape scale, across agency boundaries, based upon the best available science.

- Wildfire is used to meet identified resource management objectives and benefits when appropriate.
- Prescribed fire and other treatment types will be employed whenever they are the appropriate tool to reduce hazardous fuels and the associated risk of wildfire to human life, property, and cultural and natural resources and to manage our lands for habitats as mandated by statute, treaty, and other authorities.
- Management response to wildfire will consider firefighter and public safety, cost effectiveness, values to protect, and natural and cultural resource objectives.
- Staff members will work with local cooperators and the public to prevent unauthorized ignition of wildfires on Navy lands.

2.5 INSTALLATION SPECIFIC FIRE MANAGEMENT POLICY

There are two major components to the wildland fire program at NSAHR NWA. The Installation Fire and Rescue Program is responsible for wildfire suppression and the Installation Natural Resource Program is responsible for fuels management. The corresponding policies are (OPNAVINST) 11320.23F and OPNAV M-5090.1. With the Installation's INRMP containing additional specific guidance. The Installation CO's Environmental Policy (Navy 2011b) is direction for INRMP's.

2.6 LAND/RESOURCE MANAGEMENT PLANNING

This Wildland Fire Management Plan is designed to complement the Integrated Natural Resource Management Plan (INRMP). It provides specific fire management policy, strategy, and programmatic functions that support the Installation's fire and resource management goals.

2.7 ENVIRONMENTAL COMPLIANCE

The Installation covered by this WFMP will follow the Navy Environmental guidance found in OPNAV M-5090.1, to ensure compliance with the:

- National Environmental Policy Act 1970 (NEPA),
- Endangered Species Act of 1973 (ESA),
- National Historic Preservation Act of 1966 (NHPA),
- Archeological Resources Protection Act of 1979 (ARPA),
- Clean Water Act of 1963 (CWA), and the
- Clean Air Act of 1972.

2.8 WILDLAND FIRE MANAGEMENT PARTNERSHIPS

The Installation in this WFMP have developed strong relationships with agencies, groups, and stakeholders in support of their natural resource programs. With-in the natural resource program is a fire management function. The need to have good agreements to support each other in fire management activities is increasing yearly. Table 1 below lists the partners and stakeholders involved in wildland fire management.

TABLE 2. PARTNERS AND STAKEHOLDERS.

Navy	
Naval Facilities Engineering Command, Atlantic	Major Shore Commands of NSAHR NWA, NASO, NASO-DNA, and NALFF
Morale, Welfare, and Recreation Department	Naval Facilities Engineering Command, Mid-Atlantic
NSAHR NWA, NASO, NASO-DNA, and NALFF Commanding Officers	NSAHR NWA, NASO, NASO-DNA, and NALFF Environmental Offices

The Nature Conservancy of Virginia	Virginia Herpetological Society
Virginia Native Plant Society	Virginia Zoological Park
Back Bay Watershed Partnership	Lake Christine Watershed Partnership
Virginia Institute for Marine Science	Partners in Amphibian and Reptile Conservation

2.9 EXTERNAL PARTNERSHIPS

The Installation has a broad array of external partners including, other State / Federal agencies, local clubs, associations and groups. Additional information is provided in the Installation INRMP.

3.0 WILDLAND FIRE MANAGEMENT UNIT CHARACTERISTICS

This Wildland Fire Management Plan covers one fire management unit, NSAHR NWA. As with the other Tidewater Installations, it has many similarities, but also some distinct differences; location to water, vegetation / fuels, fire history, weather, urban development, and military activity.

3.1 AREA WIDE MANAGEMENT CONSIDERATIONS

A Fire Management Unit (FMU) is a land management area definable by objectives, management constraints, topographic features, access, values to protect, political boundaries, fuel types, major fire regime groups, etc. that set it apart from the characteristics of an adjacent FMU. A FMU may have dominant management objectives and pre-selected strategies assigned to accomplish these objectives and can further be divided into Fire Compartments and/or Burn Units. The NSAHR NWA FMU contains a total of 3,661 acres, according to the Installation INRMP.

3.2 WILDLAND FIRE HISTORY

Wildland fires, or wildfires, in coastal Virginia occur periodically as a result of lightning strikes. The following table from the Great Dismal Swamp Wildland Fire Management Plan (2010) details the historical fire return interval in this area.

TABLE 3. HISTORICAL FIRE RETURN INTERVAL BY PRIMARY VEGETATION COMMUNITY TYPE IN THE GREAT DISMAL SWAMP (ADAPTED FROM FROST 1993).

Community Type	Historical Fire Interval
Open Bog Grassland	1-3 years
Canebrake and Pine Savannah	4-6 years
Tall Pocosin Scrub	13-25 years
Pine and Mesic Hardwoods	25-100 years
Atlantic White Cedar, Cypress, Maple Gum	25-100 years

"Frost (1989) hypothesized that for lands south of the James River, which originally were the most fire prone area in Virginia, fire ceased to be a major factor in determining natural vegetation only about 50 years ago. Prior to 1900, fires within the Great Dismal Swamp were uncontrolled and usually occurred during droughts. Lightning ignited most of the fires, but Native American hunting parties and loggers may have ignited some fires. From 1900 to about 1945, railroad and logging activities brought new sources of ignition and changed the fuel dynamics by introducing large areas of slash fuel types to the landscape. Logging increased fire frequency, and created conditions that caused fires to burn for extended periods. Logging activities were typically concentrated during periods of higher fire danger. Logging in the swamp was most easily accomplished during dry periods when men and equipment could maneuver more easily on the organic soils. This is also when the soils are more susceptible to ignition and sustained combustion. Simpson (1990) reported on "The Great Conflagration," a logging slash fire that burned for years during 1923-1926, eventually burning an area of about 150 mi^2 (nearly 100,000 ac).

> *A combination of fire types, including naturally-occurring (lightning-caused) fires (Kirwan and Shugart 2000), and fires associated with the activities of Native Americans and European colonists (Patterson and Sassman 1988) have historically influenced vegetation in the eastern US. Naturally occurring fire is infrequent in the mid-Atlantic, however, human-set fire has historically, dramatically impacted the ecology of the region, including coastal Virginia (Brown 2000).*
>
> *The burning practices of Native Americans ceased as native peoples were decimated and most wildfires were suppressed. Suppression has had profound ecological effects on forests (Abrams 1996) and grasslands (Tyndall 1992, Latham et al. 1996, Askins 1997) in the eastern US. In the absence of periodic fire, eastern landscapes changed rapidly from grasslands to shrublands and dense forests (Brown 2000), and fire intolerant species, such as American beech (Fagus grandifolia) and red maple (Acer rubrum), have increased in distribution and abundance (Brown 2000, Kriwan and Shugart 2000). The absence of fires has allowed dense forest undergrowth.*
>
> *Fire-tolerant natural communities have undergone major changes in vegetation structure, including loss of biological richness and invasion by non-native plants (Ladd 1997).*
>
> *Changes in forest ecology and land use practices also changed the nature of the fires that occur. Heavier fuel loadings, as a result of conversion from grasslands to timber, and a lack of periodic burns to reduce fuel build-up, have largely changed eastern US fires from frequent, low intensity fires, to infrequent, high-intensity fires. In addition, seasonal drought conditions can exacerbate the wildfire potential with the increased fuel load allowing a lightning strike to result in a catastrophic wildfire."* Great Dismal Swamp Wildland Fire Management Plan (2010).

While the Installation does not have a very active wildfire problem, there have been several wildfire occurrences over the years. Wildfires can occur anytime the fuels are dry enough to sustain combustion.

Since DOD acquisition of the lands comprising NSAHR NWA the suppression of wildland fires has been mandated for the protection of personnel and property. The majority of wildland fires were actually caused by inadvertent ignition from rocket/missile launches, launch anomalies, or other human related activities. Regardless, the response to a wildland fire has always been immediate suppression. When a naturally occurring, lightning ignited or human-caused wildfire occurs on this Installation, the response is also to immediately suppress the fire. This response inhibits the natural fire cycle and creates unfavorable forest conditions; however, the protection of NSAHR NWA personnel and mission resources is foremost. One of the goals of this WFMP is to establish a procedure whereby naturally occurring wildland fires may be controlled, instead of immediately extinguished, for the purpose of reducing fuel loads and improving habitat/forest quality.

3.3 WILDLAND FIRE MANAGEMENT GOALS, STRATEGIES, AND GUIDANCE FROM INRMPS OR SIMILAR INSTALLATION PLANS

Goal 1 – Support the missions of NSAHR NWA by minimizing the wildland fire potential and severity.

- Objective 1.1 - Reduce the amount of vegetative fuels on the Installation by conducting prescribed fires on 5-10% of the burnable acres each year.
- Objective 1.2 - Maintain the existing network of firebreaks at the Installation and create new firebreaks as required.
- Objective 1.3 – Create prescribed burn compartment maps that show firebreaks, critical facilities, previously burned compartments (reduced fuel load) and any other wildfire control issues.
- Objective 1.4 – Minimize potential for a catastrophic wildfire by scheduling prescribed burning of compartments known to contain high fuel loads.

Goal 2 – Manage wildfires and prescription fires on NASHR NWA lands in a manner that protects the lives of firefighters, Installation personnel, and the public.

- Objective 2.1 – Provide and ensure adequate training for all firefighters and prescribed burning personnel, maintain certifications and re-certification/refresher training schedule, schedule and complete annual safety training as required.
- Objective 2.2 – Ensure all Fire Chiefs, On-Scene Commanders, prescribed burn bosses, firefighters, and prescribed burn personnel focus on providing the ultimate level of personnel safety protection while engaged in any type of wildfire operation, uncontrolled wildland fire, controlled prescribed fire, etc.
- Objective 2.3 – Establish and maintain a personnel/Installation-wide warning system with procedures to alert and/or inform Installation personnel, tenants, contractors, etc., of a scheduled prescribed burn or wildland fire.
- Objective 2.4 – Provide adequate smoke management during wildland fires to minimize, if not preclude, potential public safety issues (visibility, driving impairment, breathing, etc.) associated with the fire.
- Objective 2.5 Develop formal procedure and conduct safety briefings for all personnel involved in a prescribed burn prior to igniting and/or initiating a prescribed fire.

Goal 3 – Enhance NSAHR NWA capability for utilizing inadvertently ignited wildfires for fulfilling the goals of the fuels management program.

- Objective 3.1 – Establish and implement a procedure for analyzing a wildland fire scenario whereby a wildfire could be allowed to burn without jeopardizing personnel or resources.
- Objective 3.2 – Develop a checklist that can be used in conjunction with facility, infrastructure, and burn compartment maps to quickly determine critical aspects of a wildfire situation in order to provide rapid decisions to extinguish immediately or burn to the established compartment boundary.

- Objective 3.3 – Develop Memorandum of Agreements (MOA) and/or Cooperative Agreement between the USFWS Great Dismal Swamp National Wildlife Refuge (GDRNWR), Virginia Department of Forestry (VDOF), North Carolina Forest Service (NCFS), and the Installation for all types of prescribed fire and wildfire support and/or response as applicable.

Goal 4 – Improve security visibility to enhance protection of NSAHR NWA, and facilities and personnel.

- Objective 4.1 – Use prescribed fire to reduce the height and density of forests/vegetation to minimize areas of concealment by intruders.
- Objective 4.2 – Maintain firebreaks, utility corridors, lines of sight, road shoulders, rights-of-way, etc., used to delineate prescribed burn compartments that are co-utilized as security clear zones.

Goal 5 – Support the Goals of the INRMP to improve wildlife habitat.

- Objective 5.1 – Conduct prescribed fires/controlled burns for the purpose of maintaining the natural, fire dependent ecosystems.
- Objective 5.2 – Analyze and coordinate wildland fire response to determine if a wildfire can be safely controlled and managed as a fire for resource benefit.
- Objective 5.3 – Conduct periodic Controlled Burn Working Group meetings to coordinate and disseminate fire information, facilitate prescribed burn approval, resolve conflicts, and support the other goals of the WFMP.

Goal 6 – Improve forest quality.

- Objective 6.1 – Utilize prescribed fire to mimic the natural lightning ignited fire cycle.
- Objective 6.2 – Use prescribed fire to remove dead and dying vegetation, inhibit the growth and spread of exotic and/or invasive plant species, promote new plant growth (regeneration), create open areas within scrub forests and facilitate species diversification/biodiversity.
- Objective 6.3 – Facilitate the nutrient cycle by reducing the composition of vegetation to ash, thereby enhancing the solubility and uptake of nutrients utilized by regenerating plants and other organisms.

3.4 WILDLAND FIRE MANAGEMENT GUIDANCE AND STANDARDS FROM OTHER SOURCES

1. National Fire Protection Association (NFPA) Standards:
   a. NFPA 1002 Standard on Fire Apparatus Driver/Operator Professional Qualifications
   b. NFPA 1051 Standard for Wildland Firefighter Professional Qualifications
   c. NFPA 1143 Standard for Wildland Fire Management
   d. NFPA 1144 Standard for Protection of Life and Property from Wildfire

e. NFPA 1710 Standard for the Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Career Fire Departments

f. NFPA 1977 Standard on Protective Clothing and Equipment for Wildland Firefighting, 2005 Edition

2. Federal Wildland Fire Management Policy of 1995 and January 2001 update.
3. The 10-Year Comprehensive Strategy for A Collaborative Approach to Reducing Wildland Fire Risks to Communities and the Environment and the 2006 Implementation Plan
4. National Fire Plan
5. National Incident Management System: Homeland Security Presidential Directive 5 (HSPD-5), 28 February 2003 and Department of Homeland Security (DHS) National Incident Management System (NIMS), 1 March 2004
6. National Wildland Coordinating Group (NWCG) Publications Management System (PMS) 310-1 Wildland Fire Qualification System Guide

3.5 COMMON CHARACTERISTICS OF FIRE MANAGEMENT UNITS

Fire Management Units are delineated for a variety of purposes, such as vegetation, size, resource management, complexity of associated structures or landscape, and other planning needs. For this WFMP, the NSAHR NWA Installation will be considered a single FMU. Some common attributes of FMU's are fuels, fire breaks, structures, recreational areas, mission requirements, and unexploded ordinance (UXO).

3.5.1 Fuels

The Installation has a mix of vegetation types and thus fuel types. Expansive definitions can be found in the *Standard Fire Behavior Fuel Models: A Comprehensive Set for Use with Rothermel's Surface Fire Spread Model,* http://www.fs.fed.us/rm/pubs/rmrs_gtrl53/pdf. General definitions of the fuel types found at the Installation are described below and identified on the Land Fire Fuels Map in Appendix A. These maps were downloaded from the USGS Landfire Data Distribution Website, available online at: https://landfire.cr.usgs.gov/viewer/viewer.html.

Forest fuel loadings from the NSAHR NWA forest inventory found in the INRMP Appendix are in Table 5 at the end of this section.

3.5.1.1 Grass Fuel Type Models (GR)

The primary carrier of fire in the GR fuel models is grass. Grass fuels can vary from heavily grazed grass stubble or sparse natural grass to dense grass more than 6 feet tall. Fire behavior (FB) varies from moderate spread rate and low flame length in the sparse grass to extreme spread rate and flame length in the tall grass models. While the FB fuel models are static, all of the GR fuel models are dynamic, meaning that their live herbaceous fuel load shifts from live to dead as a function of live herbaceous moisture content. The effect of live herbaceous moisture content on spread rate and intensity is very strong.

Short, sparse grass (GR1)

The primary carrier of fire in GR1 is sparse grass, though small amounts of fine dead fuel may be present. The grass in GR1 is generally short, either naturally or by grazing, and may be sparse or discontinuous. The moisture of extinction of GR1 is indicative of a dry climate fuelbed, but GR1 may also be applied in high-extinction moisture fuelbeds because in both cases predicted spread rate and flame length are low compared to other GR models.

Fine fuel load (t/ac) 0.40
Characteristic SAV (ft-1) 2054
Packing ratio (dimensionless) 0.00143
Extinction moisture content (percent) 15

The **surface area to volume ratio** (SAV) of an object is the relationship between two measurements. It is the **ratio** of **Surface area to volume**. It shows the comparison between the size of the outside of an object and the amount it can hold inside it. Small objects have a large **surface area** compared to the **volume**.

Packing ratio is a measure of fuelbed compactness and is defined as the fraction of the fuel array volume that is occupied by fuel. It is important **factor** in predicting fire behavior. At very high **packing ratios**, lack of oxygen limits fuel combustion.

The fuel moisture content is weighed over all the fuel classes, and defines the moisture content at which the fire will not spread. It is also called **extinction moisture content.**

Low Load, Very Coarse, Humid Climate Grass (GR3)
The primary carrier of fire in GR3 is continuous, coarse, humid-climate grass. Grass and herb fuel load is relatively light; fuelbed depth is about 2 feet. Shrubs are not present in significant quantity to affect fire behavior.

Fine fuel load (t/ac) 1.60
Characteristic SAV (ft-1) 1290
Packing ratio (dimensionless) 0.00143
Extinction moisture content (percent) 30

Moderate Load, Humid Climate Grass (Dynamic) (GR6)
The primary carrier of fire in GR6 is continuous humid-climate grass. Load is greater than GR5 (GR5 is low load humid climate grass with load greater than GR3, but depth lower, about 1-2 feet) but depth is about the same. Grass is less coarse than GR5.

Fine fuel load (t/ac) 3.5
Characteristic SAV (ft-1) 2006
Packing ratio (dimensionless) 0.00335
Extinction moisture content (percent) 40

High and Very High Load, Humid Climate Grass – GR8 / GR9
The primary carrier of fire in GR8 is continuous, very coarse, humid-climate grass. Load and depth are greater than GR3. Spread rate and flame length can be extreme if grass is fully cured. GR9 is dense, tall humid-climate grass. Load and depth are greater than GR8, about 6 feet tall. Mature areas of common reed *(Phragmites australis)* would fit this model.

Fine fuel load (t/ac) 7.8 / 10.0
Characteristic SAV (ft-1) 1302 / 1612
Packing ratio (dimensionless) 0.00316 / 0.00316
Extinction moisture content (percent) 30 / 40

3.5.1.2 Grass-Shrub Fuel Type Models (GS)

The primary carrier of fire in the GS fuel models is grass and shrubs combined; both components are important in determining fire behavior. All GS fuel models are dynamic, meaning that their live herbaceous fuel load shifts from live to dead as a function of live herbaceous moisture content. The effect of live herbaceous moisture content on spread rate and intensity is strong and depends on the relative amount of grass and shrub load in the fuel model.

Moderate Load, Humid Climate Grass-Shrub (GS3)
The primary carrier of fire in GS3 is grass and shrubs combined. Moderate grass/shrub load, average grass/shrub depth less than 2 feet. Spread rate is high; flame length moderate. Moisture of extinction is high.

Fine fuel load (t/ac) 3.0
Characteristic SAV (ft-1) 1614
Packing ratio (dimensionless) 0.00259
Extinction moisture content (percent) 40

Moderate load, Humid Climate Class – Grass (GS6)
The primary carrier of fire in GS6 is continuous humid-climate grass. Fuel load is greater than GS3 but depth is the same, 1 to 2 feet. Grass coarseness is similar to cogon grass *(Imperata cylindrica).*

Fine fuel load (t/ac) 3.5
Characteristic SAV (ft-1) 2006
Packing ratio (dimensionless) 0.00335
Extinction moisture content (percent) 40

3.5.1.3 Shrub Fuel Type Models (SH)

The primary carrier of fire in the SH fuel models is live and dead shrub twigs and foliage in combination with dead and down shrub litter. A small amount of herbaceous fuel may be present in SH9, which are dynamic models (their live herbaceous fuel load shifts from live to dead as a function of live herbaceous moisture content). The effect of live herbaceous moisture content on spread rate and flame length can be strong in those dynamic SH models.

Very High Load, Humid Climate Shrub (SH9)
The primary carrier of fire in SH9 is woody shrubs and shrub litter. Dense, finely branched shrubs with significant fine dead fuel, about 4 to 6 feet tall; some herbaceous fuel may be present. Spread rate is high, flame length very high.

Fine fuel load (t/ac) 13.05
Characteristic SAV (ft-1) 1378
Packing ratio (dimensionless) 0.00505
Extinction moisture content (percent) 40

3.5.1.4 Timber-Understory Fuel Type Models (TU)

The primary carrier of fire in the TU fuel models is forest litter in combination with herbaceous or shrub fuels. TU3 contains live herbaceous load and are dynamic, meaning that their live herbaceous fuel load is allocated between live and dead as a function of live herbaceous moisture

content. The effect of live herbaceous moisture content on spread rate and intensity is strong and depends on the relative amount of grass and shrub load in the fuel model.

Moderate Load, Humid Climate Timber-Grass-Shrub (TU3)
The primary carrier of fire in TU3 is moderate forest litter with grass and shrub components. Extinction moisture is high. Spread rate is high; flame length moderate.

Fine fuel load (t/ac) 2.85
Characteristic SAV (ft-1) 1611
Packing ratio (dimensionless) 0.00359
Extinction moisture content (percent) 30

3.5.1.5 Timber Litter Fuel Type Models (TL)

The primary carrier of fire in the TL fuel models is dead and down woody fuel. Live fuel, if present, has little effect on fire behavior.

Low Load Broadleaf Litter (TL2)
The primary carrier of fire in TL2 is broadleaf (hardwood) litter. Spread rate is very low; flame length very low. Although model TL2 was designed for broadleaf litter, it also applies to the various swamp habitats found at NSAHR NWA.

Fine fuel load (t/ac) 1.4
Characteristic SAV (ft-1) 1806
Packing ratio (dimensionless) 0.04232
Extinction moisture content (percent) 25

Moderate Load, Conifer Litter (TL3)
The primary carrier of fire in TL3 is moderate load conifer litter, light load of coarse fuels. Spread rate is very low; flame length low.

Fine fuel load (t/ac) 0.50
Characteristic SAV (ft-1) 1532
Packing ratio (dimensionless) 0.02630
Extinction moisture content (percent) 20

Moderate load Broadleaf Litter (TL6)
The primary carrier of fire in TL6 is moderate load broadleaf litter, less compact than TL2. Spread rate is moderate, flame length low.

Fine fuel load (t/ac) 2.4
Characteristic SAV (ft-1) 1936
Packing ratio (dimensionless) 0.02296
Extinction moisture content (percent) 25

Long Needle Litter (TL8)
The primary carrier of fire in TL8 is moderate long needle pine litter, may include small amount of herbaceous load. Spread rate is moderate, flame length low.

Fine fuel load (t/ac) 5.8
Characteristic SAV (ft-1) 1770
Packing ratio (dimensionless) 0.03969
Extinction moisture content (percent) 35

Very High Load Broadleaf Litter (TL9)

The primary carrier of fire in TL9 is very high load, fluffy broadleaf litter. TL9 can also be used to represent heavy needle-drape. Spread rate is moderate; flame length moderate.

Fine fuel load (t/ac) 6.65
Characteristic SAV (ft-1) 1733
Packing ratio (dimensionless) 0.03372
Extinction moisture content (percent) 35

[1]Dead fuel moisture responds to ambient environmental conditions and is critical in determining fire potential. Dead fuel moistures are classed by timelag. A fuel's timelag is proportional to its diameter and is loosely defined as the time it takes a fuel particle to reach 2/3 of its way to equilibrium with its local environment, i.e. lose 66% of its current moisture content. There are four timelag classes:
1-hour: Less than 0.25 inch diameter, fine fuels that respond quickly to weather changes.
10-hour: 0.25-1 inch diameter
100-hour: 1-3 inch diameter
1,000-hour: 3-8 inch diameter.

This page intentionally left blank.

3.5.2 Fire Breaks

The Installation has many roads, agricultural fields, and administrative sites which can be a barrier to fire spread. The bottom land hardwood forests will provide a barrier to fire spread as long as water levels are up. Records indicate that fire breaks and fuel breaks were at one time used frequently across the Installation to support the prescribed fire work. There are mowed trails for hunting unit access that can be improved to use as fire breaks. Establishing some permanent fire breaks, in association with the roads will provide further protection from an unwanted fire coming on or leaving the Installation.

