APPENDIX A-1: GEORGIA ARCHAEOLOGICAL SITE FORMS

GEORGIA ARCHAEOLOGICAL SITE FORM

1990

Official Site Number: 9BE40

Institutional Site Number: _____ Site Name: Langdale Tar Kiln & Turpentine Still

County: Berrien Map Name: Nashville East USGS or USNOAA

Zone 17 UTM East: 286784 UTM North: 3455071

Owner: _____ Address: _____

Site Length: 65 meters Width: 30 meters Elevation: +- 72.8 meters

Orientation: 1. N-S 2. E-W 3. NE-SW 4. NW-SE 5. Round 6. Unknown

Kind of Investigation: 1. Survey 2. Testing 3. Excavation 4. Documentary
5. Hearsay 6. Unknown 7. Amateur

Standing Architecture: 1. Present 2. Absent

Site Nature: 1. Plowzone 2. Subsurface 3. Both 4. Only Surface Known
5. Unknown 6. Underwater

Midden: 1. Present 2. Absent 3. Unknown Features: 1. Present 2. Absent 3. Unknown

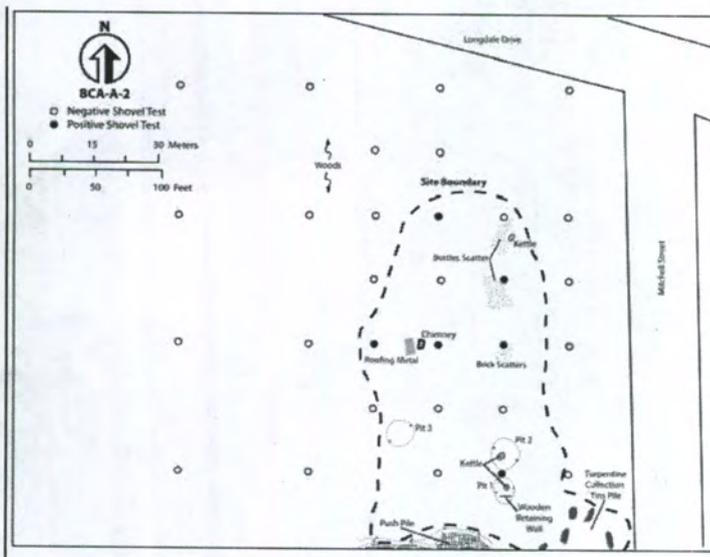

Percent Disturbance: 1. None 2. Greater than 50 3. Less than 50 4. Unknown

Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): Tar Kiln and Turpentine Still

Topography (Ridge, Terrace, etc.): Low hilltop

Current Vegetation (Woods, Pasture, etc.): Deciduous saplings and underbrush

Additional information: The site consists of three tar kiln remnants and two turpentine still building remnants, including one standing brick chimney. Very few sites of this kind with good integrity have been recorded.

