Management of Companies and Enterprises.....	\$4.5B
Department of Defense	\$4.0B
Educational Services.....	\$2.7B
Agriculture.....	\$1.6B

Based on 2012 Bureau of Economic Analysis Data

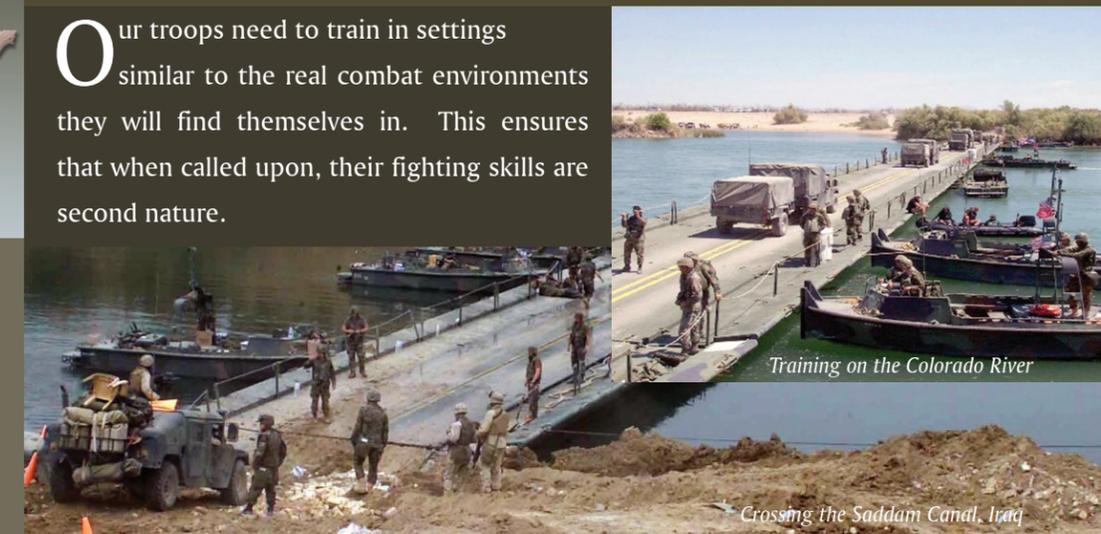

Did You Know In TENNESSEE

- There are four major installations and facilities.
- The DoD budget is greater than \$3.9 billion.
- DoD employs more than 40,000 uniformed and civilian personnel state-wide.

We Must Train As We Fight

Our troops need to train in settings similar to the real combat environments they will find themselves in. This ensures that when called upon, their fighting skills are second nature.

Training on the Colorado River

Crossing the Saddam Canal, Iraq

Maintaining A Natural Environment Is Critical

Our fighting men and women must train in realistic, natural environments. Our commitment to healthy, well-managed natural resources will provide realistic training today and into the future.

Linking DoD And The State

DoD's Regional Environmental Coordinators focus on working cooperatively with state rule-writers and legislators to help maintain realistic training environments. This proactive approach provides solutions that help ensure military readiness.

Sustaining Readiness In Partnership With States

DoD IN TENNESSEE

Naval Support Activity Mid-South

NSA Mid-South encompasses 1,600 acres and serves as the Navy's Human Resources Center for Excellence. The installation's largest commands are the Navy Personnel Command, Navy Recruiting Command, Navy Manpower Analysis Center, and the U.S. Army Corps of Engineers Finance Center. Mid-South houses the Navy's first solar-powered electric car charging station, which will enable the base to recharge its fleet of 17 electric vehicles with renewable electricity and reduce demand on the commercial power grid.

National Guard and other Reserve Components

The Guard and Reserve organize, train, and equip citizen soldiers/airmen to ensure their rapid mobilization for duties within the state, nation and around the world. While all Reserve Components have a federal mission to augment active duty forces in times of crises, the Guard has the additional, unique mission of serving the Governor during state emergencies. Guard and Reserve units are stationed throughout the state.

Milan Army Ammunition Plant

Milan's mission is to load, assemble, pack, store, ship and receive ammunition. It encompasses 22,357 acres and has a storage capacity of 2,270,000 square feet. The plant was redeveloped as the Milan Commercial Complex under the Armament Retooling and Manufacturing Support Program. Because leasehold improvements are available to tenants with little to no initial capital outlay, this redevelopment presents an unparalleled opportunity for growth in the industrial manufacturing arena.

Arnold Air Force Base

Arnold Engineering Development Complex is the world's largest, most advanced complex of flight simulation test facilities. The complex operates 43 aerodynamic and propulsion wind tunnels, rocket and turbine engine test cells, space environmental chambers, arc heaters, ballistic ranges and other specialized units. Many of these test units have capabilities unmatched elsewhere in the U.S. and some unique to the world.

Volunteer Army Ammunition Plant

Located on more than 7,400 acres in Chattanooga, the former ammunition plant was an important Army TNT manufacturing facility from World War II through the Vietnam War. In July 2008, Volkswagen announced it would build a state-of-the-art manufacturing facility on 1,300 acres of VOAAP, which became the keystone for the Enterprise Industrial Park. The park, co-located with VOAAP, features hiking, biking and walking trails, picnic areas, and overlooks.