3.5.3 Unexploded Ordnance (UXO)

The Installation covered by this plan may contain unexploded ordinance (UXO) materials. Therefore, certain areas have been designated as "no suppression zones." In these areas, suppression activities are limited to using and maintaining existing roads as firebreaks. Personnel will not suppress fire using engines, tractors, or hand tools in any designated "no suppression zone".

It is essential that firefighting operations within or near areas that are known or suspected to contain military munitions (e.g., unexploded ordnance) be planned with consideration of explosives safety. This is equally true where military munitions operating facilities (e.g., current of former production facilities, demilitarization facilities) exist. The local explosives safety specialists, bomb squad, or nearest military explosives ordnance disposal (EOD) unit should be contacted and used as a resource.

Recognizing and taking action to mitigate the potential hazards (explosive and/or chemical agent) associated with military munitions that may be present is paramount to reducing the risk of serious injury or loss of firefighting resources when fighting fires that may potentially involve military munitions.

The ability to recognize military munition is the first and most important step in reducing the potential risks associated with UXO. The below military munitions are likely to be encountered as UXO or DMM on operational ranges or property (e.g., FUDS) formerly used by the DoD for live-fire training or testing or military maneuvers. The potential explosives hazards from munitions vary based on a number of factors. Although the explosives hazards associated with small arms ammunition - defined as ammunition, without projectiles that contain explosives (other than tracers), that is .50 caliber or smaller, or for shotguns - are considered minimal they should not be ignored. Any munitions encountered should be considered UXO and extremely dangerous.

UXO can be found in many different ways (e.g., on the surface, partially buried in soil or partially submerged under water, or buried or fully submerged) and in many different conditions (e.g., rusty and crusted, like new, in parts). The location and condition of the munitions found on a site depends in part on the type munitions used, the weapon systems employed, how the munitions were used (e.g., training or the geology and environmental conditions of the of the area, and activities that may have taken place on the property since DoD last used the site.

UXO may be found fully intact or in parts or fragments. All UXO, whether intact or in parts, presents a potential explosion hazard and should be treated as such. Even UXO that have deteriorated present a significant explosives hazard. In addition, these munitions can also present

an environmental hazard because munitions constituents, like their fillers (e.g., RDX, HMX, TNT), could become exposed.

EXPLOSIVES SAFETY MEASURES: Whether present in an area by design or by accident, UXO poses potential risks of injury or death. Remember the following:

- If you did not drop it, do not pick it up or disturb it!
- Do not enter an area known or suspected to contain munitions. All munitions, whether intact or in fragments, present a potential explosive hazard.
- If you encounter or suspect you may have encountered a munition, stop, and scan the area for additional munitions. Do not move closer.
- Never touch, move, or disturb a munition or suspect munition.
- If time permits, clearly mark the area where munitions were encountered. Do not mark the munition.
- Do not attempt to fight fires in areas known or suspected to contain munitions.
- Report the discovery of munitions to your immediate supervisor or the incident commander as soon as possible!
- Do not use radios or cell phones within 100 feet of areas known to contain munitions, unless specifically authorized or in an emergency.

3.6 FIRE MANAGEMENT UNIT SPECIFIC DESCRIPTIONS

A Fire Management Unit (FMU) is simply an area of similar fuels, weather and topography where fire can be managed in the same manner. Lands within an FMU are geographically proximal to each other. In the case of this WFMP, this Installation is considered its own FMU. Therefore, there is one FMU described in the plan. Fuels maps, firebreak maps, and vegetation maps can be found in Appendix A.

4.0 WILDLAND FIRE OPERATIONAL GUIDANCE

4.1 MANAGEMENT OF WILDFIRES

4.1.1 Preparedness

In order to be prepared for the unexpected, natural resource staff and fire and emergency services personnel should be trained and have wildland fire experiences. Preparedness is defined as activities that lead to a safe, efficient, and cost-effective fire management program in support of land and resource management objectives through appropriate planning and coordination. Some examples of preparedness are: pre-season wildfire planning with state and local coordinators, Wildland Urban Interface (WUI) assessments, such as FIREWISE, review of agreements and MOUs, and initial response planning.

NSAHR NWA contains varying fuel types that react differently under different drought conditions. Drought index, energy release component, and water levels can be used as measurable objective figures to indicate an appropriate preparedness level. Due to the vast area of hardwood swamp and flatwoods, drought will play a role in the establishment of a large fire. These areas can and will burn under unusually dry periods, as the fires of Great Dismal Swamp NWR did in 2008 and 2011. Ignition component, season, national and regional fire activity, and other circumstances are also considered in preparedness decisions.

Ignition sources for wildland fire at this Installation includes but is not limited to, range/training fires, equipment fires, human cause, and lightning. Ignition sources vary by season since temperature, lightning activity, rainfall, relative humidity (RH), fuel moisture content, and curing stage of live fuels vary seasonally. Although lightning is not an important ignition source, lightning fires may occur more frequently during the Atlantic storm season from May through August, and range/training caused fires may occur year-round.

4.1.2 Fire Danger Indices

Fire danger indices correlate weather, fuel moisture, amount of fuel, fuel type, and topography data to potential for a fire to start, spread, and its intensity. Two indices we will look at are Energy Release Component (ERC) and Burning Index (BI). ERC serves as a good characteristic of local seasonal fire danger trends resulting from the area's fuel moisture conditions. BI reflects the changes in fine fuel moisture content and wind speed. This index is highly variable on a daily basis. The Keetch-Byram Drought Index (KBDI) is included in the report to provide a view of local and regional drought. The KBDI is a daily value representing the water balance where yesterday's drought index is balanced with today's drought factor. The KBDI index ranges from 0-800, which represents a soil moisture level in the first 8 inches of soil. Zero being saturated and 800 extremely dry. These indices provide a range from extreme to low fire potential. As an example; the local ERC is reaching the 95 percentile and the BI is forecast to reach 40. This indicates a fire that ignites will burn intensely and with the high BI spread quickly. When reviewed together they form trends that can define fire seasons. These trends can also help define the Installation's wild land fire readiness and/or determine levels when military missions may cause a fire. These charts are in Appendix D.

4.1.3 Training & Safety

1. All civilian, contractor, and emergency services personnel involved in wildland fire management must be trained for their expected level of involvement in the wildland fire organization. Training shall meet the applicable NFPA or NWCG Standards for wildland fire activities. State training by the state in which the Installation is located is also acceptable if appropriate for the employee's expected level of involvement in wildland fire activities.
2. Personnel in the natural resources job series (GS-401 thru GS-499), cultural resources (GS0193), and natural/cultural resources contractors with jobs requiring certifications as per references NFPA 1051 and NFPA 1002, or the equivalent NWCG Wildland Fire Qualification System Guide (PMS 310-1/NFES 1414) certifications.
3. Personnel are mobilized to participate in wildland fire management activities on Federal properties not under DoD jurisdiction, through their local dispatch, then the state Geographic Coordination Center (GACC) and then through NICC.
4. Military personnel can be mobilized through the DOI, USDA, and DOD Interagency Agreement. NICC will place all Requests for Assistance (RFAs) for DoD assets to the US Northern Command (USNORTHCOM) in Colorado Springs, CO. The RFA will include a fiscal code for DoD use. The purpose of the Interagency Agreement for the Provision of Temporary Support During Wildland Firefighting Operations among the United States Department of the Interior, the United States Department of Agriculture, and the United States Department of Defense is:

   • To establish the general guidelines, terms and conditions under which the National Interagency Fire Center (NIFC) will request, and DOD will provide, temporary support to NIFC in wildfire emergencies occurring within all 50 States, the District of Columbia, and all U.S. Territories and Possessions, including fires on State and private lands. It is also intended to provide the basis for reimbursement of DOD under the Economy Act.

This agreement and others can be found at: https://www.nifc.gov/nicc/logistics/references.htm.

Several national requirements, including the National Wildfire Coordinating Group (NWCG) Qualifications Guidelines (310-1), are in place to aid the conduct of safe operations. All firefighters must have the training and experience for their positions and equipment they operate. All personnel will be issued fire-resistant clothing, a hard hat with chinstrap, fire shelter, leather gloves, eye protection, and hearing protection. Personnel must use the appropriate Personal Protective Equipment (PPE) in conjunction with their assigned task.

Leather boots which are a minimum of 8 inches tall and have lug soles are also required for wildland firefighters but are not issued as standard equipment.

4.1.4 Wildland Fire Incident Management

The Chief, Fire and Emergency Services or their designee will be the initial attack incident commander for every fire on the base. This initial attack incident commander will then be responsible for managing the fire and ordering additional resources as needed. All incident functions will follow the Incident Command System (ICS). Additional resources may be provided from cooperating agencies through a Memorandum of Understanding (MOU) or Memorandum of

Agreement (MOA). These MOU or MOA are the tool for ordering and paying outside resources. If a fire were to get established in the swamp or flatwoods, heavy equipment would be needed to contain the spread. This would be another use of the agreements. It is important to review these annually. See Appendix B.

To facilitate the use of naturally occurring wildfires to meet fuels management objectives the Incident Commander may utilize barriers such as roads, waterways, and previously burned areas to contain fires. Utilizing this strategy will allow firefighters to more safely manage wildfires.

4.1.5 Wildland Fire Aviation Management

Any fire-related aviation operations will follow applicable guidelines of the Navy and Federal/State interagency operations and guidelines.

4.1.6 Wildfire Detection

Wildfires are typically reported via detection from Installation personnel, aircraft or the control towers. Private Citizens may call in a wild fire through the 911 system.

4.1.7 Initial Report of Wildfire and Initial Attack (Response) Dispatching

Fire reporting is accomplished by calling 911. The Installation dispatcher will then dispatch a response for the wildfire.

4.1.8 Incident Commander Responsibilities (for all incident types)

All wildfires will be supervised by a qualified incident commander (IC). The IC is a single individual responsible for all incident activities, including the development of incident management strategies and tactics, and the ordering, deployment, and release of resources. The IC is responsible to:

- Provide a fire size-up to dispatch as soon as possible upon arrival on scene. A size-up consists of: location, size, status (growth and direction), weather conditions on-site, best access route, special hazards or concerns, additional resource needs (law enforcement, medical, etc.). (2016 Incident Response Pocket Guide)
- All Incident Commanders will file an incident report.
- Assess potential management by suppression and/or by wildfire for resource benefits as incident objective(s).
- Use guidance in this WFMP. Secure a Delegation of Authority, for non-Navy Incident Commanders (2016 Redbook), to implement the selected suppression response and manage an organization to implement effective strategies and tactics. Minimize suppression impacts where possible without reducing the effectiveness of the actions being undertaken.
- Determine resource needs and order as needed through a local dispatch.
- Ensure all resources assigned and those incoming receive a briefing. Document these briefings. Refer to the Briefing Checklist in the IRPG.

- Continually re-assess incident complexity using the checklist in the IRPG. When a more qualified IC is needed, inform dispatch and Fire Chief and place the order for a higher level IC.
- Depending on incident complexity, additional responsibilities for the IC may apply. Utilize the National Wildfire Coordination Group (NWCG) Fireline Handbook for a more detailed description of IC responsibilities.
- All resources, including mutual aid resources, will report to the IC (in person or by radio) to receive an incident briefing prior to tactical assignment deployment.
- All wildfires must be investigated to determine fire cause. Use of Navy or cooperator investigators is recommended. Document findings, determine if negligence or criminal intent were factors.

4.2 MANAGEMENT OF PLANNED FUELS TREATMENTS

4.2.1 Fuels Management

Fuels Management is the use of prescribed fire and non-fire techniques to manipulate fuel hazards to a lower burning intensity for manageability and ecological diversity.

In the arena of fire protection, prescribed fire is the major tool to be used to manage wildland fuels for the Installation. Due to the robust vegetation types combined with a 6-month growing season and high rainfall amounts, fuels management is an ongoing fire program concern.

The *Interagency Prescribed Fire Planning and Implementation Procedures Guide* is the guiding document for writing prescribed fire plans. The Interagency Prescribed Fire Plan Template will be used for all prescribed fire plans on this Installation. The template can be found in the Interagency Prescribed Fire Plan Guide. A Prescribed Fire Plan for the Installation is provided as Appendix C of this document.

4.2.2 Processes used to identify fuels treatments

Fuels treatments on the Installation will be identified by the Installation NRM. Factors used to make these determinations include: site inspections, input from NSAHR NWA staff, fuel loads, fuel mapping, clear zone management needs, time since last burned, species habitat management guidelines and other pertinent information that is needed to make determinations.

4.2.3 Prescribed Fire Program

NSAHR NWA currently does not have an active prescribed fire program. There are records indicating prescribed burns were planned in the 80's, as forest management practices, and also as recently as 2007-2009. It is the intent of the natural resource program to re-initiate this program with an average of 5-10 percent of the burnable fuels treated yearly. It is recommended that initial prescribed burning be accomplished in the dormant or winter time due to heavy fuel loading. Once an area has received a cool season burn it can be setup for a growing season burn.

Fire is considered an important element of several native ecosystems in the southeastern U.S. and although there is a low level of risk for wildland fire at NSAHR NWA, controlled burning is used

as a natural resources management tool. Conducting controlled burns is a cost-effective, practical method of controlling or manipulating vegetation.

At NSAHR NWA it is used to:

- reduce hazardous fuel accumulation,
- prepare sites for seeding and planting,
- control hardwood competition in pine stands,
- maintain vegetation height restrictions in the ROTHR and Helicopter Landing Pad,
- maintain grasslands and other early successional habitat,
- improve wildlife habitat, and
- Aid in the control of select invasive species.

All prescribed burns on the Installations will be conducted under the supervision of a Virginia or North Carolina State Certified Burn Manager.

Prescribed burns are commonly used to reduce slash and expose mineral soils in preparation for seeding or planting in pine plantations. In pine stands in particular, high levels of forest fuels pose a serious threat of wildfire and may accumulate in only a few years. There is no set time interval for reducing hazardous fuels; however, a burning rotation of 3 to 5 years is generally utilized throughout the southeast. Tolerance to heat intensity, smoke management, risks, and desired understory composition should serve as guides for determining burning intervals. As the primary objective in prescribed burning is to reduce hazardous fuels, it is only necessary to break up the fuel continuity, and not to achieve 100% coverage of the area. The resulting patchwork of unburned areas also is beneficial to wildlife. However, the fuel buildup in unburned areas can cause hot spots in future burns and must be closely observed.

Encroachment of understory hardwoods in pine stands may crowd out or suppress pine seedlings. The resulting competition for water and nutrients may significantly lower growth rates of the overstory and result in an undesirable species composition. Burning is most effective at controlling hardwoods that are less than 3 in (8 cm) in diameter at ground level. To best control woody growth, burns should be conducted in the growing season after hardwood species have put their reserved energy into leaf growth. It has been found that, although in some cases, one or two summer burns can completely eliminate hardwood competition, winter burns often do little to affect hardwood growth and early spring burns result in dense, hardwood undergrowth. Summer burns also have a greater potential to damage the residual pines and must be used with caution. There has been a great deal of research on fire's influence on the development of oak forests, and it is seen as a potential tool for eliminating less desirable understory hardwoods. Frequent burning to eliminate or damage mast-producing species and burning bottomland hardwoods should be avoided. Frequent fires (intervals of less than five years) can be used to improve habitat conditions for a number of wildlife species. The production of herbaceous growth sharply increases during the first growing season following a prescribed burn and gradually decreases over the next 2 to 4 years. Understory structure and composition also can be permanently altered by frequent prescribed fires and should be monitored.

Frequent fires tend to favor annual species by eliminating competing perennial vegetation and can increase the occurrence of invasive exotic species. Bermuda grass *(Cynodon dactylon)*, sericea lespedeza *(Lespedeza cuneata)*, and spotted knapweed *(Centaurea maculosa)* are non-native invasive species that invade burned sites and should be watched for. The US Forest Service, Fire Effects Information System describes the effects of fire on a number of plant and wildlife species and habitat types across the US.

A portion of the Installation(s) lands support fire dependent ecosystems. The application of fire is essential to their continued existence of these fire dependent ecosystems. The following fire management strategies will be used as prescribed fire management on Installation lands.

- Hazardous fuel reduction treatments will be used where the fuel loading and environmental conditions present a hazard to life, resources, property, the Navy mission, or threatened and endangered species and their habitats.
- Where possible and desirable, prescribed fires will simulate the natural fire season. Historically, most of the lightning-ignited fires occurred during the late spring and throughout the summer season. Ultimately, some portion of the annual prescribed fire program accomplishment will be during these months.
- Prescribed fire will be used in conjunction with other resource management activities to restore vegetation in fire dependent ecosystems. Where possible and desirable, prescribed fires will simulate the natural fire frequency and severity and in some cases, will involve mechanical or herbicide treatment of vegetation prior to burning.

4.2.4 Project Planning

All prescribed fire activities from planning through implementation will be done following guidance from Virginia Department of Forestry or North Carolina Forest Service or both and the Interagency *Prescribed Fire Planning and Implementation Procedures Guide.* The first step in planning a prescribed fire is defining the objectives of the prescribed fire.

Once objectives are identified, areas or units that fit the identified objectives are listed. The final identification of areas to burn the next year or two should be an interdisciplinary process. The development of the PFP should include field visits, burn unit map preparation, pre-burn preparation required, the size and makeup of the burning crew, smoke management screening, and monitoring of the effects of prescribed fire, review of the unit's fire history, fuel loading and type will be recorded, fire behavior, and coordination with other internal and external partners.

The approval process involves a technical review by the Installation NRM and approval by the CO.

Prescribed fire plans and their implementation will generally be based on established areas. These maybe hunting units, military mission areas, air field clearance zones, or other clearly delineated area.

Maintenance of firebreaks around each burn unit to protect adjacent land is an important part of controlled burning. Firebreak maintenance or construction must be conducted prior to ignition. Cool season, and if necessary growing season, prescribed burns will be conducted on NSAHR NWA on a 1 to 5-year rotation to maintain grasses and low shrubs in a state of compliance for ROTHR and other Communication Systems, and Helicopter Landing Pad safety clearance

requirements. Prescribed burns would only be conducted by trained and experienced personnel. Proper evaluation of fire conditions and detailed planning will be conducted each time a burn is set. The Natural Resources Specialist is the proponent for all aspects of prescribed burning on the station.

In Virginia there is a 4pm law that limits burning after 4pm from February 15, to April 30. The 4:00 p.m. Law § 10.1-1142 B shall not apply if:

1. The fire is set for "prescribed burning" that is conducted in accordance with a "prescription" and managed by a "certified prescribed burn manager" as those terms are defined in § 10.1-1150.1;
2. The burn is conducted in accordance with § 10.1-1150.4;
3. The State Forester has approved the application for the prescribed burn; and
4. The burn is being conducted for one of the following purposes:
    i. control of exotic and invasive plant species that cannot be accomplished at other times of the year;
    ii. wildlife habitat establishment and maintenance that cannot be accomplished at other times of the year; or
    iii. management necessary for natural heritage resources. The State Forester may on the day of any burn planned to be conducted pursuant to this subsection revoke his approval of the prescription for the burn if hazardous fire conditions exist. The State Forester may revoke the certification of any certified prescribed burn manager who violates any provision of this subsection.

North Carolina has similar prescribed burning legislation in regard to certified burner, burn permit, smoke management, developing a burn plan and other considerations. These requirements can be found here:

http://www.ncga.state.nc.us/EnactedLegislation/Statutes/HTML/ByArticle/Chapter_106/Article_80.html

All burn units designated for growing season fires will receive at least one dormant season prescribed fire prior to a growing season prescribed fire. It is recognized that maintaining fire frequency is a higher priority to seasonality, if conditions do not warrant growing season burns.

4.3 AIR QUALITY AND SMOKE MANAGEMENT

4.3.1 Prescribed Fire Smoke Management

The Installations must comply with National and State regulations concerning air pollution. To do this, the Base must take action to manage human exposure to smoke from both prescribed burns and wildfires by minimizing impacts and maintaining air quality.

4.3.2 Federal Regulations Smoke Management

The most important Federal Regulation concerning smoke management on Installations is the Clean Air Act (42 USC (USO) 7401). The specific areas of concern to fire managers are Class 1

Air sheds and Non-Attainment areas. There are no Class 1 air sheds or Non-Attainment areas within the area managed under this plan.

4.3.3 State Regulations Smoke Management

The appropriate Fire Departments and Department of Environmental Quality officials will be notified on the day of the prescribed burn. There are no Virginia state requirements for particulate emissions at this time, nor any permitting process for federal land management agencies. Unless conditions are unusual, burning authorizations are granted between 0900 and one hour after sunset for State Certified Burn Managers. The state requires that visibility remain above 500 ft on highways. It does not have any regulations at the present time that limit the total number of prescribed burns in an area, nor the total amount of particulates that are in the air at one time.

4.3.4 Smoke Management Goals

In general terms, the goals of smoke management on the Installations are to manage both prescribed fires and wildfires in such a manner as to cause minimum smoke impact to the surrounding areas. Specifically, these goals would be:

- Each Burn Area will specify required conditions upon which burning may take place to minimize impacts to identified downwind sensitive smoke receptors (Table 2). These sensitive targets include hospitals, nursing homes; interstate or other major highways, schools, and heavily populated areas.
- Target areas around NSAHR NWA include, antennas, roadways, buildings, the IAMS range, and neighborhoods north of the Installation on Ballahack Road.
- Endeavor to keep smoke episodes less than twenty-four hours in duration.

4.3.5 Smoke Planning

The *Smoke Management Guide for Prescribed and Wildland Fire* (NWCG, NFES 1279, PMS 420-1, 2001) and Virginia Smoke Management guidelines are used to guide the NSAHR NWA smoke management activities.

To assist in the smoke management planning process, the major smoke sensitive areas will be identified prior to each prescribed fire. Smoke plume directions are plotted on burn maps and the direction that causes the least impact is chosen. This map is normally printed the morning before the Pre-Burn briefing to assist in making the GO/NO GO decision. Dispersion indices, ventilation rates and dispersion categories are listed below.

Dispersion Index Value	Interpretation
≥101	Very Good
61 to 100	Good
41 to 60	Fair to Good
21 to 40	Fair
13 to 20	Fair to Poor
7 to 12	Poor
1 to 6	Very Poor

Ventilation Rate (ft mph)	Associated Burn Category
0 to 33,499	1
33,500 to 44,999	2
44,500 to 59,999	3
60,000 to 111,999	4
≥112,000	5

Surface Wind (mph)	Associated Dispersion Category
Near Calm	Stagnant
2 to 4	Very Poor
6 to 8	Poor
9 to 12	Fair
≥13	Good

4.3.6 Prescribed Fire Operations Related to Smoke

A test fire will be ignited at the beginning of each prescribed fire to determine if objectives, including smoke management can be met. The fuels for the test fire should be representative of the burn unit, and the area ignited should be of sufficient size to give a good indication of smoke plume direction and dispersal.

The smoke generated by the fire will be monitored throughout the prescribed fire. If the prescription parameters for smoke management are exceeded, steps to mitigate impacts are taken. Depending on the situation, these measures could include varying the firing technique, initiating traffic control or shutting down the burn.

4.4 PROJECT IMPLEMENTATION

Implementation will follow least risk, due to weather, fuels, and available resources logic. While some areas will be a higher priority, at no time will we take undue risk to accomplish any prescribed burns.

During the time between the approval of the Prescribed Fire Plan and the actual burn day, preparation activities such as maintaining the necessary control lines or preparing the vegetation powerlines, around facilities will be completed.

The environmental staff can monitor the fire weather and National Fire Danger Rating System (NFDRS), through the VDOF website. Remote Automated Weather Station (RAWS) may be ordered and used year around. On burn day, general zone weather forecasts and a spot weather forecast for the burn area will be obtained from the Virginia National Weather Service Office. Weather conditions can also be obtained from the Great Dismal Swamp National Wildlife Refuge, or NAS Oceana Air Operations Tower.