	ZONE	EASTING	NORTHING		ZONE	EASTING	NORTHING
C				D			

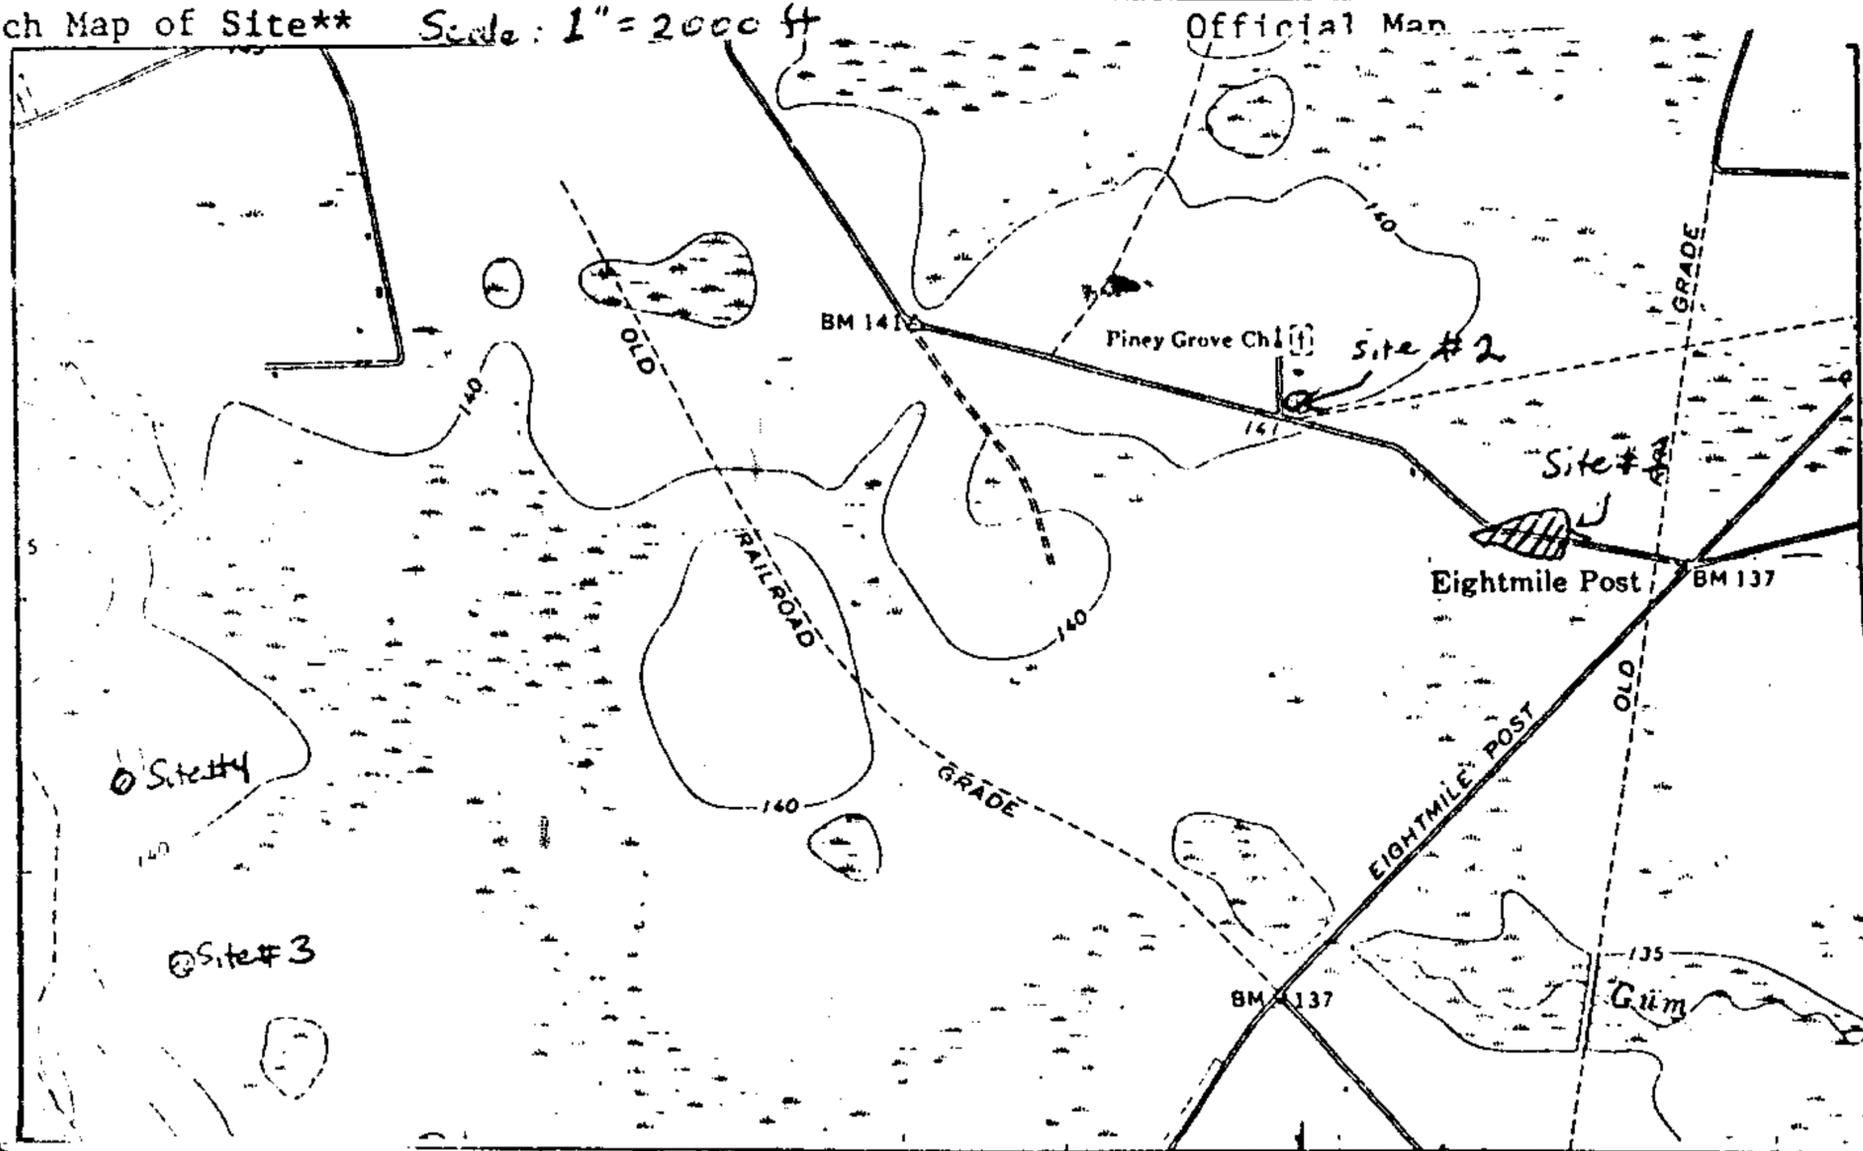

Owner Raynier Address _____
 Description (Acreage 1.5 a; Site Elevation, above sea level 140 ft; Soil Type[s]; Present Condition and Use; Intrusions; Topography; Vegetation; Erosion, Etc.) The site lies in and a gray sand. It consisted of the widely scattered remains of an 1899-1930 (approximate) railway stop associated with a turpentine mill. (These data were provided by a local informant who claims to have seen the mill and remembered it. He is 74 years old, and has lived near the project area all his life.) The site has been totally destroyed by pine planting; the site area is now mature and young pine. It has no potential for significant data recovery, and many intact sites from the same period still exist. No historical record could be found in a literature search, but the informant's story is consistent with the known history of the area.

Remarks and Recommendations No further study is recommended. The site has been totally destroyed by various impacts, especially pine planting.

Midden: 1. Present 2. Absent 3. Unknown Features: 1. Present 2. Absent 3. Unknown
Percent Disturbance: 1. None 2. Greater than 50 3. Less than 50 4. Unknown
Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): _____ House
Topography (Ridge, Terrace, etc.): _____ Upland flat
Current Vegetation (Woods, Pasture, etc.): _____ Floodplain

Additional Information: According to the 1920 soils map and 1940s photos there used to be two houses located in this area. The artifacts are numerous and widely scattered and appear to be the remains of the two houses. The remains have been extensively plowed and smeared together. Artifact types range from amethyst glass to plastic checkers so the houses must have been occupied for several decades.

GEORGIA ARCHAEOLOGICAL SITE FORM

1999

Official Site Number: 9CE657 (Revisit)