4.4.1 Prescribed Fire Notifications

Prior to the ignition of any prescribed fire, the appropriate organizations will be notified. The security forces office is also notified. A complete list of notifications is included within each prescribed fire plan.

4.4.2 Procedures for Escaped Prescribed Burn

- Begin the suppression response as soon as the prescribed fire has left the determined prescribed fire area or beyond the contingency parameters.
- Leave personnel to manage the prescribed fire, while the qualified and delegated personnel are suppressing the escaped prescribed fire.
- Notify the Installation Fire Chief, and Dispatch office
- Take photos if possible.

4.4.3 Conversion of a Prescribed Fire to a Wild Fire

When a prescribed fire burns outside the planned burn unit boundary and cannot be mitigated by implementing the contingency plan in the prescribed fire burn plan, it may be converted to a wildfire. Similarly, a prescribed fire that is still within a burn unit boundary, but outside prescription parameters and not meeting objectives, may be converted to a wildfire.

A wildfire may be concurrently managed for one or more objectives and objectives can change as the fire spreads across the landscape. Objectives are affected by changes in military mission, fuels, weather, topography, varying social understanding and tolerance, and involvement of other governmental jurisdictions having different missions and objectives.

Managers will use a decision support process to guide and document wildfire management decisions. The process will provide situational assessment, analyze hazards and risk, define implementation actions, and document decisions and rationale for these decisions.

Site-specific treatment objectives are developed to guide project operations. Prescribed fire objectives describe what a treatment must accomplish in order to meet a resource management objective.

The converted wildfire will be transferred from a Prescribed Fire Burn Boss to a qualified Incident Commander.

4.5 PREVENTION

During times of elevated fire danger the Installation Fire Chief, in coordination with other programs may issue temporary restrictions on outdoor fires. Along with providing fire prevention messages and materials to Installation users.

Prevention education should be stressed to all users of the Installations during periods of high fire danger. Virginia fire prevention materials can be found at:
http://www.dof.virginia.gov/fire/firewiseva/index.htm.

5.0 MONITORING AND EVALUATION

The intent of this section is to document processes for determining whether the WFMP is being implemented as planned and fire–related goals and objectives are being achieved. Information obtained from monitoring and evaluation is used to update the FMP and land management plans.

WFMPs will be reviewed annually and updated as outlined in the national WFMP review process. The Installation Commander and the Installation NRM or representative is responsible for reviewing the WFMP and determining required updates needed annually. Revisions of WFMPs will be required during the completion of a new (or significantly revised) INRMP.

APPENDIX B. MEMORANDUM OF UNDERSTANDING/MUTUAL AID AGREEMENTS

1. Currituck County (2010)
2. City of Chesapeake (2012)

MUTUAL AID AGREEMENT
BETWEEN
PROGRAM DIRECTOR, REGIONAL PUBLIC SAFETY
NAVY REGION MID-ATLANTIC
1510 GILBERT STREET, NORFOLK VA 23511
AND
CURRITUCK COUNTY, NORTH CAROLINA
153 COURTHOUSE ROAD, CURRITUCK, NC 27929
FOR THE PROVISION OF FIRE FIGHTING & EMS ASSISTANCE

THIS MUTUAL AID AGREEMENT (hereinafter, the "Agreement") is made and entered into this 21st day of December, 2009 by and between Program Director, Regional Public Safety, Navy Region Mid-Atlantic (hereinafter, "Navy"), Currituck County Department of Fire-EMS by the authority of the County Manager, Currituck County North Carolina for fire fighting and emergency medical services (EMS) assistance (hereinafter, "Currituck County").

WITNESSETH:

WHEREAS, each of the Parties hereto maintains equipment and personnel for the suppression of fires, emergency medical services calls, hazardous materials incidents and any other related emergency incidents occurring within areas under their respective jurisdictions, and

WHEREAS, as set forth in 42 U.S.C. 1856 the term 'fire protection' includes personal services and equipment required for fire prevention, the protection of life and property from fire, fire fighting, and emergency medical services, including basic medical support, basic and advanced life support, hazardous material containment and confinement, and special rescue events involving vehicular and water mishaps, and trench, building, and confined space extractions.

WHEREAS, the Parties hereto desire to augment the fire protection, and hazardous material response capabilities available in their respective jurisdictions by entering into this Agreement, and

WHEREAS, the lands or districts comprising the respective jurisdictions of the Parties are adjacent or contiguous to one another such that the rendering of mutual assistance between the Parties in response to a fire, emergency medical event or hazardous material incident is feasible, and

WHEREAS, it is the policy of the Department of the Navy and the Program Director, Regional Public Safety, Navy Region Mid Atlantic, to enter into Mutual Aid Agreements with non-Federal Fire Departments located in the vicinity of a Naval installation, whenever practicable, and

WHEREAS, the Parties have mutually concluded that it is desirable, practicable, and beneficial for the Parties to enter into this Agreement to memorialize their willingness and ability to render assistance to one another, in order to enhance the safety and security of the civilian community and Navy Region Mid-Atlantic installations and facilities.

NOW, THEREFORE, BE IT AGREED THAT:

1. The authority to enter into this Agreement is set forth in 42 U.S.C. 1856a, and 15 U.S.C. 2210, and the regulations implementing same at 44 Code of Federal Regulations Part 151.

2. The rendering of assistance from one Party to the other under the terms of this Agreement shall be accomplished in accordance with detailed operational plans and procedures, which shall be developed by each of the Parties. The technical heads of each Party's Fire-EMS Departments shall work together to implement such plans and procedures in a manner compatible with the operational authorities of each.

3. The senior officer of a Fire-EMS Department belonging to a Party to this Agreement, or the senior officer of such Fire-EMS Department actually present at a fire, EMS or hazardous material incident, may request assistance under the terms of this Agreement from the other Party's Fire-EMS Department, whenever he/she deems it necessary to make such a request. The senior officer on duty of the Fire-EMS Department receiving a request for assistance shall forthwith take the following action:
    a. Immediately determine if the requested apparatus and personnel are available to respond to the call for assistance.
    b. In accordance with the terms of this Agreement, forthwith dispatch such apparatus and personnel, along with instructions as to their mission, use and deployment, in quantities and amounts as in the judgment of the senior officer receiving the call can be provided to the requesting Fire Department without

jeopardizing the mission of the Fire-EMS Department providing such resources.

4. The rendering of assistance under the terms of this Agreement shall not be mandatory; however, the Party receiving a request for assistance shall endeavor to immediately inform the requesting Party if the requested assistance cannot be provided and, if assistance can be provided, the quantity of such resources as may be dispatched in response to such request. Neither Party shall hold the other Party liable or at fault for failing to respond to any request for assistance or for failing to respond to such a request in a timely manner or with less than optimum equipment and/or personnel, it being the understanding of the Parties that each is primarily and ultimately responsible for the provision of fire suppression and hazardous material incident response needed within their own jurisdictions.

5. As required by Federal law as a condition precedent to entering into this Agreement, the Parties hereby waive all claims against the other Party for compensation of any loss, damage, personal injury, or death occurring in consequence of the performance of this Agreement.

6. Each Party hereby agrees that its intent with respect to the rendering of assistance to the other Party under this Agreement is not to seek reimbursement from the Party requesting such assistance. The Parties hereby recognize that pursuant to the Section 11 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2210) and Federal regulations issued there under (Title 44 of the Code of Federal Regulations 151), Currituck County is permitted to seek reimbursement for all or any part of its direct expenses and losses (defined as additional fire fighting costs over normal hazard materials, emergency management and emergency medical services operational costs) incurred in fighting fires on property under the jurisdiction of the United States. Furthermore, under the authority of 42 U.S.C. 1856a, each Party hereby reserves the right to seek reimbursement from the other for the costs incurred by it in providing services to the other Party in response to a request for assistance.

7. The senior officer of the Fire-EMS Department requesting assistance shall normally assume full charge of the operations at the scene of the fire or other emergency. However, under procedures agreed to by the technical heads of the Fire-EMS Departments involved, a senior officer of the Fire-EMS

Department furnishing the assistance may assume responsibility for the coordination of the overall operations at the scene of the fire or other emergency.

8. The officers and personnel of the Fire-EMS Departments of the Parties to this Agreement are invited and encouraged, on a reciprocal basis, to frequently visit each other's activities for guided familiarization tours (consistent with local security requirements) and, as feasible, to jointly conduct pre-fire planning inspections, drills and training.

TRAINING:

9. Whenever either Party hosts fire protection training for its own Department ("Host Department") it may, to the maximum extent practicable and subject to its sole discretion, offer to provide the same training to members of the other Party ("Guest Department").

10. The Host Department will not charge the Guest Department for any training provided under the terms of this Agreement, unless it is a cost that cannot be covered by the Host Department such as, cost per student or cost of a certificate. Further, any such training will be provided on a space available basis only.

11. The Guest Department and/or its members will be solely responsible for the payment of any and all costs necessary for the Guest Department personnel to attend any training provided by the Host Department including, but not limited to, lodging, meals and travel.

12. This Agreement is entered into voluntarily by both Parties with no obligation on the part of either to provide such training to the other or, if such training is offered to the other Party, to participate in such training.

13. The Guest Department is responsible for ensuring that its members observe all rules, regulations, and guidelines established by the Host Department for training provided by the Host Department, as such rules, regulations and guidelines are made known to the Guest Department.

14. The Host Department reserves the right to deny training to any member of the Guest Department who does not meet the prerequisites necessary to attend the training which is

offered by the Host Department under the terms of this Agreement.

Execution of this Agreement:

15. This Agreement shall become effective upon the date annotated above, and shall remain in full force and effect until cancelled by mutual agreement of the Parties, or upon the provision of at least sixty (60) days advance written notice from the Party desiring to terminate this Agreement to the other Party. Upon becoming effective, this Agreement shall supersede all previous agreements between the Parties concerning the rendering of assistance from one to the other for the purposes stated in this Agreement.

MUTUAL AID AGREEMENT
BETWEEN
PROGRAM DIRECTOR, REGIONAL PUBLIC SAFETY,
NAVY REGION MID ATLANTIC
1510 GILBERT STREET, NORFOLK, VA 23511
AND
CITY MANAGER, CITY OF CHESAPEAKE, VA
304 ALBERMARLE DRIVE, CHESAPEAKE, VA
FOR THE PROVISION of FIRE FIGHTING ASSISTANCE

THIS MUTUAL AID AGREEMENT (hereinafter, the "Agreement") is made and entered into this 13th day of June 2012 by and between Program Director, Regional Public Safety, Navy Region Mid Atlantic, Norfolk, VA (hereinafter, "Navy"), and the City of Chesapeake, VA, for firefighting and emergency medical services (EMS) assistance (hereinafter, "City of Chesapeake").

WITNESSETH:

WHEREAS, each of the Parties hereto maintains equipment and personnel for the suppression of fires and response to hazardous materials incidents occurring within areas under their respective jurisdictions, and

WHEREAS, each of the Parties hereto maintains equipment and personnel for the protection of life and property from fire to include basic medical support, basic and advanced life support, special rescue events involving vehicular and water mishaps; and trench, building, and confined space extractions and,

WHEREAS, the Parties hereto desire to augment the fire protection and hazardous material response capabilities available in their respective jurisdictions by entering into this Agreement, and

WHEREAS, the lands or districts comprising the respective jurisdictions of the Parties are adjacent or contiguous to one another such that the rendering of mutual assistance between the Parties in response to a fire or hazardous material incident is feasible, and

WHEREAS, it is the policy of the Department of the Navy and the Program Director, Regional Public Safety, Navy Region Mid Atlantic, Norfolk, VA, to enter into Mutual Aid Agreements (MAA) with non-Federal Fire Departments located in the vicinity of a Naval installation, whenever practicable, and

WHEREAS, the Parties have mutually concluded that it is desirable, practicable, and beneficial for the Parties to enter into this Agreement to memorialize their willingness and ability to render assistance to one another, in order to enhance the safety and security of the civilian community and of the Regional Public Safety, Navy Region Mid Atlantic, and outlying installations and facilities.

NOW, THEREFORE, BE IT AGREED THAT:

1. Pursuant to 42 U.S.C. §1856a, DODI 6055.06, and OPNAVINST 11320.23F, the Parties enter into a Mutual Assistant Agreement (MAA) to provide personnel and equipment required for fire

prevention; the protection of life and property from fire; fire fighting and suppression to include emergency services, including basic medical support, basic and advanced life support; hazardous material containment and confinement; and special rescue events involving vehicular and water mishaps; and trench, building, and confined space extractions.

2. The senior officer of a Fire Department belonging to a Party to this Agreement, or the senior officer of such Fire Department actually present at a fire, EMS or hazardous material incident, may request fire fighting assistance under the terms of this Agreement from the other Party's Fire Department, whenever he/she deems it necessary to make such a request.

3. The requesting and rendering of assistance from one Party to the other under the terms of this Agreement shall be accomplished in accordance with detailed operational plans and procedures, which shall be developed by each of the Parties. The technical heads of each Party's Fire Departments shall work together to implement such plans and procedures in a manner compatible with the operational authorities of each. In the absence of more specific procedures, the Parties will generally proceed as follows:

    a. The senior officer on duty of the Fire Department receiving a request for assistance shall take the following actions:

        i. Immediately determine if the requested apparatus and personnel are available to respond to the call for assistance.

        ii. In accordance with the terms of this Agreement, forthwith dispatch such apparatus and personnel, along with instructions as to their mission, use and deployment, in quantities and amounts as in the judgment of the senior officer receiving the call can be provided to the requesting Fire Department without jeopardizing the mission of the Fire Department providing such resources.

    b. The senior officer of the Fire Department requesting assistance shall normally assume full charge of the operations at the scene of the fire or other emergency. However, under procedures agreed to by the technical heads of the Fire Departments involved, a senior officer of the Fire Department furnishing the assistance may assume responsibility for the coordination of the overall operations at the scene of the fire or other emergency.

4. The rendering of assistance under the terms of this Agreement shall not be mandatory.

    a. The Party receiving a request for assistance shall endeavor to immediately inform the requesting Party if the requested assistance cannot be provided and, if assistance can be provided, the quantity of such resources as may be dispatched in response to such request.

    b. Neither Party shall hold the other Party liable or at fault for failing to respond to any request for assistance or for failing to respond to such a request in a timely manner or with less than optimum equipment and or personnel, it being the understanding of the Parties that each is primarily and ultimately responsible for the provision of fire suppression and hazardous material incident response needed within their own

jurisdictions.

5. The officers and personnel of the Fire Departments of the Parties to this Agreement are invited and encouraged, on a reciprocal basis, to frequently visit each other's activities for guided familiarization tours (consistent with local security requirements) and, as feasible, to jointly conduct pre-fire planning inspections, drills and training.

6. Each Party hereby agrees that neither Party will seek reimbursement from the Party requesting such assistance, except insofar as costs incurred significantly exceed normal operating costs as demonstrated by documentary proof of un-programmed/unbudgeted/un-forecasted outlays and expenditures that were directly related to support provided under this MAA.

    a. Notwithstanding the preceding language, it is understood that, pursuant to 15 U.S.C. § 2210 and 44 C.F.R § 151, City of Chesapeake may file a claim with the Administrator of the Federal Emergency Management Agency for direct expenses and losses (which are additional firefighting costs over and above normal operating costs) incurred as a result of fighting fires on property under the jurisdiction of the United States.

7. As required by Federal law as a condition precedent to entering into this Agreement, the Parties hereby waive all claims against the other Party for compensation of any loss, damage, personal injury, or death occurring in consequence of the performance of this Agreement.

8. Independent of, and in addition to, any provisions of this Agreement, Program Director, Regional Public Safety, Navy Region Mid Atlantic, Norfolk, VA is authorized and has the discretion to render disaster relief or emergency assistance to preserve life and property in the vicinity of a DOD installation, when in the opinion of the installation commander, the assistance is in the best interest of the United States. 42 U.S.C. §§ 5121-5206; DOD 3025.1-M.

TRAINING:

1. Whenever either Party hosts fire protection training for its own Fire Department ("Host Department") it may, to the maximum extent practicable and subject to its sole discretion, offer to provide the same training to members of the other Party ("Guest Department").

2. The Host Department will not charge the Guest Department for any training provided under the terms of this Agreement, unless it is a cost that cannot be covered by the Host Department such as, cost per student or cost of a certificate. Further, any such training will be provided on a space available basis only.

3. The Guest Department and/or its members will be solely responsible for the payment of any and all costs necessary for the Guest Department personnel to attend any training provided by the Host Department including, but not limited to, lodging, meals and travel.

4. This Agreement is entered into voluntarily by both Parties with no obligation on the part of either to provide such training to the other or, if such training is offered to the other Party, to participate in such training.

5. The Guest Department is responsible for ensuring that its members observe all rules, regulations, and guidelines established by the Host Department for training provided by the Host Department, as such rules, regulations and guidelines are made known to the Guest Department. Neither Party shall hold the other Party liable or at fault for failing to respond to any request for assistance or for failing to respond to such a request in a timely manner or with less than optimum equipment and or personnel, it being the understanding of the Parties that each is primarily and ultimately responsible for the provision of fire suppression and hazardous material incident response needed within their own jurisdiction.

6. The Host Department reserves the right to deny training to any member of the Guest Department who does not meet the prerequisites necessary to attend the training which is offered by the Host Department under the terms of this Agreement.

Execution of this Agreement:

This Agreement shall become effective upon the date annotated above, and shall remain in full force and effect until cancelled by mutual agreement of the Parties, or upon the provision of at least sixty (60) days advance written notice from the Party desiring to terminate this Agreement to the other Party. Upon becoming effective, this Agreement shall supersede all previous agreements between the Parties concerning the rendering of assistance from one to the other for the purposes stated in this Agreement.

IN WITNESS WHEREOF, the parties hereto have made and executed this to the agreement on the respective dates under each signature. City of Chesapeake, VA through its City Council signing by and through its City Manager authorized to execute same by City Council action on the 13 day of June, 2012, and the Department of Navy signing by and through the Commanding Officer, Program Director, Regional Public Safety, Navy Region Mid Atlantic duly authorized to execute same on the 13 day of June, 2012.

[1] *A burn plan "element" is a section of the prescribed fire plan consistent with interagency prescribed fire planning, with Element 1 being the signature page. Each element applies to all of the prescribed burn areas (or burn units) discussed in this document.*

Please sign below by respective department listing indicating you have reviewed this plan. Please review within one week of the date annotated by the Natural Resources Specialist line on the cover sheet of this plan.

Project Area Description

NSAHR NWA is located on the Virginia / North Carolina State line. The majority of the installation resides in Virginia. The Installation covers approximately 3,661 acres, which are classified as 2,345 forest, 750 agriculture, 295 maintained open, and 271 as developed. In 2012 USACE inventoried NSAHR NWA for wetlands and identified 2,203.98 acres of which 127.82 acres are in North Carolina. Approximately 2,184 acres of these wetlands are forested with the dominant forest type is Loblolly Pine (927 ac), with Non-Riverine Swamp Forest (476 ac), and Non-Riverine Flatwoods and Swamp (423 ac) (INRMP 2015). The loblolly pine stands are a mix of planted and natural regeneration, ranging in age 10-70 years. The Non-Riverine Flatwoods and Swamp are a mix of loblolly pine *(Pinus taeda)*, red maple *(Acer rubrum)*, and sweetgum (*Liquidambar styraciflua*), scattered pond pine (*Pinus serotina*). Small trees and shrubs include sweetbay (*Magnolia virginiana*), blackgum *(Nyssa biflora)*, swamp bay *(Gordonia lasianthus)*, and coastal dog-hobble (*Leucothoe axillaris*). The Non-Riverine Swamp Forest is now dominated by red maple because of extensive past logging, catastrophic fires, and ditching. (INRMP 2015).

The specific units planned for burning under this plan are;

Unit- Skeet is 1.92 acres. The primary carrier of fire is grass and some timber litter. The adjacent fuel is pine and pine hardwood.

Unit Lunker Lake is 4.53 acres. The majority of this unit is grass, with some timber litter along edges and on north end. This unit will have a disked line around perimeter tying into Mill Stream.

Unit ROTHR 1 is 88.21 acres. The primary carrier of fire is grass and cane. There are pockets of common reed in this unit. This unit will have a disked line around it tying into Dusty Road on the east boundary.

Units ROTHR 2, 3, 4 are 44.70, 21.47, and 71.91 acres, respectively. The primary carrier of fire will be grass with pine and hardwood litter. This is early successional vegetation with grass scattered throughout unit. Unit ROTHR 4 has more hardwood with pine pockets. The primary carrier of fire will be hardwood/pine litter and grass.

All ROTHR units will have a mowed disked, or dozer line as perimeters.

Units IAMS Range 1/2 are 20.70 acres and 36.97 acres, respectively. These units consist of early successional vegetation with loblolly pine dominating. The primary carrier of fire is litter with grass in the open areas.

These units have roads, mowed, disked and/ or dozer bladed lines as perimeters.

Units Supplywoods 1 and 2 are 29.36 acres and 122.32 acres, respectively. The primary carrier of fire in unit 1 is grass and timber litter along the east boundary. In unit 2 it will be a mix of pine / hardwood litter and grass. Both units will have mowed, disked, or dozer line along perimeter.

This burn plan is valid for three years following the final date of approval. If any changes are made to this plan after approval, a technical review must be done by a Virginia Certified Prescribed Fire Manager.

ELEMENT 2A

GO/NO-GO PRE-IGNITION APPROVAL CHECKLIST

Instructions: The Agency Administrator Ignition Authorization must be completed before a prescribed fire can be implemented. If ignition of the prescribed fire is not initiated prior to expiration date determined by the agency administrator, a new authorization will be required.

Prior to signature the agency administrator should discuss the following key items with the fire management officer (FMO) or burn boss. Attach any additional instructions or discussion documentation (optional) to this document.

Key Discussion Items

A. Has anything changed since the Prescribed Fire Plan was approved or revalidated? *Such as drought or other climate indicators of increased risk, insect activity, new subdivisions/structures, smoke requirements, Complexity Analysis Rating.*
B. Have compliance requirements and pre-burn considerations been completed? *Such as preparation work, NEPA mitigation requirements, cultural, threatened and endangered species, smoke permits, state burn permits/authorizations.*
C. Can all of the elements and conditions specified in Prescribed Fire Plan be met? *Such as weather, scheduling, smoke management conditions, suitable prescription window, correct season, staffing and organization, safety considerations, etc.*
D. Are processes in place to ensure all internal and external notifications and media releases will be completed?
E. Have key agency staffs been fully briefed about the implementation of this prescribed fire?
F. Are there circumstances that could affect the successful implementation of the plan? *Such as preparedness level restrictions, resource availability, other prescribed fire or wildfire activity*
G. Have you communicated your expectations to the Burn Boss and FMO regarding if and when you are to be notified that contingency actions are being taken?
H. Have you communicated your expectations to the Burn Boss and FMO regarding decisions to declare the prescribed fire a wildfire?

Implementation Recommended by:
Chief Environmental or Prescribed Fire Burn Boss Signature: _____ Date: _____

I am authorizing ignition of this prescribed fire between the dates of_____ and_____ . It is my expectation that the project will be implemented within this time frame and as discussed and documented and attached to this plan. If the conditions we discussed change during this time frame, it is my expectation you will brief me on the circumstances and an updated authorization will be negotiated if necessary.

Additional Instructions or Discussion Documentation attached (Optional): Yes ☐ No☐
Ignition Authorized by:

Agency Administrator Signature and Title: _____ Date: _____

PMS 485 (11/13)

ELEMENT 2B

PRESCRIBED FIRE GO/NO-GO CHECKLIST

Preliminary Questions	**Circle YES or NO**
A. Have conditions in or adjacent to the ignition unit changed, (for example: drought conditions or fuel loadings), which were not considered in the prescription development? If **NO** proceed with the Go/NO-GO Checklist below, if **YES** go to item B.	YES NO
B. Has the prescribed fire plan been reviewed and an amendment been approved; or has it been determined that no amendment is necessary? If **YES**, proceed with checklist below. If **NO, STOP: Implementation is not allowed. An amendment is needed.**	YES NO

Southeast Regional Smoke/Fog Management Questions	**Circle YES or NO**
C. Is there a chance of fog formation Post burn forecasted in the morning spot weather forecast**? If NO proceed with checklist, If YES go to item D.**	YES NO
D. If YES have appropriate mitigation elements been identified to limit potential fog/smoke impacts to smoke sensitive targets and are they explained in the pre-burn briefing? **If YES proceed with checklist below, if NO STOP.**	YES NO

GO/NO-GO Checklist	**Circle YES or NO**
Have ALL permits and clearances been obtained?	YES NO
Have ALL the required notifications been made?	YES NO
Have ALL the pre-burn considerations and preparation work identified in the prescribed fire plan been completed or addressed and checked?	YES NO
Have ALL required current and projected fire weather forecast been obtained and are they favorable?	YES NO
Are ALL prescription parameters met?	YES NO
Are ALL smoke management specifications met?	YES NO
Are ALL planned operations personnel and equipment on-site, available and operational?	YES NO
Has the availability of contingency resources applicable to today's implementation been checked and are they available?	YES NO
Have ALL personnel been briefed on the project objectives, their assignment, safety hazards, escape routes, and safety zones?	YES NO
If all the questions were answered "**YES**" proceed with a test fire. Document the current conditions, location and results. If any questions were answered "**NO**", DO NOT proceed with the test fire: Implementation is not allowed.	
After evaluating the test fire, in your judgment can the prescribed fire be carried out according to the prescribed fire plan and will it meet the planned objective? **Circle: YES or NO**	

Burn Boss Signature: _____Date:_____

PMS 486 (11/13)

ELEMENT 3 **COMPLEXITY ANALYSIS SUMMARY[2]**			
ELEMENT	**RISK**	**POTENTIAL CONSEQUENCE**	**TECHNICAL DIFFICULTY**
1. Potential for escape	Low	Low	Low
2. The number and dependence of activities	Low	Low	Low
3. Off-site Values	Low	Low	Low
4 On-Site Values	Low	Low	Low
5. Fire Behavior	Low	Low	Low
6. Management organization	Low	Low	Low
7. Public and political interest	Low	Low	Low
8. Fire Treatment objectives	Low	Low	Low
9 Constraints	Moderate	Low	Low
10 Safety	Low	Low	Low
11. Ignition procedures/methods	Low	Low	Low
12. Interagency coordination	Low	Low	Low
13. Project logistics	Low	Low	Low
14 Smoke management	Low	Low	Low

COMPLEXITY RATING SUMMARY	
	OVERALL RATING
RISK	Low
CONSEQUENCES	Low
TECHNICAL DIFFICULTY	Low
SUMMARY COMPLEXITY DETERMINATION	Low

RATIONALE:
All units will be burned by hand which requires good coordination and communication. It has been several years since burning has been conducted on the Installation which adds some complexity. Smoke will be mitigated by using prescribed weather but drainage and smoke dispersion still has to potential to affect the public. Broken continuity of fuels, sparse population surrounding NSAHR NWA allows for several wind directions and small burn units make this a low complexity project.

[2]*Source: Interagency Prescribed Fire Planning and Implementation Guide 7/2017*

ELEMENT 4 **DESCRIPTION OF PRESCRIBED FIRE AREA**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

PHYSICAL DESCRIPTION

County: Chesapeake, Virginia and Currituck County, North Carolina
Topography: Flat with elevations ranging from 14-30 feet above mean sea level.
See table on next pages for a break out of the unit location and acreage.

Vegetation Types:

- ***Pine:*** Loblolly Pine is the dominant species with some Pond Pine in the Non-Riverine Flatwoods. Some of the pine stands are heavily stocked with planted and natural pine regeneration.
- ***Non-Riverine Flatwoods and Swamp:*** The Non-Riverine Flatwoods and Swamp are a mix of loblolly pine, red maple, and sweetgum (Liquidambar styraciflua), scattered pond pine (Pinus serotina). They can have a shrub mid-story.
- ***Non-Riverine Swamp:*** The Non-Riverine Swamp Forest dominant trees are bald cypress, swamp tupelo (Nyssa biflora), and red maple. These areas are located on the west side of the installation as the terrain transitions to the Great Dismal Swamp.

.

PROJECT OR BURN UNIT BOUNDARY DESCRIPTION

All units will have disked, mowed, roads, or dozer line as there containment / perimeter boundary. There are roads, ditches, and agricultural fields as secondary containment lines. [See attached map (s) Appendix A].

FUELS DESCRIPTION

ON-SITE FUELS DATA	**ADJACENT FUELS DATA**
See table on next page for a break out of fuel and habitat types for all burn compartments within this project area.	Fuels adjacent to these burn units are older pine stands (TL8), hardwood stands (TL6) and agricultural fields. As long as the fields are farmed they should be non-burnable. If fields have crop stubble or grass then use GR3.

DESCRIPTION OF UNIQUE FEATURES (hazards, regulations, issues, constraints, etc. Examples may include: fences to protect, power poles, historical/cultural sites, threatened and endangered species or habitat, etc.)

• Due to the proximity of these burn units smoke should not be an issue. Burn permit (s) should be coordinated with Virginia and North Carolina Forestry.
• Habitat: Try to do disking, mowing, or putting in dozer line during drier periods to prevent rutting.
• Species of concern: The Rafinesque's bat has been captured while foraging at NSAHR NWA. It is unknown if a hibernaculum exists there. Be aware of canebrake rattlesnake dens. Also, some canebrake have tracking devices which need to be coordinated with natural resource specialist.
• Areas of Concern/Structures: Antennae poles around ROTHR. Shooting structures in skeet unit. Military structures adjacent to IAMS Range units. Hunting stands and monitoring wells.

ON-SITE FUELS	PROJECT NAME:	NSAHR NWA 2018/2019
	BURN UNIT NAME:	Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, Lunker Lake.

						TOTAL			100.0

- Burn units are composed of varied habitat types which have a varied influence on fire behavior. The main carrier of fire in these units is the herbaceous and litter. The Pineland and Non-Riverine Flatwoods and Swamp habitats are the most susceptible to fire and should be maintained with fire.
- The fuel models used represent the closest approximation to expected fire behavior under current conditions.

PHYSICAL LOCATION (Latitude, Longitude, Section Township Range and general location description.)

Unit	Acres	Long	Lat	STR	General Location
ROTHR 1	88.21	76°16'39.20"W	36°33'19.15"N	Chesapeake, VA	West end of installation
ROTHR 2	44.70	76°16'29.40"W	36°33'8.58"N	Crosses VA/NC state line	West end of installation
ROTHR 3	21.47	76°16'42.57"W	36°33'6.07"N	Crosses VA/NC state line	West end of installation
ROTHR 4	71.91	76°17'1.28"W	36°33'6.76"N	Crosses VA/NC state line	West end of installation
Skeet	1.92	76°16'32.75"W	36°33'50.06"N	Chesapeake, VA	West end of installation
IAMS Range1	20.70	76°16'3.26"W	36°33'7.23"N	Chesapeake, VA	Southwest of ROTHR antennae
IAMS Range 2	36.97	76°16'15.06"W	36°33'8.20"N	Chesapeake, VA	Southwest of ROTHR antennae
Supplywoods 1	29.36	76°15'13.60"W	36°33'23.44"N	Chesapeake, VA	Just south of Farmhouse Road
Supplywoods 2	122.32	76°14'53.44"W	36°33'11.59"N	Crosses VA/NC state line	Just south of Farmhouse Road
Lunker Lake	4.53	76°15'58.98"W	36°34'3.86"N	Chesapeake, VA	North of Monroe Road

ELEMENT 5	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
GOALS AND OBJECTIVES	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

PURPOSE AND RESOURCE MANAGEMENT GOALS:

Restore / maintain ecological integrity of landscape by improving native grasses and forbs, and improving general forest stand health.

Reduce the potential for large wildfire by removing some of the hazardous fuel load, primarily 90 % of the surface fuels.

Open and maintain ROTHR clear zones by reducing height of vegetation.

RESOURCE AND PRESCRIBED FIRE OBJECTIVES

RESOURCE OBJECTIVES:	**PRESCRIBED FIRE OBJECTIVES:**
1. Reduce hazardous fuels to protect adjacent military structures and Wildland/Urban Interface from unplanned wildfire. **2.** Enhance plant habitat by utilizing fire to increase native species viability.	**1.** Consume 50-80% of understory vegetation within wet prairie and pine habitat during each treatment **2.** Consume up to 90% of 1 hour fuels during each treatment.
OBJECTIVES ARE S.M.A.R.T.	**Specific** **Measurable** **Attainable** **Reasonable** **Time Related**

CONSTRAINTS:

These burn units are at least 5 miles from high density urban areas though moderate density urban Lincoln Housing Community is adjacent to the main gate of the Installation. There are small rural sub-divisions and dairy farms along Ballahack Road. Smoke impact to highways and military facilities should be minimal. There should be no problem meeting objectives using prescribed weather and resources.

The hunting program will be active during the early season of burning planned for these units. Coordination with the Natural Resource Specialist to mitigate any conflicts will be important. All burn units have hunting in them or immediately adjacent.
Burning the IAMS Range units might need to facilitate closure for a day or a couple of hours until smoke has cleared.

ELEMENT 6 **FUNDING[3]**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**	
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**	
PRESCRIBED FIRE PHASE:		**COST:**	**FUNDING SOURCE:**
Planning			Military Project
Preparation			Military Project
Execution			Military Project
Evaluation			Project and Resource
TOTAL OF ALL ESTIMATED COSTS:			

[3]*Costs will be determined by contracts or cooperator use (in house). Typical cost is 30-250$ per acre*

ELEMENT 7 **PRESCRIPTION: ENVIRONMENTAL PARAMETERS[4]**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**
	PRESCRIPTION NARRATIVE	GR6 and TL6, and GS3

DESCRIPTION OF ENVIRONMENTAL PARAMETERS NEEDED TO PRODUCE THE DESIRED FIRE BEHAVIOR:	**Prescription Compliant Values**	
Temperature (F)	35	90
Relative Humidity**	65	25
Wind Speed, MPH (20')	≥5	≤11
Wind Speed, MPH (mid-flame)	≥1	≤7
Wind Direction	See Wind Matrix Below	
Mixing Height	1680' AGL (state minimum)	
Transport Wind Speed & Direction	>9 MPH	
10 hr. Fuel Moisture (%)	>15	≥8
Nightime Low Visibility Occurrence Risk Index (LVORI)	Less than 6	
Dispersion Index	≥25	≤75
ERC (%) -7G	0	≤28
Live Woody Fuel Moisture	≥75	

Fire Behavior outputs may be derived from BEHAVE models, nomograms, or historical/empirical evidence.
Include modeling and/or empirical evidence documentation as an appendix or in the fire behavior narrative.

COMMENTS:
**** Visibility forecast should be completed using the spot forecast which includes nighttime fog formation probability (not to be confused with existing prescription parameters)**

- Wind direction parameters are located on the following page.
- Dispersion will be considered on day of burn in conjunction with the state permitting process. Smoke impacts are mitigated through planned wind direction, ignition patterns, timing of ignition, and mop up parameters.
- When burning near the upper limits of the prescription, precautions need to be discussed with the authorizing official during the go/no-go process. More than one forecasted environmental parameter near the high end of the prescription may increase the potential for escape and prolonged fire duration. All decisions involving the environmental parameters should be discussed with holding boss and Natural Resource Specialist prior to the test fire, and concerns should be documented and mitigated.

[4]*Separate prescriptions pages should be added for multiple prescriptions and result in multiple complexity ratings and burn organizations.*

Wind Parameters:

0' Wind Direction Matrix

Burn Unit	SE	S	SW	W	NW	N	NE	E
ROTHR 1								
ROTHR 2								
ROTHR 3								
ROTHR 4								
IAMS Range 1								
IAMS Range 2								
Skeet								
Lunker Lake								
Supplywoods 1								
Supplywoods 2								

Index

	OK	Favorable and acceptable wind direction for Rx burning.
	Limited Smoke Dispersion Area	Smoke may disperse into this area for short periods of time as winds shift

- Wind direction is the direction from which the wind is coming from, expected fire spread and smoke trajectory will be 180º of wind direction.
- Smoke sensitive areas – Ballahack Road 1-2 miles north of burn units, Highway 168 3 miles east, highway 17- 5 miles west. Core military residential area just north and northeast of burn units. IAMS Range.

ELEMENT 7 **PRESCRIPTION: FIRE BEHAVIOR PARAMETERS OUTPUTS**[4]	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**
	PRESCRIPTION NARRATIVE FOR UNIT:	GR6,GS3,TL6, and TL8

DESCRIPTION OF PRESCRIBED FIRE BEHAVIOR CHARACTERISTICS NEEDED TO MEET THE RESOURCE MANAGEMENT OBJECTIVES STATED IN THE OBJECTIVES SECTION:	**GR 6** **Prescription Compliant Values**	**GS3 / TL 6 / TL8** **Prescription Compliant Values**
Rate of Spread (Chains/hr)	6 – 79	4-48 / 1-10 / 1-10
Average Flame Length (ft)	4-13	3-9 / 1-4 / 1-4

The level of fire behavior modeling and the tools used should be commensurate with the scale and complexity of the fuel beds within the ignition units and landscape. **Include modeling and/or empirical evidence documentation as an appendix or in the fire behavior narrative.**

Fire Behavior Narrative or description of empirical evidence:

- Due to the proximity of the burn units, smoke sensitive areas should not be impacted. Some of the timbered units may have some smoldering duff if burned on high end of prescription. No chance of fog is needed to be forecasted for the day of and night of the burn to limit the chance of smoke impacting any of the smoke sensitive areas. The open areas on and adjacent to NSAHR NWA may have smoke funneled into them. They should be patrolled prior to leaving the burn for the night.
- The fire behavior values were derived from looking at the highest possible outputs from the BEHAVE runs under the environmental parameters identified in the prescription. Spread rates of 10-30 chains per hour could be possible for short runs. But, with small burn units, fire breaks, adjacent agricultural fields, and natural barriers, high spread rates are not expected.

SEE BELOW FOR BEHAVE RUN DOCUMENTATION

[4]*Separate prescriptions pages should be added for multiple prescriptions and result in multiple complexity ratings and burn organizations.*

ELEMENT 7 **PRESCRIPTION: FIRE BEHAVIOR PARAMETERS OUTPUTS**[5]	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**
	PRESCRIPTION NARRATIVE OUTSIDE of UNIT:	TU3 Worst Case OUTSIDE of UNIT

DESCRIPTION OF PRESCRIBED FIRE BEHAVIOR CHARACTERISTICS NEEDED TO MEET THE RESOURCE MANAGEMENT OBJECTIVES STATED IN THE OBJECTIVES SECTION:	**TU3 & GR6** **Prescription Compliant Values**
Rate of Spread (Chains/hr)	4-42 / 6-79
Average Flame Length (ft)	3-9 / 4-13

The level of fire behavior modeling and the tools used should be commensurate with the scale and complexity of the fuel beds within the ignition units and landscape.

GS3	3.1	4.4	5.5	6.4	7.4	8.2	9.0

[5]*Red= high fire intensity (difficult to control), yellow= moderate intensity, green= low or favorable intensity*

ELEMENT 8 **SCHEDULING**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

IGNITION TIMEFRAMES/SEASONALITY:

These burns are planned for dormant season, typically October – March. Water levels, and weather will play a role in the scheduling of burns. At the beginning of every fiscal year the Natural Resource Division will hold a prescribed fire planning meeting to determine the burn schedule and set priorities.

There is the potential to burn more than one unit during one burn period. If it is determined that there are enough resources to fully staff both units, Span of control is not exceeded for the burn boss(s), and the complexity analysis has not changed, then more than one unit can be burned on the same day. A minimum of one (1) single resource boss is required for each burn unit. If the distance between units or the span of control is too great for one (1) burn boss then an additional burn boss is necessary. The decision to burn more than one unit in a burn period will be well documented and covered in the Agency Administrator's Go-No-Go briefing.

Fire Management Unit acreage/burn history:

Unit	Acres	Last Burned	Scheduled	Unit	Acres	Last Burned	Scheduled
ROTHR 1	**88.21**		**2018/2019**	**Skeet**	**1.92**		**2018 / 2019**
ROTHR 2	**44.70**		**2018/2019**	**Lunker Lake**	**4.53**		**2018 / 2019**
ROTHR 3	**21.47**		**2018/2019**	**Supplywoods 1**	**29.36**		**2018 / 2019**
ROTHR 4	**71.91**		**2018 / 2019**	**Supplywoods 2**	**122.32**		**2018 / 2019**
IAMS 1	**20.70**		**2018 / 2019**				
IAMS 2	**36.97**		**2018 / 2019**				

PROJECT DURATION:

The duration of the burn will depend on the current fuels and weather conditions. These units should be completed in just a few hours, due to the small size of these units and light fuels, Overnight relative humidity recovery usually ranges near 90 – 100% which extinguishes fine and small woody fuels.

Base Commander approval allows this burn plan to be valid for three years to the date of which it was signed.

CONSTRAINTS:

Getting plan communicated and coordinated with all internal and external stake holders.
Any Navy Mission scheduling priorities.
Hunting areas are located in and adjacent to burn units. Coordination with Natural Resource Specialist is necessary.

ELEMENT 9 **PRE-BURN CONSIDERATIONS**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

ON AND OFF-SITE CONSIDERATIONS

ON SITE:

- Fire lines will be mowed and/or disked (depending on soil moisture and soil type). All fire lines will be completed 24 hours prior to ignition. Signs should be posted indicating burn unit.
- Snags that could threaten the fire line will be felled before the burn.
- Natural Resource section will coordinate all activities, since burn unit prep and burn implementation may be conducted by contractors, cooperators, base personnel or any combination.
- Hunting stands, monitoring wells, research projects

OFF SITE:
Smoke signs will be available for deployment.
Highway 168 3 miles east, highway 17- 5 miles west are heavily traveled roads, Ballahack Rd. just north of installation; Sherriff and Highway Patrol will be notified before the burn. The community of Myock, NC, is 5.7 miles southeast and Hickory, Virginia is 5.8 mile northeast.

METHOD AND FREQUENCY FOR OBTAINING WEATHER FORECAST(S):

A spot forecast will be acquired from local (Wakefield) NWS office the day of the burn. On site weather will be taken on an hourly basis or at intervals determined by the Burn Boss during the operational period. NAS Oceana can provide local weather briefs.
Local NWS: http://www.srh.noaa.gov/ (phone) (fax)

INTERNAL AND EXTERNAL INVOLVEMENT:

Identify and list people who are notified and involved in the fuels management process for this plan. Include a list for public contact information (news releases, radio spots, outreach pamphlets). Document internal and external coordination for development of plan.

Internal: The list of contacts on page two will be notified 48 hours out of a potential prescribed burn.

External: Plan will be reviewed by a qualified cooperator.
USFWS, TNC, or Virginia Department of Forestry
Public Outreach: List internet address for cooperators or news stations.

ELEMENT 10

PRESCRIBED FIRE BRIEFING CHECKLIST	

- Burn organization and assignments
- Prescribed Fire objectives and prescription
- Description of prescribed fire project area
- Special considerations and sensitive features
- Expected weather and fire behavior
- Communications
- Ignition plan
- Holding plan
- Contingency plan and assignments
- Wildfire declaration
- Safety and medical plan

A briefing package or IAP (Incident Action Plan), should be given to each participant prior to briefing. This package should include (minimum); map of burn unit, weather, communications, burn organization and assignments, safety and medical plan, and objectives.

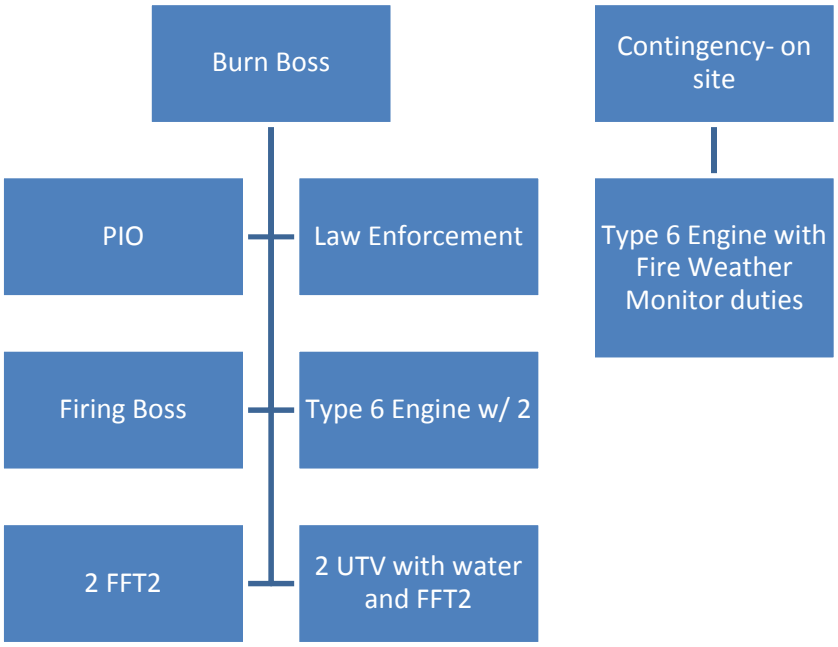
The Prescribed Fire Burn Boss, or designee, will ensure that any new personnel arriving to the prescribed fire receives a briefing prior to assignment.

ELEMENT 11 **ORGANIZATION AND EQUIPMENT**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

See implementation reference guide for specifics. Minimum requirements to perform this prescribed burn.

Hand Ignition: Prescribed fires require a minimum of 6 people for smaller units (less than 15 acres) and 8 people for larger or more complex units.
The following positions / equipment must be filled:**

- Burn Boss* – 1
- Firing Boss (FIRB)* –1
- Holding
- Firefighter Type 2 (FFT2) with utility vehicle (UTV)* - 2
- FFT2 – 2
- Type 6 Engine* -2
- Public Information Officer (PIOF)- 1
- Law Enforcement Officer (LEO)- 1



- *One person may fill more than one position but not more than two. (i.e. Burn Boss/FIRB)
- THE ACTUAL ORGANIZATION WILL BE SPECIFIED BY THE BURN BOSS ON DAY OF BURN.
- The burn can be delegated back to the Installation, following the day after the burn.

ELEMENT 12 **COMMUNICATIONS[6]**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

Identify and assign command, tactical and air operations frequencies as needed.

SYSTEM	RX FREQ.	RX TONE / NAC(Hex)	TX FREQ.	TX TONE / NAC(Hex)	ASSIGNMENT	REMARKS
Digital(n)					Command	Repeater
Digital(n)					Tactical	Tac. 1
Digital(n)					Tactical	Tac. 2
Analog(n)					Tactical	Tac -7

PROJECT PHONE NUMBERS	
PERSONNEL NAME & TITLE:	**PHONE NUMBER:**
Michael Wright—Natural Resource Specialist	
--Chief NSAHR NWA Fire	
Air Operations	
NSAHR NWA Public Works Officer	
Virginia DOF	
NC Forest Service	

[6] *At a minimum this information should be updated annually and verified within 24 hours prior to burn ignition. After 24 hour verification, updates should be mad as needed throughout the burn (ignition, holding, and mop-up phases).*

ELEMENT 13	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
PUBLIC, PERSONNEL SAFETY	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

SAFETY HAZARDS:

- Fire
- Aircraft/Training Operations
- Driving
- Uneven terrain
- Venomous snakes
- Dehydration
- Extended smoke exposure
- Working on/near Urban Interface, roads
- Undocumented UXO or other Hazardous Material
- Equipment operations

MEASURES TAKEN TO REDUCE THE HAZARDS:

The Burn Boss will ensure the following:

- All personnel wear **required PPE** (Nomex clothing, boots, fire shelter, gloves, hard hat, and eye protection) at all times.
- All fire management activities will be conducted in accordance with policies.
- Locations of Escape Routes and Safety Zones will be discussed with all fire line personnel. Safety Zones may include the fire lines, ponds, creeks, roads, other natural barriers and burned areas.
- Personnel are warned of the venomous snakes and are directed to avoid the snakes.
- All personnel are briefed on dehydration signs and symptoms and ensure that there are adequate liquids available to all personnel.
- In reference to UXO concerns, all personnel are to take RRR training.
- Non-essential fire personnel working near the road ways will wear high visibility vests, and stay clear of the road whenever possible. Flashing lights on all vehicles involved with the project will be used during the operation.
- Holding personnel will be rotated out of high smoke areas to clear air.