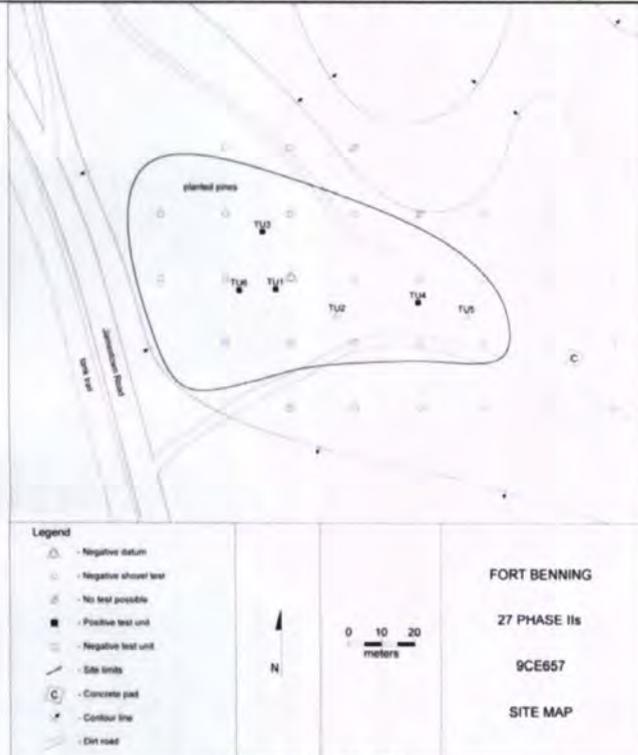

Official State Site No. 9CE657

Revisit

Institutional Site Number: _____ **Site Name:** _____
County: Chattahoochee **Map Name:** Cusseta USGS
UTM Zone: 16S **UTM East:** 702153 **UTM North:** 3579934
Owner: U.S. Army **Address:** Fort Benning, Georgia
Site Length: 125 meters **Width:** 70 meters **Elevation:** + - 111 meters
Orientation: 1.N-S 2.E-W 3.NE-SW 4.NW-SE 5.Round 6.Unknown
Kind of Investigation: 1.Survey 2.Testing 3.Excavation 4.Documentary
 5.Hearsay 6.Unknown 7.Amateur
Standing Architecture: 1.Present 2.Absent
Site Nature: 1.Plowzone 2.Subsurface 3.Both 4.Only Surface Known
 5.Unknown 6.Underwater
Midden: 1.Present 2.Absent 3.Unknown **Features:** 1.Present 2.Absent 3.Unknown
Percent Disturbance: 1.None 2. Greater than 50 3.Less than 50 4.Unknown
Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): Twentieth century artifact scatter
Topography (Ridge, Terrace, etc.): Upland ridge
Current Vegetation (Woods, Pasture, etc.): Planted pines

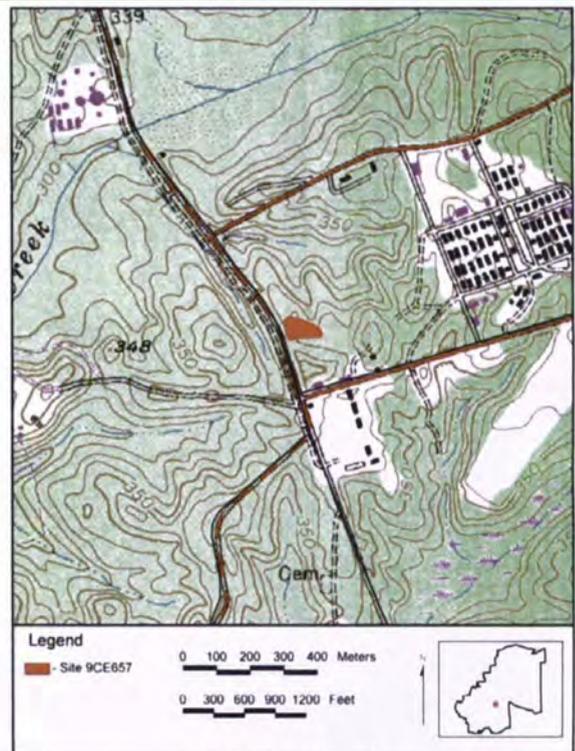

Additional Information:

Site 9CE657 represents a very light density twentieth century non-Indian artifact scatter. Site 9CE657 appears to have been selectively harvested and most of the mature pines noted in the original report are now gone. Visual and subsurface examinations showed the site to have been impacted by past logging events, road-related construction and maintenance, and military activities. As a result of severe erosion, there is little to no soil remaining on most parts of 9CE657. This site is effectively destroyed with little to no research potential remaining. Based on the quantity and the nature of the evidence recovered as well as the extent of damage and disturbance to the entire area, PCI recommends 9CE657 be considered ineligible for listing on the NRHP. As such, no additional archaeological research is warranted for this location.