Operators will brief personnel who are unfamiliar with the equipment, being utilized for the burn, on the particular hazards and standard operating procedures.

ELEMENT 13 **EMERGENCY MEDICAL PLAN**	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

EMERGENCY MEDICAL PROCEDURES:

If a medical emergency arises all operations will be evaluated and stopped if they can be done safely until the medical condition can be determined. If necessary the injured person can be evacuated to receive proper medical treatment. All radio traffic will be kept at a minimum so emergency procedures can proceed uninhibited. The burn boss or designee will initiate the 911 emergency system if needed.

NOTE: The decision to stop all firing operations is up to the burn boss, it may be necessary to continue firing operations to maintain the safety of all forces and the security of the burn operation.

EMERGENCY EVACUATION METHODS:

- Initiation of the emergency dispatch system will help determine the need for an ambulance or aerial transport. If transport is determined to be best by ground it will be necessary to meet the ambulance at a location that is easily accessible.
- If a Med-flight is needed the law enforcement on-site will coordinate landing area via the 911 emergency dispatch system.

EMERGENCY FACILITIES:

Chesapeake Regional Medical Center, Chesapeake, Virginia, at 736 N Battlefield Blvd. (757) 312-8121

The closest burn center is Sentara Norfolk General Hospital (800-763-8272).

The on base Emergency Fire and Rescue Team is located on the Installation, off of Relay Rd., near the main gate.

DIRECTIONS FROM NEAREST MEDICAL FACILITY TO PROJECT VIA GROUND: TRANSPORTATION

To Chesapeake Regional Medical Center- Take Ballahack Road east to Chesapeake Expressway (Hwy 168). Go north on Chesapeake Expressway to Great Bridge Bypass into Chesapeake. Proceed until you reach the intersection of Medical Parkway and Hwy 168. The Medical Center is in the NW quadrant of this intersection. Driving distance is approximately 16.5 miles.

ELEMENT 14	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
TEST FIRE	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

PLANNED LOCATION & SPECIFIC INSTRUCTIONS:

The test fire will be conducted in representative fuels in a downwind location in close proximity to the perimeter of the unit with sufficient precautions in place to quickly extinguish the test fire if needed. The Burn/ firing boss will determine the location and be on scene during the test fire.

BURN DAY DOCUMENTATION

WEATHER CONDITIONS ONSITE:	**TEST FIRE RESULTS:**

Does the test fire meet prescription parameters?	**YES**		**NO**		

COMMENTS:

ELEMENT 15	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
IGNITION PLAN	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

NARRATIVE FOR IGNITION PLAN:

FIRING METHOD(S)*: Hand

DEVICES: Driptorch, flares, and fuse.

TECHNIQUES: Flanking/backing/strip head, or spot firing depending on location, weather, and time of day.

SEQUENCES: Ignition sequence will be determined by the burn boss and firing boss so that the burn objectives can be met safely. Burn pattern and technique will be determined by the burn boss and the firing boss on the day of the burn and adjusted as necessary if parameters significantly change.

ANTICIPATED PATTERNS: Flanking fire patterns will be used on the interior of the unit and backing fire will be used to establish control lines before interior ignition. There is potential for use of strip head fires in areas which have sufficient lines or blackline down wind, this method will be used if it is determined to be the best way to safely meet burn objectives.

MINIMUM IGNITION STAFFING: The burn boss will determine the staffing on the day of burn.

*Multiple prescriptions may require identifying and developing multiple ignition organizations and implementation instructions.

ELEMENT 16	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
HOLDING PLAN	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

GENERAL PROCEDURES NARRATIVE FOR PRESCRIBED FIRE HOLDING:

The Burn / Holding Boss will determine the holding organization on the day of the burn. Assignments will be announced at briefing. During the operation the holding boss will be in contact with the Firing Boss and/or Burn Boss to ensure that firing operations are not overextending the holding forces. Spot fire activity will be communicated to the Burn Boss and locations will be identified.

Holding forces may allow the backfire to burn to the edge of the control lines before extinguishing the flaming front if it threatens to cross fire lines. Holding forces will notify holding boss of any spot fires. Holding forces can take different suppression tactics to reduce spotting potential (pre-treating heavy fuel concentrations with water). The firing boss will periodically check with holding boss to ensure that ignition forces are not overextending holding forces.

CRITICAL HOLDING POINTS AND MITIGATION ACTIONS:

There could be critical holding points on these burn units based on current weather, fuel conditions, firing sequence. These points will be discussed during the briefing and communicated to all resources during the burn.

Critical holding points and safety zones will be identified during the briefing.

PRESCRIBED FIRE MOP-UP & PATROL	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
	BURN UNIT NAME:	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

GENERAL PROCEDURES NARRATIVE FOR PRESCRIBED FIRE MOP-UP AND PATROL:

Specific mop-up standards will be determined by the burn boss on the day of the burn. The burn boss will take into consideration the proximity of any critical smoke receptors and the potential for escape.

Due to the proximity of the burn units to highways and urban centers, resources should start mop up operations as soon as possible. Concentrating on fuels that could cause containment issues, then concentrating on fuels that will continue to smolder past the first burn period along the boundary. The goal will be 100% mop-up of the entire unit.

If requested, by the Regional Natural Resources Specialist or designated Burn Boss, the Navy Regional Fire and Emergency Services and/or NSAHR NWA fire crews will make hourly site inspections for three consecutive hours after the burn crew has secured the unit.

PRESCRIBED FIRE DECLARED OUT BY:

The prescribed burn will be declared out by the Burn Boss or designee, when there has been no smoke or evidence of active fire for 3 consecutive days.

ELEMENT 17	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
CONTINGENCY PLAN	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

Management Action Documentation Element	**Management Action Narrative**
Designator and Description:	Fire objectives are not being met during the burning operation
Condition:	Resource management/hazardous fuel reduction objectives are not being met during the burn operation
Management Intent:	- Maintain fire within the burn unit and project boundary - Adjust fire behavior to keep fire effects within objectives
Recommended Action(s) to Consider:	- Weather observations will be taken at 30 minute to 1 hour intervals to watch the weather parameter trend. - May cease firing or adjust firing techniques and patterns based on the weather parameters and desired fire effects. If changing firing methods does not adequately influence the desired fire behavior, termination of the ignition operations will take place at a time and location that will be conducive to holding current active fire with resources on scene. Operations will be concentrated on mop-up and holding until conditions better suit the objectives.
Recommended Resources:	-If contingency resources are needed to ensure the prescribed fire meets objectives and/or doesn't exceed the unit boundary; offsite contingency resources may be ordered.
Time Frame:	Variable based on weather parameter
Describe the consequences of not taking the recommended action(s) (Optional):	- Possibility of high numbers and/or long range spotting into neighboring private lands and/or refuge burn units within the project boundary
Responsibility:	Burn Boss and FIRB
Date Each Action is Initiated (Optional):	
Management Action Documentation Element	**Management Action Narrative**
Designator and Description:	Prescription elements exceeded during the operation
Condition:	Parameters are exceeded during the burning operation
Management Intent:	- Maintain fire within the burn unit and project boundary - Reduce fire behavior to keep fire effects within objectives
Recommended Action(s) to Consider:	- Weather observations will be closely monitored by assigned weather observer/ - Significant negative changes in behavior or weather will be documented and require the burn boss and holding boss to discuss the holding forces' ability to maintain control. - If unexpected weather drastically changes the fire behavior of the prescribed fire the Burn Boss will determine the appropriate actions to take; whether full suppression is needed or a change in firing tactics are needed.
Recommended Resources:	-If contingency resources are needed to ensure the prescribed fire meets objectives and/or doesn't exceed the unit boundary; offsite contingency resources may be ordered.
Time Frame:	Variable based on weather parameter

Describe the consequences of not taking the recommended action(s) (Optional):	Possibility of high numbers and/or long range spotting into neighboring private lands and/or other burn units within the project boundary
Responsibility:	Burn Boss
Date Each Action is Initiated (Optional):	
Management Action Documentation Element	**Management Action Narrative**
Designator and Description:	**Smoke management objectives not being met.**
Condition:	Smoke management objectives being not being met.
Management Intent:	- Maintain fire within the burn unit and project boundary - Reduce fire behavior to keep fire effects within objectives - Reduce impact of smoke on smoke sensitive areas
Recommended Action(s) to Consider:	- Have the roads and sensitive points checked often - Put up smoke signs
Recommended Resources:	- If contingency resources are needed to suppress the prescribed fire and mop-up any heavy fuels they will be ordered. The contingency resources and minimum response times are listed in the next section.
Time Frame:	Variable based on weather parameter
Describe the consequences of not taking the recommended action(s) (Optional):	- Smoke lays down along busy roads and sensitive areas causing low visibility on roads - problems with breathing for sensitive persons
Responsibility:	Burn Boss, FIRB,
Date Each Action is Initiated (Optional):	
Management Action Point - Documentation Element	**Management Action Point Narrative**
Designator and Description:	**Fire leaves unit boundary**
Condition:	Fire leaves unit boundary
Management Intent:	- Maintain fire within the project boundary -
Recommended Action(s) to Consider:	- Position holding forces for quick response to spot fires - Fire outside of the unit boundary may be controlled with direct attack, if fire behavior allows, or by indirect attack (burning out entire unit where spot is established) if flame lengths do not allow direct attack, or if firefighter or public safety is threatened. - If possible resource advisors will be in the decision loop when a burn out operation is planned
Recommended Resources:	- Initial size-up will determine the appropriate suppression action - Available holding forces will perform initial attack on spot fires or slop-overs. - If contingency resources are needed to ensure the prescribed fire meets objectives and/or doesn't exceed the unit boundary; onsite and offsite contingency resources may be ordered
Time Frame:	Variable based on weather parameter
Responsibility:	Burn Boss, FIRB
Date Each Action is Initiated (Optional):	

MINIMUM CONTINGENCY RESOURCES AND MAXIMUM RESPONSE TIME(S):
The minimum number and type of contingency resources may vary depending on the location, implementation phase and applicable management actions.

- One (1) Type 6 Engine on site.
- NSAHR NWA Fire –on Installation, ~5-20 minutes away
- There is an agreement with the City of Chesapeake for support if Installation personnel cannot get to the scene in time.

ELEMENT 18	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/201**
WILDFIRE CONVERSION	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

A prescribed fire will be declared a wildfire when the assigned Burn Boss determines that one or more of the following conditions or events has occurred or is likely to occur, and if these conditions cannot be mitigated within the next burning period by implementing the contingency actions in the prescribed fire plan by on-site holding forces and listed contingency resources staged during this operational period:

- The prescribed fire leaves the planned unit boundary.
- The fire behavior exceeds limits described in the prescribed fire plan and/or the fire is threatening to leave the planned unit boundary.
- The fire effects are unacceptable.
- Smoke production must be reduced because of adverse air quality impacts.
- Local and/or geographic area fire activity escalates and resources committed as contingency or holding forces are needed for re-assignment to other incidents.

After wildfire declaration, a prescribed fire project is over.

Actions

- When a prescribed fire is declared a wildland fire, managers still have the full range of suppression options available under the concept of the "Wildland Fire Response."

WILFIRE DECLARED BY:

Burn boss

IC ASSIGNMENT:

The burn boss or other qualified personnel (depending on complexity of incident and span of control).

NOTIFICATIONS:

The burn boss or designee will contact the VDOF or NCFS and Base management when the prescribed burn is declared a wildfire. The Base Fire Chief or designee will contact the VDOF OR NCFS for assistance if needed. .

EXTENDED ATTACK ACTIONS AND OPPORTUNITIES TO AID IN SUPPRESSION EFFORTS:

Once a burn is declared a wildfire, initial attack suppression tactics will follow the Base Wildland Fire Management Plan. Pre-established roads will be used to burn out from and contain the wildfire with minimal mechanical impact as long as the escaped fire can be contained on base land.

ELEMENT 19	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
SMOKE MANAGEMENT AND AIR QUALITY	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

COMPLIANCE AND PERMITS TO BE OBTAINED:

Describe how the project will comply with local community, County, State, Tribal, and Federal air quality regulations.

Smoke emissions will be managed in accordance with the Virginia Administrative Code, which regulates rural open burning. These rules require that an open burning authorization be obtained from VDOF and that burning be confined to the hours between 0900 and one hour before sunset of the same day, two hours after sunset for Certified Burns.

SMOKE-SENSITIVE FEATURES AND RECPTORS:

Some compartments border these roads while others are interior (see map). No other sensitive features or receptors are expected to be affected by the project. All of the compartments in this project are identified as areas that would impact smoke sensitive areas.

POTENTIAL IMPACTED AREAS:

Identify Class I air sheds, restricted areas, non-attainment areas (designated areas), and population centers that may be impacted.

No Class I air sheds, restricted areas, or non-attainment areas will be impacted by smoke from this burn. The closest population centers are Hickory which is southwest and Myock NC, to the southeast of the burn unit and should not be impacted with the prescription parameters required in the plan.

Night time drainage winds will pool smoke in low lying areas, possible potential fog formation areas are;

MITIGATION STRATIGIES AND TECHNIQUES TO REDUCE IMPACTS:

Smoke signs will be placed on Interstate and State Rd on the morning of the burn by fire staff if the forecasted winds will impact these roads. The burn boss or designee will notify the Highway Patrol or County Sheriff of the location of any signs and the potential for any smoke impact. *See day of burn contact list for phone numbers for these agencies.*

Residual Smoke Problems;

No prescribed burn will occur within 1 mile of Interstate or State Road if the weather forecast mentions the possibility of FOG in the spot forecast.

- Obtain a spot weather forecast for the day of the prescribed burn, prior to ignition from the National Weather Service. An updated spot forecast should also be considered mid-afternoon to assist Burn Boss with night shift staffing decisions.
- The Burn Boss or Base LE will notify the Highway Patrol or the County Sheriff's Office that a burn will be conducted adjacent to smoke sensitive areas. A location will be given to the dispatcher. Phone numbers of the person's in charge will be given to the dispatcher. The dispatcher's name, date and time will be recorded on the burn plan.

Smoke monitoring will take place along smoke sensitive areas that may be impacted. The attached "Smoke sensitive areas" and burn unit map correspond to the areas that will require smoke monitoring following a burn. The monitoring will be accomplished throughout the night utilizing road patrols, these patrols will continue until daylight. The road patrols will utilize fire personnel and non-fire personnel for this purpose. Patrols will be concentrated one mile on either side of the burn site. If fog develops and drifts towards the smoke signs, the signs will be moved to stay beyond the heaviest density of the fog. Log sheets (Appendix E) containing the note data will be signed by the shift monitor and passed on to the next shift monitor. This documentation will then be attached to the respective prescribed burn plan.

If heavy fog is determined to impede normal traffic by burn personnel, local law enforcement will be notified. The law enforcement agency notified will make the determination as to what action is to be taken.

ELEMENT 20	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
MONITORING	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

MONITORING:

Describe the monitoring that will be required for the prescribed fire. At a minimum specify the weather, fire behavior and fuels information (forecast and observed) and smoke dispersal monitoring required during all phases of the project and the procedures for acquiring it, including who and when.

A. Fuels Information (forecast and observed) Required and Procedures:

B. Weather Monitoring Required and Procedures:

A person assigned to monitor will take hourly weather observations throughout the operational period during active fire spread. Weather observations will be broadcast over the radio so all personnel on the fire will be informed on conditions. A copy of on-site weather will be placed in the burn compartment history folder after the completion of the burn.

C. Fire Behavior Monitoring Required and Procedures:

If possible, the person assigned to monitor weather will observe and record flame lengths, rate of spread, and probability of ignition during the burn period; otherwise another person will be assigned. Photos will be taken during the burn of representative flaming fronts for archival data.

D. Monitoring Required To Ensure That Prescribed Fire Plan Objectives Are Met:

Point location (lat. & long.)	Point type (veg, photo, well, etc.)	Pre-burn requirements	Monitoring completed (initials/date)

E. Smoke Dispersal Monitoring Required and Procedures:

Resources nearest to potentially impacted roads will monitor smoke characteristics and visibility and will document any visibility concerns either in writing or with digital photos. If available a helicopter will monitor smoke impacts on the major road ways and will document smoke plume characteristics. If possible photos will be taken from the air of plume height and dispersion of the plume.

ELEMENT 21	**PROJECT NAME:**	**NSAHR NWA PRESCRIBED FIRE PLAN 2018/2019**
POST-BURN ACTIVITIES	**BURN UNIT NAME:**	**Unit: Skeet, IAMS Range 1&2, ROTHR 1-4, Supplywoods 1&2, and Lunker Lake**

POST-BURN REPORT:

Prescribed fire reporting will include: burn day conditions, fire behavior, smoke dispersal, and first order fire effects.

- The Burn Boss and Natural Resources Specialist are responsible for reports which will be completed no later than 7 days after completion of the burn.
- Weather observations from the closest RAWS site and on-site weather will be added to the burn plan folder by the Burn Boss.
- Post burn photos will be taken shortly after the burn, and then six months after the burn in pre-established photo points.

OTHER:

Describe other post-burn activities that must be completed. This may include: safety mitigation measures, and rehabilitation needs including those as a result of pre-burn activities undertaken.

The burn boss will conduct an after action review at the end of the shift. All actions and any significant incidents or events will be recorded and placed in the burn compartment fire history folder.

Appendix C: Complexity Analysis

Prescribed Fire Complexity Rating System Guide Worksheet

NSAHR NWA 2018 / 2019

Project Name

Complexity elements:

1. Potential for Escape

Risk	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Fire spots into forest adjacent to ROTHR or Skeet units. Fire creeps through duff or along narrow strips of fuel by ditches.
Final Rating: *Low* *Moderate* *High*	Natural barriers and constructed fire breaks will limit the extent of any escape to adjoining areas. Holding resources will patrol lines frequently. Use planned weather with cool to cold air temps and constant wind direction will mitigate these risks.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Primary concern would be the potential escape into forested areas or if farm fields have grass and crop stubble that could burn. ROTHR unit has sensitive structures that are adjacent.
Final Rating: *Low* *Moderate* *High*	Risk to the structures is limited by completing pre-burn work to establish fire-breaks. Having adequate holding forces in place prior to ignition, and adhering to the burn prescription for temperature and wind direction.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Burn units are located within roadways, fuel-breaks, ditches, and agricultural fields. Secondary roads and barriers also exist beyond the individual burn units.
Final Rating: *Low* *Moderate* *High*	No change.

2. The Number and Dependency of Activities

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	This project will be a ground-based ignition. A moderate level of coordination is required between the holding and ignition resources to maintain safety and to properly regulate fire intensities.
Final Rating: *Low* *Moderate* *High*	Units are small and very manageable with the proposed equipment and personnel. Use personnel with burning experience.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Coordination failures could jeopardize timeliness of implementation, and the safety of fire personnel and the public. If all burn plan elements are not in place on burn day, ignition will not begin. Firing and holding are not in sync.
Final Rating: *Low* *Moderate* *High*	Ensure all aspects of burn plan are finished prior to day of burn. Follow the plan, conduct briefing, and ensure communications is in place.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	There will be a relatively small burn organization. Communication between all team members is necessary to maintain safe operations, particularly with regard to combining units in plan.
Final Rating: *Low* *Moderate* *High*	Communication procedures are identified and will be provided to all members on the burn. Coordinated activities are minimal.

3. Off-Site Values

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	Highways, Churches, military buildings, and dairy farms are located north and west of installation. The communities of Myock NC, and Hickory, VA are southeast and southwest. Smoke could impact these areas.
Final Rating: *Low* *Moderate* *High*	There are multiple fuel breaks between burn units and any values at risk to the northwest, west or southwest. Use prescribed weather to reduce any impacts from fire or smoke.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Units are small with many brakes in continuity of fuel. Use prescribed weather to accomplish objectives and have identified resources on-site.
Final Rating: *Low* *Moderate* *High*	No additional changes.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	No structure protection will be required. All units are readily accessible. Smoke impacts should be minimal when following prescription.
Final Rating: *Low* *Moderate* *High*	No change.

4. On-Site Values

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	Fire intensity could be higher than needed. Smoke could impact military structures and recreational areas. Hunting stands or pines get scorched. Smoke could impact ROTHR.
Final Rating: *Low* *Moderate* *High*	Use fire breaks and firing patterns to manage fire intensity. Make sure all fire breaks are in and clean prior to ignition. Secure all hunting stands prior to day of burn. Use prescribed weather. Communicate with ROTHR folks prior to burning to ensure particulate matter (PM) from smoke is cleared.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	It is highly unlikely the on-site resources could be negatively impacted by the project using prescribed weather and resources.
Final Rating: *Low* *Moderate* *High*	No change.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Resource values within the unit are easily protected through normal planning process and burn day activities or site preparation work.
Final Rating: *Low* *Moderate* *High*	No change.

5. Fire Behavior

Risk	Rationale
Preliminary Rating: ***Low Moderate High***	Fire behavior in grass is fast and hot. Heavy fuel loads will add to fire intensity and spotting potential. Ground fire could cause smoke issues
Final Rating: ***Low Moderate High***	The terrain is flat, making fire behavior predictable. Easy access to all units by equipment will provide water if needed. Use planned firing patterns to manage fire behavior. Pay attention to on-site water / KBDI.
Potential Consequences	**Rationale**
Preliminary Rating: ***Low Moderate High***	These are small units and very manageable. Fuels outside the units should be similar with many natural barriers to fire. Fire behavior in these areas is predictable and easily contained.
Final Rating: ***Low Moderate High***	No change.
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low Moderate High***	The terrain is flat. Ignition techniques are for the most part simple. Some units have the potential to burn with great intensity, so care must be taken to manage ignitions. Short-range spotting outside the units can be addressed by direct attack.
Final Rating: ***Low Moderate High***	No change.

6. Management Organization

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	These burns could be conducted with a very mixed crew from different organizations. Internal coordination could hamper project implementation. Media personnel will be interested in smoke source.
Final Rating: *Low* *Moderate* *High*	A PIO will be assigned if media interest is high. The burn crew needed is small. All internal coordination will take place annually and 48 hours prior to ignition.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Problems related to communications could lead to safety violations, confusion as to response and tactics, or the increased risk of a fire escape.
Final Rating: *Low* *Moderate* *High*	Pre-burn briefings and communication checks will mitigate these concerns. Internal planning is done throughout life of this burn plan.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Burn team members may not have worked with each other, due to the mix of other state, federal, local cooperators or contractor. Coordination and communication internally changes when commands change.
Final Rating: *Low* *Moderate* *High*	Communications and working procedures have been established and are used frequently. Pre-burn briefing between all team members prior to implementation.

7. Public and Political Interest

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	The community of Hickory and Myock, NC are southwest and southeast. Potential impacts which would generate interest include visibility and air quality, and the potential to involve government structures and improvements. Local media will be interested if these impacts occur.
Final Rating: *Low* *Moderate* *High*	Threats to improvements will be mitigated by having adequate holding forces on hand prior to ignition, by ensuring that natural and constructed fuel breaks are adequate, and air quality issues mitigated by burning under specified wind and atmospheric conditions. Use PIO to manage media interest.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Normal activities may require some public and media contact. Unexpected or adverse events would attract public, political and media interest. Local notification within the area will be conducted.
Final Rating: *Low* *Moderate* *High*	The Navy and cooperators have made efforts to educate the public and develop positive relations. The assigned PIO will work local political and media interests.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Contacts will be made with local agencies, internal programs, and select media members on or prior to the burn day. Press releases and internal / external public notices will be given leading up to the start of the project. A Public/Fire Information Officer will be designated prior to burn days.
Final Rating: *Low* *Moderate* *High*	No change.