GEORGIA ARCHAEOLOGICAL SITE FORM
 1994
 Official Site Number: 9CE657

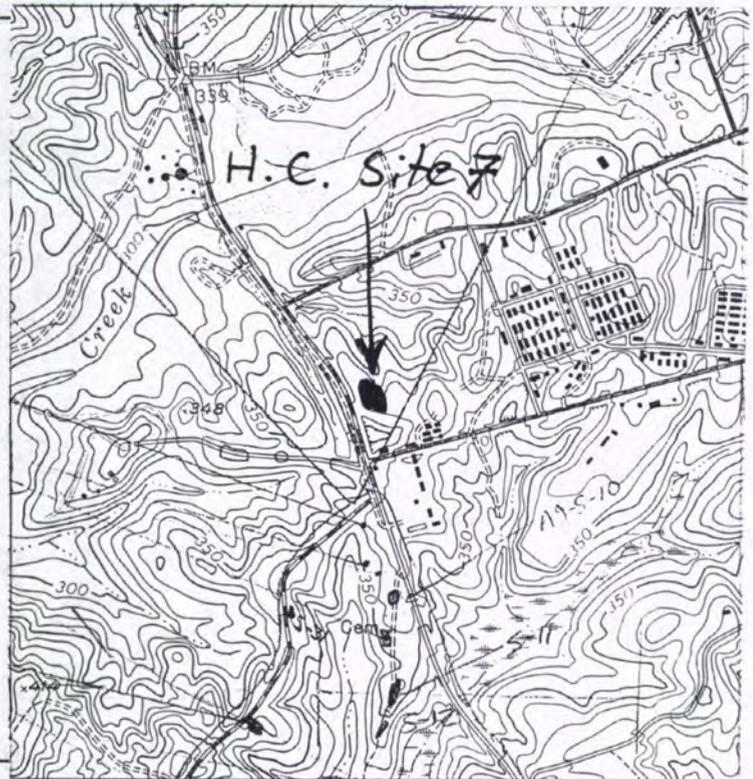

Institutional Site Number: HC-S-7 **Site Name:** _____
County: Chattahoochee **Map Name:** Cusseta, 7.5' **USGS or USNOAA**
UTM Zone: 16 **UTM East:** 702180 **UTM North:** 3579930
Owner: US Army **Address:** Ft. Benning
Site Length: 140 meters **Width:** 90 meters **Elevation:** + - 122 meters
Orientation: 1. N-S 2. E-W 3. NE-SW 4. NW-SE 5. Round 6. Unknown
Kind of Investigation: 1. Survey 2. Testing 3. Excavation 4. Documentary
 5. Hearsay 6. Unknown 7. Amateur
Standing Architecture: 1. Present 2. Absent
Site Nature: 1. Plowzone 2. Subsurface 3. Both 4. Only Surface Known
 5. Unknown 6. Underwater
Midden: 1. Present 2. Absent 3. Unknown **Features:** 1. Present 2. Absent 3. Unknown
Percent Disturbance: 1. None 2. Greater than 50 3. Less than 50 4. Unknown
Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): possible turpentine processing site or historic homesite
Topography (Ridge, Terrace, etc.): upland ridge top
Current Vegetation (Woods, Pasture, etc.): woods (pines)

Additional Information: This site has an abundance of turpentine rendering ceramic vessel sherds. Scars on some pine tree trunks may indicate turpentine gathering, but this is not certain. Other artifacts such as whiteware, stoneware, glass and brick may indicate a house site. The site is on a SE-NW oriented ridge top overlooking the Mill Creek drainage.

Midden: 1. Present 2. Absent 3. Unknown Features: 1. Present 2. Absent 3. Unknown
Percent Disturbance: 1. None 2. Greater than 50 3. Less than 50 4. Unknown
Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): Open habitation
and historic turpentine collection site.
Topography (Ridge, Terrace, etc.): terrace edge

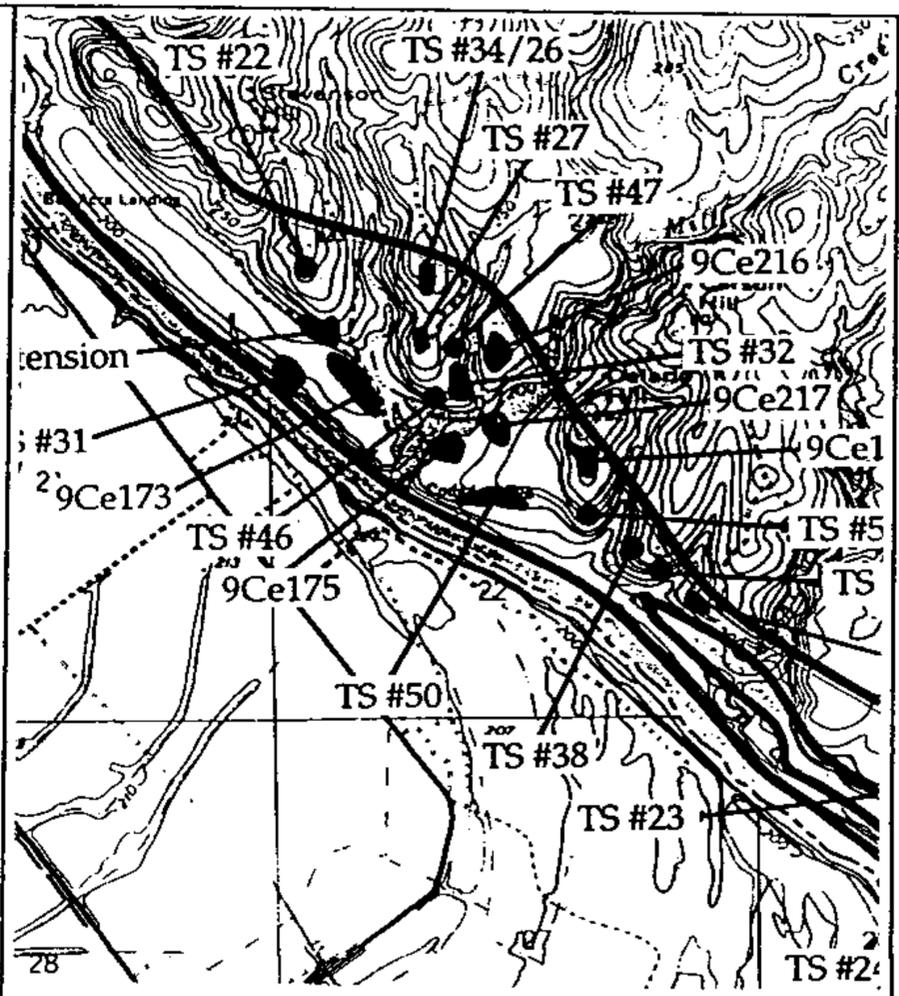

Current Vegetation (Woods, Pasture, etc.): mixed forest

Additional Information: A small site separated from site #32 by a low gully. Two shovel tests yielded decomposed red ochre, one shovel test produced a small steatite sherd and red ochre. This is a possible late archaic special function site. Some redware turpentine vessels are on the site's surface, a complete specimen was collected.

 Midden: 1. Present 2. Absent 3. Unknown Features: 1. Present 2. Absent 3. Unknown
 Percent Disturbance: 1. None 2. Greater than 50 3. Less than 50 4. Unknown
 Type of Site (Mill, Mound, Quarry, Lithic Scatter, etc.): prehistoric camp and modern isolate