8. Fire Treatment Objectives

Risk	Rationale
Preliminary Rating: ***Low*** *Moderate* *High*	Treatment objectives are non-competing which makes success easier. These are easily achieved under proper environmental conditions. Fire behavior and weather monitoring are easily conducted.
Final Rating: ***Low*** *Moderate* *High*	No change
Potential Consequences	**Rationale**
Preliminary Rating: ***Low*** *Moderate* *High*	Burning is the best means to reduce the accumulated natural fuels. Failure to burn has negatively impacted resource management objectives for the units.
Final Rating: ***Low*** *Moderate* *High*	No change.
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low*** *Moderate* *High*	Treatment objectives are simple, and easily achievable with favorable burning conditions. A long burn season allows for adequate time to complete critical units within established prescriptions.
Final Rating: ***Low*** *Moderate* *High*	No change

9. Constraints

Risk	Rationale
Preliminary Rating: *Low* ***Moderate*** *High*	Availability of burning windows, coordination with military missions, funding, base access, and timeliness of all phases are very possible.
Final Rating: *Low* ***Moderate*** *High*	No change.
Potential Consequences	**Rationale**
Preliminary Rating: ***Low*** *Moderate* *High*	The burning may not get accomplished under ideal conditions. No burning due to poor coordination. Due to small units and length of burn season and time to coordinate, burning should get accomplished.
Final Rating: ***Low*** *Moderate* *High*	No change
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low*** *Moderate* *High*	Good coordination and communication should reduce any issues. Getting funding and all phases of burn program planned will reduce complexity.
Final Rating: ***Low*** *Moderate* *High*	No change.

10. Safety

Risk	Rationale
Preliminary Rating: ***Low Moderate High***	This is a ground-based ignition, personnel need to minimize exposure to smoke. This is a cool season / winter project, and personnel will be working in wet areas. Operations may be conducted from UTV or by foot.
Final Rating: ***Low Moderate High***	Wearing approved / required PPE will reduce burn potential but exposure to smoke will need to be monitored. UTV or ATV operators will be trained on equipment. Use motorized equipment in wetter areas.
Potential Consequences	**Rationale**
Preliminary Rating: ***Low Moderate High***	Fire behavior is expected to be in manageable range. Escape routes and safety zones must be identified if personnel are conducting ground-based ignition. Crew will monitor each other.
Final Rating: ***Low Moderate High***	No change.
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low Moderate High***	Safety zones will be readily available, due to the proximity of roads, water, natural barriers. Ignition crew safety requires extra attention if conducting ground ignition. Thorough briefings prior to all operations will help mitigate risks.
Final Rating: ***Low Moderate High***	No change.

11. Ignition Procedures/Methods

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	Coordination between Burn Boss, and ground-based igniters is important to ensure safety and regulate fire intensity. Independent ground ignition methods will be simple, and may involve 1-2 ignition teams.
Final Rating: *Low* *Moderate* *High*	No change.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Fire intensities and pace of ignition must be regulated as much as possible until perimeters are secure to avoid potential safety issues or fire escapes.
Final Rating: *Low* *Moderate* *High*	Burn units are small and using prescribed weather will reduce issues.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Some coordination will be needed to make sure ignition does not compromise ground personnel.
Final Rating: *Low* *Moderate* *High*	No change

12. Interagency Coordination

Risk	Rationale
Preliminary Rating: ***Low*** ***Moderate*** ***High***	Some coordination with the state, and local police and fire departments will also be needed. This coordination has been on-going through navy programs.
Final Rating: ***Low*** ***Moderate*** ***High***	No change.
Potential Consequences	**Rationale**
Preliminary Rating: ***Low*** ***Moderate*** ***High***	Prescribed fire work has been on-going for many years by cooperators. A good working relationship exists, which should not be effected by coordination or communication issues.
Final Rating: ***Low*** ***Moderate*** ***High***	No change.
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low*** ***Moderate*** ***High***	Coordination has been on-going. No problems are anticipated. Interagency resources should be available, if needed.
Final Rating: ***Low*** ***Moderate*** ***High***	No change

13. Project Logistics

Risk	Rationale
Preliminary Rating: *Low* *Moderate* *High*	Internal coordination between naval programs is important for the success of these burns. Access to units maybe restricted due to military missions.
Final Rating: *Low* *Moderate* *High*	This will be mitigated with good planning.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Failure to provide proper support could compromise project. Transport of specialized equipment may need some additional time and planning.
Final Rating: *Low* *Moderate* *High*	Coordination 48 hours in advance of ignition will mitigate equipment transport and other logistical issues. Constant Internal communication.
Technical Difficulty	**Rationale**
Preliminary Rating: *Low* *Moderate* *High*	Contractor or cooperators will be self-supporting.
Final Rating: *Low* *Moderate* *High*	No change.

14. Smoke Management

Risk	Rationale
Preliminary Rating: *Low* ***Moderate*** *High*	This project will produce highly noticeable smoke for all burn units. Effects will be short-term, however, due to the expected rapid burn-out of fuels. There should be minimal impacts to communities, military facilities, and public roads. Burning under the wrong wind or atmospheric conditions would pose a moderate risk.
Final Rating: ***Low*** *Moderate High*	Adhering to the burn prescription will mitigate these risks.
Potential Consequences	**Rationale**
Preliminary Rating: *Low* ***Moderate*** *High*	The closest populated area for smoke impact are homes along Ballhack RD. and dairies north of installation.. There could be some visual impairment during the burns if the wind direction and dispersion index is poor.
Final Rating: ***Low*** *Moderate High*	Smoke direction and lift will be monitored during the burn, and post-burn patrols will be conducted to ensure there are no residual fire problems. Small units allow burn to be completed quickly or cutoff if needed.
Technical Difficulty	**Rationale**
Preliminary Rating: ***Low*** *Moderate High*	Wind and atmospheric conditions are specified in the burn plan to mitigate smoke impacts. Some coordination with State and Local fire and law enforcement personnel will be needed on burn days.
Final Rating: ***Low*** *Moderate High*	No change.

COMPLEXITY RATING SUMMARY

RISK: OVERALL RATING Low

POTENTIAL CONSEQUENCES: OVERALL RATING Low

TECHNICAL DIFFICULTY: OVERALL RATING Low

SUMMARY COMPLEXITY RATING: Low

RATIONALE: All units will be burned by hand which requires good coordination and communication. It has been several years since burning has been conducted on the Installation which adds some complexity. Smoke will be mitigated by using prescribed weather but drainage and smoke dispersion still has to potential to affect the public. Broken continuity of fuels, sparse population surrounding NSAHR NWA allows for several wind directions and small burn units make this a low complexity project.

Need to make sure that we identify needed roadways to ensure proper access for fire suppression. New roads would require NEPA review. Old roads not being maintained need to be maintained.

http://www.dfr.state.nc.us/fire_control/fire_control.htm

PRESCRIBED BURN PLAN AND SMOKE MANAGEMENT PLAN 2008

DEFINITION: Prescribed, or controlled, burning is defined as skillfully applying fire to forest and grassland fuels, in a definite place, for a specific purpose, and under exacting conditions to achieve management objectives. For the purposes of this plan, all burning will be accomplished by the strip-head fire technique although backing fires may be used under certain conditions to minimize smoke impacts. Literature describing prescribed burn techniques is available upon request.

PURPOSE/JUSTIFICATION: The main objectives of controlled burning are to reduce forest fuel (i.e. pine needles, fallen wood, leaves, etc.) accumulations and thick understory, improve wildlife habitat, reduce potential for an uncontrollable fire, and to maintain vegetation in compliance with security and antenna requirements. Specifically at NAVSUPPACT NW, prescribed burning will be used to clear antenna array sites of woody vegetation as well as for forest management and wildlife habitat management purposes. This procedure is described in the NAVSUPPACT NW Integrated Natural Resources Management Plan. Prescribed burning is the most economical, practical and commonly used method of site preparation to meet management and maintenance goals at these sites.

TIME FRAME/SEASON: This plan will be valid upon signature until 30 November 2008. Virginia State Code 10.1-1142-B designates the period from February 15 to April 30 as fire season. The general public is prohibited from any burning before 1600 hours. Federal facilities are exempt from state law due to exclusive jurisdiction, but should comply with the intent of the law. Top priority should be given to prescribed burning when appropriate conditions are present, since there are few acceptable days available for burning in this region.

SPECIAL CONSIDERATIONS: When burning on the North Carolina side of the installation, North Carolina requires a burning permit, which may be obtained at Old's Auto Supply & Service Inc., (919) 435-6366 adjacent to Hardees in Moyock at no cost. The burning permit can be obtained the same day that the burning is planned and dates are specified on the permit.

When burning near the ROTHR antenna, firebreaks will be no closer than 20' from the clearly marked (grey with red stripes) ROTHR antenna ground screen boundary poles. No vehicles will be parked south of the boundary poles for a minimum of 565'. Wildland firefighting vehicles are authorized to park on the north side of the antenna service road (two wheels on asphalt, two on grass). No heavy equipment except the natural resources 5300 John Deere tractor (used for firebreaks) and natural resources ATV will utilize the antenna service road.

FSSC Facilities will be notified prior to commencing burning adjacent to the ROTHR antenna array at ROTHR POC Mr. Chris Long cell: 757-675-3303 and/or the ROTHR Watch Officer: 757-421-8742.

SMOKE MANAGEMENT PLAN: Each Burn Area will specify required conditions upon which burning may take place to minimize impacts to identified downwind sensitive smoke receptors. These sensitive targets include antennas, roadways, buildings, the IAMS range, and neighborhoods north of the installation on Ballahack Road. Note that certain low priority areas may be burned in advance of higher priority areas to provide crew training, to test communication procedures and insure equipment is working properly. Some of these areas are smaller than high priority burn areas and are located in accessible and secure locations.

DESCRIPTION OF BURN AREAS:

Locations of proposed burn areas are shown in Appendix D.

Description of Burn Areas are detailed to include the impetus for each site, total acreage, any critical information specific to each area, and if the site contains hunting areas. Descriptions also include the level of growth succession and vegetation contained in the areas. In addition, preferred wind direction, boundaries of each burn area, and firebreaks are specified.

Burn areas have been categorized either as high priority, mid-level priority, or low priority. High priority sites are shown in the overall map included in this plan. Those sites labeled with a high priority will be burned first, dependent upon weather conditions and availability of personnel, to maintain mission essential operations or reduce heavy fuel loads. It is recommended that areas containing the state threatened canebrake rattlesnake population be burned before 1 April.

Sites 1,2, 3A and 8 will be burned to control vegetation in the ROTHR Clear Zones. These sites have a high priority since vegetation will interfere with the operational needs of FSSC if this vegetation is not controlled. Site 5 is a high priority because it contains an underground cable and vegetation must be controlled so that root systems do not interfere with this cable. Site 7 is a high priority because it contains a high amount of fuel loads and is adjacent to the IAMS range. Site 9 is a high priority due to heavy fuel loads and is adjacent to buildings. Site 11 is a high priority due to its large amount of forest fuel in the area. All other sites will be burned for wildlife management purposes and/or to control understory growth in timber stands.

The remaining sites will be burned provided that adequate personnel and weather is available during the burn season. All natural firebreaks will be mowed and disked or plowed through use of a fire plow or tiller.

Burn Area 1 is prescribed in order to control vegetation in the ROTHR clear zone. It contains approximately 70 acres. This is a non-hunting area. It is an early successional field containing mostly grasses with some shrubbery. This area was successfully burned in 2004. Burning will

require easterly winds. Boundaries are defined by the ROTHR antenna maintenance road on the north, Dusty Road on the east, and forested areas on the south and west. These boundaries also serve as the firebreaks with the south and west boundaries being mowed and disked. Area 1 will be burned consecutively in two sections, a section between the ROTHR maintenance road and the ditch, and a section between the ditch and the treeline. Each section will be divided into three subsections. The section farthest from the direction of the prevailing winds will be burned first to enhance established firebreaks.
(Priority: High)

Burn Area 2 is prescribed in order to control vegetation in the ROTHR clear zone. It contains approximately 15 acres. This is an early successional field containing sweetgum, red maple, loblolly pine and understory growth. Burning will require north, northwest or northeasterly winds. Boundaries are defined by agricultural fields on the northwestern and southwestern boundaries, a firebreak on the eastern boundary, and forested areas on the southern boundary. These boundaries also serve as firebreaks and will be mowed and disked. Area 2 will be burned in two sections, a section between the ROTHR antenna ground screen and ditch, and a section between the ditch and the treeline.
(Priority: High)

Burn Area 3 has approximately 6 acres and is divided into two sections, 3A and 3B. 3A is significant in that it must be cleared for the ROTHR antenna. It has mid-successional growth containing loblolly pine, oak, and wax myrtle. Burning will require north, northwest or northeasterly winds. 3B is a non-critical area which could be converted for agricultural purposes. It has mid-successional growth containing mostly loblolly pine. Burning will require north or northeasterly winds. Boundaries for both 3A and 3B are defined by roads on the northern boundary, agricultural fields on the eastern boundary, a forested area on the southern boundary, and a firebreak on the western side. All natural edges of these areas will be mowed and disked to establish firebreaks. 3A will be burned first and 3B will be assessed for future burning.
(3A Priority: High)

Burn Area 4 is a mid-level priority area adjacent to the ROTHR antenna which will be burned for wildlife management and fuel reduction. It contains approximately 2 acres. It is an early to mid-successional field containing mostly understory vegetation of goldenrod, trumpet vine, and cane with a few loblolly pine, sweetgum, and red maple trees. Any wind direction can accommodate this area for burning. Boundaries are defined by Relay Road on the northern boundary, Shotgun Road on the eastern boundary, ROTHR maintenance road on the south, and an agricultural field on the western and southern sides. Firebreaks are provided by paved roads on the northern and eastern boundaries and agricultural fields provide the firebreaks on the southwestern boundary. This area will be burned in one section. This area is optional for demonstration purposes and for training of new crew personnel.
(Priority: Mid-level)

Burn Area 5 is prescribed to destroy woody vegetation to control root systems to prevent interference with an underground cable on site. This area is composed of approximately 2 acres. It is an early successional field containing mostly understory vegetation of goldenrod,

trumpet vine, and cane with a few loblolly, sweetgum, and red maple trees. Burning will require a north or east wind. Boundaries are defined by Farmhouse Road and an agricultural field on the north, and agricultural fields on the east, south and west. The road and agricultural fields will provide adequate firebreaks. This area will be burned in one section.
(Priority: High)

Burn Area 6 is prescribed to remove fuels but is a non-critical area. It is approximately 13 acres in size. This area is significant because the state endangered species of canebrake rattlesnake are prevalent here. This area has mid to late successional growth containing a dense stand of pine. A backing fire in combination with a head fire is recommended. Burning will require an east, north or south wind. Boundaries are defined by Dusty Road on the eastern boundary, ROTHR Antenna Maintenance Road on the southern boundary, and forested areas on the western and northern boundaries. Roads on the eastern and southern boundaries will provide firebreaks. Mowed and disked firebreaks will be established on the western and northern boundaries. This area will be burned in four sections.
(Priority: Low)

Burn Area 7 is prescribed because it contains heavy fuel loads and is adjacent to the IAMS range. This area must be burned when the range is inactive. The area contains approximately 55 acres and is designated as a hunting area. This area contains mature forests consisting of loblolly pine and deciduous trees. A wind direction ranging from southwest to southeast must be present. Boundaries are defined by Carolina Road on the eastern boundary, Red River Road on the southern boundary, Dusty Road on the western boundary, and the IAMS range and an agricultural field on the northern boundary. Roads on the eastern, southern, and western boundaries establish the firebreaks. Tree canopy on perimeter must be eliminated prior to commencement of burning. A mowed and disked firebreak will be established on the northern edge.
(Priority: High)

Burn Area 8 is critical to maintain the ROTHR clear zone. It contains approximately 9 acres. The area is an early successional field containing mostly grasses and shrubbery. Burning will require a west to east wind. Boundaries are defined by Carolina Road on the east and south, agricultural fields on the southwestern and western boundaries and the ROTHR antenna on the northern boundary. Roads on the eastern and southeastern boundaries, agricultural fields on the southwestern and western boundaries and a mowed/disked strip on the northern boundary establish the firebreaks.
(Priority: High)

Burn Area 9 contains approximately 10 acres and will be burned for forest fuel reduction. It is a mid-successional field containing sweetgum, maple and cane understory. An easterly wind will be required. Boundaries are defined by Crosscut Road on the east, Building 14 complex on the southern and southwestern boundary, an agricultural field on the northwestern boundary, and Monroe Road on the north. Established roads on the northern and eastern boundaries, agricultural fields on the western boundary and a mowed/disked area on the southwestern boundary provide firebreaks. This area will be burned in one section.
(Priority: High)

Burn Area 10 is a non-critical area with little to no fuels and is next to the Coast Guard parking lot. It is approximately 9 acres in size. It is a mid to late successional field containing loblolly pine, red maple, sweetgum, and understory growth. South to southeast winds are required to burn this area. Boundaries are defined by agricultural fields on the east and south, the Coast Guard parking lot and grass on the west, and a mowed grass area on the north, which will be disked if the area is burned. Agricultural fields on the east and south, the Coast Guard parking lot on the west, and mowed/disked grass on the north establishes firebreaks. This area would be burned in one section. This area is optional for demonstration purposes and for training of new crew personnel.
(Priority: Low)

Burn Area 11 is prescribed due to a large fuel load. It is approximately 47 acres in size. This area contains hunting stands. It has early to mid successional growth with deciduous saplings consisting mostly of red maple and sweetgum with cane understory. The area can be burned with winds coming from the west, north, or east. Boundaries are defined by a grassy trail on the eastern, southern and western boundary and Red River Road on the northern boundary. Firebreaks will be mowed and disked on the grass boundaries and Red River Road will serve as the north firebreak. Site 11 is sub-divided into many smaller sites by grassy trails and established roads. Tree canopy must be assessed to avoid crown fire transfer. This site will be burned in 4 sections.
(Priority: Low)

Actual burning techniques may be modified by the burn boss on the day of the burn to compensate for changes in weather, burn conditions, or fire behavior.

RESPONSIBILITIES:

NAVFAC MidLant Regional Natural Resources Manager:

1. Act as burn boss and conduct the safety brief.
2. Supervise burn procedures on the day of the burn.
3. Release burn crew from the site after mop-up.
4. Review the burn plan.
5. Provide technical assistance.

NAS Oceana Natural Resources Specialist:

1. Develop prescribed burn plan.
2. Coordinate personnel and equipment prior to burn.
3. Conduct post burn evaluation.
4. Notify Chain-of-command and concerned parties prior to burning.
5. Provide 4 portable radios with access to Security and Fire Dept. frequencies.
6. Establish firebreaks.

NSA Northwest Public Works Officer:

1. Review prescribed burn plan.

Navy Region Mid-Atlantic Fire and Emergency Services:

1. Provide standby fire crew in case of emergency
2. Coordinate available assistance from the local and regional fire departments.
3. If requested by the Natural Resources Manager, make hourly site inspections of burned area(s) for three consecutive hours after burn crew has secured site.

NSA Northwest Security Department:

1. Provide traffic control in the event of impaired visibility due to smoke
2. Provide traffic control in the event of an emergency

NSA Northwest Public Affairs:

1. Provide burn information to inquiring individuals, nearby residents and the news
2. media, if requested

REQUIRED WEATHER CONDITIONS:

The following conditions must be met before burning is initiated:

- No significant rain three to seven days prior to burning.
- Winds of 10 mph or less with gusts no higher than 15 mph.
- Preferred relative humidity of 30 to 50 percent.
- Preferred temperature of 20 to 50 degrees Fahrenheit.
- Front no less than four hours distant.
- Specific wind direction may be required to reduce smoke.
- Per the VDOF, no prescribed burning will occur above the 500 CSI (Cumulative Severity Index) maximum, which will be checked prior to burning assessment.

BURN PREPARATION:

Notification:
All concerned parties will receive notification and all necessary details specific to the proposed burn. Weather and mission operations are the controlling factors and will generally limit coordination to less than 24 hours and almost always less than one week prior to burning.

Fire Breaks:
Establishment of fire control breaks is discussed in the preceding burn area descriptions. Secondary firebreaks consisting of roads, ditches, clear zones, and agricultural fields are located around all burn areas, which further prevent fire from escaping outside of Navy property as well as protecting structures on board the installations.

Personnel/Materials:
A list of work crew personnel and equipment needed to control the burn is contained in this plan.

Required Clothing:
A list of required field clothing is contained in Appendix B.

Day of Burn Procedures:

1. Obtain current weather and burn forecast information.
   - Virginia Department of Forestry: (757) 465-6840; www.state.vipnet.org/dof/index.html
   - National Oceanic and Atmospheric Administration: www.nws.noaa.gov/
2. Notify all concerned parties prior to and immediately after burning.
3. Conduct a briefing by the Burn Boss covering the following items:
   - Burn Objectives
   - Techniques to be used
   - Safety
   - Burn Boundaries
   - Radio transmission signals
   - Use of fire tools
   - Chain of Command: natural resources staff, headed by the burn boss, will give direction to the work crew. The natural resources staff will remain in radio contact with security dispatch and the Fire Department in case of any issues that may require a halt to or redirection of the burning operation. The Commanding Officer, Security Officer, or the Public Works Officer may give such direction.

Burn Completion:
When all open flames within 25 feet of the burn perimeter and all smoldering material are extinguished, and the burn has been completed to the satisfaction of the burn boss, he/she may release the burn crew from the site. If requested by the Regional Natural Resources Manager, the Navy Region Mid-Atlantic Fire and Emergency Services will make hourly site inspections for three consecutive hours after the burn crew has secured the site. Burn crew personnel should be recalled only if fire escapes the burn perimeter or open flames persist within 100 feet of the burn perimeter during winds over 25 mph.

Post Burn Evaluation:
Each burned area will be evaluated with respect to the following questions:

- Was there adherence to the burn plan?
- Were pre-burn preparations made?
- Were objectives met?
- Were conditions of weather, fuel and fire behavior within planned limits?
- Was the burning technique employed appropriate?
- Was the fire confined by the fire control breaks?
- Did any accidents or near accidents occur?
- What were the environmental effects on soil, air, vegetation, water and wildlife?
- Were costs comparable with benefits derived?

EMERGENCY ACTION:

1. In the event of an emergency, these options are available and will be evaluated by the burn boss and the Fire Chief at the time of the incident:

    a. In direct coordination with the Burn Boss, have Navy Region Mid-Atlantic Fire and Emergency Services assist in extinguishing fire.
    b. Stop lighting new sections but allow the existing fire to continue to burn. However, under certain conditions, and in coordination with the Fire Department, backfires may be used to help control or extinguish fires.
    c. Continue normal burning procedures.

2. In case of a fire escape that cannot be controlled by the burn crew or the Navy Region Mid-Atlantic Fire and Emergency Services, the following can be contacted for assistance:
    a. Virginia Department of Forestry (434) 977-6555
    b. North Carolina Forest Service (252) 453-6770
    c. Chesapeake Fire Department (757) 382-6297/ 8292
    d. Dismal Swamp National Wildlife Refuge (757) 986-3705

"WATCH OUT" SITUATIONS:

IF ANY OF THE FOLLOWING CONDITIONS EXISTS, THE BURN WILL BE HALTED AND EXISTING FIRE WILL BE PUT OUT:

- Fire behaves erratically.
- Spot fires occur and are difficult to control.
- Winds shifting or other unforeseen changes in weather.
- Smoke not dispersing as predicted.
- Public roads or sensitive areas "smoked in".
- Burn does not comply with all laws, regulations and standards.
- Large fuels igniting and burning, not enough personnel available to secure before dark, and likely to "smoke in" sensitive areas.