Topography (Ridge, Terrace, etc.): ridge nose

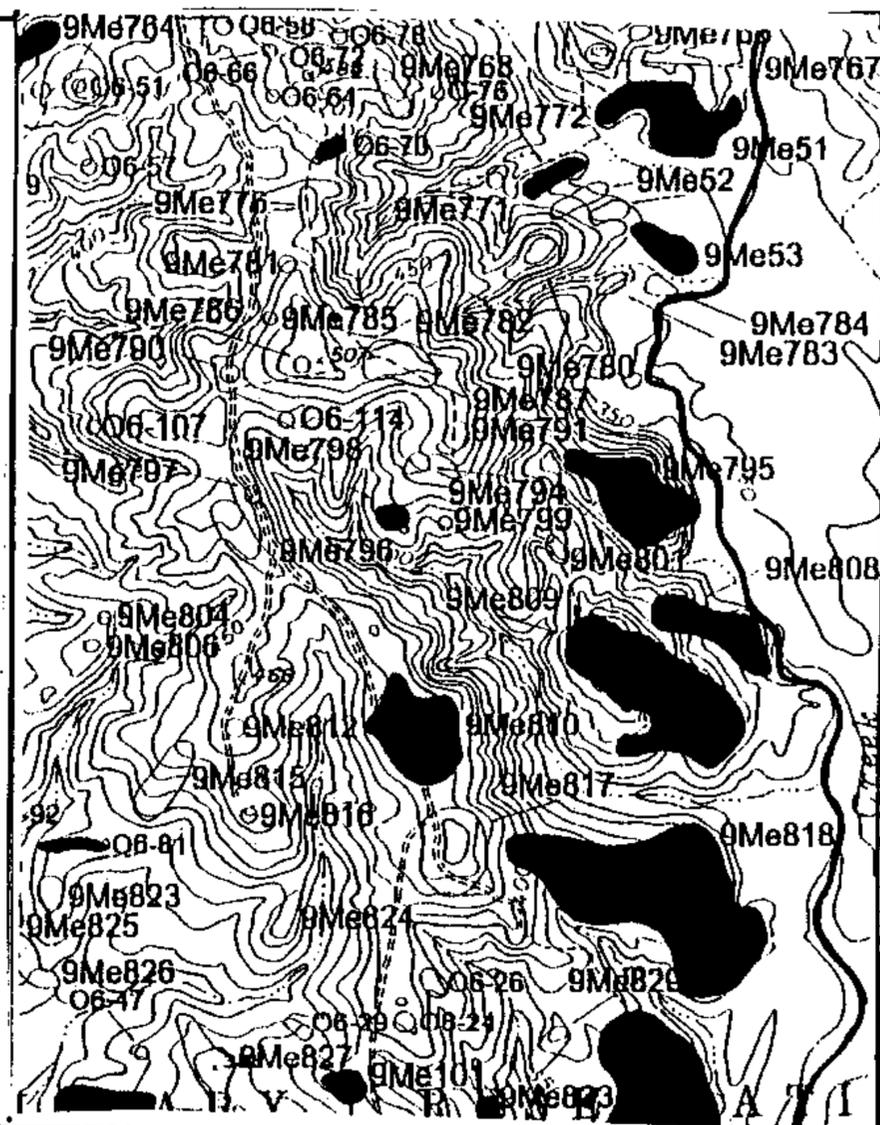

Current Vegetation (Woods, Pasture, etc.): dense hardwood and pine saplings and underbrush

Additional Information: This site consists of a moderate prehistoric camp and historic isolate on a ridge nose above the Randall Creek drainage. The site is deflated from cultivation. One artifact was recovered at 60 centimeters depth, but the remainder were in the plowzone.

Owner SCI Foundation Inc. Address P.O. Box 207 Z Midway, Ga. 31320
Description (Acreage _____; Site Elevation, above sea level 1.5m; Soil Type[s]; Present Condition and Use; Intrusions; Topography; Vegetation; Erosion, Etc.) _____