Facility Diagram

Figure 1 and Figure 2 are facility maps for Naval Support Activity Hampton Roads Headquarters that provide the physical location for each site with a Spill Prevention, Control, and Countermeasures (SPCC)-regulated asset. Figure 1 depicts the locations of all aboveground storage tanks (ASTs). Figure 2 depicts the locations of all assets other than ASTs. Individual diagrams for buildings with tanks are located in Section 5.2.1 and include site-specific compliance information such as oil storage container details, contents, capacity, discharge prevention measures, potential release scenarios with appropriate secondary containment assessments, and discharge controls. Similar details concerning drum storage areas, portable container storage areas, and oil-filled operating equipment (OFOE) are found in Sections 5.2.2, 5.2.3, and 5.2.4, respectively.

The Figure 1 and Figure 2 facility maps and the individual diagrams for each container site together satisfy the facility diagram requirements of 40 Code of Federal Regulations (CFR) 112.7(a)(3).

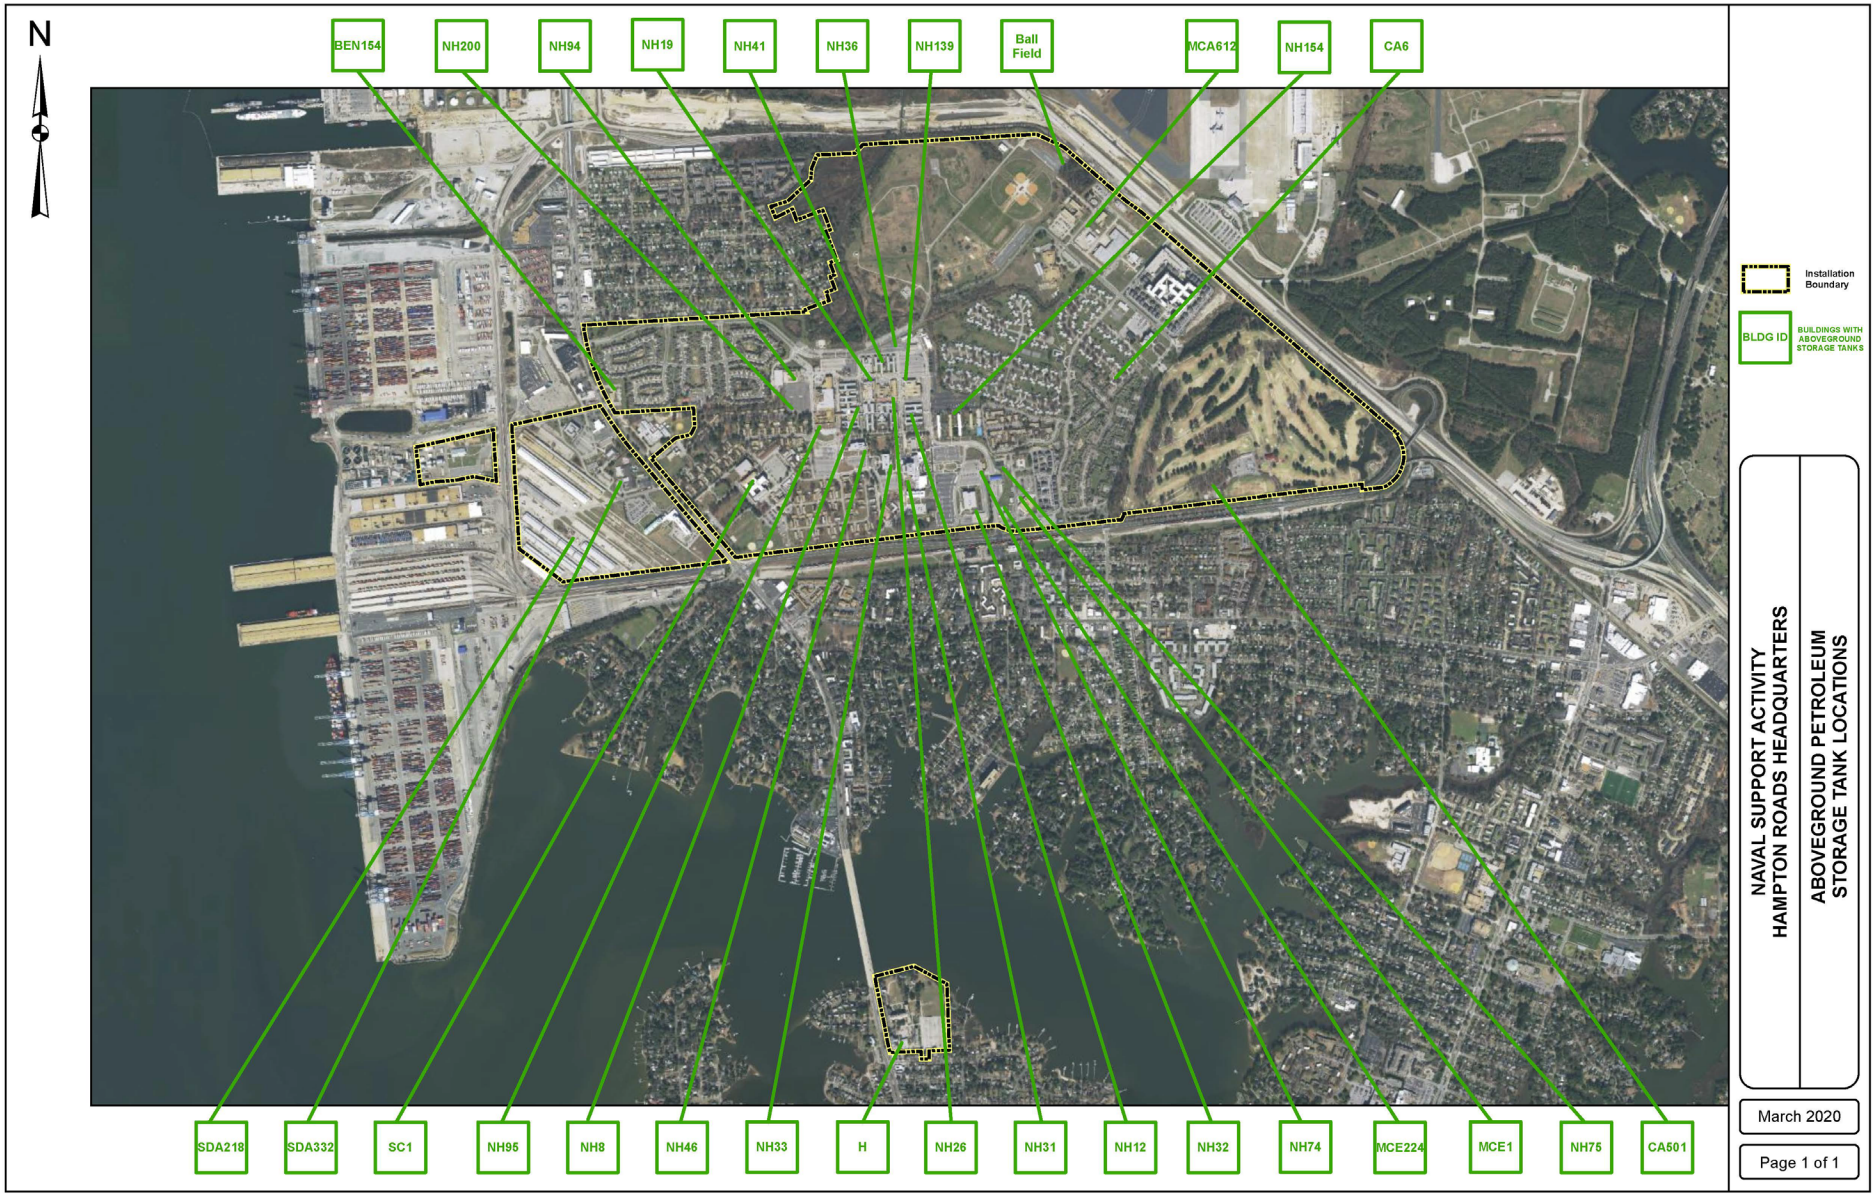

Figure 1. Naval Support Activity Hampton Roads Headquarters Aboveground Storage Tank Locations

Completion of Review/Management Approval

In accordance with 40 CFR 112.5(b), I have completed review and evaluation of this Spill Prevention, Control, and Countermeasures (SPCC) Plan for Naval Support Activity Hampton Roads Headquarters and as a result have approved the Plan on this date. Interim amendments made after this date will be documented in the Record of Review and Amendments on page vi of the Plan. A full review will again be accomplished within five years from this date.

In accordance with 40 CFR 112.7, this Plan is approved and will be implemented as described herein utilizing all necessary resources.

Certification of the Applicability of the Substantial Harm Criteria Checklist

Section 112.20(e) of the facility response plan regulation requires that all facilities regulated by the Oil Pollution Prevention Regulation (40 CFR Part 112) conduct an initial screening to determine whether they are required to develop a facility response plan. The criteria in this checklist can be found in 40 CFR 112.20(f)(1). Facilities should include this form with their SPCC Plan.

FACILITY NAME: Naval Support Activity Hampton Roads Headquarters

FACILITY ADDRESS: 7920 Blandy Road
Norfolk, VA 23511-2419

1. Does the facility transfer oil over water to or from vessels and does the facility have a total oil storage capacity greater than or equal to 42,000 gallons?

   Yes ☐ **No** ☑

2. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and does the facility lack secondary containment that is sufficiently large to contain the capacity of the largest aboveground oil storage tank plus sufficient freeboard to allow for precipitation within any aboveground oil storage tank area?

   Yes ☐ **No** ☑

3. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance (as calculated using the formula in Attachment C-III, Appendix C, 40 CFR 112 or a comparable formula[1]) such that a discharge from the facility could cause injury to fish and wildlife and sensitive environments? For further description of fish and wildlife and sensitive environments, see Appendices I, II, and III to DOC/NOAA's "Guidance for Facility and Vessel Response Environments" (Section 10, Appendix E, 40 CFR 112 for availability) and the Mid-Atlantic Coastal Area Contingency Plan.

   Yes ☐ **No** ☑

4. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance (as calculated using the appropriate formula (Attachment C-III, Appendix C, 40 CFR 112 or a comparable formula[1]) such that a discharge from the facility would shut down a public drinking water intake[2]?

   Yes ☐ **No** ☑

5. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and has the facility experienced a reportable oil spill in an amount greater than or equal to 10,000 gallons within the last 5 years?

   Yes ☐ **No** ☑

Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document, and that based on my inquiry of those individuals responsible for obtaining this information, I believe that the submitted information is true, accurate, and complete.

[1] If a comparable formula is used, documentation of the reliability and analytical soundness of the comparable formula must be attached to this form.
[2] For the purposes of 40 CFR Part 112, public drinking water intakes are analogous to public water systems as described at 40 CFR 143.2(c).

Professional Engineer Certification [40 CFR 112.3(d)]

The undersigned licensed Professional Engineer attests:

(i) That I am familiar with the requirements of 40 CFR part 112.

(ii) That I have visited and examined the Facility.

(iii) That the Plan has been prepared in accordance with good engineering practice, including consideration of applicable industry standards, and with the requirements of 40 CFR part 112.

(iv) That procedures for required inspections and testing have been established.

(v) That the Plan is adequate for the Facility.

(vi) That, if applicable, for a produced water container subject to 40 CFR 112.9(c)(6), any procedure to minimize the amount of free-phase oil is designed to reduce the accumulation of free-phase oil and the procedures and frequency for required inspections, maintenance and testing have been established and are described in the Plan.

This certification in no way relieves the owner or operator of the Facility of his/her duty to prepare and fully implement this Plan in accordance with the requirements of 40 CFR 112. This Plan is valid only to the extent that the Facility owner or operator maintains, tests, and inspects equipment, containment, and other devices as prescribed in this Plan.

Completion of Review / Management Approval
SPCC Plan Technical Amendment May 2019

In accordance with 40 Code of Federal Regulations (CFR) 112.5(b), I completed a review and evaluation of the Spill Prevention, Control, and Countermeasures (SPCC) Plan for Naval Support Activity Hampton Roads Headquarters and as a result have amended the SPCC Plan.

This SPCC Plan was prepared for Naval Support Activity Hampton Roads Headquarters in accordance with good engineering practices. In accordance with 40 CFR 112.7, this SPCC Plan is approved and will be implemented as described herein utilizing all necessary resources. The SPCC Plan will be reviewed and evaluated at least once every 5 years.

Professional Engineer Certification
SPCC Plan Technical Amendment April 2020
[40 CFR 112.3(d)]

The undersigned licensed Professional Engineer attests:

(i) That I am familiar with the requirements of 40 CFR part 112.

(ii) That I have visited and examined the Facility.

(iii) I have found the amendments to this SPCC Plan to have been prepared in accordance with good engineering practice, including consideration of applicable industry standards, and the requirements of 40 CFR Part 112.

(iv) That procedures for required inspections and testing have been established.

(v) The amendments to this SPCC Plan are adequate for Naval Support Activity Hampton Roads Headquarters.

This certification applies only to the items listed for the Technical Amendment, May 2019, shown in the accompanying table. Previous professional engineer certifications to this Plan are also included.

This certification in no way relieves the owner or operator of the Facility of his/her duty to prepare and fully implement this Plan in accordance with the requirements of 40 CFR 112. This Plan is valid only to the extent that the Facility owner or operator maintains, tests, and inspects equipment, containment, and other devices as prescribed in this Plan.

1.0 PLAN ADMINISTRATION

1.1 Purpose

The purpose of this Spill Prevention, Control, and Countermeasures (SPCC) Plan is to establish procedures, methods, equipment, and other requirements necessary to prevent the discharge of oil from Naval Support Activity (NSA) Hampton Roads (HR) Headquarters into or on navigable waters of the United States or adjoining shorelines. The term "oil" as defined under Title 40, Code of Federal Regulations (CFR) 112 (SPCC Rule or §112) means "oil of any kind or in any form, including, but not limited to: fats, oils, or greases of animal, fish, or marine mammal origin; vegetable oils, including oils from seeds, nuts, fruits, or kernels; and, other oils and greases, including petroleum, fuel oil, sludge, synthetic oils, mineral oils, oil refuse, or oil mixed with wastes other than dredged spoil." The terms "petroleum, oil, and lubricants (POL)" and "oil" may be used interchangeably throughout the document and are intended to include the complete realm of substances regulated under §112.

This SPCC Plan is intended to prepare the owner, Commander, Navy Region Mid-Atlantic (CNRMA), and the operator, NSA HR Public Works Department (PWD) Environmental Department, to ensure early detection and quick response in the event of a discharge of oil and to allow the operator to respond in a safe, effective, and timely manner to mitigate the impacts of a discharge from the containers included in this SPCC Plan. The operator is responsible to accomplish all actions directed in this SPCC Plan.

This SPCC Plan was prepared in accordance with the provisions of Title 40, CFR 112, various industry standards (including applicable fire codes), and Chief of Naval Operations (OPNAV) M5090.1, Environmental Readiness Program Manual. Facilities located within the facility boundary of NSA HR Headquarters that store and transfer oil in support of U.S. Navy activities are included in this SPCC Plan due to the amount of oil stored and/or their location. Therefore, they may reasonably be expected to discharge oil in harmful quantities into or upon navigable waters of the United States, adjoining shorelines, into the subsurface aquifer, or outside the property onto non-federal land.

NSA HR Headquarters (UIC N57095) meets the definition of a "non-transportation-related" facility and stores more than 1,320 gallons of oil products in aboveground storage tanks (ASTs). The facility meets the applicability threshold of 40 CFR 112 and is therefore subject to the U.S. Environmental Protection Agency (EPA) SPCC regulations and must develop an SPCC Plan. Additionally, NSA HR Headquarters must meet applicable regulatory requirements related to oil storage and spill prevention of the Commonwealth of Virginia and the U.S. Navy.

NSA HR Headquarters is not required to be covered by a facility response plan (FRP) under 40 CFR 112.20 because the substantial harm criteria described in Section 1.2 are not met. Due to an aggregate aboveground oil storage capacity of less than 25,000 gallons for ASTs subject to Virginia's Facility and AST Regulation (9 Virginia Administrative Code [VAC] 25-91) the facility is also not subject to the Commonwealth of Virginia Department of Environmental Quality (DEQ) Oil Discharge Contingency Plan (ODCP) requirements (9VAC25-91-170).

NSA HR Headquarters is required to comply with the Navy Environmental Readiness Program Manual (OPNAV M5090.1) which includes the preparation of a Storage Tank Management Plan (STMP). The STMP has similar although not identical requirements as those of the SPCC program. The STMP requirements not addressed in the SPCC Plan are presented in

Appendix A. The intention of this approach is to meet all SPCC and STMP requirements in a single document.

1.2 Certification of Substantial Harm Determination [40 CFR 112.20(e)]

§112.20(e) If the owner or operator of a facility determines pursuant to paragraph (a)(2) of this section that the facility could not, because of its location, reasonably be expected to cause substantial harm to the environment by discharging oil into or on the navigable waters or adjoining shorelines, the owner or operator shall complete and maintain at the facility the certification form contained in appendix C to this part and, in the event an alternative formula that is comparable to one contained in appendix C to this part is used to evaluate the criterion in paragraph (f)(1)(ii)(B) or (f)(1)(ii)(C) of this section, the owner or operator shall attach documentation to the certification form that demonstrates the reliability and analytical soundness of the comparable formula and shall notify the Regional Administrator in writing that an alternative formula was used.

A Certification of the Applicability of the Substantial Harm Criteria Checklist has been prepared for NSA HR Headquarters, and those operations do not warrant an FRP as defined by the Substantial Harm Criteria in 40 CFR 112.20. NSA HR Headquarters operations are located in very close proximity to Naval Station Norfolk, and spill response personnel, equipment, and procedures will be consistent with those described in the Consolidated Regional FRP.

1.3 Designated Person [40 CFR 112.7(f)(2)]

§112.7(f)(2) Designate a person at each applicable facility who is accountable for discharge prevention and who reports to facility management.

The Installation Environmental Program Director (IEPD) for NSA HR PWD is the Designated Person described in 40 CFR 112.7(f)(2) who reports to facility management and is accountable for discharge prevention. Contact information for the IEPD is provided in Section 2.0.

1.4 Professional Engineer Certification [40 CFR 112.3(d)]

Professional Engineer (PE) Certification is located on page ix of the SPCC Plan.

1.5 Location of SPCC Plan [40 CFR 112.3(e)]

§112.3(e) If you are the owner or operator of a facility for which a Plan is required under this section, you must: (1) Maintain a complete copy of the Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended, and (2) Have the Plan available to the Regional Administrator for on-site review during normal working hours.

In accordance with 40 CFR 112.3(e), a complete copy of this SPCC Plan is maintained by the NSA HR PWD IEPD and the Fire Department; see IEPD contact information in Section 2. The SPCC Plan is available for on-site review during normal working hours. An archived copy of this SPCC Plan is kept at the NSA HR PWD Environmental Department at Building NH-34, NSA HR Headquarters, Norfolk, VA.

1.6 SPCC Plan Review [40 CFR 112.5(b)]

§112.5(b) Notwithstanding compliance with paragraph (a) of this section, complete a review and evaluation of the SPCC Plan at least once every five years from the date your facility becomes subject to this part; or, if your facility was in operation on or before August 16, 2002, five years from the date your last review was required under this part. As a result of this review and evaluation, you must amend your SPCC Plan within six months of the review to include more effective prevention and control technology if the technology has been field-proven at the time of the review and will significantly reduce the likelihood of a discharge as described in §112.1(b) from the facility. You must implement any amendment as soon as possible, but not later than six months following preparation of any amendment. You must document your completion of the review and evaluation, and must sign a statement as to whether you will amend the Plan, either at the beginning or end of the Plan or in a log or an appendix to the Plan. The following words will suffice, "I have completed review and evaluation of the SPCC Plan for (name of facility) on (date), and will (will not) amend the Plan as a result."

The NSA HR IEPD, in conjunction with the NSA HR PWD Environmental Department is responsible for initiating and coordinating comprehensive reviews of the SPCC Plan at least once every five years. The NSA HR PWD Environmental Department will amend this SPCC Plan within six months of the review and will implement the amended SPCC Plan within six months of the amendment to include more effective prevention and control technology if such technology will significantly reduce the likelihood of a spill event and if such technology has been field proven at the time of the review. Such updates are considered technical amendments and must be certified by a PE. Reviews and amendments of the SPCC Plan will be documented in the Record of Review and Amendments located on page xv of this SPCC Plan.

1.7 Amendments of SPCC Plans [40 CFR 112.5(a)]

§112.5(a) Amend the SPCC Plan for your facility in accordance with the general requirements in §112.7, and with any specific section of this part applicable to your facility, when there is a change in the facility design, construction, operation, or maintenance that materially affects its potential for a discharge as described in §112.1(b). Examples of changes that may require amendment of the Plan include, but are not limited to: commissioning or decommissioning containers; replacement, reconstruction, or movement of containers; reconstruction, replacement, or installation of piping systems; construction or demolition that might alter secondary containment structures; changes of product or service; or revision of standard operation or maintenance procedures at a facility. An amendment made under this section must be prepared within six months, and implemented as soon as possible, but not later than six months following preparation of the amendment.

In accordance with §112.5(a), the SPCC Plan will be amended and recorded in the Record of Review and Amendments whenever there is any change in the facility design, construction, operation, or maintenance that materially affects the facility's potential for an oil discharge, including, but not limited to:

- Commissioning or decommissioning containers
- Replacement, reconstruction, or movement of containers
- Reconstruction, replacement, or installation of piping systems
- Construction or demolition that might alter secondary containment structures
- Changes of product or service
- Revision of standard operation, inspection, or maintenance procedures

Amendments to this SPCC Plan made to address changes of this nature are considered technical amendments and will be certified by a PE. Non-technical amendments can be made by the NSA HR Headquarters IEPD or his/her designee and include changes to contact information and other changes to this SPCC Plan that do not affect the potential for an oil discharge. All amendments, whether technical or non-technical, will be recorded in the Record

of Review and Amendments page of this SPCC Plan. All copies of the SPCC Plan will be updated when the SPCC Plan is amended.

Deficiencies and recommended corrective actions noted during preparation of this SPCC Plan are listed in Appendix B. When deficiencies are corrected in accordance with the recommended actions in Appendix B, the Deficiency List will be noted with a date and signature to document completion of the corrective action. Such updates are not considered technical in nature and should be recorded in the Record of Review and Amendments page of this SPCC Plan as administrative updates.

1.8 Management Approval [40 CFR 112.7]

Management Approval acknowledgement is located on page vii of the SPCC Plan.

1.9 Cross-Reference with SPCC Provisions [40 CFR 112.7]

§112.7 If you do not follow the sequence specified in this section for the Plan, you must prepare an equivalent Plan acceptable to the Regional Administrator that meets all of the applicable requirements listed in this part, and you must supplement it with a section cross-referencing the location of requirements listed in this part and the equivalent requirements in the other prevention plan.

This SPCC Plan does not follow the exact order presented in the SPCC Rule. Table 1 presents a cross-reference of plan sections relative to applicable parts of the SPCC Rule. Section headings identify, where appropriate, the relevant section(s) of the SPCC Rule.

Table 1: Regulation Cross-Reference

40 CFR 112	Regulatory Requirement Description	Location
112.3(d)	Professional Engineer Certification	Section 1.4
112.3(e)	Location of SPCC Plan	Section 1.5

2.0 GENERAL FACILITY INFORMATION

Facility Name:	Naval Support Activity Hampton Roads Headquarters
Mailing Address:	NSA Hampton Roads Headquarters 7920 Blandy Road Norfolk, VA 23511-2419
Physical Location:	Naval Support Activity Hampton Roads Headquarters, Norfolk, VA
Type:	Fleet Headquarters Administrative and Communication Facilities
Owner:	Commander, Navy Region Mid-Atlantic
Operator:	Naval Support Activity Hampton Roads Public Works Department 7920 Blandy Road Norfolk, VA 23511-2419
Primary contact:	Ms. Linda Hicks Installation Environmental Program Director NSA Hampton Roads Headquarters 7920 Blandy Road Norfolk, VA 23511-2419 Office Phone: (757) 836-1862 linda.hicks1@navy.mil

2.1 Facility Description [40 CFR 112.7(a)(3)]

2.1.1 Location and Activities

§112.7(a)(3) Describe in your Plan the physical layout of the facility and include a facility diagram, which must mark the location and contents of each fixed oil storage container and the storage area where mobile or portable containers are located. The facility diagram must identify the location of and mark as "exempt" underground tanks that are otherwise exempted from the requirements of this part under §112.1(d)(4). The facility diagram must also include all transfer stations and connecting pipes, including intra-facility gathering lines that are otherwise exempted from the requirements of this part under §112.1(d)(11). You must also address in your Plan:

(i) The type of oil in each fixed container and its storage capacity. For mobile or portable containers, either provide the type of oil and storage capacity for each container or provide an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities;

NSA HR Headquarters has the largest concentration of fleet headquarters administrative and communication facilities outside of Washington, D.C. It is home to more than 6,000 personnel that includes major tenant commands: U.S. Fleet Forces Command, Joint Staff Hampton Roads and Joint Forces Staff College, U.S. Marine Corps Forces Command, Naval Submarine Forces,

Atlantic, and Naval Reserve Forces Command. It occupies approximately 780 acres located off Terminal Boulevard and Hampton Boulevard in Norfolk, Virginia. Also included in this SPCC Plan are the Navy Lodge, Fire Fighters School, and Storage Depot Area (SDA) on the west side of Hampton Boulevard (89 acres) and the Lafayette River Annex, which occupies 19 acres on the south bank of the Lafayette River off Hampton Boulevard. Facility boundaries for these noncontiguous areas are shown in Figure 3.

The operator has determined the extents of the Facility's boundary as defined in the SPCC Rule based on the ownership and operation of equipment at NSA HR Headquarters. Buildings with ASTs are identified on the map in Figure 1, and buildings with SPCC assets other than ASTs are identified on the map in Figure 2. NSA HR also operates other activities in the region that require SPCC plans. These include NSA Northwest River Annex and NSA Hampton Roads, Portsmouth Annex. Dedicated SPCC plans have been prepared for these activities, and assets associated with those plans are not included in this document.

Individual facility diagrams are contained in Section 5. Site-specific tank information, such as oil storage container details, contents, capacity, discharge prevention measures, potential release scenarios and appropriate secondary containment assessments, and discharge controls, can be found in Section 5.2.1. Similar details concerning drum storage areas, portable container storage areas, and oil-filled operational equipment (OFOE) are found in Section 5.2.2, Section 5.2.3, and Section 5.2.4, respectively. Spill response procedures, disposal, and contact lists can be found in Section 6.

Oil-containing equipment at NSA HR Headquarters not included in this SPCC Plan is limited to OFOE within the facility boundaries associated with the electrical utility/distribution system that is not under Navy ownership or control. These assets are owned and managed by Dominion Power and are therefore not included in this SPCC Plan.

2.1.2 Facilities, Procedures, Methods, or Equipment Not Yet Fully Operational [40 CFR 112.7]

§112.7 . . . If the Plan calls for additional facilities or procedures, methods, or equipment not yet fully operational, you must discuss these items in separate paragraphs, and must explain separately the details of installation and operational start-up.

The oil storage containers and operations included in this SPCC Plan are fully operational.

As discussed in Section 4.8.1, this SPCC Plan will be amended to incorporate new updated monthly inspection forms based on Steel Tank Institute (STI) SP001 (current edition). The current monthly inspection forms require updating in Naval Facilities Engineering Command (NAVFAC) Mid-Atlantic (MIDLANT) regional procedures to fully incorporate content to STI SP001 6th edition content.

Figure 3. Facility Boundaries of NSA HR Headquarters

3.0 GENERAL REQUIREMENTS FOR SPCC PLANS

The following measures are implemented to prevent oil discharges during the handling, use, or transfer of oil products at NSA HR Headquarters.

3.1 Conformance with Requirements [40 CFR 112.7(a)(1)]

§112.7(a)(1) Include a discussion of your facility's conformance with the requirements listed in this part.

ASTs, and underground storage tanks (USTs) subject to the SPCC Rule. Portable containers, OFOE, and all associated management processes included in this SPCC Plan conform to the requirements of the SPCC Rule except as noted in the Deficiency List in Appendix B. There are no field-erected ASTs covered by this SPCC Plan; therefore, portions of the SPCC Rule specific to field-erected ASTs will not be discussed.

3.2 Environmental Equivalence [40 CFR 112.7(a)(2)]

§112.7(a)(2) Comply with all applicable requirements listed in this part. Except as provided in §112.6, your Plan may deviate from the requirements in paragraphs (g), (h)(2) and (3), and (i) of this section and the requirements in subparts B and C of this part, except the secondary containment requirements in paragraphs (c) and (h)(1) of this section, and §§112.8(c)(2), 112.8(c)(11), 112.9(c)(2), 112.9(d)(3), 112.10(c), 112.12(c)(2), and 112.12(c)(11), where applicable to a specific facility, if you provide equivalent environmental protection by some other means of spill prevention, control, or countermeasure. Where your Plan does not conform to the applicable requirements in paragraphs (g), (h)(2) and (3), and (i) of this section, or the requirements of subparts B and C of this part, except the secondary containment requirements in paragraph (c) and (h)(1) of this section, and §§112.8(c)(2), 112.8(c)(11), 112.9(c)(2), 112.10(c), 112.12(c)(2), and 112.12(c)(11), you must state the reasons for nonconformance in your Plan and describe in detail alternate methods and how you will achieve equivalent environmental protection. If the Regional Administrator determines that the measures described in your Plan do not provide equivalent environmental protection, he may require that you amend your Plan, following the procedures in §112.4(d) and (e).

Except as discussed in this section, this SPCC Plan does not deviate from requirements in §112. For instances where this SPCC Plan deviates from requirements in §112, this section includes the reason for nonconformance and a description of the environmentally equivalent alternative. Per the SPCC Guidance for Regional Inspectors (GRI), EPA (2013 edition) (p. 3-1), "environmental equivalence need not be a mathematical equivalence, but it must achieve the same desired outcome, though not necessarily through the same mode of operation (see 67 Federal Register [FR] 47095, July 17, 2002)."

3.2.1 Preventing Physical Damage to Aboveground Piping

Reason for Nonconformance
After considering facility layout and EPA guidance, the PE certifying this SPCC Plan is deviating from the requirement in §112.8(d)(5) to warn all vehicles entering the facility to be sure that no vehicle will endanger aboveground piping or other oil transfer operations. Physical damage to aboveground piping and other equipment may be protected from the possibility of a collision by installing fencing, barriers, curbing, or other physical obstacles.

Environmentally Equivalent Alternative
The primary protection for aboveground piping connected to bulk storage containers against vehicular collision is by routing piping runs away from traffic. In those cases where tank and/or pipe systems are located in areas susceptible to damage from vehicles, protective measures are in place such as fencing, barriers, or curbing. This approach provides superior

environmental protection as compared to verbal or written warnings to drivers by physically preventing vehicular damage to piping systems. Any sites with inadequate protection are included in the Deficiency List in Appendix B.

3.3 Spill Reporting [40 CFR 112.7(a)]

3.3.1 Contact List [40 CFR 112.7(a)(3)(vi)]

§112.7(a)(3)(vi) You must also address in your Plan: Contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with whom you have an agreement for response, and all appropriate Federal, State, and local agencies who must be contacted in case of a discharge as described in §112.1(b).

The contact list and phone numbers for the Facility Response Coordinator; National Response Center (NRC); cleanup contractors with whom the Facility has an agreement for response; and all appropriate federal, state, and local agencies who must be contacted in case of a discharge as described in §112.1(b) are provided in Section 6.0.

3.3.2 Discharge Notification and Response Procedures [40 CFR 112.7(a)(4) & 112.7(a)(5)]

§112.7(a)(4) Unless you have submitted a response plan under §112.20, provide information and procedures in your Plan to enable a person reporting a discharge as described in §112.1(b) to relate information on the exact address or location and phone number of the facility; the date and time of the discharge, the type of material discharged; estimates of the total quantity discharged; estimates of the quantity discharged as described in §112.1(b); the source of the discharge; a description of all affected media; the cause of the discharge; any damages or injuries caused by the discharge; actions being used to stop, remove, and mitigate the effects of the discharge; whether an evacuation may be needed; and, the names of individuals and/or organizations who have also been contacted.

§112.7(a)(5) Unless you have submitted a response plan under §112.20, organize portions of the Plan describing procedures you will use when a discharge occurs in a way that will make them readily usable in an emergency, and include appropriate supporting material as appendices.

Refer to Section 6.0 for spill notification procedures and emergency contacts.

3.4 Predicted Direction, Rate of Flow, and Total Quantity of Oil Discharged as a Result of Equipment Failure [40 CFR 112.7(b)]

§112.7(b) Where experience indicates a reasonable potential for equipment failure (such as loading or unloading equipment, tank overflow, rupture, or leakage, or any other equipment known to be a source of a discharge), include in your Plan a prediction of the direction, rate of flow, and total quantity of oil which could be discharged from the facility as a result of each type of major equipment failure.

Experience indicates a reasonable potential for equipment failure (such as loading or unloading equipment, tank overflow, rupture, or leakage, or any other equipment known to be a source of a discharge) for all bulk storage containers included in this SPCC Plan. Therefore, for each container site included in this SPCC Plan, a prediction of the direction, rate of flow, and total quantity of oil that could be discharged as a result of each type of major equipment failure is included as a companion document. A separate companion document has been prepared for each site. Appendix D is a list of general assumptions and calculations used to develop the numerical data presented in the companion document.

Site-specific compliance summary sheets and site maps for individual oil container sites in Section 5 depict flow direction and likely fate in the event of a release.

3.5 Secondary Containment to Address Typical Failure Modes [40 CFR 112.7(c)]

§112.7(c) Provide appropriate containment and/or diversionary structures or equipment to prevent a discharge as described in §112.1(b), except as provided in paragraph (k) of this section for qualified oil-filled operational equipment, and except as provided in §112.9(d)(3) for flowlines and intra-facility gathering lines at an oil production facility. The entire containment system, including walls and floor, must be capable of containing oil and must be constructed so that any discharge from a primary containment system, such as a tank, will not escape the containment system before cleanup occurs. In determining the method, design, and capacity for secondary containment, you need only to address the typical failure mode, and the most likely quantity of oil that would be discharged. Secondary containment may be either active or passive in design. At a minimum, you must use one of the following prevention systems or its equivalent:

(1) For onshore facilities:
(i) Dikes, berms, or retaining walls sufficiently impervious to contain oil;
(ii) Curbing or drip pans;
(iii) Sumps and collection systems;
(iv) Culverting, gutters, or other drainage systems;
(v) Weirs, booms, or other barriers;
(vi) Spill diversion ponds;
(vii) Retention ponds; or
(viii) Sorbent materials.

3.5.1 Bulk Storage Containers

Methods of passive and active secondary containment intended to comply with the provisions of §112.7(c) for containers included in this SPCC Plan include a combination of structures that serve as passive methods of containment (e.g., dike, spill pallet, or built-in secondary containment) and active spill response methods (e.g., drain cover, oil-dry or kitty litter sorbent) to prevent the most likely quantity of oil discharged during a typical failure mode from reaching navigable waters and adjoining shorelines. Typical failure modes, the most likely quantities of oil that would be discharged during typical failure modes, and any active or passive methods of secondary containment are presented on individual data sheets for each tank site in Section 5.2.1.

3.5.2 Drum Storage Areas

Methods of secondary containment intended to comply with the provisions of §112.7(c) for drum storage areas are presented in Section 5.2.2. The active or passive methods of secondary containment, typical failure modes, and most likely quantities of oil that would be discharged during typical failure modes are presented on individual data sheets for each portable container storage area in Section 5.2.2.

3.5.3 Portable Container Storage Areas

Methods of secondary containment intended to comply with the provisions of §112.7(c) for portable container storage areas are presented in Section 5.2.3. The active or passive methods of secondary containment, typical failure modes, and most likely quantities of oil that would be discharged during typical failure modes are presented on individual data sheets for each portable container storage area in Section 5.2.3.

3.5.4 Mobile Refuelers and Other Non-Transportation Related Tankers

NSA HR Headquarters does not operate mobile refuelers or other non-transportation related tankers per §112.8(c)(2).

3.5.5 Oil-Filled Operational Equipment

OFOE is equipment that includes an oil storage container in which the oil is present solely to support the function of the apparatus or device. OFOE at NSA HR Headquarters includes electrical transformers, oil circuit breakers, oil switches, and hydraulic elevators.

OFOE inventory is shown in Section 5.1. OFOE strategy for secondary containment is discussed in Section 5.2.4, and the OFOE inspection procedure is in Appendix H.

3.6 Practicability of Secondary Containment [40 CFR 112.7(d)]

§112.7(d) Provided your Plan is certified by a licensed Professional Engineer under §112.3(d), or, in the case of a qualified facility that meets the criteria in §112.3(g), the relevant sections of your Plan are certified by a licensed Professional Engineer under §112.6(d), if you determine that the installation of any of the structures or pieces of equipment listed in paragraphs (c) and (h)(1) of this section, and §§112.8(c)(2), 112.8(c)(11), 112.9(c)(2), 112.10(c), 112.12(c)(2), and 112.12(c)(11) to prevent a discharge as described in §112.1(b) from any onshore or offshore facility is not practicable, you must clearly explain in your Plan why such measures are not practicable; for bulk storage containers, conduct both periodic integrity testing of the containers and periodic integrity and leak testing of the valves and piping; and, unless you have submitted a response plan under §112.20, provide in your Plan the following:

(1) An oil spill contingency plan following the provisions of part 109 of this chapter.

(2) A written commitment of manpower, equipment, and materials required to expeditiously control and remove any quantity of oil discharged that may be harmful.

Secondary containment has been deemed practicable at all locations at NSA HR Headquarters. All containers with inadequate containment are included in the Appendix B Deficiency List.

3.7 Inspections, Tests, and Records [40 CFR 112.7(e)]

§112.7(e) Inspections, tests, and records. Conduct inspections and tests required by this part in accordance with written procedures that you or the certifying engineer develop for the facility. You must keep these written procedures and a record of the inspections and tests, signed by the appropriate supervisor or inspector, with the SPCC Plan for a period of three years. Records of inspections and tests kept under usual and customary business practices will suffice for purposes of this paragraph.

Inspections and tests of each bulk storage container are mandated in §112.8(c)(6) and described in Section 4.8 of this SPCC Plan. Monthly inspections are performed for each AST by the tank operator. Although §112.7(e) mandates keeping records for three years, state requirements found in 9VAC25-91-150 are more stringent and require records be kept for five years. Consequently, tank inspection records for tanks greater than or equal to 55 gallons will be maintained in accordance with the instructions written on the applicable inspection checklist (See Appendix C for the forms).

All other tank and training records will be maintained by the Tank Program Manager at the NSA HR PWD Environmental Department. All shell thickness testing and certified inspection reports, including formal external inspection reports, will be retained for the life of the container.

3.8 Oil-Handling Personnel Training [40 CFR 112.7(f)]

In accordance with §112.7(f), all oil-handling personnel receive initial SPCC training and annual Discharge Prevention Briefings. Oil-handling personnel include emergency response personnel, personnel that conduct AST inspections, and personnel engaged in operation and maintenance of oil storage containers and associated equipment. The term does not include administrative assistants, clerks, and other personnel who are never involved in operation or maintenance activities related to oil storage or equipment, oil transfer operations, emergency response, countermeasure functions, or similar activities.

Training requirements for oil-handling personnel are outlined in Section 3.8.1 and Section 3.8.2 of this SPCC Plan. Initial SPCC Training (3.8.1) and Annual Discharge Prevention Briefings (3.8.2) are required for all oil-handling personnel. AST Inspector Training is required for all personnel who conduct daily, weekly, monthly, and/or quarterly periodic visual AST Inspections. The primary means for delivering this training is through the use of the Navy's online environmental training system, *Environmental Compliance and Assessment Training and Tracking System* (ECATTS). ECATTS is available at: https://environmentaltraining.ecatts.com/. Classroom and/or on-site training may also be provided by environmental personnel as needed.

Oil-handling personnel training will be recorded and maintained in accordance with Section 3.7.

3.8.1 Initial Training [40 CFR 112.7(f)(1)]

§112.7(f)(1) Personnel, training, and discharge prevention procedures. (1) At a minimum, train your oil-handling personnel in the operation and maintenance of equipment to prevent discharges; discharge procedure protocols; applicable pollution control laws, rules, and regulations; general facility operations; and, the contents of the facility SPCC Plan.

In accordance with §112.7(f)(1), all oil-handling personnel will receive initial SPCC training at least once. At a minimum, the initial SPCC training includes:

- Operation and maintenance of equipment to prevent discharges
- Discharge procedure protocols
- Applicable pollution control laws, rules, and regulations
- General facility operations (Including Fuel Transfer Standard Operating Procedures listed in Appendix E)
- Contents of the NSA HR Headquarters SPCC Plan

3.8.2 Annual Discharge Prevention Briefings [40 CFR 112.7(f)(3)]

§112.7(f)(3) Schedule and conduct discharge prevention briefings for your oil-handling personnel at least once a year to assure adequate understanding of the SPCC Plan for that facility. Such briefings must highlight and describe known discharges as described in §112.1(b) or failures, malfunctioning components, and any recently developed precautionary measures.

In accordance with §112.7(f)(3), oil-handling personnel will receive discharge prevention briefings at least once a year to assure adequate understanding of the SPCC Plan, including any amendments. At a minimum, the discharge prevention briefing subject matter will include:

- Known discharges as described in §112.1(b)
- Known failures or malfunctioning components
- Recently developed spill prevention precautionary measures

3.9 Security [40 CFR 112.7(g)]

§112.7(g) Security (excluding oil production facilities). Describe in your Plan how you secure and control access to the oil handling, processing and storage areas; secure master flow and drain valves; prevent unauthorized access to starter controls on oil pumps; secure out-of-service and loading/unloading connections of oil pipelines; and address the appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.

In December 2008, EPA amended the facility security requirements to be more performance-based (73 FR 74236, December 5, 2008). As stated on page 3-19 of GRI 2013, "a facility owner may achieve the rule's security objectives by providing a description of the security measures and how they are implemented at the facility. This description may include a discussion of how measures employed by the facility help deter vandals and prevent unauthorized access to containers and equipment that could be involved in an oil discharge."

As stated on page 3-20 of GRI 2013, "SPCC Plans must describe how the facility owner addresses the appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges." As stated on page 3-20 of GRI 2013, "No discussion of an environmentally equivalent alternative to security lighting is necessary because the rule does not specifically require lighting. Instead, the facility owner describes in the SPCC Plan how they prevent vandalism and discover oil discharges and whether security lighting is appropriate."

NSA HR Headquarters is a secure military facility with restricted access. The majority of the facility is fenced, and security personnel are present at the facility 24 hours per day, 365 days per year. Most of the facility has controlled access through manned security gates. Entrance to the facility is only accessible to personnel who have been cleared by Base Security. Emergency generators and other oil-filled equipment outside of fenced areas are kept locked.

A roving security patrol makes periodic rounds to check designated locations around NSA HR Headquarters. Security personnel are trained to make appropriate notifications to the Emergency Dispatch, Fire Department, and the Environmental Department in the event of an actual or suspected discharge of oil or hazardous materials at NSA HR Headquarters.

All drain valves or drains for double-wall oil storage containers are either locked in the closed position or sealed with a threaded plug to prevent unauthorized opening.

The aforementioned security fencing and guarded entrances are sufficient to deter vandalism. Therefore, security lighting at all oil storage locations is appropriate (regardless of lighting conditions) because lighting is not required to deter vandalism and portable lights are available for facility personnel to use to discover discharges.

3.10 Tank Truck Loading/Unloading Racks [40 CFR 112.7(h)]

§112.7(h) Facility tank car and tank truck loading/unloading rack (excluding offshore facilities).

(1) Where loading/unloading rack drainage does not flow into a catchment basin or treatment facility designed to handle discharges, use a quick drainage system for tank car or tank truck loading/unloading racks. You must design any containment system to hold at least the maximum capacity of any single compartment of a tank car or tank truck loaded or unloaded at the facility.

(2) Provide an interlocked warning light or physical barrier system, warning signs, wheel chocks or vehicle brake interlock system in the area adjacent to a loading/unloading rack, to prevent vehicles from departing before complete disconnection of flexible or fixed oil transfer lines.

(3) Prior to filling and departure of any tank car or tank truck, closely inspect for discharges the lowermost drain and all outlets of such vehicles, and if necessary, ensure that they are tightened, adjusted, or replaced to prevent liquid discharge while in transit.

The fuel transfer areas associated with the containers included in this SPCC Plan are not equipped with loading arms and do not meet the definition of loading or unloading racks contained in §112.2. Therefore, §112.7(h) is not applicable at NSA HR Headquarters.

3.11 Brittle Fracture Evaluation [40 CFR 112.7(i)]

§112.7(i) If a field-constructed aboveground container undergoes a repair, alteration, reconstruction, or a change in service that might affect the risk of a discharge or failure due to brittle fracture or other catastrophe, or has discharged oil or failed due to brittle fracture failure or other catastrophe, evaluate the container for risk of discharge or failure due to brittle fracture or other catastrophe, and as necessary, take appropriate action.

There are no field-erected ASTs at NSA HR Headquarters. The brittle fracture evaluation is therefore not applicable.

3.12 Conformance with State and Local Applicable Requirements [40 CFR 112.7(j)]

§112.7(j) In addition to the minimal prevention standards listed under this section, include in your Plan a complete discussion of conformance with the applicable requirements and other effective discharge prevention and containment procedures listed in this part or any applicable more stringent State rules, regulations, and guidelines.

In addition to federal requirements, ASTs having a capacity of greater than 660 gallons of oil (with some exclusions) are regulated by VAC regulations, administered by the Virginia DEQ. Refer to the Virginia *Facility and Aboveground Storage Tank Regulation* (9VAC25-91), with changes effective 1 November 2015.

According to 9VAC25-91-30, the VAC requirements do not apply to ASTs with a storage capacity less than or equal to 660 gallons of oil, to non-petroleum hydrocarbon-based animal and vegetable oils, to oil-filled electrical equipment, to oil water separators, or to fuel tanks affixed into the frames of emergency generators. Only three oil tanks at NSA HR Headquarters are subject to any of the VAC requirements. Each of these tanks has a capacity of 1,000 gallons. One tank (NSA HQ-CA501-AST-01) contains gasoline, and the other two tanks (NSA HQ-NH94-AST-10 and NSA HQ-NH94-AST-11) contain used oil. The aggregate volume of these three tanks is 3,000 gallons.

Because the aggregate volume of 3,000 gallons is less than 25,000 gallons, only Part II (9VAC25-91) applies to the three tanks. Part II requires registration of the tanks with the Virginia DEQ and with the director or coordinator of emergency services. Notification to the Virginia DEQ is required for tank upgrades, major repairs, replacements, or changes in service. Specific closure requirements also apply to these tanks under Part II.

ODCP requirements under 9VAC25-91-170 only apply to facilities located within the Commonwealth of Virginia with an aggregate aboveground storage capacity of 25,000 gallons or greater of oil. ODCP requirements do not apply to the operations at NSA HR Headquarters.

Oil storage tanks must be installed and operated in accordance with the provisions of applicable National Fire Protection Association (NFPA) standards. Several NFPA standards are applicable for NSA HR Headquarters. NFPA 20 provides requirements for fire pump tanks. NFPA 30 provides requirements for storage of flammable and combustible liquids. NFPA 30A provides