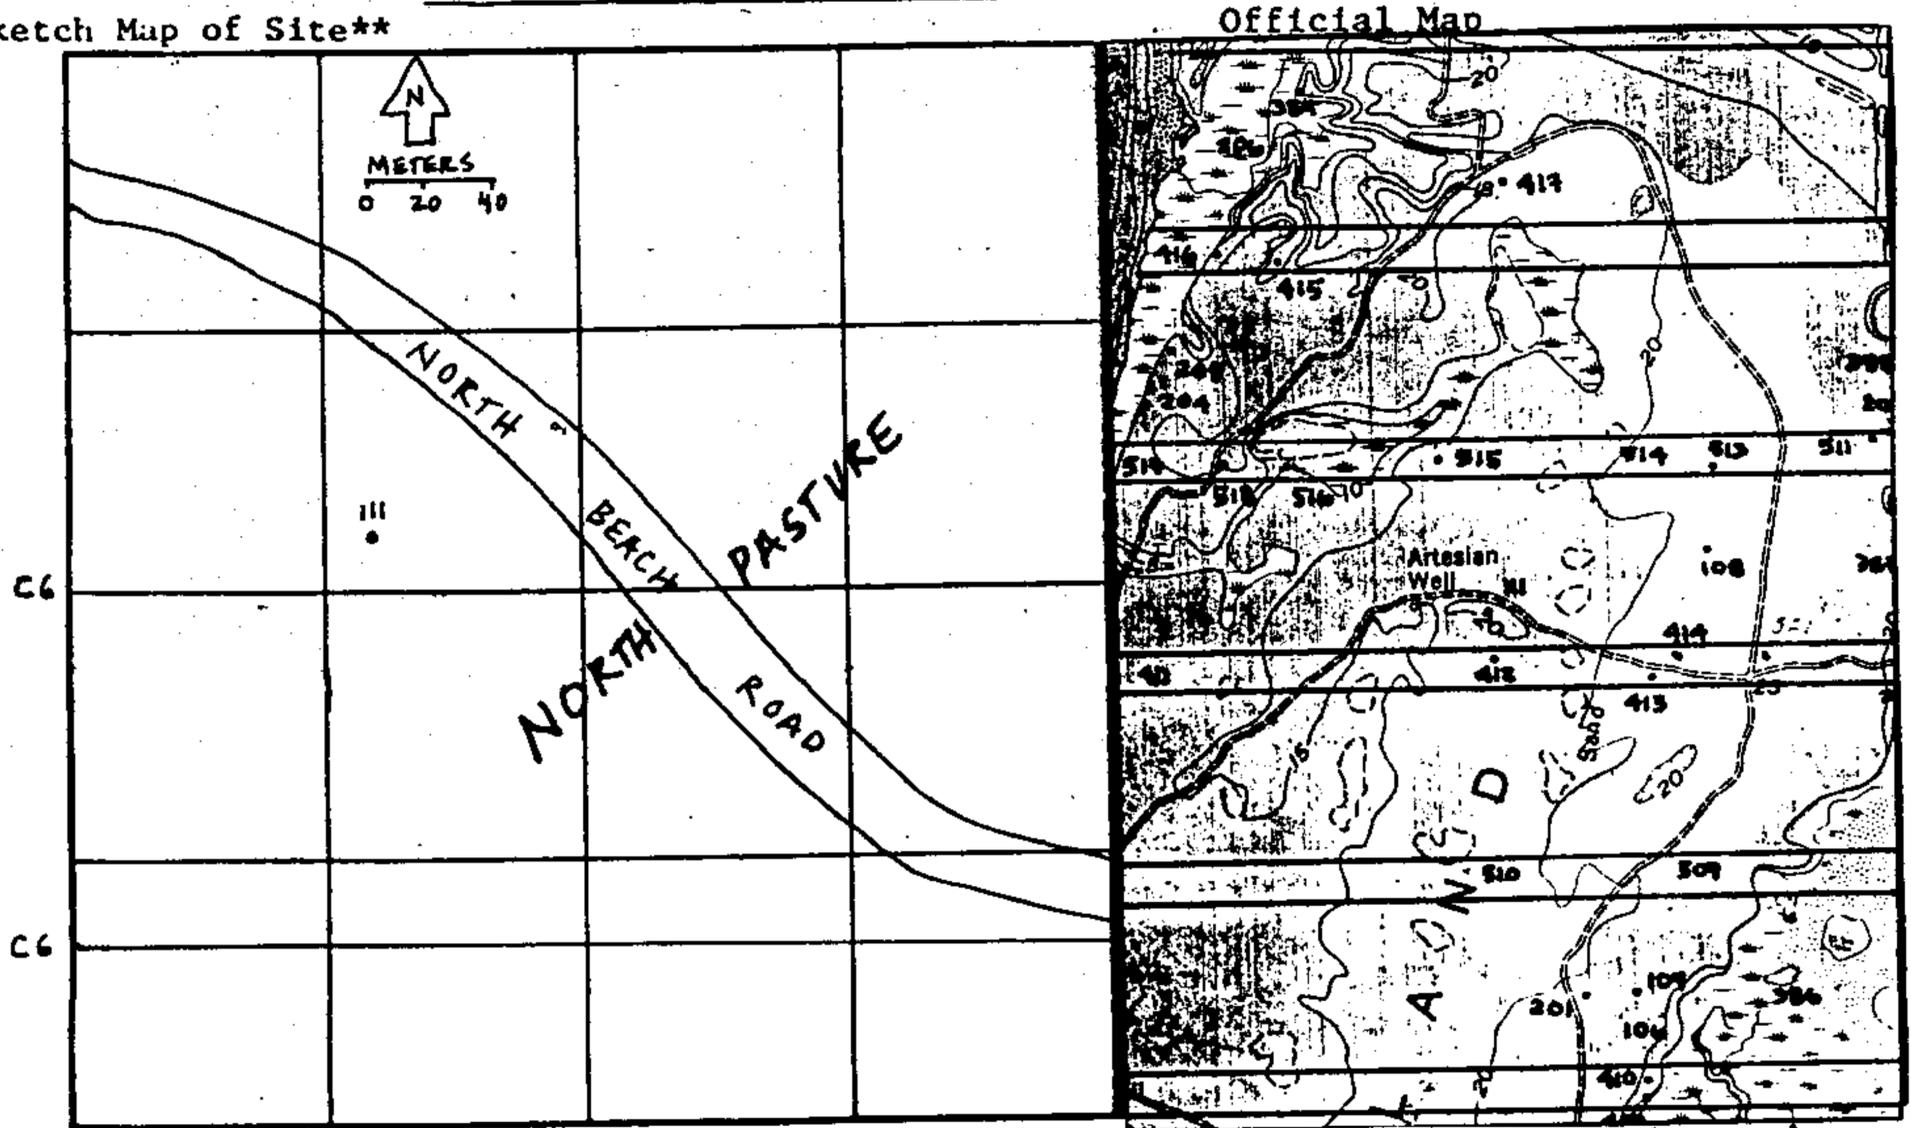

Soil: _____
Located just north of AMNH transect C-6, in the center of the island in North Pasture. It is approx. 50 m. southeast of North Beach Rd., and about 1 mile north of the main compound.
It was originally thought to be a burial mound but excavation proved it to be a modern feature. An undecayed wood "structure" was found collapsed inside of a pit. The only cultural material found were several metal fragments. It was discovered that this is the site of a relatively recent turpentine rendering station.
